Mr. McCLELLAN. I may say to the Senator from Louisiana, as I have said a good many times publicly, that at the time the Committee on Government Operations was created and its jurisdiction assigned by the rules of the Senate, possibly no one had in mind that the committee was being created for the purpose of investigating communism as such. The Internal Security Subcommittee has a much broader jurisdiction, of course, but I think that under the broad terms of the general rules, and having in mind the duties with which the Committee on Governmental Operations is charged, it would be its duty to investigate Communists in Government, if it developed there were any, during the course of an investigation which it was undertaking. However, I may say to the Senator that, since I happen also to be a member of the Internal Security Subcommittee, I have in mind having conferences relative to the work of the respective committees. I have already had one conference along that line, and conferences will be held continually, with the distinguished Senator from Mississippi [Mr. EASTLAND], who is chairman of the Internal Security Subcommittee. We shall undertake to see to it that there will be no duplication of work.

Mr. ELLENDER. Because of the fact that the distinguished Senator serves on both the Internal Security Subcommittee and the Committee on Government Operations, he will be in a position to detect and avoid any duplication between the two Senate committees.

I express the hope that the chairman of the Internal Security Subcommittee, as well as the distinguished Senator to whom I am now speaking, will try to take the matter up with the Un-American Activities Committee of the House of Representatives with the view in mind of avoiding duplication of the work of that committee.

Mr. McCLELLAN. The chairman of the Internal Security Subcommittee, the distinguished Senator from Mississippi [Mr. EASTLAND], Representative WALTER, chairman of the House Un-American Activities Committee, and the chairman of the Permanent Subcommittee on Investigations of the Government Operations Committee, have already had a conference with such objective in mind.

Mr. ELLENDER. Has there been agreement among the chairmen of the three committees that duplication should be avoided?

Mr. McCLELLAN. There has been liaison established between all three committees, to the end that we shall undertake to avoid duplication. However, as I am sure the Senator from Louisiana knows, when an investigation starts, and it is anticipated that it will proceed in a certain direction, sometimes facts develop in the course of the investigation which make it necessary for the investigation to go a little beyond what was originally anticipated would be its scope. However, I again assure the distinguished Senator from Louisiana that the chairmen of the three respective committees have already had a conference with the idea and the view of making certain that there will be as little duplication as possible.

Mr. ELLENDER. As I understand, according to the report filed with the resolution, last year the committee spent $213,812.90. The Senator is now asking for $190,000.

Mr. McCLELLAN. I think the committee actually spent a little more than what the Senator has read, because certain amounts were used for personnel of the committee who were needed for its work. However, it is our purpose to perform the duties of the subcommittee as economically as possible. I regard the budget as a tight one, and the responsibility of the subcommittee to keep within it. It could very well develop that in the course of the labors of the subcommittee, it might have to come before the Senate and ask for more funds, but it is not my intention at this time to do so. The purpose is to do the best job the subcommittee can with the money for which it is asking.

Mr. ELLENDER. Since there has been a meeting of the chairmen of the three committees, I was hopeful that the subcommittee might be able to accomplish its purposes with an amount less than $190,000.

Mr. McCLELLAN. It would depend on what kind of job the Senate desired done. Forgetting for the moment all about Communist infiltration, there is an unlimited field of work which should be covered and there are unlimited duties the subcommittee should perform. I have stated before, and I say again, that I could very well use another 4 or 5 members as investigators on the committee staff. There is a great deal of work such additional personnel could do. However, after all, there is no point in this subcommittee's going forth and developing raw material, so to speak, if the members of the committee do not have time to refine the raw material into a committee investigation and report. However, I think the committee will do its work, and that the members of the staff will be able to do the work assigned to the committee, within the limits of the amount requested.

Mr. ELLENDER. The Senator from Arkansas has about the same number of investigators at his disposal as his predecessor had last year, does he not?

Mr. McCLELLAN. I think there were probably 24 or 25 staff members at one time last year. I have in mind operating with 16, although the budget calls for 18. I intend to start with a staff of 16.

Mr. ELLENDER. What was the number on the staff last year?

Mr. McCLELLAN. I do not wish to exaggerate, but I think at one time the staff consisted of as many as 24 members. Of course, I am including clerical help.

Mr. ELLENDER. I understand; and when the Senator from Arkansas mentions the staff of the present committee, he, of course, includes clerical help?

Mr. McCLELLAN. I do include clerical help. That is the number on the staff we intend to start with. I hope that number will be adequate.

The PRESIDENT pro tempore. The question is on agreeing to the resolution, as amended.

The resolution (S. Res. 41) was agreed to.

PRINTING OF ADDITIONAL COPIES OF THE REPORT ENTITLED "THE KOREAN WAR AND RELATED MATTERS"

Mr. CLEMENTS. Mr. President, I move that the Senate proceed to the immediate consideration of Calendar No. 32, Senate Resolution 56.

The motion was agreed to; and the Senate proceeded to consider the resolution (S. Res. 56) to print for the use of the Committee on the Judiciary additional copies of the report entitled "The Korean War and Related Matters."

Mr. KNOWLAND. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. KNOWLAND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. CLEMENTS. Mr. President, I ask unanimous consent that Senate Resolution 56, Calendar No. 32, be temporarily laid aside.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ELIMINATION OF NEED FOR RENEWAL OF OATHS OF OFFICE UPON CHANGE OF STATUS OF SENATE EMPLOYEES

Mr. CLEMENTS. Mr. President, I move that the Senate proceed to the immediate consideration of Calendar No. 34, Senate bill 913, eliminating the need for renewal of oaths of office in the case of Senate employees with changed status.

The PRESIDENT pro tempore. The bill will be stated by title, for the information of the Senate.

The LEGISLATIVE CLERK. A bill (S. 913) to eliminate the need for renewal of oaths of office upon change of status of employees of the Senate.

The PRESIDENT pro tempore. The question is on agreeing to the motion of the Senator from Kentucky.

The motion was agreed to; and the Senate proceeded to consider the bill (S. 913) to eliminate the need for renewal of oaths of office upon change of status of employees of the Senate, which had been reported from the Committee on Rules and Administration with an amendment, in line 5, after the word "section", to strike out "1756" and insert "1757", so as to make the bill read:

Be it enacted, etc., That no person who, upon appointment as an employee of the Senate, has subscribed or hereafter subscribes to the oath of office required by section 1757 of the Revised Statutes of the United States, as amended, shall be required to renew such oath so long as the service of such person as an employee of the Senate is continuous.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

REGULATION OF NETS IN ALASKA WATERS

Mr. CLEMENTS. Mr. President, I move that the Senate proceed to the immediate consideration of Calendar 35, Senate bill 456, relating to the regulation of nets in Alaska waters.

The PRESIDENT pro tempore. The bill will be stated by title, for the information of the Senate.

The LEGISLATIVE CLERK. A bill (S. 456) relating to the regulation of nets in Alaska waters.

The PRESIDENT pro tempore. The question is on agreeing to the motion of the Senator from Kentucky.

The motion was agreed to; and the Senate proceeded to consider the bill relating to the regulation of nets in Alaska waters, which had been reported from the Committee on Interstate and Foreign Commerce with amendments, on page 2, line 3, after the word "set", insert "gill"; and in line 4, after the word "stake", insert "gill", so as to make the bill read:

Be it enacted, etc., That the last sentence of section 3 of the act entitled "An act for the protection and regulation of the fisheries of Alaska," approved June 26, 1906, as amended (48 U. S. C., sec. 233), is hereby amended to read as follows: "It shall be unlawful to lay or set any seine or net of any kind within 100 yards of any other seine, net, or other fishing appliance which is being or which has been laid or set in any of the waters of Alaska, or to drive or to construct any trap or any other fixed fishing appliance, except a set gill net, stake gill net, or anchored gill net, within 600 yards laterally or within 100 yards endwise of any other trap or fixed fishing appliance."

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

PRINTING OF ADDITIONAL COPIES OF THE REPORT ENTITLED "THE KOREAN WAR AND RELATED MATTERS"

Mr. CLEMENTS. Mr. President, I ask that the Senate resume the consideration of Calendar 32, Senate Resolution 56, to print for the use of the Committee on the Judiciary additional copies of the report entitled "The Korean War and Related Matters."

There being no objection, the Senate resumed the consideration of the resolution (S. Res. 56) to print for the use of the Committee on the Judiciary additional copies of the report entitled "The Korean War and Related Matters."

The PRESIDENT pro tempore. The resolution is before the Senate. If there be no amendment to be proposed, the question is on agreeing to the resolution.

The resolution (S. Res. 56) was agreed to as follows:

Resolved, That there be printed for the use of the Committee on the Judiciary 28,000 additional copies of the report entitled "The Korean War and Related Matters," prepared by the Internal Security Subcommittee of the Committee on the Judiciary during the 83d Congress.

PRINTING OF ADDITIONAL COPIES OF PARTS OF HEARINGS ON INTERLOCKING SUBVERSION IN GOVERNMENT DEPARTMENTS

Mr. CLEMENTS. Mr. President, I move that the Senate proceed to the consideration of Senate Concurrent Resolution 9.

The PRESIDENT pro tempore. The Secretary will state the concurrent resolution by title for the information of the Senate.

The LEGISLATIVE CLERK. A concurrent resolution (S. Con. Res. 9) to print for the use of the Committee on the Judiciary additional copies of certain parts of the hearings on interlocking subversion in Government departments.

The PRESIDENT pro tempore. The question is on agreeing to the motion of the Senator from Kentucky.

The motion was agreed to; and the concurrent resolution was considered and agreed to, as follows:

Resolved by the Senate (the House of Representatives concurring), That there be printed for the use of the Senate Committee on the Judiciary not to exceed 20,000 additional copies of parts 21, 22, 24, 25, and 26 of the hearings entitled "Interlocking Subversion in Government Departments," held before a subcommittee of the above committee during the 83d Congress.

INCREASE IN SALARIES OF JUSTICES AND JUDGES OF UNITED STATES COURTS AND MEMBERS OF CONGRESS

Mr. CLEMENTS. Mr. President, I move that the Senate proceed to the consideration of Calendar 26, S. 462.

The PRESIDENT pro tempore. The Secretary will state the bill by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (S. 462) to increase the salaries of justices and judges of the United States courts, Members of Congress, and for other purposes.

The PRESIDENT pro tempore. The question is on agreeing to the motion of the Senator from Kentucky.

The motion was agreed to, and the Senate proceeded to consider the bill (S. 462) to increase the salaries of justices and judges of United States courts, Members of Congress, and for other purposes, which had been reported from the Committee on the Judiciary with an amendment to strike out all after the enacting clause, and insert:

That (a) section 5 of title 28, United States Code, relating to the Chief Justice of the United States and to the Associate Justices of the Supreme Court of the United States, is amended by striking out "$25,500" and substituting therefor "$35,000", and by striking out "$25,000" and substituting therefor "$34,500."

(b) Section 44 (d) of title 28, United States Code, relating to circuit judges, is amended by striking out "$17,500" and substituting therefor "$25,500."

(c) Section 135 of title 28, United States Code, relating to district judges, is amended by striking out "$15,000" and substituting therefor "$22,500", and by striking out "$15,500" and substituting therefor "$23,000."

(d) Section 173 of title 28, United States Code, relating to judges of the Court of Claims, is amended by striking out "$17,500" and substituting therefor "$25,500."

(e) Section 213 of title 28, United States Code, relating to judges of the Court of Customs and Patent Appeals, is amended by striking out "$17,500" and substituting therefor "$25,500."

(f) Section 252 of title 28, United States Code, relating to judges of the Customs Court, is amended by striking out "$15,000" and substituting therefor "$22,500."

(g) The first paragraph of section 4 of the act approved June 6, 1900 (31 Stat. 322; 48 U. S. C., sec. 101), as amended, relating to the District Court for the District of Alaska, is amended by striking out "$15,000" and substituting therefor "$22,500."

(h) Section 7443 (c) of the Internal Revenue Code of 1954, relating to judges of the Tax Court of the United States, is amended to read as follows:

"(c) Salary: Each judge shall receive salary at the rate of $22,500 per annum, to be paid in monthly installments."

(i) (1) Article 67 of the Uniform Code of Military Justice, relating to judges of the Court of Military Appeals, is amended by striking out "$17,500" and substituting therefor "$25,500."

(2) Such article is further amended by adding at the end of subdivision (a) (1) thereof the following: "Each judge shall, upon his certificate, be paid by the Secretary of Defense all necessary traveling expenses, and also his reasonable maintenance expenses actually incurred, not exceeding $15 per day, while attending court or transacting official business at a place other than his official station. The official station of such judges for such purpose shall be the District of Columbia."

SEC. 2. (a) Section 601 (a) of the Legislative Reorganization Act of 1946, as amended, is amended to read as follows:

"(a) The compensation of Senators, Representatives in Congress, Delegates from the Territories, and the Resident Commissioner from Puerto Rico shall be at the rate of $22,500 per annum each; and the compensation of the Speaker of the House of Representatives shall be at the rate of $35,000 per annum."

(b) Section 601 (b) of the Legislative Reorganization Act of 1946, as amended (relative to expense allowances of Members of Congress), is hereby repealed.

(c) Section 104 of title 3 of the United States Code (relating to the compensation of the Vice President) is amended by striking out "$30,000" and substituting therefor "$35,000."

SEC. 3. In addition to any amounts heretofore authorized by law for travel, each Senator, Representative, Delegate, and the Resident Commissioner from Puerto Rico, shall be allowed, under regulations prescribed by the Committee on Rules and Administration of the Senate and the Committee on House Administration of the House of Representatives, respectively, out of the contingent fund of the Senate or House of Representatives, as the case may be, the expenses incurred in making not to exceed five round trips per year, beginning at noon of January 3 of a calendar year and ending at noon on January 3 of the succeeding calendar year, between Washington, D. C., and the State, congressional district, Territory, or possession which he represents in Congress.

SEC. 4. The provisions of this act shall take effect on the 1st day of the month following the date of enactment of this act.

Mr. CLEMENTS. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. CLEMENTS. Mr. President, I move that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. O'MAHONEY in the chair). Without objection, it is so ordered.

The question is on agreeing to the committee amendment.

Mr. KEFAUVER. Mr. President, on this question I ask for the yeas and nays.

Mr. BUSH. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Connecticut will state it.

Mr. BUSH. What is the request now before the Senate?

The PRESIDING OFFICER. The request is for the yeas and nays on agreeing to the committee amendment.

Mr. BUSH. Granting the unanimous consent on that question will not block amendments to the bill will it?

The PRESIDING OFFICER. The Senator is correct. Is the request for the yeas and nays sufficiently seconded?

The yeas and nays were not ordered.

Mr. KEFAUVER. At a later time I shall renew the request for the yeas and nays.

Mr. President, legislation to increase judicial and congressional salaries has been the subject of extensive hearings, thorough study, and deliberation over a period of years.

In addition to the other studies and hearings, I wish to call the attention of Senators to the hearings held before the Committee on the Judiciary, lasting 2 full days. Those hearings have been printed. Witnesses who might be opposed to the proposed legislation were invited to appear and testify at the hearings. No witnesses appeared in opposition to the measure.

Among the witnesses who testified before the Subcommittee on the Judiciary were the Senator from Illinois [Mr. DIRKSEN]; Mr. Bernard G. Segal, chairman of the Commission on Judicial and Congressional Salaries; Mr. Lloyd Wright, president of the American Bar Association; a number of judges and Members of Congress who had resigned from the bench and from Congress because of the inadequate salaries; and many other witnesses.

Included in the hearings were editorials from newspapers all over the United States, most of which support the conclusions of the Segal Commission.

On Wednesday, February 16, the House passed H. R. 3828, which is substantially the same as the Senate bill, S. 462, as regards salaries. There are, however, some differences between the two bills. In addition to judicial and congressional salary raises, which, except for the now existing expense allowance, are identical in the two versions, the House bill includes salary raises for United States attorneys, assistant United States attorneys, the Deputy Attorney General, and the Solicitor General; and section 4 of the House bill raises the ceiling with reference to professional and clerical staff members. That section further provides that the ceiling now in existence for legislative employees be amended to coincide with the highest grade established by the Classification Act of 1949, as amended.

On the other hand, the Senate bill contains a provision not included in the House bill, in that it provides for five round trips a year for each Member of Congress between the District of Columbia and the State, district, or Territory which he represents, to be paid according to rules and regulations to be prescribed by the Committee on Rules and Administration of the Senate and the Committee on House Administration of the House of Representatives. It is contemplated that the allowance for these trips shall be based on the actual expenses incurred, not on 20 cents a mile, which is the basis now used for the one trip a year. The provision for 20 cents a mile contemplated that on one trip the Member would bring his family to Washington.

With regard to the pay of Members of the House and Senators, the two bills differ in the respect that while the salary is the same the House version retains the now existing $2,500 expense allowance.

Now that I have touched upon the differences between the two bills, I should like to point out briefly the history of this proposed legislation. Congressional and judicial salary raises have been the subject of legislation for some time past. In the 83d Congress, 1st session, the Committee on the Judiciary reported favorably to the Senate S. 1663, which was designed to increase the salaries of judges of the United States courts and Members of Congress, as well as United States attorneys and their assistants. The bill was introduced by the late Senator McCarran, of Nevada. Subsequent to the favorable report of that bill, the President's Commission on Judicial and Congressional Salaries was established by Public Law 220, 83d Congress. In July 1953 the Senator from Illinois [Mr. DIRKSEN] introduced a bill which resulted in Public Law 220, 83d Congress. It was the duty of this Commission to hold hearings on the subject matter and report their findings to the Congress. By Public Law 220 the Commission was to be made up of outstanding members of agriculture, labor, and the business and professions, so that the members of the Commission were selected in equal numbers from the principal segments of the American economy. The President was to designate the Chairman, and of the 18 voting members 6 were to be appointed by the President, 6 by the Chief Justice of the United States, and 3 each by the President of the Senate and the Speaker of the House of Representatives. In addition to this voting group, there were 9 nonvoting advisory members, 6 of whom were Members of the 82d or 83d Congresses, 3 each to be appointed by the President of the Senate and the Speaker of the House, and 3 judges of the courts of the United States, to be appointed by the Chief Justice.

Mr. President, this Commission was an outstanding, able, diligent, and conscientious body. The Senate Judiciary Committee hearings list, at page 48, the names, avocations, and connections of the various members of the Commission who were appointed by the President, the Chief Justice, the Speaker, and the Vice President, from business and professional groups, from labor, and from agriculture. It will be seen that the members came from all parts of the United States and represented an excellent cross section of our people and our economy. It will also be seen that the advisory members appointed by the Chief Justice, the Vice President, and the Speaker of the House were distinguished Members of the Senate and the House, and leaders of American business, agriculture, and the professions.

The members of the Commission assembled in Washington. This Commission had no preconceived ideas regarding the question of salary raises, and went into the subject matter with an open mind.

The first thing they did, Mr. President, was to divide themselves into seven task forces, with members of labor, agriculture, and business of the Commission on each task force. Senators have on their desks the reports of the task forces of the various groups. There was a task force on comparative salaries in business. There was another task force on the standard of living evaluation. There was another task force on comparative salaries in the professions and in agriculture. There was another task force on comparative salaries in the field of labor. There was another task force on staff expense, office, and other services furnished by the Federal Government. There was another task force on salaries of the Federal judiciary.

These various task forces undertook to secure from different segments of the American economy information as to what persons in comparable positions were earning. The reports are fully documented. There are many comparisons in the very thorough reports. The conclusion of all the task forces was that district judges and Members of Congress should receive salaries of $27,500 a year.

The Commission held public hearings in Washington. I have here the hearings before the Commission which were held in Washington in the latter part of 1953 and in the early part of 1954. The Commission called before it almost 70 witnesses, whose testimony is contained in the volume I have here. The witnesses were leaders in their fields, and the record is very impressive. Nearly all the witnesses testified in favor of substantial salary increases for Members of the Congress and the judiciary. I think there were only three who testified against the proposal.

Mr. President, the Commission sent out some 10,000 letters of inquiry, not suggesting what the answers should be, but simply asking the opinions and advice of people all over the United States, including the heads of associations, men and women prominent in agriculture, business, and labor, and the editors of all the daily newspapers. The replies are contained in the appendix to the hearings of the joint commission. The letters received indicate that approximately 10 to 1 of the writers were in favor of increases for United States judges and Members of Congress. Of course, they did not all agree as to the amount of the increase, but it was upon all these data that the Commission made its findings.

The Commission recommended salary raises for the various categories under study, as follows:

The Chief Justice of the United States from $25,500 to $40,000.

The Associate Justices of the Supreme Court from $25,000 to $39,500.

Judges of the United States courts of appeal from $17,500 to $30,500.

Judges of the United States Court of Claims from $17,500 to $30,500.

Judges of the United States Court of Customs and Patent Appeals from $17,500 to $30,500.

Judges of the Court of Military Appeals from $17,500 to $30,500.

Judges of the United States district courts from $15,000 to $27,500.

Chief judge of the United States District Court for the District of Columbia from $15,500 to $28,000.

Judges of the United States Customs Court from $15,000 to $27,500.

Judges of the Tax Court of the United States from $15,000 to $27,500.

Vice President of the United States from $30,000 to $40,000.

Speaker of the House of Representatives from $30,000 to $40,000.

Members of Congress from $15,000 to $27,500.

Mr. President, on page 3 of the report is a list of the recommendations of the Segal Commission, and they are unanimous recommendations. Some members of the Commission were in favor of salary raises higher than $27,500. Some few members felt that $25,000 might be an adequate figure, but the unanimous conclusion of these distinguished persons appointed by the President, the Chief Justice, the Vice President, and the Speaker of the House was that district judges and Members of Congress should receive salaries of $27,500.

At this point I think it appropriate to pay a very high compliment to Mr. Bernard Segal, of Philadelphia, Chairman of the Commission, and to the other members of the President's Commission on Judicial and Congressional Salaries. The Commission did its work well and thoroughly. It conducted full hearings. Each member had an opportunity to express his own opinion. I think the Commission has rendered an important public service in trying to ascertain what would be adequate and proper salaries for the positions of which they were making a study.

Mr. Segal testified fully as to the work of his Commission. In hearings before the Senate Subcommittee on the Judiciary, he said he thought the salaries of Members of Congress should be $27,500. This also was the recommendation of the special Commission headed by the former President of the United States, Mr. Herbert Hoover. The Hoover Commission recommended passage of legislation similar to that introduced in the last Congress by the late Senator McCarran, who was a former chairman of the Committee on the Judiciary. Senator McCarran's bill was a little less than the recommendations of the report of the Segal Commission.

Furthermore, the American Bar Association, through its house of delegates, has on two occasions recommended enactment of the bill fixing the salaries as set forth in the Segal Commission report.

As chairman of the subcommittee, I sent telegrams to all the State bar associations, asking their advice about the matter. Most of the replies we received are included in the report of the hearings, beginning at page 295. Some replies were received after the hearings had been printed.

I believe that the State bar association of every State in the Nation has approved generally the salary recommendations of the Segal Commission, or at least has approved a recommendation that the judges should have adequate and substantially increased compensation.

It is my opinion that the conclusion of the Segal Commission was justified in the light of all the hearings. The original bill introduced by the chairman of the Committee on the Judiciary, the distinguished senior Senator from West Virginia [Mr. KILGORE], carried out the recommendations of the Segal Commission report. The Senator from West Virginia, as chairman of the committee, felt that he should present to the committee for its consideration the exact recommendations of the Segal Commission.

The bill as amended by the committee reduces the recommendations of the Segal report and the amount in the original bill by $5,000 all across the board.

On page 3 of the report of the Committee on the Judiciary will be found the Segal Commission's recommendations. In a parallel column will be found the amounts as set forth in S. 462, as amended. It will be seen that all the recommendations are reduced by $5,000. In my opinion, the salaries thus proposed represent the minimum amounts which should be fixed for judicial and congressional compensation.

The press of the Nation, as is evidenced by editorials included in the hearings of the Committee on the Judiciary, and by editorials published subsequent to the hearings, most of which have been printed and are now on the desks of Senators, substantially agree with the conclusions of the Segal Commission.

The Commission pointed out the increased responsibilities of Members of Congress, stating that Members now have to spend more time—indeed, full time—upon their business as Members of Congress; that their expenses are greater because it is necessary to do more entertaining and to see more of their constituents. The Commission also pointed out that problems at home are more acute, making it necessary for Members of Congress to return to their homes more frequently. The Commission further pointed out that it was in the public interest to provide salary increases for Members of Congress, stating that the Nation thereby would be better served.

It was also pointed out in the report of the Segal Commission and in the hearings of the Committee on the Judiciary that many capable Members of the Senate and the House and many excellent Federal judges have left either Congress or the judiciary because of the inadequate salaries now paid.

The Senate bill, which is now before us, recommends in each category referred to a reduction of $5,000 from the recommendations of the President's Commission on Judicial and Congressional Salaries. The Committee on the Judiciary was of the opinion that, under all the circumstances, the increase proposed by the bill was a fair, just, and reasonable increase, and should be accorded.

My own feeling is that a $25,000 salary would be fully justified; but there is naturally some hesitation about the amount of increase to be granted, when Members are placed in the unfortunate position of having to vote upon increasing their own salaries. The conclusion of the committee would seem to be fair, in view of the fact that the amounts proposed are substantially less than the figures recommended by an independent, unbiased commission, after extensive hearings on the subject.

So far as salaries are concerned, the bill as reported by the Senate Committee on the Judiciary is closer to S. 540, introduced by the Senator from Georgia [Mr. GEORGE] and the Senator from New Hampshire [Mr. BRIDGES], than to other companion bills. As a matter of fact, the bill offered by the Senator from Georgia and the Senator from New Hampshire, S. 540, provided for a salary of $22,500 for both Federal district judges and Members of Congress.

A review of the history of judicial and congressional salaries is contained in Senate Report No. 25 on S. 462, which, I believe, is on the desk of every Senator.

That report is detailed and informative as to what has been the past history of congressional salaries and the salaries of judges.

It also points out the increased amount of taxes, the increased cost of living, and the devaluation of the dollar as compared with 1939.

At this point I should like to draw attention to the effect of the proposed increases. Let us take, for example, the salary of a circuit judge. On January 1, 1937, a circuit judge's salary was not taxable either by the Federal Government or a State government. The salary was $12,500 net to the judge. The 1946 act increased the salary to $17,500, but this salary was subject to a Federal income tax, and the same is true of the proposed increase to $25,500. The tax on this figure amounts to $6,534, leaving a balance of $18,966. The net gain to the judge over his 1937 salary of $12,500 is, therefore, $6,466. The cost of living, according to available figures, was indexed at 103.0 in 1937, and in 1954 the index figure had risen to 191.1. If the proposed increase is granted by Congress, the net to the judge, deducting the tax of $6,534 from $25,500, will be $18,966, leaving, as stated, a gain of $6,466 over his 1937 salary. This amount will be an aid in overcoming the increased cost of living, but will still leave the judge with a net spendable salary representing a lower purchasing power than his net spendable salary in 1937, for, in terms of 1939 dollars, the new salary will be only $9,862 net as compared with a former net of $12,500. This is due to the fact that in 1939, giving the value of a dollar to be $1, in 1954 that same dollar had a purchasing power of only 52 cents. For district judges a similar computation, in terms of 1939 dollars, would leave a new net spendable salary of $8,895 as compared with the 1937 spendable salary of $10,000. These same figures and computations run comparably through all of the proposed raises.

The figures will be found on page 6 of the report, and show what the increases will amount to in the case of the various judges who are provided for in the bill, in terms of the present value of the dollar.

In the case of Senators, Representatives, and Delegates, in 1939 the basic compensation was $10,000, with no additional expense allowance. The Federal income tax on that amount was $372, leaving a net salary of $9,628. By the act of August 2, 1946, the basic compensation was increased to $12,500, and by the enactment of June 13, 1945, Members of Congress received an expense allowance in the amount of $2,500, which was taxable. The act of August 2, 1946, made the expense allowance tax-free, but the act of October 20, 1951, again made the allowance taxable, and that is now the law. Therefore, the present compensation of $15,000, including the expense allowance, is subject to a Federal income tax. It is estimated that the tax for 1954 will be $2,148, leaving a net salary of $12,852. This, of course, does not include State taxes. Therefore, the present compensation of $15,000, with the additional tax deduction of $3,000 allowed for living expenses, will produce in 1954 a net salary of only $3,224 more than the net salary in 1939 of $9,628. Increasing the compensation to $22,500, as is recommended, will produce, after deduction of an estimated tax of $4,362, a net of $18,138, or a net gain of $8,510 over the net salary for 1939. As with the judges, if we consider the increase in the cost of living, it is apparent that for each Representative and Senator the purchasing power of this proposed compensation, after taxes, will be slightly less than his purchasing power, after taxes, in 1939. Using the 1939 dollar as worth $1, after taxes the Senator or Representative receives $9,628 as a spendable salary. In contrast, the 1954 dollar was worth 52 cents, so that, after taxes, and taking into account the cost-of-living index, the spendable salary of a Senator or Representative would be $9,432 on his proposed salary of $22,500.

For anyone who may be interested, these facts are set forth on pages 10 and 11 of the report. There is one mistake in the report. It reads that the purchasing power in 1939 would be "slightly higher." It should read "slightly less." So the salary increases proposed in the bill can be fully justified, and a little more than justified, on the basis of the increased cost of living and increased taxes; to say nothing of the fact that in 1939, and before that year, Congress was in session only a part of the year. The duties of Members of Congress were not so heavy as they are now. We have more responsibilities now. We have to spend more time on the job.

I am not going to burden the Senate further with figures in connection with the proposed raises, because the hearings and reports on this subject during the past few years are replete with information on that subject, but I do desire to point out, as the figures I have quoted indicate, that the net effect of these raises will be only to bring the salaries up to near a par with salaries existing in 1937 and 1939.

Some persons may think that such raises would constitute a windfall, but the fact of the matter is that they would only give back to Representatives, Senators, and judges a spendable salary comparable to what they had in years past. While wages and incomes in most categories have increased over the years and kept some semblance of balance with the increased cost of living and increased taxes, congressional and judicial salaries have not kept pace. I believe the figures I have referred to demonstrate that fact beyond any doubt.

As to the cost of this proposed legislation, the report of the President's Commission on Judicial and Congressional Salaries states that the cost, in terms of the national budget, would amount to only one-hundredth of 1 percent. That figure of one-hundredth of 1 percent was based on salaries of $27,500 for Members of Congress and Federal judges. The cost would be a great deal less than one-hundredth of 1 percent if the provisions of the bill now before the Senate were used for the computation.

Mr. LANGER. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. ERVIN in the chair). Does the Senator from Tennessee yield to the Senator from North Dakota?

Mr. LANGER. I do not wish to interrupt the Senator from Tennessee, but when he has completed his statement I should like to ask him a question.

Mr. KEFAUVER. I shall complete my statement in a few moments.

On the basis of the statement I have just made as to the report of the President's Commission, the proposed legislation would cost less than the figure given, for the reason that in all categories there has been a reduction in the amounts recommended by the Commission. The actual cost of these raises to the United States, after taxes have been deducted, would be as follows: For the judiciary, $2,073,824; for congressional increases, $2,822,090; or a total amount of $4,895,914.

The Federal judiciary, like the Congress, is one of the major branches of the Government, and in many respects its actions more closely affect the daily lives of people than do the actions of either the executive or legislative branch. As Mr. Chief Justice Marshall observed:

> The judicial department comes home in its effects to every man's fireside; it passes on his property, his reputation, his life, his all.

Contact with the people by the Federal courts is a daily occurrence, and the regard in which the people hold courts form the bulwark of our American system of government. It is advisable and necessary to have on the bench judges of the highest caliber, and in order to accomplish this purpose they must be paid a salary which is fair, just, and reasonable under all of the circumstances. For the benefit of the citizens who appear before them, they must have some feeling of security, and they must be free from worries, other than those incident to the performance of their judicial duties. The hearings disclosed that on several occasions judges have resigned, not because they had a dislike for their work or position, but because of growing families and the failure to receive a salary sufficient to provide for their wives and children, in case of their demise.

One of those who resigned was a Judge Kennedy, who was an outstanding judge in New York. Recently I talked with another Federal judge in New York, who had made a fine judicial record, and he followed Judge Kennedy's course. Judge Kennedy testified that he left the Federal judiciary because he simply could not make enough money to provide for his family and security in the future. He testified that his income as a practicing lawyer was such that for the year after he resigned from the bench he paid $32,000 in income taxes. His tax alone amounted to more than twice as much as his salary as a United States district judge. It can readily be seen that while the United States Government should not necessarily pay rewards to judges on the bench, at the same time a reasonable living salary should be provided The committee believed, and I agree that such a reasonable salary is provided in the proposal now before the Senate.

A penurious policy which deprives our citizens of top-flight judicial personnel is shortsighted and dangerous. Responsible officers have forewarned us, "pay adequate salaries for quality or be content with less." Public service, for all its attraction, cannot command the services of the best talent if a necessary concomitant of service is financial insecurity.

The same arguments apply to the Congress. There is no business bigger than the business of government. Until modern times it was customary for the Congress to meet for only about 3 months in each session. That is no longer the case. Today adjournments are few and far between, and the session is practically continuous. It is apparent that the Congress of the United States, as a coordinate branch of our Government, is equally as important as the executive and the judicial branches. Obviously its membership is affected by those things which affect also the membership of the other two branches, such as the cost of living and the necessity for meeting their reasonable personal and family demands without fear or worry, so that the Members of Congress may apply themselves to the responsibilities of their office. The Senators and Representatives, like others in the Government, have families to support, and must also maintain themselves in reasonably dignified circumstances, both at home and in Washington, and at the same time be able to devote their energies and their time to their responsibilities.

The emoluments of office, so far as Members of the Congress are concerned, should be such as reasonably to approximate the compensation of those in similar situations in private life, though admittedly the analogy is a weak one because the responsibility of the Congress far outweighs in nature that of any private concern. The committee has been and is of the opinion that the raises in this category provide such a reasonable return to the Members of Congress. Again, let me hark back to the fact that, in essence, this proposed legislation would only bring Members of the House, Senators, and judges close to a parity in spendable salary with that which they received in 1939.

A student of the testimony given on this subject in the past few years must inevitably come to the conclusion that the pending proposals are amply justified, and while there have been individuals who oppose such legislation, for one reason or another, still there has not come to my attention any organized segment of our economy which has opposed the suggested raises.

I might also point out that for the past year or more newspaper editorial comment has been overwhelmingly in favor of these salary increases. I shall, at the conclusion of my remarks, submit a number of editorials for the RECORD.

As a closing remark I should like to call attention to the fact that this proposal has been unanimously supported by all segments of the American economy, and was specifically endorsed and recommended by the President of the United States in his state of the Union message to the 84th Congress.

I have tried to cover this subject generally, from all of its facets, in order to give the Senate a lucid picture of the effect of this bill and the need for it. I shall be happy, however, to try to answer any questions at this time that may be in the minds of my colleagues and which are as yet unanswered.

Mr. LANGER. Mr. President, will the Senator from Tennessee yield to me?

Mr. KEFAUVER. I yield; or does the Senator from North Dakota wish me to yield the floor?

Mr. LANGER. No; I simply wish to ask some questions.

Mr. KEFAUVER. Then I am very glad to yield, Mr. President.

Mr. LANGER. I do not think the report shows that when the bill was before the committee, I voted against reporting it favorably.

Mr. KEFAUVER. I am sure the records of the Judiciary Committee show that to be so.

Mr. LANGER. But the report does not show it, I believe.

Mr. KEFAUVER. That is correct; the report does not show it.

Mr. LANGER. It is my understanding that the chairman of the Judiciary Committee, the Senator from West Virginia [Mr. KILGORE], and the ranking Republican Member, the senior Senator from Wisconsin [Mr. WILEY], both voted in favor of reporting the bill favorably.

Mr. KEFAUVER. Yes; that is my understanding. In fact, I know that is true. Of course, the votes in the Judiciary Committee are open for public inspection.

Mr. LANGER. As I recall, the vote was 11 to 1.

Mr. KEFAUVER. Yes; I believe there were not more than two votes against reporting the bill.

Mr. LANGER. Does the Senator from Tennessee know of any State which today is suffering because the Federal judges are not excellent ones?

Mr. KEFAUVER. On the whole, I believe the States have excellent Federal Judges. I also know that many of the Federal judges are making a sacrifice by serving in that capacity. I know that the Attorney General testified that sometimes it was becoming more difficult to interest some of our better and more outstanding lawyers in accepting appointment to the Federal judiciary. But I do not know of any State which today is suffering because of the caliber of the Federal judges. However, I do not think that is any reason why they should not be paid fair compensation.

Mr. LANGER. Mr. President, will the Senator yield further to me?

Mr. KEFAUVER. I yield.

Mr. LANGER. Let us consider the Senator's own State of Tennessee. My recollection is that when the last vacancy occurred in the Federal judiciary in Tennessee, there were a great many candidates of excellent character.

Mr. KEFAUVER. I think that is true.

Mr. LANGER. Does the Senator from Tennessee know of any choicer plum for anyone who is a lawyer and who seeks appointment to the Federal service, than appointment as a Federal judge, at a lifetime salary of $15,000?

Mr. KEFAUVER. In the case of one who seeks appointment to the Federal service, I think that appointment as a Federal judge makes an excellent position. Of course, there are always those who are ready and anxious to be judges. But even though there is a great deal of honor and even though there are many other benefits connected with such appointment, I still believe that such appointments should carry with them reasonable salaries.

Mr. LANGER. Does the Senator from Tennessee not believe that a mail carrier or a postal clerk or any other person connected with the Federal service requires just as much to eat and is faced with the same necessity to educate his children? So if there is to be a salary increase, should not the Federal workers receive a salary increase that will be proportionate to the salary increase in the case of the judiciary and the Members of Congress? In that connection, I refer to both the Members of the House of Representatives and the Members of the Senate.

Mr. KEFAUVER. I fully agree with the Senator from North Dakota. As a matter of fact, in the case of the Members of Congress or the judiciary, generally speaking a salary increase or a salary adjustment occurs approximately every 20 years, whereas in the case of other civil servants a salary increase occurs more frequently. As a matter of fact, the Federal employees generally have had, I believe, five salary increases since Senators and Representatives and judges were given a salary increase—which occurred last in 1946, as I recall.

If we consider the 1939 figures, we find that the salary increases for Federal employees generally have been proportionately greater than the salary increase for judges and Members of Congress.

However, I am not arguing that the Federal employees generally are not also entitled to a salary increase or to adequate compensation. In my opinion the Federal Government would be better and would be able to perform its work better if it provided reasonable and just compensation for all its employees. In fairness, such reasonable and just compensation should extend to postal clerks and to all other Federal employees, as well as to Members of Congress and judges.

Mr. LANGER. Is it not true that the President of the United States recommended a 5 percent salary increase for Federal employees; and is it not also true that if the bill now before the Senate is enacted into law, the judiciary and the Members of Congress will receive a 66 percent increase in salary?

Mr. KEFAUVER. No, that is not entirely correct. Congressmen would receive 50 percent. However, the other Federal employees have had some salary increases in the past, although I am sure they are entitled to some further increase now. The other Federal employees have had five salary increases since the judiciary and the Members of Congress have had any salary increase.

Mr. LANGER. Let me call attention to the mail handlers. In 1939, they received a salary of $1,920. We ask veterans who are married and have one

child to live on that salary—although perhaps subsequently they receive a salary increase in the amount of $500. It is true that is quite a large percentage increase, as compared to the salaries that such employees have received. But today the average salary of the postal employees is between $3,200 and $3,500, with an occasional salary of $4,000.

Does not the Senator from Tennessee believe it to be rather discriminatory for us to raise the salaries of judges from $15,000 to $22,500, whereas, if we follow the recommendation of the President of the United States, we would be raising the salaries of Federal employees generally only 5 percent? Would it not be fair, if we are to raise the salaries of Government employees, to raise all Government employees' salaries alike—including those of judges, Members of Congress, and all other Federal employees? In short, should not all be increased in the same proportion?

Mr. KEFAUVER. I think it would be fair to do so, if our salaries were raised at the same time, too. But that has not been done in the past. For a long time the salary increases of the judiciary and the Members of Congress have lagged behind, as compared to the increases in the salaries of Federal employees generally. It is more difficult to obtain an increase in the salaries of Members of Congress and the judiciary than it is to obtain an increase in the salaries of Federal employees generally.

Let me say that although Federal employees are a loyal and hard-working group, the salary increases they have received have largely been behind the increase in the cost of living. So far as I am concerned, I wish to deal fairly with them.

On the other hand, I think the enactment of the pending measure would increase the salaries of Members of Congress in just about the same proportion or pecentage that the salaries of other Federal employees have already been increased.

Mr. LANGER. Mr. President, will the Senator from Tennessee yield further to me?

Mr. KEFAUVER. Yes, Mr. President; I am very happy to yield to the Senator from North Dakota.

Mr. LANGER. Proposals for an increase in the salaries of Members of Congress and judges have been before the Congress at various times. I have always taken the position—and I wish to know whether the Senator from Tennessee agrees with me about it—that when a person becomes a candidate for election to Congress, either to the House of Representatives or to the Senate, he knows exactly what the salary will be. As of recent years, he has known the salary would be $15,000. If he did not wish to run for election to a job paying a $15,000 salary, no one forced him to run for election to it. Is it not true that if a Member of Congress is dissatisfied with the $15,000 salary, he can resign at any time he chooses to do so?

Does not the Senator from Tennessee believe that the pending measure should be amended, so as to provide that the proposed salary increases shall apply only to Senators and Representatives hereafter elected? Certainly, when I became a candidate for election to the office of United States Senator, other men and certain women in North Dakota might have been candidates for election to that office, if the salary had been $25,000; and I can envision a situation in which a man or a woman did not run for election to that office because he said, "I do not think the salary of $15,000 is sufficient."

So does not the Senator from Tennessee believe that the pending bill should be amended, so as to apply only to Senators and Representatives who may hereafter be elected to Congress? I may add that I believe the same should be true of judges.

Mr. KEFAUVER. No, Mr. President; I do not think the bill should be so amended, for if that were to be done there would never be a salary increase for Members of Congress, in view of the fact that only one-third of the Members of the Senate will come up for election next year, and an additional one-third 2 years thereafter, and the remaining one-third, 2 years thereafter. Thus, any salary increase would have to be put off for 6 years, if the proposal of the Senator from North Dakota were to be put into effect.

Furthermore, if that were to happen—under the philosophy of the Senator from North Dakota—the present salary of Members of Congress would be $1,500 a year, or perhaps $6 a day. Originally the salaries of Members of Congress were $6 a day. Later they were $5,000 a year.

In view of the increase in the cost of living and the increased financial requirements in connection with service in Congress, I think it is the duty of Members of Congress to vote for themselves a reasonable salary; and I do not think there is anything wrong with their doing so, particularly when a nonpartisan commission, most of the members of which were not appointed by anyone connected with Congress, has gone into all these arguments, and has made the recommendation that the salary increase be $5,000 more than the increase provided in the pending bill, as the Senator from North Dakota knows.

Mr. LANGER. The distinguished Senator from Tennessee mentioned the fact that the present President of the United States had recommended a salary of $25,000 for Senators or Representatives. Of course, the Senator from Tennessee is familiar with the fact that when Mr. Truman was President, he also recommended a $25,000 salary for Members of Congress.

Mr. KEFAUVER. Yes; President Truman did that. I do not know whether the present President recommended a specific amount. In his state of the Union message, he said he was in favor of the proposal; and I take it that he must have been speaking of the Segal Commission's proposal, although I do not believe the President stated a specific amount.

Mr. LANGER. Does not the distinguished Senator from Tennessee believe that at the present time the economic condition of the United States is not so high as some of the newspapers would have us believe?

Mr. KEFAUVER. Yes; I think the Nation's economy is in more danger than some of the optimistic newspapers would have us believe.

Mr. LANGER. For instance, I have been in touch with the head of the FHA in my State. He told me that the amount of indebtedness of the farmers of North Dakota is today greater than it was at any time during the height of the depression in the 1920's and 1930's.

Furthermore, only last week, I believe it was, I placed in the CONGRESSIONAL RECORD a letter showing that the farmers of North Dakota are receiving 6 cents a dozen for eggs. My recollection is that they never received less than that during the depression.

Some Senators disputed those figures; they said there must be something wrong with the figure 6 cents a dozen, and that it could not be correct. I am sure the distinguished Senator from Tennessee will remember that I then placed in the CONGRESSIONAL RECORD receipts I obtained from the Rutland Hatchery, at Rutland, N. Dak., showing that one farmer there sold 30 dozen eggs, and received $1.80 for the entire 30 dozen.

In view of the present economic situation of our country, does the Senator believe that an increase of 66.6 percent in congressional salaries is justified?

Mr. KEFAUVER. I think that with adequate salaries we would have better government, and I believe the raise proposed in the bill is fully justified. The raise proposed in the bill aggregates about $4¾ million. When compared with the amount spent in the recent hydrogen bomb tests the other day, the cost is not large. Those bomb tests cost many times the amount involved here.

The annual cost of maintaining the Washington zoo—and I am in favor of the zoo—is I believe at least the amount of the increase proposed here. I believe we ought to pass a bill which is fair to everyone, and I think this is a fair bill.

Mr. LANGER. Mr. President, will the Senator yield further?

Mr. KEFAUVER. I yield.

Mr. LANGER. Can the Senator tell us how much a member of Parliament in England receives in salary?

Mr. KEFAUVER. I should know, but I cannot answer that question at the moment. The Senator from North Dakota compared the proposed raises with raises given to civil-service employees. My best recollection is that in the task-force report there is a statement to the effect that since 1945 civil-service employees generally have had an 80-percent increase in salary. Since that time Members of Congress have had no raise, or, to put it another way, since the last time we had an increase in salary, the civil-service employees have received an 80-percent increase in their salaries.

Mr. LANGER. I am satisfied that those figures take into consideration promotions also.

Mr. KEFAUVER. No; I believe those are percentage raises. That is my best information. However, you may be right and the actual raises would be around 50 percent.

Mr. LANGER. I believe my friend from Tennessee is mistaken about that. However, we will not argue the point. Even if the civil-service employees received an 80-percent increase, many of them were receiving starvation wages. Mail carriers, for example, were receiving as little as $1,950 a year. Therefore, even if they received an 80-percent increase they would still not be receiving sufficient wages to support properly a wife and a child or two.

Mr. KEFAUVER. I believe that many of the civil-service employees are entitled to increases at the present time. There is a bill before the Committee on Post Office and Civil Service, of which the distinguished Senator from South Carolina [Mr. JOHNSTON] is chairman, to provide for adequate compensation for civil-service employees.

Mr. LANGER. If I may be permitted to interrupt the Senator again, there is a bill before the committee which was introduced by the Senator from Kansas [Mr. CARLSON] to provide for a 5-percent increase. The Senator from South Carolina [Mr. JOHNSTON] and several other Senators, of whom I am one, are sponsoring a bill to provide for an increase of 10 percent. However, whatever the amount of the increase is, we have testimony from various postal organizations to the effect that even if we give them a 15-percent increase they will still not get as much take-home pay as they received in 1939, and that in order for them to be able to educate properly their children they should have an increase of 25 percent. That is the record that has been made in the Committee on Post Office and Civil Service, of which I am a member.

Mr. KEFAUVER. I am one of the sponsors of the 10-percent-increase bill, as the Senator knows. I am in favor of treating Federal employees fairly. I do not believe, either, that they should wait for fair compensation until the budget of the Post Office Department is in balance.

Mr. LANGER. Mr. President, will the Senator yield further?

Mr. KEFAUVER. I yield.

Mr. LANGER. I may say to my distinguished colleague that Representative USHER BURDICK, of North Dakota, who has been strenuously opposed to any pay increases for Members of Congress, as the Senator from Tennessee knows, stated in his recent newsletter that he would be in favor of an increase of four or five thousand dollars. Does the Senator from Tennessee believe that would be an adequate increase?

Mr. KEFAUVER. No; I do not believe so. As I recall, Representative BURDICK offered such an amendment on the floor of the House. I believe the least we can do is to bring our compensation up to the purchasing power, or somewhere near the purchasing power, it had in 1939.

The Senator knows that we must spend more time on our duties and that the burdens of our office are greater than in 1939, and that the responsibilities of Government are greater.

Certainly no one can argue that the 1939 compensation was too low. If we concede that that compensation was fair—and that is the year which is used in making computations for a great number of governmental purposes, and is generally conceded to be a normal year—then $22,500 seems to me to be a little less than fair now.

Mr. LANGER. I ask the Senator to yield once more, if he will.

Mr. KEFAUVER. I am glad to yield to the Senator from North Dakota.

Mr. LANGER. Finally, I should like to thank the Senator for his courtesy. Perhaps the senior Senator from North Dakota is one of the poorest men in the Senate. However, I feel that I made a contract for $15,000 with the people of my State when I was nominated and elected to this office. Certainly when John Lewis' miners make a contract to work for so much an hour, we expect them to hold to their contract. If they come along after 6 months or so and ask for a raise—and such a thing has occurred in the past—we have almost unanimously felt that the miners entered into a contract for so much an hour, and that they should live up to it. Again I thank the Senator for his courtesy.

Mr. KEFAUVER. I appreciate the point of view of the senior Senator from North Dakota, and I respect his feelings. His position exactly reflects his feeling. I am sorry that I disagree somewhat with the position taken by the Senator. We usually view things pretty much in the same way. I wish to say also to the Senator from North Dakota that whatever amount is fixed as the compensation, whether it be less or more than now, I know he will continue his valuable and courageous service to the people of his State and to the people of our Nation.

Mr. LANGER. I thank the Senator from Tennessee.

Mr. DIRKSEN. Mr. President, will the Senator from Tennessee yield?

Mr. KEFAUVER. I am glad to yield.

Mr. DIRKSEN. I hope my friend the Senator from North Dakota will listen.

Mr. KEFAUVER. I yield for a question.

Mr. DIRKSEN. I shall put my statement in the form of a question and observation. The Senator from North Dakota brought up the question of the percentage of the increase which has been proposed. I have examined the pay scales on which Congress voted. In the Pay Act of 1945, for Federal employees, the increase was 15.9 percent. In 1946 there was an increase of 14.2 percent. In 1948 there was an increase of 11 percent. In 1949 we modified the Classification Act, which amounted to an incidental increase of 4.1 percent. Then in the Pay Act of 1951 there was an increase of 10 percent granted to Federal employees. The total increases amount roughly to 51 or 52 percent. Therefore we are not so far off after all, especially when we remember that increases in salary for Members of Congress come along about once in a blue moon.

Mr. LANGER. I am familiar with each one of the pay increases to which the Senator from Illinois has referred. I sponsored every one of them.

Mr. DIRKSEN. That is correct.

Mr. LANGER. The bill making the largest increase was enacted when I was chairman of the Committee on Post Office and Civil Service, in 1945. At that time employees of the Post Office Department were working for starvation wages. We had the testimony of one mail carrier's wife that she could not even buy a pair of stockings. In addition, she had to wear a dress made from a discarded uniform of the mail carrier. The testimony showed these people were able to buy meat about once a month and that they did not have any butter at all, and had to rely on oleomargarine. At the same time the price of milk had gone up to the point where the children could not even get enough milk to drink. That was the sworn testimony before our committee. The situation was desperate, and that is why they got that large increase.

Mr. DIRKSEN. I am sensible of that fact. Certainly I am in favor of giving them an increase, and I hope that it will be reasonably substantial. That matter is now before my distinguished friend from North Dakota and his associates on the Committee on Post Office and Civil Service, and I trust that before too long the committee will have completed action on such a bill and will report it to the Senate for action.

Mr. LANGER. We plan to report it to the Senate tomorrow or on Wednesday.

Mr. DIRKSEN. Mr. President, I wish to make one other observation. I do not concede that our tenure is a contract. I do not concede that at all. The fact is that the Constitution is silent on the pay of Members of Congress. Madison, in the Federalist, I believe, stated that it is rather indecent to make Members of the House and of the Senate vote on their own pay increases.

However, since nothing was done in the Constitutional Convention along that line, we have no choice in the matter. It is certainly not a very pleasant task, because it is regarded as being somewhat self-serving. At the same time, if the Members of Congress do not do it, no one in heaven or on earth can do it for them.

Mr. LANGER. I can understand how the Senator from Illinois finds it hard to live on $15,000 a year, particularly when there are persons in the city of Chicago who make as much as $40,000, $50,000, and even $100,000 a year. I am sure if the Senator from Illinois were in private practice he would make that much money, because he is a man of great ability.

Mr. DIRKSEN. I thank my friend very much.

Mr. LANGER. In rural areas an entirely different feeling is shown by our constituents. In States which do not have very large cities the people believe that $15,000 is a very large salary. I can show the Senate hundreds of letters I have received, not only from my own State, but from other States, where there are large rural areas, in which the writers suggest that $15,000 is an enormous salary.

Mr. DIRKSEN. I wish to allude to the Senator's question about the compensation that is paid to members of Parliament in England. The fact is that some members of Parliament have constituencies as small as 15,000 people, particularly in some of the poorer districts

of London. Those members of Parliament do not maintain any offices, they need no staff, and they have no mail problems. We see the difference in the situation when we compare such a member of Parliament with a Member of Congress who represents as many as 9 million people, as I do, in part, a Senator from the State of Illinois, or with a Member representing States which have even larger populations, such as the States of Pennsylvania, California, and New York. The office has become quite a responsibility.

The point I wish to make—and I believe it ought to be made constantly—is that we must think of the salary in connection with the office involved. The dignity of the office and its station must be measured against every other station in Government today. I may not be here, and the Senator from North Dakota may not be here, but certainly the situation and the position should be considered.

Mr. LANGER. I certainly hope the Senator from Illinois will be here.

Mr. DIRKSEN. I thank my friend from North Dakota. The station itself merits a certain dignity. The other day I met a country lawyer from a little town of 6,000 population.. He said to me, "I have just a little country law practice, but I make three times as much out of my country law practice as a Senator is paid." I have no doubt about that.

When it comes to judges of courts, there must be some parity between the man who sits on the bench and resolves knotty and troublesome questions and the man before him who is presenting the argument. I think there has to be some decent and fair relationship.

Mr. HOLLAND. Mr. President, will the Senator from Tennessee yield?

Mr. KEFAUVER. I yield. I shall be happy to yield.

Mr. HOLLAND. Mr. President, first, I wish to compliment and congratulate the distinguished Senator from Tennessee and his committee. I realize they have not been unanimous in their report, but I think they have been equally zealous in trying to bring forth a measure which is wholesome and fair. The distinguished Senator from Tennessee has made a most able presentation of the committee bill. I personally feel that the committee bill is sound, fair, and reasonable, and I should like, without taking the floor myself, simply to comment on 2 or 3 points which, from my own observation, commend the bill for its fairness.

The first thing I should like to say is that since I have been in the Senate we have lost by retirement from the Florida delegation in the House of Representatives 4 able Representatives, 4 highly trained men of great ability and effectiveness. They were all younger men than is the senior Senator from Florida, and presumably had heavy family responsibilities. I know from personal discussions with three of them that the question of inadequate compensation entered into their retirement. I think it is a sad commentary upon the state of affairs in our Nation when able men who are well representing a progressive State find it necessary, because of inadequate compensation and because of their desire to take better care of their families, to return to private life.

Secondly, just a little while ago in my State we were trying to get an able lawyer to become a district judge, but he found, upon balancing the rate of pay against his private compensation, which was more than twice the amount he would receive, that he could not afford to make that sacrifice. It seems to me that it is a sad commentary upon the existing situation when we cannot make high judicial positions reasonably attractive to men of high professional ability.

The third comment I should like to make is that I especially commend the committee for its effort to balance up the situation. In the first place, district judges and Members of Congress have traditionally been regarded as in somewhat comparable positions, and the committee apparently felt it was wise to bring forward together district judges and Members of Congress.

The committee bill also tends to bring Members of Congress and district judges to somewhere near the position of the heads of the executive departments, that is, those who serve in the Cabinet; not entirely to the same position, because while the salaries of Cabinet members are $22,500, they are also furnished private cars, allowances for chauffeurs, and the like, which, of course, do not accrue to Members of Congress.

I think the bill represents a very able and a very successful effort to try to balance off the picture in Government, so that there will be some degree of financial attractiveness to qualified persons to serve in all three of the branches of Government, with some assurance that those serving in positions of high responsibility will receive sufficient compensation to enable them to carry reasonably their family responsibilities.

I thank the distinguished Senator from Tennessee, and I compliment him upon his efforts.

Mr. KEFAUVER. I am certainly grateful to the distinguished senior Senator from Florida for his statement, and the members of the committee appreciate it very much.

While we are considering assistance, I wish especially to pay tribute to the distinguished Senator from Illinois [Mr. DIRKSEN] for his aid in the efforts which have been made to secure fair treatment for Members and employees of the Congress, not only at the present time, but in years past. I had the pleasure of serving in the House with the Senator from Illinois at the time he was a member of the La Follette-Monroney committee for the Reorganization of the Congress. The Senator from Illinois was then a strong voice in the committee in the movement to bring about adequate compensation for Members of Congress and for the congressional employees. At that time the proposal under consideration was an increase from $10,000 to $12,000 with some allowance for expenses.

As I stated earlier, Mr. President, since it is a delicate matter for Members of Congress to vote upon their own salary increase, the Senator from Illinois, appreciating that fact, was responsible for the passage of a resolution which established the Commission on Judicial and Congressional Salaries in the 83d Congress. That Commission did an admirable job.

The bill which is now before the Senate includes only those who were the subject matter of the findings of the Segal Commission. Others, of course, are entitled to consideration, and they will receive it at a later time. We have tried to limit this bill and have limited it only to those who were considered in the Segal Commission's report.

Mr. President, I yield the floor.

Mr. KEFAUVER subsequently said: Mr. President, I ask unanimous consent to have printed in the body of the RECORD a letter from the American Bar Association addressed to me, as well as letters from a number of other associations, together with resolutions and editorials, in connection with the pay-raise bill.

There being no objection, the letters and other matters were ordered to be printed in the RECORD, as follows:

AMERICAN BAR ASSOCIATION,
Minneapolis, Minn., February 18, 1955.

Hon. ESTES KEFAUVER,
United States Senate,
Washington, D. C.

DEAR SENATOR KEFAUVER: Thank you for your letter of February 15 in response to my recent letter.

I understand that the congressional-judicial salary bill is scheduled for consideration in the Senate during the week of February 21.

On behalf of the hundreds of lawyers in all parts of the country, and of all political affiliations who have as a public service given unselfishly of their time in support of these salary increases, there are two matters which I think should be called to your attention at this time:

1. We believe that informed public opinion will support Congress in raising both congressional and judicial salaries by at least $10,000 per year. We enclose reprints from editorials which have appeared in recent weeks (most of them during February 1955) from newspapers in all sections, which editorials we believe substantiate the foregoing statement. These editorials are in addition to the 244 editorials which we filed with your subcommittee at the time of the January 25 hearing, and in addition to subsequent editorials which were enclosed with my recent letter.

2. We hope the Senate will concur with the House in including in this bill salary increases for United States attorneys and certain Department of Justice officials. Such salary increases were included in S. 1663 of the 83d Congress, as approved by the Senate Judiciary Committee, and have been recommended by the house of delegates of the American Bar Association. The fact that they were not included in the Senate bill which was before your subcommittee at the time of the hearing was due to the fact that this bill followed the recommendations of the Commission on Judicial and Congressional Salaries, and that these United States attorneys and Department of Justice salaries were outside the jurisdiction of that Commission (see printed report of subcommittee hearings, p. 18). Whether the increases for these United States attorneys and Department of Justice salaries should be added to the pending bill on the Senate floor, or should be concurred in by the Senate conferees, is something which the Senate leaders can best determine, but we do feel that increases in these salaries is important in order to get lawyers with the

ability necessary to handle these important jobs.

I am sending a copy of this letter and enclosures to the other members of your subcommittee who were present at the January 25 hearing.

Sincerely,

MORRIS B. MITCHELL,
Chairman.

[From the Ithaca (N. Y.) Journal of January 31, 1955]

GRANGE SEEKS TAX RELIEF FOR FARMERS

(By Kenneth Scheibel)

WASHINGTON.—The leader of a national farm organization is hopeful Congress this year will grant tax relief to farmers on gasoline, oil, tires, and other automotive supplies.

National Grange Master Herschel Newsom announced this is one objective in the Grange's 1955 legislative program.

The Grange approves raising salaries of Members of Congress and Federal judges.

Newsom puts it this way:

"Members of Congress and Federal judges are the victims of inflation. It has cheapened materially the buying power of their dollar, making it difficult for them to make ends meet. Currently, it is also difficult to interest brilliant and capable men of moderate means to seek these positions.

"By raising congressional and judicial salaries, the public will benefit materially in the longtime run. For instance, a flat $10,000-per-year raise would amount to an annual additional cost of $6 million.

"This is the equivalent of an additional investment of $1 for each $10,000 spent by the Congress."

[From the Marshalltown (Iowa) Times Republican of January 18, 1955]

PAY HIKE FOR CONGRESS SOON?

Congress is more likely to give itself a pay increase this year now that the state of the Union message calls for a "substantial" one as "long overdue." The political hazard always inherent in voting for a pay hike for oneself might be overcome if a Member could get away with telling his constituents, "Who am I to oppose our President on something he insists is in the national interests?"

The present congressional salary of $15,000 (of which a tax-exempt $2,500 is for expenses) was set in 1946. Since then the dollar has depreciated in purchasing power by about 27 percent, and a rise in congressional pay to around $19,000 would be needed to make it equal to $15,000 in 1946 dollars.

However, much more than $19,000 is in the wind. In 1953 the Senate Judiciary Committee proposed $25,000, a proposal that ultimately was shelved in favor of a study on the subject by an outside commission.

This reported in January 1954 that the remuneration of Federal legislators (and judges) had failed to keep pace with the increased responsibilities and workloads of their offices, or with salaries in private business for comparable responsibility. The report, pointing out also that executive salaries had been adjusted upward since 1946 to meet higher living costs, suggested $27,500 for Congress.

However, few Members were prepared, just before facing the voters last November, to give themselves a salary boost of more than 80 percent or to come up against the cry that lawmaking for the people should not be entrusted to men who had voted themselves into plutocracy. So Congress contented itself in 1954 with expanding its pension benefits and its allowances for stationery, postage, long-distance calls, home-office upkeep, and clerk hire.

[From the New York Times of February 1, 1955]

UNDERPAID OFFICIALS

The amazing disparity between the salaries of Federal and New York judges has been referred to on this page in recent weeks; and we are glad to see Attorney General Brownell advert to it once again in urging an increase in the compensation of both United States judges and Congressmen.

Judges of the United States district court now receive $15,000, exactly half the salary in this area of judges of the somewhat comparable New York State Supreme Court. Associate Justices of the United States Supreme Court receive $25,000, while judges of the highest New York tribunal, the court of appeals, are paid a total of $37,500 each. The point isn't that New York judges are overpaid, but that Federal judges are underpaid. The rise in the cost of living has, of course, had the effect of reducing their income even below the levels at which it had been set. It has been calculated that the purchasing power in 1939 dollars of a Federal district judge's salary after taxes amounts to less than $6,500.

Members of Congress receive a total of $15,000 a year. The commission that investigated these matters correctly observed a year ago that "Members of Congress and the judiciary have responsibilities as great as those of top executives in business or industry, or greater." Yet the top officials of 100 of America's largest corporations average over $100,000 a year in salary. No one is recommending anything like that for Congressmen, but surely the proposed $27,500 is reasonable compensation for so onerous a job. The difficulty in granting adequate pay to Congressmen comes from Congressmen who fear the political effects of giving themselves even an entirely justified increase. Senator DIRKSEN, of Illinois, with whom we do not often find ourselves in agreement, has urged on his fellow members an end to their timidity on this matter; and we think he is right.

Increased salaries obviously will not guarantee better judges or better Congressmen, but public freedom from economic pressures will prevent some good public servants from leaving their jobs for private life and will indicate to all of them that their Government is not really trying to get something out of them for nothing.

[From the Chicago (Ill.) American of January 31, 1955]

TIMIDITY OF CONGRESS

We've contended that Members of Congress, and Federal judges as well, deserve an increase in pay.

Men of good caliber should not have to serve their country at financial sacrifice. Or, to put it more significantly, these important jobs should pay enough to attract men of great ability and not just the independently wealthy or broken-down hacks who want to get in out of the rain.

But the timidity of Congress. Its fear of the voters. These factors have prevented action in past Congresses. Now, as it seems probable a raise will be voted, they emerge in a ludicrous way.

It is reported that proposals will be made for a $10,000 pay hike (from the present $15,000 to $25,000) so that, on the floor, Members may humbly vote to reduce the increase and wind up with $22,500.

For goodness sake, men, the people aren't that dumb. They know Congressmen have to maintain two homes and contribute to everything from the smallest raffle to the party campaign chests.

They know Federal judges, at $15,000 make only a fraction of what they could command in private practices.

Please, gentlemen, just fix a fair figure. The people will understand and respect.

[From the Chicago (Ill.) Sun Times of February 5, 1955]

CONGRESS SHOULDN'T TRIM ON PAY HIKES

If the salary scale for Federal judges and Members of Congress were based on individual merit or time spent on the job, some would deserve substantial pay cuts.

But a majority of the Members of Congress and of the Federal judiciary are conscientious, hard working—and underpaid. They shouldn't be penalized as a class for the derelictions of a few dunderheads and laggards who happen to be in their midst.

The arguments in favor of raising the pay of judges and Federal lawmakers are overwhelming. For one thing, higher compensation would be bound to attract candidates for Congress who are well qualified but who now hesitate to run because of the financial sacrifices that would be involved. While few lawyers would turn down an appointment to the Federal bench, it is nevertheless true that many have accepted the posts at a sacrifice far beyond the normal call of duty.

The average Senator and House Member must maintain two homes—one where he hails from and the other in Washington. Some get around this expensive problem by maintaining full-time residences in the Capital and part-time residences, sometimes in a hotel, at home. But even that, or a reverse of it, is not cheap. Moreover, the average Member of Congress is expected to keep in fairly close touch with his constituents and that entails considerable travel to and from the Capital—most of it being paid for out of the lawmaker's own pocket.

He is expected to dine—if not wine—his constituents when they visit him in Washington. Not infrequently, a visting constituent may ask him for a memento, such as a flag which had been flown briefly over the Capitol and which the constituent can boast about after he has returned home. These items are paid for by the lawmakers.

At present, Senators and House Members receive a total personal compensation of $15,000 a year. While many of them could live comfortably on that salary as private citizens at home, they as Members of Congress are unable to make ends meet. As a consequence, many Senators and House Members take to the lecture platform or write magazine articles to increase their incomes to meet family obligations.

Of course, some Members of Congress are men of private means and others have law practices which benefit as a result of their holding congressional office. But wealth or a law practice should not be a requisite for men or women seeking a seat in Congress.

The salary of a Member of Congress should be enough to enable him to live in dignity without going into debt, and to permit him to meet his obligations as a Federal lawmaker as well as private citizen.

Senate and House subcommittees have now approved congressional pay raises that vary between $7,500 and $10,000 a year. We believe that the higher figure, recommended by a special commission last year, is the one that should be adopted. The overall difference between the higher and the lower figure in the Federal budget would be infinitesimal. Congress should have the courage to do right by itself, regardless of what some disgruntled constituents or political opponents at home may say.

By the same token, the boosts in pay for Federal judges recommended by the same committees are generous, but not generous enough. The present recommendation is to raise United States district court judges from $15,000 a year to $22,500, instead of the $27,500 recommended by the special commission last year. Supreme Court Justices would be raised from $25,000 to $35,000, instead of the $39,500 urged by the commission.

As in the case of the congressional pay increases, we feel that the Nation would be better served if Congress were to approve the

higher rather than the lower figures for the Federal judiciary.

[From the Washington (D. C.) Post and Times Herald of January 31, 1955]

ATTRITION OF TALENT

It is true, as some opponents of the proposed pay increase for Federal judges and Members of Congress have pointed out, that the Government cannot afford to pay its ablest public servants as much as they could earn in private employment. Public policy demands that there be a reasonable ceiling on official salaries. But it is equally true that the country is poorly served when salaries are so low as to drive many able men out of public life. That is what is happening today. Several of the witnesses before the Kefauver subcommittee told of leaving the bench or Congress because the economic pinch became too severe.

We think it is time for Congress to take a realistic view of this problem. It is clear enough that a great majority of Senators and Representatives think their pay should be increased. They have failed to act because of the unfortunate political inferences that future opponents may draw from the votes of present members to increase their own salaries. But this failure is causing a serious attrition of talent in public life. The Congressman who ignores this cost of standpat-ism may wake up to find that he is out of touch with public opinion. At least editorial opinion over the Nation has been found to be overwhelmingly in favor of more adequate judicial and legislative salaries.

The basic facts to be considered are these: The United States is a wealthy country. It can afford to pay its judges at least three-fourths as much as the judges of New York State are paid. It urgently needs the highest type of men on the bench and in its legislative halls. Consequently, it should not keep legislative and judicial salaries so low as to discourage men of special talent or to limit these positions to persons who are independently wealthy and do not need to live on their salaries.

Every time this issue has been carefully weighed from the viewpoint of the national interest recommendations for higher salaries have been forthcoming. Congress should have no hesitation, therefore, in following this advice. Now is the most favorable time in many years for enactment of a congressional-judicial pay bill. The next elections are nearly 2 years away. More important, responsibility for the measure can be evenly divided between the Republican President, who has spoken up pointedly for a pay increase, and the Democratic Congress.

[From the Shreveport (La.) Times of January 10, 1955]

PAY HIKE FOR CONGRESS

Now that President Eisenhower formally has called for pay increases for Congress, Federal district judges, and certain classifications of Federal employees, it is virtually certain that Congress will hike its own pay, probably as one of its first legislative steps in this session.

This seems especially certain since there are no national elections in the offing for nearly 2 years. Many Congressmen, quite willing to hike their own pay, have not been willing in the past to do so and then go home and stand for reelection. That attitude is a false one, for if the pay hikes are needed and deserved, they should be voted, and those who vote them should be willing to stand up before their constituents and state why they did so.

There have been several studies of congressional pay by impartial sources seeking to approach the matter objectively. Invariably the recommendation has been for an increase from the present $15,000 a year—plus certain perquisites which tend to ease some of the essential expenses of being a Member of the House or the Senate. Probably the hike voted will be to $22,500 a year, or perhaps $25,000.

But if Congress does increase its own pay, it had better make certain that it increases the pay of Federal district judges at the same time, and to a comparable figure. A pretty good case could be made that Federal district judges now—on the basis of general Government pay scales—are the most underpaid group in the Federal Government.

A big hike in congressional pay would gain greater public approval if some of the fringe benefits Congress has voted itself in recent years in place of a pay hike were eliminated, instead of maintaining the fringe benefits and establishing the pay hike, too. Fringe benefits in nearly all fields are simply an effort to increase income without actually attaching the increase to regular wage or salary income itself. They are meant, in other words, to be deceptive.

Congress should determine fairly and honestly what the pay of a Member of Congress should be in the light of the expenses involved—particularly the necessity of maintaining two homes in different cities—and then should set congressional pay at that figure and do away with the fringe benefits subterfuge.

[From the Albany (N. Y.) Times Union of January 31, 1955]

NEEDS CORRECTION

A situation that pending legislation in Congress would correct, and that badly needs correction, is that created by the inadequate pay of Federal judges.

Attorney General Brownell brought the matter to a head in his testimony before the Senate Judiciary Committee, when he said the prevailing ceiling on salaries for members of the Federal judiciary presents an obstacle to getting men of maximum qualifications on the Federal bench.

The American Bar Association, at both national and local levels, has been saying the same thing for a long time, and since the members of the legal profession are in a position to give the facts about the matter it is time for Congress to listen.

The facts in substance amount to this: That the prevailing salary scale does not adequately compensate a man who has the experience, integrity, and prestige warranting his appointment to the Federal bench, and that if such a man accepts an appointment under these circumstances he has to do it at great personal sacrifice.

Mr. Brownell pinpointed this situation by pointing out that State and local judges in many parts of the country are paid substantially higher salaries than the maximum scale on the Federal bench.

Thus the completely illogical factor in the situation is that when a man has distinguished himself in State or local judiciary he can only step up professionally to a Federal judgeship at the cost of stepping down financially and economically.

It is unreasonable and unwise to ask the most eminent men of the legal profession to accept the vital responsibilities of the Federal judiciary with only the satisfaction of performing a patriotic service as their major compensation.

Many of our most eminent Federal judges actually do serve under these circumstances, but it is inherently wrong that the highest places of responsibility in the American judicial system should be more poorly compensated than inferior posts.

The dangers in this are obvious, as the spokesmen for the bar associations of the country have pointed out; and they are that appointments to the Federal bench may eventually be attractive only to men already rich in the legal profession or to men not notably successful in the profession.

The national interest in this vital field will be best served by making the emoluments of the Federal bench commensurate with the equality of the men on the bench most needed and desired.

[From the Iowa City Iowan of January 28, 1955]

PAY RAISES IN CONGRESS

Of all the melodies piped by President Eisenhower in his state of the Union message, none could have come more sweetly to congressional ears than this:

"I also urge the Congress to approve a long overdue increase in the salaries of Members of Congress and of the Federal judiciary, and in my opinion this raise should be substantial, because I believe it should be to a level commensurate with their heavy responsibility."

This part of the Eisenhower program seems certain to enjoy full, bipartisan backing. Congressmen are touchy about voting themselves raises, but with this nod from Eisenhower, they will probably show no lack of eagerness in approving pay raises.

Actually, they deserve a raise, and a good one. Lawmakers in the House and Senate get a little over $15,000 a year, practically all of it taxable. That doesn't go far, what with their heavy expenses.

They have to maintain two residences, they have to entertain; they have to kick in on all sorts of political and community causes.

Obviously, Congressmen have to get other income. The New York Times found that 80 percent of the Representatives, and 67 percent of the Senators carry on a private business or investments. Some Congressmen add to their income—but detract from their legislative time—by writing articles or lecturing.

Last year, mainly because it was an election year, Congress turned down a pay raise for its Members. This year it should not be so skittish.

Senator HARLEY M. KILGORE, of West Virginia, recently introduced a bill which would increase the salaries of the Justices and judges of the United States courts, and Members of Congress.

Under this bill, Members of Congress would receive $27,500, and the Chief Justice of the United States would receive $40,000.

Every reasonable voter, including the President himself, appreciates that the lawmakers have long deserved a healthy hike in pay.

[From the Dayton (Ohio) News of February 2, 1955]

CONGRESS TOO COY

Politicians have to love their jobs, or they could never stand the working conditions. For Members of Congress, one of the most deplorable of these conditions is poor pay.

The private citizen is apt to retort that if Congressmen are poorly paid, it is their own fault. But for any politician those elections come uncomfortably close together.

There is always this fear of voter reaction whenever congressional pay raises are mentioned. Yet, it is a poor constituency that would ask its representative to tackle his difficult and responsible job at half pay.

Most pay-raise advocates, including the President, believe Congressmen should receive about twice their present salary. A bill now pending before Congress would increase the annual figure of $12,500 to $25,000. The President also wants raises for judges and a number of other Federal employees.

Naturally, better pay attracts a higher caliber man to public office. Most voters know this. Perhaps Congressmen, themselves, need a little more faith in the fairmindedness of the people they represent.

[From the Des Moines (Iowa) Tribune of January 24, 1955]

CONGRESSMEN'S SALARIES

Members of Congress will go a long way toward taking some of the sting out of voting higher pay for themselves, if they do, by adopting strict antinepotism rules at the same time.

The recent change in party control of committees of the House of Representatives brought to public attention the fact that the wife of the former chairman of the un-American Activities Committee has been holding an $8,500-a-year job. Mrs. Harold Velde has been official reporter for the Committee. Her husband, as Representative of the 18th Congressional District of Illinois received a salary of $15,000 a year.

There is no implication that Mrs. Velde was not qualified to fill the position. We assume that she was. It is also true that many other Members of Congress have found jobs for their wives or their children.

Some Members of Congress have defended such employment with the excuse that the expenses of the office are such that otherwise they could not live within the salary. There is increasingly wide public acceptance of the contention that congressional salaries should be raised. (A commission which studied the problem recommended $27,500 a year). We agree that salaries should be higher. But the lawmakers will find that there will be far less public criticism of a pay raise, if they make it clear at the same time that they are putting an end to the employment of wives at high salaries for such jobs as the one held by Mrs. Velde.

[From the Bayonne (N. J.) Times of February 8, 1955]

FEDERAL SALARIES

Federal Judge Modarelli's basic point before the Hudson County Press Club was a good one. It's a pity he had to argue it on the wrong grounds. Mr. Modarelli was insisting that the salaries of Members of Congress and of the Federal judiciary are too low, and in that he is right. The salaries should be raised and raised more generously than is provided for in bills now before Congress. But Judge Modarelli cited the amounts spent by the United States on foreign aid programs and the sums wasted, as he said, in the Nation's Military Establishment. From such material he argued that the raises for the legislators and the judges would be comparatively inexpensive.

The point that eluded Judge Modarelli—and it's odd the way trained barristers manage to miss important points—is that even if we had no foreign-aid program, and even if our Military Establishment were the very last word in efficiency, the Federal judiciary and the Members of Congress should be better paid. It has no bearing on the matter that we have spent much, some of it not well, on foreign aid and arms. Even if we hadn't, at present levels we still would be unwisely parsimonious in relation to some of our most important public servants.

Many capable citizens look upon Federal service, whether on the bench or in Congress, as a major sacrifice in public service. Such persons are overworked, and a great deal of the work lies outside their own special interests. In present circumstances we must ask prospective judges and prospective Members of Congress both to sacrifice their personal interests and make a money sacrifice too. It is more than we have a right to do. Like Judge Modarelli, we hope the present Congress meets the problem and meets it with the error rather on the generous than the niggardly side. And regardless of the Government's other activities, domestic and foreign.

[From the St. Paul (Minn.) Pioneer Press of February 4, 1955]

CONGRESS NEEDS COURAGE TO RAISE ITS PAY SCALE

Congress will have to wait a long time before finding a more auspicious time than the present for raising the salaries of its Members and of Federal judges. A Republican President has recommended increases and Congress is Democratic, so the two parties will be equally responsible.

In addition, higher pay has been urged by a nonpartisan commission of citizens representing business, labor, and the professions. The next elections are nearly 2 years away. All in all, if the Representatives and Senators cannot get up enough courage this session to vote for a raise, they are likely to find even less favorable conditions in the future.

There is always some criticism when higher pay for Congressmen is mentioned. However, an increase is long overdue. The $15,000 a year which Senators and Representatives receive was a fairly high salary when it was first established years ago. Today it is not enough, considering the political risks to continuity of service and the public's need to attract men of the highest ability.

As to Federal judges, it has long been recognized that one bulwark of an incorruptible judiciary is adequate remuneration. While Federal judgeships have the attractiveness of life tenure and professional prestige, United States district judges get the same salary as Members of Congress. That is too little for the responsibilities involved, by present-day standards.

[From the Erie (Pa.) Times of February 2, 1955]

PAY BOOST FOR CONGRESSMEN

Congressmen are expected to raise their pay next year from $15,000 a year to $25,000 according to a dispatch from Washington which says the leaders of both parties are in favor of the idea.

In our opinion it is a good idea if only because its adoption will just about force Congress to do as much for the Federal judiciary who are now very badly underpaid.

Members were timid about voting themselves a raise on the eve of elections in 1954.

There is a fine irony in the situation. Congressmen can't get along on their salaries because inflation has raised the cost of living. And who was responsible for inflation? Nobody but the Members of Congress who forgot how to balance the budget and stay out of expensive wars.

Congressmen who will cut five or ten billion dollars from the estimates that will be sent to Congress in a few weeks will be worth $25,000 a head. It would be wonderful if the raise could be made contingent upon the saving.

[From the Pittsburgh (Pa.) Sun-Telegraph of February 3, 1955]

OH, TIMIDITY

We've contended that Members of Congress, and certainly our Federal judges as well, deserve an increase in pay.

Our belief is that men of good caliber should not have to serve their country at financial sacrifice. Or, to put it more significantly, these important jobs should pay enough so that they are attractive to men of high ability and not just to the independently wealthy or broken-down hacks who want to get in out of the rain.

Oh, the timidity of Congress. The fear of the voters.

These factors have prevented action in past Congresses. Now, as it seems probable a raise will be voted, they emerge in a ludicrous way.

It is reported that proposals will be made for a $10,000 pay hike (from the present $15,000 to $25,000) so that, on the floor, Members may humbly vote to reduce the increase so that they will get take-home pay of only $22,500.

For goodness sake, fellows. The people aren't that dumb.

They know Congressmen have to maintain two homes and contribute to everything from the smallest raffle to the party campaign chests.

They know Federal judges, at $15,000, make only a fraction of what they could command in private practice.

Please, gentlemen, just fix a fair figure, stick to it, and the people will understand and respect. No tricks of financial piety are called for.

[From the Kansas City (Mo.) Star of January 27, 1955]

QUESTION OF ADEQUATE PAY

If Congress should finally get around to an increase of pay for its Members and the Federal judiciary, it would not be action that had been taken on the initiative of the legislative body itself. Adequate compensation for the two groups has been repeatedly recommended but, with respect to its Members, Congress has held back through fear of the political consequences.

That explains the failure to act last year. But since this is not an election year the matter is up again and the belief is that something will be done. If so, it would be in response to the proposal of a Presidential commission with regard both to Congress and the Federal judges. And 9 years ago, when the congressional reorganization (streamlining) act was being adopted, it had been recommended by an impartial commission that legislative salaries be made $25,000 a year.

At the time Congress Members were paid $12,500 to which later was added an expense account of $2,500. The present pay, and that of Federal district judges, is now $15,000. The Presidential commission recommended $27,500 for both groups. It showed that on the basis of present money values the two would be better off by only about $1,300 compared with the salaries they were receiving in 1939.

Six years ago Congress voted higher pay for the President, Cabinet members, and others in the executive department. Also in the recent years of inflation and increased living costs the pay of Federal employees has been increased several times and further action in their behalf is expected soon.

Under bills shortly to have attention Congress Members would not be in line for the recommended total of $27,500. The exact figure is to be determined but the House measure would make it $22,500 with the present expense account of $2,500 eliminated. Federal district judges would receive whatever amount was agreed upon for Congress itself while appeals court judges and Supreme Court Justices would be granted advances on a different basis.

The purpose is not only just compensation but encouragement to men of competence to serve in offices of great responsibility. Politics ought to be discounted in attaining such important objectives.

[From the Kansas City (Mo.) Star of February 4, 1955]

HISTORY IN A PAY HIKE

It appears that Congress at last will vote to increase the pay of its members and that of the Federal judges. Hesitation with respect to itself has come from fear of the reaction by voters at home. That fear has

persisted despite impartial recommendations for an increase.

The Constitution gives Congress the power to determine its own compensation by law. But the public is not left without any power of action and Members of the legislative body are fully aware of that fact.

It doubtless explains why Congress has ventured to increase its pay only 5 times in the last 100 years. And more than 80 years ago there was a warning that perhaps will serve for all time. It arose from action that was unprecedented and may never occur again.

For in 1873 and at a time of numerous scandals about Washington the 42d Congress not only voted itself an increase in pay but made it retroactive for 2 years. It was in connection with a justified increase for the President, the Vice President, and Justices of the Supreme Court. But the action in behalf of Congress itself created a storm of public disapproval. It became known as the salary grab act and the back pay steal.

So violent was the public protest that it raised a big issue in the congressional elections of 1874. The increase was denounced by both parties and some of the Congress Members turned back their added pay while others gave the money to charity. Also the legislative act was repealed by the following Congress with an exception of the provisions relating to the President and the Supreme Court Justices.

[From the Jackson (Miss.) News of January 18, 1955]

BOOSTING FEDERAL PAY

At the current session of Congress bills will be considered proposing goodly pay increases for Members of Congress and the Federal judiciary.

Viewed in the light of how wages for workmen and remuneration for white-collar and professional men have advanced in recent years, and the insistent demand for a minimum wage of $1 per hour for the commonest of labor, the proposal for Congressmen and Federal judges does not seem unreasonable.

There is a reluctance, however, among some Members of both House and Senate because it might be politically unpopular. All House Members and one-third of the Senators will be up for reelection next year, and big pay boosts might well become a campaign issue in the 1956 presidential contest.

But this political angle shouldn't be given too much weight. The pay hike has been recommended by an outside commission and has general public support. Congress can avoid most of the possible stigma of selfishness by making the pay boost applicable only with the next session of Congress. That would require all Representatives and a third of the Senators to be reelected before benefiting from the act. There should be no qualm over raising the pay of judges. When a lawyer seeks a Federal judgeship nowadays, he must be financially able to accept the rather meager pay attached—much less than any good lawyer can earn in private practice.

Possibly the jump from $15,000 a year to $27,500 proposed by Senator HARRY M. KILGORE, of West Virginia, will be subject to compromise; increasing the number of expense-paid trips home from 1 a year to 6 may also be too much. Yet the granting of a substantial increase in the pay of Congressmen is essential to obtaining well-qualified men for the lawmaking posts.

[From the Minneapolis (Minn.) Tribune of February 18, 1955]

A RAISE FOR CONGRESS

Representative WICKERSHAM of Oklahoma has been subjected to quite a bit of "heat" since his highly publicized announcement that he was looking for part-time work to help make ends meet. However one reacts to the Wickersham incident, it does dramatize the question of how well those who represent us ought to be paid.

In January a year ago, a public commission unanimously urged Congress to boost the salaries of Senators and Representatives to $27,500. Substantial increases also were recommended for Supreme Court Justices and other members of the Federal judiciary.

Since then there has been rising pressure for a pay raise at this level. Now the House of Representatives has voted a $10,000 congressional boost and big increases for other top public servants. The Senate appears inclined to follow suit, although it has a smaller amount in mind.

Are such increases justified? We think they are.

Members of Congress, like other men in public life, are subject to heavy demands on their resources. They feel obliged to entertain constituents who come to see them; they must maintain homes both in Washington and in their own State.

A man capable of serving well in Congress would generally be able to earn more money in private endeavor. If salaries are boosted to a figure nearer what men of high quality could earn in private life, more of them will be attracted to politics. The price is little enough for the public to pay to get the best men available.

In its report a year ago the commission said that congressional and judicial salaries "are, and for a long time have been, grossly inadequate." Members of Congress have not received a pay raise since 1947. The arguments for an increase now heavily outweigh those against it.

[From the Pittsburgh (Pa.) Post Gazette of February 4, 1955]

CORBETT MAIL POLL PROVES IKE'S PROGRAM IS POPULAR—CONGRESSMAN'S QUESTIONNAIRE FINDS VOTERS APPROVE ALL EXCEPT VOTING AGE CHANGE

WASHINGTON, February 3.—President Eisenhower's program, as set forth in his state of the Union message is popular in the 29th Pennsylvania Congressional District of Representative ROBERT J. CORBETT, Allegheny County.

The Congressman put in the mail immediately after the message was delivered to Congress, a questionnaire of 13 questions, based on the major points of the President's program.

The questionnaire went to every family in the congressional district and the response has been substantial.

VOTE AGE CHANGE LOSES

The replies show a large majority of the residents of the district approved every major point in the program but one. They disapproved lowering the voting age to 18 years by a percentage vote of 65 to 35.

But other issues received these approving percentage votes:

Do you approve the program in general? Yes, 90 to 10.

Should the budget be balanced prior to any important tax cuts? Yes, 83 to 17.

Do you believe that our expenditures for national defense are adequate? Yes, 76 to 24.

Should the Federal Government encourage and guarantee private health insurance programs? Yes, 51 to 49.

Should tariffs be selectively lowered through reciprocal trade agreements? Yes, 72 to 28.

Should the draft law be renewed? Yes, 85 to 15.

Should the minimum wage be raised to 90 cents an hour? Yes, 77 to 23.

Eisenhower says a salary raise for Members of Congress is long overdue. Do you agree? Yes, 64 to 36.

Should the incentives for men to remain in the military services be increased and the incentives to be discharged be reduced? Yes, 82 to 18.

Do you agree that the flexible price support program is a marked improvement? Yes, 88 to 12.

Eisenhower said "the transition to a peacetime economy is largely behind us. The economic outlook is good." Do you agree? Yes, 78 to 22.

Do you think the Eisenhower administration is making satisfactory progress in securing world peace? Yes, 81 to 19.

[From the Philadelphia (Pa.) Bulletin of February 1, 1955]

UNDERPAID PUBLIC OFFICIALS

(By Ralph W. Page)

What's the matter with Congress? The studies and recommendations for reorganization suggest that its rules, privileges and procedures are archaic and render it incompetent to transact the national business. That is part of the trouble. Even more to the point are the pinch-penny, hopelessly inadequate salaries we give our Congressmen.

These public servants are in charge of the most important affairs in the country. Obviously, then, for these positions we should enlist the best brains and talents. In every other walk of life these brains and abilities are obtained by commensurate pay. Every corporation and enterprise in the country competes for the services of the trained and competent, so that these citizens earn 3 to 10 times the compensation offered our Representatives and Senators. Naturally the result is that these positions are sought by a residue composed either of men of independent means, self-sacrificing individuals with a mission, or those incapable of commanding more remuneration in the market place. Congress knows this, but the Members fear the public reaction to increasing their own pay—and the still prevalent provincial idea that there are plenty of candidates who will be glad to get the place at any price.

It is quite true that there is no dearth of mediocrity ready to continue to legislate for us on the cheap. So the problem is up to the country.

If we desire a competent legislature, the citizens themselves will have to demand that the Congress establish a schedule of compensation that will attract outstanding capacity, or at least relieve the incumbents of the present financial restrictions. This calls for active public support of a measure (S. 462) just introduced in the Senate by ALBERT GORE, Democrat, of Tennessee, and HARLEY M. KILGORE, Democrat, of West Virginia.

Following the recommendations of a congressional Commission on Judicial and Congressional Salaries, this bill provides a salary of $27,500 instead of $15,000 for Congressmen, and at the same time raises the pay of judges, ranging from $27,500 for customs and tax courts to $30,500 for the court of appeals and $39,500 for the Supreme Court.

Regardless of the necessity to obtain the best talent for the posts, common justice demands that the services should be paid what they are worth. The burden and responsibility of these posts are enormous, and the amount of faithful and exhausting work done in spite of the handicaps is amazing. Some commentators contend that Congress and the judges deserve the raise on their record. Some certainly do. The rest would if the standard were raised.

[From the New York Herald Tribune of February 7, 1955]

HIGHER PAY FOR UNITED STATES JUDGES

To the NEW YORK HERALD TRIBUNE:

The Senate Judiciary Committee and the House Judiciary Subcommittee have each

approved bills for the increase of salaries of Federal judges and Members of Congress. The House bill has still to be considered by the full Judiciary Committee.

Both bills provide for an increase of the salary of United States district judges from $15,000 a year to $22,500 a year, as well as somewhat greater increases in the salaries of judges of the United States courts of appeals and United States Supreme Court.

The proposed increases are, of course, an improvement over the present salary scale for Federal judges. But the proposed increases are still not enough. The bills should be passed promptly, but with the greater salary increases ($12,500 increases for United States district court judges) which have been recommended by the Presidential Commission that studied the problem. The judges of the State supreme court in the city of New York, whose jurisdiction is roughly comparable to that of the United States district court, receive salaries of $30,000 a year.

Service on the Federal judiciary is a great honor and a very rare privilege. In consequence it attracts candidates from among the ablest members of the bar. Concomitantly it is a very demanding service, calling for a very high order of erudition and experience, tireless effort in a rapidly expanding and changing body of law, undiluted devotion directed exclusively to the judicial task, avoidance of entangling commitments to other causes and activities—in short, complete self-dedication.

These requirements must, of necessity, suffer compromising adjustments when judges are obliged to seek supplementary income by teaching or writing, when they are not free from financial anxiety and when their days are clouded by worry concerning the insecurity of their families.

These considerations moved me, in 1950, to resign from the Federal bench despite the fact that I found the work most congenial to my spirit. Other judges have either resigned or have seriously considered that step, and I believe for the same reasons.

After long and careful investigation congressional committees have made recommendations which I believe are subject only to the criticism that they do not go far enough. I urge that the Congress pass a bill raising judicial salaries. If it is at all possible, I urge that the increases be the higher increases recommended by the Presidential Commission rather than the small increases which the congressional committees have thus far approved.

In this letter I have spoken only of judicial salaries because of my intimate interest in the problem. The same considerations are, I believe, applicable to congressional salaries. They, too, call for substantial correction.

SIMON H. RIFKIND.

NEW YORK, *February 3, 1955.*

NATIONAL SOCIETY OF PUBLIC ACCOUNTANTS,
Washington D. C., February 16, 1955.

Hon. HARLEY M. KILGORE,
Chairman, Senate Committee on the Judiciary,
Senate Office Building,
Washington, D. C.

MY DEAR SENATOR: The board of governors of the National Society of Public Accountants, a professional society representing accountants in public practice in every State and the Territories, has adopted the enclosed resolution, endorsing the recommendations of the Commission on Judicial and Congressional Salaries.

It is the desire of the board that its position with respect to the proposed salary increases be recorded with the Congress. I, therefore, request that you insert the enclosed resolution in the CONGRESSIONAL RECORD.

Thank you for your cooperation in this matter.

Very truly yours,

JAY A. ROBINSON,
President.

RESOLUTION OF BOARD OF GOVERNORS, NATIONAL SOCIETY OF PUBLIC ACCOUNTANTS

Whereas the Commission on Judicial and Congressional Salaries recommended in its report of January 15, 1954, certain salary increases for Members of Congress, the Vice President, Federal judges, and other Government officials; and

Whereas it is generally recognized that present salaries for Congressmen, judges, and others mentioned in the report are grossly inadequate for the qualifications required for these positions and the services rendered by the individuals holding these important offices; and

Whereas most Congressmen are confronted with the necessity of maintaining two homes and are burdened with numerous other expenses in connection with their official duties; and

Whereas citizens of this country cannot continue indefinitely to impose on the patriotic spirit of their public servants while salaries in private industry outstrip those paid legislators and judges; and

Whereas a great number of citizens of outstanding ability are now unavailable for service in these vitally important offices because they are unable to make the necessary financial sacrifices imposed by the existing salary scale: Now, therefore, be it

Resolved by the board of governors of the National Society of Public Accountants, As professional men in public practice, this body well realizes the unselfish service rendered by Members of Congress and the Judiciary. It is, then, the sense of this board that the present salary scale for these vital posts is grossly inadequate and represents a threat to the quality of our future lawmakers and judges. This board further believes that this "penny-wise and pound-foolish" policy of underpaying men we have selected to carry such a burden of public trust and responsibility cannot be justified on any basis; be it further

Resolved, That this body be recorded as favoring the recommendations contained in the report of the Commission on Judicial and Congressional Salaries; further

Resolved, That the board of governors of the National Society of Public Accountants urges all Members of Congress to support legislation introduced to accomplish this end.

JAY A. ROBINSON,
President.

CONGRESS OF INDUSTRIAL ORGANIZATIONS,
Washington, D. C., February 9, 1955.

To: Members of the United States Congress.
From: Robert Oliver, Assistant to the President and Director of CIO Legislative Committee:

Enclosed herewith you will find a resolution concerning the pending legislation to increase congressional and judicial salaries which was adopted unanimously by the CIO Executive Board at its meeting in Washington, D. C., on February 2, 1955.

This action by the CIO Executive Board follows the endorsement of the recommendations of the Commission on Judicial and Congressional Salaries which CIO Secretary-Treasurer James B. Carey earlier forwarded to the chairman of the Senate Subcommittee on Judicial and Congressional Salaries.

The CIO realizes that there exists some misunderstanding of the merits of the pending legislation. We will make every effort throughout the country, both through our own membership as well as the general public, to show the rightness and justification of the proposed increases.

We urge you to proceed with the enactment of this legislation as rapidly as possible, confident that in the coming weeks a large segment of the population will be fully informed as to its complete justification.

CONGRESSIONAL AND JUDICIAL PAY RAISE

(Resolution adopted by the CIO executive board, February 2, 1955)

The CIO heartily approves the proposal to increase salaries of Members of Congress and Federal judges. We urge the leaders of both parties in both House of the Congress to unite behind the recommendations made last year by the Commission on Judicial and Congressional Salaries to the end that they may be enacted into law as speedily as possible.

It has been 9 years since Congress and the Federal judiciary last received a salary increase. The result, during this period of high inflation and general salary increases for most segments of the economy, has been an increasing number of resignations of Members of Congress and judges to accept other more lucrative jobs in private industry.

The CIO believes that no body of men in the world have a greater responsibility than the Members of our great National Legislature and the judges who are called upon to interpret legislative enactments. Such responsibility must be met with adequate recompense.

Not only have congressional salaries never caught up with inflation, but in recent years they have never been entirely commensurate with the high demands made upon Congressmen. Even the top recommendation for an increase currently being considered by the Congress will, if enacted, still leave the pay of Members of Congress far below the salaries being paid to executives of business corporations whose work has far less responsibility to the public interest.

Enactment of the pay increases for Congress and the Federal judges at the top levels recommended by the Commission on Judicial and Congressional Salaries will be an investment in good government that is long overdue. It should have the support of all citizens. We urge immediate passage of this legislation.

MEMPHIS AND SHELBY COUNTY BAR ASSOCIATION, INC.,
Memphis, Tenn., February 15, 1955.

Hon. ESTES KEFAUVER,
Senate Office Building,
Washington, D. C.:

At a recent meeting the board of directors of the Memphis and Shelby County Bar Association considered the proposed judicial and congressional salary increase bill, which has been introduced into the Congress.

The board went on record as approving this proposed legislation.

Sincerely yours,

S. SHEPHERD TATE,
Secretary.

EAST TENNESSEE PACKING CO.,
Knoxville, Tenn., February 15, 1955.

Hon. ESTES KEFAUVER,
Senate Office Building,
Washington, D. C.

DEAR SENATOR KEFAUVER: It is our understanding there is a bill before Congress to increase the compensation of all Senators, Congressmen, and Federal judges. We are heartily in favor of any bill that will increase their compensation, as we think it is long past due. It is our belief that all right-thinking people are of this opinion.

Kindest personal regards.

Sincerely,

HERBERT J. MADDEN,
President.

[From the Washington Post and Times Herald of February 17, 1955]

THE HOUSE VOTES A RAISE

The House yesterday put away its fears of public reaction against a decent pay raise for its Members and voted in accord with the needs of the times and the responsibilities of Senators and Representatives. It is to be congratulated on facing up to the pay problem despite many unfair attacks on the motives of those who have sponsored the pay-raise bill. The House also voted an equally necessary raise for the Federal judiciary. If the raise is finally approved, it will be the first since 1946. Since then the average hourly earnings for manufacturing employees have increased by 70 percent and consumer prices have increased by 40 percent. The raise is essential if for no other reason than to enable Members of Congress and the judiciary to keep financially abreast of the times. Let us hope that the Senate will promptly follow the good example set by the House.

[From the New York Herald Tribune of February 18, 1955]

FAIR PAY FOR IMPORTANT WORK

There are two excellent reasons for raising the salaries of Members of Congress and Federal judges.

First, our Representatives, Senators, and interpreters of the law are worth more. It may be hard to measure responsibility and dignity in dollars and cents, but the people who hold these posts should not have to fret about making ends meet. The pay ought to be high enough so that legislators and judges are able to devote themselves to public duty with an unharassed sense of independence.

Second, almost everybody else in the country has been getting a pay raise. But the pay for Congress and the judiciary has stood still since 1946, when the levels were raised for the first time since 1925. One result is that there have been many cases of able men and women who dropped out because of economic pressure. They felt it was impossible to do their best for country or family on inadequate salaries. Others have struggled along by supplements from writing and lecturing.

This newspaper is delighted to see that the lawmakers are at last overcoming their timidity about voting increases. The House has overwhelmingly approved raising congressional salaries from $15,000 to $25,000, along with an extra $5,000 for the Vice President and Speaker, $10,000 more for the Supreme Court and circuit court justices, and $7,500 for the lower court judges. All this is long overdue; if anything, the judiciary should have fared even better. The proposed salary of $35,500 for the Chief Justice of the United States is decidedly modest, as is $22,500 for district judges.

Still the whole program is bound to attract superior talents to the high places of Government and keep them there. The Senate, we feel confident, will promptly add its approval.

[From the New York Herald Tribune of February 17, 1955]

CONGRESSIONAL PAY RAISE IS CALLED AMPLY JUSTIFIED

(By David Lawrence)

WASHINGTON, D. C., February 16.—If the conscience of any Member of Congress hurts him about voting for that pay raise of $10,000 a year, there is an easy way out—to give back to the Treasury as much as he likes.

There's precedent for such a gift. Herbert Hoover gave back most of the Presidential salary he received while in the White House. He, himself, never revealed that fact but his friends have told about it. Maybe there are other public servants who have done the same thing and kept it secret.

What a proper salary for Members of Congress should be is a very serious matter and goes to the heart of the question of integrity in Government.

Many of those in the House of Representatives who voted against the proposed increase—which has yet to pass the Senate—did so because of a conscientious belief that the voters wouldn't approve of it. But it is important that the voters should know all the facts. For many Members who voted against the increase really deserve to have the higher salary to cover those expenses they have been trying to meet out of their own pockets. Likewise, some who voted for the increase did so out of consideration for the plight of their colleagues, though they themselves didn't need the extra money.

It all comes down to a simple proposition—the American people certain don't want only rich men in Congress, nor do they want to see Members accepting gratuities from constituents or big campaign contributions in appreciation of services they may have rendered.

NO FEE FOR SERVICES

Members of the House come up for election every 2 years, so they are constantly in need of campaign funds. Many of them supply it out of their own pockets rather than solicit gifts from constituents who seek special privileges. But the worst phase of the matter is the drain on the funds of a Member of Congress by residents of his district or State who feel their Congressman or Senator is something of an errand boy or personal representative in Washington.

Lots of the things done by Members of Congress for people back home are worth thousands of dollars to those who are benefited, yet there is no such thing as a service charge, or fee to be paid. Indeed, it would be highly improper for any such payment to be made.

If, for example, a new postoffice building or a defense installation or some other Federal project involving huge sums of money is brought to an area as a result of the efforts of a Member of either House, there are citizens who profit by the rise in real estate values and in other ways. They cannot and should not pay for that service. Yet, in the doing of that chore for the people, various expenses are often incurred and in many instances it is the Member of Congress who foots the bill rather than become involved in some transaction which a political opponent could some day uncover and use as a smear.

It is odd but members of national legislatures the world over have trouble about the size of their salaries. In Britain the Churchill government almost was overthrown last spring because the Labor Party insisted on a pay raise and the Conservatives opposed it. Many of them are wealthy and carry on extensive business interests. Only after some Conservatives deserted their leadership was the issue compromised. Today the pay of a member of the House of Commons is the equivalent of about $2,800 a year with an extra allowance they may request for each day the House sits. This amounts approximately to about an extra $740 a year. Curiously enough, the House members in London have no private offices or staffs provided by the government.

LEGISLATORS POORLY PAID

In France the pay is equivalent to about $5,000 a year and the 100 Communist Deputies contribute about $3,000 apiece directly to the party fund or approximately $300,000 a year, which is quite a sizable help in carrying on Communist propaganda.

In the State legislatures in this country members are poorly paid and it is a scandal that corporations with business before these bodies often retain as counsel for other services members who are lawyers. The labor unions do the same thing.

Many Members of Congress have outside income. Some earn it by getting large fees for speaking before labor unions and trade bodies of various kinds. Others still practice law before State courts. Some have large business interests or derive a big income from investments.

The raise in pay is needed in order to permit the election to Congress of citizens irrespective of their income status. A total of $25,000 a year, out of which comes $4,500 for taxes, or a net of $20,500, is not too much for a Member of either the House or the Senate to receive if he is honorably to serve his constituency.

TENNESSEE STATE ASSOCIATION OF LETTER CARRIERS,
Nashville, January 8, 1955.

Hon. ESTES KEFAUVER,
Senate Office Building,
Washington, D. C.

MY DEAR SIR: It appears that soon there will be a bill introduced to increase the salary of the Senators and Congressmen. This increase is far overdue, it is a shame that we the people will elect honest men to high positions to represent us, asking and demanding so many things of them, yet we expect them to exist on such a meager salary. We urge you to do all in your power to have this bill passed without delay.

Respectfully,

HARRY COSBY.

NASHVILLE BAR ASSOCIATION,
Nashville, Tenn., February 17, 1955.

Senator ESTES KEFAUVER,
United States Senator From Tennessee, Washington, D. C.

DEAR SENATOR: Enclosed find copy of a resolution adopted by the Nashville Bar Association on January 27, 1955, recommending passage of the judicial-congressional salary increase bill now pending in Congress.

Yours very truly,

E. T. HOLLINS, Jr.,
Secretary-Treasurer.

Be it resolved by the board of directors of the Nashville Bar Association, That this association endorses the passage of the judicial-congressional salary increase bill now pending before the Congress of the United States, and that a copy of such resolution be sent to the two Senators of the State of Tennessee, and the Representative in Congress from Davidson County.

THE TOLEDO BAR ASSOCIATION,
Toledo, Ohio, February 17, 1955.

The Honorable HARLEY M. KILGORE,
Chairman of the Senate Judiciary Committee, Senate Office Building, Washington, D. C.

DEAR CONGRESSMAN KILGORE: Enclosed is a copy of a resolution adopted by the executive committee of the Toledo Bar Association on February 11, 1955.

We strongly urge that you exert your efforts to bring about the passage of legislation to accomplish the purpose of the resolution.

Very truly yours,

ROGER SMITH,
President.

RESOLUTION OF EXECUTIVE COMMITTEE OF TOLEDO BAR ASSOCIATION

Whereas the Toledo Bar Association has on previous occasions gone on record as favoring legislation providing for salary increases for judges of the United States courts; and there are pending in the House and Senate bills which would, if enacted, help to relieve in varying degrees the inadequate salary of judges; and

Whereas the Commission on Judicial and Congressional Salaries created pursuant to Public Law 220, 83d Congress, recommended increased salaries for judges and Members

of Congress in accordance with the following schedule:

Chief Justice of the United States	$40,000
Associate Justices of the Supreme Court of the United States	39,500
Speaker of the House of Representatives	40,000
Members of Congress	27,500
Judges of the United States Courts of Appeal	30,500
Judges of the U. S. Court of Claims	30,500
Judges of the Tax Court of the United States	27,500
Judges of the Court of Military Appeals	30,500
Judges of the U. S. Court of Customs and Patent Appeals	30,500
Judges of the U. S. Customs Court	27,500
Judges of the United States district courts (including the U. S. District Courts for the Districts of Hawaii and Puerto Rico, the District Court for the Territory of Alaska and the District Court of the Virgin Islands)	27,500

and this recommendation was duly endorsed by the House of Delegates of the American Bar Association; and

Whereas the President of the United States in his state of the Union address to Congress in January 1955 strongly recommended that Congress take favorable action toward increasing salaries of Congressmen and judges: Now, therefore, be it

Resolved, That the Toledo Bar Association endorse and urge the passage of legislation providing the increased salaries as shown in the above schedule; be it further

Resolved, That the Toledo Bar Association urge that appropriate salary increases be provided by legislation for United States attorneys and their assistants; be it further

Resolved, That notice of this resolution be mailed to the Senators and Members of Congress from Ohio and to the Honorable HARLEY M. KILGORE, chairman of the Senate Committee on the Judiciary; the Honorable EMANUEL CELLER, chairman of the House Committee on the Judiciary; the Honorable ESTES KEFAUVER; the Honorable FRANCIS E. WALTER; the Honorable ABRAHAM J. MULTER; the Honorable WALTER F. GEORGE; and the Honorable STYLES BRIDGES.

Mr. BUSH. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. BUSH. Is it in order to call up my amendment at this time?

The PRESIDING OFFICER. It is.

Mr. BUSH. I call up my amendment and ask that it be stated.

The PRESIDING OFFICER. The clerk will state the amendment offered by the Senator from Connecticut.

The CHIEF CLERK. On page 7, beginning with line 19, it is proposed to strike out down to and including line 9 on page 8, as follows:

SEC. 2. (a) Section 601 (a) of the Legislative Reorganization Act of 1946, as amended, is amended to read as follows:

"(a) The compensation of Senators, Representatives in Congress, Delegates from the Territories, and the Resident Commissioner from Puerto Rico shall be at the rate of $22,500 per annum each; and the compensation of the Speaker of the House of Representatives shall be at the rate of $35,000 per annum."

(b) Section 601 (b) of the Legislative Reorganization Act of 1946, as amended (relative to expense allowances of Members of Congress), is hereby repealed.

(c) Section 104 of title 3 of the United States Code (relating to the compensation of the Vice President) is amended by striking out "$30,000" and substituting therefor "$35,000."

On page 8, line 10, it is proposed to strike out "Sec. 3." and insert "Sec. 2."

On page 9, line 1, to strike out "Sec. 4." and insert "Sec. 3."

The PRESIDING OFFICER. Does the Senator from Connecticut wish the amendments to be considered en bloc?

Mr. BUSH. Yes, Mr. President.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BUSH. Mr. President, the purpose of the amendment is simply to strike from the bill all reference to congressional salaries, so that it would then become a bill dealing with salaries for the judiciary, although it would retain increased travel allowances for the Members of the Congress. The amendment would delete all reference to increases in congressional salaries.

Mr. President, this is a subject to which I suppose we have all given considerable thought. My opposition to the bill is not something which I have just developed. In a general way I have always felt about the matter of congressional salaries as I feel today.

Incidentally, Mr. President, I should like to say at this time, inasmuch as I may have to leave the city shortly, that I should like to support the amendment of the Senator from Delaware [Mr. WILLIAMS], which would require that the budget of the United States be in balance before such increases would go into effect. I would vote for that amendment, although I would expect that if it should be agreed to, the question of judicial salaries would be taken up as a separate matter. I see no sense in tying judicial salaries with congressional salaries. I think the two situations are entirely different, and should not be considered together, but should be considered separately.

Mr. President, the bill calls for an increase of 50 percent in the salaries of the Members of the Congress. I think that is a very large increase indeed. It is not a cost-of-living raise. It is a very large compensatory increase in salary.

While we are talking about that, there are in committee bills to which the Senator from North Dakota [Mr. LANGER] referred, proposing to raise the salaries of postal workers and other Government employees 5 or 7 or 10 percent. We cannot make up our minds how much the increase should be, but we are talking in terms of 5 percent up to 10 percent. At the same time, Mr. President, we are talking about raising the compensation of the Members of the Congress by 50 percent. We are talking about an increase of $7,500. That is double the entire salary of many Federal workers whose increase in salary we have been discussing for 2 years, trying to decide whether there should be an increase of 5 or of 10 percent.

In good conscience, I simply cannot vote for a salary increase for Members of the Congress of such a large amount under any conditions, and especially when we have failed to come to an agreement as to what should be done with regard to increasing the salaries of postal and other Government employees and are talking about such a relatively small increase for them as compared with the proposed increase in our own salaries.

Mr. President, there must be reason brought into the discussion of this question. If we vote ourselves a salary increase of $7,500, or, as the House voted, $10,000, how in the world are we going to be able to control all the expenses in the way of salaries? I think we would be put in an almost indefensible position.

To point up that proposition a little more closely, we are talking about a weekly increase of approximately $4 for the postal worker, but have not done anything about it; a $5-a-week increase for the military; and a $200-a-week increase for Members of Congress.

I oppose the bill, therefore, on the ground that the increase is much too large. I shall give other reasons why I oppose the bill.

I said a moment ago that I favor the amendment offered by the distinguished senior Senator from Delaware [Mr. WILLIAMS], and I shall support it. I think Congress ought to be able to come to grips with the fiscal disorder which has troubled the Government for a good many years. If we cannot control the finances of the United States well enough to balance the national budget, certainly we should not be talking in terms of a 50-percent compensatory increase in the salaries of Members of Congress.

While I would not favor any increase at this time, for reasons which the distinguished Senator from Delaware will advance, and which, obviously, are behind the purposes of his amendment, I will not say that I would forever oppose an increase in the salaries of Members of Congress. I do not say that I would oppose a modest increase after some of the other things I have mentioned were done. But, I definitely wish to state, in case I am not here to record my vote, that I am entirely in sympathy with the philosophy embodied in the amendment of the distinguished Senator from Delaware.

I think that the two questions—of increases in salaries for judges and for Members of the Congress—should be separated. I believe the judges should have an increase in their salaries. I have read carefully the Segal report. A serious situation seems to exist in many States with respect to the law of supply and demand. I do not know the situation in all the States, but in the States with which I am familiar I find that the State judgeships are valued very much more highly than are Federal judgeships. I know that is the case in the State of Connecticut. I know that when there was a vacancy in the Federal district court in Connecticut in 1953, great difficulty was experienced in finding a person upon whom my distinguished colleague [Mr. PURTELL] and I could agree was sufficiently qualified that we, in good conscience, could recommend him for that Federal judgeship. We finally were able to persuade a man of the very highest type, of whom we are very proud, Judge Anderson, to leave the State bench and to accept the Federal judgeship, which he did at considerable personal sacrifice to himself, and as a very patriotic move on his part. At that time I for one assured him that I hoped

that the pay of Federal judges would be increased substantially, so that eventually he, perhaps, would have made no financial sacrifice in giving up his State judgeship to take the Federal judgeship.

So, as I say, I favor an increase in salaries for Federal judges. A Federal judge must divorce himself from any other sources of earned income, and devote all his time—100 percent of it—to the business of the Federal bench.

That is not true of Members of Congress. It never has been true. Many Members hold connections with business and professional organizations of different kinds. While all Members do not do so, at least most of them have been able to retain their interests in automobile agencies, law firms, radio, television, and the newspaper business, and similar kinds of enterprises. I see nothing wrong with that. I think it is good to have in Congress men of affairs, who know what it means to operate businesses, or who practice law. I think that is good. I do not believe it ought to be discouraged. But it does suggest that men need not completely sever themselves from sources of earned income if they enter Congress.

That is not so with the judiciary. For that reason I think the two branches should be considered in separate bills, not in one, and that the situation with respect to the Federal judges should be considered on a different basis.

Fundamentally, as a Member of the Congress, I hold this philosophy: Membership in Congress is a service job. I have read the Segal report. It makes comparisons with corporation salaries of $120,000 and salaries of labor leaders ranging from $20,000 to $50,000, and draws the conclusion from those incomes that congressional salaries are much too low. But I suggest there are other comparisons which are valid. I suggest that the position of a Member of Congress, which I think of as a service job, is more to be likened to the position of the teacher in a school or of the principal of a high school, of ministers of the church, of doctors and lawyers in our small towns. To most persons in those categories, a salary of $15,000 is no obstacle to entering the service of the Congress of the United States. In fact, it would attract most of them, because many of them do not make anywhere near that much money.

So I feel that an entirely different situation exists with respect to salaries of Members of Congress than exists in the case of salaries of Federal judges.

I do not think, frankly and ideally, that Congress is a place for a person to seek a position if he is more interested in making money than he is in performing a public service.

I do not blame anyone who wishes to go into the service of a corporation and to do just as well as he can. I have no objection to that. Such persons render very great service to our country. They manage large and small organizations, which provide jobs for hundreds of thousands, yes, millions, of people; and that is what makes this Nation tick. They deserve all the respect in the world. But it is not necessary to have the pay of Members of Congress geared so as to attract such persons into service in Congress.

Therefore, I do not believe that the philosophy of the Segal report is at all satisfactory in connection with the matter of reward and compensation for Members of Congress. I do not consider that the report has drawn valid comparisons.

I think of the principal of the high school in my own town of Greenwich, Conn. I should say, without fear of contradiction by anybody in that town, that he would be very well qualified, if he chose to do so, to sit in Congress. Yet he does not receive $15,000; he gets, I think, $10,000. There are many others like him all over the United States.

So people like him stay in the professions they have chosen, because they want to dedicate themselves to the services of their communities. They are not interested in their work simply to make money out of it. They are interested in it because they like it, and because they get their reward, not from any material return, but from the satisfactions that go with performing work of that kind. I rather hold to the view that that is also the best kind of satisfaction one can get from service as a Member of Congress.

I notice that whenever there have been vacancies in recent years, there has been no great trouble about filling them. There has been no dearth of applicants. Let a Member of the Senate resign—I care not from what State he comes—and immediately there will be several applicants for the position. The law of supply and demand does not suggest that the pay is not sufficiently large to attract persons to these positions. Everyone who has come here, and who is here now, was attracted to the position by a vacancy. I know that in the last election there were certainly many more candidates for the positions than there were winners. Moreover, many candidates were defeated in the primaries within their own parties.

So I do not believe the law of supply and demand suggests that the salary is very greatly out of line, or that it needs anything in the nature of a 50-percent boost.

Mr. President, that concludes my remarks on this subject. I am sorry to find myself at variance with so many distinguished Senators, whom I hold in the highest esteem. I hope that no Members will feel that what I have said in defense of my philosophy on the subject is in the slightest degree a reflection upon their views. One has to make up his own mind about matters of this kind.

Mr. PURTELL. Mr. President, will my colleague yield for a question?

Mr. BUSH. I am glad to yield.

Mr. PURTELL. Does the Senator believe that the Segal report with relation to the proposed salaries for the judiciary is based upon a fair premise and sound reasoning?

Mr. BUSH. I may say to the distinguished Senator, as I said earlier in my remarks, that I think the situation in the judiciary is different, and that there should be a substantial increase in the pay of the members of the judiciary. I do not take much issue with the Segal report so far as judiciary salaries are concerned.

Mr. PURTELL. Since my colleague felt that the reasoning was sound with regard to judiciary salaries, my inquiry was whether that same body, which gave the same amount of time, the same study, and the same investigation to the question of congressional salaries was wrong in its conclusions and recommendations concerning such salaries.

Mr. BUSH. I think the members of the Commission were quite wrong with regard to their conclusions regarding congressional salaries, and I think they made a great mistake in lumping the two groups together, because the two categories are not the same, and yet they came out with the same answer for both groups.

Mr. PURTELL. Would the Senator feel that one of the prerequisites for membership in the Congress, whether it be in the House or the Senate, should be either inherited or acquired wealth before becoming a Member of Congress?

Mr. BUSH. Will the Senator repeat the question?

Mr. PURTELL. I think I had better repeat the question. Is it the Senator's opinion that one of the tests for ability to serve in the House or the Senate should be either inherited or acquired wealth before becoming a Member of Congress?

Mr. BUSH. No; I say to the Senator I would not say there should be any such test.

Mr. PURTELL. Would the Senator agree with me that while it is true the average age of Senators is 57, it is also true that many who have come to the Senate in the past and probably many who are presently Members of Congress, because of their not having engaged in business before becoming Members of Congress, perhaps do not have as much of the world's goods as others have been able to accumulate? My experience has been that many Members of the House of Representatives, with growing families and children who have to be sent to school, find it impossible to make ends meet. Does the Senator agree with me that such persons do have difficulty in trying to make ends meet, in view of the fact that they have two homes to maintain, are trying to educate their children, and at the same time are trying to meet the demands of their constituents by going back and forth between their respective districts and Washington? May I further ask the Senator if he thinks such persons should deny to their loved ones some of the necessities, in the way of education and otherwise, that more wealthy men can give their families and children?

Mr. BUSH. Mr. President, I would remind the Senator that such persons are not compelled by any requirement except their own preference to serve in the House. There is no compulsion for such persons to remain Members of the House if they do not think the reward is satisfactory and they find themselves in a position of hardship such as the Senator has suggested. I think the same argument might be made as to school teachers, school principals, professors in uni-

versities, doctors, and ministers of the church. What I am saying is that I do not think that Members of Congress should necessarily be compensated entirely by their salaries; that their reward should come in part at least from a spirit of satisfaction in rendering service.

Mr. PURTELL. Does the Senator believe that the salaries should be so low as to preclude from an opportunity to serve in Congress many persons who have growing families and who would like to serve in legislative bodies, but cannot because the salaries do not permit them to do justice to their families and also carry on their duties as legislators?

Mr. BUSH. I simply say to the Senator that I do not think the salaries should be fixed at such a rate that anybody who wanted to do so could make money from service in Congress. From what I have been able to observe, I think we would find plenty of qualified applicants to fill the jobs. As I said a while ago, whenever a vacancy exists there seems to be no dearth of applicants to fill the vacancy. We are not in such bad shape. I think the Members of both the Senate and the House present a very good cross-section of the people of the United States. Frankly, I do not believe increasing the salaries as proposed in the bill would result in improvement in the general quality of the Members of either House.

Mr. PURTELL. Has the Senator read, and I am sure he has, some of the statements which were made by Members of the House relative to their inability to make ends meet—not to make money, but to make ends meet—and to give their families what they are entitled to? Has the Senator read some of those statements?

Mr. BUSH. I have read some of those statements. I think the Senator is personalizing an argument which should be looked at objectively. As I said before, if such a person finds it difficult to make ends meet, and he could do better elsewhere, then let him do what he wants to do elsewhere. I do not think the fact that one man cannot make ends meet necessarily means that the salary scale should be changed or increased by 50 percent.

Mr. PURTELL. In other words, the Senator feels that if one with a growing family and having no inherited or acquired wealth finds himself unable to meet the demands of his family, he ought not to run for office?

Mr. BUSH. No; I would not say that.

Mr. PURTELL. Would the Senator draw that conclusion?

Mr. BUSH. No; I would not draw that conclusion.

Mr. PURTELL. If the salaries are not sufficient to sustain growing families of men younger than either my distinguished colleague or myself, are we not denying them the right to serve, because they must make a choice between fulfilling their duties to their families and carrying on their duties to their constituencies?

Mr. BUSH. The same argument might be applied to ministers of the church or school teachers. The point is, What does a man want to do with his life? If he wishes to serve the church, he will go into the church, with the knowledge that he is not going to become rich, but will get a modest reward. If such a person wishes to teach in school, he will go into the profession of teaching for the satisfaction he will get out of it, knowing that his salary will not be very large, but that he will be rewarded by the satisfaction that he gets from teaching. The same thing is true of doctors. In most of the towns in the State of Connecticut, I doubt that there are many doctors, when one considers the number of them, who are making as much as $15,000 a year.

In my judgment the problem should not be looked at personally, because while A, B, and C may be having a difficult time to make ends meet, what should be considered is what is best for the country as a whole. If Mr. A, B, and C find it is difficult, there is nothing to stop them from leaving, so that Mr. X, Y, and Z may fill the vacancies when they occur, as has been done for 165 years.

Mr. PURTELL. If Mr. A, B, and C cannot carry on because they lack other means for sustaining themselves, and Mr. D, E, and F can do so because they have inherited or acquired wealth, we would then have a situation where certain segments of our population would be denied the opportunity to serve because of their inability to sustain themselves on the salaries fixed.

Mr. BUSH. I do not agree with the Senator. It was brought out in the debate last year that many Members of Congress found their salaries to be satisfactory, and even to be larger than what they had been previously earning. I am glad they found that to be the situation, but I do not think the Senator's frequent references to acquired or inherited wealth have anything to do with the question. The answer depends somewhat on the type of job one regards service in Congress to be—whether it is a compensatory or truly a service job. Over the years legislative salaries have not been comparable to the salaries paid in the judicial or executive branches of Government. In our State, the Senator knows that the legislative salaries are very low. Legislators in the State of Connecticut, a group which includes many able men and women, receive $600. Of course, the legislature meets for only a few months, once a year, unless there is a special session. Heretofore in the history of this Government, salaries of Members of Congress have not kept pace with executive salaries, and I do not think it is necessary that they should. I do not believe the circumstances of 1 individual or 100 individuals who may be in the Congress are important. In my judgment, the question is what is best for the country, and what is going to attract a satisfactory quality of person to the Congress. I believe that with the present salary level the Members of Congress are of good quality. I see no reason why we should not have equally qualified Members tomorrow or in the future. While I am not opposed to any reasonable increase in salaries to Members of Congress, I am opposed to the proposal at the present time.

Mr. PURTELL. Does the Senator feel that a person who has family responsibilities, such as providing for youngsters, and at the same time a desire to serve the people in a legislative body, should be forced to make the choice of one or the other, in view of the fact that such a person would find that he would not be able to serve in the legislative body?

Mr. BUSH. I say to the Senator that we always have to make choices to live within our means, whatever they may be. Everyone has to make a choice as to whether he should take a position which is attractive, but which he cannot afford to take but there is no compulsion on the part of anyone to seek office. The seeking of the office is done voluntarily. There is nothing to compel a man either to seek or to remain in office.

Mr. PURTELL. It is not a question of seeking office. It is a question of circumstances being such as to prevent certain persons from seeking office because they would be financially unable to achieve a satisfactory standard of living.

Mr. BUSH. No matter how high the salaries were made, it would always be found that they were too low for some persons. My own judgment is that if the salaries were raised as provided by the bill, there would not be attracted to the Congress a more qualified group of persons than now constitute it.

Mr. PURTELL. Does the Senator agree with me that we might be able to retain many members of legislative bodies who have felt they could not continue in office because of the responsibility they owed to their families?

Mr. BUSH. My guess would be that if the passage of the bill should fail we would not lose, because of the reasons the Senator has set forth, any more Members than we have lost in a typical year. I do not think the failure to pass the bill would have any effect whatsoever on the quality of the membership of the Senate.

Mr. LANGER. Mr. President, will the Senator from Connecticut yield for a question?

The PRESIDING OFFICER. (Mr. MCNAMARA in the chair). Does the Senator from Connecticut yield to the Senator from North Dakota?

Mr. BUSH. I yield.

Mr. LANGER. Does the senior Senator from Connecticut realize that both the CIO and the A. F. of L. have endorsed this bill?

Mr. BUSH. I realize that; but frankly, I am not terribly impressed by it.

Mr. LANGER. Will the Senator from Connecticut name one Member of this body who is a laboring man? I am speaking of a man who works with his hands.

Mr. BUSH. At the moment I am looking at a gentleman who, I understand, has represented and represents labor unions; and I assume that he, himself, is a union member. Therefore, in answer to the question of the Senator from North Dakota, I name the junior Senator from Michigan [Mr. MCNAMARA].

Mr. LANGER. Since the Senator from Connecticut has named the Senator from Michigan, can the Senator

from Connecticut name a Member of this body who is a farmer?

Mr. BUSH. In response, I name the senior Senator from Delaware [Mr. WILLIAMS].

Mr. LANGER. I have understood that he raises 1½ million chickens a year.

Mr. BUSH. Yes, he is a chicken farmer.

Mr. LANGER. I am referring to a Member of this body—if the Senator from Connecticut can name one—who gets up at 4 o'clock in the morning and goes into the barn and milks half a dozen cows.

Mr. BUSH. I suggest that possibly the senior Senator from Virginia [Mr. BYRD] might be classified as a farmer.

Mr. MORSE. Mr. President, will the Senator from Connecticut yield to me?

Mr. BUSH. I yield.

Mr. MORSE. I should like to advise the Senator from North Dakota that I am looking for some cheap labor on Saturdays; so he can come out to my farm and work for me. [Laughter.]

Mr. BUSH. Then I give the Senator from North Dakota the Senator from Oregon. [Laughter.]

Mr. WILLIAMS. Mr. President, will the Senator from Connecticut yield to me?

Mr. BUSH. I yield.

Mr. WILLIAMS. I appreciate the suggestion of the Senator from North Dakota, but I must say that he is just as wild regarding his estimates on the production of chickens as he is regarding some of the other statements coming from North Dakota. [Laughter.]

Mr. BUSH. Mr. President, I yield the floor.

Mr. DIRKSEN. Mr. President——

The PRESIDING OFFICER (Mr. NEUBERGER in the chair). The Senator from Illinois.

Mr. DIRKSEN. Mr. President, I simply wish to make clear the effect of the amendment which our esteemed and distinguished colleague the senior Senator from Connecticut [Mr. BUSH], has offered. He proposes to strike out the part of the bill which relates to a salary increase for the Members of the House of Representatives and the Senate, and thus leave in the bill only the part relating to a salary increase for the members of the judiciary.

Mr. BUSH. That is correct—plus the travel allowance.

Mr. DIRKSEN. Yes; plus the travel allowance.

Mr. President, I do not believe the bill should thus be separated. It seems to me that if that were to be done, the proper time to make such a case was on July 20, 1953, when the resolution creating the salary commission was before the Senate. I have examined the RECORD which was made on that occasion. I find that no objection was raised by any Senator, on either side of the aisle, with respect to that measure. I find that no motion was made to strike from the resolution the reference to congressional salaries. In short, the proposal was to have the commission investigate both the salaries of the judiciary and the salaries of the Members of Congress, including the Members of the House of Representatives and the Members of the Senate. If there had been a desire on the part of some Member of Congress to strike out one part of that measure, so as to make a differentiation as between the salaries of those who are appointed and the salaries of those who are elected, it seems to me that such a case should have been made at that time.

Mr. BUSH. Mr. President, will the Senator from Illinois yield to me?

Mr. DIRKSEN. I yield.

Mr. BUSH. I think the Senator from Illinois has a good point. However, I should like to say that I filed a statement on this matter with the Segal Commission, outlining about what I have stated today. So I feel at least partially not guilty of the charge my colleague has made.

Mr. DIRKSEN. Very well. However, the appropriate time would have been when that debate was occurring on the floor of the Senate, during the calendar call. Every Member had full opportunity at that time to express his views on the matter. However, no such separation as between the judiciary and the legislative branch was proposed.

So the Segal Commission went to work. It did its work excellently. The chairman did a superb job, in my opinion.

The Commission was a representative one; it represented every field of activity—including both labor, business, and the professions. Of course, six Members of Congress stood in the position of advisers to the Commission, although the Commission did the work itself, and the Members of Congress did not share in the ultimate decisions the Commission made. I think the Commission received testimony from approximately 70 persons. Testimony amounting to approximately 800 pages was taken. Very few persons submitted a contrary view.

After the report of the Commission was made, the bar associations of a great many States endorsed it, and made no effort to differentiate as between the salaries of the Members of Congress and the salaries of the judiciary, or to have a separation made as between the two. I note from the hearings that the bar associations of Virginia, Georgia, New York, Texas, California, Massachusetts, Oklahoma, Arkansas, North Carolina, Indiana, South Dakota, Delaware, New Mexico, Michigan, Missouri, Wisconsin, Pennsylvania, and Montana have endorsed the report. I notice that the American Bar Association has also endorsed it.

No effort was made on the part of the Attorney General to bring about a segregration of this issue and to have Congress act separately on a proposal for an increase in the salaries of the judiciary and a proposal for an increase in the salaries of the Members of Congress. The Attorney General appeared before the so-called Kefauver committee and endorsed the report in its entirety. In his state of the Union message, the President of the United States made no endeavor to separate the two.

So, Mr. President, since the matter is here as the result of a study by a Commission which was authorized and empowered to investigate thoroughly both the salaries of the Members of Congress and the salaries of the judiciary, certainly there would be no point in separating them at this good hour, when the bill is before the Senate, and when a comparable bill was passed by a very substantial majority in the House of Representatives.

Therefore, Mr. President, I trust that the amendment submitted by my distinguished friend, the senior Senator from Connecticut [Mr. BUSH], will be rejected by a decisive vote.

Mr. KEFAUVER. Mr. President, will the Senator from Illinois yield at this point?

Mr. DIRKSEN. I yield.

Mr. KEFAUVER. I heard the distinguished Senator from Connecticut [Mr. BUSH] speak several times about the salaries of doctors. If the Senator will examine the task forces reports, he will find in it the following statement:

> The average income of doctors in 1951 was $13,432.

Mr. BUSH. On what page of the task forces reports is that statement to be found?

Mr. KEFAUVER. On page 38.

I read further from that page:

> Dr. Murray, of the New Jersey Medical Society, stated that it was his opinion that at the age of 40, doctors averaged between $20,000 and $25,000 a year, and that that average was increased as the doctor became 50 or more.

Mr. President, I thank the Senator from Illinois for yielding to me.

Mr. BUSH. Mr. President, will the Senator from Illinois yield to me at this time?

Mr. DIRKSEN. I yield.

Mr. BUSH. Let me ask the Senator from Tennessee about his statement that the average income of doctors in 1951 was $13,432.

Mr. KEFAUVER. I was reading that paragraph of the reports of the task forces. At that part of the reports, Dr. Murray, of the New Jersey Medical Society, is quoted as stating as his opinion that at the age of 40, doctors average between $20,000 and $25,000 a year.

Mr. BUSH. To what area does that statement relate? Does it relate to the State of New Jersey, only?

Mr. KEFAUVER. It is from the reports of the task forces, giving the comparable salaries of the various professions.

Mr. BUSH. Is that statement made, regardless of its application to any particular section of the country?

Mr. KEFAUVER. Yes; it applies to all areas of the United States.

Mr. BUSH. Then I should like to say that I wish to see some substantial support of the statement.

Mr. DIRKSEN. Mr. President, it seems to me that a good deal of the argument today has actually missed the mark. I doubt very much that the office of a Member of Congress can be compared with any other station. I think the Segal Commission set forth the matter in one short paragraph on page 5 of its report, when it said:

> Finally, there is the overriding factor of justice. The salary adjustments we recommend will, we think, correct inequities of long-standing. We believe they are conso-

nant with the dignity and the stature the citizens of the country attach to these critical offices.

I think that is the point in a nutshell. The King of England may receive $500,000 a year; I do not know. I know that he cannot eat any more than can the junior Senator from Illinois, if my appetite is in good form. [Laughter.] I do not believe the King of England can wear any more clothes at one time than I can. I am confident that he cannot smoke more than one cigar at a time.

So, Mr. President, if the matter is put on a creature basis, I do not know where finally one comes out. But I believe that in the minds of the people of the country, a certain dignity and a certain stature attach to the office of Member of Congress, even though some of our constituents do not always attach that dignity and that stature to the occupant of the office. [Laughter.]

Yet, the fact of the matter is that this stature and this dignity go with the office itself. There are 435 Members of the House of Representatives—no more and no less; and they are chosen from among the 165,000,000 people of the United States. In this body there are 96 Members, according to the Constitution of the United States; and they can be added to only in proportion as other States are admitted to the sisterhood of States, under the Federal Union.

Mr. President, clearly a dignity and a stature go with the office of Member of Congress. Thus it is that I believe that what the commission recommends in this case is quite consonant with the attributes of the office. I think that is the crux of the matter, and I believe we should keep it on that fundamental basis.

So, Mr. President, I earnestly hope that the amendment of the distinguished senior Senator from Connecticut will not prevail.

The work done in connection with getting these reports to us has been a long-term operation. I confess to you very freely, Mr. President, that even in 1946, when I was on the Joint Committee on Legislative Reorganization, along with the Senator from Oklahoma [Mr. MONRONEY], former Senator La Follette, and a good many other Members of the Congress, we—and I say this frankly—had to provide in the legislative reorganization bill for a salary increase for the Members of the Congress, in order to get that legislative reorganization job done. The expense allowance for Members of Congress was finally written in to it in the form of an amendment submitted on the floor of the House and on the floor of the Senate; but that was not the contriving of the joint committee.

At the time, I gave a great deal of attention to that matter, feeling that there should be adequate and reasonable take-home pay in connection with this job—and no less than in connection with any other job—because a very wise man by the name of Luke wrote, probably several thousand years ago, that—

The laborer is worthy of his hire.

Mr. President, whether it is in the domain of public service or elsewhere, the laborer is still worthy of his hire.

If there be in the United States persons who today are inadequately compensated that is a tragedy which should be remedied; but that is no reason why our own difficulty should not be resolved when the opportunity to do so arises.

Mr. President, it has been indicated that we should not do this so long as the budget is in a state of imbalance. But, I wish to remind my friend, the Senator from Delaware, and my friend, the Senator from Connecticut, that in the past 22 years, the budget has been out of balance in 21 of those years.

Mr. President, since 1945, five pay increases have been granted in the Federal establishment. They aggregate a little more than 51 percent. There was the pay act of 1945 and at that time the budget was not in balance. We enacted the pay act of 1946, and the budget was not in balance. We enacted the pay act of 1948, and the budget was in balance. We enacted the pay act of 1949 and the pay act of 1951, and both times the budget was not in balance.

Must we be in the unhappy position of having to spar around in trying to find a year when the budget is right, when the circumstances are right, when the mental outlook is right, and then suddenly rush in under the tent?

If so, we would have had only three chances in 26 years to repair the salary status of Members of the House and of the Senate. We have been appropriating salary increases for everyone in the structure of government. That does not seem to have bothered anyone in the House or in the Senate. We have raised some of the salaries and have added one or two classifications. It has reached the point where a GSA 18 employee receives a salary of more than $14,000. He does not have to be elected to office.

Whatever is fair, is fair. Therefore, I do not believe there is any substance to the argument that the budget must be balanced before we should do justice to ourselves.

If I must make the bread and butter argument—and I am not too happy about it—and if we measure the proposed increase in terms of 1939, we are still $200 under the purchasing power of the congressional salary fixed in 1939.

Let us consider the depreciation of the dollar. In those days, when a Member of the House and of the Senate received $10,000, his income tax was $372, and he had 9,628 hard, 100-percent dollars with which to buy things. We are still behind the game, so to speak, on the raise in salary of $2,500 in 1946. Twenty-two thousand, five hundred dollars, express in terms of 1939 dollars, is still $200 behind the 1939 level in terms of purchasing power. If we talk about take-home pay, that is what it amounts to. I would much rather talk about what I believe to be adequate compensation, and compensation that is commensurate with the dignity and status of elective office in the Congress of the United States.

Mr. HAYDEN. Mr. President, will the Senator yield?

Mr. DIRKSEN. I yield.

Mr. HAYDEN. When I received a salary of $7,500 a year on becoming a Member of the House of Representatives—which was the salary the Senator from Georgia [Mr. GEORGE] received when he came to the Senate in 1922—the $7,500 during those years would buy more than $22,500 will buy today. There can be no question about it.

I am talking about the rent we have to pay in Washington, about the cost of living, and about the income tax we must pay. Therefore, I believe $7,500 in those days was really, in effect, more money than we will get if the proposed increased is voted.

Mr. DIRKSEN. The Senator from Arizona is absolutely correct.

Therefore I utter the hope that the amendment offered by the distinguished Senator from Connecticut [Mr. BUSH], on which we shall vote shortly, which amendment would eliminate congressional pay increases entirely, and let stand in the bill only judicial salary increases, will be voted down with real vigor and with great unanimity.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MORSE. Mr. President, I rise to make the first of several speeches in opposition to the pending bill. During the course of the debate I shall discuss a series of amendments to it.

I sincerely hope that after the debate tonight we may have some kind of understanding to vote on the bill on Wednesday, because I believe many of the amendments which are to be offered should lie on the table temporarily and be carefully considered. For the life of me I cannot understand the rush to pass the bill today. It is a bill which ought to receive very careful study by the Members of the Senate, particularly the amendments which are to be offered.

Likewise, Mr. President, I believe it to be important that we have yea and nay votes. Unfortunately, some of my colleagues inform me that there is not a great inclination for yea and nay notes on amendments to the bill. That does not make a pretty record, if it be true. I believe the people of the United States are entitled to have the Senate vote yea and nay on these matters. I shall do my best to urge yea and nay votes. If necessary, I shall do my best to discuss the matter until we do have some yea and nay votes.

Mr. KEFAUVER. Mr. President, will the Senator yield?

Mr. MORSE. I yield.

Mr. KEFAUVER. I wish to say to the Senator from Oregon that I know of no Senator who is opposed to a yea and nay vote on this issue. As chairman of the subcommittee which considered the bill I shall do my best to have yea and nay votes on the passage of the bill and on any amendment that may be offered to it.

Mr. MORSE. Will the Senator from Tennessee join me in asking for a yea and nay vote on the Bush amendment?

Mr. KEFAUVER. Certainly I will.

Mr. MORSE. Mr. President, I ask for the yeas and nays on the Bush amendment.

The PRESIDING OFFICER. Is the request sufficiently seconded?

The yeas and nays were not ordered.

Mr. MORSE. That is my answer to the Senator from Tennessee.

Mr. KEFAUVER. It should be stated that not many of the Members of the Senate are on the floor at the present time.

Mr. MORSE. A sufficient number of Members are in the Senate Chamber.

Mr. KEFAUVER. I am sure that if the Senator will renew the request later we shall have no difficulty getting a yea and nay vote.

Mr. MORSE. A sufficient number of Senators are present to order a yea and nay vote if there were a will to do so.

Mr. President, I wish to say at the outset that I do not share the point of view expressed by my good friend the Senator from Illinois [Mr. DIRKSEN], that 1953, when the resolution was before the Senate, was the time for Members of the Senate to take a position as to whether there should be a separate bill for congressional salaries. The resolution of 1953 was simply a resolution which called for the appointment of a commission to study the subject of judicial and congressional salaries.

Nothing in that resolution directly or indirectly committed any Member of the Senate to vote for a bill combining judicial and congressional salaries. I doubt if any Member of the Senate at the time the resolution was before the Senate had the slightest idea that by voting for the resolution, to use the argument of the Senator from Illinois, we became committed to a procedure for a combined bill, rather than separate bills.

All we did was to vote for the appointment of a commission to study judicial and congressional salaries. It was right that we should do so. I believe it was right that we should have the situation studied. Now the time has come to debate the conclusions of the study. Now is the time to pass judgment on whether we should approach the problem in a combined bill or in separate bills.

Not the slightest obligation is placed upon the shoulders of any Senator to go along with a combined bill rather than separate bills merely because in 1953 he voted for a proposal to study the question of salaries.

I believe the Senator from Connecticut [Mr. BUSH] is quite right in maintaining that the two issues should be separated, and in his amendment he proposes that judicial salaries be considered separate and distinct from congressional salaries. I shall support his amendment, and I shall offer a few amendments of my own.

The first point I wish to make is that in my judgment, Members of Congress are now well paid. In my opinion, they are paid all they are worth.

For the reason brought out by the Senator from Connecticut, when one enters a life of public service, if he is going to represent the best interests of the public, he should not go into it with the idea of making money out of it. I think $15,000 a year, which is what we really receive, $12,500 and the so-called expense allowance of $2,500, is a good salary for the job. I think it is in the best interests of the American people that membership in Congress shall not be made attractive for fiscal reasons; that it shall not be made attractive because the holder of it can make money out of it. We have enough evils in American machine politics without giving political machines other motivating influences, such as highly paid jobs. In my judgment, an increase in salary will not increase the number of freemen in the Congress of the United States. On the contrary, in my opinion, an increase in the salaries of Members of the Congress will enhance a dangerous tendency in American politics by putting undue pressure and influence upon political officeholders. I have always said, and I repeat today, that when we get to the bottom of political financing in America we will be dealing with the primary cause of corruption in American politics. I believe the people will have to do something about that problem, and I do not think we shall be moving in the right direction by increasing the salaries of the Members of Congress 50 percent, to $22,500, as proposed by the Senate bill, or to $25,000, as the House bill proposes.

Mr. President, I am very much interested in the report of the Segal Commission. I turn to page 37 where the Commission uses argument by analogy, which frequently is a dangerous argumentative technique, for often argument by analogy is of itself inherently fallacious. But we read on page 37 of the report that the heads of farm cooperatives received from $20,000 to $50,000, and that the head of the National Grange is paid more than $15,000 a year.

We are told that Farms and Farm People, a cooperative report by the United States Departments of Agriculture and Commerce, shows that the average net money income from class II commercial farms, which include those which sold farm products worth $25,000 or more, was $8,880 in 1949, and, based upon preliminary reports, the 1953 return will be approximately the same.

The report goes on to say:

> To this must be added about $600 for produce consumed in the farm household at farm prices rather than through retail stores, and rental value of farm buildings.

The report goes on to say:

> It is noteworthy that the highest proposed salary for Members of Congress mentioned in the record is the $75,000 in the Farm Journal, the farm magazine with the largest circulation (3 million) in the Nation.

Then it says:

> Most of the lawyers who testified, and those included ex-judges and ex-Congressmen who resigned for reasons of personal economy, were of the opinion that the earning power of either a judge or Congressman in the field of private law practice would range upward from $30,000.

In horse trading we would call that "puffing." It is the old David Harum technique. But, in my judgment, Mr. President, it is not factual.

The report goes on to say:

> This is not an extravagant estimate when the mean net income of all nonsalaried lawyers in 1951 was $8,730.
>
> In the same year the general counsel of 46 American railroads earned an average of $30,590, with a range from $15,260 for the Kansas City Southern to $66,000 for the Pennsylvania Railroad system. Thirty railroads paid their general counsels at least $25,000. The average salary of the general solicitors, the second in rank of counsel, with respect to the 46 railroads was $25,875 with a range from $16,526 for the Virginian Railroad Co. to $44,000 for the Pennsylvania Railroad system.

Mr. KILGORE. Mr. President, will the Senator from Oregon yield?

Mr. MORSE. In a moment I shall be happy to yield for a question.

I continue reading from the report:

> The average salary of general counsel in 1939, with respect to those railroads whose president was paid as much as $40,000 in 1951, was $22,529. This represents an increase of approximately 35 percent in 1951 salaries over those of 1939.
>
> The average income of doctors in 1951 was $13,432. Dr. Murray, of the New Jersey Medical Society stated that it was his opinion that at the age of 40, doctors averaged between twenty and twenty-five thousand a year and that that average was increased as the doctor became 50 or more.

With all that opinion evidence, Mr. President, I ask the question, So what? What has it got to do with the issue as to whether we as public servants who have accepted public service for the duration of our terms at least, and who have undertaken to serve in the way we think we can best contribute to our fellow men, should increase our salaries 50 percent? The argument, I suggest, is based upon the fallacious premise that public life is some form of private enterprise and that we should have salaries commensurate with making a substantial profit. I say that those who seek profit ought to go into private business.

I now yield to the Senator from West Virginia, with the understanding that I yield for a question and with the further understanding that I shall not lose my rights to the floor for any period of time used in protecting my rights in case a question should not be asked.

Mr. KILGORE. Mr. President, I desire only to ask a question of the Senator from Oregon, whom I greatly love and admire.

I wonder if the Senator from Oregon has studied the trends of the times, and I ask him if he knows that in my State salaries have been raised from 100 percent, in some cases to 200 percent. I am speaking from actual statistics and personal experience when I say that. I am wondering if the Senator realizes that it is impossible to live properly in Washington on our present salaries, unless one owns his own home and has no rent to pay.

I may say to the distinguished Senator that I should love to go back to those dear old days when I first came to Washington, when I could go to the shops and the market place and buy food cheaply, and could also pay for house rental and other things as I did 14 years ago. I ask the distinguished Senator if he realizes

what has taken place in Washington during the past several years. When we removed price controls which existed during the war and immediately after the war, we also gave the profiteers a golden chance. Likewise we removed the surplus-profits tax. Was not the Senator from Oregon in the same status in which I was when the excess-profits tax was stricken from the statute books?

Mr. MORSE. I will say to the Senator that we have been in the same status for many years.

Mr. KILGORE. But we are faced with the results of that action. Price controls were removed and we were hit right on the nose by the situation which ensued.

I wonder if the Senator realizes that the Members of the Congress of the United States face the problem of not being able to live on their salaries unless those salaries are augmented.

Mr. MORSE. I understand the point of view expressed by my good friend from West Virginia, and I give him assurance that before I complete my remarks I will have answered his questions, because I had them all in mind before I began. But I have certain specific suggestions as to the points which he has raised.

I wish to go back to the fallacious argument by analogy, which we find on pages 37 and 38 of the Segal report, and to point out that I do not think it is sound reasoning to argue that because the presidents and general counsel of 46 American railroads earn an average of $30,590, the Members of the Senate should earn $22,500. I do not understand the cause-to-effect relationship in that kind of reasoning. The two classes are not comparable. It is the difference between compensation in private industry, and compensation for public service to the people of the United States, which, in my judgment, ought not to contain dollar signs of excessive profit.

Let me say something about the cost of living in Washington, D. C. I do not know how it developed in American life that a person coming to the Senate could not live up to the prestige and dignity of the position unless he paid $400, $450, or $500 a month rent for a swank apartment in a Washington, D. C., hotel. If he wants to do that, it is his business. But I think it happens to be the people's business when he tries to argue that because he pays that kind of rent, the people ought to pay him a higher salary.

There are many fine homes in the metropolitan area of Washington which are available at very low and reasonable rental, which Senators can rent, if they wish to rent them, or buy, if they wish to buy. I am simply old-fashioned enough to believe that Senators would be much nearer the spirit of the American people if they lived in that kind of domicile than in swank hotels; but that is their business, not mine.

I shall not vote on the floor of the Senate for a salary increase on the basis of the argument that living costs in Washington are high because Senators pay very high-priced rents in very swank hotels. They do not have to live there. If they want to live in such accommodations, let them do so at their personal expense, not at the people's expense. Thus I say that much of the argument based upon the so-called high cost of living in Washington, D. C., is of the making of Members of Congress.

There was a time when I leaned to the idea of a salary increase for Members of Congress. There was a time, before I gave thorough and adequate analysis to the problem, and listened to the pros and cons in greater detail, that I thought a persuasive case had been made for an increase in salary for Members. But I have changed my view in favor of a proposal I shall make before I finish, which has to do with the payment of the legitimate expenses of a Senator's office. In many instances a Senator has to go into his own pocket to pay for services rendered his constituents. I believe that expenses of this type should be borne by the Senate. They should not come out of the Senator's pocket.

I have completely changed my earlier point of view on this salary increase issue. I do not believe that any substantial increase in salary can be justified at the present time.

There are other high-cost items in the living expenses of colleagues in the Senate, which I think are matters of their own personal choice; they are not necessary to the job. If Members wish to come to Washington and live according to that standard of living, that is their business. I do not begrudge it. Each man to his own liking when it comes to his standard of living, within his pocketbook.

But I submit that on the basis of the salary we receive, omitting from consideration for the moment the item of the expenses of our offices over and above what the Government allows, United States Senators can come to Washington, D. C., and represent their constituencies with dignity and prestige on the salaries now paid them. Therefore, I wish to dismiss, so far as my argument is concerned, and very early in the discussion, the contention of the proponents of the bill that a salary increase is needed in order to meet increases in the cost of living. I say respectfully and goodnaturedly, but sincerely, that if this is the primary reason given for the salary increase, our constituencies have the right to ask us to lower some of our living expenses in Washington, rather than to be asked to give us a salary increase which will pay for higher living expenses.

I wish to make this additional comment in connection with the information on pages 37 and 38 of the Commission's report, which states that "the mean net income of all nonsalaried lawyers in 1951 was $8,730."

I should like to see the study from which that conclusion was drawn, because I am satisfied the records will show that between 75 and 80 percent of American lawyers do not gross $15,000 a year; and they are good lawyers. But if the argument by analogy is to be made on the basis of the income of American lawyers, let me say that, in my judgment, we are not entitled to an increase in salary. A good many lawyers in our home constituencies, who are grossing from $7,500 to $12,500 a year, are as able as any of us in Congress who are lawyers. The idea that in Congress is to be found the cream of the legal profession of the United States is a mistaken notion. There are good lawyers here. Some of us might get up to average; most of us are country lawyers. But on the basis of the alleged legal ability of the lawyers in Congress, it is mere puffing when the argument is made that they could earn more money in the private practice of the law. Most of them did not earn more before they became Members of Congress, and they will not when they return, except perhaps for a couple of years when there may be some friends who think that former Members can give them some special service because of their congressional connections. But I have followed the history of such persons. A good many of them have practiced a little in a kind of combined private practice and lobby practice, and then have ended up back in their home States, earning for the most part not more than they earned before they came to the Senate. Usually that was far short of $15,000 a year.

Of course, it is quite assuring, self-comforting, and pleasant, wishful thinking for one, in his imagination, to associate himself with the general counsel of railroads, as we see on page 38 of the report, and with the general counsel of great American corporations, and to seek to leave the impression that because those lawyers earn so much money as general counsel of large corporations, therefore a lowly Member of the Senate or the House, from the standpoint of legal stature, should be similarly paid. I do not accept that argument by analogy. I repeat, there are exceptions, but the speaker is not one, and would be the first to say he is not one.

By and large, the lawyers in Congress would do very well to gross $15,000 a year in private practice. If some of us were to be put on oath in regard to our gross income before we came to the Senate, we would have to testify that we never grossed $15,000.

From that fact, Mr. President, I argue that we ought to cut our budgets and cut down our costs of living to such a point that we can live within $15,000 a year, so far as our personal expenses are concerned, and put our children through school—and it can be done on that salary.

We should then face up to the real problem which I think confronts Congress, namely, the expenses of the office, over and above the budget allowance that is made available to us by the Government.

I wish to reiterate, because I desire that it be made a part of the RECORD, a contention made by the distinguished senior Senator from Connecticut [Mr. BUSH], which I thought was an exceedingly able argument, with which I wish to associate myself by reference, as well as many of the arguments made by the distinguished senior Senator from North Dakota [Mr. LANGER], earlier this

afternoon, and the arguments of other spokesmen in opposition to the bill.

Somehow, there is something wrong—wrong from the standpoint of doing the right thing toward others in our citizenry—for us to sit here considering this bill and proposing to vote ourselves a 50-percent salary increase, when we know, first, the budget problem which confronts our Government; second, the labor problems which confront our Government; and, third, the declining income of the farmers of America.

It has been pointed out that we are having trouble obtaining a 5-percent increase in salaries for postal workers. There is a general Government employee wage increase bill confronting us. It has not been determined what final action will be taken, but the consensus is that Government employees will be lucky if a bill gets through the Congress containing more than a 10-percent increase. There are even persons who think there should not be any increase. When there is talk in the cloakrooms of a compromise on a 5 to 7 percent increase for Federal employees, how do my colleagues think it is going to look, from the standpoint of plain fairness to our constituencies, for us to vote for a 50-percent increase in congressional salaries as provided in the Senate bill or a 66-percent increase as provided in the House bill, and then really have serious trouble getting a 5 percent increase for postal workers and a 5 to 7 percent increase for other Government employees?

Then there confronts the Senate the problem of a minimum wage bill. Some of our colleagues have offered a proposal for a minimum wage increase to $1.05 an hour, and there are reactionary forces in the country which are trying to convince the American people it is a socialistic proposal. I am presently inclined toward a minimum wage bill providing for $1.10. On the basis of the most recent evidence I have received, although I have not completed my analysis, I may suggest a bill proposing a minimum wage of $1.15. But look at the opposition in the Congress of the United States to a minimum wage bill which seeks an increase from 75 cents an hour to 90 cents, or to $1, or to $1.10, or to $1.15, or to $1.25, which are the various proposals in the legislative incubator at the present time. Vitriolic is some of the opposition. Highly excitable some persons become if one suggests an increase in the minimum wage. It is said we would destroy industry, or socialize it.

Then if there is suggested an increase in minimum wage coverage, that is said to be the last straw. We are told we must not do anything which would bring under a decent minimum wage law the clerks in the retail establishments of America. Yet we know, as we study the effect of wage cycles, Mr. President, that when the minimum wage is increased, the tendency is to increase the wage structure all along the line, including the wages of employees not covered by Federal interstate commerce acts. I shall be heard to speak on that subject at some length at a later time, Mr. President, but we ought to enact Federal legislation which would take full cognizance of the fact that setting good Federal standards would increase minimum standards in the States, and that a good many States would in turn enact State minimum wage laws. Of course, in many instances such State minimum wage laws would not be essential, because employers, in order to compete in the labor market, would automatically increase minimum wages to thousands of employees who are not now covered by the Federal law, and who could not be covered by Federal law because they do not fall within the interstate commerce jurisdiction of the Federal Government.

Mr. President, my argument on that point is that I do not think we would look good. I do not think our legislative posture would be very becoming in the eyes of the voters of America, if we voted ourselves a 50-percent increase in our own wages, and then fussed and fumed about legislation which proposes an increase in the minimum wage.

Last week I traveled to my home in Oregon. On the way there, between Tangent, Oreg., and Eugene, Oreg., our automobile ran out of gas. We finally succeeded in having a gas truck supply the car with a little gas, which was sufficient until we got to a small gas station. The station was one of those little family gas stations which husband and wife operate in conjunction with a small grocery store or a few tourist cabins. The proprietor, a man in his sixties, said, "Well, Senator, I see that you are about to vote yourselves a nice, big, fat salary increase." I said, "That is very doubtful." "Well, he said, "the bill just passed the House." I said, "Yes, but it has not passed the Senate yet. It may be that it will, but not with my vote." I gave him some of my reasons why I shall vote against the increase, as I am giving them to the Senate this afternoon. That gentleman said, "I want you to know that in this community the people I have talked to, and many come through here during the course of a day, are very bitter about this proposal." He said, "I don't want to hurt your feelings, but we think the Congress as a whole just does not deserve higher pay." I was inclined to agree with him, and I do agree with him, Mr. President.

If we do not want to represent the will of the American people, we should not be here, and if my colleagues would like to find out what the will of the American people is on this question, let us give the people 90 days of all the special education it is desired to give them. Let us postpone action on the bill for 90 days, with the understanding that we will call upon the media of information in this country to inform the American people about all the alleged supporting arguments contained in the report on congressional salaries—I shall have something to say about judicial salaries in a moment—and then let the people express their will on the question. What a walloping we would take. What a turndown we would have in a national referendum on the proposal, Mr. President.

If my colleagues think that all these editorials which have been bound together, which I hold in my hand, will succeed in changing the viewpoint of the rank and file of the voters of this country, then my colleagues are laboring under the misapprehension that the American people pay much attention to the editorial writers when it comes to political policies. Most people know that too many editorial writers in this country are the fronts of reactionary indoctrination forces in America. The American people are doing their own thinking on political issues, and the editorial writers are not doing it for them. When one tries to tell the American people that a United States Senator is entitled to an increase from $15,000 to a $22,500, or, as the House thought, to $25,000, he will find most of the people laugh and snort at him.

Mr. President, I believe that if I voted for the increase, I would not be voting in accordance with the desires of the people of my State. I am perfectly willing to enter into an understanding that the Senate postpone action on the proposal for 90 days, and wait for the reaction of the people of our States after they have been informed of the facts. When it comes to a question of studying the merits and demerits of the report on the bill, I think an overwhelming majority of the people will continue to hold to what I honestly believe is their present opinion, namely, that they are against the proposal. I think that most of them would be inclined to agree with the views I have expressed here today, that Members of Congress could very well do a little personal financial pruning of their own, and when they can demonstrate that they are living within the brackets of reasonable expenditures in Washington, D. C., and that they need more money in order to meet living costs of the job, the people will be fair about it. But to date a convincing record of that need has not been made either in the Commission's report or, in my judgment—and I speak respectfully—in the debate.

So, Mr. President, because I think the proposed salary increase would be entirely out of line with increases which are even suggested for other economic groups in the Nation, I shall vote against the bill.

I have already had something to say about the salaries of lawyers and the salaries of the heads of corporate organizations, including farm organizations. My statement has been to the effect that I do not think they constitute sound arguments by analogy, applicable to the pending bill.

Now let me say a word about the salaries of doctors. Even the Commission's report points out that the average income of doctors in 1951 was $13,432. The Commission pointed out that when doctors attain the age 40 or later, their income increases to $20,000 or $25,000, on an average; and that after doctors reach 50 years of age, their income is even higher.

Mr. President, are we really taking the position that, because members of the medical profession on the average receive an income close to ours as politicians, and that after years of service in the medical profession they receive larger incomes, therefore our salaries should be greater? I have talked to a

good many doctors about this matter and other matters. When we listen to them speak of their problems of professional expense, over and above their living costs and the cost of educating their children; and when we think of their costs for equipment and laboratories and their costs for technicians and assistants, we know that we are dealing with a substantial private-entrepreneur problem in the American private-enterprise system. When we think of the economic, private-enterprise worries which go along with a typical practitioner of medicine—even though many of us get the idea that all the average doctor does is cut economic clover all the time; but that is not what he does, Mr. President—I wish to say that I believe we are very presumptuous to compare our economic problems with those of the average doctor. For that matter, I believe we are rather presumptuous when we compare ours with those of most of the professions.

But what I wish to stress, above all else, is that we chose to enter public service. In choosing to do that—as the Senator from Connecticut [Mr. BUSH] said earlier in the afternoon—we did it with our eyes open; and we should not have done it if what we expected to make out of it was a financial profit.

Now I come to a discussion—I shall discuss them first, and shall submit them later—of a series of amendments which I propose to submit before this debate is over. These amendments deal with the problem of the legitimate, public-service expenses of operating a Senator's office.

We know what happens; we know that many Members of the Senate cannot meet the expenses of their offices with the budget which is allowed them by the Federal Government. There are various reasons for that situation. Among them are the individual differences between Senators as to the kind of service they undertake to render their constituents. But whatever may be the reasons for the differences among us in respect to the type of service we render our constituents, the fact of the matter is that in a great many instances Senators spend considerable sums of money in addition to the amount provided them by the Federal Government for the operation of their offices. In fact, I must say, although there probably are some Senators who are not in this category—I have not talked to all Members of the Senate—that among all my colleagues with whom I have talked about this matter, I have yet to find one Senator who does not say that during each year he reaches into his own pocket and pays out of his own income certain expenses of his office which are not covered by the budget allowed him by the Federal Government. I think that is wrong. I do not believe our constituents expect that of us. In my opinion, our constituents are perfectly willing to have us vote for ourselves the necessary allowances required if we are to render good service to our constituents. I think the matter should be an open book, and that those expenses should be audited, and should be a public record, and should be subject to the inspection of both our constituents and the press. In fact, Mr. President, some of my amendments deal with the problem of public disclosure.

However, at this time I wish to dwell a little longer on the question of the type of services we render our constituents and the type of services they have a right to expect us to render at a cost over and above the expense allowances which attach to our office.

For example, let us consider the matter of clerical help. Each year, a great many Members of the Senate pay out of their own pockets, for clerical help, a considerable sum of money, over and above the amount allowed them for that purpose by the Federal Government. In that connection, some Senators average, each year, an amount equal to the salary of 1 clerk or 1 stenographer. Some of us pay, each year, an amount equal to the salary of several clerks and stenographers; and I have been told that one Member of the Senate hires as many—although the figure varies from time to time—as from 5 to 7 extra secretaries and clerks, in order to do the job of representing his State, as a Member of the Senate of the United States. He happens to be a very wealthy man, and he can afford to do it and to pay that amount out of his own pocket.

However, I do not think it is wise to have such a state of affairs exist; I do not believe it is in the interest of good government to operate the Senate of the United States on so small a budget for senatorial offices that a Member of the Senate feels required to hire as many as 5 or 7 extra clerks or stenographers or secretaries in order to be able to serve his State in the way he considers to be proper.

Mr. President, I am not taking the position that the matter should be left entirely to the discretion of individual Senators, for that would lead to abuses, and would endanger the system, and would lead to the possibility of the development of corruption in connection with senatorial expenses. There simply is no substitute for public disclosure; there simply is no substitute for auditing. However, Mr. President, the premise on the basis of which I argue on this point is that the people of the country are entitled to receive from their Senator such service as they need, in order to have the public business properly conducted; and they should expect to pay—and I am satisfied they are willing to do so—a sufficient amount to cover the cost of that service. I believe we should provide the people with the facts and information showing that more money is needed, by way of expenses, in order to provide that service. Let us require a public accounting each year, so that Senators will not have to say, as they now say—and with justification, Mr. President—"I have to dig into my own pocket, and pay for from 1, 2, 3, or even as many as 7"—7 is the highest figure I have heard—"extra clerks and secretaries a year, in order to run my office in the service of the people of my State."

Mr. President, I am perfectly willing to vote to grant to the Senate Committee on Rules and Administration jurisdiction to pass judgment, in advance of such expenditures, on the question of whether a Senator can show cause for employing, as assistants in his office, more than the number he is allowed under the present budget.

So, Mr. President, I shall submit an amendment—although at this time I shall state only its essence—proposing a 10-percent increase in the budget item for senatorial office salaries, but without change in the present statutory limits as to the amount of salary per person. The amendment provides for a 10-percent increase in the office budget as the minimum which should be allowed by way of an increase for senatorial office expense. That additional allowance would not go into the pockets of the individual Senator; but would be of assistance, as it should be, to Senators who at present are paying out of their own pockets for extra secretarial help, not for political purposes, but for the purpose of conducting the affairs of their office in behalf of the people of their States.

When we come to the amendment itself—and I shall make a further argument on it at that time—it will be seen that I have protected the public interest by an accountability provision. However, I shall accept any other phraseology or any addition to the amendment, if any Senator believes that greater protection on this point needs to be given to the people.

In addition, there are extra expenses in the offices of many Senators with regard to telephone and telegraph services. I believe it is wise as a rule of thumb to have a limit placed on them, either as to the minutes of long-distance calls per month, or as to the number of calls. I have a similar thought with respect to the number of telegrams and the total cost of the telegrams and the content of the telegrams.

I quite agree with the statement made by the Senator from Arizona [Mr. HAYDEN], during the last session of Congress, to the effect that some practices were developing in the Senate in connection with telegraph usage which involved public waste. As I recall, at the time a proposal was made by the Committee on Rules and Administration, of which the Senator from Arizona was a member, that some limitation be placed on the nature of the contents of telegrams. I have no quarrel with that at all.

Let us take up now a few specific problems which result in many of us paying out of our own pockets money for telegrams and long-distance telephone calls which are justifiable expenditures in transacting public business. I am 3,000 miles away from my constituents. The Senator from Arizona is a good many miles away from his constituents. Let us suppose that a constituent is having passport trouble. He calls his Senator. He calls him collect. Of course, a Senator does not have to accept such a call. However, who among us would not accept it?

The State Department is giving a constituent trouble, and he believes it can be very easily cleared up with the presentation of certain facts, if they are properly called to the attention of the State Department. He feels that is the kind of services he pays taxes for, and he calls his Representative or Senator in an

effort to try to get the hardship alleviated. The Senator goes to the State Department and finds that there is an important fact which the constituent did not tell him. What is the Senator going to do? Will he send a letter by frank to his constituent, or will he send the letter by air mail, or will he use the telephone to call his constituent?

Some constituents talk even longer than Senators, believe it or not, and some of those long distance calls are not very easy to terminate, because the constituent is rather excited. That costs money.

A good many of us in giving that kind of service—and we ought to give that kind of service—dig down into our pockets a good many times each year and pay for such telephone calls, or for sending telegrams in such cases. That is money spent by us over and above what the Government allows us. When the American people come to understand that kind of problem, I believe they will not object to an increase in our allowance for telephone calls and for telegraph services, provided such allowance is subject to inspection, so that it can be made certain that the calls are official calls, made in the transaction of official Senate business.

Let me now refer to the parsimonious policy we have followed with regard to the stamp allowance. A constituent who lives 3,000 miles from Washington cannot understand why he should hear from his Senator by franked mail on a matter of great concern to him, involving his relations with the Federal Government. I am not talking about letters we receive when pressure drives are put on. At such times we receive hundreds of letters from constituents with respect to how constituents think we should vote, or asking questions as to why we voted as we did on some issue.

Of course, we handle many of our replies by franked mail, and many of us even find it necessary to handle some of our correspondence by mimeographed letters, because frequently the correspondence is so voluminous. I am talking about a legitimate problem in connection with which a constituent asks for services. If he lives a great distance away, or even if he lives anywhere where air mail can reach him more quickly than a franked envelope can reach him, I believe it is to be expected that we should air-mail a letter to him. Many of us find it necessary time and time again to supplement our stamp allowance out of our own pockets. We do not have to worry about constituents not being perfectly willing to supply us with a stamp allowance sufficient to take care of our official business by air mail where in our wise discretion—and we always hope it is wise—we decide that an air mail stamp is necessary on the envelope.

This is why I am offering an amendment—and I believe it is the minimum, and I believe it will solve the problem for most of us—of a 10-percent increase not only in the telegraph and telephone allowance but in the stamp allowance as well.

As to stationery, I believe that matter is adequately handled at the present time. However, we know what we do. We get our stationery from our committee. We do not get much of it from our stationery allowance. We also know, because we get our stationery from our committee, that in some instances we have a refund on the stationery allowance. There have been times when I had a surplus and it was refunded to me. As we all know, we report it as income on our income-tax return.

I believe that hole should be plugged. I think it should be stopped. I believe a transfer of funds should be permitted. It should be kept a matter of public record, but if a Senator does not use all the money in the stationery fund, because he is able to get his stationery from a committee, he ought to be allowed to transfer the amount to his stamp allowance or to his telegraph and telephone allowance, provided he can show that he has spent the money for senatorial and not for political purposes.

I do not believe that the refunds which Senators sometimes receive on their stationery allowance are proper refunds. I believe that practice ought to be stopped. I believe the excess ought to be transferred and used in other ways, because we know in advance that we may not use all of it, and therefore we ought to be able to use it for other expenses in our offices, expenses of a senatorial nature, instead of being allowed to take it as a personal refund.

Therefore I have a proposal for a 10-percent increase in the so-called supply feature of Senator's offices with the understanding that it will not cover stationery.

We have another expense, too. It is a delicate issue. These are nip and tuck pros and cons to this expense item, about which I have talked before on the floor of the Senate in years gone by, when I discussed the salary problem. I refer to the matter of receiving a tax credit for the extra living expenses in Washington for maintaining two homes.

I hope Senators will not take offense at a personal illustration, but I cannot prove the point better than by a personal illustration. Some years ago when Miss Strauss was the president of the League of Women Voters and we were talking about legislative programs for the League of Women Voters, I said, "Miss Strauss, why don't you get 3 or 5 Senators and 3 or 5 Representatives to volunteer to be legislative guinea pigs for 1 year, and have them agree to submit to you, or to a committee to be appointed by the League of Women Voters, all their financial problems, public, and personal, such as the cost of the baby's shoes, the cost of educating a daughter or son in college, the cost of living in Washington, and the cost of the senatorial office, and then prepare a treatise which will really present the facts to the American people with respect to what it costs to serve them in the Congress of the United States?"

In my judgment, such a study would have had some value. I speak most respectfully when I say I do not believe the report of the Segal Commission, so far as congressional salaries are concerned, has much value. I say that because it does not give to the American people a breakdown in the expenditure problems which confront Senators and Representatives serving them in the Congress of the United States. Until the American people see it all broken down, item by item, we are going to encounter a great deal of opposition even to an expenditure increase.

Does the Senate think for a moment that I am not aware of the fact that I am going to be criticized by some for proposing an expense increase for conducting senatorial business? If anyone thinks for a moment that my opposition—and there are those, of course, who are always certain to attribute some ulterior motive—is only political opposition, they are dead wrong, because I am offering some amendments with respect to increasing the allowance for expenses in our offices to which many voters will object, just as much as they object to salary increases, because they do not understand the facts in regard to what is involved in such items as I have discussed thus far in my speech.

Certainly, they are not going to understand unless we can get the facts to them, together with the breakdown information with respect to the item I now mention. That is why I say I am willing to make myself a legislative guinea pig in the matter of the cost of maintaining two homes.

As a result of a great deal of thrift over the years and a great deal of hard work, my wife and I succeeded in building a home on a small acreage. It was then, we thought, far out in the country, at Eugene, Oreg. Now our eastern boundary is the city limits. It is a little more than 29 acres, with a rather large house which was built in the depths of the depression at a very economical price. We are renting it furnished for $125 a month. If I had the same house in Washington, on the same lot, I would have no trouble in renting it for $400 a month.

Of course, good family economy called upon me to sell that house when I was first elected to the Senate. But I am not completely stupid politically. There is not a Senator present—and I see smiles on the faces of some—who does not agree with me. I cannot think of a better act of political suicide than to sell a domicile at home and come to Washington and take up a domicile here, and hear the comment, "He does not have a grassroot left in his State."

So we did not sell our home. I am not so sure there is not a little political cowardice involved. I am not particularly proud that I engaged in that kind of economic waste. It is an economic waste, because I took a loss and have taken it ever since I have been in the Senate; I have taken a loss every month on that piece of property. Good economy really would justify my selling it. There was a time when I could have sold it at a pretty good price. Now, with the passage of years, and my not being there to take care of it, it deteriorates in spite of the fact that we have had very careful and cooperative tenants.

Mr. President, that is one of the inescapable costs of service in the Congress. Again, I do not think that if the people of the country understood all of the facts, they would want us to suffer such financial loss. That is why I am

perfectly willing to offer the amendment which I am going to offer in regard to a deduction of the difference between the living costs at home and the living costs in Washington. Such an allowance is common in business. Some Senators live at the Mayflower, the Sheraton, and the Shoreham—and they are very lovely living quarters in Washington—but a good many corporations also keep year-around apartments in those same palatial establishments, and such corporations deduct their cost as business expenses.

There was a time, in the early days of my service in the Senate, before the officials of these corporations were fully apprised as to my political philosophy and policies, when they made very clear to me that if I should be confronted with a situation in which there was a constituent in town, and homeless for the night, I could give them a ring and they would find a place for him in one of those year-around apartments. Let me say that they never received such a call from me. After a little while, when I started writing my record in the Senate, I did not get any more such suggestions.

What I want to point out, however, Mr. President, is that for members of business that kind of a living cost in Washington, D. C., is carried as a tax deduction. Under many circumstances it is a legitimate business expense. I do not quarrel with that. I do not know all the facts about it, I am frank to say, and I think the Senator from Delaware [Mr. WILLIAMS] would be a much better witness on this subject that I am; but I have my suspicions, on the basis of some information which has been given to me from time to time, that some of those tax allowances to business are exorbitant and unnecessary, just as are some advertising allowances. It is in connection with a tax bill, and this is not the time, that we should discuss proposals for amendments to the tax law that would at least squeeze a little bit of the water from the expense accounts of some American corporations and businesses which have tended to make a bit of a racket of extra living costs in Washington, D. C., when they engage year-around apartments in palatial hotels.

And here, again, Mr. President, we are dealing with a problem of degree. There is a bracket of legitimacy in the subject matter, and I think it is legitimate when it can be shown that the expenditure is a necessary business expense for American business to be allowed this kind of a deduction. It is also proper for us in the pending bill to adopt an amendment which would permit Members of the Congress to deduct for the so-called double living standard. I hope that phrase will not be misinterpreted. I mean a double living standard because we have to maintain a home in our own hometown and also a home in Washington, D. C. We should be allowed to deduct a reasonable amount for that extra expense in Washington.

It should be an amount that requires proof. Therefore, my amendment proposes a figure of $5,000. In many instances Senators who are living in very modest establishments, as many of us do, find that the extra expenses of living in Washington and the maintenance of a home in the home State amount to much more than $5,000. Where we can show it, where it will meet the requirements of an audit, where proof is established, I think it is only fair and just that it be allowed.

When the people get the facts about that, when they understand the equities and the fairness of it, I do not think they are going to quarrel about such an allowance. I think they will approve of it with enthusiasm.

So I have that amendment, Mr. President, which I shall discuss later at some length, during the night, if necessary, because I think it is important to have a thorough discussion of the subject matter. The Senate ought to have time to consider it and the country should have at least until Wednesday to hear about it. With Washington's Birthday tomorrow, I take it for granted that the leadership would not want to vote on the question tomorrow if we do not vote on it tonight. In fact, I shall pause long enough, with the understanding that I shall not lose my right to the floor, to ask the distinguished Senator from Kentucky [Mr. CLEMENTS] if he has any plans he can announce as to the disposal of this bill; whether at this hour we can have a unanimous-consent agreement to vote on Wednesday and adjourn tonight at a reasonable hour. I assure the Senator that I have canceled my New York engagement, so I am speaking from no selfish motive.

Mr. CLEMENTS. The acting majority leader is in a better position now to state what the program will be for tomorrow.

Mr. MORSE. And for tonight, too, I hope.

Mr. CLEMENTS. Tomorrow there will be no legislative business. There will be the usual morning hour following the reading of Washington's Farewell Address.

Mr. MORSE. Does the Senator contemplate having the Senate remain in session an indefinite period tonight, with the intention of voting on the bill before we adjourn?

Mr. CLEMENTS. I know of no decision that has been reached at this time. It would be a little easier to make a determination after ascertaining the extent of the speaking of the Senator from Oregon.

Mr. MORSE. That is what I am trying to help the Senator with now. That is why I have asked for protection of my right to the floor. I desired to see if we could have this discussion.

I wish to be very honest and frank with the Senator. I do not think it would be in the public interest to vote on the bill tonight. I shall do the best I can to encourage the Senate to vote on Wednesday. Therefore, I think we would probably avoid much unnecessary muscle tension, and would keep ourselves in a jovial, cooperative mood if we could reach some gentleman's understanding now to vote as of a definite hour on Wednesday.

I doubt very much that the Senate would wish to stay in session long into the night, because I have many amendments to offer, and in fairness to the amendments I shall take considerable time to discuss each of them.

Mr. CLEMENTS. Am I correct in my understanding that about the same length of time would be required on Wednesday as on Monday?

Mr. MORSE. No. The Senator is quite wrong about that. Senators can disagree with me, but that is all right. They can disagree with my purpose and my feeling about the matter. I simply do not think it to be in the best interests of the Senate or the country to vote on the bill on the first day it comes before the Senate, and even before some amendments have been printed and are on the table.

I speak most respectfully when I say that I do not believe there is any urgency in the matter. We do not have a calendar which is jammed. We do not face such a situation that it would be against the public interest if we entered into an agreement to vote on Wednesday.

Mr. CLEMENTS. The Senator from Kentucky would not for one moment question the motive or purpose of the Senator from Oregon in connection with the bill or any amendment he wishes to offer in connection therewith.

The acting majority leader certainly is in no position at this time to make a unanimous-consent request, in view of the fact that a number of other Senators desire to offer amendments, and it would take some time for me to get in touch with all of them. I shall do that as the time passes.

Mr. MORSE. It is likewise my understanding that a number of Members still wish to discuss the matter. It is also my understanding—and the Senator can correct me if I am wrong—that there is a rather large number of absentees tonight; and although a quorum could be obtained at any time an attempt was made to get a quorum, there would not be a large number over a quorum. I happen to believe that if that is a fact—and I have been advised that it is—then we ought to let the bill go over until Wednesday, although there is always the possibility that on Wednesday there may not be any more Senators present than are present now. But, at least, they will have had due notice by Wednesday that a vote will be taken.

I have been told, I think accurately, that some Senators are away who were not aware, when they went away, that there would be a vote on this bill today.

Mr. CLEMENTS. I wish to keep the record straight.

Mr. MORSE. I want it to be straight.

Mr. CLEMENTS. All Members have had notice since Friday that the bill would be taken up today. I also wish to advise the Senator from Oregon that it is my understanding that about the same number of Senators will be present on Wednesday as reported for duty today.

Mr. MORSE. But it is true, is it not, that many of those who are away, although they were advised that the bill would be taken up today, were not of the impression that it would be voted on today. At least, those who expected to be absent on Wednesday will have time between now and Wednesday in which to

change their plans, just as I have changed my plans for tonight.

Mr. CLEMENTS. I believe all Members of the Senate were notified as much as 10 or 12 days ago that the first controversial business to be considered after Lincoln week would be taken up today.

Mr. MORSE. But being so advised, and this being such a highly controversial matter, I wonder if they were not almost entitled to take judicial notice of the fact that the bill would not be disposed of on the first day.

Mr. CLEMENTS. The acting majority leader has had no complaint from Members on this side of the aisle up until now.

Mr. MORSE. I am very glad to have the Senator's viewpoint. He is having the experience of a complaint for the first time from this side of the aisle. It probably will not be the last complaint, either. [Laughter.] I never deal my cards under the table; they are always face up.

I wish to say that I always love my association with the distinguished Senator from Kentucky. If this is to be the insistence of the acting majority leader for the rest of the evening, let us proceed, and may a good time be had by all, because I have much to say on this subject matter.

Mr. President, my amendment in regard to the deduction for tax purposes would be, as I have said, at a figure of $5,000. I desire to tell the Senate how I came to determine that figure. I talked to a good many of my colleagues in regard to their expenses, including the so-called double-home expense, a Senator's expense of maintaining a home in his own State and of maintaining a home in Washington. I satisfied myself that the figure of $5,000 was a reasonable and equitable one.

I then talked to professional staff members, who are familiar with the problem, and without taking any sides on the merits of the issue, but only giving me information as to the figure itself, they said they believed a figure of $5,000 was equitable.

Then I talked to a firm of certified public accountants in the District of Columbia, who are familiar with the tax problems of Members of Congress. I was told that in the handling of tax accounts of Members of Congress, the present figure of $3,000 is entirely too low. Some of the members of the firm even thought that a figure higher than $5,000 would be justified.

Then I talked to the certified public accountant who handles my own tax affairs. All I wish to quote him as saying is that he thought it certainly was a fair figure, but he was not passing judgment at all upon the legislative merits or demerits of the general proposal.

I think this amendment would take care of the equities in the whole matter of expense adjustment, and would leave a salary at what I think is a reasonable figure for service in Congress, namely, $15,000 a year.

While I am on that point, let me reply briefly to an argument I heard this afternoon about increases in the cost of living. I have had a great deal to do in my professional life with the studying of wage standards. I shall review very briefly some of the criteria which are taken into consideration in the fixing of wage standards.

The fundamental criterion is that American wage earners are entitled to a wage of health and decency. It is a very general principle; it is a very general measuring rod; but it is a measuring rod which has taken on the meaning of art in the trade. By that I mean in the whole field of industrial relations. The measuring rod or standard of health and decency has come to have very definite limits of meaning. Included within its meaning is the conception that an American is a free man, working under an economic system that protects his economic and political freedom of choice; that he is entitled, in a wage negotiation, to receive a wage award that will permit him to enjoy a wage of health and decency. What is that standard? In each individual case it is determined by the record made before the wage board, the mediator, or the arbitrator. In broad outline, it can be described as a wage that permits him to earn an income sufficient to feed, clothe, and house his family on what is recognized in the community as a level of decency. It is somewhat like the rule of reasonableness in the law courts. No lawyer can define with measuring-rod exactness what the rule of reasonableness is. And yet every lawyer knows that judges use it constantly. They take the whole case from its four corners, study the record, look at the testimony and the evidence, and then they are heard to say, "In applying the rule of judicial reasonableness, the court finds."

That is the way basic wages are determined in a wage case, Mr. President, The arbitrator, or whoever has the solemn responsibility of adjudicating the wage dispute, says, "I am bound to fix a wage that will at least meet the minimum standards of health and decency, so that a worker can clothe, house, and feed himself and an average family." Usually in wage cases the average family is the hypothetical family of four. The arbitrator must say to himself that such a worker must be able to clothe his family, house it, and feed it at the level of decency. Under our system of economic freedom, American wage earners are entitled to that level.

There is always brought into a wage case the old argument whether or not, on the basis of the alleged inability to pay, the arbitrator should hand down a decision which would not permit a wage of health and decency. That was a great contest in the early wage negotiations in America. It is my recollection—I should like to go to the books to check it, but I think my recollection is correct—that there were two great Americans who played an important part in wage negotiations in this country, William Howard Taft and the great Justice Brandeis. These men were among the very first to reject the ability-to-pay arguments on the part of employers, insofar as they concerned a request that the arbitrator or wage board hand down a decision calling for a wage lower than one which would permit a standard of health and decency.

Mr. President, one can well judge that at that time the doctrine was considered a very radical one. But it came to be accepted, and was refined in the years following the great decision of Taft in the War Labor Board report of 1917 or 1918, in which he supported the theory of requiring a wage of health and decency, and rejected the idea that a wage lower than that could be arrived at by a wage board on the basis of an employer's argument of inability to pay.

In some of the refinements which followed the application of the Taft and Brandeis principle on that point, it was pointed out in later decisions that if an employer could not pay a wage of health and decency, it was a negotiable matter between the employer and the workers. The fixing of the wage was a matter of mediation between the employers and the workers, but no representative of the Government, no judicial officer, no officer appointed by the parties to function in a private judicial capacity for them, had any moral right to order that the employees should accept a wage less than one of health and decency.

Of course, that milestone in the development of American wage policy was resisted, and in some reactionary quarters was declaimed as radical, socialistic, and anarchistic. It has come now to be accepted as one of the elementary principles of wage negotiation. Let me emphasize that it is a principle on which the whole theory of minimum wages is based.

Let us consider early minimum wage legislation. I have not done so recently, but I have many times since I have been a Member of the Senate. I read the RECORD, not with amusement, but with some pleasant regard for the almost amusing position in which the reactionaries in the Congress put themselves when minimum wage proposals were first advanced in this great parliamentary body. How I wish that many of them might come back and read the remarks they then made, in view of the great strides for human betterment which have been taken in this country as the result of decent wage standards, which have been developed and have evolved since Taft and Brandeis laid down the very sound economic and social principle that ability to pay should not be considered in the matter of fixing a minimum wage necessary to maintain health and decency. Yet there have been thousands of persons who have simply hated to give up the idea that someway, somehow, the jungle law of supply and demand should be allowed to go on unfettered, unchecked, and uninterfered with by Government even though it would affect the services of human beings who depend upon wages for their very existence.

Had such a philosophy prevailed, in my judgment American labor today would not have the economic freedom of choice which it possesses. Incidentally, business, operating under our system of enlightened capitalism, would not today be enjoying the fruits of a private enterprise system. There would be economic chaos, because business is completely and entirely dependent upon the purchasing power of the mass of the workers.

Great strides have been made since the position taken by William Howard Taft and Justice Brandeis on that point back in the days of World War I. However, I can recall that as recently as 1939, while serving on wage and hour panels, I listened to employer contentions that a 25-cent minimum wage in some industries was all that the Board should have allowed, because the industry did not have the ability to pay more.

Surprising, Mr. President, the readiness with which representatives of industry in those days could make a heart-rending argument about what was going to happen to a business if a minimum wage of 40 cents an hour was allowed under the law, which, of course, is exactly what was done in a great many cases. But proposals for maintaining 25-cent minimum wages occurred as recently as 1939. I remember in 1942, when the laundry case was before the War Labor Board and, believe it or not, Mr. President—it is a public record, and one can read for himself—the argument was made that we should not interrupt or unsettle a 19-cent minimum wage that prevailed in some laundries in 1942. The basis of the argument was that to do so would only cause the housewives of those sections of the country to do their laundry in the cellar. In that decision—which had the unanimous vote of all the members of the board, including both the employer members and the labor members—I was so impolitic as to suggest that the cellar was where the housewives of the Nation should do their laundry, if not doing it there would mean that the laundry workers of the Nation would subsidize the housewives on the basis of a 19-cents-an-hour wage. We substantially increased the wage; and I did not hear that a single laundry went out of business as a result of that wage increase. I do not know it to be a fact, but I simply have a hunch that a good many of the housewives who wrote to me anything but complimentary letters, because of the remark I made about the housewives, kept right on sending their laundry to the laundries. But under that decision the laundry workers got a wage of health and decency. If my colleagues will read that decision, they will find that it revolved entirely around the basic principle of a wage of health and decency, which is the first of the criteria I wish to mention in connection with the fixing of wages.

I now move to the second one, namely, a criterion which deals with fixing a wage over and above one of health and decency. If all the American workers had to look forward to was merely a wage of health and decency, their existence would be a rather dreary one. Moreover, Mr. President, in that event the American economy would be depressed. That is why it is so important for the American employer to understand that it is to his economic interest to pay a wage substantially above one of health and decency.

A wage of health and decency is more than an existence wage, but it is certainly less than a wage which permits the average American family of four to enjoy what we call a good standard of living. Again, that is a flexible criterion. I cannot submit an economic wage ruler, and thus measure this wage in dollars and cents per month or per week or per day or per hour. But here, again, after we have studied all the evidence and all the testimony in the record of a wage case, and when we have the job of making a judicial determination, by applying the rule of judicial reasonableness to the problem before us, we do not have much difficulty in reaching a conclusion as to what wage figure would result in allowing a reasonable wage above one of health and decency, one within the boundary of the ability of the employer to pay, and one which would help promote a good standard of living for the workers involved in the case.

At this point I wish to stress that the only place in the entire wage matter where the ability of the employer to pay is not in any way controlling is in a case involving the criterion of a wage of health and decency. In such a case the ability of the employer to pay is not a controlling factor. That is why it has been pointed out by some of the distinguished wage students I have mentioned—I shall not quote them now from recollection, because I desire to be accurate; therefore, I shall only summarize their position by referring to such great students of this issue as William Howard Taft and Associate Justice Brandeis, of the United States Supreme Court, and the many who followed them, and who accepted the premise I am now discussing—that if the employer cannot pay a wage of health and decency, it is better for the national economy that he go out of business, unless the workers in his plant privately and voluntarily negotiate with him a wage less than one of health and decency; but the Government has no right and an arbitrator has no right and a wage board has no right to say to the worker under such facts, "We will require you to subsidize your employer by accepting wages which result in your living under a standard of living less than one of health and decency."

But, Mr. President, when we reach the second criterion I have mentioned, and when we have to consider a request of the employees that they be granted in such a wage case a standard of living above one of health and decency, the ability of the employer to pay does become an important factor. At that point, the arbitrator or the wage board has to give careful consideration to the ability of the employer to pay.

In such a case what does the arbitrator or the wage board take into account? Let us not forget that I am taking about a situation involving—in the average wage case, if it is one of substance, and if it involves any considerable number of employees—volumes of testimony and exhibits dealing with such factors as comparable wages for similar work in the same area and the labor market, the availability of employees, and competing influences beyond the labor market which are urging upon the community a pirating of the labor supply from a wage market outside the area—in short, a host of such factors. Such a case deals, of course, with the matter of the profits of industry. When we reach that one, Mr. President, we have a "hot one," because in a good many cases the employer is perfectly willing to say, "I cannot pay more." However, when we say, "Let us see your books," we are told that to do so would be a violation of his right of economic privacy.

Mr. President, on that point it has taken time to evolve a change of attitude in American industry. Again I refer to William Howard Taft and Justice Brandeis, who were great leaders in this field. They laid down, in American arbitration law, the very sound principle that when an employer seeks to rest upon the argument of a lack of ability to pay, the wage board or the arbitrator has a right to see his books or to see proof, not merely selected proof, not whatever proof the employed may wish to advance, but all the proof, including the right of the arbitrator or the wage board or the judicial officer to call for all the books, and, if they are not produced, to dismiss the argument that the employer cannot afford to pay; and in the absence of a showing to the contrary, to assume that he can afford to pay.

Although I have a great deal of time at my disposal, I do not wish to take much of it to go into great detail concerning the many conflicts which have developed in connection with evolving a new and accepted point of view in regard to American employers, namely, that if they are to argue that they do not have the ability to pay, then they owe it to the judicial officer who is determining the dispute to give him sufficient evidence of their inability to pay.

On this point we are dealing with a touchy problem of economic privacy, because we must think of the businessman's competitors. I believe we are dealing with a matter of economic privacy when an employer says, "Mr. Arbitrator, I am willing to have you see it, and I am willing, under an arrangement or pledge by counsel for the union or the president of the union of secrecy with regard to the matter, to have the matter considered in executive session, because it is not in the interest of the workers to have all my business secrets from the standpoint of what the books will show made available to my competitors, and it will not help the union to have the matter made public knowledge."

I have always taken the position that under those circumstances I would order an inspection of the books, but not at a public hearing. We would look at the books with only the smallest number of parties present, and only those parties present who would assure the arbitrator getting the full value of the views of the representatives of the labor group from the standpoint of rebutting the contention of the employer in regard to what his books showed.

Under those circumstances, after we have studied the books and the evidence of the ability or inability of the employer to pay a wage over and above a wage of health and decency, we have the problem of evaluating the evidence.

There, again, we have the record from its four corners, and we decide what is a reasonable and fair wage over and above

a wage of health and decency. If our finding shows that the employer has the ability to pay a wage over and above a wage of health and decency, that is not the end. It is not the same as finding that there is a surplus. There are many other criteria to consider. The stockholders must be considered. There are other parties to the wage case, although some labor unions seem to forget it. In many cases which I have considered labor unions seemed to operate on the basis that there were not even 2 parties or 3 parties to the dispute, but only 1 party, the workers. It did not take long for me to dispel that fallacious notion. At other times some labor unions seemed to believe that there were only two parties, the representatives of the workers and the representatives of the employers. They seemed to forget that once they enter such a judicial tribunal there are three parties to a wage dispute, namely, the workers, the employers, and the public, with the public represented by the man in the middle, whether it be the wage board or the Government agency or the private arbitrator, or whoever has been given the solemn responsibility of fixing wages for the industry in connection with the particular case.

Therefore we must give consideration to the rights of the stockholders, and we must give consideration to all the arguments and evidence with regard to what is claimed to be a reasonable and fair profit in an industry, considering the risks that arise in connection with it. We must give consideration, of course, to depreciation allowance needs, and we must give consideration to the need for a reserve, in order to build up the plant from expansion and for greater production later.

All those factors must be considered. However, finally, as Brandeis and Cardozo point out in their discussion of judicial processes—particularly Cardozo in his great work on the nature of judicial processes—we come to the judicial determination which is known in the law as the value judgment of the relative rights of the parties litigant, in view of the full record of the case. Then our judicial sense tells us, "This is the figure." We describe that mental judicial process by such words as "It is a fair figure," or "It is a reasonable figure," or "It is an equitable figure," or "It is a just figure."

We have not evolved in the English language words which are more exact in meaning than the words I have cited for the description of this very solemn and, in a sense—if one is dedicated to judicial processes as we lawyers are—this sacred process of judgment in fixing a wage over and above a wage of health and decency, if the facts warrant it.

We call that a good wage. We call that a wage that takes into account, not luxuries, but entertainment, economic ambitions, and desirable goals, which every man and woman is striving to obtain as we seek to make our system of enlightened capitalism promote the general welfare.

As my colleagues have heard me say before, and although I never like to bore them even in prolonged debate, it is a point that needs to be repeated over and over again, the primary purpose of our great economic system, which we call enlightened capitalism, is to support and always keep strong and high in the arch, without the slightest sagging, that keystone of our whole constitutional system, the promotion of the general welfare.

That is why in years gone by, before many bar associations, when I have discussed the various phases of constitutional law, I have said so many times that the primary objective of our constitutional system is to promote the general welfare. In my judgment we have not even started, in the field of American constitutional law, to give full meaning to the constitutional concepts which are inherent in the general welfare clause of the Constitution. I believe it is the most elastic band in the Constitution. I believe it is the clause which guarantees for generations and generations to come the flexibility and adjustability and adaptability of the Constitution to changing human events in our political society, which we call a representative form of government in a political democracy.

Therefore, as in a wage case we come finally to render a judicial judgment as to what wage should be allowed over and above a wage of health and decency, when the employer is shown on the record to be one who can pay more than a wage of health and decency, we take into account, for example, the need for giving the worker a sufficient share of the profits—oh, what a dangerous phrase that is—in the form of a wage above a wage of health and decency, which will enable him to provide his family with more of the so-called good things of life, which may be a trip to California or Florida or some other sunny clime in our country—a part of the dream world and the justifiable objectives of many American wage earners.

Why not? If the industry can pay it and if the industry is protected by the criteria that I have been enumerating—and I have enumerated only a few of them—such a wage is fixed by the wage board, or arbitrator, the judge, or whoever has jurisdiction to render a judicial determination in the case.

There are other factors which are taken into account in determining that type of wage. It is necessary to consider such matters as reasonable medical care. Under a good wage, or a wage above a wage of health and decency, it is necessary to consider such factors as better medical care and more hospitalization. It does not follow that under a wage of health and decency the worker ought to have his wage so fixed that in case of illness in his family or childbearing on the part of his wife he will be able to pay for a private room in a hospital. However, it does mean that the wage should be sufficiently high to supply medical care and the medical needs of the family.

When we get to the point where the evidence submitted by the representatives of the workers shows that the employer has the ability to pay more than a wage of health and decency, we take these other good things of life into account and recognize that it would be pretty discouraging if every American were not allowed the expectation of an economic livelihood that would permit of the enjoyment of such a wage. But, as I have said, in fixing that wage there are three parties to it: the workers, the employer, and the public. Under those circumstances, also, judicial commonsense dictates that one industry be not moved forward all out of line with other industries simply because it may have an exceptional economic status at the moment.

Believe it or not, Mr. President, when I get toward the conclusion of this speech—and I am a long way from it at the present time; I may finish it tomorrow—I am going to draw it all together and show the direct application of these principles of wage policy to the bill now pending before the Senate, because we happen to be workers for the people, or we should be, and our wage costs, Mr. President, ought to be considered in line with all the criteria which are considered by wage boards, arbitrators, and judicial officers in fixing the amount of income for wage earners generally. Let us not follow the philosophy that we in the Congress of the United States are economic aristocrats. I cannot think of any greater disservice to the American people than for us to adopt the doctrine of economic aristocracy in the Senate of the United States and seek to set ourselves aloof from the rank and file of our fellow citizens. In this field of wage determination and wage adjustment we have no greater economic rights, merely because we are politicians sitting in the Congress of the United States, than have the people in the factories, in the fields, and in the white-collar class of America.

It is nice rationalization for us to try to alibi a 50-percent wage increase for ourselves, to try to put ourselves in an aristocratic class economically when millions and millions of people find themselves subjected to the kind of wage determination criteria about which I have been talking this afternoon.

The reason why I have gone into it in some detail is to try to get the American people—because I am talking to them from this desk this afternoon—to understand that the wage determination criteria which apply to them apply to us also, because we, too, are, or should be, workers in the public interest.

There are some other factors which are taken into account in determining wages under this criterion. I spoke about public hospitalization and more leisure time, and I have pointed out that when industry can afford to pay it, weight should be given to the point raised by the wage negotiators for more money for educational purposes for the average family of four persons.

We hear a great deal from educators of their growing concern because not enough of our young people are going to college to obtain liberal and professional education, or to technical schools for the development of scientific skills. These educators point out, and very rightly so, that we cannot stay ahead of Russia in manpower, but we must see to it that we stay ahead of Russia in brainpower. If we are going to keep America's defenses strong we must keep them strong not only in a military sense, but in a brainpower sense.

So, Mr. President, educators are disturbed about the fact that too frequently not enough of our best young brains have the advantage of higher education. The interesting thing is that heredity draws no distinction among families of the wealthy and families of the poor. History shows very clearly that some of the brainiest of our people come from families of the poor. Of course, Mr. President, it is a terrific national loss whenever we lose a potential nuclear physicist. When we lose the services of a brain that could develop into a great biochemist, it is a tremendous national loss. When we lose the services of a great nuclear engineer, when we lose the services of any potential scientist, or, for that matter, when we lose the brainpower of an individual who could assume leadership in any of the disciplines of learning, it is a tremendous loss. We lose them more in the grade schools. We do not lose them in high schools. In fact, we probably lose them before they start kindergarten. We lose them in great numbers at the home level when the home does not receive an economic income sufficient to start to condition intellectually the brainy child, the child of better than average I. Q., from the time that his propensities can be first noted. Do not forget that if that child is not afforded so-called minimum standards of education in the grade schools that will qualify him for high school education, all that potentiality, all that brainpower will have been lost if he makes a sorry record in high school, if he drops out in high school, or if he becomes discouraged and disillusioned. The interesting thing is that the records of child psychology show that it is the able ones, it is the brilliant ones, it is the ones of better-than-average mind who suffer the most psychologically from discouragement; and we know from our juvenile-delinquency records that a surprisingly large percentage of juvenile delinquents have good I. Q.'s. There are many other causes and many other factors; I mention only one. One of the causes to be found in individual cases is great discouragement because the boy or girl sees no hope for higher education. The family income does not permit of a standard of living in the home above a living of health and decency; it does not permit of the best of education.

Many conditioning factors come into play in the case of the bright boy or girl, as well as the boy or girl of a lower I. Q., which cause him or her, for one reason or another, to leave school early and to take up the economic burden of the family. Thus there is lost the potentiality of a great mind. This is not the way to keep ahead of Russia.

I shall have more to say about this general problem when I come to a discussion of proposed aid-to-education legislation later in this session of Congress. I mention this in passing only because the wage standards and the wage criteria which are applied to American workers determine in no small measure the extent to which we shall protect American brainpower, so far as developing to the maximum the education reservoir of the young people of our country is concerned.

Oh, Mr. President, there are so many interesting facets of this problem that one can be led into a myriad of very interesting channels of discussion when he merely begins to think about the problem of protecting the reservoir of American brainpower to be found in the youth of our land. But all I seek to do at this point in my remarks is to show the direct connection or association of brainpower with an economic income for the average family of our country.

I take the position that where the industry can support it, where the facts show that it has the ability to pay, a share of the profits over and above a wage of health and decency should go to the workers.

But when in a decision one even mentions the phrase "share the profits," he must expect to receive some rather uncomplimentary evaluations of his argument. I do not use the term "profit sharing" in the socialistic sense. We all know there are schools of socialistic thought which advocate a profit-sharing system on a socialistic basis, where the Government operates the industry, in effect, although it may have a managerial entrepreneur service from some so-called industrial group. I am not talking about that kind of profit-sharing at all. I am against it. I am talking about the producers of wealth within private industry, who are the workers as well as the investors.

Too many persons seem to have the idea that it is the owner of the capital who is the producer of the wealth. I do not take the point of view that he is not a producer of wealth, but he is only one factor in the production of the wealth that flows from his industry. The workers produce some of it, too. They are entitled, in that sense, along with the stockholders, along with the owners of the business, to some share of the profits, which would permit a wage above a wage of health and decency. That is the point I desired to stress in connection with the second category of criteria that are taken into account when a wage board, a Government agency, or an arbitrator determines a fair wage.

There is another wage criterion, a third class of wage structure, which sometimes is asked for in wage cases, after a wage of health and decency has been fixed. Even after a so-called good wage has been fixed in an industry, on the basis that the employer has the ability to pay over and above a wage of health and decency, another class of wage cases is frequently involved in wage adjustments. That is a wage which takes care of so-called fringe benefits, a wage that takes care of adjustments in costs of living, about which we have heard so much from our colleagues. So it will be seen that I am gradually getting to the point of the application of these principles to the theory of the pending bill. Just be patient, and I shall get there in my own time and in my own way.

In those wage cases there is a request for an "up" in the wage over and above the so-called good wage, so as to meet the changes in costs of living, or to meet the need for pension benefits, or to meet the need for a so-called security system for the industry or a hospitalization system. The so-called fringe benefits present some perplexing problems to the wage board or the arbitrator or the judge who is called upon to consider the economic rights of employers and workers, and, do not forget, as I said earlier, the public interest as well.

It is very important that we take into account the public interest, particularly when it comes to the matter of fixing so-called fringe benefits over a wage of health and decency and a so-called good wage that takes into account the economic rights of the workers.

UNANIMOUS-CONSENT AGREEMENT

Mr. CLEMENTS. Mr. President, will the Senator yield?

Mr. MORSE. I yield with the understanding that I do not lose my right to the floor.

Mr. CLEMENTS. Mr. President, for myself and on behalf of the distinguished minority leader, I submit a proposed unanimous-consent agreement and ask that it be read.

The PRESIDING OFFICER (Mr. BARKLEY in the chair). The clerk will read as requested.

The legislative clerk read as follows:

Ordered, That on Wednesday, February 23, 1955, after the morning business, during the further consideration of S. 462, a bill to increase the salaries of justices and judges of United States courts, Members of Congress, and for other purposes, debate on the pending amendment proposed by Mr. BUSH, and any other amendment or motion, including appeals, shall be limited to not exceeding 30 minutes, to be equally divided and controlled by the mover thereof and Mr. KEFAUVER: *Provided*, That if Mr. KEFAUVER is in favor of any proposed amendment, the time in opposition thereto shall be controlled by the minority leader or some Senator designated by him: *Provided further*, That no amendment that it not germane to the subject matter of the said bill shall be received: *Provided further*, That when no further amendment is to be proposed to the said Senate bill, the Senate shall, without debate, immediately proceed to the consideration of the companion House bill, H. R. 3828; that it be deemed to be amended by striking out all after the enacting clause and inserting the text of Senate bill 462, if and as amended; and that the engrossment of any amendment that is not germane to the subordered, and the bill read a third time.

Ordered further, That on the question of the passage of the said House bill as amended debate shall be limited to not exceeding 1 hour, to be equally divided between Mr. KEFAUVER and the minority leader and controlled by them, respectively.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request? The Chair hears none, and it is so ordered.

Mr. MORSE. Mr. President, I shall close my remarks in a few minutes.

I wish to apply the wage theory I have been discussing to the bill before the Senate. Cases involving fringe benefits, such as cost of living benefits, or changes in cost of living benefits, have to be determined by the arbitrator in terms of the ability of the employer to pay—and in our case the people of the United States represent the employer—and also in terms of the need when studied from the standpoint of the wage now being paid.

When we consider those two principles, Mr. President, and apply them to

the pending bill, I wish to say that, in my judgment, with our national budget what it is, the people should not be asked to pay these wage increases in the name of changes in the cost of living, because I submit the wage is adequate to meet the cost-of-living problems of Senators, if they will do their share of economizing. Secondly, Members of Congress asked to come to Washington, and I am sure they would be welcomed back home if they did not desire to stay here and work for a wage which certainly is above a wage of health and decency, and above the criterion of a good wage; and the people would have no difficulty in replacing them.

Lastly, I wish to point out, Mr. President, that I think the amendment which is to be offered by the Senator from Delaware [Mr. WILLIAMS] is a sound one from the standpoint of the criterion of ability to pay, because, until the budget is balanced, I do not think that the wages of Members of Congress should be increased.

So what I have had to say in regard to what is really a summary analysis of the criterion that judges, wage boards, and arbitrators are called upon in American industrial dispute law to apply in fixing wages, is directly applicable to the bill before the Senate.

I am opposed to the bill, Mr. President, so far as congressional salaries are concerned. Under the limitations of time fixed in the unanimous-consent agreement, I shall have something to say in regard to the judicial features of the bill. I now wish to say that the present salary of Members of Congress is a good salary, supplies a good wage, under the criterion which I have outlined this afternoon, and that the claim for an increase on the basis of an adjustment for cost of living is not justified at the present time.

For those reasons in the main, and for many more specific reasons which I shall advance as I discuss individual amendments on Wednesday, I wish the record to show that I am unalterably opposed to the proposal for congressional salary increases at this time.

Mr. President, I send to the desk a series of amendments, some of which are introduced by me in behalf of myself and my junior colleague [Mr. NEUBERGER]. The last one I have not had an opportunity to discuss with him, and I do not know whether he will join in it, so I shall offer it only on behalf of myself. I ask unanimous consent that the amendments be printed and lie on the table, so that Senators may have them available in printed form when we proceed to discuss them on Wednesday.

The PRESIDING OFFICER (Mr. KEFAUVER in the chair). Without objection, the amendments will be printed and will lie on the table.

Mr. MORSE. Mr. President, I would say to the acting majority leader and the acting minority leader, the Senator from Illinois [Mr. DIRKSEN], who I am sure very ably represents the minority leader in the Senate, that I deeply appreciate the cooperation which they have extended to the senior Senator from Oregon in connection with the unanimous-consent agreement and further debate on the bill. It is not always pleasant, and it is not easy, as anyone who has tried it well knows, to stand in the Senate and use one's parliamentary rights to protect what one's conscience and judgment tells him is a public interest. I respect the sincerity of those in the Senate who disagree with me at those times, but I respectfully say now that I think it is good for all, for the Senate and for the country, that we have provided for the extra hours that will now be available for a more considerate debate on the pending measure than would have taken place if, with the clock hands pointing at us all the time, it had been sought to push through the Senate tonight to a vote an issue which is so controversial across the land as this issue is. I would certainly be less than appreciative if I did not extend to the majority leader and the acting minority leader my sincere thanks for the cooperation they have extended to me. I hope they will not feel that I unfairly held a parliamentary gun at their heads, because I did not shoot many bullets. I merely pleaded that they would not make it necessary for me to do so.

Mr. CLEMENTS. Mr. President, will the Senator yield?

Mr. MORSE. I yield the floor.

Mr. CLEMENTS. I wish to assure my friend, the Senator from Oregon, that the acting majority leader is appreciative of the comment which the Senator from Oregon has made. I was not conscious of any parliamentary gun being held at anyone's head. I wish to assure my friend from Oregon that we had no designs by which we could have had either the hour or the minute hand of the clock directed at him. I think it is very fine that we have had three and a half or 4 hours of discussion on this very important measure this afternoon. By reason of having discussed the bill for that amount of time, I think it has given us the opportunity to have the bill passed on Wednesday at a much earlier time than otherwise. In view of the manner in which the bill has been handled, I do not believe that anyone could point a finger of suspicion at any Member of the Senate and suggest there had not been ample opportunity for the bill to be fully explored by the Members of the Senate and by the people of the country as a whole.

Mr. MORSE. I thank the Senator very much for his comments.

ADJOURNMENT

Mr. CLEMENTS. Mr. President, I move that the Senate stand adjourned until tomorrow at 12 o'clock noon.

The motion was agreed to; and (at 6 o'clock and 11 minutes p. m.) the Senate adjourned until tomorrow, Tuesday, February 22, 1955, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate February 21, 1955:

IN THE ARMY

The following-named officers for appointment in the Regular Army of the United States to the grades indicated under the provision of title V of the Officer Personnel Act of 1947:

To be major generals

Maj. Gen. John Harrison Stokes, Jr., O12181, Army of the United States (brigadier general, U. S. Army).

Maj. Gen. Crump Garvin, O12746, Army of the United States (brigadier general, U. S. Army).

Maj. Gen. George Honnen, O12816, Army of the United States (brigadier general, U. S. Army).

Maj. Gen. John Francis Uncles, O14914, Army of the United States (brigadier general, U. S. Army).

Maj. Gen. Robert Nicholas Young, O15063, Army of the United States (brigadier general, U. S. Army).

Maj. Gen. Thomas Sherman Timberman, O15328, Army of the United States (brigadier general, U. S. Army).

Maj. Gen. Edwin Kennedy Wright, O15475, Army of the United States (brigadier general, U. S. Army).

To be brigadier generals

Brig. Gen. Raleigh Raymond Hendrix, O15897, Army of the United States (colonel, U. S. Army).

Maj. Gen. Donald Prentice Booth, O16395, Army of the United States (colonel, U. S. Army).

Maj. Gen. Victor Allen Conrad, O15546, Army of the United States (colonel, U. S. Army).

Maj. Gen. Francis Marion Day, O15614, Army of the United States (colonel, U. S. Army).

Brig. Gen. Peter Conover Hains, 3d, O15657, Army of the United States (colonel, U. S. Army).

Brig. Gen. Vonna Fernleigh Burger, O15667, Army of the United States (colonel, U. S. Army).

Brig. Gen. Richard Givens Prather, O15693, Army of the United States (colonel, U. S. Army).

Brig. Gen. Willard Koehler Liebel, O15723, Army of the United States (colonel, U. S. Army).

Maj. Gen. William Henry Maglin, O15812, Army of the United States (colonel, U. S. Army).

Maj. Gen. Edward Joseph O'Neill, O15952, Army of the United States (colonel, U. S. Army).

Maj. Gen. Arthur Lawrence Marshall, O38593, Army of the United States (colonel, U. S. Army).

The following-named officers for temporary appointment in the Army of the United States to the grades indicated under the provisions of subsection 515 (c) of the Officer Personnel Act of 1947.

To be major generals

Brig. Gen. Frank Needham Roberts, O12734, United States Army.

Brig. Gen. Andrew Thomas McNamara, O17324, Army of the United States (colonel, U. S. Army).

To be brigadier generals

Col. Keith Richard Barney, O16377, United States Army.

Col. Benjamin Branche Talley, O16668, United States Army.

Col. Charles H. McNutt, O16751, United States Army.

Col. Charles Granville Dodge, O18072, United States Army.

Col. Alva Revista Fitch, O18113, United States Army.

Col. Christian Hudgins Clarke, Jr., O18213, United States Army.

Col. James Knox Wilson, Jr., O18218, United States Army.

Col. William Frew Train, O18415, United States Army.

Col. Robert Quinney Brown, O18520, United States Army.

EXTENSIONS OF REMARKS

Thirty-seventh Anniversary of the Independence of Lithuania

EXTENSION OF REMARKS
OF
HON. JOHN MARSHALL BUTLER
OF MARYLAND
IN THE SENATE OF THE UNITED STATES
Monday, February 21, 1955

Mr. BUTLER. Mr. President, I ask unanimous consent to have printed in the RECORD a statement which I have prepared in commemoration of the 37th anniversary of the independence of Lithuania, which was observed on Wednesday, February 16.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR JOHN MARSHALL BUTLER, OF MARYLAND, IN COMMEMORATION OF THE 37TH ANNIVERSARY OF LITHUANIAN INDEPENDENCE

Today, February 16, is the 37th anniversary of the independence of Lithuania, and the free people of the world pause to do honor to these indomitable people who, despite the engulfment of their land by the atheistic forces of world communism, nevertheless, retain their great spirit of freedom and independence.

As one of the earliest independent states in Europe, Lithuania flourished and prospered as a nation of peaceful and freedom-loving people for several hundred years. Yet, in the 18th century the greed of large and powerful neighbors, in a struggle for the control of Europe, eventually resulted in the enslavement of this small country by Czarist Russia. Though these powerful forces erased the nation of Lithuania from the map of Europe, they could not extinguish the spirit of the people of Lithuania and their strong love of freedom. During the years to follow, the desire for liberty and the constant quest to regain the independence of their nation continued unabated, to be fulfilled after World War I by the establishment of the Lithuanian Republic.

For almost a quarter of a century Lithuania thrived as a nation of free and independent people, only to be overcome by the forces of communism at the outbreak of World War II. As in the past, the Lithuanian people are determined to withstand the forces of slavery and subjugation, and to assume again their rightful place among the people of the free world.

They continue to disregard the atheistic teachings of the Communist dictators. They strive to instill in their youth the great love of liberty, the way of life which recognizes the inalienable rights of man as an individual, and the teachings of God that nourish the spirit of all freedom loving people. Irrespective of what further adversity the future may hold, the Lithuanian people will continue to meet their responsibilities. The flame of liberty will continue to burn in their hearts. The soul of this brave nation will be true to the cause of the free world and, eventually, as in 1918, the independence of the Lithuanian nation will again become a reality.

Until that eventful day, these brave people can be assured of the continued steadfastness of their millions of friends in America. We will never forget the importance of this gallant nation to the economy of Europe, or of its many contributions to the culture of the Western World. Furthermore, the courage and the fortitude of these gallant people will continue to inspire us in our struggle to set men free; to make the world a better place in which to live and where future generations of all nations can live in harmony, peace, and freedom in accordance with God's principles.

Address by the Honorable Henry Cabot Lodge, Jr., at Dinner of Republican State Committee of Pennsylvania

EXTENSION OF REMARKS
OF
HON. JAMES H. DUFF
OF PENNSYLVANIA
IN THE SENATE OF THE UNITED STATES
Monday, February 21, 1955

Mr. DUFF. Mr. President, I ask unanimous consent to have printed in the RECORD an address which was delivered by Henry Cabot Lodge, Jr., United States representative to the United Nations, at a dinner in Philadelphia, on Monday, February 14.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

The size and importance of the State of Pennsylvania and of the city of Philadelphia are in themselves reason enough to make any man proud to be the speaker here tonight, particularly one who, like myself, has seen at firsthand what the influence of Pennsylvania can mean in national politics.

To this pleasure is added the gratification of speaking in a State which is represented in the United States Senate by two men with whom I have served.

The first is Senator EDWARD MARTIN, whose courtesy and patriotism and sincerity are well known to you. I have the finest recollections of my service with him.

And then, of course, it is a unique pleasure to take part in any affair in which JIM DUFF is interested, and Jim has told me of his interest in this dinner tonight. Knowing Jim as we all do, you will believe me when I say that he told me of this interest in no uncertain terms. Jim and I have not only been friends in the Senate, but the closest of fellow workers in the campaign to secure the Republican nomination for General Eisenhower. Without his brilliance and boldness, without his sure political instinct, and his vision, our campaign would not have gotten off the ground.

These then are some of my reasons for being glad to be in Pennsylvania. There is another one, and one which I think entitles all Pennsylvanians to congratulations, which is that our President is making a home for himself in this State in the historic town of Gettysburg.

Gettysburg not only suggests Pennsylvania; it not only suggests President Eisenhower; it also suggests Abraham Lincoln, the anniversary of whose birth we celebrate tonight. One of the things about Lincoln is that he is always up to date. He never grows old or stale. What he says is always modern and to the point.

He guided us through the worst tragedy in our history—for a civil war is the worst of all wars. He can help us today when the big fight in the world is not among ourselves but against the world menace of communism.

To appreciate Lincoln to the full we should realize some fine and unique things about our country—things which we should not take for granted—which were recently summarized by Professor Commager as follows: That we are now the oldest republic, the oldest federal system with the oldest written constitution in the world; that we have avoided a violent revolution from the right or from the left; that we have developed majority rule without impairing the rights of minorities; that we have remained moral without a state church; that we have established a system of universal education without the vulgarization of culture; that we have become a world power without imposing our will on other people; and that we have remained a single nation under one flag instead of fragmenting into a multiplicity of separate—and quarreling—nationalisms.

None of these achievements would have been possible without the leadership of Abraham Lincoln. It is due to him that we are one country today under one flag. It is thus due to him—and to those who laid down their lives at his call—that our country is today the great hope of lovers of freedom all over the world. It is therefore our duty to remember that by our actions, in Lincoln's own words, "We shall nobly save or meanly lose the last, best hope of earth."

While Lincoln's wisdom and nobility of spirit are timeless and as fresh today as the day he expressed them, the march of science has not stood still. It was Lincoln who said that "all the armies of Europe, Asia and Africa combined, with all the treasure of the earth (our own excepted) in their military chest, with a Bonaparte for a commander, could not by force take a drink from the Ohio or make a track on the Blue Ridge in a trial of a thousand years."

That eventuality today is fortunately still highly unlikely. But we must recognize what modern science means—that for the first time since the Civil War was fought, a future war would be brought to our own soil. Ever since the Civil War our wars were all fought outside of the United States. If the tragedy of another war should occur, we in the United States would be the prime target.

National defense and foreign policy have always been the prime responsibility of the President, and this has never been truer than it is today. In 2 years as a member of the President's Cabinet and as the United States representative to the United Nations, I have been able to see at first hand how the President has discharged this duty, and I would like tonight to review briefly with you just 20 of the most important things that have happened in that time.

1. Last spring, world communism, having moved in on Guatemala, was getting ready for aggression into other parts of Central America. We discovered a 2,000-ton shipload of Communist arms being sneaked into Guatemala from Communist Poland. Then anti-Communist Guatemalans, exiled in Honduras, started a revolt to free their country from Soviet Communist domination.

Immediately, Moscow went into action. They asked for a session of the United Nations Security Council. You could see the close teamwork between the Soviets and their Communist Guatemalan stooges. They tried to get the Security Council to send so-called peace observers to Guatemala—with Communists among them, of course—the idea being to stop the revolt and save the pro-Communist regime. This was a bold Soviet bid to torpedo the Monroe Doctrine, and gain a decisive foothold for communism in our

hemisphere. They wanted to make the United Nations Security Council an accessory to their crime.

But we met that challenge head-on in the Security Council in New York—and we defeated it. Communism in Guatemala, as a result, went down the drain. Today Guatemala is once again securely in the free world, once again a loyal member of the Inter-American system, and the Monroe Doctrine remains intact to shield our hemisphere against any outside aggressor.

2. At Caracas, Venezuela, last March, the American Republics agreed to act together against international Communist subversion in our hemisphere, just as they would against military aggression. Thus the Monroe Doctrine has not only been preserved—it has been applied to cope with the realities of our time.

3. In Costa Rica last month a living reality was made of the provisions of the Rio Pact, the purpose of which is to maintain peace in our hemisphere by common action.

4. Moving across the Atlantic to Europe, we see today a new hope for freedom in the London agreement, which has now been ratified by the French National Assembly, on the delicate and vital problem of rearming West Germany. When the old plan for a European Defense Community was defeated we didn't sulk or despair. We moved at once with the other nations most concerned to find a new way to put German military power on the side of freedom—and to end the Franco-German division which has been called the world's worst fire hazard.

The result is the London and Paris agreements, which will give back sovereignty to West Germany, give her an army to help defend Europe, and make her a member of the North Atlantic team. What an historic achievement it will be to get France and Germany solidly together as effective partners in defending Europe against communism. Now it looks more and more certain that a major start toward that goal has been made, in spite of increasingly frantic Communist maneuvers to stop it. The tact and initiative of Secretary Dulles deserve a large share of the credit for this.

5. Another happy development in Europe is the settlement at last of the quarrel between Italy and Yugoslavia over the port of Trieste—a quarrel in which at one time the troops of both sides were almost ready to march. Italy gets the port city and the two countries divide up the outlying districts. The end of that dispute means a much more solid front against Soviet pressure in the Mediterranean. It's a new element of strength for the free world, and American diplomacy had a big hand in bringing it to pass.

Let us move to the Middle East—a vital area in the struggle with communism. For one thing, it contains the world's biggest reserves of oil—which is vital in our strategy. For another thing, it consists mainly of young nations, most of them colonies of Europe not long ago, whose people are often suspicious of the Western World. Communism would dearly love to get a foothold there. In this area we have had a whole series of successes for the cause of freedom.

6. There is a new defense pact between Pakistan on the east and Turkey on the west. Other nations may join that soon, implementing what Secretary Dulles calls the "northern tier" concept to shield the Middle East from Soviet aggression.

7. We have new agreements with Pakistan and Iraq to strengthen their defense.

8. The knotty problem of how Iran is to sell her oil in the world has at last been solved and thus a chance for Soviet pressure and manipulation has been removed.

9. Then in Egypt, with constant American encouragement, an agreement was reached with Britain last year on defense of the Suez Canal—which means an end to still another trouble spot where, only a short time ago, both sides were getting ready to fight it out if necessary.

10. And meanwhile, in the United Nations Security Council and elswhere, we have worked successfully with both Israel and the Arab countries to see that the peace there is not broken, although all the problems have certainly not been solved. So in the Middle East, which was a dangerously weak link in our defense against communism 2 years ago, we have now a very promising sight—the growth of a strong international structure in which freedom can develop and defend itself.

In the Far East we must cope with an aggressive communism which is still pushing outward from the Soviet Union and Communist China and with the attitude of countries like India which insist that their foreign policy can be impartial between communism and freedom.

11. The first gain in the Orient came when we ended the Korean fighting and stopped communism dead in its tracks. We have as a result been able to take four American divisions out of Korea and put them in our strategic reserve for use wherever they may be needed.

12. We gave effect to the priceless principle that no Chinese or Korean prisoner of war would have to go back to communism against his will, as a result of which the overwhelming proportion of these prisoners, nearly 50,000 of them, are free men today.

13. There has been no final peace settlement in Korea, because the Communists don't want one, as they proved at Geneva this spring, where they frustrated all Korean proposals and vilified the United Nations at the same time. But we have kept the record straight, and in the United Nations we made sure that in any peace negotiations on Korea the Soviet Union would appear where it belongs—on the Communist side of the table and not as a neutral.

14. In Indochina settlement has been reached to end the bloodshed. It was a sad settlement in many ways, but it was certainly better than continuing a war which couldn't be won without American divisions doing the fighting—and we did not want to send our young manhood to fight in those mountains and rice paddies. The situation in that area is still perilous, and is one which cannot be successfully dealt with exclusively by military methods. We are not just standing by wringing our hands; we are over there helping free Vietnam, Laos, and Cambodia to get on their own feet and stay free.

15. For the first time we have the beginning of a strong free Asia organization in the Manila Pact, which was signed by eight nations last September. The area it defends stretches from Pakistan to the Philippines. This pact is directed against both armed attack and Communist subversion, and it contains an historic declaration for freedom for the peoples of the Asian and Pacific area.

United States leadership played a tremendous part in that historic Manila Pact. In this treaty plus the new defense treaties with free Korea and free China, we have an emerging pattern of real defense for freedom in Asia. But we have more than that. We have a new start toward a community of Asian nations which stand on their own feet. These nations are seeing more and more clearly that the old colonialism to which they are accustomed is giving way to a new age of freedom, and that the great threat to that new age is not from Europe and the West but from the new Communist colonial system that seeks to enslave people under false banners of so-called liberation.

16. Communist China has been put on notice by the President, with the backing of the Congress, that we will not tolerate aggression against Formosa and the Pescadores. This courageous and timely move is our best insurance against a full-scale war in that area.

17. The United Nations General Assembly, by a vote of 47 to 5 last December, condemned Red China's imprisonment of 11 American fliers on false charges, and took the responsibility to seek release of all United Nations Command prisoners still held by the Communists in violation of the Korean armistice agreement. Thus the United Nations has shown that it believes in the elemental decencies and seeks to look after its own. I believe we will get our men back, and I believe that the General Assembly's action will have been a big step in that direction.

18. Communist China's attempts to get into various United Nations bodies have been voted down every time; a total of 25 times since I have been there.

19. Americans employed by the United Nations have been screened in accordance with FBI procedures for the good and sufficient reason that where there are so many good Americans to choose from, there is no excuse whatever for employing one single American Communist.

20. The high point at the United Nations was President Eisenhower's dramatic plan to set up a world pool of fissionable materials so that humanity may receive the great benefits of the peacetime uses of atomic energy. This plan had seized the imagination of the world so strongly that even the Soviet Union didn't dare vote "no"—and the resolution endorsing it passed the General Assembly by 60 to 0.

To sum up—in 2 years, faced with the unrelenting pressure of communism, we have had bold forward steps and great diplomatic successes for the cause of freedom in every quarter of the globe. We have seen success in Guatemala and Costa Rica, in getting a real start on bringing West Germany into the North Atlantic Organization, in settling the Trieste problem, in the defense pacts involving Pakistan, Turkey, and Iraq, in the Iranian oil settlement, in Egypt, in Korea, in the Southeast Asia pact, and at the United Nations—particularly in the world acclaim given to the President's proposal for the peacetime uses of atomic energy.

I often think that the ending of that dreadful war in Korea in itself is enough to cause us to be thankful—even if all these other good things had not been accomplished. Just the thought that our boys are not being killed any more makes me grateful.

It all adds up to this—that for the first time since World War II there is no large-scale fighting going on anywhere in the world. Of course the situation is precarious and peace is not established on a durable basis. But for the first time we and other nations, instead of rushing from one emergency to another, have begun to settle down confidently to the long haul to defend and strengthen peace and freedom.

It is curious in the face of this record to hear voices raised which complain that the United States world position has somehow weakened in the past 2 years. Hearing these voices calls to mind the fact that we have in the State Department and in the White House two Americans who, leaving out of account all their other qualifications, have been thinking about and dealing with America's relationship to the outside world all of their lives.

John Foster Dulles has been working actively in the foreign affairs field since he was a very young man. From the time he was in college his ambition was to become Secretary of State and he has trained himself deliberately for this work. As one of his close associates, I appreciate this opportunity to pay tribute to his wisdom, his cleverness, his patience, and the deep-seated goodness of his nature.

Dwight D. Eisenhower, as a young Army officer in the Philippines, was dealing at the

very highest level with the Philippine leaders of those days and with others on matters which directly affected the United States world position. Later, in World War II and again in the NATO command, as Cardinal Spellman said recently, the American people entrusted him with our two most precious possessions—our liberties and our youth. His success in those great tasks depended directly on his understanding of foreign relations and his insight into the minds of foreign peoples.

Similar thoughts come to mind in connection with national defense. At the present time we have more air groups ready for action than we have ever had before in time of peace—real air groups, not paper ones. We have better than 121 combat-ready air groups today. In 1952 there were 103 groups, but many of them were not equipped with modern aircraft and would not have been effective in combat.

Thanks to the fact that the American people had the good judgment to put our foremost military expert in the White House, we have eliminated much waste from the armed services, yet we are actually getting more defense.

The newspaperman, Holmes Alexander, wrote some paragraphs recently about our President which I would like to quote:

"On a short-term, day-to-day basis, America's best natural resource for 1955 is Dwight David Eisenhower, the good gray rock to which, as it sometimes seems, the Nation's sanity is anchored.

"Only a moderate, as he calls himself politically, could have tapered us off the Fair Deal jag; only a public hero with a puritanical conscience would have accepted the popular power now in one man's hands without abusing it; only a five-star military officer would have the nerve and the knowledge to reduce the Armed Forces—as Ike intends to keep on doing—in the face of real danger and of phony danger—the latter raised like a goblin's head by certain Congress people, the military columnists, the munitions makers, and the Pentagon chiefs, who year after year lobby for more men and more armaments.

"But the vein of gold in this Eisenhower lode is not his politics, experience, or expert knowledge; it's his personal character."

Mr. Chairman, I conclude.

We believe in our wonderful two-party system because competition in politics makes for better politics just as competition in business makes for better business. We in particular are proud of the Republican record of service. But modern Americans do not believe that the party system should be carried to the point where it destroys the national unity.

The big fight today is not between Republicans and Democrats.

In this dangerous world the big fight is between us Americans with our allies who love freedom on the one side and, on the other side, the Communist rulers who would destroy us. This was true when Stalin ruled in Moscow; it was true when Malendov succeeded him; it is true today; and prudence demands that we expect it to be true in the future.

This means unity at home.

But it does not mean monolithic uniformity. It does not mean the suppression of honest disagreement. It means that our disagreements must be sincere and not inspired by political motives. It means that our opinions, whether we agree or not, must be inspired by what Lincoln in his first inaugural address called "the better angels of our nature."

When we see the kind of administration which the President is giving this country—its enlightenment, its generosity, its fundamental decency, and its effectiveness in behalf of our people in our domestic affairs; when we consider its skill, its prudence, and its vision in leading us in the dreadful struggle brought on by world communism, it is natural for us to exclaim that we would like to see Dwight D. Eisenhower as our President without any limit as to time. I predict that the people will not allow him to retire and will surely insist on his serving for another 4 years. In bringing about peace and at the same time preserving prosperity, he has already done what many thought was impossible. The American people know when they have something good, and they have that something good in Dwight Eisenhower.

Just as Lincoln, whose name we revere tonight, was the right man for the tragic crisis of the Civil War, so is President Eisenhower the man to lead us in this perilous struggle with world communism.

The Role of the Military in American Foreign Policy

EXTENSION OF REMARKS
OF
HON. MIKE MANSFIELD
OF MONTANA

IN THE SENATE OF THE UNITED STATES

Monday, February 21, 1955

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD a speech which I delivered at the commissioning exercises of the 12th officer candidate class, United States Marine Corps, Quantico, Va., on February 19, 1955. The address is entitled "The Roll of the Military in American Foreign Policy."

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

THE ROLE OF THE MILITARY IN AMERICAN FOREIGN POLICY

(Address of Senator MIKE MANSFIELD, of Montana)

An elected official can hardly expect universal approval of his position on every issue. Almost invariably some people will agree with him and others will disagree, sometimes very vehemently. And I must say that a Member of Congress pricked by public criticism bleeds at least as profusely as any other human being.

In a decade and a half of service in Congress, I have been on sick call for this reason on a number of occasions. I have learned to accept occasional wounds as a part of my job, as an occupational hazard.

There is one issue, however, which I have repeatedly tackled in Congress and have repeatedly come out, not licking my wounds but miraculously unscathed. That issue is the preservation of the integrity of the Marine Corps.

While Members of Congress must out of conviction sometimes run counter to the immediate flow of public opinion, it is not a very pleasant experience. It is always preferable, if you can do so honestly, to find yourself flowing downstream with public sentiment rather than struggling upstream, half-drowned, against it.

Beyond the natural gratification which comes to an elected official when he finds his own heart and the public pulse beating in perfect unison—beyond that, I have a special pleasure in fighting for the integrity of the corps. As a marine, I take personal pride in the marines. Of course, I also take personal pride in the Army and the Navy, as an exmember of each of those services. But I think I may be pardoned if I tend to be a little prouder of my marine background. I was only a private in the Army. I was only a seaman, second class, in the Navy. But with that same perceptiveness which prompted the Marine Corps to recognize your qualities of leadership the corps also recognized mine. I emerged from my hitch in the Marines as a Pfc.

That distinction, I realize, does not, in itself, qualify me to speak to you on the Role of the Military in American Foreign Policy. Nevertheless, I feel that the subject is of such great importance that it should be considered not only by privates—buck or first class—and Senators, but by thoughtful Americans throughout the Nation. I think it is an especially pertinent one for you men who are graduating today into command positions in the corps. The Marines have traditionally operated with high effectiveness as a principal military instrument of this Nation's foreign policy during peacetime just as they have more than once proved their tremendous capabilities when the peace has been violated.

One explanation for this outstanding service may well be that the corps has always maintained a strict professional regard for the American principle of civilian control of military power. That principle, as I am sure you have been taught, is absolutely essential for the proper functioning of our system of government. It is not enough that Congress determines appropriations and organizational arrangements, and that the President and his civilian assistants direct the administrative management of the military. The American concept goes further. It requires that the military shall only be used whenever, wherever, and in whatever manner the politically responsible civilian leadership shall determine, because only that leadership, through elections, can be held accountable to the people of the Nation.

In the present state of world affairs, a system of civilian control is not easily maintained. It is subject to all the stresses and strains that arise from the tense international situation. In a crisis, with the threat of world conflict ever present, it is not unnatural to turn to distinguished military leaders for guidance, to rely heavily on their judgment, and sometimes it is profitable to the Nation to do so. Nevertheless, the principle of civilian control remains essential to democratic government as we know it.

Primary responsibility for the preservation of this principle rests with our civilian leadership; that leadership must be willing to assume the heavy responsibilities of decision in this dangerous world. But I think you will agree that considerable responsibility also rests with the military. They must understand and accept the limits as well as the challenges of their profession in the conduct of the Nation's affairs, particularly its foreign affairs.

Perhaps I can illustrate this point with an anecdote. During the Civil War, the story goes, certain Members of Congress left their desks in Washington and went to the battlefields in Virginia. There they insisted upon assuming the tactical command of the Union forces. After having thrown the campaign into confusion they beat a hasty retreat to Washington where they arrived mud-spattered, trembling, and presumably chastised.

If the story is amusing, it is because it is easy to recognize the absurdity of this escapade. These Congressmen apparently assumed that their training in politics equipped them to run the Army. They also distorted and distended the functions of their office out of all true proportion.

The moral of the story is simple enough: Congressmen ought not to assume that political training provides an automatic background for military leadership and, in military affairs, their role ought not to exceed the constitutional powers of their office.

Let us put the shoe on the other foot. The moral is now this: Military leaders ought not to assume that military training provides an automatic background for politics, whether national or international, and they ought not

in the formulation and conduct of foreign policy exceed the powers of their appointive office.

Just as the distorted behavior of the Congressmen in the Civil War could have produced tragic results as easily as humorous, so too can the distorted behavior of military leaders.

It has never been easy to draw a clear line as to the area of competence and authority of the armed services in foreign policy. Events of the past 15 years have made it even more difficult. First of all, during this period, some among us, civilian and military alike, have developed a distorted sense of the nature of what this country is trying to do in its relations with other nations and how it can most effectively go about doing it. Foreign policy is simply the course by which we attempt to provide for the safety of the Nation and the advancement of its interests in a complex and dangerous world. That is its only reason for being. To carry out our policy we require military strength but we must also bring into play nonmilitary instruments and measures to influence conditions throughout the world. Possibly it is because these nonmilitary measures are less dramatic, less newsworthy, and tend to affect us and our families less directly, that we sometimes lose our perspective and regard them as less important than military actions. Sometimes there is a tendency to view nonmilitary measures merely as supplements of our military policy, when in fact the reverse is closer to the truth.

You men need hardly to be reminded of this fact. If you know the history of the corps, you know that the marines have been sent to foreign territories and to overseas bases only from time to time and only after the failure of other methods to protect American citizens and interests. In countless day-to-day situations arising in our foreign relations throughout the world the military instrument is in no way involved.

As for any large scale use of force, it is only when nonmilitary measures fail to produce situations favorable to the vital security interests of the United States, that such use may become necessary. Even then we have invoked military force only in response to aggression. That we have waited for our enemy to show beyond all shadow of doubt that he intends to strike us, rather than strike the first blow ourselves, does not mean that we are slow-witted or even patient. It means simply that we are following a fundamental American principle: that force is the final, not the first arbiter in the affairs of men and nations. Nothing has done more to toughen the moral fiber of this country than that principle. No other single factor has served to sustain our morale during the long and gruelling wars which we have had to fight. Nothing has done more to turn the hearts and hopes of mankind to this Nation. And I hope the day never comes when this Nation shall use its might in any way other than for protection against the arrogant, the aggressive, and the ruthless.

The role of the military in foreign policy, then, is to provide a reserve of power to support negotiations concerning our just interests in the world and to defend those interests if they are attacked. I want to underline the words "reserve and support." Responsibility for determining what our interests are and when and how they are to be defended is vested in the President and his Secretary of State. The Department of Defense and other agencies of the Government, in the performance of their duties have an influence in this determination, but final responsibility cannot rest in any body other than the Department of State or the President himself.

Since the beginning of World War II, however, the role of the military in American foreign policy has assumed proportions of great magnitude. During the war the armed services inevitably became the foremost element in carrying our American policy. Since the close of those hostilities the services have continued to serve prominently in this connection, due to the nature of postwar diplomacy and developments.

The occcupation of Germany and Japan, and the control of trust territories, among other things, has brought the armed services directly into foreign policy to a degree unprecedented in peacetime. To some extent, the same was true of the so-called Truman doctrine of 1947. Under the Truman Doctrine, the Armed Forces not only ran military training missions to strengthen the security of Greece and Turkey against Communist aggression, but of necessity played a significant role in the formulation of policy with respect to those countries. Subsequently, they have had an enormous influence in foreign policy in connection with NATO, mutual aid and military assistance missions in numerous countries, the Korean war, overseas bases, and treaties with nations in the western Pacific.

I think that one of the chief problems emanating from this chain of developments is that in many instances there has been a tendency to treat individual military programs and policies as separate and distinct military affairs, whereas they actually are parts of the totality of American foreign policy. Responsibility for decision making has at times been vested in military officials rather than in foreign-policy officials. In other instances there has been a failure to define and clarify lines of responsibility for policy formulation. I say this, not so much in criticism as in recognition of the fact. It is unlikely that anyone planned it that way; it has simply happened—perhaps largely because it was not planned.

The obscuring of the lines of responsibility and authority is perhaps best illustrated in the issuance of public statements by leaders of the armed services. Such statements are usually expressed in military terminology. Often, however, much of their substance is of a foreign-policy nature. Perhaps this is unavoidable in view of the complexity of the matters with which they frequently deal. One cannot always draw a clear-cut line between military and political and other factors in a given situation.

The question of rearming Germany will serve to illustrate this point, and this example finds a counterpart in practically every other major foreign policy issue with which we are confronted. There are strong military reasons for urging the rearmament of Germany and it is natural for military personnel to see the need in terms of added divisions of manpower, bases, etc. But Germany cannot be rearmed in a vacuum. Rearmament cannot be divorced from a whole range of problems concerning European unity, the fears of France, the role of Britain on the Continent, the reunification of Germany, and the maintenance of the Western Alliance. It seems to me, therefore, that official statements on this subject under our system of government emanate best from our foreign policy officials. They are presumably kept well informed by the Joint Chiefs of Staff with respect to the military considerations involved and they in turn are best equipped to view such considerations and to express them publicly in terms of the totality of American interests.

I cite this example merely to illustrate the problem of defining the role of the military in American foreign policy. It is not difficult to see the principal reason for the expansion of military participation in foreign policymaking. As I mentioned earlier, the nature of wartime and postwar developments and diplomacy has required a vastly increased use of the military as an instrument of policy.

There is, however, still another factor. The military emerged from the war with great prestige, both at home and abroad, and this prestige has carried over into the postwar period. On the international scene this has led to widespread use of prominent military leaders in diplomatic capacities. At various periods since the close of World War II three of our foremost military leaders during the war have served in positions which were more political than military and which roughly corresponded to their wartime military roles—General Eisenhower as NATO commander, General MacArthur in charge of the occupation of Japan, and General Marshall as Secretary of State. Each of these distinguished military leaders had earned the respect of foreign nations, as well as the American people, through their outstanding military service. Each made an exceptional contribution in their postwar assignments.

Other military leaders have also been called upon for diplomatic or political services—Gen. Walter Bedell Smith, who served as Ambassador to the Soviet Union, Director of the Central Intelligence Agency, and Under Secretary of State, and Adm. Alan Kirk, who served as Ambassador to Belgium and Ambassador to the Soviet Union, are two leading examples. I could name two dozen other former generals and admirals now holding civilian positions in the Federal Government. Countless others of field grade are scattered through the civilian bureaucracies of the Federal Government concerned with foreign affairs and international organizations.

This increased use of military leaders in position of a diplomatic or political nature, of course, has often been due not only to carryover of the military prestige of these men but also to their demonstrated ability as well as their availability for such service.

Without in any way reflecting on the capacity of any individual, I do think that the vast expansion in the employment of military personnel in both the making and carrying out of foreign policy is something to which we should give some serious thought. It raises questions not only with respect to our basic values but also with respect to our basic foreign-policy objectives, including our military security.

First, let me say something about the question which I think this trend poses concerning our basic values.

Military officers are not different from anyone else in this country. They come from representative families all over the Nation; they go to the same grade schools and high schools; they hold the same social and religious values. But the military profession exacts from those who pursue it a higher measure of self-sacrifice in the public interest than most other professions. The military as a group must accept a higher degree of training, conditioning, and disciplining toward one objective—to provide military protection for the Nation. That is as it should be and those who enter the profession, like you men today, understand these conditions.

Like any other professional group the military in their dedication to their primary objective may tend to lose sight of other national objectives. It appears to me, consequently, that when the military in fact make policy decisions or when military techniques are excessively applied to carry out policies which can be more appropriately handled by civilian techniques, we are in danger of having military objectives and values emphasized at the expense of other, broader national objectives and values.

With respect to our basic foreign policy objectives, including military security itself, the expansion of the military role in foreign policy poses some more immediate dangers. Responsibility for our entire foreign policy, which is concerned with international economic, cultural, and political relations, as well as with military affairs, is vested in our Secretary of State. Our military objectives have no meaning in themselves except as

they tend to further our nonmilitary objectives. If they are given an independent meaning, if they become ends in themselves, we could easily be led into costly adventures which would only add to the financial and human burdens of the American people and which might ultimately result in widespread public reaction against the military. The best way to avoid a distorted emphasis on military objectives, the way that is provided under our constitutional system, is to require that final authority in foreign policy decision making remain unequivocally with the Secretary of State under the President of the United States.

In terms of our military security specifically, as distinguished from the wider range of foreign policy, it appears to me that a further danger exists. Our military experts may weaken their professional stature through overanxious acceptance of an increased role in policy matters.

In recent years military leaders have been brought into the limelight of public discussions of foreign policy largely as a result of their well-earned public prestige. Civilian political leaders have tended to rely heavily on this prestige gained through military accomplishments in order to support policies affecting our foreign policy. Generals and admirals have been called upon or sent to testify regularly before congressional committees, not only in connection with military appropriations and matters affecting the individual services, but also in connection with broad issues of policy, such as economic assistance programs and international alliances. Military officials, moreover, frequently discuss political issues—not necessarily partisan political issues, but issues of a political nature—at public appearances and press conferences. I may say at this point that the Marine Corps has been singularly free of this type of affliction. To the best of my knowledge, the leadership of the corps has successfully resisted the temptation to assert its expertness verbally and publicly not only in military matters but over the whole range of human affairs. Only an elected official, constantly beckoned by the siren call of the press, radio, and television, can appreciate the extraordinary degree of self-control that this represents. It is one more reason for me to be proud of my personal connection with the corps.

Now what is the danger to our security inherent in the exposure of military leaders—whether sought or unsought—to the political conflicts of the day? It is this: Military leaders who are so exposed will find themselves in agreement with one side of a political issue and at odds with the other. They will be applauded by political leaders whose position they uphold and looked upon with suspicion by their opponents. When military officers become subjects of partisan politics they are no longer viewed as unbiased, objective career servants, nor will their military judgments be accepted as those of politically disinterested professional experts. From that, it is only one step to the loss of confidence in the military judgment of our military leaders.

This central problem was clearly illustrated prior to the last presidential election when a Senator publicly called for a change in the membership of the Joint Chiefs of Staff. He had, he said lost confidence in their judgment. The new administration, moreover, subsequently did appoint new Joint Chiefs of Staff to take a new look at the military program. Surely we cannot have Republican generals and admirals for one administration and Democratic generals and admirals for the next without danger to the national security.

Now, possibly as never before, we cannot afford to play politics with our security. No political party, and no faction of a party, stands in the long run to benefit from military insecurity in this country. Certainly, the armed services as a whole do not.

In mentioning this tendency of some military officers to slip into or to be drawn into the political orbit of our system of government, I do not wish to imply that the military experts should have no contact with Congress. Certainly Congress has a right to know what our military experts think about military matters under consideration in Congress. The danger lies, not in this, but in military officers being employed as experts outside the area of their special competence in support of or in opposition to policy matters concerning which political and not military decision must be made.

There is no easy solution to this problem. Part of the answer lies in the restraint which civilian leaders must exercise to avoid placing military officials on the spot in political issues. Part of the answer must also lie in the fortitude with which military leaders resist the temptation to project themselves into nonmilitary questions.

This problem may seem remote to you men now, but within a short span of years as your careers unfold it may well become for some of you a most pressing and difficult one.

As I mentioned earlier, responsibility for maintaining the proper civilian-military balance in our system of government must be shared by both our military leaders and our civilian political leadership. The military must exercise the utmost restraint in policy matters, and our civilian leadership must be willing to take full responsibility for political decisions.

In foreign relations we need constantly to keep in mind the essential relationship of military force to total foreign policy. Military leaders as well as civilian foreign-policy officials must understand the supporting role of military force. Military resources, like other tools of foreign policy, must be available to our politically accountable civilian policymakers when, where, and under conditions prescribed by those policymakers. It is incumbent upon our policymakers that they should take full advantage of military advice; but when the time for decision-making comes, the civilian policymaker must make the choice and take full responsibility for that choice.

How can we preserve this principle and at the same time provide for our own military security? There are no hard and fast rules. There is only commonsense and a few guideposts appropriate to the present state of world affairs.

First, it is essential that we maintain the necessary military strength to meet the threat of Communist aggression.

At the same time, however, every effort should be made to use nonmilitary measures to conduct foreign policy wherever possible. They are less costly and often they can produce beneficial results that are more lasting in their effects. If we are to pursue them successfully, however, we must learn that every nonmilitary action in foreign policy is not an act of appeasement.

I would also suggest that if it becomes clear that we are tending away, rather than toward, a general war, we profit from long years of experience and place greater reliance on the Marine Corps as the military force to support our diplomacy in foreign policy. In saying this I am fully aware of the basic need for a multiservice fighting force in modern warfare. We share, I know, a great pride in the Marines and believe them capable of extraordinary feats. But we must admit that the corps has not yet rendered the Army, Navy, and Air Force obsolete.

Nevertheless, I still believe that the proper way to fight "brush fires" in various parts of the world is not with the forces trained for general warfare, but with the specially trained self-sustaining, combat-ready forces of the Marine Corps. No other military group is so well suited to immediate service in any part of the world. No other group is more competent to keep the expenditure of force close to the requirements for achieving limited objectives.

Finally, I want to say that the most important element in the preservation of the principle of civilian control of American foreign policy is to require that our civilian foreign-policy officials take full responsibility for decisions affecting foreign policy.

Your share in maintaining the proper role of the military in foreign policy is, it seems to me, to keep in mind that every action you take in your official capacities has a bearing on the foreign relations of the Nation. You will either contribute to the safety and well-being of the United States or you will detract from it; you cannot be neutral. And if you would contribute to it, as I know you wish to do, then you will maintain always a high sense of patriotic and professional responsibility in the fulfillment of your duties. You will find your personal satisfactions in your profession by understanding your part in the perspective of the corps, in the larger perspective of the armed services, and in the perspective of the total interests of our country.

The Decade Since Yalta

EXTENSION OF REMARKS

OF

HON. WILLIAM F. KNOWLAND

OF CALIFORNIA

IN THE SENATE OF THE UNITED STATES

Monday, February 21, 1955

Mr. KNOWLAND. Mr. President, I ask unanimous consent to have printed in the RECORD an address I delivered before the Western States Meat Packers Association in San Francisco on Friday last, February 18, 1955.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY SENATOR WILLIAM F. KNOWLAND BEFORE THE WESTERN STATES MEAT PACKERS ASSOCIATION, SAN FRANCISCO, FEBRUARY 18, 1955

THE DECADE SINCE YALTA

Mr. Chairman, fellow Americans, 10 years ago 2 conferences of far-reaching significance took place. The first was Yalta held from February 4 to 11, 1945. Its locale was the Crimean Peninsula within the Soviet Union.

Three great powers were represented. These were the United States of America, Great Britain, and the Soviet Union.

The second one was the United Nations Conference held in San Francisco from April 25 to June 26, 1945. At that time 50 nations signed the charter and since then 10 additional nations have done so bringing the total membership to 60.

In that same 10-year period of time to which I have referred, international communism has increased its power, its area and its population. Ten years ago at this time there were less than 200 million people behind the Communist Iron Curtain. Today over 800 million people live under the most ruthless, godless tyranny the world has ever known.

The world balance of power has been so upset that no prudent person can ignore the realities of the situation. Not only the future of this Republic but the hope for a free world of free men largely depends upon the policies that we follow and the firmness with which we and the free nations deal with future Communist aggression or threat of aggression.

Recognizing the inherent danger in further Communist conquest, the Government

of the United States has undertaken a series of commitments under the North Atlantic Alliance, the ANZUS (Australia, New Zealand, United States) mutual-defense pact and mutual-defense pacts with the Republic of the Philippines, the Republic of Korea, Japan, Southeast Asia, and the Republic of China.

The last two treaties were overwhelmingly ratified by the Senate this month.

The Manila pact covering Southeast Asia was ratified on Tuesday, February 1, by a vote of 82 to 1, and the one with the Republic of China on Wednesday, February 9, by a vote of 64 to 6. These two ratifications were preceded by congressional action in support of the joint resolution recommended by the President authorizing him to use the Armed Forces of the United States in defense of Formosa, the Pescadores, and additional areas now in friendly hands that might be deemed important for the proper defense of the main bastion of Formosa.

In a display of national unity that should have encouraged our friends abroad, given courage to the neutrals and opened the eyes of the would-be aggressor, the House of Representatives passed the resolution by a vote of 410 to 3 and the Senate by a vote of 85 to 3.

This action had no sooner been taken and the two treaties ratified than diplomatic moves started on the part of certain Asian and European powers to bend the line of defense in the Pacific and lay the groundwork for a conference which would have all the unfortunate results of a Munich, a Yalta or a Geneva wherein the aggressor gains his objectives at the conference table.

Unfortunately, the history of these conferences has been that it is always the free world that gives up territory and surrenders human beings to the control of the Communists. It is never the other way around wherein the enslaved people gain their freedom.

It becomes pertinent, therefore, to examine the various proposals that have been made and what their implications are.

In order to deal with these matters, however, let us first examine the Yalta conference and the significance it had in the events which followed.

At Yalta without the knowledge or consent of the American people or the American Congress, an agreement was entered into which on its face violated the Atlantic Charter declaration and was fatally damaging to our friend and ally, the Republic of China.

Years later, in testimony, Alger Hiss, who had been one of the members of the American delegation stated:

"It is an accurate and not immodest statement to say that I helped formulate the Yalta agreement to some extent.".

1. The agreement undercut the free Polish Government in exile and resulted in solidifying the power of the Lublin Communist Polish Government.

2. It carved out of Poland a slice of territory and gave the blessing of Great Britain and the United States on this territorial addition to the Soviet Union.

3. It provided for the use of German labor in the Soviet Union and under Kremlin practices this is closely akin to slave labor.

4. It laid the foundation for the turning over of large numbers of non-Communist Russians to the Soviet Union. Vast numbers of these were executed or sent to slave labor camps in Siberia.

5. It provided that certain areas within the Republic of China should be turned over to the Soviet Union as part of a deal to bring them into the Japanese war though they had twice before promised to come in prior to the Crimean Conference. These included the ports of Dairen and Port Arthur; gave the Soviet Union its former economic rights in the China Eastern Railroad and South Manchuria Railroad; guaranteed the status quo in outer Monogolia (the Mongolian People's Republic) and pledged that President Roosevelt "will take measures to obtain this concurrence on advice from Marshal Stalin." It did this without the knowledge or consent of the Government of the Republic of China or its President Chiang Kai-shek. It further pledged "the heads of the three great powers have agreed that these claims of the Soviet Union shall be unquestionably fulfilled after Japan had been defeated."

With sort of a grim humor the Yalta agreement protocol regarding the Far East concluded by stating:

"For its part the Soviet Union expresses its readiness to conclude with the Nationalist Government of China a pact of friendship and alliance. * * *"

It was not until many months later that either the Government of China or the Congress of the United States found out the terms of this agreement. The foundation laid by this agreement has contributed greatly to the loss of freedom in Eastern Europe and in China.

Under the terms of the Yalta agreement the Soviet Union did come into the war against Japan. They came in 5 days before the Japanese surrendered and occupied Manchuria and North Korea. In North Korea they promptly laid the groundwork for a divided country and the ultimate events leading to the outbreak of the Korean war which was precipitated by their satellite North Korean Communist government.

In China, despite the Soviet pledges regarding its dealings with the Republic of China, the Soviet Union proceeded to arm and equip the Chinese Communists under the leadership of Chou En-lai and Mao Tse Tung by allowing them to take over the stocks of captured Japanese equipment estimated to have been sufficient to arm and equip 1 million men for 5 years.

While much more could be said, the sorry story of Yalta gives a clear understanding of why the Communist world wants to get us involved in another conference through which they can gain their objectives.

Now let us turn to the San Francisco United Nations conference of 10 years ago.

World War II had not yet terminated. The people of the world did not know that we were on the threshold of the atomic age through those high in Government had reason to believe a vast new power that ultimately could be used for destructive or constructive purposes was soon to be unveiled.

Hopes were high everywhere that the Soviet Union, though a dictatorship, had learned the folly of aggression and of war and because of the vast help given by the free world to them they would be willing to help establish a system of international law and order to preserve the peace of the world for ourselves and our children.

Unfortunately, both during the San Francisco Conference and in the 10 years that have followed, a vast propaganda effort has taken place to build the United Nations into something which its charter provisions could not or did not permit it to become. In the United Nations different people envisioned different things.

Some envisioned it as a mighty force of collective security that would rally most of the nations of the world to resist aggression and preserve the peace. In moments of oratorical fancy some even suggested that the fact the United Nations was in being would warrant free nations to scrap most, if not all, of their armed forces and place their reliance upon the police power of the United Nations and the collective moral persuasion of that organization. On June 25, 1950, this concept was shattered shortly after it appeared to be confirmed.

When the Communist forces crossed the 38th parallel, the United Nations Security Council promptly acted and first called upon the Communist aggressor to cease the aggression. The Communists, of course, forthwith showed they were not impressed by a United Nations resolution or the adverse moral reaction of that organization. The Security Council next called on the 60 members of that organization to give aid and support to the victim of the aggression, the Republic of Korea.

What is the record on this? After 3 years of the Korean war, of the 60 members of the United Nations, only 17 contributed a single soldier, sailor, or airman to the resistance of aggression. Outside of the United States of America, the other 16 contributed armed forces in the amount of 45,000. The United States of America alone contributed more than 450,000 and we rotated more than 1 million men through the Korean threater of war. The little Republic of Korea, which was the victim of the aggression, supplied over 600,000.

This means that of the United Nations members the United States of America supplied more than 90 percent of the manpower and better than 90 percent of the resources.

When the forces of the Republic of Korea, not being a member of the United Nations (having been kept out by a Soviet veto), are added to those of the United States, it means that our two nations alone supplied better than 95 percent of the manpower.

Does this indicate that the United Nations is an effective instrument of collective security? The answer must come back in the negative.

With that example are you prepared to risk the future of our Nation and the safety of our people upon the collective ability of the United Nations to function in the event of aggression? The answer likewise must be in the negative.

Has the time not come for a realistic appraisal of just what part the United Nations is qualified to play and to stop kidding ourselves into believing it is something it is not, and in my judgment, cannot be?

There are some who have envisioned the United Nations as a world state to which openly or clandestinely, individual nations would surrender their sovereignty. Some of the more enthusiastic proponents of this type of superstate compared the San Francisco meeting with that of our own Constitutional convention at Philadelphia. Of course, the two gatherings are not comparable for the building of a government upon which man might depend for the protection of his life, his liberty, his economic, and his intellectual freedom.

In the first place, those who met at Philadelphia spoke a common language and had a common heritage. True, they had come from different areas of the world, but they or their predecessors had come seeking a new way of life, freedom from old-world tyranny or a desire to worship God according to the dictates of their own consciences.

They had fought a common battle against the mightiest empire of that time. They had carried over from the old country the background of the Magna Carta and of representative government. They had had experience, some of it not too satisfactory, under the Articles of Confederation, and with that background, under what I believe was divine inspiration, drafted the greatest document produced by the mind and hand of man for his self-government and protection of his rights. A little more realistic understanding of the history of the nations gathered in San Francisco should have made it clear that the organization could not be and should not be considered a basis for world government.

There is no common language or common heritage. Nations which have had no experience with representative constitutional government sit on equal terms with those that have had long experience. Nations of less than 1 million have equal representation with those of over 300 million. The

Soviet Union, which is perhaps the most tyrannical government since Western civilization entered the modern era, sits as an equal partner with nations with long-established constitutions of law, order, and a respect of the rights of man. Now, there are those who urge the admission of Communist China which was the aggressor in the Korean war. This, together with the other Communist states, would give that system of tyranny over 800 million people that they claim to speak for.

As for me, as long as I have a voice or a vote in the Senate of the United States, I shall never consent to permitting the guaranties of freedom under our Constitution being diluted or modified directly or indirectly by any organization having in powerful policy positions nations which have no appreciation of or respect for free institutions.

Lest we be gradually edged into such a world state before we learn too late wherein we have been taken, I believe that every candidate for public office—executive, legislative, or judicial—should be asked to give a forthright view upon this great public issue.

The United Nations, if it does not destroy its moral position by actions which I shall mention, does have a function it could perform. It could be a forum wherein the views of the free world and the Communist world might be aired to the benefit of the peoples of the world, provided that there was assurance the debates in the General Assembly or the Security Council were receiving as widespread coverage behind the Iron Curtain as they do in the free nations of the world. Otherwise it becomes a vast propaganda forum for the Communist world wherein the point of view of the West does not have the equal opportunity to get to the people in the Soviet Union and its satellites because of the strict censorship those governments exercise.

Even in regard to its position of moral leadership, the United Nations has allowed itself to become seriously compromised.

Following the intervention of Communist China into the Korean war, the United Nations, after great hesitation, declared Communist China the aggressor. There had been no such hesitation when the small aggressor Communist Korea crossed the 38th parallel in June of 1950.

To close observers this seemed to indicate that there would be alacrity to pass a resolution and to act against a small aggressor, but there would be procrastination and delay in acting against a large aggressor. This seemed to be an abandonment of principle for expediency.

Later, when the evidence was conclusive that the Soviet Union was not only giving moral support to Communist aggression in Korea but was supplying MIG planes, tanks, artillery, ammunition, and other weapons in clear violation of the United Nations resolution and the charter of the organization no steps were taken to expel the Soviet Union from the United Nations.

Later on, the official representative of the Soviet Union baldly and boldly admitted the fact that such support had been given and in effect defied the United Nations to do anything about it. They did nothing.

Every member of the United Nations knows that the terms of the Korean armistice have been violated on numerous occasions. The Neutral Nations Commission is not allowed to function in Communist North Korea as it was intended though they have complete freedom in the area of the free Republic of Korea. In violation of the terms of the armistice the Communists have brought in equipment and built military air fields.

The most flagrant violation has been the admitted holding of 15 members of the American Air Force, 11 of whom have been sentenced to prison terms of from 4 to 10 years. Under the terms of the armistice it was required that all prisoners of war who wanted to be returned should be allowed to do so.

There is strong reason to believe that there are at least several hundred additional United Nations and United States prisoners of war being held in violation of the terms of the armistice.

United Nations passed a resolution expressing its concern in this matter. The Secretary General, Mr. Hammarskjold, made a special trip to Peking. He returned without the release of the prisoners and without any date upon which they might be expected to be returned in the future. It is apparent that they are being held for the purposes of international blackmail on the part of the Chinese Communists.

Impotent and paralyzed, the United Nations Security Council and General Assembly has taken no effective steps to enforce compliance in accordance with terms of the Korean armistice.

In the matter of the Chinese Communist aggression against the Republic of China which is a charter member of the United Nations, that Organization invited the Chinese Communists to come to New York to discuss a cease-fire.

Arrogantly, the Chinese Communists laid down terms that a victor would be expected to lay down to the vanquished—namely, that the Republic of China should be removed from the Security Council and that the Soviet Union resolution condemning the United States should be made the order of business rather than the New Zealand resolution relative to a cease-fire.

When this message was received, the United Nations again demonstrated its ineffectiveness by postponing the whole situation while some of the neutralist friends of the Soviet Union and Red China are trying through diplomatic channels to provide for a Far-Eastern Munich whereby the Chinese Communists will be given the key coastal islands of Quemoy and Matsu. This, of course, would be another defeat for the free world and throughout all of Asia looked upon as another victory for the Communists, comparable to that growing out of the Geneva conference wherein the Communists gained control of northern Vietnam and 15 million more human beings.

These are not pleasant facts, and there are many in this country and elsewhere who, because of the vast amount of publicity and propaganda, have gotten a distorted view of the capabilities of the United Nations Organization.

Certainly in this day and age of the airplane and the atomic weapon, a nation can no more return to isolationism than an adult can return to childhood.

It is important that we have a system of effective collective security and to demonstrate to the Communist world that there will be no further retreats or the abandonment of free people into Communist hands.

This Nation will live up to all of its treaty obligations, and we have the right to expect that our allies will do likewise.

I have a deep conviction that the American people and those throughout the free world who understand the dangers facing us, will never again pay the price of another Yalta or another Geneva in order to buy a temporary respite from the insatiable appetite of international Communists to destroy human freedom.

SENATE

TUESDAY, FEBRUARY 22, 1955

The Chaplain, Rev. Frederick Brown Harris, D. D., offered the following prayer:

O Thou Master of all good workmen, with reverent hearts this day on which, in the swift current of the year, the Republic pauses in grateful remembrance, we come with but one human name upon our lips: We lift our Te Deum for Thy servant, George Washington, whose unsullied record and towering personality rise still above all that is soiled and sordid, even as the white shaft in the National City which bears his name is lifted above all that is of the earth earthy.

Today, as again in this hallowed Chamber we listen to his wise and deathless parting words, words of moral wisdom and elevated patriotism, may we be conscious that he emerges before us from the crowded years since he fell on sleep. We would see him as he stands in lofty reserve, with impassive dignity that no one dared to violate; yet courteous and considerate, conciliatory and patient; ever ready to listen to reason, seeking light from any quarter; the embodiment of both virtue and power, ever scorning selfish scramble for plunder or place. We would keep his memory and deeds perpetually fresh in the minds of the favored citizens of the great Nation which calls him father.

Like him, may those who serve in the ministry of public affairs be conscious of a divine mission, acting always from the severest sense of duty, indifferent to praise or blame, devoid of jealousy, unswayed by passion or prejudice. Thus may they, like him, labor on valiantly and patiently, through evil and good report, to the final coronation of freedom and of truth. We ask it in the name of the Lord whom he adored. Amen.

THE JOURNAL

On request of Mr. CLEMENTS, and by unanimous request, the reading of the Journal of the proceedings of Monday, February 21, 1955, was dispensed with.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the Senate by Mr. Miller, one of his secretaries.

READING OF WASHINGTON'S FAREWELL ADDRESS

The PRESIDENT pro tempore. Under the order of the Senate of January 24, 1901, Washington's Farewell Address will now be read by the senior Senator from Connecticut [Mr. BUSH], who has been heretofore designated by the Vice President for that purpose.

Mr. BUSH advanced to the desk, and read the Farewell Address, as follows:

To the people of the United States:

FRIENDS AND FELLOW CITIZENS: The period for a new election of a citizen to administer the executive government of the United States being not far distant, and the time actually arrived when your thoughts must be employed in designating the person who is to be clothed with that important trust, it appears to

me proper, especially as it may conduce to a more distinct expression of the public voice, that I should now apprise you of the resolution I have formed, to decline being considered among the number of those, out of whom a choice is to be made.

I beg you, at the same time, to do me the justice to be assured, that this resolution has not been taken, without a strict regard to all the considerations appertaining to the relation which binds a dutiful citizen to his country; and that, in withdrawing the tender of service which silence in my situation might imply, I am influenced by no diminution of zeal for your future interest; no deficiency of grateful respect for your past kindness; but am supported by a full conviction that the step is compatible with both.

The acceptance of, and continuance hitherto in the office to which your suffrages have twice called me, have been a uniform sacrifice of inclination to the opinion of duty, and to a deference for what appeared to be your desire. I constantly hoped that it would have been much earlier in my power, consistently with motives which I was not at liberty to disregard, to return to that retirement from which I had been reluctantly drawn. The strength of my inclination to do this, previous to the last election, had even led to the preparation of an address to declare it to you; but mature reflection on the then perplexed and critical posture of our affairs with foreign nations, and the unanimous advice of persons entitled to my confidence, impelled me to abandon the idea.

I rejoice that the state of your concerns, external as well as internal, no longer renders the pursuit of inclination incompatible with the sentiment of duty or propriety; and am persuaded, whatever partiality may be retained for my services, that in the present circumstances of our country, you will not disapprove my determination to retire.

The impressions with which I first undertook the arduous trust, were explained on the proper occasion. In the discharge of this trust, I will only say that I have, with good intentions, contributed towards the organization and administration of the government, the best exertions of which a very fallible judgment was capable. Not unconscious in the outset, of the inferiority of my qualifications, experience, in my own eyes, perhaps still more in the eyes of others, has strengthened the motives to diffidence of myself; and, every day, the increasing weight of years admonishes me more and more, that the shade of retirement is as necessary to me as it will be welcome. Satisfied that if any circumstances have given peculiar value to my services they were temporary, I have the consolation to believe that, while choice and prudence invite me to quit the political scene, patriotism does not forbid it.

In looking forward to the moment which is to terminate the career of my political life, my feelings do not permit me to suspend the deep acknowledgment of that debt of gratitude which I owe to my beloved country, for the many honors it has conferred upon me; still more for the steadfast confidence with which it has supported me; and for the opportunities I have thence enjoyed of manifesting my inviolable attachment by services faithful and persevering, though in usefulness unequal to my zeal. If benefits have resulted to our country from these services, let it always be remembered to your praise, and as an instructive example in our annals, that under circumstances in which the passions, agitated in every direction, were liable to mislead amidst appearances sometimes dubious, vicissitudes of fortune often discouraging—in situations in which not unfrequently, want of success has countenanced the spirit of criticism,—the constancy of your support was the essential prop of the efforts, and a guarantee of the plans, by which they were effected. Profoundly penetrated with this idea, I shall carry it with me to my grave, as a strong incitement to unceasing vows that heaven may continue to you the choicest tokens of its beneficence—that your union and brotherly affection may be perpetual—that the free constitution, which is the work of your hands, may be sacredly maintained—that its administration in every department may be stamped with wisdom and virtue—that, in fine, the happiness of the people of these states, under the auspices of liberty, may be made complete by so careful a preservation, and so prudent a use of this blessing, as will acquire to them the glory of recommending it to the applause, the affection and adoption of every nation which is yet a stranger to it.

Here, perhaps, I ought to stop. But a solicitude for your welfare, which cannot end but with my life, and the apprehension of danger, natural to that solicitude, urge me, on an occasion like the present, to offer to your solemn contemplation, and to recommend to your frequent review, some sentiments which are the result of much reflection, of no inconsiderable observation, and which appear to me all important to the permanency of your felicity as a people. These will be offered to you with the more freedom, as you can only see in them the disinterested warnings of a parting friend, who can possibly have no personal motive to bias his counsel. Nor can I forget, as an encouragement to it, your indulgent reception of my sentiments on a former and not dissimilar occasion.

Interwoven as is the love of liberty with every ligament of your hearts, no recommendation of mine is necessary to fortify or confirm the attachment.

The unity of government which constitutes you one people, is also now dear to you. It is justly so; for it is a main pillar in the edifice of your real independence; the support of your tranquility at home; your peace abroad; of your safety; of your prosperity; of that very liberty which you so highly prize. But as it is easy to foresee that, from different causes and from different quarters much pains will be taken, many artifices employed, to weaken in your minds the conviction of this truth, as this is the point in your political fortress against which the batteries of internal and external enemies will be most constantly and actively (though often covertly and insidiously) directed; it is of infinite moment, that you should properly estimate the immense value of your national union to your collective and individual happiness; that you should cherish a cordial, habitual, and immovable attachment to it; accustoming yourselves to think and speak of it as the palladium of your political safety and prosperity; watching for its preservation with jealous anxiety; discountenancing whatever may suggest even a suspicion that it can, in any event, be abandoned; and indignantly frowning upon the first dawning of every attempt to alienate any portion of our country from the rest, or to enfeeble the sacred ties which now link together the various parts.

For this you have every inducement of sympathy and interest. Citizens by birth, or choice, of a common country, that country has a right to concentrate your affections. The name of American, which belongs to you in your national capacity, must always exalt the just pride of patriotism, more than any appellation derived from local discriminations. With slight shades of difference, you have the same religion, manners, habits, and political principles. You have, in a common cause, fought and triumphed together; the independence and liberty you possess, are the work of joint counsels, and joint efforts, of common dangers, suffering, and successes.

But these considerations, however powerfully they addressed themselves to your sensibility, are greatly outweighed by those which apply more immediately to your interest.—Here, every portion of our country finds the most commanding motives for carefully guarding and preserving the union of the whole.

The *north*, in an unrestrained intercourse with the *south*, protected by the equal laws of a common government, finds in the productions of the latter, great additional resources of maritime and commercial enterprise, and precious materials of manufacturing industry.—The *south* in the same intercourse, benefiting by the same agency of the *north*, sees its agriculture grow and its commerce expand. Turning partly into its own channels the seamen of the *north*, it finds its particular navigation invigorated; and while it contributes, in different ways, to nourish and increase the general mass of the national navigation, it looks forward to the protection of a maritime strength, to which itself is unequally adapted. The *east*, in a like intercourse with the *west*, already finds, and in the progressive improvement of interior communications by land and water, will more and more find a valuable vent for the commodities which it brings from abroad, or manufactures at home. The *west* derives from the *east* supplies requisite to its growth and comfort—and what is perhaps of still greater consequence, it must of necessity owe the *secure* enjoyment of indispensable *outlets* for its own productions, to the weight, influence, and the future maritime strength of the Atlantic side of the Union, directed by an indissoluble community of interest as *one nation*. Any other tenure by which the *west* can hold this essential advantage, whether derived from its own separate strength; or

from an apostate and unnatural connection with any foreign power, must be intrinsically precarious.

While then every part of our country thus feels an immediate and particular interest in union, all the parts combined cannot fail to find in the united mass of means and efforts, greater strength, greater resource, proportionably greater security from external danger, a less frequent interruption of their peace by foreign nations; and, what is of inestimable value, they must derive from union, an exemption from those broils and wars between themselves, which so frequently afflict neighboring countries not tied together by the same government; which their own rivalship alone would be sufficient to produce, but which opposite foreign alliances, attachments, and intrigues, would stimulate and embitter. Hence likewise, they will avoid the necessity of those overgrown military establishments, which under any form of government are inauspicious to liberty, and which are to be regarded as particularly hostile to republican liberty. In this sense it is, that your union ought to be considered as a main prop of your liberty, and that the love of the one ought to endear to you the preservation of the other.

These considerations speak a persuasive language to every reflecting and virtuous mind and exhibit the continuance of the union as a primary object of patriotic desire. Is there a doubt whether a common government can embrace so large a sphere? let experience solve it. To listen to mere speculation in such a case were criminal. We are authorized to hope that a proper organization of the whole, with the auxiliary agency of governments for the respective subdivisions, will afford a happy issue to the experiment. It is well worth a fair and full experiment. With such powerful and obvious motives to union, affecting all parts of our country, while experience shall not have demonstrated its impracticability, there will always be reason to distrust the patriotism of those who, in any quarter, may endeavor to weaken its hands.

In contemplating the causes which may disturb our Union, it occurs as matter of serious concern, that any ground should have been furnished for characterizing parties by *geographical* discriminations,—*northern* and *southern*—*Atlantic* and *western;* whence designing men may endeavor to excite a belief that there is a real difference of local interests and views. One of the expedients of party to acquire influence within particular districts, is to misrepresent the opinions and aims of other districts. You cannot shield yourselves too much against the jealousies and heart burnings which spring from these misrepresentations; they tend to render alien to each other those who ought to be bound together by fraternal affection. The inhabitants of our western country have lately had a useful lesson on this head; they have seen, in the negotiation by the executive, and in the unanimous ratification by the senate of the treaty with Spain, and in the universal satisfaction at the event throughout the United States, a decisive proof how unfounded were the suspicions propagated among them of a policy in the general government and in the Atlantic states, unfriendly to their interests in regard to the Mississippi. They have been witnesses to the formation of two treaties, that with Great Britain and that with Spain, which secure to them everything they could desire, in respect to our foreign relations, towards confirming their prosperity. Will it not be their wisdom to rely for the preservation of these advantages on the union by which they were procured? will they not henceforth be deaf to those advisers, if such they are, who would sever them from their brethren and connect them with aliens?

To the efficacy and permanency of your Union, a government for the whole is indispensable. No alliances, however strict, between the parts can be an adequate substitute; they must inevitably experience the infractions and interruptions which all alliances, in all times, have experienced. Sensible of this momentous truth, you have improved upon your first essay, by the adoption of a constitution of government, better calculated than your former, for an intimate union, and for the efficacious management of your common concerns. This government, the offspring of our own choice, uninfluenced and unawed, adopted upon full investigation and mature deliberation, completely free in its principles, in the distribution of its powers, uniting security with energy, and maintaining within itself a provision for its own amendment, has a just claim to your confidence and your support. Respect for its authority, compliance with its laws, acquiescence in its measures, are duties enjoined by the fundamental maxims of true liberty. The basis of our political systems is the right of the people to make and to alter their constitutions of government.—But the constitution which at any time exists, until changed by an explicit and authentic act of the whole people, is sacredly obligatory upon all. The very idea of the power, and the right of the people to establish government, presuppose the duty of every individual to obey the established government.

All obstructions to the execution of the laws, all combinations and associations under whatever plausible character, with the real design to direct, control, counteract, or awe the regular deliberations and action of the constituted authorities, are destructive of this fundamental principle, and of fatal tendency.—They serve to organize faction, to give it an artificial and extraordinary force, to put in the place of the delegated will of the nation the will of party, often a small but artful and enterprising minority of the community; and, according to the alternate triumphs of different parties, to make the public administration the mirror of the ill concerted and incongruous projects of faction, rather than the organ of consistent and wholesome plans digested by common councils, and modified by mutual interests.

However combinations or associations of the above description may now and then answer popular ends, they are likely, in the course of time and things, to become potent engines, by which cunning, ambitious, and unprincipled men, will be enabled to subvert the power of the people, and to usurp for themselves the reins of government; destroying afterwards the very engines which have lifted them to unjust dominion.

Towards the preservation of your government and the permanency of your present happy state, it is requisite, not only, that you steadily discountenance irregular opposition to its acknowledged authority, but also that you resist with care the spirit of innovation upon its principles, however specious the pretext. One method of assault may be to effect, in the forms of the constitution, alterations which will impair the energy of the system; and thus to undermine what cannot be directly overthrown. In all the changes to which you may be involved, remember that time and habit are at least as necessary to fix the true character of governments, as of other human institutions:—that experience is the surest standard by which to test the real tendency of the existing constitution of a country:—that facility in changes, upon the credit of mere hypothesis and opinion, exposes to perpetual change from the endless variety of hypothesis and opinion: and remember, especially, that for the efficient management of your common interests in a country so extensive as ours, a government of as much vigor as is consistent with the perfect security of liberty is indispensable. Liberty itself will find in such a government, with powers properly distributed and adjusted, its surest guardian. It is, indeed, little else than a name, where the government is too feeble to withstand the enterprises of faction, to confine each member of the society within the limits prescribed by the laws, and to maintain all in the secure and tranquil enjoyment of the rights of person and property.

I have already intimated to you the danger of parties in the state, with particular references to the founding them on geographical discrimination. Let me now take a more comprehensive view, and warn you in the most solemn manner against the baneful effects of the spirit of party generally.

This spirit, unfortunately, is inseparable from our nature, having its root in the strongest passions of the human mind.—It exists under different shapes in all governments, more or less stifled, controlled, or repressed; but in those of the popular form it is seen in its greatest rankness, and is truly their worst enemy.

The alternate domination of one faction over another, sharpened by the spirit of revenge natural to party dissension, which in different ages and countries has perpetrated the most horrid enormities, is itself a frightful despotism. But this leads at length to a more formal and permanent despotism. The disorders and miseries which result, gradually incline the minds of men to seek security and repose in the absolute power of an individual; and, sooner or later, the chief of some prevailing faction, more able or more fortunate than his competitors, turns this disposition to the purpose of his own elevation on the ruins of public liberty.

Without looking forward to an extremity of this kind, (which nevertheless ought not to be entirely out of sight) the common and continual mischiefs of the spirit or party are sufficient to make it the interest and duty of a wise people to discourage and restrain it.

It serves always to distract the public councils, and enfeeble the public administration. It agitates the community with ill founded jealousies and false alarms; kindles the animosity of one part against another; foments occasional riot and insurrection. It opens the door to foreign influence and corruption, which finds a facilitated access to the government itself through the channels of party passions. Thus the policy and the will of one country are subjected to the policy and will of another.

There is an opinion that parties in free countries are useful checks upon the administration of the government, and serve to keep alive the spirit of liberty. This within certain limits is probably true; and in governments of a monarchial cast, patriotism may look with indulgence, if not with favor, upon the spirit of party. But in those of the popular character, in governments purely elective, it is a spirit not to be encouraged. From their natural tendency, it is certain there will always be enough of that spirit for every salutary purpose. And there being constant danger of excess, the effort ought to be, by force of public opinion, to mitigate and assuage it. A fire not to be quenched, it demands a uniform vigilance to prevent it bursting into a flame, lest instead of warming, it should consume.

It is important likewise, that the habits of thinking in a free country should inspire caution in those intrusted with its administration, to confine themselves within their respective constitutional spheres, avoiding in the exercise of the powers of one department, to encroach upon another. The spirit of encroachment tends to consolidate the powers of all the departments in one, and thus to create, whatever the form of government, a real despotism. A just estimate of that love of power and proneness to abuse it which predominate in the human heart, is sufficient to satisfy us of the truth of this position. The necessity of reciprocal checks in the exercise of political power, by dividing and distributing it into different depositories, and constituting each the guardian of the public weal against invasion of the others, has been evinced by experiments ancient and modern; some of them in our country and under our own eyes.—To preserve them must be as necessary as to institute them. If, in the opinion of the people, the distribution or modification of the constitutional powers be in any particular wrong, let it be corrected by an amendment in the way which the constitution designates.—But let there be no change by usurpation; for though this, in one instance, may be the instrument of good, it is the customary weapon by which free governments are destroyed. The precedent must always greatly overbalance in permanent evil any partial or transient benefit which the use can at any time yield.

Of all the dispositions and habits which lead to political prosperity, religion and morality are indispensable supports. In vain would that man claim the tribute of patriotism, who should labor to subvert these great pillars of human happiness, these firmest props of the duties of men and citizens. The mere politician, equally with the pious man, ought to respect and to cherish them. A volume could not trace all their connections with private and public felicity. Let it simply be asked, where is the security for property, for reputation, for life, if the sense of religious obligation *desert* the oaths which are the instruments of investigation in courts of justice? And let us with caution indulge the supposition that morality can be maintained without religion. Whatever may be conceded to the influence of refined education on minds of peculiar structure, reason and experience both forbid us to expect, that national morality can prevail in exclusion of religious principle.

It is substantially true, that virtue or morality is a necessary spring of popular government. The rule, indeed extends with more or less force to every species of free government. Who that is a sincere friend to it can look with indifference upon attempts to shake the foundation of the fabric?

Promote, then, as an object of primary importance, institutions for the general diffusion of knowledge. In proportion as the structure of a government gives force to public opinion, it should be enlightened.

As a very important source of strength and security, cherish public credit. One method of preserving it is to use it as sparingly as possible, avoiding occasions of expense by cultivating peace, but remembering, also, that timely disbursements, to prepare for danger, frequently prevent much greater disbursements to repel it; avoiding likewise the accumulation of debt, not only by shunning occasions of expense, but by vigorous exertions, in time of peace, to discharge the debts which unavoidable wars may have occasioned, not ungenerously throwing upon posterity the burden which we ourselves ought to bear. The execution of these maxims belongs to your representatives, but it is necessary that public opinion should cooperate. To facilitate to them the performance of their duty, it is essential that you should practically bear in mind, that towards the payment of debts there must be revenue; that to have revenue there must be taxes, that no taxes can be devised which are not more or less inconvenient and unpleasant; that the intrinsic embarrassment inseparable from the selection of the proper object (which is always a choice of difficulties), ought to be a decisive motive for a candid construction of the conduct of the government in making it, and for a spirit of acquiescence in the measures for obtaining revenue, which the public exigencies may at any time dictate.

Observe good faith and justice towards all nations; cultivate peace and harmony with all. Religion and morality enjoin this conduct, and can it be that good policy does not equally enjoin it? It will be worthy of a free, enlightened, and, at no distant period, a great nation, to give to mankind the magnanimous and too novel example of a people always guided by an exalted justice and benevolence. Who can doubt but, in the course of time and things, the fruits of such a plan would richly repay any temporary advantages which might be lost by a steady adherence to it; can it be that Providence has not connected the permanent felicity of a nation with its virtue? The experiment, at least is recommended by every sentiment which ennobles human nature. Alas! is it rendered impossible by its vices?

In the execution of such a plan, nothing is more essential than that permanent, inveterate antipathies against particular nations and passionate attachments for others, should be excluded; and that in place of them, just and amicable feelings towards all should be cultivated. The nation which indulges towards another an habitual hatred, or an habitual fondness, is in some degree a slave. It is a slave to its animosity or to its affection, either of which is sufficient to lead it astray from its duty and its interest. Antipathy in one nation against another disposes each more readily to offer insult and injury, to lay hold of slight causes of umbrage, and to be haughty and intractable when accidental or trifling occasions of dispute occur. Hence, frequent collisions, obstinate, envenomed, and bloody contests. The nation, prompted by ill will and resentment, sometimes impels to war the government, contrary to the best calculations of policy. The government sometimes participates in the national propensity, and adopts through passion what reason would reject; at other times, it makes the animosity of the nation subservient to projects of hostility, instigated by pride, ambition, and other sinister and pernicious motives. The peace often, sometimes perhaps the liberty of nations, has been the victim.

So likewise, a passionate attachment of one nation for another produces a variety of evils. Sympathy for the favorite nation, facilitating the illusion of an imaginary common interest, in cases where no real common interest exists, and infusing into one the enmities of the other, betrays the former into a participation in the quarrels and wars of the latter, without adequate inducements or justifications. It leads also to concessions, to the favorite nation, of privileges denied to others, which is apt doubly to injure the nation making the concessions, by unnecessary parting with what ought to have been retained, and by exciting jealousy, ill will, and a disposition to retaliate in the parties from whom equal privileges are withheld; and it gives to ambitious, corrupted or deluded citizens who devote themselves to the favorite nation, facility to betray or sacrifice the interests of their own country, without odium, sometimes even with popularity; gilding with the appearances of a virtuous sense of obligation, a commendable deference for public opinion, or a laudable zeal for public good, the base or foolish compliances of ambition, corruption, or infatuation.

As avenues to foreign influence in innumerable ways, such attachments are

particularly alarming to the truly enlightened and independent patriot. How many opportunities do they afford to tamper with domestic factions, to practice the arts of seduction, to mislead public opinion, to influence or awe the public councils!—Such an attachment of a small or weak. towards a great and powerful nation, dooms the former to be the satellite of the latter.

Against the insidious wiles of foreign influence, (I conjure you to believe me fellow citizens,) the jealousy of a free people ought to be *constantly* awake; since history and experience prove, that foreign influence is one of the most baneful foes of republican government. But that jealousy, to be useful, must be impartial, else it becomes the instrument of the very influence to be avoided, instead of a defense against it. Excessive partiality for one foreign nation and excessive dislike for another, cause those whom they actuate to see danger only on one side, and serve to veil and even second the arts of influence on the other. Real patriots, who may resist the intrigues of the favorite, are liable to become suspected and odious; while its tools and dupes usurp the applause and confidence of the people, to surrender their interest.

The great rule of conduct for us, in regard to foreign nations, is, in extending our commercial relations, to have with them as little *political* connection as possible. So far as we have already formed engagements, let them be fulfilled with perfect good faith: Here let us stop.

Europe has a set of primary interests, which to us have none, or a very remote relation. Hence, she must be engaged in frequent controversies, the causes of which are essentially foreign to our concerns. Hence, therefore, it must be unwise in us to implicate ourselves, by artificial ties, in the ordinary vicissitudes of her politics, or the ordinary combinations and collusions of her friendships or enmities.

Our detached and distant situation invites and enables us to pursue a different course. If we remain one people, under an efficient government, the period is not far off when we may defy material injury from external annoyance; when we may take such an attitude as will cause the neutrality we may at any time resolve upon, to be scrupulously respected; when belligerent nations, under the impossibility of making acquisitions upon us will not lightly hazard the giving us provocation, when we may choose peace or war, as our interest, guided by justice, shall counsel.

Why forego the advantages of so peculiar a situation? Why quit our own to stand upon foreign ground? Why, by interweaving our destiny with that of any part of Europe, entangle our peace and prosperity in the toils of European ambition, rivalship, interest, humor, or caprice?

It is our true policy to steer clear of permanent alliance with any portion of the foreign worlds; so far, I mean, as we are now at liberty to do it; for let me not be understood as capable of patronizing infidelity to existing engagements. I hold the maxim no less applicable to public than private affairs, that honesty is always the best policy. I repeat it, therefore, let those engagements be observed in their genuine sense. But in my opinion, it is unnecessary, and would be unwise to extend them.

Taking care always to keep ourselves by suitable establishments, on a respectable defensive posture, we may safely trust to temporary alliances for extraordinary emergencies.

Harmony, and a liberal intercourse with all nations, are recommended by policy, humanity, and interest. But even our commercial policy should hold an equal and impartial hand; neither seeking nor granting exclusive favors or preferences; consulting the natural course of things; diffusing and diversifying by gentle means the streams of commerce, but forcing nothing; establishing with powers so disposed, in order to give trade a stable course, to define the rights of our merchants, and to enable the government to support them, conventional rules of intercourse, the best that present circumstances and mutual opinion will permit, but temporary, and liable to be from time to time abandoned or varied as experience and circumstances shall dictate; constantly keeping in view, that it is folly in one nation to look for disinterested favors from another; that it must pay with a portion of its independence for whatever it may accept under that character; that by such acceptance, it may place itself in the condition of having given equivalents for nominal favors, and yet of being reproached with ingratitude for not giving more. There can be no greater error than to expect, or calculate upon real favors from nation to nation. It is an illusion which experience must cure, which a just pride ought to discard.

In offering to you my countrymen, these counsels of an old and affectionate friend, I dare not hope they will make the strong and lasting impression I could wish; that they will control the usual current of the passions, or prevent our nation from running the course which has hitherto marked the destiny of nations, but if I may even flatter myself that they may be productive of some partial benefit, some occasional good; that they may now and then recur to moderate the fury of party spirit, to warn against the mischiefs of foreign intrigue, to guard against the impostures of pretended patriotism; this hope will be a full recompense for the solicitude for your welfare by which they have been dictated.

How far, in the discharge of my official duties, I have been guided by the principles which have been delineated, the public records and other evidences of my conduct must witness to you and to the world. To myself, the assurance of my own conscience is, that I have, at least, believed myself to be guided by them.

In relation to the still subsisting war in Europe; my proclamation of the 22d of April, 1793, is the index to my plan. Sanctioned by your approving voice, and by that of your representatives in both houses of congress, the spirit of that measure has continually governed me, uninfluenced by any attempts to deter or divert me from it.

After deliberate examination, with the aid of the best lights I could obtain, I was well satisfied that our country, under all the circumstances of the case, had a right to take, and was bound in duty and interest, to take a neutral position. Having taken it, I determined, as far as should depend upon me, to maintain it with moderation, perseverance and firmness.

The considerations which respect the right to hold this conduct, it is not necessary on this occasion to detail. I will only observe that, according to my understanding of the matter, that right, so far from being denied by any of the belligerent powers, has been virtually admitted by all.

The duty of holding a neutral conduct may be inferred, without any thing more, from the obligation which justice and humanity impose on every nation, in cases in which it is free to act, to maintain inviolate the relations of peace and amity towards other nations.

The inducements of interest for observing that conduct will best be referred to your own reflections and experience. With me a predominant motive has been to endeavor to gain time to our country to settle and mature its yet recent institutions, and to progress, without interruption, to that degree of strength, and consistency which is necessary to give it, humanly speaking, the command of its own fortunes.

Though in reviewing the incidents of my administration, I am unconscious of intentional error, I am nevertheless too sensible of my defects not to think it probable that I may have committed many errors. Whatever they may be, I fervently beseech the Almighty to avert or mitigate the evils to which they may tend. I shall also carry with me the hope that my country will never cease to view them with indulgence; and that, after forty-five years of my life dedicated to its service, with an upright zeal, the faults of incompetent abilities will be consigned to oblivion, as myself must soon be to the mansions of rest.

Relying on its kindness in this as in other things, and actuated by that fervent love towards it, which is so natural to a man who views in it the native soil of himself and his progenitors for several generations; I anticipate with pleasing expectation that retreat in which I promise myself to realize without alloy, the sweet enjoyment of partaking, in the midst of my fellow citizens, the benign influence of good laws under a free government—the ever favorite object of my heart, and the happy reward, as I trust, of our mutual cares, labors and dangers.

GEO. WASHINGTON.

UNITED STATES,
17th September, 1796.

Mr. SALTONSTALL. Mr. President, I desire to express a word of commendation for the excellent manner in which the distinguished senior Senator from Connecticut [Mr. BUSH] read Washington's Farewell Address. It was read clearly and distinctly and with a dignity befitting the immortal words of Washington.

THE SPIRIT OF GEORGE WASHINGTON—ADDRESS BY SENATOR ROBERTSON

Mr. BUSH. I thank the Senator from Massachusetts for his kind words.

Mr. President, at the request of the junior Senator from Virginia [Mr. ROBERTSON], I ask unanimous consent that there be printed in the RECORD at this point an address entitled "The Spirit of George Washington," which the junior Senator from Virginia delivered today in Richmond, Va.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The address delivered by Senator ROBERTSON is as follows:

THE SPIRIT OF GEORGE WASHINGTON

(Remarks of Senator ROBERTSON at the annual meeting of the Sons of the Revolution in the State of Virginia, Richmond, Va., February 22, 1955)

As we gather tonight to celebrate the 223d anniversary of the birth of one justly called the Father of his Country, we cannot fail to take note of the fact that the more the historians evaluate the personality and the contribution to organized society of George Washington, the higher they write his name on fame's eternal scroll.

As a student of political history and political philosophy I have been impressed by the fact that while George Washington lived in a period that produced the greatest men our country has ever known, he enjoys the almost unique distinction of having been esteemed as highly by his contemporaries as by posterity.

This was in sharp contrast to the difficulties encountered in his day and time by our greatest political philosopher, Thomas Jefferson. The fame of Jefferson is now so secure that many of our generation are quite unaware that some of his contemporaries did not feel toward him as we do. For instance, although Jefferson prepared a resolution for presentation to the Continental Congress in 1776 with respect to congressional action in behalf of independence for the Thirteen Colonies, the Virginia delegation would not let Jefferson present that resolution but voted to confer that honor upon Richard Henry Lee. But Jefferson was a member of the committee appointed to frame the Declaration and upon the insistence of two northern statesmen, John Adams and Benjamin Franklin, prepared the actual draft which, with a few minor changes, was adopted by the Congress, and is now recognized as one of the greatest political documents of all time.

When Jefferson was Governor of Virginia he very properly complied with Washington's request to send to the Continental Army the Virginia Militia which Washington so urgently needed for the major struggle of freeing all of the Colonies. Jefferson, however, was bitterly criticized for leaving the Virginia State capitol unprotected and when the legislature had to flee from Richmond to Staunton to escape capture by the British cavalry under General Tarleton one of its first acts was to consider impeachment of Jefferson for alleged criminal negligence in leaving Richmond undefended.

Again, when Jefferson left the Church of England to push his fight for religious freedom, he incurred the enmity of some of the landed aristocracy and because Jefferson never thereafter joined any church, he was accused of being an atheist, although there could be no clearer proof of his faith in God than his reference in the Declaration of Independence to the fact that all men were created equal and endowed by their Creator with certain inalienable rights.

And when Jefferson was President he was threatened with impeachment proceedings for buying the Louisiana Territory from Napoleon without previous authority of Congress.

But so far as I can ascertain the only time his contemporaries ever challenged George Washington was when at the age of 21 he ran for the house of delegates from Frederick County on a platform to prohibit the sale of whisky to members of the Virginia Militia during its training periods. He was defeated on that issue.

Probably the most eloquent tribute that has ever been paid George Washington was in 1832 on the 100th anniversary of his birth when Congress adopted a joint resolution to celebrate the occasion with appropriate ceremonies and Daniel Webster was selected as the Presiding Officer and principal speaker. Daniel Webster was 17 years old when Washington died and never personally knew George Washington, but he, of course, knew many of Washington's friends and a number who had served under Washington in the Revolutionary War. He referred to them in what I regard as his greatest speech, at the laying of the cornerstone of the Bunker Hill Monument 50 years after the battle when, noting the number of veterans in his audience, he turned to them in his opening sentence and said: "Venerable men, you come down to us from a former generation."

In his memorable address in 1832 Webster outlined the true meaning of that generation, but before doing so he said of Washington:

"We are met to testify our regard for him whose name is intimately blended with whatever belongs most essentially to the prosperity, the liberty, the free institutions, and the renown of our country. That name was of power to rally a nation, in the hour of thick-thronging public disasters and calamities; that name shown, amid the storm of war, a beacon light, to cheer and guide the country's friends; it flamed, too, like a meteor, to repel her foes. That name, in the days of peace, was a loadstone, attracting to itself a whole people's confidence, a whole people's love, and the whole world's respect. That name, descending with all time, spreading over the whole earth, and uttered in all the languages belonging to the tribes and races of men, will forever be pronounced with affectionate gratitude by everyone in whose breast there shall arise an aspiration for human rights and human liberty."

It took my beloved friend and Virginia's greatest historian, Douglas Southall Freeman, six volumes to tell the world what he knew about George Washington, and death intervened before he could finish that task. I shall, therefore, tonight attempt to refer to only two qualities of Washington—his faith in God and his unselfish devotion to the public welfare which so clearly illustrated the truth of Pericles' statement that the whole earth is the sepulcher of famous men, and their story is not graven only on stone over their native earth, but lives on far away, without visible symbol, woven into the stuff of other men's lives.

Every schoolchild knows that Washington knelt in the snow of Valley Forge and prayed that God would give him help in the unequal struggle confronting him. Every schoolchild ought to know that the leaders of communism in Russia are firmly convinced that in order to make willing slaves of the masses and to make them accept without question the communistic theory that the state is supreme they must destroy faith in God and the ethical teachings of the Bible.

The recent change in leadership in the Politburo, the situation now existing in Korea, where for the first time in our history we failed to win a military victory, the recent developments in southeast Asia, and the unpredictability of France, which has received billions from our Treasury since the end of World War II, all add up to the fact that if we are to have an end to what is euphoniously called a cold war without ultimately involving us in a shooting war of worldwide proportions something in addition to military strength at home and the distribution abroad of American gold will be required.

Behind the Russian Iron Curtain 800 million people have been organized by ruthless leaders in a program dedicated to the destruction of all capitalistic states. That threat to our cherished institutions and our personal freedom has become so great that since the end of World War II we have loaned without hope of repayment, or donated outright, over $50 billion to the still free nations of the world with the hope that they would stand shoulder to shoulder with us in opposition to further Communist aggression. We have appropriated annually such unprecedented sums for our own defense that our national debt now stands at $278 billion and in the 10th year after the close of the war which we had hoped would bring bona fide peace to a war-torn world our appropriations for military purposes comprise about 65 percent of our total annual budget.

In the early days of the Russian Revolution, when the oppressed people of that vast area were revolting against the tyranny of the Czars, we sympathized with that struggle and sent a military mission to Russia in 1918 to aid the newly formed Kerensky government. But when that effort in behalf of a very limited form of personal freedom was overrun and destroyed by the Bolsheviks, an American observer, after commenting on how the Volga had run red with the blood of the nobility and the intelligentsia had been sent into exile in the frozen wastes of Siberia where the only softness under their feet was that of snow, concluded his appraisal of what had happened in Russia with these prophetic words: "Only in after years, when their sins have taught them charity, and their despair has taught them hope, and their loneliness has led them to faith, they shall listen again to the sound of bells coming across the field and comprehend and reverence the symbolism of the cross."

To many, that change in sentiment among the rank and file of the people of Russia is still a long way off, but it is not beyond the power of God to bring it about. Consequently, I have frequently said that we labor in vain to build a temple of peace that is not dedicated to the victory of moral force.

In a recent speech in Washington, Dr. Billy Graham, referring to that problem said in effect that the essential ingredient in a formula for peace was a change in the hearts of men which could only be accomplished through a revival of the faith of our fathers; the kind of faith, for instance, that Washington had when he knelt in the snow at Valley Forge and prayed for divine help; the faith that Benjamin Franklin had when he appealed for unity among the disagreeing members of the Philadelphia Constitutional Convention, saying: "In this situation of this assembly groping as it were in the dark to find political truth, and scarce able to distinguish it when presented to us, how has it happened, sir, that we have not hitherto once thought of humbly applying to the Father of light to illuminate our understanding?" Then after recounting how Washington had prayed during the 7 years of the Revolutionary War, and how everybody had prayed for success when 3 million colonists were arrayed against the then greatest world power, Franklin concluded by saying: "I have lived, sir, a long time, and the longer I live, the more convincing proofs I see of this truth—that God governs in the affairs of men. And if a sparrow cannot fall to the ground without His notice, is it probable that an empire can rise without His aid?"

The second attribute of Washington, his unselfishness and devotion to duty epitomized in the phrase "First in war, first in peace, first in the hearts of his country-

men," is unique among the great military leaders of the world who have succeeded in establishing new empires.

What a contrast, for instance, with the character of Napoleon, who led a successful revolution in France to destroy the doctrine of the divine right of kings and obtain a larger measure of freedom, equality, and justice for the people, only to turn that successful revolution into a new form of tyranny for the glorification of Napoleon.

No one can stand in that great mausoleum in Paris which the French people have built to the memory of Napoleon and look down upon that pink marble tomb in which his mortal remains lie without recalling the words of Robert Ingersoll when he first viewed the tomb of Napoleon: "And I thought of all the widows and orphans he had made; of all the tears that had been shed for his glory; of the only woman who had ever loved him torn from his heart by the ruthless hand of ambition. And I said, I would rather have been a poor French peasant and worn wooden shoes, I would rather have lived in a hut with the vines growing over the door and the grapes growing purple in the kisses of the autumn sun; yes, I would rather have been that poor peasant and gone down to the tongueless silence of the dreamless dust, than to have been that impersonation of force and murder known as Napoleon the Great."

Today, we see France, a once great and once-powerful nation and one-time leader in the world for personal freedom, become a major concern to the remainder of the free world. We see a nation in which more than one-half of the population are atheists, and in which the largest single party is dominated by the French Communists.

It was with the vision that characterizes the true statesman that Daniel Webster, in paying tribute in 1832 to the memory of George Washington and the Founding Fathers who had given us American constitutional liberty, said, "Gentlemen, for the earth which we inhabit, and the whole circle of the sun, for all the unborn races of mankind, we seem to hold in our hands, for their weal or woe, the fate of this experiment. If we fail, who shall venture the repetition? If our example shall prove to be one, not of encouragement, but of terror, not fit to be imitated, but fit only to be shunned, where else shall the world look for free models? If this great western sun be struck out of the firmament, at what other fountain shall the lamp of liberty hereafter be lighted? What other orb shall emit a ray to glimmer, even, on the darkness of the world?"

I am proud of the fact that I had ancestors who served under Washington in the Revolutionary War. I am proud of the fact that I am a descendant of the Harrison family of Charles City County that produced a signer of the Declaration of Independence. I am proud of the fact that three of my ancestors served in the Virginia Convention which ratified the Philadelphia Constitution.

But that pride would become as sounding brass and a tinkling cymbal if, in my service in the Congress of the United States, I did nothing to preserve those priceless principles of political and economic freedom that were born of the brain and purchased with the blood of our Founding Fathers. Every man here tonight shares that same rich heritage and the same solemn obligation to answer the question posed in 1832 by Daniel Webster when he said the world was anxious to learn "whether free states may be stable, as well as free; whether popular power may be trusted, as well as feared; in short, whether wise, regular, and virtuous self-government is a vision for the contemplation of theorists, or a truth established, illustrated, and brought into practice in the country of Washington."

Some years ago a grateful Nation erected a monument in Washington to the Father of our Country that was built of stone, and we in Richmond erected one made of bronze, but if we enshrine in our hearts the fear of of God and love of our fellowman which characterized the life of George Washington we will be building monuments to his memory more enduring than those of stone and bronze.

PROPOSED NATIONAL HIGHWAY PROGRAM—MESSAGE FROM THE PRESIDENT (H. DOC. NO. 93)

The PRESIDENT pro tempore laid before the Senate a message from the President of the United States, which was read, and, with the accompanying document, referred to the Committee on Public Works.

(For President's message, see House proceedings for today.)

SUBCOMMITTEE MEETING DURING SENATE SESSION

On request of Mr. CLEMENTS, and by unanimous consent, the Subcommittee on Internal Security of the Committee on the Judiciary was authorized to meet today during the session of the Senate.

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. CLEMENTS. Mr. President, under the rule, there will be a morning hour for the presentation of petitions and memorials, the introduction of bills, and other routine matters, and I ask unanimous consent that any statements made in connection therewith be limited to 2 minutes.

The PRESIDENT pro tempore. Without objection, it is so ordered.

STATEHOOD FOR HAWAII AND ALASKA—JOINT RESOLUTIONS OF OREGON LEGISLATURE

Mr. NEUBERGER. Mr. President, I submit, for appropriate reference, two joint resolutions adopted by the Legislature of Oregon. One urges us to enact statehood for Hawaii, the other supports statehood for Alaska.

These joint resolutions, in my opinion, are not so much directed to us of the Congress, Mr. President, but to the Secretary of the Interior, Douglas McKay, who is a former Governor of Oregon, and a former member of the Oregon Legislature, which adopted the joint resolutions.

Secretary McKay has dragged his heels on Alaskan statehood, repudiating his onetime support of such a step. He even went to Alaska and scolded the upright, pioneering citizens of that great Territory for crusading in behalf of self-government. He has proposed a kind of twilight-zone plight for Alaska, half military reservation and half state—a sort of centaur, half man and half horse, but actually not a very adequate version of either.

It is my fervent hope that the Secretary of the Interior will profit by this counsel from the legislature of his home State and will become a strong and persistent backer of statehood for Alaska. He is the one person who needs to take heed the most of these memorials enacted by the Oregon State Legislature, a body still, incidentally, controlled by Mr. McKay's own political party, although with a majority greatly diminished by the 1954 Oregon elections.

The PRESIDENT pro tempore. The joint resolutions will be received and appropriately referred; and, under the rule, will be printed in the RECORD.

The joint resolutions presented by Mr. NEUBERGER were referred to the Committee on Interior and Insular Affairs, as follows:

Senate Joint Memorial 2

To the Honorable Senate and the House of Representatives of the United States of America in Congress assembled:

We, your memorialists, the 48th Legislative Assembly of the State of Oregon, in legislative session assembled, most respectfully represent as follows:

Whereas the security and economic welfare of Hawaii are essential to the well-being of the United States; and

Whereas inclusion in the Union as a sovereign State would strengthen the economy and social strength of Hawaii; and

Whereas many business, industrial, and labor groups in Oregon have worked unceasingly to develop increased trade and economic relations with Hawaii; and

Whereas the people of the Territory of Hawaii have demonstrated their loyalty to the Government of the United States, its traditions and teaching, and a readiness to achieve a status above and beyond that of an incorporated Territory; and

Whereas numerable civic organizations in Oregon have taken a public position favoring statehood for the great Territory of Hawaii: Now, therefore, be it

Resolved by the Senate of the State of Oregon (the House of Representatives jointly concurring therein), That we definitely go on record as urging early admission of Hawaii as a self-governing State of the Union; and be it further

Resolved, That copies of this memorial be sent to the President of the United States, to the Secretary of the Interior, to all members of the Oregon congressional delegation, and to the Delegates in the National Congress from the Territory of Hawaii.

Adopted by the Senate January 13, 1955.

ZYLPHA ZELL BURNS,
Chief Clerk of Senate.
ELMO E. SMITH,
President of Senate.

Adopted by House February 1, 1955.

E. A. GEARY,
Speaker of House.

Senate Joint Memorial 1

To the Honorable Senate and the House of Representatives of the United States of America in Congress assembled:

We, your memorialists, the 48th Legislative Assembly of the State of Oregon, in legislative session assembled, most respectfully represent as follows:

Whereas the security and economic development of Alaska are essential to the well-being of the United States; and

Whereas inclusion in the Union as a sovereign State would strengthen the economy and social strength of Alaska; and

Whereas many business, industrial, and labor groups in Oregon have worked unceasingly to develop increased trade and economic relations with Alaska; and

Whereas numerous civic and business organizations in Oregon have taken a public position favoring statehood for the great Territory of Alaska; and

Whereas the people of the Territory of Alaska demonstrated their loyalty to the

Government of the United States, its tradition and teaching; and a readiness to achieve a status above and beyond that of an incorporated territory: Now, therefore, be it

Resolved by the Senate of the State of Oregon (the House of Representatives jointly concurring therein), That we definitely go on record as urging early admission of Alaska as a self-governing State of the Union; and be it further

Resolved, That copies of this memorial be sent to the President of the United States, to the Secretary of the Interior, to all members of the Oregon congressional delegation, and to the Delegates in the National Congress from the Territory of Alaska.

Adopted by Senate January 13, 1955.

ZYLPHA ZELL BURNS,
Chief Clerk of Senate.
ELMO E. SMITH,
President of Senate.

Adopted by House February 1, 1955.

E. A. GEARY,
Speaker of House.

EXECUTIVE REPORT OF A COMMITTEE

Mr. SYMINGTON. Mr. President, as in executive session, from the Committee on Armed Services I report favorably the nomination of Albert J. Hayes, of Maryland, to be a member of the National Security Training Commission for the remainder of the term expiring June 19, 1958, to which office he was appointed during the recess of the Senate to fill the vacancy created by the death of Dr. Compton, and ask that this nomination be placed on the Executive Calendar.

The PRESIDENT pro tempore. The nomination will be placed on the Executive Calendar.

Mr. SYMINGTON. Mr. President, I ask unanimous consent that I may proceed for 2 minutes in order to make a statement on the nomination.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. SYMINGTON. Mr. President, the first Chairman of the National Security Training Commission was the late Hon. James W. Wadsworth. Therefore I have always had an interest in this Commission.

So it is with particular pleasure that I report favorably for the Armed Services Committee the name of an old friend, Mr. Albert J. Hayes, of Maryland, to be a member of the National Security Training Commission.

Mr. Hayes was born in Milwaukee, Wis. He has devoted most of his worthy life to the advancement and interests of labor, but at the same time his patriotic public services have earned the respect of people in all segments of our economy.

At the present time Mr. Hayes is International President of the International Association of Machinists.

The record of his union service is as follows: chairman, apprentice boys committee, Milwaukee railroad shops; member International Association of Machinists, president, IAM district 7, covering all machinists lodges on the Chicago & North Western Railway system; IAM grand lodge representative; general vice president of IAM; international president of IAM in 1949 and reelected in 1953; cochairman, United Labor Policy Committee and vice president, American Federation of Labor, 1953.

Mr. Hayes also has a distinguished record of public service. He has been a member, 6th regional War Labor Board, Chicago, during World War II; Special Assistant on Manpower, Department of Defense, member, President's Comission on Health Needs of the Nation; trustee, National Planning Association and director, American Heart Association.

Mr. Hayes also is a member of the National Manpower Council of Columbia University; the Advisory Committee, Senate Banking and Currency Committee; Commisson on Labor-Management Manpower Policy, Office of Defense Mobilization; President's Committee on the Physically Handicapped; National Citizens Commission for the Public Schools; and the White House Conference on Education.

It was my privilege to know Mr. Hayes when I was Chairman of the National Security Resources Board. At that time he was a member of the Board's Advisory Committee.

All those who know this outstanding American are grateful for his willingness to continue his record of public service by accepting this Presidential appointment to the National Security Training Commission.

Mr. CASE of South Dakota subsequently said:

Mr. President, a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator from South Dakota will state it.

Mr. CASE of South Dakota. What is the status of the report on the nomination of Mr. Hayes, to be a member of the National Security Training Commission?

The PRESIDENT pro tempore. The nomination has been placed on the Executive Calendar.

Mr. CASE of South Dakota. When is the nomination to be taken up?

The PRESIDENT pro tempore. It could be taken up at the next session of the Senate.

Mr. CASE of South Dakota. Mr. President, may I be recognized, then, for 2 minutes, to speak on the nomination?

The PRESIDENT pro tempore. Without objection, the Senator from South Dakota may proceed.

Mr. CASE of South Dakota. Mr. President, I have no objection to the nomination or to the confirmation of the nomination of Mr. Hayes, to be a member of the National Security Training Commission. I do, however, wish to bring to the attention of the Senate the fact that on the National Security Training Commission there is no representation by anyone who could remotely be considered as either connected with or having a basic understanding of the personnel and manpower problems in the agricultural sections of the country.

I recognize that, under the statute, the responsibilities of the National Security Training Commission are not connected with the selection of military personnel, but have to do with the training program after the men are selected or inducted.

However that may be, it seems to me important that any board or commission which has to do with broad personnel or training policies should have a basic understanding and appreciation of manpower and personnel problems generally.

Mr. Hayes is definitely a career man in the field of labor. He understands manpower problems in the industrial field. Admiral Kinkaid understands the needs of the Defense Establishment from the standpoint of the Navy. General McLain, who represents the Army, understands the needs of the Military Establishment and the problems of manpower from the standpoint of the Army. Mr. Adler understands the manpower problems from the standpoint of business and of reservists who live in cities. Warren Atherton, a very distinguished member of the Commission, and a former national commander of the American Legion, understands the problems of business and professional men and the aims of the patriotic organizations. He is an attorney. If any one of the group might be suspected of having some understanding of manpower problems from an agricultural standpoint, both before, during, and after military service, it might be Mr. Atherton, because he happens to be a partner in the ownership of a 1,000-acre asparagus farm in California. But none of them suggest any personal experience in the field of agriculture or rural economy.

I have called this matter to the attention of the Senate, Mr. President, because when the Armed Services Committee of the Senate takes up the developing of a training program and a Reserve program, I think we should endeavor to consider the seasonal needs of agriculture in planning those programs.

Furthermore, I certainly hope that as we proceed to develop a training program and a reserve program, we will not look merely to the industrial centers and to the large cities to obtain personnel for the nucleus of the Military Establishment. If that should be done in the case of officer procurement, it could mean that the officers of the Armed Forces would come entirely from the centers of large population. That would be unfortunate. In the Military Establishment we need a balanced personnel.

Mr. President, I ask unanimous consent to have printed in the RECORD at the conclusion of my remarks some biographical data on each of the members of the National Security Training Commission, assembled for me by the members of the staff of the Senate Committee on Armed Services.

The PRESIDENT pro tempore. Is there objection?

There being no objection, the biographical data were ordered to be printed in the RECORD, as follows:

BIOGRAPHICAL DATA ON MEMBERS, NATIONAL SECURITY TRAINING COMMISSION

ALBERT J. HAYES, INTERNATIONAL PRESIDENT, INTERNATIONAL ASSOCIATION OF MACHINISTS, WASHINGTON, D. C.

Union service: Chairman, apprentice boys committee, Milwaukee Railroad shops 1917–20.

Joined IAM Lodge, 234, Milwaukee in 1919. Transferred to IAM Lodge, 1052 in 1923.

President, IAM, district 7, covering all machinists lodges on the Chicago & Northwestern Railroad system in 1924–34.

IAM grand lodge representative 1934–44.

General vice president of the IAM 1944–49.

International president of the IAM 1949, reelected 1953.

Cochairman, United Labor Policy Committee 1950–51.

Vice president, American Federation of Labor 1953.

Public service: Member of the Sixth Regional War Labor Board, Chicago, during World War II.

Special Assistant on Manpower, Department of Defense 1950–51.

Member, President's Commission on Health Needs of the Nation, 1952.

Trustee, National Planning Association.

Director, American Heart Association.

Member, National Manpower Council of Columbia University; Advisory Committee, Senate Banking and Currency Committee; Commission on Labor Management Manpower Policy, Office of Defense Mobilization; President's Committee on the Physically Handicapped; National Citizens Commission for the Public Schools; White House Conference on Education.

Personal: Born 1900, Milwaukee, Wis.; educated in Milwaukee elementary and high schools and extension division, University of Wisconsin; married, has 1 daughter, 4 grandchildren; Lutheran.

Affiliation: Eagles.

Hobbies: Fishing, hunting, baseball.

WARREN HENDRY ATHERTON

Warren Hendry Atherton, veteran, attorney, farmer, civic leader, and outstanding American Legion official of Stockton, Calif., who served as national commander of the Legion in 1944, was appointed by President Eisenhower to the National Security Training Commission on August 1, 1953, to fill the unexpired term of the late James W. Wadsworth, the Commission's first Chairman. Mr. Atherton was reappointed to a 5-year term June 19, 1954.

A practicing lawyer since 1913, Mr. Atherton is a senior member of the law firm of Atherton & Dozier, Stockton, and is president of the Inland Harbor Storage Co. of that city. He also serves on the board of directors of the San Joaquin Building & Loan Association, and the Lincoln Properties, Inc., a large real-estate development corporation, and is owner of Atherton Island, a real-estate subdivision.

Mr. Atherton is a partner in a 1,000-acre asparagus and truck products ranch in the San Joaquin Delta and serves as special legal consultant to the Stockton port district.

Active in American Legion circles since 1919, when he joined as a charter member of the Karl Ross Post, No. 16, at Stockton, Commissioner Atherton came into national prominence as a legionnaire in 1933 when appointed a member of the organization's national Americanism commission, a post he held until 1936. Three years later he became national defense chairman, retiring from that assignment when elected national commander in 1943.

His Legion travels included many thousands of miles of on-the-spot inspections of American battlefields and installations in the United States, North Africa, Alaska, and, as national commander in 1944, of troops and advance bases in the Pacific.

Mr. Atherton has been general counsel for the department of veterans' affairs of the State of California since 1935. His public service includes 5 years as district attorney of Alpine County, 3 years as member of California State Board of Terms and paroles, and vice-chairman of the defense mobilization service committee of California.

During World War II Commissioner Atherton acted as special consultant to the Secretary of War and in 1944 visited 15 South American and Central American countries as a representative of the Coordinator of Inter-American Affairs.

As a private in World War I, Commissioner Atherton served with the AEF in company D, 363d Infantry, 91st Division, later being commissioned a first lieutenant in January 1918. He was promoted to captain in February 1919, and held that rank in the Infantry Reserve Corps for 16 years.

Following military service, Mr. Atherton was president of the San Joaquin County Bar Association, 1921; police judge at Stockton, 1920–25; president of the Kiwanis Club, 1924, and president of the Stockton Chamber of Commerce, 1933–35, in addition to other offices of civil and public trust.

Born December 28, 1891, at San Francisco, Mr. Atherton was graduated from Stockton Law School and admitted to the California bar January 8, 1913. He has 4 children, 3 being sons who all served in the Air Corps during World War II.

GEN. WALTER BEDELL SMITH, UNITED STATES ARMY (RETIRED)

Gen. Walter Bedell Smith was born in Indianapolis, Ind., on October 5, 1895, the son of William Long and Ida Frances (Bedell) Smith, and married Mary Eleanor Cline, also of Indianapolis.

He began his military career as a private in the Indiana National Guard in 1910 and retired from active service in the Army with the rank of general on January 31, 1953. He entered Officers' Training Camp in 1917, was commissioned a second lieutenant in the Officers' Reserve Corps on November 27, 1917, served in France with the 4th Division in 1918, and was wounded in action.

Between World Wars I and II he filled various military assignments, including service in the top Army schools both as a student and as a teacher. In 1932 he graduated from the advanced course of the Infantry School, in 1935 from the Command and General Staff School, and in 1937 from the Army War College. He also served for 2 years in the Philippine Islands and 4 years with the United States Bureau of the Budget.

In 1939 General Smith was detailed to the General Staff Corps and assigned to the War Department General Staff in Washington, serving as Assistant Secretary and Secretary of the General Staff during the critical period between October 1939 and January 1942. In February 1942 he was appointed Secretary of the Joint Chiefs of Staff and United States Secretary of the Combined Chiefs of Staff in Washington.

In September 1942 General Smith became Chief of Staff of the European Theater of Operations, and shortly thereafter was appointed Chief of Staff to Gen. Dwight D. Eisenhower in the north African theater. When the Supreme Headquarters Allied Expeditionary Forces was organized on January 1, 1944, General Smith was appointed Chief of Staff and served in this capacity until the end of the war. On behalf of the Supreme Commander, he negotiated and signed the instruments effecting the surrender of Italy and Germany.

In 1946 he was appointed Ambassador to the Soviet Union, remaining in a military status during this assignment. His resignation as Ambassador was accepted by the President on March 25, 1949. After returning from Moscow he served as commanding general of the United States First Army with headquarters on Governors Island in New York City, until October 1950, when he was appointed Director of Central Intelligence. He remained in that position until appointed Under Secretary of State in February 1953. He resigned from this position in October 1954.

General Smith is at present vice chairman of the American Machine & Foundry Co. and is president of American Heritage Foundation. He also serves as member of the board of directors of United Fruit and of Radio Corporation of America.

For services in both wars General Smith holds seven decorations from the United States as well as decorations from Great Britain, France, Netherlands, Belgium, Luxembourg, Brazil, Morocco, Tunisia, Poland, U. S. S. R., Czechoslovakia, and Thailand. He has been awarded honorary degrees by a number of American and foreign universities.

ADM. THOMAS CASSIN KINKAID, UNITED STATES NAVY, RETIRED

Adm. Thomas Cassin Kinkaid, United States Navy, retired, was born April 3, 1888, at Hanover, N. H., the son of Thomas Wright and Virginia Lee Cassin Kinkaid.

Admiral Kinkaid was one of the original Commissioners on the National Security Training Commission, having been appointed to a 5-year term on July 19, 1951.

His entire life has been devoted to the naval service which he undertook upon entering the United States Naval Academy, graduating in the class of 1908. He advanced to the rank of admiral, receiving that promotion in April 1945. Admiral Kinkaid retired from active duty on May 1, 1950, closing a career highlighted by many combat engagements against the Japanese, 1942–45.

Following is a brief résumé of Admiral Kinkaid's service career:

January–July 1932: Technical adviser to American delegation, General Disarmament Conference, Geneva, Switzerland.

November 1938–March 1941: Naval attaché, American Embassy, Rome.

March 1939–March 1941: Additional duty as naval attaché, Belgrade, Yugoslavia.

November 1941: Promoted to rear admiral.

February 29, 1942: Commander, cruiser group action, off Bougainville.

March 10, 1942: Salamanca raid.

May 4–8, 1942: Battle of Coral Sea.

June 3–6, 1942: Battle of Midway.

August 7–9, 1942: Commander, *Enterprise* carrier group, Guadalcanal and Tulagi, Solomon Islands, for United States marine landings.

August 25, 1942: Battle of Eastern Solomon Islands.

October 26, 1942: Action at Santa Cruz Islands.

November 15, 1942: Action at Guadalcanal.

January–October 1943: Commander, North Pacific Force, Aleutian campaign.

June 1943: Promoted to vice admiral.

November 1943–September 1945: Commander, 7th Fleet, and commander, Allied Naval Forces, Southwest Pacific area.

October 25, 1944: New Guinea and Philippine campaigns, including Battle of Leyte Gulf.

April 1945: Promoted to admiral.

September 1945: Landed 24th Corps in Korea and with Lieutenant General Hodge, took surrender of Japanese Army and Navy at Seoul, Korea; subsequently followed by landing United States marines under Maj. Gen. K. E. Rockey at Taku and Tsingtao, North China; later transported five Chinese armies from Haiphong, Kowloon, and Ningho to Formosa, Chingwantao and Tsingtao, north China.

November 19, 1945: Detached 7th Fleet.

January 16, 1946: Commander, Eastern Sea Frontier.

May 1, 1950: Retired from active duty.

Admiral Kinkaid's decorations: Navy Distinguished Service Medal, with three gold stars; Army Legion of Merit; Presidential citation; Victory Medal; Atlantic Clasp; American Defense Service Medal; Asiatic-Pacific Campaign Medal (10 battle stars); World War II Victory Medal; Companion Order of the Bath (British); Grand Officer Order Orange Nassau with swords (Netherlands); Army Distinguished Service Medal; Order Al Merito, Gran Official (Chilean); grand officer, Order of Leopold with palm, Croix de guerre with palm (Belgium).

In addition, Admiral Kinkaid is a member of the American Battle Monuments Commission.

Admiral Kinkaid and his wife, the former Helen Sherburne Ross, reside at 2134 R Street NW., Washington, D. C. They were married April 25, 1911, 3 years after his graduation from the Naval Academy.

The admiral is a member of Chevy Chase Club and Army-Navy Club, Washington, D. C., and the Union Club of New York City.

MAJ. GEN. JULIUS OCHS ADLER

Maj. Gen. Julius Ochs Adler was appointed by the President as chairman of the National Security Training Commission on August 1, 1953.

General Adler was born in Chattanooga, Tenn., on December 3, 1892, the son of Harry Clay and Ada Ochs Adler. He was a student at Baylor University School, Chattanooga, and a graduate of Lawrenceville (N. J.) School, 1910 (valedictorian); A. B., Princeton University, 1914. He married Barbara Stettheimer on August 27, 1922; children: Julius Ochs, Jr., Barbara Squier, and Nancy Jean.

General Adler has been with the New York Times since 1914; first vice president, general manager and treasurer; also president and publisher, the Chattanooga Times; director, the New York Times Co.; Times Printing Co. (Chattanooga Times); Spruce Falls Power and Paper Co., Ltd., Toronto, Canada; vice chairman and director, Interstate Broadcasting Co., Inc., New York; chairman board of directors, Chattanooga Publishing Co.; vice president and director, Times Facsimile Corp.

He was civilian aide to Secretary of War, Second Corps Area, 1932–40; commissioned second lieutenant, cavalry, ORC, 1917; served continuously as Reserve officer advancing through grades to major general; World War I, 306th Infantry American Expeditionary Forces; World War II, 44th, 4th, and 6th Infantry Divisions; former commander 77th Infantry Division, USAR, retiring December 31, 1954, with rank of major general. His decorations include: Distinguished Service Cross, Silver Star with two Oakleaf Clusters, Order of Purple Heart, New York State Conspicuous Service Medal (both wars), Officer Legion d'Honneur, Crois de guerre with palm (France); Cróce de guêrra (Italy); Legion of Merit, and Bronze Star Medal. A founder of Military Training Camps Association of the United States; chairman, executive committee, Military Training Camps Association of the United States, First Army Area; chairman, national emergency committee, Military Training Camps Association of the United States; president, 77th Division Association, 1945–46; chairman, Armed Forces Advisory Committee for Greater New York (since formation); (Byrnes Committee) Army Committee on Civilian Components, January 1949; president, Senior Reserve Commanders Association Army of the United States, 1949–52; member, Reserve Forces Policy Board (Department of Defense); Committee on the Present Danger; New York State Defense Council.

Honorary chairman, executive board, Greater New York Councils, Boy Scouts of America; president, Tennessee Society in New York, 1929–30; charter trustee, Princeton University; president, class of 1914, Princeton University, 1934–39; Daily Princetonian alumni award, 1939; alumna trustee at large, Princeton University, 1940–44; president, the Daily Princetonian, Inc.

Memberships: Institute of War and Peace Studies' Committee on Public Policy (Columbia University); advisory council, Woodrow Wilson School of Public and International Affairs, Princeton University; board of trustees, International House; board of trustees, National Jewish Hospital at Denver; board of trustees, Institute for the Crippled and Disabled; board of trustees, Grant Monument association; board of directors, American Newspaper Publishers Association; board of directors and treasurer, Bureau of Advertising; board of directors, Better Business Bureau of New York City, Inc.; board of directors, New York Convention and Visitors Bureau; New York City 300th anniversary celebration committee; board of directors, Lafayette Centennial Association.

Clubs: Princeton Club of New York; Advertising Club of New York; Century Country Club; Mountain City Club (Chattanooga, Tenn.).

Editor in chief, History of the 77th Division, AEF, 1919; editor, History of 306th Infantry, 1935.

Home: 2 East 67th Street, New York 21; office: The New York Times, 229 West 43d Street, New York 36.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. CLEMENTS (for Mr. SMATHERS):

S. 1159. A bill for the relief of Wilma Ann Schilling and her daughter, Ingertraud Rosalita Schilling; to the Committee on the Judiciary.

By Mr. MARTIN of Pennsylvania (for himself, Mr. CHAVEZ, and Mr. CASE of South Dakota):

S. 1160. A bill to create a Federal Highway Corporation for financing the construction of the National System of Interstate Highways; to amend and supplement the Federal-Aid Road Act, approved July 11, 1916 (39 Stat. 355), as amended and supplemented; and for other purposes; to the Committee on Public Works.

(See the remarks of Mr. CASE of South Dakota when the above bill was introduced, which appear under a separate heading.)

By Mr. CASE of South Dakota:

S. 1161. A bill to abolish the Fossil Cycad National Monument, South Dakota, and for other purposes; and

S. 1162. A bill authorizing the issuance of a patent-in-fee to Nellie V. Compton (nee Not Stampeded); to the Committee on Interior and Insular Affairs.

By Mr. BEALL (for himself, Mr. MANSFIELD, Mr. NEELY, and Mr. PAYNE):

S. 1163. A bill to amend the District of Columbia Unemployment Compensation Act, as amended; to the Committee on the District of Columbia.

By Mr. BRICKER:

S. 1164. A bill to provide for the appointment of a district judge for the southern district of Ohio; to the Committee on the Judiciary.

By Mr. ELLENDER (by request):

S. 1165. A bill to amend the Federal Crop Insurance Act, as amended;

S. 1166. A bill to amend section 6 of the act of August 30, 1890, as amended, and section 2 of the act of February 2, 1903, as amended; and

S. 1167. A bill to amend the Soil Conservation and Domestic Allotment Act; to the Committee on Agriculture and Forestry.

PROPOSED HIGHWAY LEGISLATION

Mr. CASE of South Dakota. Mr. President, today the President of the United States has sent to the Congress a special mesage on the subject of highways. The message of the President calls attention to the report submitted by the President's advisory committee on the national highway program, headed by Gen. Lucius D. Clay. I have in my hand a copy of a bill which has been drafted to carry out the recommendations of the so-called Clay committee, the President's advisory committee.

Now, on behalf of the senior Senator from Pennsylvania [Mr. MARTIN] I introduce for appropriate reference that bill with the Senator from New Mexico [Mr. CHAVEZ], the chairman of the Committee on Public Works, and myself as cosponsors, in order that the specific recommendations of the Clay committee may be brought before the Senate Committee on Public Works. I do not think I can say, Mr. President, that the bill expresses the personal views of any of the Senators, because we have not had an opportunity to examine the proposal in detail. I think the Senator from New Mexico has some ideas he wishes to express in any highway legislation that may be reported. I belive the senior Senator from Pennsylvania has some ideas and I know that the junior Senator from South Dakota has some ideas of his own. Those ideas we shall each present in due course during the consideration of the bill in the committee. We join, however in presenting this bill so that its bold and challenging concepts may be explored and fully considered.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 1160) to create a Federal highway corporation for financing the construction of the National System of Interstate Highways; to amend and supplement the Federal-Aid Road Act approved July 11, 1916 (39 Stat. 355), as amended and supplemented; and for other purposes, introduced by Mr. MARTIN of Pennsylvania (for himself, Mr. CHAVEZ, and Mr. CASE of South Dakota), was received, read twice by its title, and referred to the Committee on Public Works.

Mr. CASE of South Dakota subsequently said: Mr. President, in connection with my previous remarks regarding the introduction of the highway bill, I should like to emphasize that the bill was introduced on behalf of the senior Senator from Pennsylvania [Mr. MARTIN]; and the bill should appear in his name, with the names of the Senator from New Mexico [Mr. CHAVEZ] and myself listed as cosponsors, under the statement I previously made.

Mr. CHAVEZ. Mr. President, I joined with the Senator from Pennsylvania [Mr. MARTIN] and the Senator from South Dakota [Mr. CASE] in the introduction of the bill. We have not had an opportunity to examine the bill itself, but I believe when the President sends a message making a proposal that is in the interest of the country, it deserves to be introduced and to go before a committee for proper consideration. However, I do not wish any inference to be drawn, in any way, shape, or form, that because I have joined the Senator from Pennsylvania and the Senator from South Dakota I am in complete agreement with the proposals of the President. I have definite ideas with regard to the kind of highway legislation which should be enacted, and I wish to make it known at this particular time that I do not agree completely with the proposal of the President.

Mr. CASE of South Dakota. Mr. President, in conclusion I may state that the views expressed by the Senator from New Mexico are shared to some extent by the Senator from Pennsylvania [Mr. MARTIN] and myself. We wish to have the proposed legislation brought before the committee. No one can predict what will come out of the committee's

deliberations, but it is a subject of the greatest importance. It proposes a system of national highways, is a courageous and bold measure, and deserves the careful consideration of the committee which I am sure it will have, first in the Subcommittee on Roads, headed by the Senator from Tennessee [Mr. GORE].

Mr. GORE. Mr. President, will the Senator from South Dakota yield?

Mr. CASE of South Dakota. I shall be glad to yield if I have time. Perhaps the Senator can speak on his own time.

Mr. GORE. Mr. President, now that the administration bill has been introduced——

The PRESIDENT pro tempore. Will the Senator allow the Chair to have morning business completed, before speeches are made on this matter?

Mr. GORE. Mr. President, I wish to make only a few brief remarks on the introduction of the bill, and I think I can speak within the prescribed limitation of time.

The PRESIDENT pro tempore. The Senator from Tennessee may proceed.

Mr. GORE. Now that the administration bill has been introduced, the hearings before the Subcommittee on Roads will encompass the consideration of the bill, along with any other Federal highway bill which may be pending before the committee. The hearings will proceed tomorrow with representatives from the American Federation of Labor, the National Grange, and the American Farm Bureau testifying in accordance with their requests. A list of questions with respect to the bill, including the allocations to respective States, will be submitted to Secretary of Commerce Weeks, and he will be invited to appear to testify with respect to the administration bill as soon as he is ready to answer those questions.

NOTICE OF HEARING ON NOMINATION OF CHARLES NOAH SHEPARDSON TO BE A MEMBER OF THE BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

Mr. BRICKER. Mr. President, on behalf of the Subcommittee on Federal Reserve of the Committee on Banking and Currency, I desire to give notice that a public hearing has been scheduled for Friday, February 25, 1955, at 10:30 a. m., in room 301, Senate Office Building, upon the nomination of Charles Noah Shepardson, of Texas, to be a member of the Board of Governors of the Federal Reserve System for the remainder of the term of 14 years from February 1, 1954, vice Paul Emmert Miller, deceased. At the time and place all persons interested in the nomination may make such representations as may be pertinent.

VISIT TO THE SENATE BY MISS SUSAN BALL

Mr. LEHMAN. Mr. President, today there is seated in the visitors' gallery a young lady to whom I wish to pay tribute. I wish to do so for a very particular reason. She is still a young women, but in her years she has experienced triumph, despair, and a faith that should stand as an example of high courage and constancy of purpose to people young and old throughout the length of this land. She is of the stamina that has made this country great.

The young lady to whom I am referring was born in Buffalo, in my State of New York. Even as a girl she was outstanding in her achievements and determined in her ambition for the future. Unfalteringly she began in early days to carve for herself a career as an actress. With each advance the path ahead loomed more and more promising. When she had scarcely attained maturity this young lady was standing on the threshold of bright success. She was looking forward to happy womanhood as she planned the day of her marriage. Then, without warning, the world seemed to fall apart about her. She was stricken with a crippling affliction that threatened not only to tear down the goal she had so patiently, earnestly, and devotedly pursued, but to strike down her very life.

But a great heart beat anxiously through tortured weeks and months, and that great heart persevered through pain and suffering that would have ended the hopes of a less brave and determined person.

It is for this reason that I wish to honor Miss Susan Ball, a splendid motion picture actress, representing her fine industry. Her brave example should be an inspiration to millions of handicapped people and stimulate them to renewed courage and faith.

Mr. President, I ask unanimous consent that Miss Ball be invited to stand where she is seated in the gallery so that the Senate may salute her.

The PRESIDING OFFICER (Mr. ELLENDER in the chair). Without objection, the invitation is extended to Miss Ball.

Miss Ball stood at her seat in the gallery. [Applause, Senators rising.]

The PRESIDING OFFICER. We are glad to have Miss Ball present.

ADJOURNMENT

Mr. MCNAMARA. Mr. President, I move that the Senate now stand adjourned until tomorrow, at noon.

The motion was agreed to; and (at 1 o'clock and 16 minutes p. m.) the Senate adjourned until tomorrow, Wednesday, February 23, 1955, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES

TUESDAY, FEBRUARY 22, 1955

The House met at 12 o'clock noon.

The Reverend B. B. Comer Lile, rector of Christ Church, Alexandria, Va., offered the following prayer:

Almighty God, who hast given us this good land for our heritage, we humbly beseech Thee that we may always prove ourselves a people mindful of Thy favor and glad to do Thy will. Bless each and every Member of the House of Representatives here assembled. Guide and protect them in their labor and in their deliberations and grant that in all their work begun, continued, and ended in Thee, they may glorify Thy holy name. Bless our land with honorable industry, sound learning, and pure manners. Endue with the spirit of wisdom all of those to whom in Thy name we entrust the authority of government, that there may be justice and peace at home, and that, through obedience to Thy law, we may show forth Thy praise among the nations of the earth. In the time of prosperity, fill our hearts with thankfulness, and in the day of trouble, suffer not our trust in Thee to fail; all of which we ask through Jesus Christ our Lord. Amen.

The Journal of the proceedings of Friday, February 18, 1955, was read and approved.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Hawks, one of his secretaries.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Carrell, one of its clerks, announced that the Senate had passed bills and a concurrent resolution of the following titles, in which the concurrence of the House is requested:

S. 456. An act relating to the regulation of nets in Alaska waters;

S. 913. An act to eliminate the need for renewal of oaths of office upon change of status of employees of the Senate; and

S. Con. Res. 9. Concurrent resolution to print for the use of the Committee on the Judiciary additional copies of certain parts of the hearings on Interlocking Subversion in Government Departments.

COMMITTEE ON WAYS AND MEANS

The SPEAKER. The Chair will recognize at this time only the gentleman from Tennessee, under the circumstances.

Mr. COOPER. Mr. Speaker, I ask unanimous consent that the Committee on Ways and Means may have until midnight tonight to file a report on the bill H. R. 4259, and that the same length of time be allowed for the filing of minority or individual views on this bill.

Mr. GROSS. Mr. Speaker, reserving the right to object, what is the bill about which the gentleman makes this request?

Mr. COOPER. It is a bill to extend the corporation and excise taxes, as requested by the President of the United States.

Mr. GROSS. Mr. Speaker, I withdraw my reservation of objection.

Mr. ARENDS. Mr. Speaker, reserving the right to object, and I shall not, I was wondering if the gentleman might tell us whether he contemplates bringing this bill up for consideration Thursday?

Mr. COOPER. As the gentleman well knows, after the committee reports a bill it is up to the leadership of the House as to when it comes up.

Mr. ARENDS. My thought was to secure information for some of our Members on each side who may not be here today.

Mr. McCORMACK. Mr. Speaker, if the gentleman will yield, I may say that if a rule is reported, which is hoped for and expected, it will come up on Thursday.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

GEORGE WASHINGTON'S FAREWELL ADDRESS

The SPEAKER. Pursuant to the order of the House of February 2, 1955, the Chair recognizes the gentleman from Florida [Mr. CRAMER] to read George Washington's Farewell Address.

Mr. CRAMER. Mr. Speaker, it is with humble heart and sincere gratitude that I accept, on behalf of this House and the great State of Florida, this high honor.

To the people of the United States:

FRIENDS AND FELLOW CITIZENS: The period for a new election of a citizen to administer the executive government of the United States being not far distant, and the time actually arrived when your thoughts must be employed in designating the person who is to be clothed with that important trust, it appears to me proper, especially as it may conduce to a more distinct expression of the public voice, that I should now apprise you of the resolution I have formed, to decline being considered among the number of those, out of whom a choice is to be made.

I beg you, at the same time, to do me the justice to be assured, that this resolution has not been taken, without a strict regard to all the considerations appertaining to the relation which binds a dutiful citizen to his country; and that, in withdrawing the tender of service which silence in my situation might imply, I am influenced by no diminution of zeal for your future interest; no deficiency of grateful respect for your past kindness; but am supported by a full conviction that the step is compatible with both.

The acceptance of, and continuance hitherto in the office to which your suffrages have twice called me, have been a uniform sacrifice of inclination to the opinion of duty, and to a deference for what appeared to be your desire. I constantly hoped that it would have been much earlier in my power, consistently with motives which I was not at liberty to disregard, to return to that retirement from which I had been reluctantly drawn. The strength of my inclination to do this, previous to the last election, had even led to the preparation of an address to declare it to you; but mature reflection on the then perplexed and critical posture of our affairs with foreign nations, and the unanimous advice of persons entitled to my confidence, impelled me to abandon the idea.

I rejoice that the state of your concerns, external as well as internal, no longer renders the pursuit of inclination incompatible with the sentiment of duty or propriety; and am persuaded, whatever partiality may be retained for my services, that in the present circumstances of our country, you will not disapprove my determination to retire.

The impressions with which I first undertook the arduous trust, were explained on the proper occasion. In the discharge of this trust, I will only say that I have, with good intentions, contributed towards the organization and administration of the government, the best exertions of which a very fallible judgment was capable. Not unconscious in the outset, of the inferiority of my qualifications, experience, in my own eyes, perhaps still more in the eyes of others, has strengthened the motives to diffidence of myself; and, every day, the increasing weight of years admonishes me more and more, that the shade of retirement is as necessary to me as it will be welcome. Satisfied that if any circumstances have given peculiar value to my services they were temporary, I have the consolation to believe that, while choice and prudence invite me to quit the political scene, patriotism does not forbid it.

In looking forward to the moment which is to terminate the career of my political life, my feelings do not permit me to suspend the deep acknowledgment of that debt of gratitude which I owe to my beloved country, for the many honors it has conferred upon me; still more for the steadfast confidence with which it has supported me; and for the opportunities I have thence enjoyed of manifesting my inviolable attachment by services faithful and persevering, though in usefulness unequal to my zeal. If benefits have resulted to our country from these services, let it always be remembered to your praise, and as an instructive example in our annals, that under circumstances in which the passions, agitated in every direction, were liable to mislead amidst appearances sometimes dubious, vicissitudes of fortune often discouraging—in situations in which not unfrequently want of success has countenanced the spirit of criticism—the constancy of your support was the essential prop of the efforts, and a guarantee of the plans, by which they were effected. Profoundly penetrated with this irea, I shall carry it with me to my grave, as a strong incitement to unceasing vows that heaven may continue to you the choicest tokens of its beneficence—that your union and brotherly affection may be perpetual—that the free constitution, which is the work of your hands, may be sacredly maintained—that its administration in every department may be stamped with wisdom and virtue—that, in fine, the happiness of the people of these states, under the auspices of liberty, may be made complete by so careful a preservation, and so prudent a use of this blessing, as will acquire to them the glory of recommending it to the applause, the affection and adoption of every nation which is yet a stranger to it.

Here, perhaps, I ought to stop. But a solicitude for your welfare, which cannot end but with my life, and the apprehension of danger, natural to that solicitude, urge me, on an occasion like the present, to offer to your solemn contemplation, and to recommend to your frequent review, some sentiments which are the result of much reflection, of no inconsiderable observation, and which appear to me all important to the permanency of your felicity as a people. These will be offered to you with the more freedom, as you can only see in them the disinterested warnings of a parting friend, who can possibly have no personal motive to bias his counsel. Nor can I forget, as an encouragement to it, your indulgent reception of my sentiments on a former and not dissimilar occasion.

Interwoven as is the love of liberty with every ligament of your hearts, no recommendation of mine is necessary to fortify or confirm the attachment.

The unity of government which constitutes you one people, is also now dear to you. It is justly so; for it is a main pillar in the edifice of your real independence; the support of your tranquility at home; your peace abroad; of your safety; of your prosperity; of that very liberty which you so highly prize. But as it is easy to foresee that, from different causes and from different quarters much pains will be taken, many artifices employed, to weaken in your minds the conviction of this truth, as this is the point in your political fortress against which the batteries of internal and external enemies will be most constantly and actively (though often covertly and insidiously) directed; it is of infinite moment, that you should properly estimate the immense value of your national union to your collective and individual happiness; that you should cherish a cordial, habitual, and immovable attachment to it; accustoming yourselves to think and speak of it as the palladium of your political safety and prosperity; watching for its preservation with jealous anxiety; discountenancing whatever may suggest even a suspicion that it can, in any event, be abandoned; and indignantly frowning upon the first dawning of every attempt to alienate any portion of our country from the rest, or to enfeeble the sacred ties which now link together the various parts.

For this you have every inducement of sympathy and interest. Citizens by birth, or choice, of a common country, that country has a right to concentrate your affections. The name of American, which belongs to you in your national capacity, must always exalt the just pride of patriotism, more than any appellation derived from local discriminations. With slight shades of difference, you have the same religion, manners, habits, and political principles. You have, in a common cause, fought and triumphed together; the independence and liberty you possess, are the work of joint counsels, and joint efforts, of common dangers, suffering, and successes.

But these considerations, however powerfully they addressed themselves to your sensibility, are greatly outweighed by those which apply more immediately to your interest.—Here, every portion of our country finds the most commanding motives for carefully guarding and preserving the union of the whole.

The *north*, in an unrestrained intercourse with the *south*, protected by the

equal laws of a common government, finds in the productions of the latter, great additional resources of maritime and commercial enterprise, and precious materials of manufacturing industry.—The *south* in the same intercourse, benefiting by the same agency of the *north*, sees its agriculture grow and its commerce expand. Turning partly into its own channels the seamen of the *north*, it finds its particular navigation invigorated; and while it contributes, in different ways, to nourish and increase the general mass of the national navigation, it looks forward to the protection of a maritime strength, to which itself is unequally adapted. The *east*, in a like intercourse with the *west*, already finds, and in the progressive improvement of interior communications by land and water, will more and more find a valuable vent for the commodities which it brings from abroad, or manufactures at home. The *west* derives from the *east* supplies requisite to its growth and comfort—and what is perhaps of still greater consequence, it must of necessity owe the *secure* enjoyment of indispensable *outlets* for its own productions, to the weight, influence, and the future maritime strength of the Atlantic side of the Union, directed by an indissoluble community of interest as *one nation*. Any other tenure by which the *west* can hold this essential advantage, whether derived from its own separate strength; or from an apostate and unnatural connection with any foreign power, must be intrinsically precarious.

While then every part of our country thus feels an immediate and particular interest in union, all the parts combined cannot fail to find in the united mass of means and efforts, greater strength, greater resource, proportionably greater security from external danger, a less frequent interruption of their peace by foreign nations; and, what is of inestimable value, they must derive from union, an exemption from those broils and wars between themselves, which so frequently afflict neighboring countries not tied together by the same government; which their own rivalship alone would be sufficient to produce, but which opposite foreign alliances, attachments, and intrigues, would stimulate and embitter. Hence likewise, they will avoid the necessity of those overgrown military establishments, which under any form of government are inauspicious to liberty, and which are to be regarded as particularly hostile to republican liberty. In this sense it is, that your union ought to be considered as a main prop of your liberty, and that the love of the one ought to endear to you the preservation of the other.

These considerations speak a persuasive language to every reflecting and virtuous mind and exhibit the continuance of the union as a primary object of patriotic desire. Is there a doubt whether a common government can embrace so large a sphere? let experience solve it. To listen to mere speculation in such a case were criminal. We are authorized to hope that a proper organization of the whole, with the auxiliary agency of governments for the respective subdivisions, will afford a happy issue to the experiment. It is well worth a fair and full experiment. With such powerful and obvious motives to union, affecting all parts of our country, while experience shall not have demonstrated its impracticability, there will always be reason to distrust the patriotism of those who, in any quarter, may endeavor to weaken its hands.

In contemplating the causes which may disturb our Union, it occurs as matter of serious concern, that any ground should have been furnished for characterizing parties by *geographical* discriminations,—*northern* and *southern*—*Atlantic* and *western;* whence designing men may endeavor to excite a belief that there is a real difference of local interests and views One of the expedients of party to acquire influence within particular districts, is to misrepresent the opinions and aims of other districts. You cannot shield yourselves too much against the jealousies and heart burnings which spring from these misrepresentations; they tend to render alien to each other those who ought to be bound together by fraternal affection. The inhabitants of our western country have lately had a useful lesson on this head; they have seen, in the negotiation by the executive, and in the unanimous ratification by the senate of the treaty with Spain, and in the universal satisfaction at the event throughout the United States, a decisive proof how unfounded were the suspicions propagated among them of a policy in the general government and in the Atlantic states, unfriendly to their interests in regard to the Mississippi. They have been witnesses to the formation of two treaties, that with Great Britain and that with Spain, which secure to them everything they could desire, in respect to our foreign relations, towards confirming their prosperity. Will it not be their wisdom to rely for the preservation of these advantages on the union by which they were procured? will they not henceforth be deaf to those advisers, if such they are, who would sever them from their brethren and connect them with aliens?

To the efficacy and permanency of your Union, a government for the whole is indispensable. No alliances, however strict, between the parts can be an adequate substitute; they must inevitably experience the infractions and interruptions which all alliances, in all times, have experienced. Sensible of this momentous truth, you have improved upon your first essay, by the adoption of a constitution of government, better calculated than your former, for an intimate union, and for the efficacious management of your common concerns. This government, the offspring of our own choice, uninfluenced and unawed, adopted upon full investigation and mature deliberation, completely free in its principles, in the distribution of its powers, uniting security with energy, and maintaining within itself a provision for its own amendment, has a just claim to your confidence and your support. Respect for its authority, compliance with its laws, acquiescence in its measures, are duties enjoined by the fundamental maxims of true liberty. The basis of our political systems is the right of the people to make and to alter their constitutions of government.—But the constitution which at any time exists, until changed by an explicit and authentic act of the whole people, is sacredly obligatory upon all. The very idea of the power, and the right of the people to establish government, presuppose the duty of every individual to obey the established government.

All obstructions to the execution of the laws, all combinations and associations under whatever plausible character, with the real design to direct, control, counteract, or awe the regular deliberations and action of the constituted authorities, are destructive of this fundamental principle, and of fatal tendency.—They serve to organize faction, to give it an artificial and extraordinary force, to put in the place of the delegated will of the nation the will of party, often a small but artful and enterprising minority of the community; and, according to the alternate triumphs of different parties, to make the public administration the mirror of the ill concerted and incongruous projects of faction, rather than the organ of consistent and wholesome plans digested by common councils, and modified by mutual interests.

However combinations or associations of the above description may now and then answer popular ends, they are likely, in the course of time and things, to become potent engines, by which cunning, ambitious, and unprincipled men, will be enabled to subvert the power of the people, and to usurp for themselves the reins of government; destroying afterwards the very engines which have lifted them to unjust dominion.

Towards the preservation of your government and the permanency of your present happy state, it is requisite, not only, that you steadily discountenance irregular opposition to its acknowledged authority, but also that you resist with care the spirit of innovation upon its principles, however specious the pretext. One method of assault may be to effect, in the forms of the constitution, alterations which will impair the energy of the system; and thus to undermine what cannot be directly overthrown. In all the changes to which you may be involved, remember that time and habit are at least as necessary to fix the true character of governments, as of other human institutions:—that experience is the surest standard by which to test the real tendency of the existing constitution of a country:—that facility in changes, upon the credit of mere hypothesis and opinion, exposes to perpetual change from the endless variety of hypothesis and opinion: and remember, especially, that for the efficient management of your common interests in a country so extensive as ours, a government of as much vigor as is consistent with the perfect security of liberty is indispensable. Liberty itself will find in such a government, with powers properly distributed and adjusted, its surest guardian. It is, indeed, little else than a name, where the government is too feeble to withstand the enterprises of faction, to confine each member of the society within the limits

prescribed by the laws, and to maintain all in the secure and tranquil enjoyment of the rights of person and property.

I have already intimated to you the danger of parties in the state, with particular references to the founding them on geographical discrimination. Let me now take a more comprehensive view, and warn you in the most solemn manner against the baneful effects of the spirit of party generally.

This spirit, unfortunately, is inseparable from our nature, having its root in the strongest passions of the human mind.—It exists under different shapes in all governments, more or less stifled, controlled, or repressed; but in those of the popular form it is seen in its greatest rankness, and is truly their worst enemy.

The alternate domination of one faction over another, sharpened by the spirit of revenge natural to party dissension, which in different ages and countries has perpetrated the most horrid enormities, is itself a frightful despotism. But this leads at length to a more formal and permanent despotism. The disorders and miseries which result, gradually incline the minds of men to seek security and repose in the absolute power of an individual; and, sooner or later, the chief of some prevailing faction, more able or more fortunate than his competitors, turns this disposition to the purpose of his own elevation on the ruins of public liberty.

Without looking forward to an extremity of this kind, (which nevertheless ought not to be entirely out of sight) the common and continual mischiefs of the spirit or party are sufficient to make it the interest and duty of a wise people to discourage and restrain it.

It serves always to distract the public councils, and enfeeble the public administration. It agitates the community with ill founded jealousies and false alarms; kindles the animosity of one part against another; foments occasional riot and insurrection. It opens the door to foreign influence and corruption, which finds a facilitated access to the government itself through the channels of party passions. Thus the policy and the will of one country are subjected to the policy and will of another.

There is an opinion that parties in free countries are useful checks upon the administration of the government, and serve to keep alive the spirit of liberty. This within certain limits is probably true; and in governments of a monarchial cast, patriotism may look with indulgence, if not with favor, upon the spirit of party. But in those of the popular character, in governments purely elective, it is a spirit not to be encouraged. From their natural tendency, it is certain there will always be enough of that spirit for every salutary purpose. And there being constant danger of excess, the effort ought to be, by force of public opinion, to mitigate and assuage it. A fire not to be quenched, it demands a uniform vigilance to prevent it bursting into a flame, lest instead of warming, it should consume.

It is important likewise, that the habits of thinking in a free country should inspire caution in those intrusted with its administration, to confine themselves within their respective constitutional spheres, avoiding in the exercise of the powers of one department, to encroach upon another. The spirit of encroachment tends to consolidate the powers of all the departments in one, and thus to create, whatever the form of government, a real despotism. A just estimate of that love of power and proneness to abuse it which predominate in the human heart, is sufficient to satisfy us of the truth of this position. The necessity of reciprocal checks in the exercise of political power, by dividing and distributing it into different depositories, and constituting each the guardian of the public weal against invasion of the others, has been evinced by experiments ancient and modern; some of them in our country and under our own eyes.—To preserve them must be as necessary as to institute them. If, in the opinion of the people, the distribution or modification of the constitutional powers be in any particular wrong, let it be corrected by an amendment in the way which the constitution designates.—But let there be no change by usurpation; for though this, in one instance, may be the instrument of good, it is the customary weapon by which free governments are destroyed. The precedent must always greatly overbalance in permanent evil any partial or transient benefit which the use can at any time yield.

Of all the dispositions and habits which lead to political prosperity, religion and morality are indispensable supports. In vain would that man claim the tribute of patriotism, who should labor to subvert these great pillars of human happiness, these firmest props of the duties of men and citizens. The mere politician, equally with the pious man, ought to respect and to cherish them. A volume could not trace all their connections with private and public felicity. Let it simply be asked, where is the security for property, for reputation, for life, if the sense of religious obligation *desert* the oaths which are the instruments of investigation in courts of justice? And let us with caution indulge the supposition that morality can be maintained without religion. Whatever may be conceded to the influence of refined education on minds of peculiar structure, reason and experience both forbid us to expect, that national morality can prevail in exclusion of religious principle.

It is substantially true, that virtue or morality is a necessary spring of popular government. The rule, indeed extends with more or less force to every species of free government. Who that is a sincere friend to it can look with indifference upon attempts to shake the foundation of the fabric?

Promote, then, as an object of primary importance, institutions for the general diffusion of knowledge. In proportion as the structure of a government gives force to public opinion, it should be enlightened.

As a very important source of strength and security, cherish public credit. One method of preserving it is to use it as sparingly as possible, avoiding occasions of expense by cultivating peace, but remembering, also, that timely disbursements, to prepare for danger, frequently prevent much greater disbursements to repel it; avoiding likewise the accumulation of debt, not only by shunning occasions of expense, but by vigorous exertions, in time of peace, to discharge the debts which unavoidable wars may have occasioned, not ungenerously throwing upon posterity the burden which we ourselves ought to bear. The execution of these maxims belongs to your representatives, but it is necessary that public opinion should cooperate. To facilitate to them the performance of their duty, it is essential that you should practically bear in mind, that towards the payment of debts there must be revenue; that to have revenue there must be taxes, that no taxes can be devised which are not more or less inconvenient and unpleasant; that the intrinsic embarrassment inseparable from the selection of the proper object (which is always a choice of difficulties), ought to be a decisive motive for a candid construction of the conduct of the government in making it, and for a spirit of acquiescence in the measures for obtaining revenue, which the public exigencies may at any time dictate.

Observe good faith and justice towards all nations; cultivate peace and harmony with all. Religion and morality enjoin this conduct, and can it be that good policy does not equally enjoin it? It will be worthy of a free, enlightened, and, at no distant period, a great nation, to give to mankind the magnanimous and too novel example of a people always guided by an exalted justice and benevolence. Who can doubt but, in the course of time and things, the fruits of such a plan would richly repay any temporary advantages which might be lost by a steady adherence to it; can it be that Providence has not connected the permanent felicity of a nation with its virtue? The experiment, at least is recommended by every sentiment which ennobles human nature. Alas! is it rendered impossible by its vices?

In the execution of such a plan, nothing is more essential than that permanent, inveterate antipathies against particular nations and passionate attachments for others, should be excluded; and that in place of them, just and amicable feelings towards all should be cultivated. The nation which indulges towards another an habitual hatred, or an habitual fondness, is in some degree a slave. It is a slave to its animosity or to its affection, either of which is sufficient to lead it astray from its duty and its interest. Antipathy in one nation against another disposes each more readily to offer insult and injury, to lay hold of slight causes of umbrage, and to be haughty and intractable when accidental or trifling occasions of dispute occur. Hence, frequent collisions, obstinate, envenomed, and bloody contests. The nation, prompted by ill will and resentment, sometimes impels to war the government, contrary to the best calculations of policy. The government sometimes participates in the national propensity, and adopts through passion what reason would reject; at other times, it makes the animosity of the nation subservient to projects of hostility, instigated by pride, ambition, and other sinister and pernicious motives. The peace

often, sometimes perhaps the liberty of nations, has been the victim.

So likewise, a passionate attachment of one nation for another produces a variety of evils. Sympathy for the favorite nation, facilitating the illusion of an imaginary common interest, in cases where no real common interest exists, and infusing into one the enmities of the other, betrays the former into a participation in the quarrels and wars of the latter, without adequate inducements or justifications. It leads also to concessions, to the favorite nation, of privileges denied to others, which is apt doubly to injure the nation making the concessions, by unnecessary parting with what ought to have been retained, and by exciting jealousy, ill will, and a disposition to retaliate in the parties from whom equal privileges are withheld; and it gives to ambitious, corrupted or deluded citizens who devote themselves to the favorite nation, facility to betray or sacrifice the interests of their own country, without odium, sometimes even with popularity; gilding with the appearances of a virtuous sense of obligation, a commendable deference for public opinion, or a laudable zeal for public good, the base or foolish compliances of ambition, corruption, or infatuation.

As avenues to foreign influence in innumerable ways, such attachments are particularly alarming to the truly enlightened and independent patriot. How many opportunities do they afford to tamper with domestic factions, to practice the arts of seduction, to mislead public opinion, to influence or awe the public councils!—Such an attachment of a small or weak, towards a great and powerful nation, dooms the former to be the satellite of the latter.

Against the insidious wiles of foreign influence, (I conjure you to believe me fellow citizens,) the jealousy of a free people ought to be *constantly* awake; since history and experience prove, that foreign influence is one of the most baneful foes of republican government. But that jealousy, to be useful, must be impartial, else it becomes the instrument of the very influence to be avoided, instead of a defense against it. Excessive partiality for one foreign nation and excessive dislike for another, cause those whom they actuate to see danger only on one side, and serve to veil and even second the arts of influence on the other. Real patriots, who may resist the intrigues of the favorite, are liable to become suspected and odious; while its tools and dupes usurp the applause and confidence of the people, to surrender their interest.

The great rule of conduct for us, in regard to foreign nations, is, in extending our commercial relations, to have with them as little *political* connection as possible. So far as we have already formed engagements, let them be fulfilled with perfect good faith: Here let us stop.

Europe has a set of primary interests, which to us have none, or a very remote relation. Hence, she must be engaged in frequent controversies, the causes of which are essentially foreign to our concerns. Hence, therefore, it must be unwise in us to implicate ourselves, by artificial ties, in the ordinary vicissitudes of her politics, or the ordinary combinations and collusions of her friendships or enmities.

Our detached and distant situation invites and enables us to pursue a different course. If we remain one people, under an efficient government, the period is not far off when we may defy material injury from external annoyance; when we may take such an attitude as will cause the neutrality we may at any time resolve upon, to be scrupulously respected; when belligerent nations, under the impossibility of making acquisitions upon us will not lightly hazard the giving us provocation, when we may choose peace or war, as our interest, guided by justice, shall counsel.

Why forego the advantages of so peculiar a situation? Why quit our own to stand upon foreign ground? Why, by interweaving our destiny with that of any part of Europe, entangle our peace and prosperity in the toils of European ambition, rivalship, interest, humor, or caprice?

It is our true policy to steer clear of permanent alliance with any portion of the foreign world; so far, I mean, as we are now at liberty to do it; for let me not be understood as capable of patronizing infidelity to existing engagements. I hold the maxim no less applicable to public than private affairs, that honesty is always the best policy. I repeat it, therefore, let those engagements be observed in their genuine sense. But in my opinion, it is unnecessary, and would be unwise to extend them.

Taking care always to keep ourselves by suitable establishments, on a respectable defensive posture, we may safely trust to temporary alliances for extraordinary emergencies.

Harmony, and a liberal intercourse with all nations, are recommended by policy, humanity, and interest. But even our commercial policy should hold an equal and impartial hand; neither seeking nor granting exclusive favors or preferences; consulting the natural course of things; diffusing and diversifying by gentle means the streams of commerce, but forcing nothing; establishing with powers so disposed, in order to give trade a stable course, to define the rights of our merchants, and to enable the government to support them, conventional rules of intercourse, the best that present circumstances and mutual opinion will permit, but temporary, and liable to be from time to time abandoned or varied as experience and circumstances shall dictate; constantly keeping in view, that it is folly in one nation to look for disinterested favors from another; that it must pay with a portion of its independence for whatever it may accept under that character; that by such acceptance, it may place itself in the condition of having given equivalents for nominal favors, and yet of being reproached with ingratitude for not giving more. There can be no greater error than to expect, or calculate upon real favors from nation to nation. It is an illusion which experience must cure, which a just pride ought to discard.

In offering to you my countrymen, these counsels of an old and affectionate friend, I dare not hope they will make the strong and lasting impression I could wish; that they will control the usual current of the passions, or prevent our nation from running the course which has hitherto marked the destiny of nations, but if I may even flatter myself that they may be productive of some partial benefit, some occasional good; that they may now and then recur to moderate the fury of party spirit, to warn against the mischiefs of foreign intrigue, to guard against the impostures of pretended patriotism; this hope will be a full recompense for the solicitude for your welfare by which they have been dictated.

How far, in the discharge of my official duties, I have been guided by the principles which have been delineated, the public records and other evidences of my conduct must witness to you and to the world. To myself, the assurance of my own conscience is, that I have, at least, believed myself to be guided by them.

In relation to the still subsisting war in Europe; my proclamation of the 22d of April, 1793, is the index to my plan. Sanctioned by your approving voice, and by that of your representatives in both houses of congress, the spirit of that measure has continually governed me, uninfluenced by any attempts to deter or divert me from it.

After deliberate examination, with the aid of the best lights I could obtain, I was well satisfied that our country, under all the circumstances of the case, had a right to take, and was bound in duty and interest, to take a neutral position. Having taken it, I determined, as far as should depend upon me, to maintain it with moderation, perseverance, and firmness.

The considerations which respect the right to hold this conduct, it is not necessary on this occasion to detail. I will only observe that, according to my understanding of the matter, that right, so far from being denied by any of the belligerent powers, has been virtually admitted by all.

The duty of holding a neutral conduct may be inferred, without any thing more, from the obligation which justice and humanity impose on every nation, in cases in which it is free to act, to maintain inviolate the relations of peace and amity towards other nations.

The inducements of interest for observing that conduct will best be referred to your own reflections and experience. With me a predominant motive has been to endeavor to gain time to our country to settle and mature its yet recent institutions, and to progress, without interruption, to that degree of strength, and consistency which is necessary to give it, humanly speaking, the command of its own fortunes.

Though in reviewing the incidents of my administration, I am unconscious of intentional error, I am nevertheless too sensible of my defects not to think it probable that I may have committed many errors. Whatever they may be, I fervently beseech the Almighty to avert or mitigate the evils to which they may tend. I shall also carry with me the hope

that my country will never cease to view them with indulgence; and that, after forty-five years of my life dedicated to its service, with an upright zeal, the faults of incompetent abilities will be consigned to oblivion, as myself must soon be to the mansions of rest.

Relying on its kindness in this as in other things, and actuated by that fervent love towards it, which is so natural to a man who views in it the native soil of himself and his progenitors for several generations; I anticipate with pleasing expectation that retreat in which I promise myself to realize without alloy, the sweet enjoyment of partaking, in the midst of my fellow citizens, the benign influence of good laws under a free government—the ever favorite object of my heart, and the happy reward, as I trust, of our mutual cares, labors and dangers.

GEO. WASHINGTON.

UNITED STATES,
17th September, 1796.

THE NATION'S HIGHWAY SYSTEM
(H. DOC. NO. 93)

The SPEAKER laid before the House the following message from the President of the United States, which was read, and, together with accompanying papers, referred to the Committee on Public Works and ordered to be printed:

To the Congress of the United States:

Our unity as a Nation is sustained by free communication of thought and by easy transportation of people and goods. The ceaseless flow of information throughout the Republic is matched by individual and commercial movement over a vast system of interconnected highways criss-crossing the country and joining at our national borders with friendly neighbors to the north and south.

Together, the uniting forces of our communication and transportation systems are dynamic elements in the very name we bear—United States. Without them, we would be a mere alliance of many separate parts.

The Nation's highway system is a gigantic enterprise, one of our largest items of capital investment. Generations have gone into its building. Three million, three hundred and sixty-six thousand miles of road, traveled by 58 million motor vehicles, comprise it. The replacement cost of its drainage and bridge and tunnel works is incalculable. One in every seven Americans gains his livelihood and supports his family out of it. But, in large part, the network is inadequate for the Nation's growing needs.

In recognition of this, the governors in July of last year at my request began a study of both the problem and methods by which the Federal Government might assist the States in its solution. I appointed in September the President's Advisory Committee on a National Highway Program, headed by Lucius D. Clay, to work with the governors and to propose a plan of action for submission to the Congress. At the same time, a committee representing departments and agencies of the National Government was organized to conduct studies coordinated with the other two groups.

All three were confronted with inescapable evidence that action, comprehensive and quick and forward-looking, is needed.

First. Each year, more than 36,000 people are killed and more than a million injured on the highways. To the home where the tragic aftermath of an accident on an unsafe road is a gap in the family circle, the monetary worth of preventing that death cannot be reckoned. But reliable estimates place the measurable economic cost of the highway accident toll to the Nation at more than $4.3 billion a year.

Second. The physical condition of the present road net increases the cost of vehicle operation, according to many estimates, by as much as 1 cent per mile of vehicle travel. At the present rate of travel, this totals more than $5 billion a year. The cost is not borne by the individual vehicle operator alone. It pyramids into higher expense of doing the Nation's business. Increased highway transportation costs, passed on through each step in the distribution of goods, are paid ultimately by the individual consumer.

Third. In case of an atomic attack on our key cities, the road net must permit quick evacuation of target areas, mobilization of defense forces and maintenance of every essential economic function. But the present system in critical areas would be the breeder of a deadly congestion within hours of an attack.

Fourth. Our gross national product, about $357 billion in 1954, is estimated to reach over $500 billion in 1965, when our population will exceed 180 million and, according to other estimates, will travel in 81 million vehicles 814 billion vehicle-miles that year. Unless the present rate of highway improvement and development is increased, existing traffic jams only faintly foreshadow those of 10 years hence.

To correct these deficiencies is an obligation of Government at every level. The highway system is a public enterprise. As the owner and operator, the various levels of Government have a responsibility for management that promotes the economy of the Nation and properly serves the individual user. In the case of the Federal Government, moreover, expenditures on a highway program are a return to the highway user of the taxes which he pays in connection with his use of the highways.

Congress has recognized the national interest in the principal roads by authorizing two Federal-aid systems, selected cooperatively by the States, local units, and the Bureau of Public Roads.

The Federal-aid primary system as of July 1, 1954, consisted of 234,407 miles, connecting all the principal cities, county seats, ports, manufacturing areas, and other traffic-generating centers.

In 1944 the Congress approved the Federal-aid secondary system, which on July 1, 1954, totaled 482,972 miles, referred to as farm-to-market roads—important feeders linking farms, factories, distribution outlets, and smaller communities with the primary system.

Because some sections of the primary system, from the viewpoint of national interest, are more important than others, the Congress in 1944 authorized the selection of a special network, not to exceed 40,000 miles in length, which would connect by routes, as direct as practicable, the principal metropolitan areas, cities, and industrial centers, serve the national defense, and connect with routes of continental importance in the Dominion of Canada and the Republic of Mexico.

This national system of interstate highways, although it embraces only 1.2 percent of total road mileage, joins 42 State capital cities and 90 percent of all cities over 50,000 population. It carries more than a seventh of all traffic, a fifth of the rural traffic, serves 65 percent of the urban and 45 percent of the rural population. Approximately 37,600 miles have been designated to date. This system and its mileage are presently included within the Federal-aid primary system.

In addition to these systems, the Federal Government has the principal, and in many cases the sole, responsibility for roads that cross or provide access to federally owned land—more than one-fifth the Nation's area.

Of all these the interstate system must be given top priority in construction planning. But at the current rate of development the interstate network would not reach even a reasonable level of extent and efficiency in half a century. State highway departments cannot effectively meet the need. Adequate right-of-way to assure control of access, grade separation structures, relocation and realinement of present highways—all these, done on the necessary scale within an integrated system, exceed their collective capacity.

If we have a congested and unsafe and inadequate system, how then can we improve it so that 10 years from now it will be fitted to the Nation's requirements?

A realistic answer must be based on a study of all phases of highway financing, including a study of the costs of completing the several systems of highways, made by the Bureau of Public Roads in cooperation with the State highway departments and local units of government. This study, made at the direction of the 83d Congress in the 1954 Federal Aid Highway Act, is the most comprehensive of its kind ever undertaken.

Its estimates of need show that a 10-year construction program to modernize all our roads and streets will require expenditure of $101 billion by all levels of government.

The preliminary 10-year totals of needs by road systems are:

	Billions
Interstate (urban $11, rural $12 billion)	$23
Federal-aid primary (urban $10, rural $20 billion)	30
Federal-aid secondary (entirely rural)	15
Subtotal of Federal-aid systems (urban $21, rural $47 billion)	68
Other roads and streets (urban $16, rural $17 billion)	33
Total of needs (urban $37, rural $64 billion)	101

The governors' conference and the President's advisory committee are agreed that the Federal share of the needed construction program should be about 30 percent of the total, leaving to State and local units responsibility to finance the remainder.

The obvious responsibility to be accepted by the Federal Government, in addition to the existing Federal interest in our 3,366,000-mile network of highways, is the development of the interstate system, with its most essential urban arterial connections.

In its report, the advisory committee recommends:

1. That the Federal Government assume principal responsibility for the cost of a modern interstate network to be completed by 1964 to include the most essential urban arterial connections; at an annual average cost of $2.5 billion for the 10-year period.

2. That Federal contributions to primary and secondary road systems, now at the rate authorized by the 1954 act of approximately $525 million annually, be continued.

3. That Federal funds for that portion of the Federal-aid systems in urban areas not on the interstate system, now approximately $75 million annually, be continued.

4. That Federal funds for forest highways be continued at the present $22.5-million-per-year rate.

Under these proposals, the total Federal expenditures through the 10-year period would be:

	Millions
Interstate system	$25,000
Federal-aid primary and secondary	5,250
Federal-aid urban	750
Forest highways	225
	31,225

The extension of necessary highways in the Territories and highway maintenance and improvement in national parks, on Indian lands, and on other public lands of the United States will continue to be treated in the budget for these particular subjects.

A sound Federal highway program, I believe, can and should stand on its own feet, with highway users providing the total dollars necessary for improvement and new construction. Financing of interstate and Federal-aid systems should be based on the planned use of increasing revenues from present gas and diesel-oil tanks, augmented in limited instances with tolls.

I am inclined to the view that it is sounder to finance this program by special bond issues, to be paid off by the above-mentioned revenues which will be collected during the useful life of the roads and pledged to this purpose, rather than by an increase in general revenue obligations.

At this time, I am forwarding for use by the Congress in its deliberations the report to the President made by the President's Advisory Committee on a National Highway Program. This study of the entire highway traffic problem and presentation of a detailed solution for its remedy is an analytical review of the major elements in a most complex situation. In addition, the Congress will have available the study made by the Bureau of Public Roads at the direction of the 83d Congress.

These two documents together constitute a most exhaustive examination of the national highway system, its problems, and their remedies. Inescapably, the vastness of the highway enterprise fosters varieties of proposals which must be resolved into a national highway pattern. The two reports, however, should generate recognition of the urgency that presses upon us; approval of a general program that will give us a modern, safe highway system; realization of the rewards for prompt and comprehensive action. They provide a solid foundation for a sound program.

DWIGHT D. EISENHOWER.

THE WHITE HOUSE, *February 22, 1955.*

COMMITTEE ON FOREIGN AFFAIRS

Mr. SMITH of Virginia (on behalf of Mr. MADDEN), from the Committee on Rules, reported the following privileged resolution (H. Res. 91, Rept. No. 64), which was referred to the House Calendar and ordered to be printed:

Resolved, That the Committee on Foreign Affairs, acting as a whole or by subcommittee, is authorized and directed to conduct thorough studies and investigations of all matters coming within the jurisdiction of such committee.

SEC. 2. For the purposes of this resolution, the committee, or any subcommittee thereof, is authorized to hold such hearings, to sit and act during the present Congress at such times and places as the committee may determine, whether or not the House is in session, has recessed, or has adjourned, to require the attendance of such witnesses and the production of such books, papers, and documents by subpena or otherwise, and to take testimony, as it deems necessary. Subpenas may be issued under the signature of the chairman of the committee and shall be served by any person designated by such chairman. The chairman of the committee or any member designated by him may administer oaths to witnesses.

With the following committee amendment:

Strike out all after the revolving clause and in lieu thereof insert the following: "That effective from January 3, 1955, the Committee on Foreign Affairs, acting as a whole or by subcommittee, is authorized and directed to conduct a full and complete investigation and study of all matters—

"(1) relating to the laws, regulations, directives, and policies including personnel pertaining to the Department of State and such other departments and agencies engaged primarily in the implementation of United States foreign policy and the overseas operation, personnel, and facilities of departments and agencies of the United States which participate in the development and execution of such policy;

"(2) relating to the carrying out of programs and operations authorized by the Mutual Security Act and to other laws and measures to promote the foreign policy of the United States;

"(3) relating to activities and programs of international organizations in which the United States participates;

"(4) relating to the effectiveness of United States programs of assistance and information;

"(5) relating to legislation within the jurisdiction of the Committee on Foreign Affairs pursuant to provisions of rule XI of the Rules of the House of Representatives.

"*Provided*, That the committee shall not undertake any investigation of any subject matter which is being investigated by any other standing committee of the House.

"The committee shall report to the House (or to the Clerk of the House if the House is not in session) as soon as practicable during the present Congress the results of its investigation and study, together with such recommendations as it deems advisable.

"For the purpose of carrying out this resolution the committee or subcommittee is authorized to sit and act during the present Congress at such times and places within or outside the United States, whether the House is in session, has recessed, or has adjourned, to hold such hearings, and to require, by subpena or otherwise, the attendance and testimony of such witnesses and the production of such books, records, correspondence, memoranda, papers, and documents, as it deems necessary. Subpenas may be issued under the signature of the chairman of the committee or any member of the committee designated by him, and may be served by any person designated by such chairman or member."

Amend the title to read as follows: "Resolution authorizing the Committee on Foreign Affairs to conduct a full and complete investigation of matters relating to the laws, regulations, directives, and policies including personnel pertaining to the Department of State and such other departments and agencies engaged primarily in the implementation of United States foreign policy and the overseas operations, personnel, and facilities of departments and agencies of the United States which participate in the development and execution of such policy."

COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE

Mr. SMITH of Virginia (on behalf of Mr. TRIMBLE), from the Committee on Rules, reported the following privileged resolution (H. Res. 105, Rept. No. 65), which was referred to the House Calendar and ordered to be printed:

Resolved, That effective from January 5, 1955, the Committee on Interstate and Foreign Commerce may make such investigations and studies as it deems advisable with respect to any matter within its jurisdiction. For the purposes of such investigations and studies the committee, or any subcommittee thereof, may sit and act during the present Congress at such times and places within or outside the United States, whether the House is in session, has recessed, or has adjourned, to hold such hearings, and to require, by subpena or otherwise, the attendance and testimony of such witnesses and the production of such books, records, correspondence, memoranda, papers, and documents, as it deems necessary. Subpenas may be issued under the signature of the chairman of the committee or any member of the committee designated by him, and may be served by any person designated by such chairman or member.

The committee may report to the House at any time during the present Congress the results of any investigation or study made under authority of this resolution, together with such recommendations as it deems appropriate. Any such report shall be filed with the Clerk of the House if the House is not in session.

With the following committee amendment:

Strike out all after the resolving clause and in lieu thereof insert the following:

"That effective from January 3, 1955, the Committee on Interstate and Foreign Commerce may make investigations and studies into the following matters within its jurisdiction:

"(1) the competition among the various modes of transportation, whether rail, air, motor, water, or pipeline; the preservation of the inherent advantages of each mode of transportation; expedition of the operations of the regulatory bodies; the adequacy of the national transportation system for defense and for the expanding needs of our growing economy;

"(2) the allocation of channels to radio and television stations; educational television; subscription and theater television; the administration by the Federal Communications Commission of the statutes which it administers;

"(3) the treatment of nonscheduled and feeder airline carriers; improvements to air safety; the restrictions placed on American air carriers which impede the free flow of commerce; rates and continuance of subsidy payments; airport construction, and hazards of adjacency to airports; condemnation of air space; aircraft and airline liability;

"(4) the adequacy of the protection to investors afforded by the disclosure provisions of the Securities Acts measured in terms of the purposes intended and the practice in distribution and underwriting; the adequacy of the protection to investors in investment companies; the adequacy of the current protection to customers of broker-dealers; the expediting of the liquidation of the work under the Public Utility Holding Company Act in the simplification and integration of utility holding companies;

"(5) the availability and adequacy of petroleum, natural gas, and electric energy resources for defense and the expanding needs of our growing economy; the development of synthetic liquid fuel processes; the expediting of rate cases;

"(6) advertising generally, fair competition, and the administration of such statutes administered by the Federal Trade Commission;

"(7) research in weather, including air pollution and smog; artificially induced weather, and the sovereignty of a cloud;

"(8) the effects of inflation upon the benefits provided under railroad retirement and railroad unemployment provisions; inequities in provisions of the statutes relating thereto, with comparison of benefits under the Social Security System; and the operations of the Railroad Retirement Board;

"(9) provision for medical care; the adequacy of supply of hospitals, treatment centers, nursing homes, medical personnel, and medical teaching facilities; research into human disease; the operations of the Public Health Service, and of the Food and Drug Administration;

"(10) research in the basic sciences being undertaken by the National Science Foundation;

"(11) disposition of funds arising from the operation of the Trading With the Enemy Act;

"(12) the current and prospective consumption of newsprint and other papers used in the printing of newspapers, magazines, or such other publications as are admitted to second-class mailing privileges; the current and prospective production and supply of such papers, factors affecting such production and supply, and possibilities of additional production through the use of alternate source materials.

"Provided, That the committee shall not undertake any investigation of any subject which is being investigated by any other standing committee of the House.

"For the purposes of such investigations and studies the committee, or any subcommittee thereof, may sit and act during the present Congress at such times and places within or outside the United States, whether the House is in session, has recessed, or has adjourned, to hold such hearings, and to require, by subpena or otherwise, the attendance and testimony of such witnesses and the production of such books, records, correspondence, memoranda, papers, and documents, as it deems necessary. Subpenas may be issued under the signature of the chairman of the committee or any member of the committee designated by him, and may be served by any person designated by such chairman or member.

"The committee may report to the House at any time during the present Congress the results of any investigation or study made under authority of this resolution, together with such recommendations as it deems appropriate. Any such report shall be filed with the Clerk of the House if the House is not in session."

Amend the title to read as follows: "Resolution to authorize the Committee on Interstate and Foreign Commerce to conduct investigations and studies with respect to certain matters within its jurisdiction."

CALENDAR WEDNESDAY

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that business in order on Calendar Wednesday this week may be dispensed with.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

OPERATION INTIMIDATION

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the gentleman from Pennsylvania [Mr. WALTER] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. WALTER. Mr. Speaker, on Monday, the Committee on Un-American Activities was to hold its first hearing of this Congress. The hearing was scheduled for Fort Wayne, Ind. Witnesses were to include individuals whose Communist activities, over many years, were detrimental to their country and their fellow men. These individuals are leaders of the United Electrical, Radio, and Machine Workers of America, a labor union which was expelled from the CIO.

On Thursday of this week, this union is engaged in a bargaining election—along with the IUE-CIO and the UAW-AFL—among the employees of the Fort Wayne, Ind., plant of Magnavox Corp. The fact that this election is scheduled had little to do with our hearing. In fact, in calling this hearing we were completing some of the committee's unfinished business. However, with the announcement of the hearing, members of the committee and Members of the House were bombarded with telegrams and letters demanding that the hearing be canceled. At the request of the UE, I have agreed, not to cancel these hearings, but to postpone them for 1 week, until February 28. This postponement was agreed to very reluctantly, and only after it was feared that false and malicious charges made against the committee by the UE might result in this Communist-dominated union continuing as the bargaining agent in the vital defense plant.

Magnavox, in the Fort Wayne plant, has defense contracts classified as high as "secret" and 95 percent of the production of the plant is under defense contracts. Many weapons of defense, used by the Army, Navy, and Air Force, could not operate without electronic controls made exclusively at this plant.

I sincerely hope that by the time the hearing is called to order next Monday, the people at Magnavox will have representing them a union which holds the welfare and safety of the Nation with the same high regard as they do the worker, rather than the union which has, since its inception, had as its No. 1 objective the protection of the Communist Party of the United States and members of the Community Party.

With respect to the telegrams which many of us received, demanding that this hearing be canceled, I wish to call the attention of the House to a publication which I hold in my hand, titled "Operation Intimidation." It is a publication of the UE. It is a booklet properly named because it tells the Communist leaders of UE how to carry out a program of intimidation against the Congress, the Committee on Un-American Activities, and its members.

This booklet could well have a subtitle such as "False Witness," the title of the forthcoming book by Matusow. Like Matusow's book, it was prepared under the direction of the Communist Party and tells only the story which the Communist Party wants told; namely, a story which helps protect the members of the Communist Party and thereby the Communist Party itself. As Matusow's book attempts to make Americans skeptical of the testimony of all former Communists, the UE booklet attempts to sell the American worker on a theory that, when a Communist is subpenaed before the committee and he happens to hold a union position, the committee is attacking the labor movement.

The committee and the Congress are not alone portrayed as playing this role. Dealing with the 1952 hearings of the committee in Detroit, Mich., the booklet states:

> The main result of the hearings in Detroit is that 60,000 workers were deprived of their legally elected representatives through the teamwork of a congressional committee headed by a poll tax Congressman [Woop], a powerful profiteering company [Ford] and a labor leader [Reuther] who betrays his own membership.

The 60,000 workers are those belonging to Local 600, UAW. But why should the UE be concerned with this UAW local? Because it is controlled by a so-called "progressive" group of officers over whom the Communist Party exercises much control. The UE also defends the officers of Local 600, UAW, because this CIO local union has been used to attack the CIO and support the UE during bargaining elections between the UE and

CIO unions, such as the IUE and the UAW itself.

Under a subsection, "How to Fight the Committees," there are these instructions:

The key to a successful fight against such a committee lies in preparation and organization.

Usually there is advance notice of a committee coming to town, ranging from several days to several weeks. Immediately union leadership should start a campaign to acquaint both membership and the community with the nature and record of that particular committee.

There should be a single center for the fight, possibly a citizens' committee on civil rights, or a united labor committee, or a single local of a union which can issue statements and be the source of the publicity against the witch-hunters.

The first step is simply to inform the union membership and the community that the witch-hunters are coming. Radio spots of 1 minute each, or half a minute, constantly repeated day in and day out, with a catch slogan are very effective.

Carrying out these instructions to the last detail, this Communist group went into action as soon as it was announced that hearings were to be held in Fort Wayne. Immediately telegrams were dispatched from all UE locals in the Fort Wayne area. They were also dispatched from other UE and Communist-dominated unions scattered throughout the United States.

The first I received was from John T. Gojack, president of district 9, UE, and a vice president of the international union. The same John T. Gojack who is under subpena to appear before the committee. The same individual who, at the same time, sent a telegram to the Speaker of the House of Representatives calling for an investigation of me and of the Committee on Un-American Activities.

This telegram to me was sent not to register a protest with the committee—as a matter of fact, Gojack did not care if we ever received or read it—but, rather, in order that they have something to file with the newspapers, press services, and radio newscasters. Gojack knew that only through the means of a telegram could he get free press coverage of a smear upon the committee. The telegrams gave him an opportunity to confuse the workers through such false charges as that the committee is a union-busting instrument of the Magnavox Co. In sending the telegrams, Gojack and company were carrying out the instructions which I quoted from the booklet.

Gojack's telegram of February 10 accuses the committee of assisting the Magnavox Co. in its efforts to destroy union representation among its employees. The telegram states that Magnavox, aided by the CIO, AFL, and the committee, "is seeking to oust UE so that seniority rights, higher wages, and other contractual gains under UE can be abolished."

Mr. Speaker, how far from the truth will the Communists stray to deceive the honest, patriotic worker? The truth on these points is that, after the election which will be held Thursday, the Magnavox workers will be represented by a union, and further that, under the CIO or AFL, not only will the seniority rights and higher wages not be abolished, but rather the seniority rights will be stronger and the wages higher than they are today.

Mr. Speaker, the UE does not fool me as they do the workers and, along this line, I charge the UE with making deals with industry to the detriment of the workers in order that industry not put its support behind the CIO and AFL in ridding the labor movement of this Moscow conspiracy.

To support his attack upon the committee, and following the guide set forth in the booklet, Gojack uses a statement of the late Cardinal Mundelein and an editorial which appeared in the Detroit Free Press. He takes advantage of 17 years to support his position. Cardinal Mundelein's remarks were against what this great Catholic leader considered to be irresponsible acts by the Dies committee. His statement was contained in the publication of the Chicago diocese New World of December 2, 1938. The Detroit Free Press editorial was published October 27, 1947.

Gojack could have quoted from the remarks of many great Americans who have, from time to time, objected to phases of the work conducted by the committee. Many Members of this body condemned the subpenaing of former President Harry Truman by the committee last Congress. They could have quoted my condemnation of that act.

Nowhere in this document does the UE advise the workers of the truth of their operations on behalf of the Communist Party. Examples of their treachery have been documented over the years, not only by Government agencies and congressional committees, but by the Congress of Industrial Organizations itself.

Why does not the UE tell the worker of the statements contained in the resolution adopted by the CIO at its convention in Cleveland, Ohio, on November 2, 1949?—

Now, therefore, be it

Resolved, That—

1. This convention finds that the certificate of affiliation heretofore granted to the United Electrical, Radio, and Machine Workers of America has fallen into the control of a group devoted primarily to the principles of the Communist Party and opposed to the constitution and democratic objectives of the CIO, and in particular to the following declaration in the preamble of the constitution of the CIO:

"In the achievement of this task we turn to the people because we have faith in them; and we oppose all those who would violate this American emphasis of respect for human dignity, all those who would use power to exploit people in the interest of alien loyalties"; and, in conformance with the provisions of article III, section 6, of our constitution, this convention hereby expels the United Electrical, Radio, and Machine Workers of America from the Congress of Industrial Organizations and withdraws the said certificate of affiliation.

2. This convention recognizes that the overwhelming majority of the membership of the United Electrical, Radio, and Machine Workers of America are not members of the Communist Party, and further recognizes the desire of the working men and women in the electrical and allied industries for a free and autonomous union affiliated with the CIO and devoted to the constitutional principles and policies of the CIO.

3. This convention hereby authorizes and directs the executive board immediately to issue a certificate of affiliation to a suitable organization covering electrical and allied workers which will genuinely represent the desires and interests of the men and women in those industries.

4. This convention calls upon the working men and women in the electrical and allied industries to join in the building of a strong, autonomous union affiliated with the CIO that will fight on a sound trade-union basis for the interests of its members as workers and American citizens and which will join wholeheartedly with the CIO in its struggle to obtain the benefits of collective bargaining, including higher wages and better working conditions, to safeguard the economic security and promote the social welfare of the workers of America, and to protect and extend our democratic institutions and civil rights and liberties.

5. This convention calls upon all the affiliates of the CIO to support with all their strength the determination of the electrical workers to free themselves from Communist domination and to create a strong, aggressive, and democratic union affiliated with the CIO.

With the full support of the CIO, the organized workers in the electrical and allied industries will win their campaign for freedom from the degradation of automatic obedience to a foreign dictatorship.

A victory here for democratic unionism will strengthen the constant drive of all American labor against economic monoply and against all those forces which would deny to American working men and women the economic security and the democratic liberties which belong to all Americans.

We salute the rank and file members of the UERMWA as the way is opened for them to walk out of the shadows of Communist conspiracy, doubletalk, division, and betrayal, into the sunlight of democracy to be enjoyed in the CIO and cherish and make equally available to all men and women who prize freedom, honesty, and loyalty to their ideals and their union brothers and sisters.

In this cause and with this faith, we of the family of CIO shall defeat our open and our secret enemies; we shall grow stronger in numbers and in moral stature. Thereby the mission of the CIO, as stated at its founding, shall be realized in happy men and women, secure in their jobs, in their homes, and in their trust in one another.

AGRICULTURE DEPARTMENT APPEARS POISED TO STRIKE THE SOYBEAN FARMER THIS TIME

Mr. JONES of Missouri. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. JONES of Missouri. Mr. Speaker, it appears that the Department of Agriculture is poised to strike again, and this time the victim will be the farmers of the South who produce soybeans, at least those who have been producing a variety of soybeans known as the Ogden.

I am today placing in the CONGRESSIONAL RECORD 2 extensions of remarks dealing with this subject, 1 containing a letter expressing the views of the Midsouth Soybean & Grain Shippers Association opposing the proposed revisions

of the soybean standards, as announced by Mr. Barr of the Grain Standards Branch of the United States Department of Agriculture, and the other extension including an article from a newspaper setting forth some of the highlights of a hearing held at Memphis when it was revealed that not a single person appeared in support of the Department's contemplated action. In fact, every one of the approximately 300 persons in attendance, including farmer-producers, elevator operators, warehousemen, processors, shippers, brokers, terminal operators, and exporters, indicated their opposition to the proposed action of the Department.

I would like now to read from a letter written by a friend of mine who is a farmer and who also is the operator of an elevator which buys and ships soybeans. The writer of this letter, Wilburn L. Davidson, a former secretary of the Midsouth Soybean & Grain Shippers Association, is familiar with the problems involved in this proposed action and I believe his letter, directed to the Director, Grain Division, United States Department of Agriculture, will give each of my colleagues a better insight into this problem, and I hope will cause them to contact the Secretary of Agriculture and urge that he exercise his authority in preventing this drastic change from taking place. Mr. Davidson's letter reads:

KENNETT GRAIN & SEED CO.,
Kennett, Mo., February 17, 1955.

DIRECTOR, GRAIN DIVISION,
AGRICULTURAL MARKETING SERVICE,
United States Department of Agriculture, Washington, D. C.

DEAR SIR: In regard to the proposed revisions of the soybean grade standards, we wish to file our arguments as follows:

1. We wish to oppose the proposed revision that would reduce the maximum limits of foreign material 1 percent in each numerical grade.

(a) The present grades are good, and allow huge tonnages of soybeans to move smoothly through the channels of commerce. Modern combines will leave close to 2 percent foreign material under best conditions, and when this crop is handled by two or more elevators, the foreign material (including soybean chips) will run from 1.9 percent to 2.9 percent under the best conditions. Present grade standards reflect this fact, and provide reasonable standards that reflect actual quality. A change in the grade standards would be unrealistic, and provide an artificial standard that would not aid the movement of the soybean crop through the channels of commerce.

2. We wish to oppose the proposed revision that classify soybeans with green seed coats and yellow cross-section as green class soybeans rather than yellow soybeans.

(a) The present classification has worked well since the 1949 change. A complaint by 1 or 2 foreign countries is insignificant.

(b) The Ogden soybean has green seed coat at times and is yellow in cross-section. The Ogden soybean is the best adapted variety for most of the southern United States. The Ogden is bright green generally in appearance at the beginning of the season, but changes to yellow when subjected to rain, frost, or delay in harvest. Normally, Ogdens will range from green to green and yellow to pure yellow at the same time during harvest. In summary, no Federal grain inspector will be able to grade the Ogden on color accurately; such a green classification will be an artificial classification not meeting the facts.

(c) Soybeans are being bought and sold to the foreign markets by origin, and this is a well established fact. Any foreign country can obtain strictly yellow soybeans at any time, with identity preserved. Hard wheat from Kansas, Oklahoma, and Texas is traded smoothly in the various market places as well as hard wheat from Missouri and Illinois, and the market prices reflect the quality of the origins. Such an acceptance at the market place is true in soybeans. Soybeans are and can be traced by origins.

(d) Ogden soybeans are high in quality. The oil is high in percentage and is of excellent quality; the soybean meal from Ogden soybeans makes excellent livestock and poultry feed equal to meal from any origin.

(e) New varieties are being constantly introduced, and in a few years a yellow variety, equal or superior to Ogden soybean, will be introduced. Why should the vast southern region of the United States of America be segregated and penalized unnecessarily for a few years?

(f) If the proposed Green classification is established, it will do harm as the Ogdens will be planted from March 1 through June 10, with the majority of the acres planted by May 5. The farmer is entitled to a year's notice before a change is made.

(g) There is no problem in the market place with green and yellow classification. The farmer, the country elevator operator, the terminal elevator operator, and the domestic mills have not called for a change. The foreign buyer can obtain any color of soybeans easily under the present grain standard. Why should one or two complaints by foreign buyers change a great crop and great marketing system in the United States?

We submit our arguments as producers and as elevator operators, and we respectfully ask for your consideration of our arguments in arriving at a decision.

Respectfully yours,
KENNETT GRAIN & SEED CO.,
WILBURN L. DAVIDSON,
President.

COMMISSION ON PATENT LAW AND ADMINISTRATION

Mr. HOSMER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, to revise and extend my remarks, and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. HOSMER. Mr. Speaker, I have just introduced legislation to create a commission on patent laws and administration. As set forth in the bill:

The Commission shall conduct a full and complete investigation and study of the patent laws of the United States and the administration and operation of such laws to determine what changes therein are necessary in their opinion to promote a greater contribution to continued technological advancement by the United States, with particular regard to the problem of how to stimulate an increased contribution on the part of the individual inventor.

The history of invention indicates that truly significant innovations are generally the work of outsiders to a particular industry—individuals far enough removed from an industry to have a fresh viewpoint on its problems.

Today industry ignores the individual inventor and an inhospitable patent system frustrates him. It is time to look at the plight of the independent inventor who made America technologically great. Unless something is done, he may have to quit and the country cannot afford that.

This whole problem was reviewed with detail and thoroughness in an article by Edmund L. Van Deusen appearing in the December 1954 issue of Fortune magazine. So that the Congress may be informed on the subject, I am here setting forth Mr. Van Deusen's article:

THE INVENTOR IN ECLIPSE

(By Edmund L. Van Deusen)

When Percy C. Spencer, president of Sinclair Oil Corp., inaugurated the Sinclair plan in 1951, he thought he had found a way to spice industrial technology with the offbeat yet valuable inspirations of independent inventors. Spencer invited inventive-minded Americans everywhere to send their ideas to Harvey, Ill., where the staff of Sinclair's new $10-million research laboratory would evaluate the schemes and complete the development work on those that looked promising. All Sinclair wanted in return was a royalty-free license under the inventor's patent—and a sense of industrial accomplishment.

As of this date, 3 years later, Sinclair has obtained exactly nothing from its plan. Fewer than 50 of the thousands of inquiries and suggestions pertained to the specified subject (petroleum products), and of these only 3 seemed worth extensive testing. Two proved impractical, and the third, involving a new way to make cement, has been returned for commercial development to the original inventor, a Cleveland consulting engineer. Sinclair's conclusion: "There appears to be little room for the independent inventor in the petroleum industry."

The failure of the Sinclair plan is of deep significance to American industry. In an era of unmatched technological progress, the lone, inspired inventor seems to be playing a diminishing part. At the same time, the rate of American invention seems also to have declined. In 1920 the United States Patent Office received 7.7 patent applications for every 10,000 citizens; today, despite a slight upturn in the trend last year, the rate is 4.6 percent, a drop of about 40 percent.

This does not mean, however, that the inventive Yankee is a vanishing breed. Anyone willing to set himself up as a recipient of ideas can attest to the contrary. During World War II over 300,000 suggestions were submitted to the National Inventors Council, an agency created at the prompting of Lawrence Langner, the eminent patent attorney (and founder of the Theater Guild), to be a clearinghouse for new devices that might be of value to the Armed Forces. One such device, an instrument invented by a treasure-hunting Florida radio mechanic, turned up on scores of beachheads as the familiar mine detector.

After the war the council's experience was duplicated by the Institute of Inventive Research of San Antonio, a nonprofit organization put together by Thomas Slick to provide a connecting link between inventors and industry. In 8 years the institute managed to evaluate over 100,000 inventions submitted by the public, and from this group was culled the lift-slab method of concrete construction used in building the $5-million laboratories of the Radio Corporation of America (Fortune, November). But the costs of development of this and a dozen other promising ideas were so high that the institute, after running through its $1-million endowment, closed its doors to new inventions and became a part of Slick's Southwest Research Foundation.

Where Slick left off, however, the Product Development Corp. of Boston has taken over, and on a profit-making basis. Product De-

velopment is a year-old affiliate of American Research & Development Corp. (reaction motors, tracerlab, etc.), and inventors are already sending their ideas to this new company at the rate of 50 a day.

Certainly there is no shortage of inventors and inventions, but then, that was not the problem encountered in the Sinclair experiment. The trouble has been quality, not quantity, and the reason for this is easy to see. For several decades, the important frontiers of technology have been advancing into the far reaches of chemistry, electronics, and, of late, nucleonics. Independent inventors, inadequately trained and equipped, can hardly hope to follow. The result is that these areas have become the preserve of the hired inventors who work in corporation laboratories. The lone unaided inventor can do little but concentrate on the mechanical-type inventions, the better mousetraps, that were the marvel of the 19th century but today are considered to be only gadgets.

INVENTION IS WHOSE BUSINESS?

Industry is keenly aware that the present quality of independent invention is low (General Electric finds that it is interested in less than one-tenth of 1 percent of the 2,500 ideas and suggestions submitted to it each year). Yet industry also seems to assume that this low quality is none of its business (GE's patent department has three men screening the public's ideas, 70 men processing the 3,000 to 4,000 patent suggestions developed annually by the company's own research laboratories).

Actually, industry's indifference toward the lone inventor and his works is understandable. Modern industrial research, with its fine laboratories, its teams of specialists, and its multi-million-dollar budgets, appears able to provide all the technological progress that the Nation could desire. Indeed, amid this array of inventive power even such an obstinately independent inventor as Thomas Edison would find it hard to locate neglected areas in which to apply his genius. The easy assumption for industry to make is that the best inventors of this generation have all read the signs and are busily inventing within the walls of industry's research laboratories where, in the words of one director of research, "No one ever makes a million, but then, neither, does anyone starve." From this, it is logical to assume that virtually all the important inventions of the future will come out of the major laboratories.

This reasoning, however, is not so airtight as it seems. The history of invention indicates that truly significant innovations generally are the work of outsiders, individuals far enough removed from an industry to have a fresh viewpoint on its problems. Janney, inventor of the automatic railroad coupler, was a farmer, not a railroader. Cartwright, inventor of the power loom, was a minister. Eastman, a bookkeeper, revolutionized photography, but it took two musicians, Mannes and Godowsky, to show Eastman how to make photographs in color. Even television, a modern invention, would have been impossible without the inspired tinkering of generations of amateur inventors. Edward T. Dickinson, executive assistant to the president of Carrier Corp., conducted a study of this sort of intuitive innovation while vice chairman of the National Security Resources Board (the project was prompted by the belief that a creative atmosphere is an important natural resource). Dickinson concluded that such "leaps into the blue," whether by inventive individuals or by a whole population developing a new civilization, occur at the time when those people have become isolated or withdrawn (e. g., the colonial period in America). For lone inventors, such withdrawal comes naturally, but it is extremely difficult to withdraw from one of industry's organized teams of researchers.

THE INDEPENDENT "DOODLE"

Most industrial laboratories are also handicapped because "they think they can't afford to doodle," says Benjamin Franklin Miessner, a successful independent inventor who made good in 1930 by selling 50 radio-circuit patents to RCA for $750,000. Meissner, still vigorously inventing, has great hopes for his latest doodles, a stringless electronic piano and a photoelectric phonograph, neither of which represents the type of project a corporate research director would choose to put in his annual budget.

Miessner's point is aptly illustrated by the inventive career of Edwin H. Land, inventor of Polaroid film and the Land ("1-minute") camera. In 1932 the total market for a cheap source of polarized light (used, at that time, only by experimenting physicists) would not have supported even the most modest of industrial-research programs. It fell, instead, to Land, an inquisitive college boy (Harvard), to conceive and develop a method of orienting tiny crystals in a sheet of plastic. Polarizing sunglasses, camera filters, and 3-D movies came much later—and took Land out of the class of lone inventors. By 1945 he was an industrialist, the president of his own successful company, Polaroid Corp., and director of a large research organization. And when he decided to invent a 1-minute camera, Land proceeded in a typically industrial way. The camera was chosen because it was close to Polaroid's principal field (optics), yet different enough to provide good diversification for the company (no polarization is involved). Market surveys determined the weight, size, and cost limitations that the new camera had to meet. The self-developing characteristic was included because Land knew he could not break into the camera field without an exclusive feature. It took 3 years for a coordinated team of chemists, opticians, and mechanical engineers to produce the 1-minute camera exactly as Land had "invented" it.

The Land camera was an inventive tour de force and a great commercial success. But the camera will never rank as a "great" invention, i. e., one that opens up new avenues of research or helps to build a new industry. For that type of accomplishment, Land must still point to his youthful, independent "doodle"—polarizing film.

THE LOST INCENTIVE

While the long advance of technology has largely contributed to the independent inventor's low estate, it is hardly the complete explanation. Charles Goodyear spent 8 years—and landed in debtors' prison three times—searching for a better way to cure rubber. With only a fraction of that energy and sacrifice, modern inventors could gain proficiency in almost any area of technology they chose. (Expensive equipment is often needed to prove an idea—but not to conceive it.) Few inventors, however, take the time or trouble. Foorman Mueller, a Chicago patent attorney and past president of the American Patent Law Association, observes that "in the past 25 years there has been quite a change in the individual inventor; there is less initiative to carry a project beyond the idea stage, especially in that percentage of the population which in the early days would spend days, weeks, and months, untold energy, and their last penny to bring an inventive dream to fruition."

Mueller, as a patent lawyer, is in a particularly good position to diagnose the cause of it all, for it is the steady weakening of the patent protection that is helping to sap the initiative of the independent inventor just when the complexities of technology are putting an extra strain on his tenacity. The patent system is the independent inventor's traditional incentive system, and when the value of patents drops, so does the drive to invent.

Federal statutes lay the ground rules under which the patent system operates, but these laws are constantly being interpreted by patent-office examiners, by Federal-court judges, and by plain businessmen everywhere. And it is these individuals who in the end determine a patent's value. The Patent Office must decide correctly whether the invention is truly new. The courts, in turn, must decide, in the case of a patent in litigation, whether the Patent Office decision was justified (if they think not, they can invalidate the patent at any time). Finally, the business community must decide, after studying what the Patent Office and the courts have been doing with similar inventions, whether it is safe to invest in the new patents being offered for exploitation.

To hit the jackpot on his invention, the inventor must win all three decisions; it is not enough for him to gain a solid patent from the Patent Office—one that infringers would find it very difficult to invalidate through court action—if the market for patents is unsettled because of uncertainty over the standards by which the office and the courts are operating. Such uncertainty now prevails.

JUDICAL CONFUSION

The uncertain value of patents is largely blamed on the Supreme Court itself, although that august body passes on only 2 or 3 cases involving patents a year. Yet the decisions of the Court have been a marvel of consistency; only 5 times in 15 years has it judged in favor of the patent holders, a record that finally led the late Justice Jackson to predict, in a dissenting opinion, that the day was coming when "the only patent that is valid is one which this Court has not been able to get its hands on."

Even more important than the decisions has been the language used by the justices in their invalidating opinions. Justice Douglas, in a case involving an automobile cigarette lighter, introduced the flash of genius test by writing that a new device, "however useful it may be, must reveal the flash of creative genius, not merely the skill of the calling." And in the famous A & P case Douglas again set a prohibitive standard by insisting, in a concurring opinion written with Justice Black, that "the invention to justify a patent, had to serve the ends of science—to push back the frontiers of chemistry, physics, and the like; to make a distinctive contribution to scientific knowledge." The illustrations on page 133 show that even Thomas Edison's patent, on the electric light would fail these tests.

INFLUENCE OF THE COURT

The Supreme Court decisions have had a profound effect on the lower Federal courts. The most extreme example is the Appeals Court of the Second Circuit, which includes the important New York district court where one-fifth of all the patent cases in the country are initially tried. From 1948 through 1953 the appeals court heard cases involving 38 patents; in 37 instances, the patent was declared either invalid or not infringed; in only 1 case was the finding in favor of the patent holder. Such judicial precedents are not lost on the bargaining agents in a negotiation between an independent inventor and the business interests he is trying to entice.

In 1952 an effort was made to counteract the court decisions by incorporating a more moderate standard of invention into the new patent-law code adopted by Congress that year, but the few courts that have commented on the matter have maintained that the intent of Congress was primarily to codify, and not to modify, the existing patent laws. Another proposal, made by the Patent Equity Association of New York, is to create a system of technically trained judges for the hearing of patent cases. Such judges, drawn primarily from the ranks of

patent lawyers, would preside in all patent cases.[1] But most patent authorities are agreed that little can be done until death or retirement changes the character of the courts; too many of the present judges were appointed during the era when Thurman Arnold was concentrating his antitrust fire on the beneficial monopoly of patents.

JEOPARDIZED QUALITY

Meanwhile the value of patents is being eroded by trouble from a new direction. Indifference and neglect are reducing the effectiveness of the Patent Office itself, and this will eventually have a direct effect on the quality of the patents that the office issues. A patent may be invalidated at any time if someone can prove to the courts that the invention was not new when it was applied for. It is the patent examiner's job to look for prior art, but the Patent Office, unlike a title company, makes no guaranty that this search was complete. The inventor and his backers must proceed with commercial development at their own risk.

It is the quality of the Patent Office search that is jeopardized. Each year an additional 40,000 United States patents are added to the prior art, along with an equally large number of foreign patents, and tons of technical literature in every language. This, plus the increasing complexity of the individual patent applications, has doubled, in the past 50 years, the time and effort needed to process an application. Worse still, the 650 examiners are so rushed in their routine work (they are 200,000 applications behind) that there is no time to do the classifying and collating necessary to make sense out of this mountain of information. And now, instead of giving the Patent Office the help it needs, the present administration has chosen to put the office on a stringent economy regime. The Bureau's budget for fiscal 1955 is $11,500,000, down a half million from the $12 million that it has spent in recent years. To make the office more nearly self-sufficient, the Department of Commerce (parent to the Patent Office) has asked Congress to raise the basic fees for obtaining patents from $60 to a sliding scale that approximates $120 per patent. Yet even this increase will cover only half of the current $6-million deficit.

These efforts at economy come at an inopportune moment. The Commissioner of Patents, Robert C. Watson, a respected Washington attorney appointed by the Republican administration, calculates that the Patent Office needs immediately an additional 200 examiners just to stay even with the incoming work and to effect a small annual reduction (5 percent) in the backlog of waiting applications. This reduction is particularly important because it is the application backlog that determines the length of time, now an average of 3 years and 7 months, between the date of application and the issuance of a patent. As indicated by the chart on page 135, the office is actually working on the application for only 4 or 5 days during the years that an inventor waits for his patent.

An Advisory Committee on Application of Machines to Patent Office Operations has been formed under the chairmanship of Vannevar Bush to study the possibility of mechanizing at least part (possibly 20 percent) of the examiner's work. But this is long term, and of immediate moment is Watson's need for a special fund, possibly $5 million or $6 million, spread over as many years, with which to tackle the growing job of reclassification. (Searches are made by classes of inventions, and some of these groupings have not been brought up to date in years.) Unless there is some radical change in the administration's thinking, however, Watson probably will not get even this short-term aid. And the value of patents will continue to diminish.

INDUSTRIAL RESPONSIBILITY

The independent inventors, as a group, are too disorganized to do anything concrete in their own defense. This raises the question whether it is industry's responsibility to use its weight and influence on the independent inventor's behalf. There are two good reasons why industry should. First, there is a strong presumption that industrial, organized research cannot yet entirely supplant the brain storms, the flashes of genius of the independents. But even more important is the fact that if the lone inventor is allowed to atrophy, the patent system, the institution that makes industrial research economically feasible, may become defenseless against political attack.

In this regard the patent system is already vulnerable. Not since the 1920's, when the patent pool assembled by RCA brought radio out of its infancy, has the protection provided by patents created a totally new industry in the manner exemplified by Bell's patent on the telephone, Goodyear's patent on the vulcanization of rubber, or Hall's patent on the reduction of aluminum. The important developments of the past quarter-century (e. g., television, jet engines, synthetic fibers, detergents, rubber) have served mainly to entrench the established companies with large research staffs. A large portion of the United States population is persuaded that any monopoly, even the temporary one created by the patent grant, is fundamentally evil; and the argument that patents help "the big get bigger" has a particularly convincing ring when it coincides with evidence that the lone inventor is being denied a fair opportunity. If for no other reason than to counteract this charge, industry should give the independent inventor a helping hand.

UNPLUGGED CHANNELS

There are many ways in which industry could help. It could, for example, give financial and moral support to the groups that are trying to strengthen the faltering patent system. More specifically, industry could subsidize adult classes at colleges and universities where independent inventors could take cram courses in the new technologies. But the most effective single act industry could perform would be to review its own attitudes toward the lone inventor.

For example, the channels of communication between corporation and inventor need to be cleared; the deluge of ideas that flood organizations like Product Development Corp. and the Institute of Inventive Research proves that these channels have been, in the past, badly plugged. Improvement, however, will not come easily. The mutual suspicion between inventor and corporation is born of bitter experiences by both. To defend themselves from crackpots looking for a lawsuit, most companies insist that the inventor at least have a patent application in process before they will listen to him. Even the Sinclair plan included this provision, which alone may have doomed the program from the start. If the independent inventor is ever to enter the higher reaches of technology, where extensive laboratory tests are required to establish even the patentability of a nebulous idea, industry will have to find a simpler method of defending its own and the inventor's rights.

Corporations could also reexamine their policies toward their own researchers. In their employer's field of interest, these inventors are hired inventors, but in all other areas of technology, the same men are potential independent inventors. Too many companies hamper initiative by not establishing a consistent policy on the question of the unwanted invention. Researchers should be able to exploit freely any ideas or inventions they develop that are not of interest to the company that is paying their salary.

Finally, the corporations, either directly or through industry associations, could inform the independent inventors of the types of problems that are currently proving troublesome. The National Inventors Council has used this scheme successfully for several years by periodically listing the current needs of the Armed Forces (e. g., a low-temperature storage battery for Arctic troops). The toughest part of this job for industry would be to admit occasionally that its own research programs are not infallible.

A case in point is the electronic industry's effort to find a way to make a cheap and reliable cathode-ray tube for receiving color television. Present tubes cost 10 times their black-and-white equivalents, and it will probably require an entirely new concept of design or manufacture to reduce this ratio substantially. Chances are that when the way is found, it will be so simple and obvious that every television repairman in the country will wonder why he didn't think of it first. But then, that has been true of every great invention—after it has been invented. And that is why, given a chance and enough incentive, independent inventors will always be able to pay their own way.

[1] The present Court of Customs and Patent Appeals in Washington, D. C., is, like the tax courts, organized to adjudicate between the Government (i. e., the Patent Office) and the public. Most patent cases of importance, however, are between two citizens and generally involve a patent infringement. The Government, in issuing a patent, grants a monopoly for 17 years, but the patent holder must defend that privilege on his own.

DEMOCRATIC IRRESPONSIBILITY

Mr. BYRNES of Wisconsin. Mr. Speaker, I ask unaimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. BYRNES of Wisconsin. Mr. Speaker, the action just taken by the majority members of the Ways and Means Committee cannot help but shake public confidence in that great committee. The committee, on a straight party line vote, has approved a tax reduction proposal which would cost the Government $2.3 billion in revenue.

It did so without hearings, or even without prior public discussion.

It did so in a most devious way—as though afraid to have the proposal stand on its own merits—by tacking it on a bill which we all know must pass.

It did so in the face of a prospective deficit of $2.4 billion—a deficit we can keep that low only if the Congress exercises the greatest restraint in voting upon appropriations and authorization bills.

It did so at a time when not a single appropriation bill for fiscal 1956 had even been reported to the House for action—at a time when we have no idea of our burden of expenditures during the next fiscal year.

It did so at a time when leading Democrats, and Democrat-run committees, are calling for the enactment of bigger and better Federal spending projects—huge Federal grants for school aid, more Fed-

eral power projects in the West and the South, increased military expenditures, larger salary increases for postal and other Federal employees and mandatory high-level support prices for the basic crops.

This, Mr. Speaker, is irresponsibility—cold, calculated, disastrous fiscal irresponsibility.

SENATE BILL AND CONCURRENT RESOLUTION REFERRED

A bill and a concurrent resolution of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 913. An act to eliminate the need for renewal of oaths of office upon change of status of employees of the Senate; and

S. Con. Res. 9. Concurrent resolution to print for the use of the Committee on the Judiciary additional copies of certain parts of the hearings on Interlocking Subversion in Government Departments; to the Committee on House Administration.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the RECORD, or to revise and extend remarks, was granted to:

Mr. ROONEY (at the request of Mr. MCCORMACK) and to include extraneous matter.

Mr. SCRIVNER (at the request of Mr. ARENDS).

Mr. HILLINGS (at the request of Mr. ARENDS) in three separate instances, in each to include extraneous matter.

Mr. RABAUT and to include extraneous matter.

Mr. JONES of Missouri in two instances, in each to include extraneous matter.

Mr. HOSMER and to include extraneous matter.

Mr. MILLER of Nebraska.

Mr. WOLVERTON and to include extraneous matter.

Mr. MCDONOUGH (at the request of Mr. SCUDDER).

Mr. ENGLE (at the request of Mr. METCALF) and to include extraneous matter.

ADJOURNMENT

Mr. LONG. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 1 o'clock and 8 minutes p. m.) the House adjourned until tomorrow, Wednesday, February 23, 1955, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

452. A letter from the Chairman, Commission on Organization of the Executive Branch of the Government, transmitting a report on "Paperwork Management, Part I, In the United States Government, pursuant to Public Law 108, 83d Congress (H. Doc. No. 92); to the Committee on Government Operations.

453. A letter from the Chairman, Commission on Organization of the Executive Branch of the Government, transmitting the task force report on Paperwork Management in the United States Government, pursuant to Public Law 108 (ch. 184), 83d Congress; to the Committee on Government Operations.

454. A letter from the Assistant Secretary of the Interior, transmitting a report with reference to reservations from appropriations within Indian reservations, for the calendar year 1954, pursuant to 36 Statutes 858; to the Committee on Interior and Insular Affairs.

455. A letter from the Secretary of Commerce, transmitting the quarterly report for the period October 1, 1954, through December 31, 1954, of the Maritime Administration, covering transactions under the Merchant Ship Sales Act of 1946, pursuant to section 13 of the act; to the Committee on Merchant Marine and Fisheries.

456. A letter from the Secretary of the Army, transmitting a draft of proposed legislation, to amend section 7 of the act approved September 22, 1922, as amended; to the Committee on Public Works.

457. A letter from the Acting Secretary of Agriculture, transmitting a draft of proposed legislation entitled "To authorize the Secretary of Agriculture to establish townsites within the national forests, and for other purposes"; to the Committee on Agriculture.

458. A letter from the Acting Secretary, Department of the Air Force, transmitting a draft of legislation entitled "To amend section 640 of title 14, United States Code, concerning the interchange of supplies between the Armed Forces"; to the Committee on Armed Services.

459. A letter from the executive vice president, National Fund for Medical Education, transmitting a report of an audit of the National Fund for Medical Education for the year ended December 31, 1954, made by Price Waterhouse & Co., 56 Pine Street, New York City 5, N. Y., independent certified public accountants; to the Committee on the Judiciary.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. MADDEN: Committee on Rules. House Resolution 91. Resolution authorizing the Committee on Foreign Affairs to conduct thorough studies and investigations of all matters coming within the jurisdiction of such committee; with an amendment (Rept. No. 64). Referred to the House Calendar.

Mr. TRIMBLE: Committee on Rules. House Resolution 105. Resolution to authorize the Committee on Interstate and Foreign Commerce to conduct investigations and studies with respect to matters within its jurisdiction; with an amendment (Rept. No. 65). Referred to the House Calendar.

Mr. SPENCE: Committee on Banking and Currency. House Joint Resolution 202. Joint resolution to amend the National Housing Act, as amended; without amendment (Rept. No. 66). Referred to the Committee of the Whole House on the State of the Union.

Mr. COOLEY: Committee on Agriculture. H. R. 1573. A bill to repeal section 348 of the Agricultural Adjustment Act of 1938; without amendment (Rept. No. 67). Referred to the Committee of the Whole House on the State of the Union.

Mr. ENGLE: Committee on Interior and Insular Affairs. H. R. 1801. A bill to authorize the purchase, sale, and exchange of certain Indian lands on the Yakima Indian Reservation, and for other purposes; without amendment (Rept. No. 68). Referred to the Committee of the Whole House on the State of the Union.

Mr. COOPER: Committee on Ways and Means. H. R. 4259. A bill to provide a 1-year extension of the existing corporate normal-tax rate and of certain existing excise-tax rates, and to provide a $20 credit against the individual income tax for each personal exemption; without amendment (Rept. No. 69). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. COOPER:

H. R. 4259. A bill to provide a 1-year extension of the existing corporate normal-tax rate and of certain existing excise-tax rates, and to provide a $20 credit against the individual income tax for each personal exemption; to the Committee on Ways and Means.

By Mr. BUCKLEY:

H. R. 4260. A bill to create a Federal highway corporation for financing the construction of the national system of interstate highways; to amend and supplement the Federal-Aid Road Act approved July 11, 1916 (39 Stat. 355), as amended and supplemented; and for other purposes; to the Committee on Public Works.

By Mr. DONDERO:

H. R. 4261. A bill to create a Federal highway corporation for financing the construction of the national system of interstate highways; to amend and supplement the Federal-Aid Road Act approved July 11, 1916 (39 Stat. 355), as amended and supplemented; and for other purposes; to the Committee on Public Works.

By Mr. DIXON:

H. R. 4262. A bill to authorize certain improvement of the Weber Basin, Utah, for flood control; to the Committee on Public Works.

By Mr. DOLLIVER:

H. R. 4263. A bill to provide institutional on-farm training for the veteran who performs part of his course as the employee of another; to the Committee on Veterans' Affairs.

By Mr. FINO:

H. R. 4264. A bill to grant a pension of $100 per month to all honorably discharged veterans of World War I who are 60 years of age; to the Committee on Veterans' Affairs.

By Mr. FORAND:

H. R. 4265. A bill to amend paragraph 1004 (a) of the Tariff Act of 1930, with respect to the importation of certain yarns; to the Committee on Ways and Means.

By Mr. FORRESTER:

H. R. 4266. A bill to amend the Agricultural Adjustment Act of 1938 to provide that any State or county which plants 85 percent or more of its cotton-acreage allotment shall be deemed to have planted its full allotment; to the Committee on Agriculture.

By Mr. HOSMER:

H. R. 4267. A bill for the establishment of a Commission on Patent Laws and Administration; to the Committee on the Judiciary.

By Mr. MCDONOUGH:

H. R. 4268. A bill to permit local taxation of the private interest in personal property and work in process and inventories of material acquired by the Federal Government for military security and the national defense but in the possession of contractors

with the Federal Government; to the Committee on Ways and Means.

By Mr. MILLER of Nebraska:

H. R. 4269. A bill to amend the Packers and Stockyards Act, 1921, to authorize additional market services for livestock purchasers; to the Committee on Agriculture.

By Mrs. PFOST:

H. R. 4270. A bill to provide for the construction of a water-filtration plant at Bonners Ferry, Idaho; to the Committee on Agriculture.

By Mr. PRICE:

H. R. 4271. A bill to establish public use of the national forests as a policy of Congress, and for other purposes; to the Committee on Agriculture.

H. R. 4272. A bill to establish public use of the national forests as a policy of Congress, and for other purposes; to the Committee on Agriculture.

By Mr. SILER:

H. R. 4273. A bill to provide for compensating local peace officers who seize vehicles which are forfeited to the United States; to the Committee on the Judiciary.

H. R. 4274. A bill to amend the War Claims Act of 1948, so as to extend the benefits of such act to persons captured or interned by, or in hiding from, the Japanese Government in China during World War II; to the Committee on Interstate and Foreign Commerce.

H. R. 4275. A bill to provide for the establishment of the Wildcat Mountain National Military Park in the State of Kentucky; to the Committee on Interior and Insular Affairs.

By Mr. SMITH of Mississippi:

H. R. 4276. A bill to amend the Communications Act of 1934 to prohibit the interception of communications by persons other than public officers and employees in the exercise of their official duties; to the Committee on Interstate and Foreign Commerce.

H. R. 4277. A bill to provide Federal assistance to business enterprises, communities, and individuals injured by tariff reductions; to the Committee on Ways and Means.

H. R. 4278. A bill to grant an additional income-tax exemption to a taxpayer supporting a dependent who is blind or otherwise permanently and totally disabled; to the Committee on Ways and Means.

By Mr. ALGER:

H. J. Res. 226. Joint resolution authorizing the President of the United States of America to proclaim the period August 21 to 27, 1955, as American Law Student Week; to the Committee on the Judiciary.

By Mr. MILLER of Maryland:

H. J. Res. 227. Joint resolution proposing an amendment to the Constitution of the United States relating to the composition and jurisdiction of the Supreme Court, and for other purposes; to the Committee on the Judiciary.

By Mr. SCRIVNER:

H. J. Res. 228. Joint resolution to authorize transfer of a percentage of tax collections from individual and corporate income taxes to the States and Territories for use for educational purposes only, and for other purposes; to the Committee on Ways and Means.

By Mr. THOMAS:

H. J. Res. 229. Joint resolution authorizing the President of the United States of America to proclaim the period August 14 to 17, 1955, as American Law Student Week; to the Committee on the Judiciary.

By Mr. DOYLE:

H. Res. 151. Resolution to amend the rules of the House of Representatives to provide for a code of fair procedure for committees; to the Committee on Rules.

By Mr. TALLE:

H. Res. 152. Resolution expressing the sense of the House of Representatives with respect to the great contribution being made to blind persons everywhere by the Gospel Association for the Blind; to the Committee on House Administration.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

By the SPEAKER: Memorial of the Legislature of the State of Alabama, memorializing the President and the Congress of the United States to enact legislation limiting the appellate jurisdiction of the United States Supreme Court and the jurisdiction of other Federal courts; to the Committee on the Judiciary.

Also, memorial of the Legislature of the State of Arizona, memorializing the President and the Congress of the United States to pass legislation withdrawing all tribal lands of the Papago Indian Reservation except lands previously patented or now subject to valid mining claims, etc.; to the Committee on Interior and Insular Affairs.

Also, memorial of the Legislature of the State of Idaho, memorializing the President and the Congress of the United States urging that the Corps of Engineers report on the Libby project be approved, that the project be authorized, and that funds be made available for its construction; to the Committee on Public Works.

Also, memorial of the Legislature of the State of Massachusetts, memorializing the President and the Congress of the United States against the enactment of legislation lowering the tariffs on the importation of rubber products; to the Committee on Ways and Means.

Also, memorial of the Legislature of the State of South Carolina, memorializing the President and the Congress of the United States to extend the emergency drought relief feed program; to the Committee on Agriculture.

Also, memorial of the Legislature of the Territory of Alaska, memorializing the President and the Congress of the United States requesting immediate statehood for Alaska; to the Committee on Interior and Insular Affairs.

Also, memorial of the Legislature of the Territory of Alaska, memorializing the President and the Congress of the United States urging that House bill 610, now pending before the Congress, be passed and approved; to the Committee on Interior and Insular Affairs.

Also, memorial of the Legislature of the Territory of Alaska, memorializing the President and the Congress of the United States urging enactment of legislation authorizing the issuance of a patent conveying fee simple title to those certain necessary tidelands in Shoemaker Bay to the Pacific Northern Timber Co.; to the Committee on the Judiciary.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BOGGS:

H. R. 4279. A bill for the relief of John (Janos) Frank; to the Committee on the Judiciary.

By Mr. DORN of South Carolina:

H. R. 4280. A bill to direct the Secretary of Agriculture to release on behalf of the United States conditions in two deeds conveying certain submarginal lands to Clemson Agricultural College of South Carolina so as to permit such college, subject to certain conditions, to sell, lease, or otherwise dispose of such lands; to the Committee on Agriculture.

By Mr. GORDON:

H. R. 4281. A bill for the relief of Joseph Piatkowski; to the Committee on the Judiciary.

By Mr. HOSMER:

H. R. 4282. A bill for the relief of Manuel R. Llamado; to the Committee on the Judiciary.

By Mr. McCARTHY:

H. R. 4283. A bill for the relief of William T. Collins, also known as Vasilios T. Buzunis; to the Committee on the Judiciary.

By Mr. PILLION:

H. R. 4284. A bill for the relief of Mrs. Mariannina Monaco; to the Committee on the Judiciary.

By Mr. RICHARDS:

H. R. 4285. A bill to direct the Secretary of Agriculture to release on behalf of the United States conditions in two deeds conveying certain submarginal lands to Clemson Agricultural College of South Carolina so as to permit such college, subject to certain conditions, to sell, lease, or otherwise dispose of such lands; to the Committee on Agriculture.

By Mr. ROBSION of Kentucky:

H. R. 4286. A bill for the relief of Dr. Margaret Galoustian; to the Committee on the Judiciary.

By Mr. RODINO:

H. R. 4287. A bill for the relief of Dr. Nurollah Hakim; to the Committee on the Judiciary.

By Mr. SCHWENGEL:

H. R. 4288. A bill for the relief of the law firm of Harrington & Graham; to the Committee on the Judiciary.

By Mr. SCUDDER:

H. R. 4289. A bill for the relief of Vladislav Bevc; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

110. By Mr. FORAND: Resolution of the Franco-Belgian Mutual Association of Rhode Island, favoring the enactment of legislation to amend the social security law, so as to enable qualified workers to receive their FICA pensions at the age of 60 years, instead of 65 years of age, as at present; to the Committee on Ways and Means.

111. By Mr. HOSMER: Petition of the Propeller Club of the United States, Port of Los Angeles-Long Beach, relating to a resolution urging that Federal aid as provided the past year be continued for fiscal year 1956 and thereafter, including necessary appropriations; and that provisions of long-existing law authorizing State maritime academies be fully observed; to the Committee on Appropriations.

112. Also, petition of the Propeller Club of the United States, Port of Los Angeles-Long Beach, relating to a resolution requesting that the Congress of the United States enact legislation to alter and correct the fiscal policy of the Panama Canal so as to relieve commercial cargoes transiting the canal of the portions of operating, interest, depreciation, and Canal Zone Government costs properly allocable to other departments or agencies of the Government; to the Committee on Merchant Marine and Fisheries.

113. By the SPEAKER: Petition from the president of the Lithuanian Roman Catholic Federation of America, No. 10, Norwood, Mass., petitioning consideration of their resolution with reference to expressing gratitude to the United States for its favorable attitude toward Lithuania in her cause for restoration of independence; to the Committee on Foreign Affairs.

114. Also, petition from the grand knight, Morning Star Council, No. 294, Knights of Columbus, Brooklyn, N. Y., petitioning consideration of their resolution with reference to expressing support of the principles of the proposed Bricker amendment to the Constitution of the United States; to the Committee on the Judiciary.

115. Also, petition from the city manager Anchorage, Alaska, petitioning consideration of their resolution with reference to urging passage of the Alaska statehood bill, now pending before the Congress; to the Committee on Interior and Insular Affairs.

EXTENSIONS OF REMARKS

Dixon-Yates Contract

EXTENSION OF REMARKS
OF
HON. PATRICK J. HILLINGS
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, February 22, 1955

Mr. HILLINGS. Mr. Speaker, our colleague the gentleman from California [Mr. UTT] has reported to his constituents on the so-called Dixon-Yates contract. I wish to include in the RECORD at this point the gentleman's statement which is short, lucid, and points up the real facts surrounding this issue which has become the subject of unnecessary controversy.

The report follows:

WASHINGTON REPORT

(By Congressman JAMES B. UTT)

I am impelled to make a few simple remarks about the Dixon-Yates contract because it is being used by some as a symbol of evil. It is the bone of contention in the fight of the Socialists to destroy private enterprise. They use it as the offsetting answer to everything that is good. You make the casual remark that inflation has been stopped, and the cost of living is down. The reply is, "Yes, but how about Dixon-Yates?" You continue, "The national income is going up and taxes are coming down." Again the reply is, "Yes, but how about Dixon-Yates?" That reply has become so universal that if you were talking to Chou En-Lai and said, "It is a violation of the Korean Armistice for you to hold our prisoners," he would say, "Yes, but how about Dixon-Yates?"

POWER REQUIREMENTS

Some background is necessary in order to understand how the contract came into existence. The Atomic Energy Commission is the largest single user of electric energy in the United States, and by far the largest customer of the Tennessee Valley Authority. The TVA came to Congress a few years ago and said that by 1957 they would be short of power by some five or six hundred thousand kilowatt-hours. The AEC has first call on energy, and private users would have to be rationed. They asked for $100 million of Federal money to build a steam plant at Fulton, 25 miles north of Memphis, which is nearly 100 miles outside of the Tennessee Valley watershed. Three times Congress refused to appropriate this money as the locale was not within the jurisdiction of TVA.

The Director of the Budget suggested that it might be feasible to find some private industry to supply this anticipated shortage. TVA has long been unable to supply the AEC with needed energy at the Paducah atomic-energy plant, as witness the fact that the Commission under the Truman administration negotiated two contracts for private supplies, three times in excess of the current subject contract. These contracts were negotiated without any of the sound and fury which accompanies the Dixon-Yates negotiations, even though the energy charge was slightly higher than the one now contemplated.

NO GIVEAWAY

The Government can cancel these contracts on 3 years' notice, and the private companies would then have to find a market for the surplus energy so canceled out. This in itself would be no small task. Due to the possibility of cancellation, it was felt that it would not be feasible to concentrate additional power around Paducah, which could not be absorbed by other customers, but that any additional energy should be generated at a point which, if cancellation should come, the supplier could find a reasonable ready market for the energy.

It was felt that a plant located near Memphis could be built, and the energy exchanged with TVA to cover its growing shortage. The AEC would exchange kilowatt for kilowatt with TVA. The contract provides that the Government can buy the Dixon-Yates plant at any time, or can cancel at any time. Here I should say that Dixon and Yates are just names. Each is the head of a large going public utility in the area, and the two companies formed the Mississippi Generating Co. to finance the project which has an estimated cost of $107 million. One hundred million would come from bonds and notes, and the balance would be the risk capital supplied by the two parent companies.

The contract provides a ceiling on what they can earn, but no floor. There is no guaranteed income. The ceiling is less than the national average for public utilities. The energy charge will be less than TVA now charges the AEC at its Oak Ridge plant, if you eliminate the tax factor. And speaking of taxes, it should be noted that the taxes paid by private electric utilities for local, State, and Federal taxes in the United States average 44 percent of the gross income from sale of energy, and while TVA claims to pay taxes, they amount to only 4 percent of their gross income from energy sales.

SOCIALISM OR FREE ENTERPRISE

The question arises: Are the people of this country going to support the Government, or is the Government going to support the people? The attack on the Dixon-Yates contract is not based upon facts, it is a diversionary action, while the real attack is against private enterprise. The Socialist plan is for Government ownership of all capital. Public power is the spearhead of this drive, and because it is the easiest segment of industry to nationalize, the Socialists cannot afford to let the Dixon-Yates contract go unchallenged, even though it would supply the shortage of energy, encourage private industry, and save the Government from borrowing another $100 million.

I am glad that the President is standing firm on the issue in spite of the attacks. The opponents have done a potent job of obscuring the provisions and purposes of the contract and we who support private enterprise should be just as effective in presenting the facts in their true light.

USDA Uses Unique Methods in Soybean Hearing at Memphis

EXTENSION OF REMARKS
OF
HON. PAUL C. JONES
OF MISSOURI
IN THE HOUSE OF REPRESENTATIVES
Tuesday, February 22, 1955

Mr. JONES of Missouri. Mr. Speaker, it was my privilege to attend a hearing at Memphis, Tenn., on February 14 when a crowd estimated at more than 300 people were present to listen to testimony in opposition to proposals of the United States Grain Standards Branch of the United States Department of Agriculture to make certain changes both in grades and classifications.

This was a rather unique hearing, Mr. Speaker, due to the fact that the only persons in attendance at the meeting who appeared to favor the changes were Mr. Barr, chief inspector of the Grain Division, and the other representatives of the Department of Agriculture. Anyone attending the meeting had an opportunity to be heard, and several of us stated that we would like to know who was sponsoring the changes and that we would like to hear from anyone present who approved or endorsed the changes.

Mr. Barr was the only person who defended the position of the Department of Agriculture in proposing to make changes in standards and classifications which have been in effect and which apparently have been working very well since 1949. However, Mr. Barr was not only willing to indicate his support of these proposed changes in which he would naturally have a pride of authorship, but went so far at one time as to state that his division was convinced, and then immediately retracted this strong language to state that the Division was of the opinion that the changes might properly be considered.

This meeting or hearing was unique in another way, Mr. Speaker. I am referring to the lack of notice which the farmer—the actual producer of soybeans—had. Actually, it was rather by accident and certainly indirectly that I learned about the hearing to be held in Memphis—one of a series of five.

When I inquired of the Department of Agriculture about the notice that had been given, I was told that the notice of the meeting had been sent to the Federal Register. Now, of course, some of my farmers do not read the Federal Register. I was told the notice was sent to most of the trade journals. Naturally, those subscription lists do not include any considerable number of farmers—the man who actually produces the soybeans and who would be vitally affected by any changes and who certainly should have the opportunity to express himself before any changes are made.

I was particularly interested in whether or not the Commercial Appeal, the paper that most of the people in the Midsouth area read, was notified of this meeting. If they received a notice, it was not a notice that gained the attention of any editor, for there was absolutely no prior notice of this meeting in the Sunday or Monday morning issues prior to the meeting on Monday.

The crowd that did gather was recruited by some of the smaller elevator operators and through the Midsouth Soybean & Grain Shippers Association. Naturally, the American Soybean Association had notice of the meeting and this notice was carried in its monthly magazine, but, again, this was not the notice that gets to the actual producer. As an indication of the lack of notice given throughout the section of the Midsouth where the soybean is a major crop,

and where any reclassification will result in millions of dollars loss to the farmers of that area, I am, in another extension of the RECORD, having reproduced an article from the Republican, a newspaper of Caruthersville, Mo., as reported by Mr. Albert Cravens, a secretary-treasurer of the Midsouth Soybean & Grain Shippers Association.

Mr. Speaker, I have asked to have included with these remarks of mine a copy of a letter, written by the president of the above-named association, directed to the Director of the Grain Division in the USDA, setting forth the views of the Midsouth Soybean & Grain Shippers Association on the proposed revisions of the soybean standards, which is as follows:

MIDSOUTH SOYBEAN AND
GRAIN SHIPPERS ASSOCIATION,
February 17, 1955.

DIRECTOR, GRAIN DIVISION, AMA,
United States Department of Agriculture, Washington, D. C.

VIEWS OF THE MIDSOUTH SOYBEAN AND GRAIN SHIPPERS ASSOCIATION ON THE PROPOSED REVISIONS OF THE SOYBEAN STANDARDS

1. On the proposed revision that would reduce the maximum limits of foreign material 1 percent in each numerical grade. As country shippers we are in the middle on this question as we only buy on the grade that we have to sell but as the growers as presented by the American Soybean Association and the processors thought their present buying practices want 2 percent foreign material in No. 2 soybeans, we see no reason why the change cannot be made. We do, however, urge that a study be made to see if some simple method can be found to separate true foreign material from the small broken pieces of soybeans that fall through an 5/64-round-hole screen. Maybe the use of a smaller hole size such as a 5/64 would let enough of the small-weed seed through and leave enough broken pieces on the screen to reduce the buildup of foreign material we now have in soybeans through handling. If such a method can be found we urge its use.

2. On the reduction of moisture we see no reason why the moisture in No. 1 soybeans cannot be reduced to 12 percent. However, we feel that no change need be made in the moisture of No. 2 soybeans as we have found that even in our humid climate 14-percent-moisture soybeans can be stored.

3. We can see no reason why the change in splits should not go through if you in the department feel that it would improve the soybean-grading system.

4. On the proposed special limits on heat damage in each numerical grade. We are against such limits as they would work a hardship on all shippers. Today inspectors are having enough trouble determining total damage or just how much total damage a sample contains. However, if the Department feels that such limits should be put into effect, then heat damage should be more clearly defined. We suggest that it means soybeans that have turned entirely black or brown from heat. The present methods of saying that a small brown spot in the middle of an otherwise sound soybean is heat damage leaves too much room for human error and judgment for such narrow limits of heat damage as have been proposed by the Department.

5. On the proposed reclassification of soybeans with green seed coats that are in cross section yellow from the yellow class to the green class. We cannot say too strongly that we are opposed to this change. We have many reasons for being against the change. Here are just a few of them: 80 percent or more of the Midsouth soybean production would be affected by this change. No evidence was present at Memphis to disprove our conclusion that if the proposed change went through that 90 percent of our Ogden type soybeans would grade as mixed. This was the case before the change in 1949. If they were classed as mixed in 1948 and before what new method has been developed to tell class by the variety predominate color and how could variety purity be proven? In other words how could an inspector tell the difference between a bleached Ogden and a pale S–100 to say that the sample was a mixture of green and yellow varieties or just a sample of Ogden type soybean and therefore are classed green and just happen to have 10 percent or more that just happen to be faded yellow?

We recognize the department's desire and the need to make a grade and class such that it will tell the buyer if he wants that certain quality or not. We agree that under the present standards for soybeans it is not always possible for the buyer to get just what he wants by buying a certain grade and class but as one of the speakers at Memphis pointed out No. 2 Hard wheat does not always describe just what type of No. 2 Hard wheat that a buyer wants. Therefore, a buyer will say that he wants Kansas or Texas No. 2 Hard wheat and not Illinois No. 2 Hard wheat. Today most buyers that need a yellow coated soybean for their special products have found that they can get what they want by saying that they want a No. 2 yellow soybean from Illinois points or maybe Ohio. We feel that since the buyers can get yellow coated soybeans by saying what he wants that it is not right to penalize the Midsouth that has no high yielding soybean that isn't mixed with green and yellow coats. We realize that you cannot sell a person for long something that he does not want so if it was not possible for a buyer to get yellow coated soybeans without changing the standards we would not be opposed but as he can get yellow coated soybeans leave the standards alone.

Respectfully submitted,

PAUL C. HUGHES,
President.

Simple, Direct, Federal Aid for Education

EXTENSION OF REMARKS
OF

HON. ERRETT P. SCRIVNER

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1955

Mr. SCRIVNER. Mr. Speaker, if you are looking for a simple, direct program for aid to education, free from Government controls, without costly administration, and devoid of any "share-the-wealth" attributes, the joint resolution I am introducing today deserves your consideration and support.

Although most State treasuries are in better shape financially than is the Federal Treasury, there is no doubt but that in many States the demands, especially for education, call for more finances than the States are able to raise to provide needed buildings, maintenance, improved equipment, increases in teachers' salaries, and other items. The combined debt of the 48 States is about $20 billion. Uncle Sam owes over $275 billion.

With the enormous increase in Federal expenditures over the past 25 years the Federal Government has tapped every practical possible source of tax revenue, with little consideration for the tax needs of State and municipal governments. The States are now dependent almost entirely upon direct taxes on real estate and personal property, duplicated income tax and sales taxes which fall heavily on persons of low income. In seeking new revenue the States find available sources already drained by Federal taxation—income taxes, admission taxes, beverage taxes, luxury taxes, transportation taxes, tobacco taxes, excise taxes, to name but a few. Enormous sums, billions of dollars annually, are siphoned out of the States in individual and corporate income taxes. The remaining revenue available to the States is inadequate to meet rising local costs of government and provide adequately for growing educational needs.

It is neither economical nor efficient to withdraw huge sums from the States and then have a portion of these funds trickle back under any of the proposed bureaucratic-administered programs of aid to education. If any of the presently proposed and pending programs are adopted, a large overhead for administration is unavoidable, and in some instances the only thing offered the State is an opportunity, lured on by Federal dollars in matching funds, to go into debt, and even this is prohibited by law in some States.

Under the best-intentioned Federal administration, there remains the well-founded objection that the compulsory requirement that each State meet conditions imposed by law and regulations of the administering bureau must be complied with to qualify for benefits. Furthermore, there is a deep-seated fear—also well founded—that with Government intervention in education programs, opportunity might well be found for channeling propaganda into our schools, along with Federal controls which naturally follow Federal dollars flowing from Washington.

With a modest beginning, these programs, with almost no exception, follow a pattern of growing and growing, until it is possible that the training of our youth throughout the Nation could some day be directed from one central Federal bureau, and that bureau would be headed by someone appointed, not elected, and thus not directly responsible to the taxpayers whose funds he was spending.

The prime responsibility for education programs is in the local community and the State. Conditions now existing are not emergency short-time situations, and can be expected to continue for the long indefinite future, as more children are born.

To easily, simply, cheaply, and efficiently provide the States with some financial aid for meeting their needs for the improvement of their respective educational programs, without increasing their debt, without building up a huge Federal bureaucracy, without fear of Federal controls, dictation, or propaganda, without the slightest element of distribution of wealth, I am proposing, by a joint resolution which I am today introducing, a simple, direct, unrestricted plan for aid to the States and the Territories to help them meet the edu-

cational demands within their respective borders.

House Joint Resolution —

Whereas the Government of the United States, through taxes, is siphoning a great part of the wealth of our Nation out of the several States and Territories into the Federal Treasury; and

Whereas the Government of the United States is collecting taxes from nearly all sources of revenue, including taxes on individual and corporate incomes, admissions, beverages, communications, gifts, luxuries, transportation, and from excises and other taxes, leaving to the States little but real and personal property and consumer sales as sources of tax revenue; and

Whereas at rates approaching confiscation of property, States are still not able to raise revenue sufficient to carry the rising costs of State and local governments, and especially not to meet the demands for needed improvements and higher salaries for the training of our youth; and

Whereas it has been proposed that the Federal Government grant aid to the States for educational purpose; and

Whereas it is neither economical nor efficient to withdraw huge sums out of the States and Territories and redistribute funds under bureaucratic regulation from the Federal Treasury, and

Whereas it is desirable that such aid be accomplished by a simple, easy, direct, and efficient method, not hampered with bureaucratic restrictions, directions, or dictation: Therefore be it

Resolved, etc., That 1 percent of all income taxes collected on individual and corporate incomes under Federal statutes shall be deemed to be revenue for the State or Territory within which it is collected, for use, for educational purposes only, without any Federal direction, control, or interference.

SEC. 2. District directors of internal revenue are hereby authorized and directed to transfer to the treasurer, or corresponding official, of the State or Territory within which their respective internal revenue districts are situated, at the end of each quarter, an amount equal to 1 percent of the taxes from individual and corporate incomes collected within such State or Territory during said quarter.

SEC. 3. For purposes of information only, district directors of internal revenue shall report the amounts transferred to State treasurers, or corresponding officials, as authorized in section 2, to the Department of the Treasury, accompanying such report with receipts from the proper State officials verifying the amounts received by said State official.

Under this plan the handling of funds through Washington and back will be eliminated; the amounts available to each State will be determined annually by individual and corporate incomes within that State. The money will remain in the several States where it was collected. The total amount to be thus collected through Federal facilities for the States each year will be automatically geared to the national income for that year. There will be no danger or possibility of Federal control or dictation, and no opportunity for channelized propaganda. It will provide many States with a larger amount than would be available under many other plans which have been proposed. There would be no need for a growing bureaucratic horde with an insatiable hunger for power ready to consume ever-increasing amounts of taxes.

For example, in fiscal 1954 the district director for internal revenue for Kansas collected in individual and corporate income taxes approximately $407,343,360. On this basis there would have gone to the State of Kansas under this plan, for the fiscal year 1954, $4,073,433 every cent of which would be available for use within the State.

This is not a new proposal. I first presented it in 1949—H. R. 1582—at which time several various proposals were pending.

In the 80th Congress—1946—the Senate passed S. 472. Under that measure, the only direct aid to education bill to pass in either House of the Congress, the estimated initial contribution Kansas would have been required to make to the Federal Treasury would have been $2,552,000. From the benefits authorized by S. 472, Kansas could have received back as aid to education a total of $1,960,000—a net loss of $600,000. The other proposals so far advanced would operate to take out of most States more to support the proposed program than would be returned in benefits, and on the whole would provide less in effective aid than is offered by my proposal.

Certainly under the plan I propose, the States, generally, by having this 1 percent of the individual and corporate Federal income taxes paid by its citizens withheld for use within each of the respective States for educational purposes, would be much better able to cope directly, as they deemed best, with their educational problems than they would under any program directed from a Washington bureau.

This proposal will be a step toward retaining our constitutional Republic and a move away from centralized government.

Such legislation will be in keeping with suggestions made by the then Gen. Dwight D. Eisenhower, by keeping the control and responsibility local. He said:

> When financing of schools is turned over to the Federal Government you get bureaucracy, and this is the approach to statism.

Every advocate of aid to education to whom I have talked insists he wants no Federal control, no bureaucracy. This resolution will meet that desire, for it need not add a single person to the Federal payroll and will certainly eliminate all possibility of Federal controls—even those found in most other proposals before the Congress.

From the table below based on tax collections for the fiscal year 1954—approximately—you can see the benefits for your own State. The logical appeal and the elimination of the danger of Federal bureaucratic controls under this plan would enable your State to provide more adequately and more efficiently for the needed enlargement of educational facilities and the necessary increase in salaries of teachers.

This direct use of income taxes is possible. It can be done. Precedent is established by Public Law 630 of the 81st Congress, where it is provided that all of the taxes of incomes earned by American citizens in Guam, while resident there, including stateside Americans, both civilians and military, should be turned over to the Government of Guam. Not just 1 percent, but all of the income tax collected from Americans there—and Guam is merely an unincorporated Territory.

TABLE I

	Income tax collections fiscal year 1954 (including tax for old-age insurance)	1 percent of tax collected
Alabama	$355,904,000	$3,559,040
Arizona	153,119,000	1,531,190
Arkansas	148,110,000	1,481,100
California	4,671,633,000	46,716,330
Colorado	553,265,000	5,532,650
Connecticut	1,168,589,000	11,685,890
Delaware	869,525,000	8,695,250
Florida	599,990,000	5,999,900
Georgia	581,573,000	5,815,730
Hawaii	126,170,000	1,261,700
Idaho	100,902,000	1,009,020
Illinois	4,926,633,000	49,266,330
Indiana	1,205,079,000	12,050,790
Iowa	494,575,000	4,945,750
Kansas	437,870,000	4,378,700
Kentucky	441,333,000	4,413,330
Louisiana	459,357,000	4,593,570
Maine	159,030,000	1,590,300
Maryland	851,777,000	8,517,770
Massachusetts	1,708,884,000	17,088,840
Michigan	4,857,146,000	48,571,460
Minnesota	917,256,000	9,172,560
Mississippi	129,336,000	1,293,360
Missouri	1,472,722,000	14,727,220
Montana	109,285,000	1,092,850
Nebraska	320,620,000	3,206,200
Nevada	70,308,000	703,080
New Hampshire	118,150,000	1,181,500
New Jersey	1,745,232,000	17,452,320
New Mexico	99,351,000	993,510
New York	11,626,091,000	116,260,910
North Carolina	673,436,000	6,734,360
North Dakota	60,929,000	609,290
Ohio	4,147,301,000	41,473,010
Oklahoma	504,416,000	5,044,160
Oregon	403,821,000	4,038,210
Pennsylvania	4,531,795,000	45,317,950
Rhode Island	271,663,000	2,716,630
South Carolina	239,806,000	2,398,060
South Dakota	67,056,000	670,560
Tennessee	463,856,000	4,638,560
Texas	1,969,318,000	19,693,180
Utah	135,924,000	1,359,240
Vermont	70,790,000	707,900
Virginia	641,430,000	6,414,300
Washington	711,456,000	7,114,560
West Virginia	270,198,000	2,701,980
Wisconsin	1,121,973,000	11,219,730
Wyoming	51,764,000	517,640
Alaska	45,843,000	458,430
District of Columbia	707,455,000	7,074,550
Puerto Rico	(9,571,000)	(95,710)
Total	58,578,533,000	585,785,330

NOTE.—Because collections for old-age insurance are not shown separately in internal revenue reports, actual benefits would be somewhat less than shown here when adjustment made for that factor—an average of about 7.2 percent.

Narcotics Addicts Have Been Hospitalized by the District Court

EXTENSION OF REMARKS

OF

HON. A. L. MILLER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1955

Mr. MILLER of Nebraska. Mr. Speaker, as you may remember legislation was enacted during the 83d Congress which provides compulsory hospitalization, by court order, of drug addicts in the District of Columbia. During the hearings on my bill, it was pointed out that there were approximately 2,500 known drug users in our Nation's Capital.

During the past month the first 2 addicts have been compusorily hospitalized under the new law. The first was a young man of 20 years who was com-

mitted last Friday. Monday, a 30-year-old woman, who admitted using up to 8 caps of heroin a day, became the second to be sent to the United States Public Health Service Hospital at Lexington, Ky.

In the latter case, the new law proves its effectiveness in helping to eliminate crime in the District. An assistant United States attorney testified that the woman told police she had supported her expensive habit by prostitution.

On the other hand, 22 men and women drug users have voluntarily begun hospitalization under a special provision of the act since it went into effect last year. Of these, 1 man has been cured and has returned to the District. He was hospitalized approximately 5 months.

The law directs the court to commit drug addicts to the Public Health Service hospital until they are cured. After they are released, the patient must make periodic reports to authorities to insure that the person has not returned to the habit.

I believe it is only proper to point out that these persons are not considered as criminals under the provisions of the act but rather as patients. Still, the law provides no haven for those who have committed a crime under some other existing law.

Soybean Producers Face Gigantic Loss if United States Department of Agriculture Carries Out Threat

EXTENSION OF REMARKS
OF
HON. PAUL C. JONES
OF MISSOURI
IN THE HOUSE OF REPRESENTATIVES
Tuesday, February 22, 1955

Mr. JONES of Missouri. Mr. Speaker, in connection with the proposal, if not the announced intention, of the Grain Standards Division of the Department of Agriculture to make certain changes in the soybean standards, I have gone on record as opposing these changes for a number of reasons.

Naturally, one of the most compelling reasons for opposing these changes is the fact that any such change would immediately and without question result in a financial loss of many millions of dollars, shared by practically every producer of soybeans throughout a large area of the South and the Midwest.

Furthermore, any change at this time, and without giving the farmers of my area, as well as those of many other States, an opportunity to make a change in their plans for planting, would be doing them the greatest disservice. If such a plan as a representative of the Department of Agriculture said they were convinced was in order, and which he indicated would be put into effect this year, is permitted to go into effect, it would cause confusion and penalize thousands of southern farmers at a time when they have already suffered an irreparable damage due to droughts of the past 3 years.

If such a change is to be made, it should not be made until after our farmers have had adequate notice and an opportunity to adjust their planting plans. It should, in my opinion, not be considered until sufficient notice has been given of the contemplated intentions of the Department to permit the development of a type of soybeans which will meet the requirements of the Department's so-called experts.

I would respectfully call to the attention of the Secretary of Agriculture, as well as to those who have the responsibility of carrying out the regulations of his Department, that to make this arbitrary change, without due notice to all parties concerned, would be to take a most unfair advantage of the very persons whose interests they are supposed to be guarding.

Furthermore, I would respectfully point out that, at the recent hearing held at Memphis, Tenn., with approximately 300 persons in attendance, not one single person with the exception of the representatives of the Department of Agriculture, expressed themselves as favoring the proposed changes, and in fact all of those present, including farmer producers, elevator operators, and warehousemen, processors, operators of terminal facilities, exporters, and others, all went on record as strongly opposing the proposed change in classification of soybeans, and at this hearing there was no satisfactory answer to the question of Who wants this change?

In connection with these remarks, I am including herewith copy of an article which appeared in one of the newspapers of my district, The Republican, of Caruthersville, Mo., which sets forth a rather complete résumé of the hearing at Memphis, which calls attention to the damage which would be done by the adoption of the proposed change in classification, and furthermore sets forth rather clearly a substantiation of the charges which I have made that there was inadequate notice of this hearing and that the farmers of that area generally had no notice of the great importance of the contemplated change and therefore have not had sufficient opportunity to voice their great opposition to this change.

Mr. Speaker, I hope that my colleagues, particularly those from the States of Missouri, Arkansas, Tennessee, Mississippi, Kentucky, and Louisiana, will join with me in protesting this proposed change in the classifications as they would affect not less than 80 percent and possibly as much as 85 to 90 percent of the soybeans produced in their respective districts.

Herewith is a report of the Memphis hearing as reported by Mr. Albert Cravens, secretary-treasurer of the Midsouth Soybean & Grain Shippers Association, in the Thursday, February 17, 1955, issue of the Caruthersville (Mo.) Republican:

USDA RECLASSIFICATION OF OGDEN BEAN WOULD COST PEMISCOT FARMERS

Albert Cravens of the Missouri Soybean Co., of Caruthersville, which also has elevators at Hayti, and who is also secretary-treasurer of the Midsouth Soybean and Grain Shippers Association, was among some 300 Midsouth growers, buyers, and shippers who were in attendance at a United States Department of Agriculture meeting held Monday afternoon at the Hotel Peabody, Memphis, Tenn. A. O. "Cap" Acom of Wardell was also present.

The meeting was in charge of J. E. Barr, chief inspector, Grain Branch, USDA, who heard members of the group in testimony relative to a proposed change in classification of the Ogden soybean from a yellow to a green or mixed bean classification.

An interested witness at this meeting was Congressman PAUL C. JONES, of Kennett, the only Congressman from any of the six States present at this important meeting.

Since the soybean, along with cotton, forms the backbone of this area's agricultural economy, the proposed change in classification is of prime importance to farmers in Pemiscot County and throughout this six State area.

The Ogden soybean sometimes has a green seed coating over its yellow meat, making it appear to be a green instead of a yellow bean. The USDA proposes to change classification of the Ogden bean from yellow to green where it appears green. This actually would put the Ogden bean in the mixed classification, since some of the beans bleach out yellow while others retain their green coat at harvest time.

Mixed beans carry a 25-cent penalty when put in the loan and, it is feared here, this change in classification could lead to some discrimination against the bean in the American market.

At the conclusion of the meeting Mr. Barr gave the group little hope and said the USDA grading change, if made, may not be formulated before May 1, which would be well into the planting time in this county and area and would be too late for most farmers to make any adjustment in their planting schedules.

Mr. Barr told the group that "a lot of foreign buyers have complained on some green beans being certified yellow. We think it was a serious mistake when, in 1949, the Ogden was placed in the yellow classification."

In answer to the question of how many complaints had been made to the USDA by foreign buyers, Mr. Barr replied, "We think one is too many."

A representative of the port of New Orleans, who is also an exporter, told the meeting that this proposal is dangerous and will increase our problems tenfold. We think you will be faced with the never-ending problem of determining whether the bean is yellow or green or what.

A surprise visitor at the hearing was Congressman PAUL C. JONES, of Kennett, Representative from the 10th District of Missouri, of which Pemiscot County is part. Congressman JONES is a member of the Agricultural Committee, serving in the fats and oils division. He testified briefly and chided Mr. Barr for not giving more publicity to the hearing.

That no publicity was given this important hearing was indicated by the fact that no press representatives were spotted in the large crowd and no Associated Press or United Press wire story was sent out from Memphis, nor was any mention of the meeting heard here over Memphis radio or television stations. No story was carried in Monday or Tuesday editions of The Commercial Appeal which were distributed here.

According to Cravens, Mr. Barr expressed surprise over the size of the crowd on hand and the outspoken manner which those who presented testimony participated in the meeting. "Reminds me of Texas," Barr said.

W. H. (Bill) Wyatt, who spoke for the Arkansas Bureau, pointed out that the mixed bean, in which classification the Ogden would fall, would draw a 25-cent per bushel penalty under the loan program.

"We believe," Mr. Wyatt told the meeting, "any foreign buyer can get strictly yellow

beans from northern areas without hurting them and without totally wrecking our economy.

"A four- or five-million bushel crop in Mississippi County (Arkansas) alone in 1955, if the price dropped 20 cents, would mean a $1 million loss.

"If the USDA can show us just cause why the bean should be changed, then time must be allowed to develop a comparable yielding yellow bean," he stated.

Most farm bureau groups planned to hold meeting when they returned home to state the situation and make plans to press for some action through their Congressmen.

Welcome to the Catholic Lawyer

EXTENSION OF REMARKS
OF
HON. JOHN J. ROONEY
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Tuesday, February 22, 1955

Mr. ROONEY. Mr. Speaker, there has recently come off the press the first issue of a new professional publication entitled "The Catholic Lawyer." It is published quarterly by the St. Thomas More Institute for Legal Research of St. John's University School of Law, in Brooklyn, N. Y., under the editorship of Rev. Joseph T. Tinnelly, C. M., dean of the law school.

The statement of policy in the first issue contains the following:

> The average attorney is a leader in his community. His opinion is respected, his advice valued, not only in purely professional problems but in a wide variety of subjects having some relation, however tenuous, to law. In consequence, no matter how sound his general and professional education may have been he still feels the need to widen and deepen his knowledge and experience. The success of the Practicing Law Institute, of graduate and post-admission courses in various law schools, and of institutes in taxation, insurance, labor law and other subjects under the auspices of bar associations, gives evidence of this widefelt need.
>
> The Catholic attorney has all the professional obligations of his non-Catholic colleagues. Indeed his conscience may be sharpened by the fact that his confessor will require him to make restitution for any harm which his culpable ignorance or lack of diligence may have caused a client.

The publication is intended to supply answers and information on problems of concern to lawyers by the promotion and publication of legal research in such subjects. It is dedicated to the principles of St. Thomas More, Lord Chancellor of England under Henry VIII.

I know that the Members of the House, particularly the lawyer Members, will join me in welcoming this important contribution to the literature of the law, and wishing for it many years of success.

It is particularly appropriate that I should call this to your attention today, Washington's birthday, since this morning, St. John's University of Brooklyn was hailed at Valley Forge, Pa., by the Freedoms Foundation for its outstanding contribution to the American way of life during the year 1954.

George Washington and the $20 Income Tax Reduction Scheme

EXTENSION OF REMARKS
OF
HON. CRAIG HOSMER
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, February 22, 1955

Mr. HOSMER. Mr. Speaker, today this House heard an excellent reading of the Farewell Address of our first President, George Washington, by the gentleman from Florida [Mr. KRAMER]. I congratulate him.

This is a traditional honor we pay to the founder of our country on the anniversary of his birth.

But it amounts to more than that. What George Washington said in that address amounts to a lot of good common sense on how to run a country. We hear a lot of foolishness in this Chamber from time to time and I presume whoever thought up this custom of reading the Farewell Address each year had in mind that such an annual air conditioning would do us some good.

Certainly, this year it could not have come at a better time considering the fact that we are shortly to commence debate on the politically frank and obvious $20 income tax scheme measure.

Now I ask you, my colleagues, isn't it pretty clear what George Washington would say about the thing if he were here today?

Listening to his beautifully worded Farewell Address leaves little doubt he'd go out after it like a mongoose after a cobra.

My only question is what kind of language would he use. It's my guess it would be a lot less formal than the style he used for the Address.

But he isn't here so we have to look to the Farewell Address.

This is what Washington says about the politics involved in this scheme by the Democratic Party to woo millions of votes by putting an extra $20 bill in each of their pockets:

> The common and continual mischiefs of the spirit of party are sufficient to make it the interest and duty of a wise people to discourage and restrain it. It serves always to distract the public councils, and enfeeble the public administration.

As I read the foregoing in light of the $20 scheme, Washington would regard the partisan political purpose behind it as a mischief which sidetracks the Congress from its duty of providing good government for the people of the United States. It would, in fact, weaken the Government of the United States. Further, according to Washington, the people of this country in their wisdom ought to discourage such goings on.

Next, let us take a look at what the Father of our Country has to say about the finances involved:

> As a very important source of strength and security, cherish public credit. One method of preserving it is to use it as sparingly as possible, avoiding occasions of expense by cultivating peace, but remembering, also, that timely disbursements, to prepare for danger, frequently prevent much greater disbursements to repel it; avoiding likewise the accumulation of debt, not only by shunning occasions of expense, but by vigorous exertions, in time of peace, to discharge the debts which unavoidable wars may have occasioned, not ungenerously throwing on posterity the burden which we ourselves ought to bear.
>
> The execution of these maxims belongs to your representatives, but it is necessary that public opinion should cooperate. To facilitate to them the performance of their duty, it is essential that you should practically bear in mind that toward the payment of debts there must be revenue; that to have revenue there must be taxes; that no taxes can be devised which are not more or less inconvenient and unpleasant.

As I read the foregoing in light of the $20 scheme, Washington would abhor it. He says to have a regard for the amount of our public debt. Sure, spend money to meet emergencies, but when the emergency is over, get rid of the debt; do not saddle it on your children and your children's children. And do not forget, unpleasant as they are, taxes are the only way of paying for the expenditures of government.

There, my colleagues, you have the wisdom on this subject of a man much more versed in the intricacies of government than most of us.

But even George Washington was somewhat dubious as to whether or not you would heed it. In the closing portions of his Farewell Address he had this to say:

> In offering to you, my countrymen, these counsels of an old and affectionate friend, I dare not hope they will make the strong and lasting impression I could wish; that they will control the usual current of the passions, or prevent our Nation from running the course which has hitherto marked the destiny of nations, but if I may even flatter myself that they may be productive of some partial benefit, some occasional good; that they may now and then recur to moderate the fury of party spirit * * * this hope will be a full recompense for the solicitude for your welfare by which they have been dictated.

As I read the foregoing in light of the $20 scheme, even though Washington mentions the expectation that his advice "may be productive of some partial benefit," I think in this instance he would expect us to do more than cut it down to $10. I think he would expect us, in this situation where there is a choice between doing what is right for a political party and doing what is right for our country, to have the wherewithal to choose to do what is right for our country.

President's Highway Message

EXTENSION OF REMARKS
OF
HON. PATRICK J. HILLINGS
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, February 22, 1955

Mr. HILLINGS. Mr. Speaker, President Eisenhower's highway program repeats his now familiar process of coolly surveying a national problem and advancing a sound means by which the

problem can be attacked and steps taken toward eventual solution.

No responsible person can deny that our Nation is facing eventual strangulation on the highways. For half a century it has been a nip and tuck battle to keep highway construction ahead of automotive progress. We must move ahead with this bold plan in order to expedite the flow of goods and people from place to place. Whether in war or in peace, our highways are vital to the national economy and welfare. If we can reduce the annual carnage caused by traffic accidents, this alone will make our efforts worth while.

I am particularly pleased with the fiscal aspects of the President's scheme. Here again, the planning is based on our anticipated revenues over a specific period of time. The improved highway system will be paid for out of the funds received from increased gas tax revenues as America grows and is not a mortgage on the earning capacity of future generations as has been the case with other half-baked schemes of past years.

This is a blueprint for action which we as legislators should get behind and support.

Señor Miguel Alemán, Former President of Mexico, Encourages Joint Action in Promoting Economic Development of Latin America

EXTENSION OF REMARKS
OF
HON. CHARLES A. WOLVERTON
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Tuesday, February 22, 1955

Mr. WOLVERTON. Mr. Speaker, as a result of several visits to Mexico, the countries of Central America and South America, I have become greatly impressed with the economic future of these countries and the possibility of the extensive development of their resources.

In view of the above I have been a strong and persistent advocate of closer relations between our Nation and those to the south. I regret that the advantage of such a policy has not been recognized as fully as it should have been. I trust, however, that a better understanding and a greater cooperation will grow out of the combined efforts that are finding expression in many different ways.

In this connection, I call attention to the Inter-American Investment Conference opening in New Orleans on February 28, 1955. This conference was initiated in Washington officially; then the idea was taken up unofficially by several parties and sponsored by the city of New Orleans through its International House and by Life and Time magazines. The individuals in charge of promoting the idea are Mr. Edgar R. Baker and Mr. Rudolph S. Hecht.

Señor Miguel Alemán, former President of Mexico, was invited to attend but was unable to do so because of prior engagements in Central and South America. However, he sent the conference a message, as follows:

> Latin America requires capital for development, designed to enlarge her economy on a plan of collaboration with her private capital resources, through sound investments creative of new sources of wealth and of labor, making for the real permanent advancement of each of her countries and of the hemispheric community.
>
> We are all good neighbors and loyal partners and should furthermore be devoted in common to the principles of democracy applied to human fellowship in all its aspects and everywhere.
>
> In the spiritual field, by consecrating ourselves to the service of the fundamental liberties to believe and to think, as well as of the freedom to express thoughts and beliefs.
>
> In the economic field, by joining our efforts in order to make the progress of our countries an exemplary thesis set before the world, conceived in the following terms:
>
> That private investments made for the equitable profit of all concerned do firmly uphold, together with justice, the peace among nations.
>
> That in order to abolish the dire impoverishment which is one of the breeding grounds of communism, it is not enough to aim at a decorous poverty; the decided promotion of a generous and honorable abundance for all is what is needed.
>
> This is now possible in the New World, as proven by the determination that inspires the Inter-American Investment Conference.

The spirit of cooperation and mutual helpfulness expressed by former President Alemán are entitled to serious consideration. A recognition of such principles would help materially in promoting goodwill between the respective nations in the Americas.

Fair Treatment for Mexico Under the Sugar Act

EXTENSION OF REMARKS
OF
HON. CLAIR ENGLE
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, February 22, 1955

Mr. ENGLE. Mr. Speaker, there are in my district many splendid United States citizens of Mexican descent. Through them and through my experience as a Member of Congress, I have come to admire and respect the Mexican people and our great good neighbor to the south, the Republic of Mexico.

That is why, Mr. Speaker, I should like to call the attention of the House to an urgent problem facing the Mexican people—the present plight of the Mexican sugar industry. That industry, the fourth largest in Mexico, is in danger of being frozen out of its fair place in the world sugar market. Regrettably, that result is being brought about in large part, through the operation of the United States Sugar Act.

In recent weeks there have been discussions, at the White House and the Department of Agriculture, with a view to recommending legislation to amend the Sugar Act so as to insure an equitable share of the United States sugar market for domestic sugar producers. I am heartily in accord with that objective. At the same time, however, if we are to amend the existing legislation at this time, we should certainly use the opportunity to adjust the grossly inequitable division of the remainder of the United States market among foreign producers, which exists under the present law.

Mr. Speaker, the requirements of the Mexican sugar industry are in no sense inconsistent with the promotion of a healthy, competitive sugar industry in the United States. Mexico has no quarrel with the objectives of the United States sugar producers or with their proposals as set forth in recent official discussions. Mexico is merely seeking an equitable distribution among foreign countries, of the market which remains after domestic production is accounted for—a distribution which takes into account the economic facts of life in terms of trade balance with the United States, total sugar production and the impact of the United States sugar program upon the economy of the exporting countries.

In the recent discussions of the reciprocal trade bill we heard many fine-sounding words about trade, not aid, and about the necessity for enabling our friends and allies to purchase our goods and services by purchasing from them what they can best produce. It is time to practice what we preach. I firmly believe in helping those who help the United States.

Mexico is the third largest purchaser of United States goods in the entire world, surpassed only by Canada and Japan. In the past 22 months, Mexican purchases from the United States totaled $1,165,000,000. In the eight classifications of leading United States exports to Latin America published by the United States Department of Commerce for 1953, Mexico is the largest importer and occupies first place in 5, second place in 1 and third place in 2 of the classifications. In that year, Mexico imported from the United States $156.2 million in industrial and electrical machinery, $83.4 million in autos and trucks, $70.5 million in chemicals, $39.4 million in iron and steel mill products and $294.9 million in other products. No other sugar exporting country came anywhere close to these figures.

At the same time, over the past 22 months, Mexico's balance of trade with the United States has been unfavorable to Mexico by $532 million. For every dollar the United States spent in Mexico, Mexico spent $1.84 in the United States—almost 2 for 1.

Even within the sugar industry itself, the balance of trade between the United States and Mexico is overwhelmingly unfavorable to Mexico. Every bit of sugar-processing machinery and spare parts used in Mexico has been purchased in the United States. During the past 5-year period the Mexican sugar industry imported $38 million worth of United States manufactured equipment. During the same period, Mexico was permitted to sell to the United States only $4½ million worth of Mexican sugar.

It is obvious, of course, that in the present dollar situation no nation can indefinitely sustain so great a trade imbalance without a serious deterioration

of its imports from the United States. Mr. Speaker, one of the stated objectives of the Sugar Act is to promote the export trade of the United States. In view of this express language of the statute, one would certainly expect that the export quota allotted to Mexico by the administrators of the act would bear some reasonable relationship to the trade picture and take into account the crucial dollar gap problem of the Mexican people. That has not been done, however. In fact, the quota allotted to Mexico is so small as to be ridiculous.

In the face of the tremendous support afforded the United States economy by Mexican imports, Mexico has been allotted a quota of only 11,445 tons of sugar out of a total United States consumption of 8,200,000 tons. This represents only 1 percent of Mexican production and only fourteen one-hundredths of 1 percent of the total United States market. Moreover, it represents only thirty-one one-hundredths of 1 percent of the total export quotas allotted all foreign countries.

Contrast the position of other sugar exporting countries. Cuba, which imports from the United States only about two-thirds as much as Mexico, and whose trade balance with the United States is substantially favorable to Cuba, has a quota of 2,667,840 tons. This represents 47 percent of her production, 32.5 percent of the total United States market and 96 percent of foreign quotas, excluding the Philippines.

Peru, which purchases from the United States only about 1/6 as much as Mexico, has a quota of 51,922 tons—almost 5 times that of Mexico. The Peruvian quota represents approximately 8 percent of her production, 0.63 percent of the United States market and 1.4 percent of the total foreign quotas.

The Dominican Republic, which purchases from the United States only about one-fourteenth as much as Mexico, has a quota of 27,634 tons, more than twice that of Mexico. This represents 4 percent of Dominican Republic production, 0.34 percent of the total United States market and 0.74 percent of total foreign quotas.

How did this grossly inequitable situation come about? It came about because of the failure to formulate in the Sugar Act a realistic basis for the continuing establishment of foreign sugar quotas. As a result, the system has broken down and produces outlandish results. There is a crying need for a commonsense approach to the foreign sugar problem, related to the facts of present day life, and divorced from ancient patterns and prejudices. We must recognize the equities and exigencies of today, and we must be mindful of the impact of what we do upon the lives and well-being of our friends and neighbors.

Aside from the simple equities of the situation and the economic self interest of the United States, there are other reasons why a healthy Mexican sugar industry is in the best interests of the United States. Mexico is the only sugar producing country with a border contiguous to our own and the only one in a position to provide uninterrupted, overland supply in the event of an emergency. In time of war, this assured supply for United States industry is a matter of utmost importance to United States industry and the consuming public.

We all want our allies in the free world to be strong as a bulwark against Communist aggression. The economic well-being of our friends and allies is as much a part of our own national security as are arms and armies.

We must not underestimate the tragic effect which failure to correct the inequitable foreign sugar quotas will have upon the Mexican economy. The Mexican sugar industry is the fourth largest in that country. It supports well over half a million people. By dint of diligent and persistent effort, over the years, that industry has raised the standard of living of Mexican farm workers to a reasonable level. The operation of the quota system, as presently constituted, however, spells ruin for that great Mexican industry. With present export restrictions in the world sugar market, if the United States does not allow Mexico a more equitable share of its sugar imports, it can only mean ruinous surpluses in Mexico or crippling acreage restrictions, either of which would deprive thousands of Mexican workers of a livelihood. The social and economic impact of such an eventuality upon Mexico should be obvious. Mexico has already undergone a devaluation of its currency because of the unfavorable balance of its trade with the United States. Surely we should take reasonable measures to prevent additional economic dislocation and possible collapse of United States markets in that country.

Mr. Speaker, it is not as though these people were asking for an increase of millions of tons in their sugar quota. Cuba, which has a favorable balance of United States trade now has a quota equivalent to 32.5 percent of the United States market. A sugar quota for Mexico of only 2 percent of United States consumption would absorb that country's exportable surplus and give the industry the stability it so urgently requires. Such an adjustment would have a minimal effect upon the overall sugar picture. This is a case where so little on the part of the United States will mean so much to our Mexican friends.

Mr. Speaker, this is a situation which cries out for correction and I intend to make every effort to see that justice is done.

Postal Clerk Steals: Judge Is Sympathetic

EXTENSION OF REMARKS
OF
HON. LOUIS C. RABAUT
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Tuesday, February 22, 1955

Mr. RABAUT. Mr. Speaker, I should like to bring to the attention of my colleagues a matter which will soon come up for their consideration: The question of postal pay raises. At the conclusion of my remarks I insert a news item from the Detroit Free Press, dated Thursday, February 17, 1955, and a copy of my letter to Federal Judge Theodore Levin. The news story tells of a veteran post office clerk with five children making $84 per week and pleading guilty in Federal court of stealing $231 of postal funds. Further, I am inserting in the RECORD a copy of my letter to Federal Judge Theodore Levin assuring him that my remarks are in no way intended to influence his duties as a jurist.

In his remarks from the bench Judge Levin states that "Something should be done about it." The implications contained in his statement, I feel, are directed to this body. When a jurist decries the inequities of a socio-economic situation which places beyond his scope of authority a means of applying a remedy I am of the opinion that those in a position to take action should not falter or hesitate. The remedy must be shaped here in the form of adequate postal pay legislation capable of answering not merely the needs of bare existence, but sufficient in scope to make the public servants of our postal system shareholders of a standard of living for which we can be justly proud.

I feel that the President's message on postal pay increases falls short of the mark in supplying the needed solution for this problem. The administration's salary plan, now before committee, calls for a 5 percent increase in basic salary rates. What would this mean to the postal clerk that is responsible for nourishing five children along with himself and his wife? Not enough to pay one-half the milk bill if he is supplying these tots with the recommended minimum of 1 quart per child per day. Since when has this great legislative body considered the basic welfare of its citizens secondary to a dream of making the postal service a self-supporting, going business concern? I do not say this to slur any efforts to make more efficient the operations of our Government agencies, but when human values are being equated with the cold statistics of fiscal policy, I, for one, shall never abide by any resultant that sacrifices humaneness for business expediency. Our responsibility is to the many—as well as the few.

Therefore, Mr. Speaker, I earnestly request my colleagues to join me in support of a 10-percent increase in the basic salary rates; retroactive to the date of the President's disapproval of H. R. 7774 of the 83d Congress.

POSTAL CLERK STEALS: JUDGE IS SYMPATHETIC
(By Charles Manos)

A veteran post office clerk who makes $84 a week pleaded guilty Wednesday in Federal court to stealing $231.

Charged with misapplication of postal funds collected by him on cash-on-delivery packages was Clem Hall, 49, of 1866 Kenmore, Grosse Pointe Woods. He has five children—all under 12 years of age.

Hall's plea immediately drew from Judge Theodore Levin a sympathetic comment apparently aimed at pay scales for postal workers.

"It's a shame a good man like you should be a victim of circumstances," Judge Levin said. "Something should be done about it."

Hall, a clerk in the Grosse Pointe branch, has worked for the post office for 29 years.

Judge Levin released Hall, who will forfeit his job and possibly his pension rights, on personal bond pending sentencing.

FEBRUARY 23, 1955.

Hon. THEODORE LEVIN,
Judge, Federal District Court,
Eastern District of Michigan,
Detroit, Mich.

DEAR JUDGE LEVIN: I am enclosing with this letter a copy of some remarks I made this week on the floor of the House of Representatives. I sincerely hope that I have not taken any privileges in my interpretation of your comment in regards to this matter.

Since this individual is a member of my constituency I felt duty-bound to make public mention of the matter with the hope that adequate legislation would evolve therefrom. In no way do I intend my comments to influence you in your duties of administering the justice that our laws require.

I would be most interested to hear whatever further views you might have about the general problem.

Cordially,

LOUIS C. RABAUT,
Member of Congress.

Smog Can Kill, Claim Experts After Survey and Study

EXTENSION OF REMARKS
OF

HON. GORDON L. McDONOUGH

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1955

Mr. McDONOUGH. Mr. Speaker, the Congress may soon have to give serious consideration to legislation concerning the responsibility of the Federal Government to help eliminate smog in highly industrialized and thickly populated areas throughout the Nation.

Smog and all forms of air pollution which are dangerous to the health and welfare of our people have been increasing steadily in the United States during the past decade, and I am sure that this is a matter in which all Members of Congress are concerned.

The Atomic Energy Commission informed the Nation recently of the horrifying effects and possible death and certainly the detriment to the health of millions of people within the area of an atomic bomb fallout which would contaminate and pollute the atmosphere within a 7,000-square-mile area, if the zero point was located in New York City.

This clearly indicates the urgent need of an immediate study of the effects of the fallout from atomic bombs tested in Nevada over the past several years.

Even if we knew nothing of the atomic bomb and did not have to consider the effects of the atomic fallout on millions of people, we would still have the serious problem of exhaust fumes from millions of motor vehicles which are increasing daily as they are not equipped with efficient carburetors to consume all of the gas delivered to the engine nor are they equipped with filters on the exhaust to neutralize or reduce the unburned gasoline vapors or the noxious products of combustion which is thrown into the atmosphere of thickly populated and highly industrialized areas in various parts of the Nation every day and thus contaminating the atmosphere with poisonous and irritating pollutants.

It is only fair to say at this point that the automobile manufacturers of the Nation are at present studying and experimenting with more efficient carburetors for motor vehicles which will reduce the poisonous gas now released from these machines. However, it is estimated that it will be a considerable time in the future before such a carburetor can be manufactured and applied to the millions of motor vehicles in operation in the United States.

Since motor vehicles are freely permitted in interstate commerce is further evidence that the problem of the elimination of smog and other air pollutants is one which the Federal Government should assume some responsibility for its solution.

Some preliminary studies have been made of the problem of smog and other atmospheric contaminants including a report by the Stanford Research Institute on the nature and causes of smog. This report, published in 1954, considered the growing smog problem of Los Angeles County since 1947, and pointed out that it is a serious problem which cannot be oversimplified. It is a problem which must be thoroughly understood, all contributing causes classified and identified, before effective control can be achieved.

I have introduced H. R. 3630 which would authorize the Secretary of Health, Education, and Welfare to conduct intensified research into the causes, hazards, and effects on human health of smog and all forms of air pollution, and to investigate the most effective means of eliminating smog.

Many parts of the Nation have been severely affected by the deadly and irritating menace of air pollution, and Los Angeles County and other areas in southern California have had this problem for some time.

As further evidence of the dangerous effect of smog, a survey and study by medical experts was conducted recently which I submit herewith together with a letter to me from Francis M. Pottenger, Jr., M. D., chairman of the smog committee of the Los Angeles County Medical Association:

MONROVIA, CALIF., *February 9, 1955.*

Hon. GORDON L. McDONOUGH,
House of Representatives,
Washington, D. C.

DEAR REPRESENTATIVE McDONOUGH: I am sending a copy of the Los Angeles Times of January 21, 1955, which contains the full report of our committee which was passed by the council of the Los Angeles County Medical Association. In reply to your letter, my remarks are in clarification of these resolutions.

First, we feel that air pollution can cause death. It has done so elsewhere, including within the confines of the United States.

Air pollution is a continuing problem. It changes from day to day and locality to locality, depending upon meteorology as well as technological problems that apply in a given area at that particular time. For this reason, in the past, the committee has felt that the study of smog must to a large degree be based on the study of local factors. It is for that reason that we have felt that the acceptance of standards of toxicity that might be developed in Buffalo, N. Y., although they might deal fundamentally with the same toxicological studies, that the standard permissible in New York City would not necessarily apply to Los Angeles because there may be other pollutants in the Los Angeles atmosphere that might not be present in Buffalo, and the effect of the Los Angeles pollutants might be additive, so that a far lesser concentration of a given component might be lethal or a serious health hazard, while in Buffalo it could be breathed with more or less impunity.

Likewise, we have realized that the pollutants are continually changing. They are changing as technical advances change, both as elimination is carried on and also as new techniques develop. On the other hand, we are convinced that it is essential that the relative toxicity of each major contaminant in the atmosphere be determined at once. That problem would be the same in any city of the United States, and, therefore, could be a problem of Federal Government.

Definite establishment of toxicological standards would provide the enforcement officer with two primary tools of great leverage. First, it would provide him with a knowledge of what material must first be eliminated from the atmosphere, and, secondly, it would provide him with information that would enable him to act in a legal manner should the accumulation of toxic elements reach a level that could be assumed to be approaching a critical health hazard. It is also essential from our point of view that some biological means of determining the general critical level of toxicity of air pollution must be discovered to supplement purely chemical determinations. A homely example of this was the early observation that poisonous fumes in mines would cause the canary bird to be overcome long before the effect on man was noted. This warned the miners that they must take measures to protect themselves.

* * * * *

As to the effect of your bill on the smog problem, it appears to me that any legislation that will encourage industry to install devices for the elimination of atmospheric pollution, such as a means for tax relief, should be encouraged. Likewise, although not included in your bill for the potential sources of atmospheric pollution, especially those that are associated with the wider use of atomic energy, should make it mandatory that industry determine the public health aspects of its pollutants that are new to the arts.

I certainly wish to thank you for your interest in this problem, and the committee will be very happy to receive further information. I will see that your bill is brought to the attention of our committee at its next meeting.

Sincerely,

FRANCIS M. POTTENGER, Jr., M. D.,
Chairman, Smog Committee, Los Angeles County Medical Association.

[From the Los Angeles Times of January 21, 1955]

AIR POLLUTION CAN KILL, MEDIC GROUP CLAIMS

"Air pollution can cause death."

This was the first of a group of 9 motions submitted to the council of the Los Angeles County Medical Association by its smog committee and approved by the council, according to the association bulletin.

The smog committee, headed by Dr. Francis M. Pottenger, Jr., of Monrovia, also noted:

2. That air pollution is a continuing dynamic problem in the Los Angeles area.

SAFETY OF HUMANS

3. That the smog committee proposes that biological as well as chemical indices must be determined for the safety of human beings.

4. That the smog committee approves in principle the establishment of chemical standards of air pollution as proposed and begun by the County Board of Supervisors.

5. That the smog committee feels that present chemical standards do not alone safeguard the health of the public.

6. That the tolerance levels of toxicity for human beings of each important contaminant in the atmosphere must be determined both for acute and chronic exposure, both singly and in combination.

REPORT WANTED

7. That the deans of the three medical schools in the area and the California Institute of Technology be requested to prepare a report to the Los Angeles County Medical Association indicating what program each school would propose to determine standards of toxicity of air pollutants, both acute and chronic, and to prepare an estimate of the cost of such a program.

8. That the council of the Los Angeles County Medical Association request each section of the association to send its chairman or representative to meet with the smog committee to make plans for a survey of the membership of the section as to the effect of air pollution on human beings.

9. That the council of the Los Angeles County Medical Association request the county board of supervisors to obtain the cooperation of private, city, State and Federal agencies in financing the necessary facilities and salaries for biological research to determine critical standards of air pollution toxicity, utilizing the facilities of all local institutions capable of carrying on such research.

Address by the Honorable Charles S. Thomas, Secretary of the Navy

EXTENSION OF REMARKS
OF

HON. PATRICK J. HILLINGS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1955

Mr. HILLINGS. Mr. Speaker, I wish to call to the attention of this body an address by the Honorable Charles S. Thomas, Secretary of the Navy, on the 160th anniversary of the United States Naval Supply Corps, which was delivered in New York on February 17, 1955.

Secretary Thomas in his speech has presented an excellent review of the Navy's defense program and the role of the Supply Corps in providing logistic support. Our Nation is indeed fortunate to have a man of the background and experience of Mr. Thomas serving in this vital position.

The address follows:

Mr. Jack, distinguished guests, ladies and gentlemen, thank you, Mr. Murrow. That introduction, I trust, shows that I am a Supply Corps man at heart. I hope you will accept me here tonight as one of you.

Six days hence, as most of us know, the Navy's Supply Corps will be 160 years old. An organization doesn't attain that venerable age unless it has survived the old-age tests of service, farsightedness, and progressiveness. This birthday has been achieved by a steady performance which has always been outstanding in the area of military supply. The Nation and the Navy are better and stronger because of its contributions.

For those who may not be acquainted with the Navy's Supply Corps and its far-reaching activities, let me say that it is the Navy's business organization. Its officers are the business experts of the Navy. They manage a huge and complex organization which is responsible for getting the Navy what it needs, where it needs it, and when it needs it. Though complex and vast, the Supply Corps' mission is simply summarized in a single phrase: "Service to the fleet."

As you all know, the Navy has just completed a very delicate and potentially dangerous task in the Formosan Straits. That task has been performed expeditiously and in a most outstanding manner of which every American can be proud. I will hazard the opinion that there will be no immediate war in the Formosan Straits, and my reason for saying so is quite simple. Whenever the Communists are confronted by strength, resolve, and courage but without provocation, they halt. For the first time in this cold-war siege, they came face to face with the harsh realities of seapower at the coastline of the Formosan Straits' 100 miles of open sea. To be an aggressor here required more than an order to violate a frontier—they had to have the ability to control and cross that 100-mile strip of water. And that they cannot do.

Parenthetically, I might point out that our Seventh Fleet couldn't have accomplished this task had there not been an effective supply organization behind it. The food, the oil, the gasoline, the spare parts, the thousands of items which keep that fleet operating 7,000 miles from home—and in this case kept it on the line for many days—is an excellent example of the unseen and often unsung work of the Supply Corps.

Right now, Formosa is current business for us all, and I am afraid we haven't seen the last of it because in relation to the global scene, Formosa appears to be but a part of a pattern for conquest. A year ago, the pressure area was Indochina. Before that it was Korea. Before that it was Iran. Before that it was Berlin. The locale of the tensions are constantly shifting, but the pattern for conquest appears to remain the same.

We all know that the country and our President want a real and lasting peace and are working diligently for that objective. However, until the Communists show some tangible evidence of a like desire, we have no alternative but to keep ourselves in a constant state of readiness.

Therefore, I thought it would be both appropriate and timely tonight to speak about our Navy's defense program for the future and the vital part which the Supply Corps plays in it.

Let us begin by reducing the problem to its basic essentials.

What is the threat which confronts the free world today? It appears to be a very patient and long-range program for world domination. And what is the nature of this threat? There are many answers to this question—the threat is spiritual, it is economic, it is psychological, and it is military. It is a spiritual contest between those who believe in the worth and dignity of the individual and who have faith in God and those who consider man only as an advanced but soulless type of animal. It is a contest of systems—free enterprise versus regimentation. It is a contest of philosophies between those who cherish freedom and those who practice tyranny. And lastly, it is a contest of military strengths. The military threat can be varied and complicated—a cold war or a hot war; a little war or a big war; a nuclear or a nonnuclear war.

Now in analyzing this threat and its danger, we must answer the question:

Is the threat immediate or is it one of extended tension? If the answer is that we anticipate an attack in the immediate future, we obviously should go all out on our expenditures for military defense and get ready to protect ourselves in every possible way.

To do so would cost us over $100 billion every year. But if we miscalculate, spend $100 billion and more 3 or 4 times, and we are not attacked, we would find ourselves in serious economic trouble. We might discover we have exhausted ourselves and allowed Communists to win by default.

On the other hand, if we decide that the danger is one of extended tension—one to test our patience, destroy our economy, and yet one which gives us time and opportunity to work for a real and lasting peace—I submit that the following elements are essential for a period of extended tension:

First. We must have a retaliation capability not only to deter war but to overwhelm an enemy if he strikes.

Second. We must have a hard core of land, sea, and air forces which can be used in a variety of situations and in a variety of places. These forces must be able to handle localized emergencies yet strong enough to withstand the initial onslaught of a major conflict.

Third. We must have sea supremacy.

Fourth. We must have a continental defense program.

Fifth. We must have a potent Reserve system organized for rapid expansion.

Sixth. We must have an industrial mobilization base also designed for rapid expansion.

And lastly. We must continue a strong research and development program to maintain our scientific lead.

In years past our defense program was either feast or famine. The past 20 years are typical of this accordion process. In 1935 our entire military defense budget was slightly more than a half-billion dollars. Then, during World War II, we spent approximately $300 billion. By 1949 our defense budget had fallen back to only $13 billion annually. Then, during the Korean war, we mushroomed again and spent almost $200 billion.

The economy of the United States—or for that matter any nation's economy—cannot stand such violent changes very long. It is elementary that the process of rapidly building up and closing up is wasteful and unsound. It hurts labor because it is a series of hirings and layoffs; it hurts industry because there can be no advance planning; it hurts the military because the Armed Forces are sharply expanded one year, seriously reduced the next.

If this process of sharp peaks and valleys in our military expenditures had been permitted to continue, it alone could have defeated us.

To reach his decision President Eisenhower considered all the factors. After the most careful analysis with the Joint Chiefs of Staff, and, as he said, after "prayerful study," he concluded that our military defense program must cover an indefinite period of extended tension, be adequate and strong, and yet one which the American taxpayer's pocketbook can support indefinitely. I know of no American better qualified to make that decision than President Eisenhower.

I would now like to examine with you this program of the President's in relation to the Navy. It is concisely summarized in his state of the Union message and can be divided into four major areas.

STRATEGY, AIRPOWER, PROGRESS; AND ADMINISTRATION

Let us take these areas one by one.

The President had this to say about strategy:

"Undue reliance on one weapon or preparation for only one kind of warfare simply invites an enemy to resort to another * * * we must therefore keep in our Armed Forces balance and flexibility adequate to our needs."

This statement is in sharp contrast to pre-Korean days when our military strategy was drifting toward a one-weapon strategy and to preparation for a single type of warfare. Korea proved this strategy vulnerable and fallacious.

Since our national policy rejects preventive war, a potential enemy can choose the time, the type, the size, the scope, and the location of war. Our defenses, therefore, must be sufficiently balanced and flexible to meet a variety of threats, any one of which could defeat us.

Our offenses too, must be balanced and flexible. By having several systems or methods of retaliation instead of one, we force an aggressor to anticipate retaliation by every one of those methods or systems. By so doing, we accomplish three things:

We force him to increase his defense-offense ratio. In other words, he must translate more of his capacity to strike to self-defense.

We make him dilute his defenses. Instead of defending only one corridor, area, or avenue, he must anticipate reprisal from every direction and every frontier. And we add a heavier burden to his relatively poorer industrial machine.

Having several balanced and flexible offensive systems is a corollary aid in that it increases our chances of being able to deter a war.

The Navy is tailored to provide sea forces embodying these fundamental principles of balance and flexibility. It makes the soundest, safest military sense.

Next airpower.

"The forthcoming military budget," said the President, "emphasizes modern airpower in the Air Force, Navy, and Marine Corps."

How does the Navy feel about this? Well, the Navy agrees solidly. Within the Navy itself, because it is a big contributor to national airpower, the importance of airpower is thoroughly recognized and appreciated. Airpower over the seas, and emphasis upon it, is growing constantly.

For example, the fleet now has airplanes of very great striking potential of many types and sizes which are fully capable of carrying weapons of rapid and destructive striking power. They can deliver atomic weapons to targets 1,000 miles away.

And we have just recently launched the first of a new class of carriers on which these planes are based. We are also developing a new family of jet seaplanes which can use the 70 percent of the surface of the world as 10,000 mile long runways.

These examples certainly highlight the growth of airpower in the Navy.

Third, progress.

"Our military planners," said the President, "must be flexible enough to use new weapons and new techniques."

The numbers of new weapons in the Navy is quite surprising, even since the end of the Korean war. In the subsurface field, we have launched the atomic-powered submarine, *Nautilus*, which has exceeded our expectations. Three more atomic submarines are to be built. We have developed killer submarines to search for and destroy enemy submarines in their own element. We have troop-carrying submarines, tanker submarines, and guided-missile submarines.

On the surface of the sea, the Navy is changing mightily. In addition to the mobile seabases of the *Forrestal* class, two guided-missile cruisers are joining the fleet this year. Three types of guided missiles are now operational in the fleet—an air-to-air missile called Sparrow; a surface-to-air missile called Terrier; and a surface-to-surface missile called Regulus. We anticipate that the guided-missile field will change the Navy quite as much as did the change from wooden ships to metal ships.

In the air, the Navy is developing the helicopter to perform two offensive tasks—to hunt submarines and to transport Marines in an amphibious assault—as well as to perform a host of auxiliary roles. The Navy is also developing vertical-takeoff aircraft, jet seaplanes, bombers, and fighters, all of which we are now testing.

So in the matter of new weapons, the Navy is right in the forefront of progress.

In the matter of new techniques, we feel we are equally progressive. I will mention two new techniques briefly.

To complement our fixed land bases, the Navy is emphasizing a new concept of mobile seabases—carriers, jet seaplanes, and guided-missile ships. These moving bases will be able to prowl an aggressor's coastline. Their use will raise no problem of sovereignty. They will be able to change location at speeds up to 40 miles an hour to any area of the world's oceans and seas where their presence is required. Their locations will be unknown and unpredictable. They will be less vulnerable than fixed bases. These moving seabases will give our reprisal system the flexibility and dispersal it must have in these times when a sudden attack might overwhelm our fixed land bases.

Secondly, atomic propulsion. Naval ships are ideally adapted for atomic propulsion, and we are moving in this field as fast as is practicable. The naval aviation field also offers a great potential for the atomic propulsion of aircraft. Atomic propulsion promises to change the Navy as much as did the shift from sail to steam.

Finally, the President has repeatedly emphasized efficient administration. At a press conference a few weeks ago he said that it is no crime to strive for efficiency and economy in the national-defense program. In the state of the Union message, he said:

"In administration of these costly programs we demand the utmost efficiency."

With 3 million people in the uniformed services, more than a million personnel in a supporting role, and spending approximately $35 billion every year for an indefinite period, the armed services obviously must have the most modern, up-to-date supply systems for efficiently supervising volumes of this size.

As you gentlemen who represent American business know, good administration depends upon modern and efficient organization. It also requires experienced and efficient managers. It means good business methods and systems.

What sort of a business organization does the Navy have to handle its $10 billion annual budget? In my opinion, the Navy's Supply Corps has developed the best and most efficient supply system in the history of any military organization.

First of all, it is composed of a group of officers and men who are specialists and experts in their field. That they are experts is no circumstance. Seventy percent of the corps' officers have undergraduate degrees. Twenty percent have graduate degrees in business administration. This educational process continues throughout their careers, supplemented by periodic 3-month assignments to civilian business.

In regard to organization, the Navy Supply Corps was the first service to adopt financial accounting. It was the first to use industrial stock funds. It developed a cataloging system to handle its 1,350,000 stock items which came to be a model for other organizations. It has adopted whenever practicable the best management systems of business and industry. It was the first to specialize and decentralize its procurement functions to 14 offices around the country. For example, all aviation materials are controlled through Philadelphia; all food is controlled through Washington; all clothing is controlled through Brooklyn; all ships' parts are controlled through Mechanicsburg, and so on. At each of these locations, three key experts sit side by side.

An inventory expert determines how much to buy and where to buy it; a technical expert determines what to buy from an engineering standpoint; and a procurement expert who does the actual buying. This marriage of administrative, logistic, and engineering know-how has given the Navy a sound and economical supply structure and, more important than that, it has made the Navy a more effective fighting force.

In this regard I might mention the Supply Corps' development of the modern supply ship and replenishment-at-sea techniques whereby fighting ships are rearmed, replenished, and refueled at sea. Admiral Nimitz referred to this development as the Navy's secret weapon in World War II. The best example of this is our 6th Fleet which has been in the Mediterranean now for the past 8 years without a supply base nearer than Norfolk—3,000 miles away.

Such things as these bespeak a sound and aggressive organization.

Few people today realize the importance of a modern and efficient supply system. Regardless of how able and well trained the military men, regardless of how fine their equipment, they are completely ineffective unless they can be rearmed and resupplied with all the vital things they need and at the time they need them.

The fine leadership and organization of the Supply Corps can insure, I am confident, that the President's demand for utmost efficiency will be carried out by the Navy.

Tonight I pay tribute to the Supply Corps and the wonderful group of men and women who make it successful. I know that its continued efficiency and performance will give increased strength to the Navy's and the country's defense program in the years to come.

SENATE

WEDNESDAY, FEBRUARY 23, 1955

The Chaplain, Rev. Frederick Brown Harris, D. D., offered the following prayer:

Almighty God, our Father, Thou hast so made us that our hunger of soul can be satisfied only with the bread that cometh down from heaven, and our unutterable thirst can be assuaged only with the clear water from the River of Life. Lead us to the place of still waters and green pastures.

May this moment of prayer be as an open gate to boundless resources of Thy grace, by which our strength may be renewed and our souls restored. Grant us courage, we ask, for the living of these days. We are the children of intrepid sires who, in fearful days, dared the wrath of devils and the scorn of men. Measure us with the challenge of our times and make us worthy of those who in the dangerous yesterdays were strong and unafraid.

Keep our faith steadfast lest for lack of it we lose what Thou dost intend in this prophetic time. As Thou dost punish us for past iniquities and chasten us by present difficulties, strip us of our illusions, humble us under Thy hand, and fit us to be the instruments of Thy will in helping and healing this stricken world. We ask it in the dear Redeemer's name. Amen.

THE JOURNAL

On request of Mr. CLEMENTS, and by unanimous consent, the reading of the Journal of the proceedings of Tuesday, February 22, 1955, was dispensed with.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States were communicated to the Senate by Mr. Miller, one of his secretaries.

REPORT OF NATIONAL CAPITAL HOUSING AUTHORITY—MESSAGE FROM THE PRESIDENT

The PRESIDENT pro tempore laid before the Senate the following message from the President of the United States, which was read, and, with the accompanying report, referred to the Committee on the District of Columbia:

To the Congress of the United States:

In accordance with the provisions of section 5 (a) of Public Law 307, 73d Congress, approved June 12, 1934, I transmit herewith for the information of the Congress the report of the National Capital Housing Authority for the fiscal year ended June 30, 1954.

DWIGHT D. EISENHOWER.

THE WHITE HOUSE, *February 23, 1955.*

LEAVE OF ABSENCE

Mr. GEORGE. Mr. President, as chairman of the Committee on Foreign Relations, I announce that, at the request of the Secretary of State, the Senator from Rhode Island [Mr. GREEN] and the Senator from Iowa [Mr. HICKENLOOPER] have been appointed to serve as members of the United States delegation to attend the inauguration of General Batista as President of the Republic of Cuba.

The Senator from Rhode Island and the Senator from Iowa are absent today because of that designation. The Senator from Iowa secured leave of absence from the Senate, but the Senator from Rhode Island failed to do so.

Therefore, I ask unanimous consent that the Senator from Rhode Island be excused from attendance on the sessions of the Senate from February 21 through February 26.

The PRESIDENT pro tempore. Without objection, the leave is granted.

COMMITTEE MEETING DURING SENATE SESSION

On request of Mr. KILGORE, and by unanimous consent, the Committee on the Judiciary was authorized to meet during today's session of the Senate, for the purpose of conducting a hearing on the nomination of John Marshall Harlan, to be an Associate Justice of the Supreme Court of the United States.

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. CLEMENTS. Mr. President, under the rule, there will be a morning hour for the presentation of petitions and memorials, the introduction of bills, and other routine matters, and I ask unanimous consent that any statements made in connection therewith be limited to 2 minutes.

The PRESIDENT pro tempore. Without objection, it is so ordered.

VISIT TO THE SENATE BY GIRL SCOUTS FROM RHODE ISLAND

Mr. PASTORE. Mr. President, I desire to call to the attention of the President pro tempore and the Senate the fact that this afernoon we are honored by the presence of 16 lovely Girl Scouts from the State of Rhode Island, who range in age from 13 to 16 years, and who are accompanied by 3 of their distinguished leaders. I respectfully suggest to the President pro tempore that they be invited to rise and be acknowledged by the Members of the Senate.

The PRESIDENT pro tempore. The young ladies will please rise and receive the acknowledgement of the Senate.

[The visitors rose and were greeted with applause.]

EXECUTIVE COMMUNICATIONS, ETC.

The PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

ESTABLISHMENT OF TOWNSITES WITHIN NATIONAL FORESTS

A letter from the Acting Secretary of Agriculture, transmitting a draft of proposed legislation, to provide for the establishment of townsites within the national forests, and for other purposes (with an accompanying paper); to the Committee on Agriculture and Forestry.

PRESENTATION OF STATUE OF GENERAL GEORGE WASHINGTON TO URUGUAY

A letter from the Acting Secretary of State, transmitting a draft of proposed legislation, to provide for the presentation by the United States of a statue of General George Washington to the people of Uruguay, and for other purposes (with an accompanying paper); to the Committee on Foreign Relations.

REPORT ON PAPERWORK MANAGEMENT BY COMMISSION ON ORGANIZATION OF EXECUTIVE BRANCH OF THE GOVERNMENT

A letter from the Chairman, Commission on Organization of the Executive Branch of the Government, transmitting, pursuant to law, a report on paperwork management, part I, in the United States Government, together with a report of its task force thereon (with accompanying documents); to the Committee on Government Operations.

RESERVATION FROM APPROPRIATIONS OF CERTAIN LANDS WITHIN INDIAN RESERVATIONS

A letter from the Assistant Secretary of the Interior, reporting, pursuant to law, that no reservations were made, during the calendar year 1954, of lands within Indian reservations valuable for power or reservoir sites or necessary for use in connection with irrigation projects; to the Committee on Interior and Insular Affairs.

REPORT OF PACIFIC MARINE FISHERIES COMMISSION

A letter from the Chairman, Pacific Marine Fisheries Commission, Portland, Oreg., transmitting, pursuant to law, a report of that Commission, for the year 1954 (with an accompanying report); to the Committee on Interstate and Foreign Commerce.

AMENDMENT OF SECTION 7 OF ACT OF SEPTEMBER 22, 1922, RELATING TO CERTAIN TELEPHONE INSTALLATIONS

A letter from the Secretary of the Army, transmitting a draft of proposed legislation to amend section 7 of the act approved September 22, 1922, as amended (with an accompanying paper); to the Committee on Public Works.

WITHDRAWAL OF CERTAIN INDIAN LANDS FROM MINERAL ENTRY—RESOLUTION OF HOUSE OF REPRESENTATIVES OF ARIZONA

Mr. GOLDWATER. Mr. President, I present, for appropriate reference, and ask unanimous consent to have printed in the RECORD, House Memorial No. 2, adopted by the House of Representatives of the State of Arizona.

The PRESIDENT pro tempore. The resolution will be received and appropriately referred; and, under the rule, will be printed in the RECORD.

The resolution presented by Mr. GOLDWATER was referred to the Committee on Interior and Insular Affairs, as follows:

House Memorial 2

Memorial requesting the Congress of the United States to pass legislation withdrawing all tribal lands of the Papago Indian reservation except lands previously patented or now subject to valid mining claims, from all forms of mineral entry and location, and directing that the mineral rights in said reservation be held in trust by the United States for lease for mining purposes for the benefit of the Papago Indians on the same terms and conditions as mineral rights are leased in other Indian reservations in Arizona

To the Congress of the United States:

Your memorialist respectfully represents:

The Papago Indian Reservation, created by Executive Order 2524 and extended by statute 46 St. 1202, is subject to mineral entry and location under the mining laws of the United States.

Except for the mining laws of the United States and Arizona, the said right of entry is not subject to any control by the United States or by the Papago Tribe.

Said right of location has caused hardship to numerous Papago Indians in the past by forcing them to move from their homes and fields and by depriving them of desirable lands and water holes.

Due to the great interest of the general public in the possibility of discovering uranium ore on the reservation, there is great fear among the Papago Indians that they will be deprived of their reservation piecemeal by mining claimants.

The Papago Indian reservation does not have adequate resources to support the population presently living there and the possibility of substantial mineral discoveries seems the only hope that the reservation can provide an adequate economic base for the Papago people.

Wherefore your memorialist, the House of Representatives of the State of Arizona prays:

That the Congress of the United States withdraw all tribal lands of the Papago Indian Reservation, except lands previously patented or now subject to valid mining claims, from all forms of mineral entry and location and directing that the mineral rights in said reservation be held in trust by the United States for lease for mining purposes for the benefit of the Papago Indians on the same terms and conditions as mineral rights are leased in other Indian reservations in Arizona.

STATEHOOD FOR ALASKA AND HAWAII—JOINT RESOLUTIONS OF OREGON LEGISLATURE

Mr. MORSE. Mr. President, I present, for appropriate reference, two joint resolutions of the Legislature of the State of Oregon, favoring the enactment of legislation to grant statehood to Alaska and Hawaii. I ask unanimous consent that the joint resolutions may be printed in the RECORD.

The PRESIDENT pro tempore. The joint resolutions will be received and appropriately referred; and, under the rule, will be printed in the RECORD.

The joint resolutions, presented by Mr. MORSE, were received and referred to the Committee on Interior and Insular Affairs, as follows:

Senate Joint Memorial 1

To the Honorable Senate and the House of Representatives of the United States of America in Congress assembled:

We, your memorialists, the 48th Legislative Assembly of the State of Oregon, in legislative session assembled, most respectfully represent as follows:

Whereas the security and economic development of Alaska are essential to the well-being of the United States; and

Whereas inclusion in the Union as a sovereign State would strengthen the economy and social strength of Alaska; and

Whereas many business, industrial, and labor groups in Oregon have worked unceasingly to develop increased trade and economic relations with Alaska; and

Whereas numerous civic and business organizations in Oregon have taken a public position favoring statehood for the great Territory of Alaska; and

Whereas the people of the Territory of Alaska demonstrated their loyalty to the Government of the United States, its traditions and teachings; and a readiness to achieve a status above and beyond that of an incorporated Territory: Now, therefore, be it

Resolved by the Senate of the State of Oregon (the House of Representatives jointly concurring therein), That we definitely go on record as urging early admission of Alaska as a self-governing State of the Union; and be it further

Resolved, That copies of this memorial be sent to the President of the United States, to the Secretary of the Interior, to all Members of the Oregon congressional delegation, and to the Delegate in the National Congress from the Territory of Alaska.

Adopted by senate January 13, 1955.

ZYLPHA ZELLA BURNS,
Chief Clerk of Senate.
ELMO E. SMITH,
President of Senate.

Adopted by House February 1, 1955.

E. R. GEARY,
Speaker of House.

Senate Joint Memorial 2

To the Honorable Senate and the House of Representatives of the United States of America in Congress assembled:

We, your memorialists, the 48th Legislative Assembly of the State of Oregon, in legislative session assembled, most respectfully represent as follows:

Whereas the security and economic welfare of Hawaii are essential to the well-being of the United States; and

Whereas inclusion in the Union as a sovereign State would strengthen the economy and social strength of Hawaii; and

Whereas many business, industrial, and labor groups in Oregon have worked unceasingly to develop increased trade and economic relations with Hawaii; and

Whereas the people of the Territory of Hawaii have demonstrated their loyalty to the Government of the United States, its tradition and teaching; and a readiness to achieve a status above and beyond that of an incorporated territory; and

Whereas numerable civic organizations in Oregon have taken a public position favoring statehood for the great Territory of Hawaii: Now, therefore, be it

Resolved by the Senate of the State of Oregon (the House of Representatives jointly concurring therein), That we definitely go on record as urging early admission of Hawaii as a self-governing State of the Union; and be it further

Resolved, That copies of this memorial be sent to the President of the United States, to the Secretary of the Interior, to all Members of the Oregon Congressional Delegation, and to the Delegates in the National Congress from the Territory of Hawaii.

Adopted by senate January 13, 1955.

ZYLPHA ZELL BURNS,
Chief Clerk of Senate.
ELMO E. SMITH,
President of Senate.

Adopted by house February 1, 1955.

E. A. GEARY,
Speaker of House.

RESOLUTIONS OF FIFTH DISTRICT, DEPARTMENT OF MINNESOTA, AMERICAN LEGION

Mr. THYE. Mr. President, I present, for appropriate reference, and ask unanimous consent to have printed in the RECORD, two resolutions adopted by the fifth district, Department of Minnesota, American Legion, relating to educational benefits for certain veterans, and the subjection of American citizens serving in the Armed Forces to the jurisdiction of foreign countries.

The PRESIDENT pro tempore. The resolutions will be received and appropriately referred; and, without objection, will be printed in the RECORD.

The resolutions presented by Mr. THYE were received, appropriately referred, and ordered to be printed in the RECORD, as follows:

To the Committee on Labor and Public Welfare:

"Whereas American boys who volunteered or were inducted into the Armed Forces on or before January 31, 1955, notwithstanding, and in the face of, the crisis brought about by the decision of the United States to defend Formosa, without allies if necessary, which decision might involve the United States in an all-out shooting war with Communist China and/or Russia, are as much entitled to the educational benefits under the Veterans Readjustment Assistance Act of 1952 as are those boys previously inducted or who volunteered into the service subsequent to the cessation of hostilities in Korea; and

"Whereas a bill is now pending in the Congress of the United States providing that persons in the Armed Forces on January 31, 1955, may continue to accrue educational benefits under said act, said bill being Senate File No. 705, now in the Senate Committee on Labor and Public Welfare: Now, therefore, be it

"Resolved by the fifth district American Legion, Department of Minnesota, regularly assembled in Minneapolis this 2d day of February 1955, That the Congress be, and it hereby is, urged to enact said legislation without delay; and be it further

"Resolved, That a copy hereof be forwarded to EDWARD J. THYE and HUBERT H. HUMPHREY, United States Senators from Minnesota, and WALTER JUDD and ROY WIER, Representatives in Congress from the Fifth District of Minnesota.

"FIFTH DISTRICT AMERICAN LEGION,
"By F. W. AMES, *Its Adjutant.*
"Attest:
"RICHARD GRANT,
"Commander."

To the Committee on Foreign Relations:

"Whereas American soldiers stationed overseas in foreign lands are under the jurisdiction of foreign courts under NATO agreements and treaties entered into by Secretary of State Dean Acheson in 1951 and approved by the United States Senate in July 1953; and

"Whereas by reason thereof, more than 400 American citizens serving in the Armed Forces of the United States were sentenced to prison terms in foreign lands by foreign courts during 1953; and

"Whereas the number of American citizens in the Armed Forces of their country sentenced to imprisonment in foreign lands by foreign courts during 1954 is "top secret," about which the American people have not been informed; and

"Whereas the American Legion firmly believes all members of the Armed Forces of the United States serving in foreign lands should be tried by United States military tribunals for any offense committed in such foreign lands; and

"Whereas American citizens in the Armed Forces, when so subjected to the jurisdiction of civil and criminal courts of foreign lands in which they may be stationed, are deprived of the protection to which they are entitled under the Constitution of the United States and the Bill of Rights when charged with offenses against foreign laws, many of which are intolerable to Americans, and contrary to American traditions of law and justice: Now, therefore, be it

"Resolved by the fifth district American Legion, in regular meeting assembled in Minneapolis this 2d day of February 1955, That it deplores and condemns the NATO treaty referred to, and resulting subjection of American citizens serving in the Armed Forces to the jurisdiction of foreign courts in foreign lands; and be it further

"Resolved, That the Congress of the United States and its State Department take immediate steps to regain and retain full and exclusive jurisdiction over all American citizens serving in the Armed Forces of the United States in foreign lands to the end and purpose that such citizens be tried under United States military law for any offense committed in foreign lands, thereby retaining for such American citizens their rights under the Constitution and Bill of Rights to preserve which they are serving in such foreign lands; and be it further

"Resolved, That copies of this resolution be sent to the Minnesota Department of the American Legion for concurrent action herewith, and to the United States Senators for Minnesota, and Congressional Representatives from the Third and Fifth Districts thereof.

"FIFTH DISTRICT AMERICAN LEGION,
"By F. W. AMES, *Its Adjutant.*
"Attest:
"RICHARD GRANT,
"Its Commander."

LIBERATION OF LITHUANIA—RESOLUTION OF CITIZENS OF LITHUANIAN DESCENT LIVING IN WYOMING VALLEY, PA.

Mr. MARTIN of Pennsylvania. Mr. President, the Commonwealth of Pennsylvania, which I in part have the honor to represent, is the home of many loyal and patriotic Americans of Lithuanian descent. They are joined together in hope that the land of their ancestors may soon be liberated from the cruel burden of Communist tyranny, and that the courageous people of Lithuania may once more live in freedom.

Recently meetings were held in many places in Pennsylvania commemorating the 37th anniversary of Lithuania's Declaration of Independence. At these meetings resolutions were adopted calling upon the United States to support the freedom-loving people of Lithuania in their struggle against enslavement by the Soviet Union.

Mr. President, I present, for appropriate reference, and ask unanimous con-

sent to have printed in the RECORD a resolution adopted February 13, 1955, in Wilkes-Barre, Pa., by fine American citizens of Lithuanian descent, who are residents of Wyoming Valley, relating to the liberation of Lithuania.

There being no objection, the resolution was referred to the Committee on Foreign Relations, and ordered to be printed in the RECORD, as follows:

RESOLUTION UNANIMOUSLY ADOPTED, AFTER DUE DELIBERATION, BY THE LITHUANIAN AMERICANS OF WYOMING VALLEY, GATHERED FOR THE COMMEMORATION OF THE 37TH ANNIVERSARY OF THE DECLARATION OF INDEPENDENCE BY THE PEOPLE OF LITHUANIA

Whereas for almost 15 years, Lithuania, one of the Baltic nations, has borne the yoke of slavery as a result of the brutal and unprovoked aggression by the Soviet Union; and

Whereas a campaign of physically exterminating the Lithuanian entity has been conducted by the Kremlin masters on a scale unheard of heretofore; and

Whereas no nation, great or small, can today feel protected from the claim of international communism supported, as it is, by all the destructive weapons that modern civilization has devised for mankind; and

Whereas because of the global and totalistic nature of the Kremlin peaceful-coexistence line is designed primarily to gain time in order to divide and destroy free world alliances and pave the way for world conquest: Therefore, be it

Resolved, That this gathering of American citizens of Lithuanian descent of Wyoming Valley pledge their wholehearted support of this great country's efforts to achieve lasting peace and justice in the world, and urge the Federal Government of the United States to respond to the demands of this crucial time by initiating a positive and dynamic political program against the international Communist conspiracy; be it further

Resolved, That in the opinion of the Lithuanian Americans of this valley, the following steps should be undertaken as a part of such a program and with respect to the enslaved nations:

1. That in advancement of the program for world peace and freedom a special stress be laid upon the necessity to hasten liberation of the captive peoples, and that all acts or omissions which tend to confirm their enslavement be rejected.

2. That the resistance movements of the enslaved nations be encouraged and supported through the funds already authorized by Congress for such purposes.

3. That a new committee to investigate the facts and techniques of Communist aggression be appointed by the 84th Congress, in order to continue and complete the work splendidly done, during the last Congress, by the select Committee on Communist Aggression headed by former Representative Charles Kersten.

4. That the United States Government sponsor a resolution in the United Nations based upon findings and conclusions of said investigation, denouncing the Soviet Union as an aggressor against all the nations now enslaved by communism; be it finally

5. *Resolved*, That this gathering voice its deepest gratitude to the Federal Government and the Congress of the United States for their sympathy with and unchanging favorable attitude toward the eventual restoration of independence of Lithuania.

THOMAS E. MACK, Esq.,
Committee Chairman.
GENEVIEVE B. NATITUS,
Committee Secretary.

CREATION OF PARK IN SLOPE COUNTY, N. DAK.—LETTER FROM AMIDON (N. DAK.) MEN'S CLUB

Mr. LANGER. Mr. President, I ask unanimous consent to have printed in the RECORD a letter addressed to me by the secretary of the Amidon Men's Club of Amidon, N. Dak., relating to the creation of a park in Slope County, N. Dak.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

AMIDON MEN'S CLUB,
Amidon, N. Dak., February 15, 1955.

The Honorable WILLIAM LANGER,
The United States Senate,
Washington, D. C.

HONORABLE SIR: It was resolved by the Men's Club of the village of Amidon, Slope County, N. Dak., at their regular meeting that they would go on record as being in favor of an appropriation for the creation of a park in the western part of Slope County, including the Burning Coal mine and surrounding badlands, also for the necessary building of roads to promote this as a tourist attraction.

Sincerely yours,
GILBERT E. BUZALSKY,
Secretary, Amidon Men's Club.

EXECUTIVE REPORTS OF COMMITTEES

As in executive session,

The following favorable reports of nominations were submitted:

By Mr. HILL, from the Committee on Labor and Public Welfare:

John W. Glotfelty, and sundry other candidates, for personnel action in the Regular Corps of the Public Health Service.

By Mr. MAGNUSON, from the Committee on Interstate and Foreign Commerce:

Louis S. Rothschild, of Missouri, to be Under Secretary of Commerce for Transportation.

By Mr. MONRONEY, from the Committee on Interstate and Foreign Commerce:

Ross Rizley, of Oklahoma, to be a member of the Civil Aeronautics Board.

By Mr. BYRD, from the Committee on Finance:

Allin H. Pierce, of Illinois, to be a judge of the Tax Court of the United States, vice Arnold R. Baar, deceased; and

Thomas Coggeshall, of Connecticut, to be a member of the Renegotiation Board, vice George C. McConnaughey, resigned.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. FREAR:

S. 1168. A bill to provide that the tax on transportation of persons shall apply only if the amount paid for transportation exceeds $1; to the Committee on Finance.

By Mr. CARLSON:

S. 1169. A bill to provide that feed furnished in disaster areas under Public Law 115, 83d Congress, shall be made available for feeding working stock and hogs; and

S. 1170. A bill to amend the Packers and Stockyards Act, 1921, to authorize additional market services for livestock purchasers; to the Committee on Agriculture and Forestry.

By Mr. GOLDWATER:

S. 1171. A bill for the relief of Asimina (Mina) Maravela; to the Committee on the Judiciary.

By Mr. MURRAY:

S. 1172. A bill to amend the Wildlife Restoration Act (16 U. S. C., sec. 669–669i) by providing that the amount of money currently in the Federal aid to wildlife restoration fund shall be available for use during the fiscal year beginning July 1, 1955, defining "wildlife restoration project," and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. MURRAY (for himself and Mr. MCNAMARA):

S. 1173. A bill to amend the National Labor Relations Act in order to permit supervisors to be considered as employees under the provisions of such act, and for other purposes; to the Committee on Labor and Public Welfare.

By Mr. MARTIN of Pennsylvania:

S. 1174. A bill for the relief of Alexander Dunand; to the Committee on the Judiciary.

By Mr. MANSFIELD:

S. 1175. A bill to amend the Agricultural Act of 1949, and for other purposes; to the Committee on Agriculture and Forestry.

(See the remarks of Mr. MANSFIELD when he introduced the above bill, which appear under a separate heading.)

By Mr. SMITH of New Jersey:

S. 1176. A bill for the relief of Hermann Weyl; to the Committee on the Judiciary.

By Mr. HAYDEN (for himself and Mr. GOLDWATER):

S. 1177. A bill for the relief of desert land entrymen whose entries are dependent upon percolating waters for reclamation; to the Committee on Interior and Insular Affairs.

By Mr. JACKSON (for himself and Mr. MAGNUSON):

S. 1178. A bill for the relief of Mrs. Sylvia Simonson; to the Committee on the Judiciary.

By Mr. BIBLE:

S. 1179. A bill to amend the District of Columbia Sales Tax Act and the District of Columbia Use Tax Act so as to limit the sales and use tax on vendors to the amount of reimbursement authorized to be collected by them if they can establish such amount by accurate records; to the Committee on the District of Columbia.

S. 1180. A bill for the relief of Blanca Ibarra and Dolores Ibarra; to the Committee on the Judiciary.

By Mr. IVES:

S. 1181. A bill for the relief of Wei-Kuan Chang and Su Chun Wei Chang;

S. 1182. A bill for the relief of Haim Cohen (Haim Braun); and

S. 1183. A bill for the relief of Lien Ching Chen and Dr. Rose Hu Chen; to the Committee on the Judiciary.

By Mr. BARRETT:

S. 1184. A bill for the relief of Frank R. Davis; to the Committee on the Judiciary.

By Mr. BENDER:

S. 1185. A bill for the relief of Dr. Syed Abdul Qadir; and

S. 1186. A bill for the relief of Hildegard Kassai; to the Committee on the Judiciary.

By Mr. FULBRIGHT (by request):

S. 1187. A bill to amend section 5221 of the Revised Statutes, relating to voluntary liquidation of national banks;

S. 1188. A bill to amend section 5240 of the Revised Statutes, as amended, relating to the examination of national banks; and

S. 1189. A bill to permit national banks to make 20-year real-estate loans and 9-month construction loans; to the Committee on Banking and Currency.

(See the remarks of Mr. FULBRIGHT when he introduced the above bills, which appear under a separate heading.)

By Mr. MAGNUSON:

S. 1190. A bill to grant a new 6-month period within which applications may be made to the Secretary of the Navy for donation of the U. S. S. *Olympia*, and for other purposes; to the Committee on Armed Services.

By Mr. MAGNUSON (for himself, Mr. DOUGLAS, Mr. JACKSON, and Mr. MCNAMARA):

S. 1191. A bill to amend section 6 of the act of August 24, 1912, as amended, with respect to the recognition of organizations of postal and Federal employees; to the Committee on Post Office and Civil Service.

By Mr. MAGNUSON (for himself and Mr. KUCHEL):

S. 1192. A bill to amend the Civil Aeronautics Act of 1938 to exempt operations in the transportation of livestock, fish and agricultural, floricultural, and horticultural commodities from the act and from regulation by the Civil Aeronautics Board thereunder; to the Committee on Interstate and Foreign Commerce.

By Mr. LEHMAN:

S. 1193. A bill for the relief of Moosa Ebrahimian; to the Committee on the Judiciary.

By Mr. CURTIS (for himself and Mr. HRUSKA):

S. 1194. A bill to provide for construction by the Secretary of the Interior of Red Willow Dam and Reservoir, Nebr., as a unit of the Missouri River Basin project; to the Committee on Interior and Insular Affairs.

By Mr. O'MAHONEY (for Mr. HUMPHREY):

S. 1195. A bill for the relief of Nicolas Reisini; to the Committee on the Judiciary.

By Mr. WELKER:

S. 1196. A bill for the relief of Joe Luis Momoitio Uruchua and Vinciete Cortabitarte Uranga; and

S. 1197. A bill for the relief of Slavoljub Djurovic and Goran Djurovic; to the Committee on the Judiciary.

By Mr. COTTON:

S. 1198. A bill to amend the public assistance provisions of the Social Security Act to provide separate matching of assistance expenditures for medical care, to provide gradually for equal matching of old-age assistance expenditures supplementing old-age and survivors insurance benefits, and to make clear the purpose of encouraging States to provide services to help needy individuals attain self-support or self-care, and for other purposes; to the Committee on Finance.

By Mr. SPARKMAN (for himself, Mr. KEFAUVER, and Mr. THURMOND):

S. 1199. A bill to strengthen the Nation by preserving the family-size farm, providing additional credit for farm enlargement and development, improving the income-earning capacity and standard of living of low-income rural people, and for other purposes; to the Committee on Agriculture and Forestry.

(See the remarks of Mr. SPARKMAN when he introduced the above bill, which appear under a separate heading.)

By Mr. BENNETT:

S. 1200. A bill for the establishment of a Commission on Atomic Defense; to the Joint Committee on Atomic Energy.

(See the remarks of Mr. BENNETT when he introduced the above bill, which appear under a separate heading.)

By Mr. CASE of South Dakota:

S. 1201. A bill to amend the Career Compensation Act of 1949, as amended, to allow credit for certain service for purposes of pay, and for other purposes; to the Committee on Armed Services.

(See the remarks of Mr. CASE of South Dakota when he introduced the above bill, which appear under a separate heading.)

AMENDMENT OF AGRICULTURAL ACT OF 1949, RELATING TO PARITY PRICES FOR 1955 CROPS

Mr. MANSFIELD. Mr. President, I introduce, for appropriate reference, a bill which, if enacted, would guarantee farmers 100 percent of parity price for their 1955 and future basic agricultural crops. This bill would return the fair price guaranty for a farmer's product in relation to his cost of living.

The administration's measure of last year reduced price supports from 90 to 82½ percent of parity for basic farm commodities. In the case of dairy products, Government supports would be as low as 75 percent. Under this flexible program, price supports go down as production goes up. The best interests of farming and agricultural populations demand a strong price-support program, a reversal of the flexible program.

The farmer's income and financial status in our economy continue to be static and less stable. At the same time the remainder of the Nation enjoys prosperity. Consumer prices and cost of living continue to rise, but the farmer's income does not follow this pattern. This, obviously, is not a healthy situation.

A sampling of statistics from the Department of Agriculture gives a great deal of support to the concern I have shown over the farmer's dilemma. The average individual income of persons whose entire income comes from farming is one-third as much as the remainder of the population. The net worth of United States farmers has dropped $10 billion from 1952 to 1954.

The ratio of parity prices received by farmers for their products and the consumer prices paid was 99 percent on October 15, 1952; 1 year later it was 91 percent; and on September 15, 1954, it was 88 percent. The latest figures show that the ratio had dropped to 86 percent on January 15, 1955. We cannot afford to let this trend go on unchecked.

Since October of 1952, farmer's taxes per acre have increased 11 percent; interest payments have gone up 20 percent; and cost of living for farmers has gone up 3 percent. The farmers average income since 1952 has decreased 14 percent. An isolated case, as an example, is the marketing of meat animals, their market price has dropped 19 percent since 1952.

The farmer is the very background of our society. The great cities of this country are not maintaining themselves. Even from the standpoint of population numbers, the great seedbed of the Nation is on its family farms. Our cities would wither and die but for the farm-born children that migrate to them. If, even for only a few days, the abundant flow of food and fiber from the farms were cut off, the cities would be helpless.

The direct relation of the production and prosperity of family farms to general national interest is not confined to the large cities alone. The ebb and flow of economic opportunity and results of the farm people is, also, of direct importance to the people living in thousands of rural towns and small cities and regional market centers all over this great Nation. This is true not only because the farm is the source of such a very high proportion of our food and clothing, but because the processing and distribution of farm-produced commodities and the manufacturing, transportation, merchandising, and sale of farm production and farm family living supplies is a major or contributing source of income to so many people. The production and income of the farms and ranches of the Nation are directly related to continued national well-being and the rise or fall of national prosperity.

In the history of this and other countries great national depressions have almost always been preceded by depression and economic reverses on the farms. Is that where we are headed again? I do not know whether the cause-and-effect relationship is absolute. But, nevertheless, the Nation can ill afford to take the chance.

Mr. President, the bill I have introduced eliminates the sliding scale of price supports for wheat, cotton, and other basic commodities. These commodities and others would be supported at a fixed level that could not fall with production in increased abundance nor with accumulating safety stockpiles.

The bill provides mandatory price supports at 100 percent of the parity price for the basic commodities, namely, wheat, corn, cotton, tobacco, rice, peanuts; for the important livestock, dairy and poultry products, wool, hogs, eggs, chickens, beef cattle, milk and butterfat; for soybeans, flaxseed, dry edible beans, and rye; and a feeding value equivalent to 100 percent of parity for corn to the feed grains—barley, oats, and grain sorghums. These are all commodities that the Nation requires in greater abundance. All are basic to the farm families that produce them.

In addition the bill provides authority for the Department of Agriculture to resume the use of parity payments where needed in conjunction with loans, purchases, and other price-support methods to provide desirable protection to the producers of perishable commodities.

The bill would also add section 421 to the Agricultural Act of 1949 which would be in the form of a $2,500 limitation on the amount of price-support payments any one farmer might receive in any calendar year. Moreover, price-support payments and loans would not apply if an individual farmer's sale of products should be in excess of $25,000 in each year.

Briefly, I wish to comment on the overemphasized phases of subsidy and surplus. These two elements of the farm program have been debated time after time, but in the end I think that it will be found that their seriousness is somewhat inflated. In regard to subsidy, the subsidies which the farmers receive in the form of price supports, are not nearly so large as the subsidies given to Government agencies and private enterprise. Admittedly, we do have large surpluses of certain commodities, but I am sure that we would not feel that they were in excess if the Nation should suffer a long period of drought or be faced with a general mobilization.

The stability of the American economy depends on the prosperity and security of the farmer. The only solution, at this time, which will stabilize the farm-

er's income and prosperity is a program of 100 percent of parity, a high price-support program. Only by preserving and improving the strength of the large group of family-size farms in this Nation can we maintain the conditions necessary for preserving our way of life.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 1175) to amend the Agricultural Act of 1949, and for other purposes, introduced by Mr. MANSFIELD, was received, read twice by its title, and referred to the Committee on Agriculture and Forestry.

PROPOSED NATIONAL BANK LEGISLATION

Mr. FULBRIGHT. Mr. President, by request, I introduce, for appropriate reference, three bills relating to proposed national bank legislation. Each of these bills is requested by the Secretary of the Treasury and is accompanied by a letter of transmittal from him. I ask unanimous consent that the letters of transmittal and the memoranda accompanying them be printed in the RECORD immediately following the listing of the bills.

The PRESIDENT pro tempore. The bills will be received and appropriately referred; and, without objection, the letters of transmittal will be printed in the RECORD.

The bills, introduced by Mr. FULBRIGHT (by request), were received, read twice by their titles, and referred to the Committee on Banking and Currency, as follows:

S. 1187. A bill to amend section 5221 of the Revised Statutes, relating to voluntary liquidation of national banks.

The letter accompanying Senate bill 1187 is as follows:

JANUARY 24, 1955.

The PRESIDENT OF THE SENATE,
Washington, D. C.

SIR: There is transmitted herewith a draft of a proposed bill "To amend section 5221 of the Revised Statutes, relating to voluntary liquidation of national banks."

Section 5221 of the Revised Statutes (12 U. S. C. 182) requires that whenever a vote is taken to put a national bank into liquidation the board of directors shall cause notice of this fact to be published for a period of 2 months in a newspaper published in the city or town in which the association is located, and also in a newspaper published in the city of New York. These publications are for the purpose of notifying the holders of its notes and other creditors to present the notes and other claims against the association for payment. The notes referred to in the statute are the notes formerly issued by national banks which circulated as currency but which are now no longer issued. Because these notes were used as currency and because their circulation was often wide, it was deemed desirable to have notice of a pending liquidation of the issuing bank given in New York, the then financial center of the country, in addition to being given locally. With the cessation of the issuance of such notes, every national bank having circulating notes outstanding deposited lawful money with the Treasurer of the United States to cover the full redemption value of its outstanding notes, and all such notes may be redeemed at the United States Treasury. Therefore, the need for publication in New York and for notification to holders of the notes to present them for payment has passed.

Accordingly, to relieve the banks of the now unnecessary expense of the New York publication, it is believed that section 5221 of the Revised Statutes should be amended to eliminate that requirement, and it is believed that there should also be eliminated from the statute the reference to notifying the holders of the bank's notes to present them for payment. The proposed legislation would accomplish these purposes, and would also make it clear that publication must be made in every issue of the local newspaper. The requirement of local publication notifying creditors to present their claims against the bank is, of course, still necessary and such requirement would be retained under the proposed amendment. The Treasury Department recommends that the proposed legislation be enacted into law.

It would be appreciated if you would lay the proposed bill before the Senate. A similar proposed bill has been transmitted to the Speaker of the House of Representatives.

The Department has been advised by the Bureau of the Budget that there is no objection to the submission of this proposed legislation to the Congress.

Very truly yours,

G. M. HUMPHREY,
Secretary of the Treasury.

S. 1188. A bill to amend section 5240 of the Revised Statutes, as amended, relating to the examination of national banks.

The letter accompanying Senate bill 1188 is as follows:

JANUARY 27, 1955.

The PRESIDENT OF THE SENATE,
Washington, D. C.

SIR: There is transmitted herewith a draft of a proposed bill "To amend section 5240 of the Revised Statutes, as amended, relating to the examination of national banks."

Section 5240 of the Revised Statutes, as amended (12 U. S. C. 481, 482), requires that the Comptroller of the Currency shall appoint examiners who shall examine every national bank at least twice in each calendar year, and fixes the method of assessing the costs of the examinations against the banks.

It is believed that the Comptroller's bank supervisory responsibilities can be adequately discharged with less than the presently required two examinations per annum in the case of certain banks. In addition, it is deemed desirable that the Comptroller be permitted to assess the costs of examinations upon dates selected by him rather than the dates of examination. The proposed legislation would accomplish these purposes. There is attached hereto a memorandum which more fully explains the proposed changes.

It is believed that passage of this bill is in the best interests of the national banking system. The Treasury Department recommends that the proposed legislation be enacted into law. It will be appreciated if you will lay the enclosed bill before the Senate. An identical proposed bill has been transmitted to the Speaker of the House of Representatives. Similar legislation was introduced during the 83d Congress as S. 3888.

The Department has been advised by the Bureau of the Budget that there is no objection to the submission of this proposed legislation to the Congress.

Very truly yours,

G. M. HUMPHREY,
Secretary of the Treasury.

MEMORANDUM RE PROPOSED AMENDMENT TO SECTION 5240 OF THE REVISED STATUTES

The first paragraph of section 5240 of the Revised Statutes (12 U. S. C. 481) requires that the Comptroller of the Currency shall appoint examiners who shall examine every national bank at least twice in each calendar year. Examinations may be made oftener if considered necessary.

The experience gained by the Comptroller's office over a long period of years clearly proves that two examinations per annum is a desirable examination frequency schedule for a large proportion of national banks. However, it is apparent to the Comptroller that the statutory requirements of two examinations per calendar year for all national banks is unnecessarily rigid, not conducive to the best utilization of the time and efforts of national bank examiners, and that the requirement could safely be made more flexible.

The proposed legislation would provide elasticity to the requirement of the present law that all national banks be examined twice in each calendar year by permitting the Comptroller, in his discretion, to waive one such examination in justified cases. It would not be the purpose to waive one examination in all possible cases, but rather to adjust examination schedules so as to obtain the maximum benefit from the examination work performed. It would be the purpose to examine a large proportion of national banks twice each year, but if greater benefits would accrue in a particular Federal reserve district through the more thorough examination of national banks of average size than would result from two examinations per annum of a few very large national banks of demonstrated soundness and management capacity, the latter might be examined only once during the calendar year.

The legislation would further provide, however, that examinations may not be waived with respect to a particular bank more frequently than once during each two year period beginning January 1, 1955. In other words, in at least one of the two years of each two year period the Comptroller could not waive an examination but would have to examine the bank twice. It is believed this would permit more thorough examinations which would be of greater value to the banks concerned as well as to the Comptroller.

Enactment of the proposed legislation would result in certain economies in the Comptroller's office which would accrue to the benefit of national banks. The expenses of the Comptroller's office are defrayed by national banks through the payment of examination fees.

The proposed amendment would eliminate references to "member banks" and would make the examination provision applicable only to national banks. This makes no substantive change in the law for by the Act of June 21, 1917 (12 U. S. C. 330), it was provided that State member banks should not be subject to examination under the provisions of the first two paragraphs of section 5240 of the Revised Statutes (12 U. S. C. 481, 482).

The third paragraph of section 5240 of the Revised Statutes (12 U. S. C. 482) provides that the expense of the examinations of national banks shall be assessed by the Comptroller of the Currency upon the banks examined in proportion to assets or resources held by the banks upon the dates of examination of the various banks. It is deemed desirable that legislation be enacted which would permit the assessments made on national banks by the Comptroller to be in proportion to their assets or resources on any dates the Comptroller of the Currency may select, rather than upon the dates of examination of the various banks. The second section of the proposed bill would accomplish this purpose. If this legislation is enacted, in all probability such assessments will be levied by the Comptroller of the Currency quarterly or semiannually. The annual rate of assessment will be the same for every national bank. However, with respect to those banks which are examined more frequently than twice in each calendar year, each such bank will be assessed, in addition

to the regular assessment, the expense of the additional examinations.

The seventh paragraph of section 5240 of the Revised Statutes, as amended (12 U. S. C. 482), provides that the expenses of examining trust departments of banks examined by the Comptroller of the Currency shall be assessed against the banks examined in proportion to the total assets under administration, and the total bonds or notes outstanding under corporate bond or note issues for which the banks are acting as trustees. This has proved to be impractical since there is no standardization of practice with respect to carrying values of trust assets. A more practical method of charging for trust examinations is to assess a fee based upon the actual cost to the Comptroller's Office of making the trust examination. The third section of the proposed bill provides that charges for trust examinations shall be made in this manner. Of course, included in the cost is a reasonable amount attributable to overhead expenses of the Comptroller's Office.

S. 1189. A bill to permit national banks to make 20-year real-estate loans and 9-month construction loans.

The letter accompanying Senate bill 1189 is as follows:

JANUARY 25, 1955.

The PRESIDENT OF THE SENATE,
Washington, D. C.

SIR: There is transmitted herewith a draft of a proposed bill "To permit national banks to make 20-year real-estate loans and 9-month construction loans."

The proposed legislation would accomplish two purposes. (1) It would permit national banks to make mortgage loans for periods in excess of 10 years (which is now the statutory limit) but not exceeding 20 years, provided that such loans are amortized and that the installment payments are sufficient to amortize the entire principal of the loan within a period of not more than 20 years. (2) It would change the permissible duration of residential and farm construction loans which need not be considered as real-estate loans, from 6 to 9 months.

There is attached a memorandum which more fully explains the recommended changes. It is believed that enactment of the proposed legislation will be beneficial to the national banking system. The Treasury Department recommends that it be enacted into law.

It would be appreciated if you would lay the proposed bill before the Senate. A similar proposed bill has been transmitted to the Speaker of the House of Representatives.

The Department has been advised by the Bureau of the Budget that there is no objection to the submission of this proposed legislation to the Congress.

Very truly yours,

G. M. HUMPHREY,
Secretary of the Treasury.

MEMORANDUM RE PROPOSED CHANGES IN SECTION 24 OF THE FEDERAL RESERVE ACT

Under section 24 of the Federal Reserve Act (12 U. S. C. 371), national banks are permitted to make mortgage loans on improved real estate. The amount of any such loan may not exceed 50 percent of the appraisal value of the real estate and no such loan may be made for a longer term than 5 years, except that any such loan may be made in an amount not exceeding 60 percent of the appraised value of the real estate and for a term not longer than 10 years if the loan is amortized and the installment payments are sufficient to amortize 40 percent or more of the principal of the loan within a period of not more than 10 years. No such loan may be made for a longer term than 10 years. Under current practices in mortgage lending, loans are frequently made for terms of more than 10 years, and thus national banks find themselves at a competitive disadvantage with other lending institutions. It is believed that the maximum term for which mortgage loans may be made by national banks can, with safety, be extended to 20 years and that is what is proposed. The legislation would provide that any loan made for a term in excess of 10 years may not exceed in amount 60 percent of the appraised value of the real estate, and that the terms of the loan must require installment payments sufficient to amortize the entire principal of the loan within a period of not more than 20 years. Those requirements will provide ample safety for the banks.

Enactment of this proposal would bring the mortgage lending powers of national banks into conformity with present-day widespread practice and would enable the banks to more effectively compete with other lending institutions.

The second change which is recommended is a lengthening of the permissible duration of residential and farm construction loans which are not to be regarded as real-estate loans, from 6 to 9 months. Experience has indicated that the 6-month period is unrealistically short, but that a 9-month period will be adequate in most cases. The change can be made without serious consequences.

COMMISSION ON ATOMIC DEFENSE

Mr. BENNETT. Mr. President, I introduce, for appropriate reference, a bill for the establishment of a Commission on Atomic Defense. I ask unanimous consent that a statement, prepared by me, relating to the bill may be printed in the RECORD.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the statement will be printed in the RECORD.

The bill (S. 1200) for the establishment of a Commission on Atomic Defense, introduced by Mr. BENNETT, was received, read twice by its title, and referred to the Joint Committee on Atomic Energy.

The statement presented by Mr. BENNETT is as follows:

STATEMENT BY SENATOR BENNETT

I have introduced, for appropriate referral, a bill to create a Commission To Study Atomic Defense. This would be an 18-member Commission patterned along the lines of the Hoover Commission drawing its membership from the executive department, Congress, and outstanding citizens from private life. Because of the urgency of this whole problem, which was underlined in the last few days by testimony from the Director of the Office of Defense Mobilization, the Commission would submit its final report to Congress not later than January 31, 1956, to permit appropriate legislation to be enacted during this Congress. Although time may be of the essence and a final report before this date desirable, I do not believe a proper survey could be concluded in time for congressional action during this session.

My reasons for expanding membership beyond Members of Congress are aimed at bringing together the private citizens who will be affected by this problem, and upon whom the success of any industrial dispersion or civil defense program ultimately depends.

The dramatic developments in the field of thermonuclear warfare make such a study imperative. Much has been said about the dangers of fallout from explosions of H-bombs. Much has been said about the wisdom or futility of industrial dispersion. The truth of the matter at this time appears to be that no one really knows what should be done or what is feasible. Each of our specialists in his field has suggested certain actions, but coordination for an overall program, if it is to be effective, seems to be the only logical way.

The executive branch of the Government would support such a study and I do not believe the legislative branch can stand by and criticize the executive without "turning to" on such an important problem.

I urge upon the Senate careful consideration of this measure and prompt action that it may bring the desired results as soon as possible.

AMENDMENT OF CAREER COMPENSATION ACT, RELATING TO CREDIT FOR CERTAIN SERVICE FOR PURPOSES OF PAY

Mr. CASE of South Dakota. Mr. President, I introduce, for appropriate reference, a bill to amend the Career Compensation Act of 1949, as amended, to allow credit for certain service for purposes of pay, and for other purposes. I ask unanimous consent to speak briefly in regard to the bill.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the Senator from South Dakota may proceed.

The bill (S. 1201) to amend the Career Compensation Act of 1949, as amended, to allow credit for certain service for purposes of pay, and for other purposes, introduced by Mr. CASE of South Dakota, was received, read twice by its title, and referred to the Committee on Armed Services.

Mr. CASE of South Dakota. Mr. President, this bill will allow cadets at the service academies and midshipmen at the Naval Academy credit for their service there, in the computation of their basic pay. This would be, in effect, credit for longevity, but not for retirement purposes.

It is my understanding that National Guard men receive longevity credit for their service, and that V–12 naval college service during World War II counted for longevity in computing basic pay.

This bill would equalize pay for young men who desire to make military service a career. I commend the bill to the attention of the Senate.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE APPENDIX

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the Appendix, as follows:

By Mr. KNOWLAND:

Address delivered by him at the banquet of the Sons of the American Revolution at the Waldorf-Astoria Hotel, New York City, on February 22, 1955.

By Mr. GOLDWATER:

Address delivered by him before the Rotary Club of Muncie, Ind., on February 22, 1955.

By Mr. MARTIN of Pennsylvania:

Address delivered by Senator JOHNSTON of South Carolina, on South Carolina Day, February 20, 1955, at the George Washington Memorial Chapel, Valley Forge, Pa.

NOTICE OF HEARING OF SUBCOMMITTEE ON CIVILIAN DEFENSE OF THE COMMITTEE ON ARMED SERVICES

Mr. KEFAUVER. Mr. President, I wish to give notice that the meeting of the Subcommittee on Civilian Defense of the Committee on Armed Services which was scheduled for tomorrow afternoon at 2 o'clock has been postponed. Instead, the hearing will be held on Saturday morning at 10 o'clock. Tomorrow, the full Committee on Armed Services will have before it certain members of the Department of Defense in connection with a briefing.

NOTICE OF CONSIDERATION OF CERTAIN FOREIGN SERVICE NOMINATIONS BY THE COMMITTEE ON FOREIGN RELATIONS

Mr. GEORGE. Mr. President, there was received today a list containing the names of 134 persons for appointment and promotion in the Foreign Service of the United States. The list appears elsewhere in the RECORD of today. I give notice that these nominations will be considered by the Committee on Foreign Relations at the expiration of 6 days in accordance with the committee rule.

NOTICE CONCERNING NOMINATION OF BEN F. CAMERON, OF MISSISSIPPI, TO BE UNITED STATES CIRCUIT JUDGE, FIFTH CIRCUIT, VICE EDWIN R. HOLMES, RETIRED

Mr. KILGORE. Mr. President, on behalf of the Committee on the Judiciary, notice is hereby given to all persons interested in the nomination of Ben F. Cameron, of Mississippi, to be United States circut judge, fifth circuit, vice Edwin R. Holmes, retired, to file with the committee in writing on or before Wednesday, March 4, 1955, any representations or objections they may wish to present concerning this nomination, with a further statement whether it is their intention to appear at any hearing which may be scheduled later.

COMMENT BY FORMER SENATOR RUSH D. HOLT, OF WEST VIRGINIA

Mr. LANGER. Mr. President, I ask unanimous consent to have printed in the body of the RECORD pertinent comments on timely topics by the late former Senator Rush D. Holt, of West Virginia, about whose untimely passing within recent weeks we all know.

There being no objection, the document was ordered to be printed in the RECORD, as follows:

FACTS AND FIGURES

(Pertinent comment on timely topics by former United States Senator Rush D. Holt, of West Virginia. Mr. Holt, seriously ill, tells what it means to place trust in God, to forget trivial things of life)

I was shocked when my physician told me my condition. Who wouldn't be? It reaches clear down in one and turns him upside down when he is advised that he has a malignancy. But one cannot afford to waste his time and energy worrying over his condition. It is no time for self-pity, and it is so easy to fall into that way of thinking. One could spend hours and days in wondering why did this have to happen to me. To be defeated is to defeat one's self. It is then one needs to get himself together and have faith.

Without faith there is no hope. With faith in God there is no limit to what one can do.

When one is sailing along and things are going well, one doesn't take time to evaluate the things of life. It is when one is stopped and reverses appear that one is ready to reevaluate.

To become bitter and figure why one is afflicted with such a condition only makes things worse, much worse. It is a part of a vicious circle that makes the physical condition worse which in turn makes the bitterness deeper.

Anyone who has faced such a situation will know what runs through one's mind. We feel we just cannot give up our family and friends. We want to hold on. It does make a lump come to one's throat more than once. But, it is then we must get hold of ourselves and turn over to God how we can best work out the problem before us.

He is one that never fails. Whatever that problem may be, no matter how serious or critical, God is ready to guide and direct us if we just will let Him.

This need to reevaluate the really important things of life becomes more clear than ever. The things we felt important seem to lose their importance. It is not the material things that overshadow as they do in this every day busy life. We wonder why we have so much time in trying to get things that evaporate so quickly.

A setback can be a tremendous education if one will let it be.

The will to live is paramount in practically all of us. We want to live, but if that will to live is not coupled with a desire to live for something, we have failed to really live. But we should couple that will to live with wanting to live for something. There is no greater will than to want to do God's will.

The world, too, has been and is ill. The same guidance that brings health to persons who are sick can bring peace to a sick world. It is amazing how little faith mankind has in calling on God for the answers to our problems in our governmental relationships. The condition of the world proves we do not.

As a personal word to my friends who read this column, let me say this is not an obituary. I have plenty of life left. God has been wonderful to me.

This experience has increased my faith in God's goodness. It has brought to me a lesson of the power of positive thinking. Prayer works wonders. There is no limit to what God can do. The tragedy is that we are failing to connect our lives to that tremendous power of good that He will give us if we just accept it.

With God man can never lose. He will point the way out of darkness if we will just listen and follow. That is what I will try to do.

CIVIL DEFENSE AGAINST ATOMIC ATTACK

Mr. LEHMAN. Mr. President, the people of the country are justifiably confused and greatly alarmed at the failure of government to take adequate steps for their protection in the event of an atomic attack. The tragic danger which confronts us has been known for several years. Yet, so far as I know, no effective steps have been taken either by the Federal Government, State governments, or municipalities, to provide reasonable civil defense or protection. The failure of the Nation to act is particularly frightening because it indicates either indifference or a fatalistic acceptance of the inevitable. We dare not surrender to either of these moods.

This morning a highly interesting and informative article by the distinguished author and columnist, Roscoe Drummond, appeared in the New York Herald Tribune. This article, entitled "Where Stands Civil Defense?" gives such a graphic description of the situation and its dangers and is so important to the security of our people that I ask unanimous consent to have it printed in the body of the RECORD at this point in my remarks. It merits the most careful study by every person in the country and particularly those in every layer of government who hold positions of official responsibility.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WHERE STANDS CIVIL DEFENSE?

(By Roscoe Drummond)

WASHINGTON.—The need for Operation Candor is not over because the Atomic Energy Commission has now given the public a full-size picture of what hydrogen warfare really means.

It is of little value to know that the blast and radioactive fallout of a single H-bomb imperils every living being in an area of 7,000 square miles—unless we do something about it.

What we must not overlook is:

That we can do something about it.

That thus far nothing adequate in civil defense is being done about it.

That if the Nation's civil-defense program is not soon taken out of the mothballs of neglect, a mood of fatalism and low vision, it will constitute one of the greatest and gravest omissions of representative government in human history.

That civil defense is not merely a protection against needless enormous loss of life, if attack comes; it can itself be a powerful deterrent to attack because it means that in shielding the civilian population, including defense-industry workers, the power of sustained retaliation is less likely to be knocked out by surprise aggression.

The danger is not that AEC Chairman Lewis Strauss' somber disclosures will create excessive jitters. There is no evidence that long-delayed Operation Candor is having any such effect. I am convinced that the American people want the straight facts, have the right to have them, can take them.

The only danger would be that, possessed of the facts, the Federal Government, the States, the cities, and individuals failed to take action equal to the need on the theory that little, if anything, can be done, that enormous loss of life is inevitable, that we might as well prepare to take fatalistically whatever comes.

Fortunately the opposite is the truth.

Much can be done. Vast loss of life is not inevitable. We don't have to take it fatalistically.

The AEC does not say that survival from hydrogen blast and fallout is unlikely.

The AEC does say that survival is unlikely unless there is "proper evacuation" or "shelter" or "other protective measures."

The realistic estimate is that without adequate civil defense at least 45 percent of the civilian population would be killed in the 7,000 square miles enclosing each hydrogen blast, and that with adequate civil defense at least 95 percent would survive.

That is the difference between adequate civil defense and inadequate civil defense.

Today the Nation's defense is inadequate, woefully inadequate, tragically inadequate—needlessly inadequate.

Admiral Strauss did not overstate it when he said at the end of his stark statement that improvement of our means of self-defense, including civil defense, is today "a paramount duty of our Government."

That duty is not yet being discharged.

Perhaps it couldn't be effectively discharged until the widescreen, 3–D consequences of hydrogen warfare was made common knowledge.

Now it is common knowledge and the actions which are immediately needed, it seems to me, are:

1. A full statement by President Eisenhower to Congress as to what the Federal Government can't afford not to do to bring into being a civil defense program equal to the peril.

2. An early conference between the President, the director of civil defense, and the 48 Governors on the action which the State governments need to take in an integrated Federal-State program.

3. A subsequent meeting in each State of Governor, Federal civil-defense officials, and the mayors of every community to bring about the participation of all units of government.

4. The development of a realistic blueprint of what every individual needs to do and can do personally to be ready to give the best protection to his family and to himself.

Civil defense, it seems to me, needs to be seen not only as a means to guard against prodigious loss of life, but as a means contributing indispensably to deterring surprise aggression.

Civil defense is also military defense. They are inseparable.

TRIBUTE TO SENATOR WILEY

Mr. SMITH of New Jersey. Mr. President, our distinguished colleague, the senior Senator from Wisconsin [Mr. WILEY], as we all know, was chairman of the Foreign Relations Committee during the two sessions of the 83d Congress. At the opening session of the committee this year on January 13 the committee adopted a resolution recognizing the splendid service Chairman WILEY had rendered during the past 2 years, and an appropriate resolution also was adopted by this year's committee and was then circulated among the members of the committee as it was constituted in the 83d Congress.

It is with real pleasure and gratification that I now ask unanimous consent to insert in the body of the RECORD the resolution as adopted by the committee with the signatures of the members of the committee who served under Senator WILEY as chairman in the 83d Congress. This resolution reflects the high esteem and affection in which Senator WILEY is held by his colleagues on the committee.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

JANUARY 13, 1955.

COMMITTEE ON FOREIGN RELATIONS, UNITED STATES SENATE—RESOLUTION OF COMMENDATION FOR SERVICES RENDERED BY HON. ALEXANDER WILEY, UNITED STATES SENATOR FROM WISCONSIN

Whereas Senator ALEXANDER WILEY has been a member of the Committee on Foreign Relations since 1945 and served as chairman during the 83d Congress in 1953 and 1954; and

Whereas this period has been critical in the history of our Nation; and

Whereas, in the discharge of his arduous duties as chairman, Senator WILEY has displayed a high quality of statesmanship; and

Whereas Senator WILEY has consistently encouraged the development of a bipartisan foreign policy and has tirelessly worked to foster more effective cooperation between the executive and legislative branches of our Government; and

Whereas under Senator WILEY's chairmanship, the committee and the Senate compiled an outstanding record of legislative achievement in the field of foreign policy, including many treaties, public laws, and resolutions advancing the national interest of the United States and the common goals of the free world; and

Whereas Senator WILEY contributed immeasurably to these accomplishments through his energy, vision, good humor, and fairness: Now, therefore, be it

Resolved, That the Committee on Foreign Relations expresses to Senator WILEY its deep appreciation for his courageous leadership as chairman, his devotion to duty, and his great services to the Nation in the cause of freedom and world peace.

H. Alexander Smith, Bourke B. Hickenlooper, Homer Ferguson, William F. Knowland, George D. Aiken, Homer E. Capehart, Walter F. George, Theodore Francis Green, J. W. Fulbright, John Sparkman, Guy M. Gillette, Hubert H. Humphrey, Mike Mansfield, Francis O. Wilcox, Chief of Staff.

SAVINGS BY REDUCTION OF FEDERAL GOVERNMENT PAPERWORK

Mr. BRIDGES. Mr. President, I have read with interest that the Hoover Commission today is forwarding to the Congress a report in which it is recommended that the Federal Government reduce its paperwork and thereby save millions of dollars for the taxpayers.

It is a matter of personal gratification to me as I know it is to all other members of the Appropriations Committee, including the present chairman, the distinguished senior Senator from Arizona [Mr. HAYDEN], that this report so closely follows a report on the same subject which was filed on May 7, 1954, by the staff of the Appropriations Committee of the Senate. Last year the committee provided $300,000, to enable the General Services Administration to start work along this particular line.

So, Mr. President, while I commend the Hoover Commission for its splendid recommendations, I should like to point out that the Senate Appropriations Committee recognized this problem a year ago, and, by unanimous action of the committee, provided the funds with which to inaugurate this activity, which has been in progress for a period of time, and already many tens of millions of dollars are in the process of being saved. Nevertheless, it is nice to know, today, that the very outstanding Hoover Commission, after studying this subject, has come forward with recommendations very similar to those made last year by our committee.

This phase of Federal expenditures is one of many toward which the Appropriations Committee directed its attention during the 83d Congress, as a part of its continuing effort to reduce and minimize Government spending and waste. As a result of our recommendations, the Congress appropriated, during the 2d session of the 83d Congress, a sum of money to initiate surveys of Government practices and record keeping.

It was our recommendation that immediate steps be taken to alleviate the condition now existing, whereby the volume of Federal records now in existence would fill 7½ Pentagon buildings.

It is gratifying to note that the conclusions of the Hoover Commission are in striking parallel with those contained in last year's Appropriations Committee report entitled "Creation and Management of United States Government Records," and that the Hoover Commission's recommendations reflect the recommendations made nearly a year ago by the Appropriations Committee.

For example, the Hoover Commission's report suggests that—

> The General Services Administration be given responsibility for general supervision over all phases of paperwork management with a view to simplifying and improving the quality of forms, correspondence, reports * * * and eliminating nonessential copies.

The same recommendation was made last year by the Appropriations Committee, and a solution is already being effectuated under Public Law 663, in which the 83d Congress provided for a survey of Government records, record management, and disposal practices. This legislation gave to the Administrator of General Services final authority in all matters involving the conduct of surveys and the implementation of recommendations based on such surveys.

Mr. President, I myself do not take any credit for this; but I do give credit to the 23 members of the Appropriations Committee, both Republicans and Democrats, who foresaw this problem, and proceeded to take some action about it, instead of waiting for recommendations from the outside.

Mr. President, I hope that each Member of the Senate will take the opportunity of reading this latest report of the Hoover Commission, as well as the report published previously by the Senate Appropriations Committee.

Mr. President, I now desire to refer to another subject.

The PRESIDENT pro tempore. The Senator from New Hampshire has the floor.

TRANSFER OF SENIORITY ON THE ARMED SERVICES COMMITTEE

Mr. BRIDGES. Mr. President, I ask unanimous consent that my position as ranking minority member of the Senate Armed Services Committee be exchanged for that of the senior Senator from Massachusetts [Mr. SALTONSTALL], the next ranking minority member of that committee, for the duration of the 84th Congress, with the full understanding that this arrangement is temporary in nature, and that at the expiration of the 84th Congress I will resume my seniority rights.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. CHAVEZ. Mr. President, will the Senator from New Hampshire yield to me?

Mr. BRIDGES. I yield.

Mr. CHAVEZ. The Senator from New Hampshire does not mean to say, however, does he, that he will not participate in the consideration of any matters which may come before the committee?

Mr. BRIDGES. I intend to participate in committee activities as usual.

Mr. CHAVEZ. The new arrangement is only for seniority purposes; is that correct?

Mr. BRIDGES. Yes, so that the senior Senator from Massachusetts will sit 1 rung higher on the seniority ladder, and that much closer to the chairman; and I will sit 1 rung farther down.

I do this for the senior Senator from Massachusetts because last year he served as chairman of the Armed Services Committee, and did a very able job in that capacity; and I desire to show him the courtesy of letting him be a rung higher on the ladder, so to speak, temporarily. I ask that this change of seniority be made only temporarily, during the present Congress.

Mr. LANGER. Mr. President, will the Senator from New Hampshire yield to me?

Mr. BRIDGES. I yield.

Mr. LANGER. I wish to compliment the distinguished Senator from New Hampshire on what he has done. In my opinion, it is a mark of a very great man and one who loves his country.

Mr. BRIDGES. I thank the Senator from North Dakota.

INCREASED PAY FOR MEMBERS OF CONGRESS AND FEDERAL JUDGES

Mr. LANGER. Mr. President, I ask unanimous consent to have printed in the body of the RECORD a letter addressed to me from the State chairman of the American Bar Association committee on judicial selection, tenure, and compensation, which favors increasing the pay of judges and, I believe also, that of Members of Congress.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

GRAND FORKS, N. DAK., *February 21, 1955.*

HON. WILLIAM LANGER,
United States Senator,
Washington, D. C.

DEAR SENATOR LANGER: This is another followup letter in connection with the proposed increase of congressional and judicial salaries.

Attached to this letter are photostatic copies of a number of editorials from all parts of the country indicating that citizens generally are in favor of the increase.

Both of us realize that our judges have been underpaid for many years and it is quite a surprise to notice that the judges in some of the State district courts are paid more than our Federal judges. All of us realize that these Federal judges have quite a heavy responsibility and are certainly entitled to a substantial increase.

Not only the lawyers but a number of other citizens who are given the facts concerning this problem agree that the judges should have an increase of $10,000. I believe that the people here in North Dakota are in favor of both of these increases. If for any reason you would like us to take a very careful survey around the State, that could also be done, but at this time we believe that you can rely on the statements made in this letter.

We hope that you will support this increase, Senator, and if there is anything further that you would want concerning facts here in the State just drop me a line at any time.

Sincerely,

CARLTON G. NELSON,
State Chairman of the American Bar Association Committee on Judicial Selection, Tenure, and Compensation.

INCREASE IN SALARIES OF JUSTICES AND JUDGES OF UNITED STATES COURTS AND MEMBERS OF CONGRESS

The PRESIDENT pro tempore. If there be no further morning business, morning business is closed, and, under the unanimous consent order of Monday last, the Chair lays before the Senate the unfinished business.

The Senate resumed the consideration of the bill (S. 462) to increase the salaries of justices and judges of United States courts, Members of Congress, and for other purposes.

The PRESIDENT pro tempore. The Senate, in considering the bill, will be operating under the limitation of debate which was agreed to on Monday last.

Mr. CLEMENTS. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. CLEMENTS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered. The question is on agreeing to the amendments offered by the Senator from Connecticut [Mr. BUSH] to the amendment of the committee. By unanimous consent the three amendments offered by him will be considered en bloc.

Mr. BUSH. Mr. President, I understand that I have 15 minutes allotted to me.

The PRESIDENT pro tempore. The Senator from Connecticut is correct.

Mr. BUSH. Mr. President, the purpose of my amendments is to require separate consideration of two distinct issues, namely, whether the salaries of judges should be increased, and whether the salaries of Members of Congress should be increased.

The amendments would strike from the bill all provisions increasing congressional salaries, but would leave intact the increase in travel allowance.

As I informed the Senate on Monday, I believe that increases in salaries for members of the Federal judiciary are justified. A judge is in a quite different position from that of a Member of Congress, because a judge must sacrifice all other sources of earned income when he goes on the bench. A Member of Congress retains all outside sources of earned income which he may have. Many Members of Congress have available to them outside sources of income from the practice of law, newspapers, radio stations, and business and professional activities of many kinds. I commented on that point in my remarks on Monday.

Therefore the two issues are entirely unrelated and, in my judgment, should be considered separately. It does not become Members of Congress to hide behind the robes of the judiciary when their own salaries are involved.

In saying that, I fully appreciate the fact that many Members of Congress face a difficult problem, peculiar to the position they occupy, because they must retain dual residences, in Washington and in their own districts or States.

A partial recognition of this problem has been made by the so-called $2,500 expense allowance, and the privilege of deducting up to $3,000 as expenses in computing income taxes.

The so-called $2,500 expense allowance actually, of course, is an addition to salary, making the total $15,000 a year, instead of the $12,500 listed in the law.

The distinguished senior Senator from Oregon [Mr. MORSE] has proposed several amendments intended to meet the extra burdens of expense attached to the offce of a Member of Congress. Among them is a proposal to increase the tax deduction from $3,000 to $5,000 for Washington living expenses.

I have not had an opportunity to discuss his amendment with the Senator from Oregon, as I had hoped to do. Therefore, what I am about to say may surprise him slightly. While I am sympathetic with his purpose to relieve the financial burden of those Members of Congress who find the problem of dual living expenses a difficult one to meet, especially of the younger Members with heavy family responsibilities, I do not believe that is the right way to tackle the question.

A tax deduction works to the advantage of those with higher incomes. A man in the 60 percent tax bracket, for example, would profit twice as much as would a man in the 30 percent bracket. A man in the 75 percent tax bracket would save $2,250 out of the $3,000, whereas a man in the 30 percent tax bracket would save only $900.

It appears to me that the proposal does not work out equitably, in that while it may be fair to one it is not fair to another. Therefore, I have some reservation about the amendment submitted by the Senator from Oregon, although I believe the principle involved in the amendment is right, because the Senator from Oregon is trying to meet the living expense problem by a special allowance.

Mr. MORSE. Mr. President, will the Senator yield?

Mr. BUSH. I am glad to yield.

Mr. MORSE. Does not the Senator also have in mind that a businessman is allowed similar deductions for living expenses in Washington, and that when a corporation maintains living accommodations for its executives in Washington it is allowed to deduct such expenses?

Mr. BUSH. I would have to answer the question in this way, that a businessman who is sent to Washington on business has his expenses paid by the organization which sends him to Washington.

Mr. MORSE. Mr. President, will the Senator yield further?

Mr. BUSH. I yield.

Mr. MORSE. Is it not true that the parent organization is allowed a deduction?

Mr. BUSH. There is no question about that. The Senator is correct. But I do not believe an increase in the tax deduction is the fairest and most equitable way of meeting the problem.

Possibly a solution might be to provide per diem allowances to Members of Congress, subject to strict accounting by voucher, to meet reasonable living expenses in Washington while Congress is in session.

That approach, however, together with the various suggestions which have been made for increasing allowances for office expenses, ought to be the subject of thorough study by the appropriate committees of the Senate and the House of Representatives. I do not believe the committees of either body have come to grips with that particular problem in considering the pending bill. Instead, I believe the committees of the two Houses have dealt simply with a salary bill.

I am not optimistic enough to hope that my amendments will prevail, in view of the obvious intent of the Senate to pass the pending bill. If, however, we should succeed in striking out the congressional salary increase provision, I would hope that a study of such allowances would be undertaken at once.

Mr. HOLLAND. Mr. President, will the Senator yield?

Mr. BUSH. I yield.

Mr. HOLLAND. The effect of the adoption of the Senator's proposed amendments would be to confine the pending bill to a raise in salary for the judiciary; is that correct?

Mr. BUSH. That is correct; plus the congressional travel allowances, which are provided for at the end of the bill.

Mr. HOLLAND. Does the Senator believe that the fact that judges hold office for life or during good behavior puts them in a preferred classification, so far as salaries are concerned, as compared with Members of Congress, who, in the case of the House, must run for office every 2 years, with attendant uncertainty, and, in the case of the Senate, must run for office every 6 years, also with attendant uncertainty?

Mr. BUSH. Yes. Of course, the fact that judges hold virtually life appointments has been one of the arguments for holding down their compensation in the past. I frankly believe that the salary level proposed for judges is a very substantial increase, but I find it is impossible to haggle about it too much.

Mr. HOLLAND. Mr. President, will the Senator yield for a further question?

Mr. BUSH. I yield.

Mr. HOLLAND. Did I correctly understand the Senator from Connecticut to say that judges have to cut off their other sources of revenue when they accept appointment?

Mr. BUSH. As I recall, I said earned income.

Mr. HOLLAND. It so happens that I know of judges who have producing farms and livestock operations. Both of those situations happen to be true with reference to district judges serving in my own State. They do not have to forego that revenue. They do not have to forego that type of business as well as many other types of business and investments but they have to forego only their professional connections and certain classes of business connections which might conflict with their duties as judges. Is not the Senator covering too much territory in saying that members of the judiciary are foreclosed from receiving other sources of income?

Mr. BUSH. The Senator has proved there are exceptions to what I said. I had in mind judges being required to forego the opportunity of legal practice. I concede that the Senator from Florida has a good point.

Mr. CHAVEZ. Mr. President, will the Senator from Connecticut yield?

Mr. BUSH. I yield.

Mr. CHAVEZ. Is it not a fact that judges forego their normal activities because they wanted to be appointed as judges?

Mr. BUSH. I am sorry; I did not hear all the Senator's question.

Mr. CHAVEZ. Is it not a fact that men who are appointed to the Federal bench are there because they wanted to be appointed and because they would ask the Senator from Connecticut, for instance, or some other Senator, to support them for such appointment.

Mr. BUSH. Yes.

Mr. CHAVEZ. They forego their normal legal activities of their own volition. They receive a life job. They can retire at the age of 70 years on full pay. Does not the Senator think that a Member of Congress, who is responsible to his own constituents, and who can be removed from his office by them at any election, is entitled to additional compensation?

Mr. BUSH. As to that specific question, I should have to differ with the Senator. I do not believe the two are comparable. I discussed it in some detail last Monday.

Mr. CHAVEZ. The Constitution says they are comparable. It says there shall be three branches of Government. It does not say the judiciary shall be superior to the administrative branch or to the legislative branch. It says that there shall be three branches of Government.

Mr. BUSH. That is correct.

Mr. CHAVEZ. What makes the judicial branch so superior to the other two branches of the Government?

Mr. BUSH. It makes little difference what I think makes a judge superior. I do not think a judge should be superior, but, on the average, they are a very superior group of men. The purpose of raising the judicial salary is to try to improve the quality of men on the Federal bench. In my own State we have had very great difficulty in finding men of the quality we are willing to recommend for appointment. That is true in other States, I suppose.

Mr. CHAVEZ. I dislike to disagree with my good friend from Connecticut, but John Jay, the first Chief Justice of the Supreme Court, and John Marshall, were very competent men. Chief Justice Harlan, the grandfather of the nominee who is before the Senate at this time, was a very good man, as was, also, Chief Justice White. Would not the Senator consider that they were just as good judges as we now have? Would not the Senator consider that they were just as respectable and just as wise in interpreting the Constitution as are the judges we now have?

Mr. BUSH. Oh, yes.

Mr. HOLLAND. Mr. President, will the Senator from Connecticut yield further?

Mr. BUSH. I yield.

Mr. HOLLAND. I am certainly in sympathy with the position of the distinguished Senator from Connecticut that we ought to do what we can toward raising the salaries of judges to a reasonable figure, and I join him in the hope that a higher type of men can be obtained than those who are sometimes available. But I am wondering if the distinguished Senator does not think the same argument might apply to Members of the Congress, and that an opportunity to get a better class of Members of the Senate and of Members of the House of Representatives might be afforded by raising their salaries?

Mr. BUSH. I commented on that point last Monday. My general feeling about it is that it is difficult to get qualified men for the Federal courts, but there seems to be no difficulty in getting applicants for the House and Senate. I think I said that if any Member, either of the Senate or the House, should retire there would be plenty of applicants for the position.

Mr. HOLLAND. If I correctly understand the distinguished Senator, he feels that the reasons in connection with the proposal to increase the salaries of Members of Congress have not been sufficiently well established. Does he not think that the record made by the very able Commission which studied the subject and the impressive reports submitted by the Senate and House committees, both of which have studied the subject for a long period of time, support the pending bill and support the case so ably made day before yesterday by the chairman of the subcommittee, the distinguished Senator from Tennessee [Mr. KEFAUVER], that the increase in salary for Members of Congress now suggested is appropriate and has been shown to be wise and just and has been just as effectively proved as in the case of the proposed change in the salaries of the judiciary?

The PRESIDENT pro tempore. The time of the Senator from Connecticut has expired. The present occupant of the chair desires to advise the Senate that the Senator from Connecticut has presented to the Senate a stopwatch, which is now being used to keep the time.

Mr. HOLLAND. Mr. President, I ask unanimous consent that the distinguished Senator from Connecticut be given a reasonable amount of time in

which to reply to my most recent question. I should not like to be left in the position of asking a question and then not having given the Senator from Connecticut an opportunity to answer it.

The PRESIDENT pro tempore. Without objection, it is so ordered. The Senator from Connecticut may proceed.

Mr. BUSH. Mr. President, I stated that I was not greatly impressed with the part of the report which had to do with congressional salaries. I also think it went a little too far in connection with judicial salaries. The salaries are compared with those of corporation heads, and it is said the salaries of corporation heads are an average of $120,000 a year. The report also refers to the salaries of heads of labor unions, from $20,000 to $50,000 a year. What I said about that was that I did not think it was impressive at all, because the report did not go into other fields of endeavor. Many persons engaged in the teaching profession, in the medical profession, and in the clerical field, whose compensation is not anywhere near so high as that which we are now receiving, are well qualified to sit in the Halls of Congress. There are in those professions just as many persons who are well qualified to be Members of the Senate or of the House as there are in the business world.

That is my answer to the Senator's question.

Mr. HOLLAND. If the Senator will yield for one more question. Am I correct in my understanding that the substance of the position taken by the Senator from Connecticut is that he thinks judges are entitled to the raise, but he is not sure Members of Congress are entitled to the raise?

Mr. BUSH. That is almost correct. I said on Monday, and I repeat, that I think further consideration should be given by the appropriate committees to what we call the situation affecting Members of the Congress. I stated that I was in general accord with the philosophy of the Senator from Oregon [Mr. MORSE] that a study should be made to see what is the burden which is imposed, and then to deal directly with the problem. I do not agree entirely with the way in which the Senator is endeavoring to accomplish the objective.

Mr. HOLLAND. If I correctly understand the distinguished Senator, he does not think the fact that a district judge has to maintain but one home while Members of Congress have to maintain two homes, and the further fact that a judge does not have to run for office periodically, as Members of the Congress have to do, bring about any equality between the needs for increased salaries of the Members of Congress and district judges?

Mr. BUSH. I see very little similarity between the two problems.

Mr. HOLLAND. I thank the Senator.

Mr. KEFAUVER. Mr. President, I yield to the Senator from New Mexico [Mr. CHAVEZ] 3 minutes.

The PRESIDENT pro tempore. The Senator from New Mexico is recognized for 3 minutes.

Mr. CHAVEZ. Mr. Persident, do I correctly understand that the position of the Senator from Connecticut is that he believes if his amendment should be agreed to it might be possible to have better Members of Congress?

Mr. BUSH. No. I do not think I said that.

Mr. CHAVEZ. That is what I understood the Senator to say—that there would be an improvement in the quality and caliber of Members of Congress.

Mr. BUSH. No; I did not say that. I have expressed no disapproval of or dissatisfaction with the quality of the Members of Congress; in fact, I said on Monday I thought they represented a good cross section of the citizenry of the United States and that the membership was very satisfactory.

Mr. CHAVEZ. Does not the Senator from Connecticut believe that the individual States have the right, under the Constitution, to send to the Senate or the House of Representatives whomever they please?

Mr. BUSH. Oh, yes.

Mr. CHAVEZ. That is their right; is it not?

Mr. BUSH. Yes.

Mr. CHAVEZ. It is basic; is it not?

Mr. BUSH. Yes.

Mr. CHAVEZ. There should be no inference whatsoever drawn, should there, that the people of individual States are sending to Congress persons who do not meet the proper qualifications?

Mr. BUSH. I make no such inference. If the Senator from New Mexico has gathered such an idea from anything I have said, I am very sorry, because I never made such a statement. To the contrary, I have said, and I wish to say again, that I think we have a good body, and I do not believe that increasing the salaries of Members, as is provided under the pending bill, will improve the membership.

Mr. CHAVEZ. I apologize, then, for stating what I thought the Senator from Connecticut had in mind. I was going to ask him whether, considering the type of the present Members of Congress, it was senatorial courtesy that prevented the Senator from Connecticut from saying which Senator was not doing his duty.

Mr. BUSH. The Senator from New Mexico is trying to put some words into my mouth or to draw some inferences which are not justified. I have said, on the contrary, that I think the Senate is a very creditable body.

Mr. CHAVEZ. That is why I wish to apologize.

Mr. BUSH. I certainly accept the Senator's apology.

Mr. KEFAUVER. Mr. President, a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator from Tennessee will state it.

Mr. KEFAUVER. How much time remains?

The PRESIDENT pro tempore. The Senator from Tennessee has 9 minutes remaining.

Mr. DIRKSEN. Mr. President, will the Senator from Tennessee yield 3 minutes to me?

Mr. KEFAUVER. I yield 3 minutes to the distinguished Senator from Illinois.

Mr. DIRKSEN. Mr. President, it seems to me that the premise of my esteemed colleague from Connecticut [Mr. BUSH] is that if it is conceded that some Members of the Senate are underpaid, why not keep all Members underpaid?

With respect to Federal judges, I have never had any difficulty, under the present judicial salary scale, in finding competent persons for the judiciary; in fact, I am proud of those whose names I have submitted and who, in my judgment, are performing distinguished service both on the Federal circuit bench and on the District court bench.

It would have been just as logical for the Senator from Connecticut to move to strike out the judicial portion of the bill rather than the legislative portion. But if the amendment offered by the Senator from Connecticut shall prevail, that will be the end of the proposed salary increase for Members of Congress, notwithstanding the fact that the proposal has the endorsement of the President of the United States, and notwithstanding the fact that it has the unanimous endorsement of a very able Commission representing interests from all areas of the country.

I earnestly hope the amendment will be rejected.

As I examine all the amendments pending before the Senate, it seems to me the situation adds up to a good deal of confusion. So the simple and reasonable thing to do is to vote for the salary increase.

With all deference to my distinguished friend from Connecticut, I hope that his amendment will be rejected.

Mr. KEFAUVER. Mr. President, I believe this is the first time I have ever heard anyone, either in Congress or outside of Congress, say that he thought district judges should be paid more than Members of Congress receive. Indeed, the argument usually has been, and now is, that Members of Congress should receive greater compensation than that received by district judges.

The Senator from Connecticut no doubt knows that the House action, in the overall compensation, provides for $2,500 more for Members of Congress, by way of an expense allowance, than it provides for district judges. I feel that so far as the dignity of the office of Members of Congress and that of district judges is concerned, certainly the office of Members of Congress is as high as that of judges. It cannot be argued that Members of Congress do not make as great a sacrifice as do judges. Indeed, I am certain the Senator from Connecticut would concede that, considering the additional entertainment of constituents by Members of Congress, the necessity of furnishing two homes, the paying of extra sums out of their own pockets for office expense, and the fact, which every Member of Congress knows to be true, that it is impossible to conduct a campaign without having to spend one's own money, many good reasons exist why Members of Congress should be included in the salary classification of circuit judges, rather than that of district judges.

Furthermore, while district judges have great responsibilities, I can think of no higher responsibility, requiring the

best talents and ability that can be obtained, than that which rests on Members of Congress. The responsibility of Members of Congress is certainly greater than it was in 1939. Yet the allowance made in the bill on the basis of purchasing power is somewhat less than the purchasing power of the salary of a Member of Congress in 1939.

If the distinguished Senator from Connecticut will examine the hearings before the Segal commission, he will find that the public has a higher estimation of what the Senator should earn as a Member of the Senate than he himself has.

In the testimony of the seventy-odd witnesses who testified, and in the hundreds of letters and editorials, there has never been 1 suggestion made by any witness or newspaper editor throughout the Nation, from what I have been able to find in the 700 pages of the Segal commission's report, that Members of Congress are not entitled to at least the same compensation as that of district judges.

The Senator from Connecticut has presented a very unusual amendment. It is unusual because this is the first time such a proposal has been made. The salaries of district judges and Members of Congress have stood together at the same level for more than 40 years.

I think district judges have great responsibilities. We want to have in the judiciary the best persons obtainable. Still, I think it is even more important that there be the highest caliber of talent that can be secured for the direction of this Nation, which is in the hands of its Legislature.

I hope the amendment of the Senator from Connecticut will be rejected by a large vote, as I hope the other amendments to be presented will be.

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from Connecticut [Mr. BUSH].

Mr. MORSE. Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. KNOWLAND. I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. KNOWLAND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BRIDGES. Mr. President——

The PRESIDENT pro tempore. No time remains for debate on the amendment. The question is——

Mr. BRIDGES. Mr. President, has the time which was allotted to the side in opposition to the amendment expired?

The PRESIDENT pro tempore. The time on both sides has expired.

The question is on agreeing to the three amendments of the Senator from Connecticut [Mr. BUSH] to the committee amendment. By unanimous agreement, the amendments are to be considered en bloc.

The clerk will call the roll.

The legislative clerk called the roll.

Mr. CLEMENTS. I announce that the Senator from Illinois [Mr. DOUGLAS], the Senator from Missouri [Mr. HENNINGS], the Senator from Minnesota [Mr. HUMPHREY], the Senator from Florida [Mr. SMATHERS], and the Senator from South Carolina [Mr. THURMOND] are absent on official business

The Senator from New Mexico [Mr. ANDERSON] is absent by leave of the Senate to attend the atomic-energy tests in Nevada.

The Senator from Rhode Island [Mr. GREEN] is absent by leave of the Senate to attend the inauguration of the President of Cuba.

The Senator from Texas [Mr. JOHNSON] and the Senator from Massachusetts [Mr. KENNEDY] are absent by leave of the Senate because of illness.

On this vote the Senator from Rhode Island [Mr. GREEN] is paired with the Senator from South Carolina [Mr. THURMOND]. If present and voting, the Senator from Rhode Island [Mr. GREEN] would vote "nay," and the Senator from South Carolina [Mr. THURMOND] would vote "yea."

I also announce that on this vote the Senator from Missouri [Mr. HENNINGS], if present and voting, would vote "nay."

Mr. SALTONSTALL. I announce that the Senator from Indiana [Mr. CAPEHART] is absent on official business.

I also announce that the Senator from Iowa [Mr. HICKENLOOPER] is absent by leave of the Senate to attend the ceremonies at the inauguration of the President of Cuba.

The Senator from Maine [Mrs. SMITH] is absent by leave of the Senate.

The Senator from Wisconsin [Mr. WILEY] is necessarily absent.

If present and voting the Senator from Maine [Mrs. SMITH] would vote "yea."

The result was announced—yeas 3, nays 80, as follows:

NOT VOTING—13

Anderson	Hickenlooper	Smith, Maine
Capehart	Humphrey	Thurmond
Douglas	Johnson, Tex.	Wiley
Green	Kennedy	
Hennings	Smathers	

So the amendments submitted by Mr. BUSH to the committee amendment were rejected.

Mr. WILLIAMS. Mr. President, I call up my amendment, identified as 2–15–55–B, to the committee amendment, and ask that it be stated.

The PRESIDENT pro tempore. The amendment to the amendment will be stated.

The CHIEF CLERK. On page 9 of the committee amendment, it is proposed to strike out lines 2 and 3, and insert in lieu thereof the following:

The first days of the fiscal year—

(1) following a fiscal year for which the receipts of the Government have exceeded the expenditures of the Government, as determined by the Director of the Bureau of the Budget.

Mr. WILLIAMS. Mr. President——

The PRESIDENT pro tempore. The Senator from Delaware is recognized for 15 minutes.

Mr. WILLIAMS. Mr. President, this amendment is very simple. It merely provides that the effective date of any salary increase authorized by this bill will be the first day of the first July following a fiscal year for which the receipts of the Government have exceeded the expenditures of the Government—in other words, when the Federal Government has a balanced budget.

In short the purpose of this amendment is to prevent any salary increase either for judges or Members of Congress being authorized with borrowed money.

I wish to make clear that I am not debating this issue on the basis of the merits of the proposed salary increase. I recognize that there is much merit to the proposal that some adjustment in judicial and congressional salaries be made. We must never allow the Congress of the United States develop into a rich man's club.

I voted against the preceding amendment, offered by the Senator from Connecticut [Mr. BUSH] to the committee amendment; I did so for the reason that I think all these salary increases should be considered en bloc. I believe that salary increases for the judiciary and salary increases for Members of Congress are equally meritorious, and both should either be agreed to or rejected. However, as previously stated, I am opposed to agreeing to either of them at this time when they can be paid only with borrowed money.

Mr. President, there is ample precedent for my amendment, because identical language is contained in Public Law 361 of the 83d Congress, 2d session, being House bill 6549, which provides for the construction of the Jefferson National Expansion Memorial at St. Louis, Mo. In passing that bill, Congress adopted language similar to the language of my amendment; and in that connection I now read from Public Law 361:

SEC. 4 (b). The authorization for an appropriation contained in subsection (a) shall not be effective until such time as—

(1) the receipts of the Government for the preceding fiscal year have exceeded the expenditures of the Government for such year, as determined by the Director of the Bureau of the Budget; or

(2) the budget submitted to the Congress by the President under the Budget and Accounting Act, 1921, reveals that the estimated receipts of the Government for the fiscal year for which such budget is submitted are

in excess of the estimated expenditures of the Government for such fiscal year.

That provisions of Public Law 361 made it possible for the Secretary of the Interior to expend the authorized funds only after the Federal Government's budget is balanced.

During the past 25 years, on only 3 occasions has the Federal Government lived within its income.

Likewise, many other proposals coming before Congress are equally meritorious, and many of us will be called upon to oppose them on the basis of this same argument; namely, that the Federal Treasury does not contain sufficient funds to pay the expenditures proposed in those measures.

I cite one of those measures which will come to us from the House of Representatives later this week—a proposal for a tax credit in the amount of $20 for every taxpayer and every dependent. I do not think any Member will argue against that proposal on the basis that it is does not have some merit. However, here again we are confronted with the fact it represents a loss of $1,500,000,000 to the Federal Treasury, and every dollar of the reduction would have to be made up by means of extra borrowed money.

Another popular proposal is for a 10 percent across-the-board salary increase for the 2½ million civilian employees of the Federal Government. Again, a good argument can be made to the effect that the Government employees' salaries have not kept pace with the salaries paid in industry. Taken by itself, it would not be possible to build up a good case against the proposal to grant such a salary increase were it not for the fact that it will cost about $800 million; and, again, every dollar of this would have to be borrowed. I read in the press reports to the effect that a 10-percent salary increase would cost only about $200 million on the basis that much of the cost of the salary increases would be absorbed by the various governmental agencies. That sounds very nice, but every Member of the Senate knows that scarcely a dollar of the cost of such a salary increase would be absorbed by any agency by means of laying off employees; and I venture to say that an amendment making such an arrangement mandatory would be rejected.

Those two proposals would represent an additional expenditure of approximately $2,225 million.

Another proposal which will be coming before us is one to extend the social security benefits to the 2½ million Government employees in addition to the benefits they now enjoy under the regular retirement systems. That proposal, too, can be regarded as having merit equal to the proposal contained in the bill now before us. But, Mr. President, if such a social security extension is passed, allowing the civilian employees of the Government to have access to the social security benefits in addition to the retirement benefits they now receive, the result will be that the Federal Government, as their employer, will have to pay a 2 percent tax on the first $4,200 of the salary of every Government employee. This would amount to a cost to the United States Government of another $100 million; and in view of the fact that today the Government's budget is out of balance, the result would be that the Government would have to borrow the money in order to pay its own tax as an employer.

Tax reductions and salary increases are economically unsound and cannot be justified, particularly at a time when our country is enjoying its highest degree of peacetime prosperity.

Likewise, there are many new Federal-aid programs as well as many extensions of existing programs, any one of which taken by itself could be justified on the basis of its merits but which we should not support because we do not have the money in the Federal Treasury with which to pay for them.

We must recognize that after 25 years of living beyond our income, the time has come when we must balance the budget. If the budget is ever to be balanced, now is the time to do it.

As the President of the United States has pointed out, there is still great danger from inflation. The reason we are discussing an increase in salary for Members of Congress and for civil-service employees is because of the depreciated dollar caused by inflation. Inflation, of course, is caused largely by an unbalanced budget.

It is an endless cycle, and must be stopped somewhere along the line by Congress.

Ten years ago the Government sold bonds to the American people on the basis of returning $4 for every $3 invested. However, the $4 received today will not buy as much as $2 would when the original bond was purchased. Instead of giving him back $4 for each $3 invested, the Government is actually taking away one-third of what the investor paid to the Government.

At the same time, as a result of the depreciation of the dollar the Government has destroyed one-half the value of every life insurance policy, retirement fund, and social-security fund.

It is the responsibility of Congress to recognize this condition and to balance the budget. We are closer today to balancing the budget than we have been in recent years. I believe it can be done. There is only one thing lacking—the will on the part of Congress to do it.

I close my remarks with the statement that the increases proposed in the bill could perhaps be justified except for the fact that we must borrow the money with which to pay for them. If my amendment is agreed to, I shall support the bill. If it is not agreed to, I shall oppose the bill.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is the request sufficiently seconded?

The yeas and nays were not ordered.

Mr. WILLIAMS. I shall request the yeas and nays again after the opposition has spoken.

Mr. DIRKSEN. Mr. President, will the Senator from Tennessee yield me 2 minutes?

Mr. KEFAUVER. I yield 3 minutes to the Senator from Illinois.

Mr. DIRKSEN. Mr. President, I can well understand the viewpoint expressed by the distinguished Senator from Delaware [Mr. WILLIAMS]. However, I should like to say to the Senate that on the basis of his logic, since the budget was out of balance 23 years in the past 26 years, there would have been only three chances for a pay raise, no matter how necessary it might have been.

If that logic applies, there would have been no pay raise for Federal employees in 4 of the last 5 pay-raise bills, beginning in 1945.

As I go back and read the record of the raises granted to Federal employees in 5 different bills, they aggregate 51 percent, and only once during that time was the budget balanced.

If we follow the logic of the Senator from Delaware, we will have to make up our minds that we will not consider the bill providing salary increases for Federal employees which the Committee on Post Office and Civil Service will report shortly.

Mr. WILLIAMS. Mr. President, will the Senator yield?

Mr. DIRKSEN. If we must find some infinite date in the future when a salary increase may become effective, I will say to the Senate that frankly I do not know when that would be.

I believe the bill before the Senate is predicated on justice. It has the endorsement of the President. It is based on the unanimous recommendation of the Segal Commission, which was established by Congress. Therefore, I trust that the amendment of the distinguished Senator from Delaware will be defeated.

Mr. ELLENDER. Mr. President, will the Senator yield?

Mr. DIRKSEN. I shall be happy to yield, if I have the time.

Mr. ELLENDER. Might not the adoption of the pending amendment serve as an inducement to Congress to balance the budget?

Mr. DIRKSEN. That, of course, is wholly speculative.

Mr. WILLIAMS. Mr. President, will the Senator from Illinois yield?

Mr. DIRKSEN. I yield, if I have the time.

The PRESIDING OFFICER. The Senator from Illinois has 1 minute remaining.

Mr. WILLIAMS. Does not the Senator agree with me that Congress could balance the budget within the next 12 months if it had the will to do so?

Mr. DIRKSEN. The Senator is correct.

Mr. WILLIAMS. Does not the Senator agree with me that this is the time to balance the budget?

Mr. DIRKSEN. If in the past 26 years Congress has not had the disposition to balance the budget, I see no reason why Members of the House and of the Senate should be the victims of that failure on the part of the two Houses of Congress.

Mr. WILLIAMS. Does not the Senator from Illinois agree with me that the House and the Senate are the bodies which authorize the appropriations which, in turn, bring about an unbalanced budget?

Mr. DIRKSEN. I understand.

The PRESIDING OFFICER. The time of the Senator from Illinois has expired.

Mr. KEFAUVER. Mr. President, I respect the sincerity of the distinguished Senator from Delaware [Mr. WILLIAMS] in offering his amendment. However, I respectfully submit that the basis of the compensation we are discussing should be somewhere near the worth of the Members of Congress, instead being based on the fiscal condition of the United States with the bringing about of which we have had very little to do. It is not the fault of Members of Congress that events of history many years ago brought about war conditions and the present cold war conditions. Those conditions make it impossible to balance the budget. In any event, they make it all the more necessary to have competent men in the House and in the Senate.

Furthermore, Mr. President, I point out that the pending bill provides for increases which amount to a little less than $5 million. That is a little less than 1/100th percent of the budget, and on that basis it would take 100 years to reduce the budget by as much as 1 percent.

Former President Herbert Hoover, who I am sure the Senator from Delaware will agree is a great economizer, and other persons in business who are interested in balancing the budget, have made reports about the bill and have testified before the Segal Commission. Their position is that Members of Congress should be given adequate compensation, so that they may have some degree of independence. It is urged that if the Members of Congress are given adequate compensation they will not be subject to the extent they now are consciously or unconsciously to the influence of pressure groups who are seeking appropriations for one cause or another. They point out also that we would have a sounder government and better fiscal affairs, as well as a better chance of balancing the budget. All that is being sought is a minimum increase in salary for Members of Congress. It is less than what has been recommended by the Segal and Hoover commissions and the President of the United States. I believe the committee has been very modest in recommending $5,000 less than the recommendation of the Segal Commission.

Certainly the newer Members of Congress have had nothing to do with bringabout the condition in our fiscal affairs which makes it so difficult to balance the budget at this time. As the Senator from Illinois has pointed out, we have given five raises in pay since 1945 to Federal employees, in order to provide them with a living wage, and, with the exception of 1 year, during that time the budget was not in balance.

I hope that the amendment offered by the Senator from Delaware [Mr. WILLIAMS] will be rejected.

SEVERAL SENATORS. Vote! Vote! Vote!

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Delaware [Mr. WILLIAMS] to the committee amendment.

Mr. WILLIAMS. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is the request sufficiently seconded?

The yeas and nays were not ordered.

Mr. WILLIAMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Aiken	Frear	McNamara
Allott	Fulbright	Millikin
Barkley	George	Monroney
Barrett	Goldwater	Morse
Beall	Gore	Mundt
Bender	Hayden	Murray
Bennett	Hennings	Neely
Bible	Hill	Neuberger
Bricker	Holland	O'Mahoney
Bridges	Hruska	Pastore
Bush	Ives	Payne
Butler	Jackson	Potter
Byrd	Jenner	Purtell
Carlson	Johnston, S. C.	Robertson
Case, N. J.	Kefauver	Russell
Case, S. Dak.	Kerr	Saltonstall
Chavez	Kilgore	Schoeppel
Clements	Knowland	Scott
Cotton	Kuchel	Smith, N. J.
Curtis	Langer	Sparkman
Daniel	Lehman	Stennis
Dirksen	Long	Symington
Douglas	Magnuson	Thurmond
Duff	Malone	Thye
Dworshak	Mansfield	Watkins
Eastland	Martin, Iowa	Welker
Ellender	Martin, Pa.	Williams
Ervin	McCarthy	Young
Flanders	McClellan	

Mr. CLEMENTS. I announce that the Senator from Minnesota [Mr. HUMPHREY] and the Senator from Florida [Mr. SMATHERS] are absent on official business.

The Senator from New Mexico [Mr. ANDERSON] is absent by leave of the Senate to attend the atomic-energy tests in Nevada.

The Senator from Rhode Island [Mr. GREEN] is absent by leave of the Senate to attend the inauguration of the President of Cuba.

The Senator from Texas [Mr. JOHNSON] and the Senator from Massachusetts [Mr. KENNEDY] are absent by leave of the Senate because of illness.

Mr. SALTONSTALL. I announce that the Senator from Indiana [Mr. CAPEHART] is absent on official business.

I also announce that the Senator from Iowa [Mr. HICKENLOOPER] is absent by leave of the Senate to attend the inaugural ceremonies of the President of Cuba.

The Senator from Maine [Mrs. SMITH] is absent by leave of the Senate.

The Senator from Wisconsin [Mr. WILEY] is necessarily absent.

The PRESIDING OFFICER. A quorum is present. The question is on agreeing to the amendment offered by the Senator from Delaware [Mr. WILLIAMS] to the committee amendment.

Mr. WILLIAMS. Mr. President, I again ask for the yeas and nays.

The yeas and nays were ordered.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll.

Mr. CLEMENTS. I announce that the Senator from Minnesota [Mr. HUMPHREY], and the Senator from Florida [Mr. SMATHERS] are absent on official business.

The Senator from New Mexico [Mr. ANDERSON] is absent by leave of the Senate to attend the atomic-energy tests in Nevada.

The Senator from Rhode Island [Mr. GREEN] is absent by leave of the Senate to attend the inauguration of the President of Cuba.

The Senator from Texas [Mr. JOHNSON] and the Senator from Massachusetts [Mr. KENNEDY] are absent by leave of the Senate because of illness.

I further announce that on this vote the Senator from Rhode Island [Mr. GREEN], if present and voting, would vote "nay."

Mr. SALTONSTALL. I announce that the Senator from Indiana]Mr. CAPEHART] is absent on official business.

I also announce that the Senator from Iowa [Mr. HICKENLOOPER] is absent by leave of the Senate to attend the inaugural ceremonies of the President of Cuba.

The Senator from Maine [Mrs. SMITH] is absent by leave of the Senate.

The Senator from Wisconsin [Mr. WILEY] is necessarily absent.

If present and voting, the Senator from Maine [Mrs. SMITH] would vote "yea."

The result was announced—yeas 15, nays 71, as follows:

YEAS—15

Bush	Douglas	Langer
Byrd	Dworshak	Morse
Case, S. Dak.	Ellender	Mundt
Curtis	Frear	Welker
Daniel	Hruska	Williams

NAYS—71

Aiken	Gore	Millikin
Allott	Hayden	Monroney
Barkley	Hennings	Murray
Barrett	Hill	Neely
Beall	Holland	Neuberger
Bender	Ives	O'Mahoney
Bennett	Jackson	Pastore
Bible	Jenner	Payne
Bricker	Johnston, S. C.	Potter
Bridges	Kefauver	Purtell
Butler	Kerr	Robertson
Carlson	Kilgore	Russell
Case, N. J.	Knowland	Saltonstall
Chavez	Kuchel	Schoeppel
Clements	Lehman	Scott
Cotton	Long	Smith, N. J.

George	McClellan	Young
Goldwater	McNamara	

NOT VOTING—10

Anderson	Humphrey	Smith, Maine
Capehart	Johnson, Tex.	Wiley
Green	Kennedy	
Hickenlooper	Smathers	

So the amendment of Mr. WILLIAMS to the committee amendment was rejected.

The PRESIDING OFFICER. The committee amendment is open to further amendment.

Mr. ELLENDER. Mr. President, I offer an amendment which I ask to have stated.

The PRESIDING OFFICER. The clerk will state the amendment offered by the Senator from Louisiana.

The CHIEF CLERK. On page 7, line 25, it is proposed to strike out "$22,500" and insert in lieu thereof "$20,000."

Mr. ELLENDER. The purpose of the amendment is to reduce the amount recommended by the committee to $20,000. If the amendment shall be agreed to, it will be my purpose to place

before the Senate similar amendments so as to reduce in the same proportion all other salaries which have been recommended for increases.

The amount as now provided in the bill raises the present salary of Senators and Representatives by 50 percent, that is, from $15,000 per annum to $22,500. The purpose of my amendment is to increase the salaries of Members of the Congress by 33⅓ percent. I should like to decrease the amount a little more, that is, to something which would be in accord with the increase in the cost of living; but I doubt that such an amendment would prevail. As a practical matter, Mr. President, I know that such an amendment would fail. Nevertheless, I believe the Senate should know that since 1946, the last time this body had an opportunity to vote on a salary increase, the cost of living has advanced only some 14 points. On this basis, salary increases which would meet the cost of living increase should not exceed $2,500 per annum. However, I am convinced that such an amendment would fail of passage, and since I am a practical man, I have offered my amendment with the thought that the amount it provides is practical enough to be approved by this body, and at the same time, is more than ample for our needs.

If the amendment I have offered is agreed to, it will represent a salary increase of 100 percent over and above the $10,000 salary paid to Members of the Congress prior to the adoption of the Reorganization Act in 1946. In other words, even if my amendment is adopted, Senators will have voted to double their salaries in a period of only nine years. Yet, the committee amount represents an increase over 1946 of some 125 percent. Mr. President, I frankly cannot see how this large amount can be justified. Certainly, no other segment of our government has received such treatment.

Let me point out that since 1946 the cost of living has increased, according to the Bureau of Labor Statistics, by only some 13 or 14 percent.

In the bill we are being asked to increase the salary of Senators, who were paid $10,000 in 1946, to $22,500—an increase of 125 percent.

I should like to vote for a reasonable increase in salary; as a matter of fact, I shall, and I offer this amendment with the firm conviction that the raise it provides is more than ample. If the bill should be passed as reported, with the House having provided in its bill a salary of $25,000 for Members of Congress, there is no doubt that the compromise amount to be agreed on by the conference committee will be in excess of what we are being asked to vote upon today.

Mr. President, this is only a beginning; it only lays the groundwork for what will come in the near future. I feel sure that an increase in the salaries of administrative assistants will next be sought. As a matter of fact, if the House bill should be adopted, there is already a provision included to raise the salary of committee clerks from a ceiling of $11,646 to as much as $14,000. If that salary should be adopted for committee clerks, Senators can rest assured that it will be a pattern for the salary of administrative assistants and others.

Mr. President, it does seem unjust for us to be raising the salaries of Members of Congress by 125 percent since 1946, as I have just indicated, and then refuse to raise by a reasonable sum the salaries of all the clerks who work in Congress and the many fine men and women who are employed by the executive departments, and instead give them a raise of from 5 to 6 percent. I think it is unfair, Mr. President, and I shall not be a party to such a procedure.

This is no time to set a precedent for the unreasonable raising of Government salaries. Our national debt today is $278 billion. Eighteen months ago, when the debt was only $267 billion, I pointed out that it would take all 96 Senators a total of 46 years to count our debt if each Senator counted at the rate of 2 one dollar bills every second—46 years of continuous counting. Eighteen months have passed since that time, and our Nation's debt has increased to the point where it would now take 48½ years for all 96 Senators to count it, if each Senator counted at the rate of 2 one dollar bills every second.

Mr. McCLELLAN. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. BARKLEY in the chair). Does the Senator from Louisiana yield to the Senator from Arkansas?

Mr. ELLENDER. I yield.

Mr. McCLELLAN. What does the Senator's amendment propose with respect to salaries of Federal judges?

Mr. ELLENDER. If I am successful in having the suggested increase reduced to 33 percent over present salaries, I shall offer amendments to bring about a proportionate decrease with respect to all categories of positions included in the bill.

Mr. McCLELLAN. Why does not the Senator offer an amendment which would carry that proposal all the way through in the bill? I would be inclined to support the amendment if it fixed all the increases in proper proportion, but I would not be in favor of singling out Members of Congress and disregarding provisions in the bill to increase the salaries of others.

Mr. ELLENDER. I assure my good friend from Arkansas that if I am successful in having the Senate adopt my amendment, I shall immediately propose amendments to reduce proportionately the increases proposed in the salaries of all Federal judges, as well as the Speaker of the House and the Vice President, so that their increases would be in the same proportion as those fixed for Members of Congress.

Mr. McCLELLAN. I thank the Senator for his explanation. I feel about the situation as I have stated.

Mr. ELLENDER. It is my purpose to offer amendments as I have stated.

Mr. McCLELLAN. I believe there should be a uniform increase or no increase at all. I shall support such a proposal.

Mr. ELLENDER. Mr. President, as is well known, for almost 8 years I fought the construction of a new Senate Office Building. Last year Congress decided to have it built. I wish to point out that the erection of the building will result in an additional annual maintenance cost to the taxpayers equal to $10,000 for each Senator. In 1940 the appropriations to operate the whole Senate, including salaries, amounted to $3,936,986. In 1946, at the time the Reorganization Act went into effect, the cost increased to $8,443,002. This year, 1955, the total amount of money appropriated to operate the Senate, including salaries and all other expenses, is $14,665,223.

If there be added the funds which will be necessary to operate the new Senate Office Building, as well as funds to pay for the increases in salaries that are authorized in the pending bill that $14,665,000 annual cost will climb to almost $20 million every year. Mr. President, that is unconscionable, particularly when we consider the condition of the National Treasury. So it is my hope that the Senate will adopt my amendment.

As I have said, if the Senate should vote for an increase in congressional salaries as recommended by the committee, just as surely as God made red apples bills will be introduced to increase the salaries of all clerks, administrative assistants, and everybody else connected with the Senate. If what is now proposed is done, we cannot refuse to increase their salaries. That would also apply to every employee in the executive departments, should their representatives appear before Congress and request reasonable increases in salaries based on whatever the increase in cost of living has been. We could not in good conscience refuse to increase their salaries if we voted ourselves a salary increase of 50 percent, or a total increase of 125 percent since 1946.

Mr. MORSE. Mr. President, will the Senator yield?

Mr. ELLENDER. I yield to the Senator from Oregon.

Mr. MORSE. That argument would also apply, would it not, to the proposal to increase the salaries by 33⅓ percent?

Mr. ELLENDER. It would, yes. I wish to state to my good friend, the Senator from Oregon, that if I thought an effort to confine an increase in salaries to the proportionate increase in the cost of living—which is 14 or 15 percent or a total increase in salary of about $2,100—would be successful, I would make an effort to have such an increase put into effect. However, I am a practical man and I am doubtful that I would be successful in any such attempt, so I am asking that the increases be 33⅓ percent rather than 50 percent.

Mr. President, I am very hopeful that the amendment will be adopted.

Mr. DIRKSEN. Mr. President, will the Senator from Tennessee yield 5 minutes to me?

Mr. KEFAUVER. I yield 5 minutes to the Senator from Illinois.

Mr. DIRKSEN. Mr. President, the proposal of the Senator from Louisiana reminds me somewhat of the story of a proprietor of a fish market who had taken a piece of chalk and scrawled on a large blackboard the words "Fresh fish for sale here today." A friend of his came along and said, "Why do you say 'fresh'? If they were not fresh, you

would not sell them." So the proprietor scratched out the word "fresh." His friend then said, "if they are not for sale here today, then when are they for sale?" So the proprietor wiped out the word "today." Finally, by logic, he wiped out everything except one word, and the billboard just contained the word "fish."

Mr. President, each amendment must be considered in relation to what has happened to the bill thus far. A commission was appointed to study the subject; it took evidence, which is comprised in about 700 pages of testimony, and finally the commission recommended that the salaries be fixed at $27,500. The House committee took testimony, and it recommended that the salaries be fixed at $25,000. The Senate committee took testimony, and it recommended that the salaries be fixed at $22,500. My esteemed friend from Louisiana now proposes to further decrease the recommendations and fix the salaries at $20,000. If there should be about one more amendment of this character, and it should be adopted, we might just well write the word "fish" and then we would be right back where we started, and would have wasted all this time just to have the bill brought before the Senate.

The premise of my friend the Senator from Louisiana is wrong in one respect. He goes back to 1946. Why does he not go back to the base period of 1939? While there was an increase under the Reorganization Act of 1946, it was a token increase and did not reflect the devaluation or depreciation of the dollar one bit. If my friend will examine the report he will find that, despite those increases, the value of the dollar at present levels is still, on the average, behind the 1939 level in terms of purchasing power. So, if the proposed increase is voted for, the salaries will still be $200 below the 1939 level. If that level is good for farmers, if that level is good for persons on the Federal payroll, if that level is good for the Federal Reserve System, then certainly it is good for us. I trust, therefore, that the Senate will not mangle the bill, after all the work that has gone into it, and that the amendment of the Senator from Louisiana will be very respectfully voted down.

Mr. KNOWLAND. Mr. President, will the Senator from Tennessee yield me 1 minute?

Mr. KEFAUVER. I shall be glad to yield the Senator from California 2 minutes.

Mr. KNOWLAND. I should like to address an inquiry to the distinguished Senator from Louisiana. He mentioned the fact that he had opposed the construction of the new Senate Office Building, and had been opposed to it for about 8 years. I differed with the Senator from Louisiana, because I think it is important for the legislative arm of the Government to have ample facilities to conduct the public's business. However, is it not correct that the cost of construction of that building will now be about 33⅓ percent more than the amount for which it could have been built 8 years ago? Is it not true that if it had been built at that time it would have resulted in a saving of about 33⅓ percent?

Mr. ELLENDER. No. The cost to construct the building today is about the same as it would have been 2 or 3 years ago, when it was proposed. In fact, the same amount has been asked for.

Mr. PURTELL. Mr. President, will the Senator from Tennessee yield for a brief comment?

Mr. KEFAUVER. I yield 2 minutes to the Senator from Connecticut.

Mr. PURTELL. I was not present to hear the colloquy completely, but I might say, in connection with the new Senate Office Building, we are informed that the costs for its construction will be approximately 23 percent higher, because 3 or 4 years elapsed since the figures were originally developed, and costs are higher today.

Mr. KEFAUVER. Mr. President——

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. KEFAUVER. On page 3 of the committee report Senators will see that the salaries proposed by the Senate bill for Members of Congress, district judges, and all other officers covered by the bill are less by $5,000 than the salaries recommended by an unbiased commission which was appointed by the President, the Chief Justice, the Speaker, and the Vice President. At the time they met the Segal commission members did not have any preconceived idea as to what the salaries should be. But they made a thorough survey of agriculture, labor, business, and the professions, to determine what men and women serving in like positions were being paid. If Members of Congress were to be treated similarly, their salaries would be $5,000 above the salaries provided for in the pending bill. So a substantial reduction has already been made.

Mr. President, I submit that salary increases for Members of Congress come only at infrequent intervals. It is true that the pending bill provides for a substantial increase over the salary provided in 1946. But, Mr. President, between 1939 and 1946 there was substantial inflation and a substantial increase in the amount of taxes. Thus, as the Senator from Illinois [Mr. DIRKSEN] has pointed out, and as will be seen by examining page 10 of the report, if the salary of a Member of Congress is increased to $22,500, the purchasing power of that salary, thus coming to a Member of Congress, will be less than the purchasing power a Member of Congress had from his salary in 1939.

Mr. ELLENDER. Mr. President, will the Senator from Tennessee yield to me?

Mr. KEFAUVER. I yield for a question.

Mr. ELLENDER. Mr. President, I ask that the time required for my question be taken out of the time available to me, inasmuch as I believe that 4 minutes' time is still available to me.

Mr. KEFAUVER. Very well.

Mr. ELLENDER. Is it not a fact that when the salaries of Members of Congress were increased in 1946, as a result of the recommendations of the Commission which was then appointed under authority of Congress, the Commission took all those matters into consideration, in recommending a salary of $12,500, plus a $2,500 allowance for an expense account which would not be subject to income tax?

Mr. KEFAUVER. Yes, the La Follette-Monroney Commission did at that time take that into consideration. But, undoubtedly, at that time—in view of the increase in the cost of living over the cost of living in 1939—if the desire was to keep up with the increased cost of living, the salary provided for should have been greater.

Mr. President, Congress is always reluctant to raise its own salary, and Congress was reluctant at that time. So, merely because Congress did not, in 1946, provide for what it was entitled to—and the Senator from Louisiana will recall that at that time a great deal was said to the effect that Congress should be fair with itself in the matter of its salary—and merely because Congress did not receive justice then, is no reason why Congress should not receive minimum justice now.

Mr. President, I suppose that if the Members of the Senate on the Democratic side of the aisle were to select the man whom they most highly respect—although, of course, we respect all our Democratic Members—a man who is conservative in his judgment, and certainly whose every act has always been in the best interest, as he has very conscientiously felt, of the Nation, the unanimous choice would be the distinguished senior Senator from Georgia [Mr. GEORGE]; and if a similar process were gone through, in the case of the Members on the Republican side of the aisle, the distinguished senior Senator from New Hampshire [Mr. BRIDGES] would similarly be selected from among the Senators on that side of the aisle, or at least he would be among the 2 or 3 who would be selected. These two distinguished Senators have given consideration to this problem. I am sure that the conclusion they reached was a conservative one, in accordance with their nature, and that they considered the situation of the Federal budget and considered what is best for the Federal Government. So, I should like to call the attention of the Senator from Louisiana to Senate bill 540, introduced by the senior Senator from Georgia [Mr. GEORGE], for himself and the senior Senator from New Hampshire [Mr. BRIDGES]. That bill provides for salaries for Members of Congress and for district judges in the amount of $22,500—or, in general, the exact salaries which are provided for in the pending measure.

Mr. President, it is true that there will be requests for increased compensation for the employees of the Federal Government; and, as a matter of fact, such increases in some amount have already been recommended by the President. Bills have been introduced, both on behalf of the administration and on behalf of others, to give salary increases in varying amounts to the employees of the Federal Government. Regardless of whether the pending bill is passed or is not passed, as a matter of equity there will undoubtedly be provided some increased compensation for Federal employees.

I should like to point out to the Members of the Senate that even if we take

1946 as a starting point—and, as I have said before, congressional salaries were low when they were fixed in 1946—the increases already allowed to Federal employees since 1946 amount to more than 50 percent. When the other increases are granted, as they will be during this session, they will amount to much more than 50 percent.

The increase to $22,500, recommended by the committee and by such distinguished Senators as the senior Senator from Georgia [Mr. GEORGE], and the senior Senator from New Hampshire [Mr. BRIDGES]—to whose bill I have referred—will grant to Members of Congress an increase of only 50 percent, which will be less than the overall percentage increase the Government employees have received since 1946.

Mr. KNOWLAND. Mr. President, will the Senator from Tennessee yield to me?

Mr. KEFAUVER. I yield.

Mr. KNOWLAND. Mr. President, I had not intended to speak at this time. But when the Senator from Louisiana [Mr. ELLENDER] made his statement, I felt constrained to speak. He said, I believe, that $14 million would be the cost of running the Senate as a part of the legislative arm of the Government, as compared with a considerably lesser amount under the LaFollette-Monroney Act.

First of all, I wish to say that the amount of $14 million for the total operation of the Senate figures out at approximately two-thousandths of 1 percent—0.00021542—of the budget of $67 billion for the fiscal year 1954. It seems to me that the American people, as the stockholders of this great corporation, the Government of the United States, would not feel it unreasonable for the Congress of the United States to be properly compensated and to have an adequate staff and adequate facilities, so that this great legislative arm of the Government—which, under the Constitution, is a coequal branch—might be able to perform its duties in connection with the present enormous governmental structure.

I wish to say to the Senator from Tennessee—and I speak somewhat feelingly on this matter—that during the 83d Congress we lost 9 Members of this body, or almost 10 percent of our membership. Very few persons are aware of the tremendous burdens a United States Senator carries. A Senator does not have a vacation from his job. When he goes home, his responsibilities then are as great, and his hours are as long, as when he is in the Nation's Capital, at Washington. I speak, not only for myself, but I am confident I speak also for my colleagues on both sides of the aisle, when I say that it is very seldom that I, representing in part the second largest State in the Union, do not spend a 12-hour or a 14-hour day, working on the problems before the Senate. I know that Senators from the smaller States are also faced with the same problems.

I do not think the Senate should be merely a rich man's club. I do not think a United States Senator should have to have additional income, in order to be able to serve the people of his State or the people of the Nation.

Any person should be able to serve in the Senate of the United States, even if he does not have a cent of other income, and when it is considered that Senators must maintain two homes a great extra burden of expense is added to the office. Certainly any citizen should be able to serve his State as a United States Senator and should be able to carry the heavy responsibilities of that office. However, there is not one Member of this body who does not know that, in addition to the trips home which from time to time Senators must make, the total job, with the multifarious responsibilities Senators are called upon to assume, constitutes a burden which very few in private life are asked to carry.

Mr. KEFAUVER. Mr. President, I appreciate the remarks of the Senator from California, the minority leader.

The Congress of the United States has the highest responsibility when it comes to making the laws governing the Nation. The body having the highest responsibility in connection with the interpretation of those laws is the Supreme Court of the United States. Who can say that the responsibility of translating public opinion into public policy, in the form of legislation, is not of equal importance to that of interpreting laws after they have been made? So, on that basis, the work of a Member of Congress is comparable to that of a Justice of the Supreme Court of the United States, rather than to that of a district judge.

The PRESIDING OFFICER. The time of the Senator from Tennessee has expired.

Mr. KEFAUVER. Then, Mr. President, let me close by saying that all we are requesting in this case is the same salary that we are requesting for district judges.

I hope the amendment proposed by the Senator from Louisiana [Mr. ELLENDER] to the committee amendment will be rejected.

The PRESIDING OFFICER. The Senator from Louisiana is recognized.

Mr. ELLENDER. Mr. President, how much time have I remaining?

The PRESIDING OFFICER. The Senator from Louisiana has 2½ minutes remaining.

Mr. ELLENDER. Mr. President, I wish to make a correction of an answer I gave to the distinguished Senator from California [Mr. KNOWLAND] in respect to the cost of the new Senate Office Building. The building will cost less than the original estimates, as I have indicated; but that is due to the fact many of the trimmings have been eliminated. So far as the cost of the office building as a whole is concerned, it will be about the same as when the question of its construction was first submitted to the Senate.

Mr. PURTELL. Mr. President, will the Senator yield?

Mr. ELLENDER. I yield.

Mr. PURTELL. Not only will the trimmings be eliminated, but a very substantial portion of the building, the central portion, will not be constructed, because the building as originally designed would have cost 23 percent more than the authorization.

Instead of coming to Congress for a new authorization, we have actually reduced the size of the building quite substantially. Therefore, not only have the trimmings been cut out, but the whole central portion of the building has been eliminated.

Mr. ELLENDER. Mr. President, a moment ago I cited the figures on the increased cost of operating the Senate in order to demonstrate how the cost of Government has increased year by year. I should like to place in the RECORD at this time a table which indicates how the cost of operating the Senate has increased from 1940 to 1955.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Senate appropriations, including salaries of Senators, by fiscal years

1940	$3,936,986
1941	4,128,884
1942	4,153,374
1943	4,400,585
1944	4,605,005
1945	4,882,103
1946	6,360,385
1947	8,443,002
1948	11,218,625
1949	11,895,698
1950	11,507,772
1951	12,424,781
1952	12,850,183
1953	13,406,396
1954	14,491,768
1955	14,665,223

SENATE APPROPRIATIONS

June 30, 1946 (last full fiscal year before Legislative Reorganization Act)	$6,360,385
Fiscal year 1955	$14,665,223
Amount of increase, 1946–55	$8,304,838
Percent increase, 1955 over 1946	129

Mr. ELLENDER. Mr. President, as I indicated a short time ago, if the bill is passed, just as sure as I am speaking, within the next few months efforts will be made to increase the salary of every employee on the Hill. If we vote these increases for ourselves, we will not, in good conscience, be able to refuse other salary increases.

Let us be reasonable, Mr. President. Every cost-of-living estimate which has recently been used as a yardstick for measuring salary increases for Members of Congress goes back to 1939. I contend that the real base we should use is not 1939, but 1946. That is the last time we voted a salary increase, and that increase was approved in the light of a thorough study made by a duly constituted commission acting under authority of the Congress. In 1946, the present salary levels were deemed ample, and were so approved. Living costs have gone up only 14 or 15 percent since that time. Yet, we are being asked to increase our salaries by 50, not 15, percent. I believe it would be morally wrong for us to do so, Mr. President. The amount I have suggested in my amendment is ample; as a matter of fact, I frankly consider it more than enough, but I know full well that it is the only amount which has a chance of approval. Let us save the American taxpayers the difference; let us not set a precedent for

sweeping increases for all employees on the Hill, as well as employees of the executive branch.

The PRESIDING OFFICER. The time of the Senator from Louisiana has expired. All time for debate has expired.

Mr. CASE of South Dakota. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. CASE of South Dakota. Is an amendment to the Ellender amendment in order?

The PRESIDING OFFICER. It is in order.

Mr. CASE of South Dakota. I offer such an amendment and ask that it be stated.

The PRESIDING OFFICER. The clerk will state the amendment of the Senator from South Dakota to the amendment of the Senator from Louisiana.

The LEGISLATIVE CLERK. In the Ellender amendment to the committee amendment, it is proposed to strike out the figure "$20,000" and insert in lieu thereof the figure "$17,500."

SEVERAL SENATORS. Vote! Vote!

Mr. CASE of South Dakota. It is my understanding that the language in the bill does not affect the so-called $2,500 expense allowance.

Mr. KEFAUVER. Mr. President, will the Senator yield?

Mr. CASE of South Dakota. I yield.

Mr. KEFAUVER. The bill would repeal the $2,500 allowance.

Mr. President, I was going to make a point of order against the amendment, but I shall withhold it for the present.

The PRESIDING OFFICER. The Chair inquires whether the Senator from South Dakota offers his amendment to the Ellender amendment.

Mr. CASE of South Dakota. I offer it as an amendment to the Ellender amendment, to strike out the figure which the Senator from Louisiana proposes, namely, $20,000, and insert in lieu thereof the figure "$17,500."

Mr. KEFAUVER. Mr. President, I make the point of order that the amendment is not germane and is in the third degree.

The PRESIDING OFFICER. The point of order is overruled. The amendment is germane.

Mr. CASE of South Dakota. I assume that the committee amendment is being considered as original next. If so, my amendment is an amendment in the second degree.

Mr. KEFAUVER. Mr. President, will the Senator yield?

Mr. CASE of South Dakota. I yield.

Mr. KEFAUVER. The Senator from South Dakota is mistaken about his statement with regard to the $2,500 allowance. That expense allowance is stricken in the bill.

Mr. CASE of South Dakota. The bill strikes it out?

Mr. KEFAUVER. That is correct.

Mr. CASE of South Dakota. I accept the Senator's statement on that point, and I am glad to have it in the RECORD. However, I feel that the Senate must consider the entire legislative picture. If the bill should pass in the form in which it is presented by the committee, or even as it might be amended by the Ellender amendment, the percentage of the increase would be larger than that which we will be asked to pass on in connection with bills dealing with salary increases for Federal employees. If the bill is passed in the form in which it has been reported by the committee, I believe it will plague the Senate during the consideration of other pay legislation proposed at this session of Congress.

I recognize the fact that there has been a change in the cost of living and that because of the increase in the cost of living a dollar today will not buy as much as a dollar would buy in 1939 or in 1946. However, the increase that is recommended is a very substantial one. For that reason I believe the Senate should have an opportunity to vote on my proposal. I do not believe it is necessary to labor the point, because the issue is very simple. Therefore, I ask for a vote on my amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from South Dakota [Mr. CASE] to the amendment offered by the Senator from Louisiana [Mr. ELLENDER].

The amendment was rejected.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Louisiana [Mr. ELLENDER].

The amendment was rejected.

The PRESIDING OFFICER. The bill is still open to amendment.

Mr. MORSE. Mr. President, I call up my amendments lettered "A" and "C," and ask unanimous consent that they may be considered together.

The PRESIDING OFFICER. The Secretary will state the amendments, which, without objection, will be considered en bloc.

The legislative clerk proceeded to state the amendments.

Mr. ELLENDER. Mr. President——

The PRESIDING OFFICER. For what purpose does the Senator from Louisiana rise?

Mr. ELLENDER. I ask unanimous consent that the Senate reconsider the vote on my amendment. I was not in the Chamber when the Senate voted.

The PRESIDING OFFICER. The Chair will say to the Senator from Louisiana that the Senator from Oregon has the floor and has offered amendments, which are being stated.

Mr. MORSE. Mr. President, I am very glad to accommodate the Senator from Louisiana.

The PRESIDING OFFICER. Without objection, the Senator from Oregon will yield the floor temporarily.

Mr. MORSE. I yield the floor for the purpose of having the Senate reconsider the vote by which it rejected the amendment offered by the Senator from Louisiana.

Mr. ELLENDER. Mr. President, I was called out of the Chamber a moment ago. I thought the Senator from South Dakota [Mr. CASE] would speak for 15 minutes. When I returned to the Chamber I was informed that my amendment had been voted down. I ask unanimous consent that the Senate reconsider the vote by which it rejected my amendment.

The PRESIDING OFFICER. The Senator from Louisiana asks unanimous consent that the vote by which his amendment was rejected be reconsidered.

Is there objection? The Chair hears none, and the vote by which the amendment offered by the Senator from Louisiana was rejected is reconsidered. The Chair recognizes the Senator from Louisiana.

Mr. ELLENDER. Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is the request sufficiently seconded?

The yeas and nays were not ordered.

Mr. ELLENDER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ELLENDER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ELLENDER. Mr. President, I again ask for the yeas and nays on my amendment.

The yeas and nays were not ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Louisiana to the committee amendment.

The amendment to the amendment was rejected.

Mr. MORSE. Mr. President, I renew my unanimous-consent request that my two amendments, designated "2–21–55–A" and "2–21–55–C," be considered en bloc.

The PRESIDING OFFICER. The clerk will state the amendments offered by the Senator from Oregon.

The CHIEF CLERK. On page 8, after line 23, it is proposed to insert the following:

SEC. 4. (a) The paragraph under the heading "Contingent Expenses of the Senate" in Public Law 479, 79th Congress, as amended (2 U. S. C. 46c), relating to long-distance telephone calls for Senators made to and from the District of Columbia, is amended by striking out "90" and inserting "100," and by striking out "450" and inserting "500."

(b) The paragraph in such act (2 U. S. C. 46d) relating to long-distance telephone calls for Senators originating and terminating outside of the District of Columbia is amended by striking out "$1,200" and inserting "$1,320."

(c) The number of minutes of official long-distance telephone calls, and the aggregate number of words on official telegrams, allowed each Member of the House of Representatives, Delegate, and Resident Commissioner is hereby increased by 10 percent.

(d) The amounts authorized for airmail and special delivery stamps for Senators, the President of the Senate, Members of the House of Representatives, the Speaker, the majority and minority leaders, and the majority and minority whips, of the House of Representatives are hereby increased by 10 percent.

In the other amendment, identified as "2–21–55–C," it is proposed on page 7, line 25 (in the provision relating to sal-

aries of Members of Congress) to strike out "$22,500" and insert "$12,500."

On page 8, strike out lines 3 to 5, inclusive (which repeal provisions of law relating to expense allowances of Members of Congress), and on page 8, line 6, strike out "(c)" and insert "(b)."

On page 8, after line 23, insert the following:

SEC. 4. The aggregate amount authorized to be paid as basic compensation for administrative and clerical assistance and messenger service in the office of each Senator, and for clerk hire in the office of each Representative in Congress, each Delegate from a Territory, and the Resident Commissioner from Puerto Rico, is hereby increased by 10 percent.

On page 9, line 1, strike out "Sec. 4" and insert "Sec. 5."

The PRESIDING OFFICER. The Senator from Oregon asks unanimous consent that the two amendments be considered en bloc.

Mr. DIRKSEN. Mr. President, I intend to submit a point of order against amendment "A" and against a portion of amendment "C"——

The PRESIDING OFFICER. Is there objection to the request of the Senator from Oregon? The Chair hears none, and it is so ordered.

Mr. DIRKSEN. Mr. President, I wish to submit my point of order.

The PRESIDING OFFICER. The Senator may proceed.

Mr. DIRKSEN. Mr. President, amendment A undertakes to amend the public law relating to contingent expenses of the Senate, and deals with telephone calls, airmail stamps, and so forth.

The pending bill deals only with the salaries of judges and of Members of the House and Senate. Therefore, I submit, Mr. President, that under the unanimous-consent agreement entered into on Monday of this week, the amendments are not germane to the pending bill.

Mr. MORSE. Mr. President, I should like to be heard on the point of order.

The PRESIDING OFFICER. The Senator from Oregon may proceed.

Mr. MORSE. Mr. President, I submit that the amendment is germane because it deals with the question of incomes of Senators and salaries of Senators, and it suggests an increase in expense allowances in lieu of an increase in salary. Therefore, the expense item would be perfectly germane to the question of a salary increase. It proposes that office expenses now paid out of the pockets of many Senators shall be paid for by the taxpayers, and, in that sense, it is a substitute for the proposal to increase congressional salaries and is in lieu thereof.

I respectfully submit that the amendment is quite germane to the subject matter of the proposed legislation which is before the Senate.

The PRESIDING OFFICER. The Chair thinks it is a rather close question, but the amendment does deal with the amount, directly and indirectly, which Senators receive. Therefore, the Chair thinks the point of order should be overruled.

Mr. MORSE. Mr. President, I shall be very brief in my remarks on the amendment, because I made my major speech against the pending bill last Monday. I stand upon the arguments set forth in that speech. I summarize only a part of the speech by pointing out that, in my judgment, the fiscal problem which really confronts Members of the Senate in regard to which they are entitled to financial relief is the problem of the expenses of the office in carrying out senatorial duties, which expenses to a degree are now paid out of the pockets of Senators.

In my amendment, for example, Mr. President, I seek to increase the allowance for secretarial help, because there are many of us—I do not know how many—who pay each year out of our own pockets money which goes into the payment of salaries of secretaries whom we hire and have to hire to do the secretarial work of our office over and above the allowance permitted by the official budget.

I do not see the Senator on the floor at this time, but I understand that 1 of our colleagues, who is a very wealthy man, employs from 6 to 7 extra secretaries whom he pays himself, and even rents office space to accommodate them in a private building.

We also pay out of our own pockets each year a considerable sum for air mail stamps, telephone calls, and telegrams in connection with our official expenses. Each year many of us pay out of our own pockets a substantial sum of money to carry on the work of our offices, which should be paid by the Federal Government. I think if we took care of that problem, we would be dealing with the real financial problem which confronts Members of the Senate, rather than the salary problem.

I went into the subject in great detail last Monday. However, I am a stark realist, and I am very much aware of the tempo of the Senate in regard to this proposed legislation. Nevertheless, Mr. President, I want to raise my voice in a final plea that we stop, look at, and consider the equities of the situation. If we do, we shall not vote for a salary increase but for an increase in the expense allowance to our office so that we can do the official senatorial business for our constituents which they do not expect us to pay for out of our own pockets.

I mentioned last Monday the matter of telephone calls. Sometimes persons call us by long distance telephone collect. They feel they should be allowed to do so, because it is in connection with official business. They have a passport problem. It is an emergency to them. What do we do? We go to work at once, because they pay taxes for us to go to work at once on the problem.

We get down to the State Department, as I have on several such cases, and find that the constituent forgot to submit a pertinent fact. So we pick up the long-distance telephone, call the constituent, and get the additional information. Sometimes we may be able to solve his problem to his satisfaction. But when we go into the record of our expenses we find that many of us are out of pocket each month through the spending of a telephone calls in the official work of the Senate, over and above the amount the Government allows. Likewise we find it necessary to pay considerable sums for telegrams, and for airmail stamps.

I think a realistic approach to the problem is by way of voting ourselves the money which is needed to do the official work of the office, not by way of voting ourselves a salary increase which, in my judgment, for the reasons I stated last Monday, cannot be justified on the record.

As I suggested then, I am not at all moved by the argument about the high cost of living for Senators in Washington, D. C., particularly when it comes from someone who is paying $400, $450, or $500 a month rent to live in a swank hotel.

I think we should stay close to the people. Such Senators ought to get back to modest living conditions. I think if we do, we will have a better understanding, in many instances, of the people's needs.

Mr. President, I call attention to a document I hold in my hand called Economic Indicators, February 1955, Prepared for the Joint Committee on the Economic Report by the Council of Economic Advisers. If Senators want to see the plight of our employers, if Senators want to see the plight of our bosses, the consumers of America, let them take a look at the table appearing on page 28 and see what has happened to the total consumer credit outstanding in this country.

What has happened to the so-called total consumer credit outstanding in this country, starting with 1939 and continuing through December 1954?

The table starts with $7,222,000,000 in 1939. In December 1954, there was $30,125,000,000 outstanding in consumer credit. This means that our bosses do not have the cash today to pay as they go. Our bosses today, the consumers and voters of America, do not have the money in order to meet the fiscal problems which confront them today.

I cannot bring myself to vote for a 50-percent increase in my salary when I know what the salary problem of my bosses happens to be today. But my bosses, I am satisfied, are perfectly willing to have us vote for the expense allowances needed to transact official senatorial business for our constituents and to pay for the operations of our offices, subject to auditing and subject to public accounting, and subject to full public disclosure—and there is no substitute for public disclosure.

Thus I offer this amendment, as I shall a few more, which seeks to approach the problem from the point of view from which I think it should be approached, namely, supplying ourselves with the money necessary to transact the people's business in our offices. Let us give ourselves enough money with which to pay those expenses, subject, of course, to public audit and check.

Mr. President, I ask unanimous consent to have printed at this point in

the RECORD the table I have referred to, appearing on page 28 of Economic Indicators, February 1955.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

CONSUMER CREDIT

Consumer credit outstanding rose $900 million in December to reach a new record. The increase was due largely to a seasonal rise in charge account credit. For the year 1954 as a whole, installment credit extended was $1 billion below that in 1953, while repayments were $2.2 billion higher.

[Millions of dollars]

End of period	Total consumer credit outstanding	Instalment credit outstanding					Noninstallment credit outstanding		Installment credit extended [3]	Installment credit repaid [3]
		Total	Automobile paper [1]	Other consumer goods paper [1]	Repair and modernization loans [2]	Personal loans	Total	Charge accounts		
1939	7,222	4,503	1,497	1,620	298	1,088	2,719	1,414		
1944	5,111	2,176	397	791	119	869	2,935	1,517	4,894	4,854
1946	8,384	4,172	981	1,290	405	1,496	4,212	2,076	8,495	6,785
1948	14,411	8,968	3,054	2,842	843	2,229	5,443	2,713	15,540	13,267
1949	17,104	11,516	4,699	3,486	887	2,444	5,588	2,680	18,002	15,454
1950	20,813	14,490	6,342	4,337	1,006	2,805	6,323	3,006	21,256	18,282
1951	21,468	14,837	6,242	4,270	1,090	3,235	6,631	3,096	22,791	22,444
1952	25,827	18,084	8,099	5,328	1,406	3,851	7,143	3,342	28,397	24,550
1953	29,537	22,187	10,341	5,831	1,649	4,366	7,350	3,411	30,321	26,818
1954	30,125	22,467	10,396	5,668	1,616	4,787	7,658	3,518	29,304	29,024
1953: November	28,760	21,907	10,404	5,587	1,645	4,271	6,853	2,931	2,355	2,214
December	29,537	22,187	10,341	5,831	1,649	4,366	7,350	3,411	2,696	2,416

The PRESIDING OFFICER. The question is on agreeing en bloc to the amendments to the committee amendment offered by the Senator from Oregon [Mr. MORSE].

Mr. DIRKSEN. Mr. President, will the Senator from Tennessee yield to me 7 or 8 minutes?

Mr. KEFAUVER. I yield 8 minutes to the Senator from Illinois.

Mr. DIRKSEN. Mr. President, I wish to make clear to the Senate that I am taking this time to make the record in order and to indicate that the distinguished senior Senator from Oregon has suffered an interesting change of heart since he discussed this matter at length on the Senate floor in 1951.

First, let us go back to his remarks on Monday of this week. He said then:

The first point I wish to make is that, in my judgment, Members of Congress are now well paid. In my opinion, they are paid all they are worth.

Now the Senator from Oregon presumes to offer an amendment to increase the amount for clerk hire and to increase the stamp and telephone allowance, and so forth, but to let the salary stand where it is at present.

The Senator from Oregon further said on Monday:

I think $15,000 a year, which is what we really receive, $12,500 and the so-called expense allowance of $2,500, is a good salary for the job.

The Senator from Oregon belabored this question in September 1951. I refer him to his own remarks on the floor of the Senate. He said:

My colleagues will take judicial notice of the fact that even on a $15,000 salary, including the $2,500 expense allowance which, as my friend from Delaware said, was really passed by us well knowing at the time that what we were doing was incorporating it into a salary item in the name of a nontaxable, nonaccountable expense allowance, it is impossible to do the job if one has family obligations and if one has the responsibility of sending children to school, which is true of most of us. Certainly it cannot be done on a salary of $15,000 a year. What is being done, Mr. President? The Members of the Senate who find that the salary check at the end of the month constitutes their primary source of income must find other sources of income.

Mr. President, that was not the junior Senator from Illinois speaking; that was my oracular friend from Oregon speaking. He continued:

There are quite a number of us who find ourselves in that position. The Senate is not yet a rich man's club.

The Senator from Oregon in his speech in 1951 further said:

Even then most of us find that a serious illness within our family would put us in the red. Therefore, some of us engage in lecturing. Some participate legitimately in law practice on a State basis not involving Federal questions. Some of us find it necessary to continue legitimately with commercial enterprises. It just happens to be one of the economic realities of serving in the Senate. I am perfectly willing in the spirit of the confessional to say that if during the year I did not average at least two speeches a month with an honorarium, I could not economically serve in the Senate of the United States.

The Senator from Oregon then said:

I must average about $750 over and above the amount of the money I get from my senatorial check to meet expenses.

If I am any good at arithmetic, $750 a month is the equivalent of $9,000 a year. Yet my friend from Oregon said he could not do the job unless he added $9,000 to his income by making speeches—and he is very able and very adept at doing that. That is something that all Members of the Senate, I suppose, including perhaps the junior Senator from Illinois, with his feeble talents, cannot say.

But $15,000 and $9,000 total $24,000. So the Senator from Oregon said to the Senate that he could not do the job unless his income was $24,000 a year. The pending bill provides for only $22,500.

Is it not strange that my friend from Oregon blows hot one time and cold another? The proposal he offers is a rather slender, weak, feeble substitute. If he was right in 1951, he is wrong now; if he is right now, then, of course, he was wrong at that time. So where does he stand? Does it take that amount of money to do the job? If it does, then the Senator from Oregon is as wrong as punch today, and his amendment ought not to be before the Senate.

I am not unmindful of the fact that the Senator from Oregon said on Monday that he had reexamined the matter and that on more mature analysis he thought he would change his mind. But no amount of mind changing can change the figure of $750 a month which he submitted in 1951; $750 a month is the equivalent of $9,000 a year which, added to the present salary, makes $24,000 a year.

The Senator from Oregon cannot be wrong on the facts. He can change his mind, but he cannot be wrong on the facts. He made those representations to the Senate in 1951.

On that basis, he came before the Senate on Monday, when he edified us with a disquisition on the social and economic theories of Justice Brandeis, William Howard Taft, and the Fair Labor Standards Act, and told us:

The first point I wish to make is that, in my judgment, Members of Congress are now well paid. In my opinion, they are paid all they are worth.

That statement does not deserve the credence of the Senate; and the amendment of the Senator from Oregon should be rejected overwhelmingly.

Mr. MORSE. Mr. President, how much time have I remaining?

The PRESIDING OFFICER. The Senator from Oregon has 8 minutes remaining.

Mr. MORSE. I desire to speak about 2 minutes in reply to my friend from Illinois. I always enjoy an argument with the Senator from Illinois.

Mr. DIRKSEN. It is in the best of spirit.

Mr. MORSE. It always is, and my reply will be, too.

When I appear for final judgment before the Pearly Gates, and it is to be decided which way I am to be sent, I shall say to St. Peter, "If you want my record, go to the junior Senator from Illinois, and to his research department, because he tries to keep up with my record." But the sad thing is that the Senator from Illinois is always taking things out of context, just as he has done today in the very friendly argument with which he has engaged me.

In 1951, before I had studied this problem thoroughly, I thought the approach to it should be by way of a salary increase of $5,000 or $10,000. But also I have always taken, from the very beginning, the position that it is the official expenses of the office that should be paid for by the taxpayers. I have never taken the position that a Member of the Senate should not earn legitimate income on the outside, if he finds it necessary to do so in order to support his family to his liking. But never have I taken the position that I endorsed any specific bill calling for any specific increase in salary for Members of the Senate, in 1951 or any other time. I have never been a party to a legislative proposal for any specific increase in salary, and I suggest that the Senator from Illinois get his research department to inquire into that aspect. I did say in 1951 that I thought we should have a salary increase, but as early as 1952 I had changed my mind and said so on various occasions. I also said in 1951, and I repeat now, that we should not have any of the official expenses of the office taken out of our own pockets. It is true that I constantly have to make money on the outside, and I happen to do it by way of lecturing. Some persons do it by way of legal practice, some by writing, some have enough money invested so that they cut coupons; but I do it principally by way of lecturing in order to be able to pay extra official expenses, as well as political expenses that go along with the job.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. MORSE. I yield myself 2 additional minutes.

I have to earn extra money in order to pay political expenses of the office, because I was never the recipient of very much financial political support by party organizations during my 8 years in the Senate, except on one occasion when my good friend from Illinois was very helpful in assisting me with a campaign contribution in 1950 when he was chairman of the Republican Senatorial Election Committee. I appreciated that assistance then, I appreciate it now, and I shall appreciate it in 1956, if the Senator can do likewise. [Laughter.]

I wish to say that, although the Senator from Illinois has tried to point out some great inconsistency in the theory with which I have approached the problem raised by the pending bill, I have always maintained that the first step was to see to it that the official expenses of the office were covered by the official budget. Even in 1951 when I favored a salary increase I stressed my feeling that expenses of the office should be paid by the Government and not by the Senator.

I repeat as I said Monday, and the Senator from Illinois has alluded to it, there was a time when I thought there should be an increase in salary; but I never reached any final conclusion as to what it should be. I have studied the matter since. I am very proud of the fact that I am capable of changing my mind on the basis of facts as they are presented to me. I take no pride in fixed opinions, as some of my colleagues seem to do, because I owe it to the people of my State to change my mind in the last 5 minutes of debate if the debate convinces me that my previously held opinion was an erroneous one. I see no virtue in holding to a wrong opinion in the name of consistency.

Mr. President, I close by saying that there is not the great inconsistency which the Senator from Illinois has tried to point out. I have been standing for years in favor of payment of expenses of the office subject to audit and disclosure. There was a time when I thought there should be an increase in salary, but I never reached any final conclusion as to what the amount should be. After a little study of the problem I recognized that a 50-percent increase in salary could not be justified.

Mr. DIRKSEN. Mr. President, will the Senator from Tennessee yield me about 3 minutes?

Mr. KEFAUVER. Mr. President, how much time have I remaining?

The PRESIDING OFFICER. The Senator from Tennessee has 8 minutes remaining to him, and the other side has 4 minutes remaining to it.

Mr. KEFAUVER. I yield 4 minutes to the Senator from Illinois.

Mr. DIRKSEN. Mr. President, I am glad I had the opportunity to assist my friend from Oregon. I trust I shall have opportunity to do so again in the future. I shall pray over the political future of the Senator from Oregon in the hope that he may come back to his native Republican heath in due course.

I may not have the best, most thorough research department in the world, because I have to do so much of the research myself, but I allude to the statement of the distinguished Senator from Oregon that he has made no salary proposal. Let us take a look at the RECORD. I now quote from the Senator's remarks:

> I think we should join at once with the Senator from New Hampshire—

Meaning the distinguished Senator from New Hampshire [Mr. BRIDGES]—

> in facing the question of how much we should increase congressional salaries—

That was not the junior Senator from Illinois talking; that was the distinguished, profound, and scholarly Senator from Oregon. He went on—

> knowing very well the kind and variety of expenses we meet. I do not know whether $22,500 is the proper figure or whether $20,000 is the proper figure—

I remind my colleagues that this was 4 years ago.

The distinguished Senator from Oregon continued:

> But I am satisfied that we cannot justify a figure less than $20,000 if we are going to be fair to our constituents and if we are going to relieve ourselves of some of the extra burdens we have to assume in order to meet the expenses of a Senator's job.

If that is not pretty specific, then I never have seen anything specific.

Mr. MORSE. Mr. President, will the Senator yield?

Mr. DIRKSEN. Not less than $20,000, said the Senator from Oregon.

Mr. MORSE. Will the Senator yield?

Mr. DIRKSEN. Today he is over on the other side of the fence.

Mr. MORSE. Will the Senator yield to me?

Mr. DIRKSEN. I yield with pleasure.

Mr. MORSE. Has the Senator from Oregon become a cosponsor of any bill for a salary increase? Did he ever cast a vote or join in a report favoring a salary of $20,000? Or did the Senator from Oregon do no more than agree with the Senator from New Hampshire during a general debate on the legislative appropriation bill in 1951 that at that time he thought we should have a salary adjustment? As I recall the incident no specific legislative proposal was before us calling for a salary increase but we were discussing on the floor of the Senate whether we ought to increase our salaries. The debate was not based on a specific proposal but was a general debate that just developed out of a discussion of points that had been raised in connection with an appropriation bill dealing with other subjects. As I indicated Monday, I at that time thought there should be an increase in salary, but I don't recall that at any time was I in favor of increasing the salary to $20,000. I do not have the record before me. If I indicated I would favor a $20,000 salary I was mistaken. I alluded on Monday to what I said in the RECORD. As I said Monday, there was a time when I felt we ought to increase our salaries, but when I came to study the problem of choosing between increasing salaries or increasing expenses, I decided the thing to do was increase the allowable expenses. I reached that conclusion in 1952 after a careful study of the whole problem.

Mr. DIRKSEN. Mr. President, will the Senator yield me 1 minute of his time?

Mr. MORSE. I shall yield the Senator the remainder of my time.

Mr. DIRKSEN. The Senator from Oregon, on the floor of the Senate in the course of the debate, stated that not less than $20,000 would do. That was his minimum. At the time he also indicated he could not get along unless he had an income of at least $9,000 a year from lecturing fees. If one adds the $20,000 and $9,000, he will see the suggestion of the Senator from Oregon was so far above the level that has been recommended by the Committee on the Judiciary that I think the Senate should very properly, on the basis of the Senator's earlier statement of opinion, vote this amendment down overwhelmingly.

Mr. MORSE. Mr. President, will the Senator yield?

Mr. DIRKSEN. I am yielding on the Senator's time now.

Mr. MORSE. I should like to receive back just a half minute. Of course, when the Senator adds the $20,000 amount and the $9,000 figure, he does my record an injustice. What I was talking about was trying to earn about $9,000 over and above my Senate salary in order to take care of the official expenses of my office and to take care of additional family expenses that I found I had in putting three girls through college plus additional political expenses. I do not take the position and never did that all of that should be paid for out of the Senate salary paid by the taxpayers of the country. I have never argued that a Senator's salary should cover political expenses. Neither have I argued that it should be large enough to cover living standards far above the average. Neither have I argued that a Senator should not supplement his salary with legitimate outside income. If the Senator will read the whole statement I am sure he will reach that conclusion.

Mr. DIRKSEN. I read the whole speech. I always read what the Senator from Oregon says. Apparently what he is saying today, and what he said in his speech on Monday, is that even though the limit of salary should be $15,000, it would take a great deal more than that to do the job. Therefore, a Senator should go abroad, make speeches, and gather in honorariums whenever he could—and the bigger the better—in order to supplement his income. Is that good policy for public service? I am not so sure. I, myself, receive occasional honorarium. When I do I am delighted to have it. I would not deny my friend from Oregon such opportunities, because I think, with his brilliant forensic ability he can edify the country. When he stands on a platform he can do things for people in the way of provoking their thinking. And all power to him. But to take the position which he took Monday and today, Mr. President, is to say, "Here is the clear limit of the salary. To supplement it you must resort to some other line of endeavor or have a personal income." That in itself is not good philosophy, Mr. President.

I hope, therefore, in good course, with high felicity, we can overwhelm the amendments of the Senator from Oregon.

The PRESIDING OFFICER. The question is on agreeing to the two amendments of the Senator from Oregon, which, by unanimous consent, will be voted on en bloc.

The amendments were rejected.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. MORSE. Mr. President, I call up my amendment identified as 2-21-55-E.

The PRESIDING OFFICER. The clerk will state the amendment.

The CHIEF CLERK. It is proposed by Mr. MORSE (for himself and Mr. NEUBERGER) on page 8, after line 23, to insert the following:

SEC. 4. The Secretary of the Senate and the Clerk of the House of Representatives shall cause to be printed in the CONGRESSIONAL RECORD within 15 days after December 31, and June 30 of each year the name, position, and total salary of each person employed by the Senate and House of Representatives during the period covered by the report. The first such report shall cover the period beginning on January 1, 1955, and ending on June 30, 1955, and succeeding reports shall cover the 6 months' period ending on the preceding June 30 or December 31, as the case may be.

On page 9, line 1, strike out "SEC. 4." and insert "SEC. 5."

Mr. KEFAUVER. Mr. President, against this amendment to the committee amendment, I make the point of order that it deals with matters which have no relationship to the salary of Senators and Representatives, but, instead, is in reference to the salaries of employees of the Senate and the House of Representatives.

So far as I am concerned, I think there is room for considerable argument pro and con in regard to this matter; and perhaps I would be in favor of the intent of this amendment to the committee amendment. However, as chairman of the subcommittee, it is my duty to protect the pending bill. Therefore, I respectfully submit that the amendment of the Senator from Oregon to the committee amendment is not germane to the bill.

Mr. MORSE. Mr. President, I think the point of order is well taken. Therefore, I withdraw the amendment, with the understanding that at a later time I shall introduce it as a separate bill.

The PRESIDING OFFICER. The point of order is sustained.

Mr. MORSE. Mr. President, I now call up the amendment identified as "D," which is submitted on behalf of my colleague [Mr. NEUBERGER] and myself; and I ask that it be stated.

The PRESIDING OFFICER. The amendment to the committee amendment will be stated.

The CHIEF CLERK. In the committee amendment, on page 8, after line 23, it is proposed to insert a new section as follows:

SEC. 4. (a) The second sentence of section 162 (a) of the Internal Revenue Code of 1954 (relating to deduction of living expenses by Members of Congress) is amended by striking out "$3,000" and inserting in lieu thereof "$5,000."

(b) The amendment made by this section shall apply only with respect to taxable years beginning after December 31, 1954.

On page 9, line 1, it is proposed to strike out "Sec. 4. The" and in lieu thereof insert "Sec. 5. Except as provided in section 4, the."

Mr. MORSE. Mr. President, I shall be brief in explaining the amendment. It is in line with my theory in amendments "A" and "C" dealing with the expenses of Senators, rather than with increases in their salary.

Mr. President, as I said last Monday, it is common business practice for the Bureau of Internal Revenue to allow businessmen and corporations and business houses a deduction for the extra living expenses they incur outside their home towns. As we know, there are a great many business houses that maintain in the city of Washington year-around apartments which are used by their traveling officials, and for which the corporations receive tax deduction allowances.

The matter of maintaining two homes, as I pointed out in my speech on Monday, constitutes a heavy expense upon Senators; and I think the allowance I now propose is a legitimate one; and I believe that this item should be considered in the same classification as the allowance to businessmen who receive similar deductions.

Let me say to the Senator from Illinois that my amendment to the committee amendment is in line with the position I took in 1951, namely, that I believe we should do something about the official expense items of Senators. This amendment is in line with my theory that the expenses incurred in performing the official functions and services of Senators in their official capacity should be paid for by the taxpayers. The amendment would increase the allowance from $3,000 to $5,000. Of course, the expenses would have to be proven, Mr. President; there would have to be an accounting. The deduction would not be allowed without proof.

That is all I have to say regarding the amendment, except, while I am on my feet, to say that I shall withdraw my amendment "B," because in my judgment it is subject to the same point of order as the one which has already been raised by the Senator from Tennessee [Mr. KEFAUVER]. At a later time I shall introduce the amendment as a separate bill. The amendment constitutes, of course, the proposal I have made for many years in the Senate, namely, that there be a public accounting and a public report on all the sources of income of Members of Congress and of other Federal officials who receive salaries of $10,000 or more a year, because, again, I say on this point—as I said a few moments ago—that there is no substitute for public disclosure. But I would quite agree with the point of order that I know the Senator from Tennessee is planning to raise, namely, that the amendment would be out of order in connection with this particular bill.

However, my amendment providing for increasing the exemption from $3,000 to $5,000 in the matter of the living expenses away from home is in order, I submit; and I ask for a vote on it.

Mr. KEFAUVER. Mr. President, I know that when the Senator from Oregon submitted this amendment to the committee amendment, he had in mind that his amendments to lower the salary would be adopted. But, as the matter now stands, this amendment to the committee amendment would actually increase the possible benefits which Members of Congress might receive, rather than reduce them, by increasing the deduction for living expenses in Washington.

Mr. President, as chairman of the subcommittee. it is my duty to oppose amendments reducing the amount. Therefore, I must, likewise, oppose amendments which would increase the compensation.

Mr. MORSE. Mr. President, will the Senator from Tennessee yield to me, to permit me to make an observation?

Mr. KEFAUVER. I yield.

Mr. MORSE. Of course, we have not yet passed the bill. I never give up hope. I hope that if we can be successful in having this amendment to the committee amendment agreed to, we shall then be able to obtain favorable consideration of, at least, an amendment calling for a reduction in the 50 percent salary increase, which the bill itself would allow.

The PRESIDING OFFICER. The question is on agreeing en bloc to the amendments of the Senator from Oregon to the committee amendment. [Putting the question.]

The amendments to the committee amendment were rejected.

The committee amendment is open to further amendment.

Mr. THYE. Mr. President, to the committee amendment I offer my amendments identified as "B."

The amendments submitted by Mr. Thye to the committee amendment are as follows:

On page 7, between lines 18 and 19, insert the following:

"SEC. 2. (a) Section 508 of title 28, United States Code, is amended to read as follows:

"'§ 508. Salaries

"'The Attorney General shall fix the annual salaries of United States attorneys, assistant United States attorneys, and attorneys appointed under section 503 of this title within the following limitations:

"'United States attorneys—not less than $12,000 or more than $20,000; and

"'Assistant United States attorneys and attorneys appointed under section 503 of this title—not less than $6,000 or more than $15,000.'

"(b) The salaries of United States attorneys and assistant United States attorneys for the districts of Alaska, Canal Zone, and the Virgin Islands are subject to the provisions of section 508 of title 28, United States Code.

"SEC. 3. (a) The compensation of the Deputy Attorney General shall be at the rate of $21,000 per annum.

"(b) The compensation of the Solicitor General shall be at the rate of $20,500 per annum.

"(c) The compensation of each Assistant Attorney General, other than the Administrative Assistant Attorney General, shall be at the rate of $20,000 per annum."

On page 7, line 19, strike out "SEC. 2." and insert "SEC. 4."

On page 8, line 10, strike out "SEC. 3." and insert "SEC. 5."

On page 9, line 1, strike out "SEC. 4." and insert "SEC. 6."

Mr. THYE. Mr. President, the amendments which I have offered to S. 462 are in line with the provisions of H. R. 3828, as adopted by the House of Representatives, and would increase the salaries of United States district attorneys from $15,000 to a maximum of $20,000 per annum, with a minimum of $12,000. In the case of Assistant United States Attorneys, the amendments provide for a maximum of $15,000 and a minimum of $6,000.

It should be noted that these increases are permissive, and would depend upon the requirements and work of the district attorney's office involved.

In connection with offering these amendments, I wish to draw attention to the report of the House Committee on the Judiciary, as follows:

The committee noted that if our courts are to function adequately, not only should the salary of the judges be increased, but those of the United States attorneys and their assistants should likewise be increased.

The Department of Justice has stated that it has encountered difficulty in obtaining and retaining qualified lawyers in those positions.

The Government is entitled to the best legal representation it can obtain, and such representation necessitates adequate salaries.

The salaries recommended are less than that which the type of lawyer the Government should have representing it would merit in private practice.

In line with the same considerations, my amendments would also increase the salary of the Deputy Attorney General from $17,500 to $21,000, and that of the Solicitor General from $17,500 to $20,500. In the case of the Assistant Attorneys General, the increase would be from $15,000 to $20,000.

Mr. President, I strongly feel that these increases are justified, and that they should be included in the bill under consideration. In the early years, as I understand, it was a common practice, when fixing the compensation for district attorneys and their assistants, to take into consideration the fact that they could maintain their law practice, and thus could afford to have a somewhat modest salary arrangement. However, that is not the present situation; today a district attorney is forbidden to practice law or to be affiliated with a law firm.

Therefore, Mr. President, if the bill we are now considering is to become law, I think it should specifically provide that district attorneys shall have a salary increase commensurate with that given the other judicial positions covered by the bill.

Mr. President, I shall not ask for the yeas and nays on the question of agreeing to my amendments to the committee amendment; but let me state that I have not heard anyone express any specific objection to the amendments. I believe them to be very good amendments, and I believe they should be accepted by the committee.

Mr. WATKINS. Mr. President, will the Senator from Minnesota yield to me?

Mr. THYE. I am delighted to yield.

Mr. WATKINS. The matter the Senator from Minnesota has just mentioned, in connection with his amendments was specifically considered by the subcommittee when the evidence was being taken on the main bill. After due consideration, we reached the conclusion that although there was no doubt that the district attorneys and the others the Senator from Minnesota has mentioned should be given a salary increase, there was not before us any evidence regarding what the increase should amount to. Therefore we felt that that matter should be left to some other time, when a study could be made or a hearing could be held in regard to that subject, and we could then determine what salary increase should be made.

There was no opposition to providing such an increase; but we were without specific information which would have justified fixing the salaries. Under those circumstances, we rejected any amendment providing for an increase for district attorneys. I believe that is the subject of the Senator's amendment.

Mr. THYE. That is correct. I will say that since the introduction of the pending bill and since the matter has come to my attention, and because the bill as reported by the Committee on the Judiciary is silent with reference to district attorneys, assistant district attorneys, and deputy attorneys general, I looked into the matter and found that we would be as much justified in giving consideration to increases in their salaries as we would be in giving consideration to raising the salaries of judges.

A Federal judge is appointed for life. After his appointment he is no longer concerned about his position in life or about his vocation. On the other hand, a district attorney is subject to the will of the administration in power. He may hold office for 4 or 8 years, and then must proceed to seek some other type of professional employment, or he must establish himself in his own law practice. If we are to have the best type of lawyers seek appointment to such positions, we must pay them in accordance with the same principle we use in fixing the salaries of judges.

For that reason I believe my amendments are entirely proper. I believe it was an oversight by the Committee on the Judiciary that these officers of Government were not included in the bill at the time the committee considered the bill. The House bill does contain a provision for them. However, the Senate bill is silent on the subject. I believe the amendments are desirable and should be adopted.

Mr. KEFAUVER. Mr. President, I believe the district attorneys are entitled to be considered in legislation establishing adequate salaries. At the time the bill was reported by the full Committee on the Judiciary, I stated that such consideration certainly should be given to them. I said I hoped it could be done by this Congress.

However, they are not alone in their status. There are many other officers in the executive department—and district atorneys are in the executive department, of course—who deserve such consideration. The bill before the Senate deals only with members of the judiciary, aside from dealing with Members of Congress. There are other officers in the executive department who are also entitled to consideration.

Furthermore, Commissioners of the Court of Claims have appeared before our committee. Some witnesses have appeared on behalf of referees in bankruptcy, as well. Our unanimous conclusion in committee was that we should limit the pending bill entirely to the officials whose salaries were considered by the Segal Commission. District attorneys were not considered. There was no testimony before the Segal Commission about increases in their cost of living.

Therefore, I respectfully ask that we deal in this bill only with Members of Congress and members of the judiciary. If we start to bring in others in the executive department, there is no telling what amendments might be offered.

The district attorneys certainly will be considered in due time. I ask that the amendment be rejected.

The PRESIDING OFFICER. The question is on agreeing to the amendments offered by the Senator from Minnesota [Mr. THYE] to the committee amendment. Without objection, the amendments will be acted on en bloc.

The amendment to the amendment was rejected.

The PRESIDING OFFICER. If there be no further amendment to be offered, the question is on agreeing to the committee amendment.

The amendment was agreed to.

The PRESIDING OFFICER. Under the unanimous consent agreement, the Senate will proceed to the consideration of the companion House bill, H. R. 3828, which the Secretary will state by title.

The CHIEF CLERK. A bill (H. R. 3828) to adjust the salaries of judges of United States courts, United States attorneys, Members of Congress, and for other purposes.

The PRESIDING OFFICER. Under the unanimous consent agreement, the House bill, H. R. 3828, is deemed to be amended by striking out all after the enacting clause and inserting the text of Senate bill 462, as amended; and the engrossment of the amendment is deemed to be ordered, and the bill read a third time.

Under the unanimous consent agreement, 1 hour of debate on the bill is in order.

Mr. KNOWLAND. Mr. President, will the Senator from Tennessee yield?

Mr. KEFAUVER. I yield to the Senator from California.

Mr. KNOWLAND. Because several Senators have spoken to me about it, I now ask for the yeas and nays on the final passage of the bill.

The yeas and nays were ordered.

Mr. KEFAUVER. Mr. President, I yield 7 minutes to the distinguished Senator from New York.

Mr. LEHMAN. Mr. President, the pending bill is a difficult one. I am fully aware that is raises a question on which reasonable men may reasonably differ. Yet I am also aware that one of the factors entering into consideration of the pending question is a political factor—what will the people say about our raising our own salaries?

This is indeed a most difficult kind of legislative problem to face. Yet there is no one in Congress but us who can face it. No one else can judge and decide the question of salaries to be paid to Members of Congress.

This is the kind of legislative problem which calls for qualities of both judgment and political courage. We must do what is right; what is, in our judgment, not only just, but in the best interests of the country.

There are, it is true, many of our fellow citizens, far too many, who today receive inadequate salaries, wages, and other income, in private industry, on our farms, in Government service, and by way of pensions and social-security payments.

I have supported, and shall continue to support, all reasonable measures for raising the level of wages, salaries, incomes, and social-security benefits. I believe with all my heart that the standard of living of many of our people is tragically insufficient. Many Government salaries are totally inadequate.

It is the duty and obligation of the Congress to do justice to all those who are on the Government payroll. It is the duty and obligation of the Congress to take whatever steps are necessary to raise the incomes and the standard of living of the underprivileged of our country, and to help those who are on fixed incomes—the pensioners and the aged on social security.

But to achieve these objectives, we need the best brains and best talent in Congress that the people can possibly select. There should be a salary level for Members of Congress that will not of itself restrain talented and capable men and women from becoming candidates for this high office. I believe the present level of congressional salaries does exactly that.

Mr. President, I believe most of my colleagues know that the proposed salary increase for Members of Congress is virtually meaningless, as far as I personally am concerned. I do not need, for my livelihood, the extra money proposed to be voted for each Member. My personal income is such that almost all of the proposed increase would be returned to the Government in the form of taxes.

I am very fortunate in this respect. The low level of the congressional salary has deprived me and my family of no comforts or conveniences. I enjoy what is called financial security and independence.

I am privileged to be able to spend a considerable sum each year, out of my personal income, for the expenses of my office, the better to serve my constituents.

There are few of my colleagues, however, who are able to do what I do. There are relatively few to whom the proposed increase in salary would not make a very significant difference in their own livelihoods.

I know that some of my colleagues are having the greatest difficulty in making ends meet, maintaining homes, as so many do, both here and in their home States. The expenses necessary to maintain the status and establishment of a Member of Congress are heavy. Few private citizens are subject to such expenses.

I do not think the public is generally aware of the fact that many Members of Congress are compelled to supplement their official salaries—just to meet their expenses and to maintain a reasonable standard of living—by paid lectures, by writing articles for magazines, and by practicing law or engaging in business. All of this takes time—time away from Washington.

I think it would be well if the congressional salaries were sufficient to enable Members of Congress to concentrate exclusively on their congressional duties and to be free of any sense of dependence upon lecture platforms, magazine articles, and professional or business connections. We all know that salaries of men holding comparable positions in industry and in the professions are much higher than those we receive here in Congress. Yet our burdens and responsibilities are as heavy as are those in any walk of life. In my judgment, they are heavier than most.

Of course I know there are compensations for public life, as compared with private life. The desire to serve the public—and the recognition that comes therefrom—are powerful lures. I suppose all of us here have succumbed to them.

However, I should like to point out that congressional salaries are substantially lower than those provided for comparable public positions in the executive branch of government, both Federal and State.

I think I can speak on this subject with some authority. I need to give only one example regarding which I am qualified to speak. I was Governor of New York during 4 terms—for 10 years. I have been a Member of the Senate for 6 years. It is my judgment that the duties and responsibilities of a Member of the Senate are certainly at least as heavy as are those of the governor of a large State such as New York.

Yet there is a vast difference in compensation, so far as New York State is concerned. The Governor of New York now receives a salary of $50,000 a year. That salary was authorized not only by statute, but by the vote of all the people in New York. In addition, he has the use of the Executive Mansion, a very commodious and comfortable house. He has a full staff of servants, who are paid for by the State. He has a chauffeur and two cars at his disposal.

I would judge that the salary and perquisites of the Governor of New York would amount, in the aggregate, to more than $75,000. Compare this amount with the $15,000 received by a United States Senator.

I believe the proposed salary increases, for both the Members of Congress and for the judges and other public officials proposed in this bill, are altogether fair and meritorious.

Despite the political dangers of which I have been warned, and despite the fact that the salary increase would mean very little to me personally, I feel that in good conscience, in justice to my colleagues, in fairness to the Congress, and in consideration of the best interests of the country, I must vote for the pending measure.

Mr. KEFAUVER. Mr. President, does the minority leader wish to yield any time?

Mr. KNOWLAND. Mr. President, unless there are Members on either side of the aisle who wish to address the Senate. Under the unanimous-consent agreement, I control the time in opposition to final passage. I have had no requests for time, and I am prepared to yield back my time unless there are Senators who desire to use the time.

SEVERAL SENATORS. Vote! Vote!

Mr. KNOWLAND. Mr. President, I yield back the time in opposition, assuming the Senator from Tennessee [Mr. KEFAUVER] is going to yield time on the

other side. If not, I feel that I shall have to reserve time in case any Senator desires to speak.

Mr. KEFAUVER. Mr. President, I yield myself one minute.

The PRESIDING OFFICER. The Senator from Tennessee is recognized for 1 minute.

Mr. KEFAUVER. Mr. President, on the basis of fairness and justice and on the basis of the best interests of the country, I feel that a good case has been made for the proposed increase in salaries. This conclusion has been reached by disinterested parties, by a commission composed of distinguished persons, by the Bar Association of America, by practically every bar association in the United States, and every organization which has expressed itself upon the subject. It is also the conclusion of the Hoover Commission, even though it went outside its jurisdiction in making the finding, that a salary of even much larger amount than that proposed by the bill would be in the best interests of good government, since it would provide for Members of Congress more nearly what they are entitled to, and would give them independence and afford them more time to devote to the public business.

So, Mr. President, I hope the bill will be passed by a large majority, so that we can take it to conference and do our best to work out the issues within the shortest time that may be possible.

I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on the passage of the bill. The yeas and nays have been ordered.

Mr. CLEMENTS. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. CLEMENTS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on the passage of the bill.

Mr. MORSE. Mr. President, have not the yeas and nays been ordered on the passage of the bill?

The PRESIDING OFFICER. The Senator is correct. The clerk will call the roll.

The legislative clerk called the roll.

Mr. CLEMENTS. I announce that the Senator from Minnesota [Mr. HUMPHREY] and the Senator from Florida [Mr. SMATHERS] are absent on official business.

The Senator from New Mexico [Mr. ANDERSON] is absent by leave of the Senate to attend the atomic energy tests in Nevada.

The Senator from Rhode Island [Mr. GREEN] is absent by leave of the Senate to attend the inauguration of the President of Cuba.

The Senator from Texas [Mr. JOHNSON] and the Senator from Massachusetts [Mr. KENNEDY] are absent by leave of the Senate because of illness.

I further announce that on this vote the Senator from New Mexico [Mr. ANDERSON], the Senator from Rhode Island [Mr. GREEN], the Senator from Texas [Mr. JOHNSON], and the Senator from Florida [Mr. SMATHERS], if present and voting, would vote "yea."

Mr. SALTONSTALL. I announce that the Senator from Indiana [Mr. CAPEHART] is absent on official business.

I also announce that the Senator from Iowa [Mr. HICKENLOOPER] is absent by leave of the Senate to attend the inaugural ceremonies of the President of Cuba.

The Senator from Maine [Mrs. SMITH] is absent by leave of the Senate.

The Senator from Wisconsin [Mr. WILEY] is necessarily absent.

If present and voting, the Senator from Maine [Mrs. SMITH] would vote "nay."

The result was announced—yeas 62, nays 24, as follows:

YEAS—62

A'ken	George	McClellan
Allott	Goldwater	McNamara
Barkley	Hayden	Millikin
Barrett	Hennings	Monroney
Beall	Hill	Murray
Bender	Holland	O'Mahoney
Bennett	Ives	Pastore
Bible	Jackson	Payne
Bricker	Jenner	Potter
Bridges	Kefauver	Purtell
Butler	Kilgore	Russell
Case, N. J.	Knowland	Saltonstall
Chavez	Kuchel	Schoeppel
Clements	Lehman	Scott
Cotton	Long	Smith, N. J.
Dirksen	Magnuson	Sparkman
Duff	Malone	Stennis
Eastland	Mansfield	Symington
Ervin	Martin, Iowa	Thye
Flanders	Martin, Pa.	Watkins
Fulbright	McCarthy	

NAYS—24

Bush	Ellender	Mundt
Byrd	Frear	Neely
Carlson	Gore	Neuberger
Case, S. Dak.	Hruska	Robertson
Curtis	Johnston, S. C.	Thurmond
Daniel	Kerr	Welker
Douglas	Langer	Williams
Dworshak	Morse	Young

NOT VOTING—10

Anderson	Humphrey	Smith, Maine
Capehart	Johnson, Tex.	Wiley
Green	Kennedy	
Hickenlooper	Smathers	

So the bill (H. R. 3828) was passed.

The title was amended so as to read: "An act to increase the salaries of justices and judges of United States courts, Members of Congress, and for other purposes."

The PRESIDING OFFICER. Without objection, Senate bill 462 will be indefinitely postponed.

Mr. KEFAUVER. Mr. President, I move that the vote by which the bill was passed be reconsidered.

Mr. HOLLAND. I move that the motion to reconsider be laid on the table.

The motion to lay on the table was agreed to.

Mr. KEFAUVER. Mr. President, I move that the Senate insist upon its amendments, request a conference with the House on the disagreeing votes of the two Houses thereon, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer (Mr. BARKLEY in the chair) appointed Mr. KEFAUVER, Mr. KILGORE, Mr. DANIEL, Mr. WATKINS, and Mr. WELKER conferees on the part of the Senate.

Mr. KEFAUVER subsequently said: Mr. President, in connection with the conference on House bill 3828, inasmuch as the names of the conferees on the part of the Senate have been announced, let me say that I am authorized to state that the Senator from Texas [Mr. DANIEL] and the Senator from Idaho [Mr. WELKER] desire to resign as conferees. I ask unanimous consent that they may be allowed to resign; and that the Senator from Mississippi [Mr. EASTLAND] and the Senator from Illinois [Mr. DIRKSEN] be appointed in their stead.

The PRESIDENT pro tempore. Is there objection to excusing the two conferees named by the Senator from Tennessee? The Chair hears none. Without objection, it is so ordered.

In lieu of the two Senators excused, the Chair now appoints the senior Senator from Mississippi [Mr. EASTLAND] and the senior Senator from Illinois [Mr. DIRKSEN] as conferees on the part of the Senate.

PROGRAM FOR FRIDAY

Mr. CLEMENTS. Mr. President, I desire to call attention to the program for Friday. It is the intention of the acting majority leader to call up on Friday Calendar No. 36, Senate Joint Resolution 42, to amend the National Housing Act, as amended.

Mr. KILGORE. Mr. President, will the Senator yield for a question?

Mr. CLEMENTS. I am glad to yield.

Mr. KILGORE. Is it the intention of the acting majority leader to have a session of the Senate tomorrow?

Mr. CLEMENTS. It is not.

Mr. KILGORE. The only reason I have asked the question is that I have set a hearing on the Harlan nomination for tomorrow morning at 10 o'clock. I wondered if the hearing might be continued throughout the entire day.

Mr. CLEMENTS. It is the hope of the acting majority leader that all committees will take advantage of the fact that there will not be a session of the Senate tomorrow, and that they will conduct such committee business as needs to be conducted at that time.

I also call attention to the fact that following the consideration of Senate Joint Resolution 42, which I have just mentioned, it is the intention to call up the treaties on the Executive Calendar, identified as Calendar No. 3, Executive D, the convention with Japan relating to taxes on income; Calendar No. 4, Executive E, the convention with Japan relating to taxes on estates, inheritance, and gifts; and Calendar No. 5, Executive G, the convention with Belgium relating to taxes on estates and successions.

THE IDEALS OF REPRESENTATIVE GOVERNMENT—ADDRESS BY SENATOR MORSE

Mr. MORSE. Mr. President, I ask unanimous consent to have printed in the body of the RECORD the text of an address I delivered before the Multnomah County Democratic Central Committee rally in Portland, Oreg., on the night of February 17.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

THE IDEALS OF REPRESENTATIVE GOVERNMENT

(Speech of Senator WAYNE MORSE at Multnomah County Democratic Central Committee rally, Portland, Oreg., February 17, 1955)

Mr. Chairman, fellow Oregonians, it is always good to be home. My trip back home this time has been for the purpose of carrying out a very solemn obligation which I feel I owe to all the people of Oregon. I wish to thank the Multnomah County Democratic Central Committee and the officials of the Democratic Party in Oregon for their invitation to use this forum tonight for a statewide discussion of some major political principles which support a political decision I now wish to announce. Today I registered at the Lane County Courthouse as a member of the Democratic Party.

THE PRINCIPLE OF REPRESENTATIVE GOVERNMENT

Ever since I have been in politics I have tried to keep faith with the abiding principle of representative government which has motivated my actions in the Senate of the United States. It is the principle enunciated by Edmund Burke in 1774, namely, that the primary obligation which an elected representative of a free people owes to his constituents is to keep faith with his gift from Providence—his conscience. It was this sound liberal principle of political philosophy which framed the Declaration of Independence and the Constitution of the United States.

As every student of American political science knows, our political rights as a free and self-governing people were forged into being in the furnaces of hot political debate. They were hammered out into organic law on the anvil of courageous independence of judgment exercised by constitutional fathers who were dedicated to the spiritual tenet that responsible men owe it to their fellowmen to keep faith with the dictates of their conscience. Students of the great constitutional debates which produced our organic charter of freedom know that this principle of representative Government was the generating force which reconciled many differences of opinion among the delegates to the Constitutional Convention. From this principle emerged our constitutional system of representative Government. Students of biography know that most of our constitutional fathers believed that as delegate-representatives of the colonists they owed the duty to follow the dictates of their conscience after thoughtful study of competing constitutional proposals.

THE OBLIGATIONS OF AN ELECTED OFFICIAL

Probably no man in his time epitomized this principle of representative Government more than Thomas Jefferson. However, the historic writings of most of our other constitutional fathers, such as George Washington, Benjamin Franklin, John Adams, John Dickison, Robert Morris, and James Madison all show that they did not believe that the elected representatives of free people served as hired men of political parties and political machines, but held their offices as the servants of a free people. They shared Burke's political principle of conscience when he said:

"It ought to be the happiness and glory of a representative to live in the strictest union, the closest correspondence and the most unreserved communication with his constituents. But his unbiased opinion, his mature judgment, his enlightened conscience, he ought not to sacrifice to you, to any man, or to any set of men living. These he does not derive from your pleasure: no, nor from the law and the Constitution. They are a trust from providence, for the abuse of which he is deeply answerable."

I respectfully say to the people of the State of Oregon tonight that this sound principle of representative Government is also the warp and the woof of the political faith of Thomas Jefferson, Abraham Lincoln, Theodore Roosevelt, Woodrow Wilson, and every other great liberal statesman, past and present, who has represented the American people throughout our history, either in executive or legislative position.

THE FUNCTIONS OF POLITICAL PARTIES

Let us not forget that when our representative Government came into being and for a considerable time thereafter, American politics were not organized on a political party basis. When political parties came into being they were not created for the purpose of dictating to the people's elected representatives what their votes should be on controversial issues. It was never considered at the beginning of our two-party system that party officials should turn the American political stage into a puppet show. Rather, it recognized the need for party organization if effective political campaigns were to be waged against ugly forces which were seeking advantages at the expense of the public interest. Political parties came into being because it was recognized by the people themselves that the voters needed party organizations in order to strengthen the hand and support the views of elected leaders. Political parties were organized in order to help administer and conduct effective campaigns against great economic combines that were organized in our country to take selfish economic advantage of the mass of our people. There is no question about the fact that the organization of political parties was in response to a people's movement, and not a political boss movement.

THE TWO-PARTY SYSTEM

As is to be expected in all human institutions, human frailties must be guarded against. Thus the history of political parties is a history of glorious ups and shameful downs. The total record of the two-party system has been a great record, because political assets have completely overbalanced political liabilities. When a political party housecleaning has been needed from time to time, the people have finally taken care of the dirt under the political rug.

Since about 1900 there has been a growing tendency of reactionary economic forces in our country to try to control political parties with party machines. It was against this evil that Teddy Roosevelt fought. There have been repeated attempts to propagandize the American people with the notion that some way, somehow, an elected official becomes the property of his political party.

To the contrary, when a man is elected to a political office he becomes the representative of all the people of his constituency, including those who voted against him, as well as those who voted for him. He takes the oath of office, as I did in 1945 and 1951, to uphold the Constitution of the United States—to uphold it in accordance with what a study of the merits of any given issue convinces him is right—not to uphold it in accordance with the interpretation and dictates of party bosses.

Reactionary propagandists have tried again and again during the last half century to convince the American people that so-called "party regularity" is synonymous with "party responsibility." This is a great fallacy. The highest order of party responsibility is to be found in the exercise of intellectual honesty by an elected official. Whenever an elected official compromises his intellectual honesty, he ceases to be politically responsible. Whenever he compromises what he knows to be a political principle in connection with any controversial issue, he becomes untrue to the political ideals of a sound two-party system in America.

Let me say at this point to the young people of Oregon I would have you always remember that the only practicality you will ever experience in your lifetime is but the practicality of an ideal put to work. Whenever anyone tells you that to be practical in politics you have to compromise your principles at least a little bit, let me tell you that such political sophistry is dangerous political subversion. To the voters of Oregon I would emphasize tonight that when one tries to convince you that doing the so-called expedient is sometimes necessary in politics, he is only trying to get you to swallow political corruption in the form of a sugar-coated pill. That has been true so many times in hours of crisis throughout our history. Therefore, it is of the utmost importance that we hold firm to the sound principle of not compromising our political ideals.

TRUE PARTY RESPONSIBILITY

I have tried to apply these principles to my work in the Senate of the United States. In the face of abuse and much criticism I have insisted upon serving the people of Oregon in the Senate as a freeman—free to exercise an honest independence of judgment on the merits of issues in accordance with the facts as I find them. This was the primary pledge I made to the people of Oregon in my candidacies for the Senate, both in 1944 and 1950—a pledge which I made in both the primary campaigns, as well as the general election campaigns. No Republican Party officials ever had the right to expect me to place so-called party policy above what I considered to be the best interests of my State and my country. I promised the voters of Oregon in both campaigns that I never would place partisanship above what I considered to be a matter of political principle. No Republican Party officials, State or national, ever had the right to assume that in the name of party regularity I would sacrifice my responsibility to the people of Oregon by voting a party line whenever I thought a so-called party policy was not in the public interest.

I have always held to the view that a political party should be big enough to welcome a divergence of opinion on specific issues. A political party should always be big enough to welcome minority views in respect to any party policy unless the dead hand of political reaction is to toll the death knell of the party. Such a tolling occurred once in our history, when reaction killed the Whig Party and the great Lincoln Republican Party arose as a third party movement from its ashes.

Throughout our history differences over great political issues determined the party labels which individual voters wore. It is a mistake for my critics to assume that I do not believe that political parties should stand for and take sides on the political issues of the day. I most certainly think that they should. One of the functions of any political party is to serve as an institute of political education. One of the primary obligations of a political party is to stand for a legislative program which it believes will best promote the general welfare. There certainly would be no incentive for party work if the activities of a political party were to be limited solely to administrative preparation for party conventions and elections. The legislative program and political principles of a party should be so specific that voters of like mind can join forces with enthusiasm under its banners.

However, whenever a political party in the name of party regularity demands that a representative elected under its label vote for legislation which he is convinced is neither in the best interests of his party nor of his country, then that representative has the clear duty of voting for what he believes is in the best interests of all the people of the State and of the Nation irrespective of party affiliation. One of the greatest evils

in American politics today is the growing practice on the part of too many politicians to let party officials and economic pressure groups tell them how to vote. That I have not done, and will not do under any party label. A Senator may vote on some occasions with a majority of his party colleagues and on other occasions with a minority of his party colleagues. It does not follow that when he votes with a minority that he is guilty of any party disloyalty, but to the contrary, he may seek only to stand for what he thinks is best for the public and to attempt to make a record that will lay a foundation for future action which will change the minority into a majority.

PRINCIPLE ABOVE PARTY

However, when an elected official in due course of political events finds himself consistently in a very small minority within his party, and finds himself unalterably opposed to major shifts in party policy which have developed during his term of office, then he comes face to face with the ethical obligation of following the sound advice of Woodrow Wilson when he said:

"I would not for a moment be understood as seeking to lend any color of justification to that most humiliating and degrading precept, 'Party, right or wrong.' This is the maxim of knaves, or of fools."

In the same vein Woodrow Wilson said:

"Is it the party, then, to which men of thought owe and pay allegiance? No. It is to the principles, of which party is the embodiment. The man, therefore, who adheres to any party after it has ceased to avow the principles which to him are dear and in his eyes are vital; the man who follows the leadings of a party which seems to him to be going wrong, is acting a lie, and has lost either his wit or his virtue."

I found myself confronted with that ethical problem in 1952 and acted accordingly, by resigning from the Republican Party. I have no regrets.

THE LIBERAL RECORD OF THE DEMOCRATIC PARTY

During the 2 years in which I have been an Independent, I have stated repeatedly that my future course of action would be dictated by what I believed would best advance the cause of liberalism in American politics.

In the 1954 campaign the Democratic Party of Oregon and its candidates presented their program honestly and forthrightly. They demonstrated that the Democratic Party is the party of liberalism. Their program is in the best interests of the independent farmers, small businessmen, working people, white collar, and civil service workers, indeed—the overwhelming majority of the people of Oregon.

Likewise, the economic program of the Democratic Party since the great depression has been in the best interests of the legitimate rights of big business as well. The Democratic Party has never been opposed to the predominant corporate structure of American business. It has only been opposed to the excesses and abuses of big business corporate practices which have attempted to thwart and exploit the economic welfare of our people. Thus the Democratic Party has a record of opposition to monopolistic control of industrial production by powerful financial combines. Under the Democratic administrations since the great depression many pieces of legislation have been passed which have protected the American consumers from exploitation by selfish economic interests, and at the same time have strengthened the competitive rights and advanced the economic opportunities of business—big and small.

It is not true that the Democratic Party is against business. To the contrary, its record is in staunch defense of enlightened capitalism manifested in private enterprise.

In fairness, let me say that there are millions of Republican and independent voters across our land, along with Democratic voters, who are ardent supporters of the major pieces of legislation dealing with economic problems which have been passed since 1932. The fact that most of this legislation has not been repealed is due largely to the bipartisan support it has received in and out of the Congress. In our own State of Oregon, there are large numbers of Republican and independent voters, as well as Democratic, who never hesitate to rise above party considerations when it comes to supporting individual candidates and specific legislative proposals. My own election to the Senate attests to that fact, and it is but one of many examples in the political history of our State. In fact, the voting of the people of Oregon for many years, is a convincing demonstration of a political phenomenon that most professional politicians seem to overlook—namely, that the average voter takes pride in the fact that first of all he is Mr. or Mrs. Independent Voter. The average American today is more devoted to political independence of judgment than to political partisanship. And in the interests of good government we should not want it any other way.

In the last campaign I supported and campaigned for the candidates of the Oregon Democratic Party because of our common belief in the necessity of a bipartisan program of international cooperation with the free nations, and a domestic program for constant expansion of economic opportunities and strengthening of the competitive private enterprise system.

It is my considered judgment that I can best contribute to such a program by working within the Democratic Party. That party, particularly in Oregon, has advocated policies, especially in the important area of comprehensive resource development, upon which the economic future of the Pacific Northwest depends. On these issues, the leadership of the Republican Party in Oregon has worked against the best interests of the people of Oregon as exemplified by participation and acquiescence in the attempted scuttling of the Hells Canyon Dam project.

THE UNSUCCESSFUL FIGHT FOR LIBERALISM WITHIN THE REPUBLICAN PARTY

While I was a member of the Republican Party I attempted, with the help and support of many Republicans in Oregon, to advance the cause of liberalism. Their unstinting and devoted efforts will always be remembered and appreciated. A number of these liberal Republicans have reached the conclusion that liberalism is stifled and thwarted by the Old Guard leadership of the Republican Party in Oregon. I came to this conclusion reluctantly but irrevocably in 1952.

For 8 years I received little help or encouragement from Republicans in the Senate in my efforts to further liberal legislation. During this period I did my utmost to cooperate with the Republican Party in the hope of advancing and strengthening the forces of liberalism within it. For example, in 1946 I was a member of the Republican senatorial campaign committee and worked actively for the election of candidates whose subsequent records did not support their reputations as liberals. In the 1948 campaign I made twice as many speeches on behalf of the Republican presidential candidate as any other Republican Senator.

It is well known that Republican Party leaders in May 1952 arranged to have me excluded from all Republican National Convention committees despite the fact that the Republican voters in the presidential primary had given me the second highest number of votes of the delegates elected. The then Republican national chairman, acting behind the scenes, participated in this move. At the Salem, Oreg., meeting of the convention delegation I was openly attacked by Republican leaders because I was supposedly "too liberal." It is clear that I was too liberal for the reactionary politicians who control the Republican Party in Oregon.

Nonetheless, I attended the Republican National Convention and did everything I could to promote the candidacy of General Eisenhower in the hope and belief that he would advocate progressive programs and rescue the Republican Party from its isolationist drift.

The convention platform was a grave disappointment to me and thousands of other liberal Republicans. It was disheartening to see the victorious Eisenhower forces embrace steamroller tactics to push through the nomination of Senator NIXON. At that time I was working with others to advance the candidacy of Senator SALTONSTALL of Massachusetts for the vice presidential nomination. We were told General Eisenhower wanted no nominee in competition to NIXON.

During the 1952 campaign, General Eisenhower's campaign tactics were increasingly disappointing. His Morningside Heights agreement with Senator Taft, in which Taft's program was embraced, made it clear that the Republican candidate's slogan was "anything to win."

Meanwhile, Adlai Stevenson was doing what he pledged to do: talk sense to the American people. As a matter of conscience I felt there was no alternative but to campaign for Governor Stevenson. This I could not do and remain in the Republican Party. Therefore I resigned.

In the last 2 years there has been repeated evidence that reactionary economic forces have taken over the Eisenhower administration and the Republican Party leadership on most domestic issues, and particularly in the field of natural resources.

THE DEMOCRATIC RECORD IN CONGRESS

On the other hand, the Democrats in Congress proved themselves responsible on foreign affairs and liberal on most of the key issues of domestic policy. It was with Democratic votes that the Bricker amendment was defeated. It was the fighting band of Democratic liberals who carried on the fight against the tidelands giveaway and for the Hill oil-for-education amendment. It was essentially the same group of Democrats who fought against the giveaway atomic-energy bill, and against authorization of the Dixon-Yates contract, and fought for improving provisions to the atomic-energy bill on patents, public generation of power from atomic materials and the preference clause in the marketing of such power. This group has worked for public power development and rural electrification throughout the country and especially in the Pacific Northwest. All but one of the cosponsors of my Hells Canyon bill in the last Congress were Democrats.

This is only a partial catalogue of the measures on which this band of liberals has distinguished itself and, more importantly, provided leadership and made significant gains for the people of the country and of Oregon. Other vital stands include the reciprocal-trade program, unemployment-insurance improvement, extension of social security—in which this group led the way—public housing, adequate loan facilities for small business, and firm supports for agriculture. It is this Democratic band that has fought the policies of scarcity that have characterized the Republican administration from early 1953 when the Treasury embarked on the tight-money program.

It is this group with which I have worked and which has worked with me on matters of special importance to Oregon and the Pacific Northwest. The Democrats in the Senate have made few votes party issues. But when they have, as in the case of the recommittal of the unfair, antilabor amendments to the Taft-Hartley Act and in support of increasing the personal income tax exemp-

tions, their stand has been sound and in the best interests of the country.

LIBERAL PROGRAM OF OREGON DEMOCRATIC PARTY

We see it on issue after issue in our State. For example, in this session of the State legislature, in the House 29 out of 31 Democrats supported a memorial calling for the building of John Day Dam as a federal project. In the Senate the Democrats were unanimous in opposition to the Republican Party's phony partnership scheme.

On many other occasions in the months ahead, I shall speak throughout the State in opposition to the Republican Party's attempt to sell the birthright of the people of Oregon and of the Pacific Northwest in our natural resources for a bowl of private utility monopoly pottage. Here is an issue between the parties which I am convinced will cause thousands and thousands of Republican and independent voters in our State to join forces with us in opposition to the sell-out of the people's best interests in our natural resources by both the State and the National Republican administrations.

There has developed a clear-cut and clean-cut cleavage between the Democratic leadership and Republican leadership in the State of Oregon, not only in the field of natural resources, but also on issues involving taxes, aid to education, labor, agriculture, old-age benefits, public health, and for that matter, almost every legislative issue which draws the political line of difference between protecting the general welfare on the one hand and yielding to economic and political reaction on the other.

There are those Republican leaders who try to fool the voters with the political slogan that they are liberal in human relations but conservative in economic policies. However, more and more voters are seeing through such political mumbo-jumbo. They know from personal experience, much of it sad and costly to them, that human rights and happiness cannot be separated from the economic welfare of the people. When people stop to analyze the political slogan traps of this Republican administration, both State and National, they know that the strength of our private enterprise system is dependent upon a broad and deep mass-purchasing power of all of our people. They know that the keystone of our constitutional system is that clause in the Constitution which dedicates our system of self-government to the promotion of the general welfare. They know that when the general welfare of the people is promoted by our Government through legislation which stimulates greater job opportunities for our workers and wider markets for our farmers, American business generally, including General Motors, is best served thereby.

CAN BEST SERVE PEOPLE OF OREGON WITHIN THE DEMOCRATIC PARTY

It is because I have become convinced that I can make my best contribution to a legislative program that will best serve the people of Oregon, and the Nation, under the banner of the Democratic Party that I now announce my intention to run for reelection to the Senate in 1956 as a Democrat.

As I made clear to Democratic leaders in Oregon months ago when I was first invited by many leading Democrats to join the Democratic Party, I felt I had no moral right to come into the Democratic Party unless such action met with the pleasure of State and local leaders of the party, as well as the clear sentiment of the rank and file membership of the party. Thus for many months past, I have attended a good many meetings of Democratic groups throughout the entire State where I was urged to come into the party. Likewise, an overwhelming majority of the Democratic leaders of the State have invited the decision which I have announced tonight. I want the leaders of the Democratic Party of Oregon, and the many members of the Party with whom I have talked or corresponded, to know that I deeply appreciate the cordial enthusiastic welcome which they have extended to me.

One of the reasons why I am pleased and proud to join the Democratic Party is that I look forward with enthusiasm to working with the liberal leadership of the Democratic Party in Oregon. We worked together in close harmony throughout the 1954 historic campaign which resulted in sending to the Congress of the United States two fine liberal Democrats from Oregon—Congresswoman EDITH GREEN and Senator RICHARD NEUBERGER. The splendid record which they are making in the Congress has already focused favorable attention on Oregon. DICK NEUBERGER has received the best committee assignments of any freshman Senator that I can recall during my 10 years in the Senate. Already, with his brilliance, he has pitched into the battle for the protection of our natural resources. EDITH GREEN has been appointed to the powerful House Committees on Education and Labor, and Interior and Insular Affairs.

She has been elected president of the 84th Congressional Club which is made up of Democratic Party newcomers to the House. Her background of experience in education has attracted the attention of the Democratic Party leaders of the House, and undoubtedly she will exercise great influence.

I wish to express a special word of appreciation to your national committeewoman, Mrs. Lillian Burton, and your national committeeman, Monroe Sweetland. These two Democratic Party leaders have devoted years of hard work to the building up of a program of Jeffersonian democracy in Oregon. Ever since he has been in the legislature, Monroe Sweetland has fought courageously to put into legislative practice the liberal principles which he has always urged within the party.

To the Democratic Party's very able State chairman, Howard Morgan, who led the party to victory in 1954, I want to say publicly what I have said to him privately. He has demonstrated to me time and time again that he places political principle above personal interest. He believes—as Woodrow Wilson put it—that a political party is the embodiment of a set of principles. Oregon democracy is greatly indebted to his leadership.

In accordance with my pledges to the people of Oregon in the campaigns of 1944 and 1950, and in keeping with the principles of representative government, reiterated in this speech tonight, I shall be proud to place my candidacy for reelection to the United States Senate on the Democratic ticket in 1956 in the hands of all the voters of Oregon. I shall campaign on my record, confident that when my fellow Oregonians come to evaluate it, both in retrospect and in perspective, they will endorse it.

I shall always be deeply appreciative of the high honor which the people of Oregon have bestowed upon me, and of the opportunity for public service which they have made available to me. It is my continued pledge to my fellow Oregonians that they can always count upon me to fight for what I think is in the public interest in accordance with the facts as they come before me in the Senate.

Only by dedicating myself to that pledge can my service in the Senate keep faith with the people of Oregon and the ideals of representative government.

Tonight I issue an enlistment call. I issue a call for enlistment in a great campaign fight of 1956. I ask Republicans and Independents and Democrats alike to join it, because in that great campaign of 1956 we are going to draw the line between a progressive campaign conducted by the Democratic Party with the support of Independents and Republicans by the thousands against the reactionary Republican machine that has for too long controlled politics in this State. I want to say to the people of Oregon tonight that I think they are going to select their Senator, and they are not going to have him selected for them by any purge movement that arises in the East, even though it comes out of the White House itself, because we are proud of the fact that in Oregon we, the people, run our own politics and no political machine runs it for us. I shall give you a campaign in 1956 if you want to join under the Democratic banner for a clean, hard-hitting fight that will protect the best interests of the people against the monopolistic combine that has taken over the Republican Party in the State of Oregon.

CONCERN OF CERTAIN CITIZENS OF OREGON ABOUT THE CONTROVERSY OVER FORMOSA

Mr. NEUBERGER. Mr. President, the tense military and political situation in the western Pacific continues to be a matter of great concern to many men and women in Oregon. I have received many letters expressing this concern and the hope that this Government will do everything possible to bring about a peaceful settlement of the present critical controversy over the Formosa area.

I ask unanimous consent to have printed in the body of the RECORD the text of a letter which a number of worried citizens of Oregon have sent to the President and to their congressional delegation.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

AN OPEN LETTER TO THE PRESIDENT OF THE UNITED STATES, AND TO ALL MEMBERS OF THE OREGON DELEGATION IN CONGRESS

We, citizens of Oregon, and most of us parents of sons and daughters who would be vitally affected, wish to protest against any action on the part of our Government which would result in a new war in the Far East.

We are particularly opposed to any stand by our Government which would block a cease-fire by insistence in holding onto Chinese off-shore islands, particularly the islands of Quemoy and Matsu. We believe it would be tragic to plunge this Nation into war defending a few rocks, 5 miles from the Chinese coast.

We believe that these islands should be evacuated, and that the future status of Formosa should be determined at a later date by the United Nations.

Heyman, Albany, Oreg.; Paul Youngman, McMinville, Oreg.; Frances Zielke, Salem, Oreg.; Francis Strong, Newberg, Oreg.; W. L. Creech, Salem, Oreg.; Pansy L. Shepherd, Aumsville, Oreg.; Edna O. Brown, Woodburn, Oreg.; Apolonia Beutler; Lloyd L. Beutler; C. G. Gilson, Amity, Oreg.; J. W. Simmons, Salem, Oreg.; Augustine A. Bender, Scio, Oreg.

PROPOSED FAMILY FARM DEVELOPMENT LEGISLATION

Mr. SPARKMAN. Mr. President, I introduce for appropriate reference, a bill to strengthen the Nation by preserving the family-size farm, providing additional credit for farm enlargement and development, improving the income-earning capacity and standard of living of low-income rural people, and for other purposes. I ask unanimous consent that I may speak briefly concerning the bill.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the Senator from Alabama may proceed.

The bill (S. 1199) to strengthen the Nation by preserving the family-size farm, providing additional credit for farm enlargement and development, improving the income-earning capacity and standard of living of low-income rural people, and for other purposes, introduced by Mr. SPARKMAN, was received, read twice by its title, and referred to the Committee on Agriculture and Forestry.

Mr. SPARKMAN. Mr. President, I have just introduced a bill to improve the earning capacity of low-income, rural citizens and to improve their standard of living.

I may add it is my understanding that a similar measure is being introduced in the House today by Representative PATMAN of Texas.

The measure I have proposed is intended to be a new step forward on a course this Nation has followed for the past 20 years—a course of positive action to make family farmers secure on their land, and to insure better standards of living in all of rural America.

Throughout our national history, except for very brief periods, we have recognized that a strong agriculture, with ownership widely spread among family operators, would add strength to the Nation. The earliest Congresses of the United States rejected proposals to sell off the public domain in million acre lots; they voted to make it accessible in tracts suitable to owner operation. They were aware that nations have declined as they became highly urbanized and as land became concentrated in the hands of the few in feudal patterns.

The Homestead Act, the reclamation law with its limitation on land holdings, and the limitations we have written into our modern agricultural conservation acts on benefits, are all manifestations of this consistent national policy of insuring our national strength by encouraging a prosperous family-type agriculture.

During the great depression of the early thirties, when virtually all farmers were faced with bankruptcy and foreclosure, we began to support agricultural prices. But we soon found that price support alone would not save all those who desired to remain on the land. Hundreds of thousands lacked know-how and credit to get into adequate production. So we established the Farm Security Administration to help rural citizens provide as much as possible of their own needs from the land, and to move on into commercial production if they had the competence to do so, aided by credit and technical assistance from their Government.

The Farm Security Administration, now the Farmers' Home Administration, has aided more than a million farm families, in some measure, to avoid liquidation, produce a subsistence from their land, and, in many cases, to become productive, commercial farmers.

Our second step to strengthen rural America was enactment of the Bankhead-Jones Farm Tenancy Act. Under that act, 80,000 worthy tenant farmers and veterans have been assisted in achieving farm ownership. As in the case of the Farm Security or Farmers' Home Administration, the use of a combination of loans and technical assistance have made this program highly successful.

Real progress has been made. In the 20 years from the 1930 census of agriculture to the 1950 census, we succeeded in raising the proportion of operator ownership of farmers by 16 percent from 56.7 percent in 1930 to 72.7 percent in 1950. Tenancy dropped correspondingly in the period, from 42 percent to 26 percent.

But despite the gains which have been made, the job of eliminating poverty in agriculture has not been completed. We have demonstrated that with a combination of loans and technical assistance, families that are otherwise unable to obtain credit can be lifted to self-sufficient, independent status with little immediate cost and with long-term gain. But there has never been sufficient authority or sufficient funds to reach thousands of farm families whose standards of living are unnecessarily below a minimum, adequate level.

The 1950 census enumerated 5,379,000 farms in the United States. The census enumerators would not even classify about one-third of these as commercial farms.

It eliminated 1,029,000 from its commercial-farm classification because the value of all products sold in the year was less than $250, and the operators did not have enough off-farm employment—100 days a year—to be regarded as part-time farmers.

There were 639,000 part-time farmers who sold from $250 to $2,000 worth of products annually.

Stepping up into the Census commercial-farm classification, which is the remaining 3,707,000 farms after the noncommercial farms I have just enumerater are eliminated, we find that one-fifth of the so-called full-time, commercial farmers—a total of 717,000—sell only from $250 to $1,199 worth of products annually, far less than enough even if it were all net for an adequate family income. And another fourth—901,000—sell only from $1,200 to $2,499 in products annually.

None of these incomes are in my judgment adequate, but if we exclude the last classification, the $1,200 to $2,499 group, there remain more than 2 million low-income farm families who should be helped to better standards of living.

A survey by the Joint Committee on the Economic Report in 1950 revealed that in every State in the Nation there are areas of concentrated low-income population, unable to lift themselves by the bootstraps economically because their capital and their agricultural resources are inadequate. The cut-over timber areas of the South and the Great Lakes area are examples. Poverty also occurs in the marginal land areas of the Nation, where land holdings are too small to support families adequately, and where years of undernourishment have added health problems to the job of rehabilitation.

Out in the Southwest, where the Spanish custom of dividing and redividing inherited landholdings has prevailed, many landholdings have become inadequate and new measures must be adopted if we are to bring about adjustments and higher standards of living.

The staff of the Joint Committee on the Economic Report, in a study of underemployment of rural families published in 1951, found that there are four keys to the solution to these problems of low income in the rural areas. I may add it was my pleasure and privilege to be the chairman of the subcommittee which made those studies. The four keys are as follows:

First. Increase the productivity of families on existing farms: Studies of low-income farm operations in the Southern States have repeatedly shown that these families, hard pressed for money to exist, have been unable to buy seeds, fertilizer, foundation livestock, supplies for disease and insect control, and other items which would boost their production. They are caught in a trap. Unable to obtain credit, they have barely subsisted, sometimes for more than a generation. Educational standards are low. In tens of thousands of cases, productivity and standard of living can be increased 100 percent or more, on existing units, by loans, technical assistance, and larger home food production on present acreage.

Second. Enlarge the farm units: Many agricultural economists believe that this is the central problem that must be tackled in a long-range program for low-income families. It is my own hope that the introduction of labor-intensive enterprises, plus the development of off-farm employment in rural areas with which to supplement incomes, will minimize the necessity for farm-unit enlargement and the displacement of a portion of those now on the land. I feel very strongly that every farm family that wants to stay in agriculture should be aided in so doing. But in many areas adjustment in farm sizes, with displacement and relocations, will be necessary if the lot of the citizens is to be improved. This leads to the third basic step necessary.

Third. The provision of assistance to families who desire farm or nonfarm employment outside their home communities: Such assistance will necessarily include job location for such families, the creation of a market for the small landholdings they will leave, and other aid in making their move and readjustment.

Fourth. Increase employment opportunities for low-income, part-time

farmers, rural nonfarm families and hired farm workers: During periods of high employment, we invariably hear it suggested that large numbers of low income farmers should be squeezed off the land, out of rural America and into the urban labor force.

It should be obvious in the present period of serious national unemployment—with adjustments to automation actually upon us—that such a course is sheer folly; that the encouragment of a labor movement from rural areas to urban centers would only be a transferral of the location of the problem.

The need is to increase employment opportunities within rural counties, to encourage sustained-yield forestry and the establishment of forest in appropriate areas, and to encourage the establishment of new and enlarged plants for processing the raw materials of the land in areas where such employment is needed, and will supplement low incomes.

The bill I have introduced proposes that the techniques that have been proved successful by the Farmers Home Administration on rehabilitation and farm ownership loan programs—a combination of credit and technical assistance—be used to tackle the problem of low income farmers in the 500 areas or counties of the Nation where the problem is concentrated from time to time.

The President is authorized to designate the 500 counties of highest concentration of low rural incomes. The Department of Agriculture is then authorized, through established agencies and farmer committees, to put personnel into those counties to deal with the low income problem.

The problems of individual farmers who are approved by the committees will be studied and the cause or causes of low income determined, whether it be health, lack of capital or land resources, lack of modern agricultural know-how, or something else. If practical, these people will be helped to get credit, either through guaranteed private loans or direct Federal loans. Farm plans will be developed for them and technical assistance provided in carrying out the farm plan.

Direct or guaranteed 25-year loans are authorized for the development and enlargement of farming units that are too small. Three to 10-year loans on nonreal estate capital requirements, such as livestock and machinery, are authorized.

Loans for up to 50 years for the establishment of sustained yield forestry are authorized, together with special 10-year loans for purchase of cut-over areas of the Nation, plus the national need for forest conservation and development, in my judgment, justify this program.

There is also authorized 5-year loans to eligible applicants to purchase capital stock in established or new supply, service and marketing cooperatives, including timber marketing and processing cooperatives, which will be essential to the success of the new operations.

In all cases, the Secretary of Agriculture is directed to establish a system of variable payments on the loans so payments on the principal in a single year will bear a reasonable relationship to the income of the participating family in that year.

The Department of Health, Education, and Welfare is authorized to provide programs of adult vocational training in the counties where low-income rural people are concentrated, as such programs are needed to train and retrain the people so as to maximize the income and productivity of the citizens within the area.

Cooperation of all appropriate Federal personnel with local communities, to survey their potentialities and assist in the development of new and expanded industries, offering employment opportunities to the unemployed and partially employed, is provided for.

Mr. President, I repeat that this proposal is intended as a new step forward in rural policy—a step along the same course that we have followed for years.

The techniques that I propose have been proved in the Farmers' Home Administration and the Bankhead-Jones farm tenant programs. My measure proposes basically to use those techniques more extensively in areas of concentrated low incomes, to apply them to the inadequate-sized-farm problem, and to encourage new enterprises in the rural areas.

The cost of this program will be slight. Loan collections in the Farmers' Home and Tenant Purchase programs have been excellent, despite the fact that the borrowers could not get private credit when they first came to the Government. A similar collection experience can be anticipated from this program, for there will be the same selection of worthy applicants, and there will be planning, technical assistance, and supervision, to assure success.

I strongly support our technical-assistance programs abroad. They are making us tens of thousands of grassroots friends among the peoples who have been relieved of locust plagues and the scourge of animal diseases, and have been shown new and improved methods of production.

But while extending the advantages of our "know-how" to foreign lands, we must maintain our own Nation as a showcase for democracy: The irrefutable proof that the American way is the best way ever devised by man.

We cannot wipe out, overnight all poverty in our Nation, but we can and we must continue the step-by-step elimination which our farm programs, our educational programs, social security, the full employment policy, and similar measures have gotten under way.

There is currently a great deal of discussion of what to do for the family farmers. Some people believe that price supports are the answer. We need price supports to provide stable farm markets. But price supports alone do not meet the problem of those in the rural areas who have too little resources and little or nothing to sell. These people must be aided in building up their production and their incomes, so they may also contribute their full part to the national economy.

The administration has conducted a year-long study of the problems of the family farmer, and that study was to have been reported to us sometime ago. I do not know why the report has been delayed. I assume it will be forthcoming soon and I hope and trust it will advocate positive action.

The Joint Committee on the Economic Report has repeatedly studied this problem. This year agricultural leaders testified before the committee that just such a program as this one is needed.

The time for action has come. I have, therefore, proposed authorization of all the steps which I am convinced are necessary in order to strengthen and preserve the family-size farm and to solve the low-income problem in rural America. I sincerely hope that this Congress will see fit to set this program in motion in the near future.

Mr. President, I ask unanimous consent that the text of my bill be printed in the RECORD, following these remarks.

There being no objection, the bill (S. 1199) to strengthen the Nation by preserving the family-size farm, providing additional credit for farm enlargement and development, improving the income-earning capacity and standard of living of low-income rural people, and for other purposes, was ordered to be printed in the RECORD, as follows:

Be it enacted, etc., That this bill shall be known as the "Family Farm Development Act."

FINDINGS AND POLICY

SEC. 2. The low incomes, poor living standards, and insufficient economic opportunity for efficient employment of their full capacity of a large part of the rural population denies the Nation the benefit of greater productivity in agriculture and in local rural manufacturing and service industries, slows down national economic growth and reduces standards of living. The Congress recognizes that rural poverty and low rural productivity can and must be remedied in order to bring the Nation up to maximum strength and that through this example of strengthening democracy at home by providing additional opportunities to low-income rural groups, democracy in other parts of the world also will be strengthened. It is the policy of the Congress to provide for practical assistance to low-income rural families who desire to increase their productivity and incomes and thereby to benefit the Nation's economy and raise their own standards of living.

DETERMINATION OF LOW-INCOME COUNTIES

SEC. 3. The President is authorized to determine from time to time from the latest official statistics available to him the counties or areas of the United States, not exceeding 500 in number at any one time, having the largest low-income farm population and to inaugurate and maintain in such counties a program to effectuate the purposes and policy of this act.

ELIGIBILITY

SEC. 4. The President through existing agencies of the Government will render special assistance to low-income families or single persons living in rural areas who apply for such assistance: *Provided*, That the applicant is recommended by the county farmer committee established under section 8 (b) of the Soil Conservation and Domestic Allotment Act: *And Provided further*, That the county farmer committee finds that the applicant, with the assistance provided for herein, will develop a farm and home management or family employment plan for increasing his productivity and income that has a reasonable chance to succeed.

In exploring the most feasible and practicable methods for increasing his productiv-

ity and income the applicant, with the assistance of the county farmer committee, will determine whether the cause of low income is due to physical handicaps of the family; the lack of available credit to make needed shifts in farming methods and employment of labor resources of the family; the practice of inefficient farming methods, or practices; lack of practicable diversification in the farming operation; lack of sufficient land; lack of outside employment opportunities to fully utilize the labor of the family in ways that enable it to earn an adequate return at least equal to the established national minimum wage. To assist in the analysis of the needs and in developing the plans with families, the Secretary of Agriculture shall make available to the families and the farmer committee the services of the local and State offices of the agencies of the Department to provide the advice of technicians in such fields as soil conservation, and supervised agricultural credit for agricultural production and for farm enlargement and development. The advice and assistance of other Federal agencies shall be made available and the cooperation of State and local agencies, including the State agricultural extension services and the State employment services, and of private individuals and organizations also shall be solicited.

DEVELOPING ECONOMICALLY ADEQUATE FULL- AND PART-TIME FARMERS

SEC. 5. In case of eligible applicants who wish to remain on the farm now occupied or to become established on another farm in the area, either on a full-time farming basis or in conjunction with off-farm employment of one or more members of the family, the Secretary of Agriculture is authorized and directed to provide the following services through the county farmer committees:

(a) Employ such full-time employees as may be required to carry out the purposes of this act.

(b) Make a complete analysis of the farm and farm operations and supplemental employment opportunities to determine the most promising ways by which family income and productivity in combination with whatever off-farm employment may be planned can be raised to an adequate level. After completion of such a farm and home plan, the Secretary through the county farmer committee will render every assistance possible to the applicant and his family in putting the new program into effect, including technical assistance on improved farm and home practices, and assistance in obtaining credit needed from private, cooperative, or governmental sources to put these practices into effect.

(c) To effectuate the purpose of this act the Secretary of Agriculture is authorized, upon such conditions as he shall prescribe, to insure and make loans of up to 25 years at not more than 4 percent interest for the purpose of financing the enlargement and development of owner-operated family-type farms by acquisition of additional land, establishment of improved pastures and sustained yield woodlots, construction of adequate farm buildings and structures (including drainage facilities, irrigation facilities, and other facilities for the use, conservation, and improvement of soil and water), and such other related farm improvements as will increase the income-producing ability of the farm unit to a more nearly fully adequate family farm.

To make or to insure 3- to 10-year loans at not more than 4 percent interest advanced by production credit associations and by private lenders for non-real-estate capital investment purposes; to make loans up to 50 years at not more than 3 percent interest to eligible applicants to acquire and manage on a sustained-yield basis additional forest or cut-over land; to make loans for periods up to 10 years at not more than 4 percent interest to enable an eligible applicant to acquire needed logging equipment; to make loans of not more than 5 years at not more than 4 percent interest to eligible applicants to purchase capital stock of and pay membership fees to existing or new supply, service, or marketing cooperatives including timber marketing and processing cooperatives; and to make loans to refinance existing indebtedness incurred for any of the above purposes on terms and conditions applicable to loans for such purposes: *Provided*, That creditors will enter into voluntary agreements to make needed adjustments of outstanding indebtedness to realistic income possibilities of the collateral for the existing mortgage or mortgages: *Provided further*, That the Secretary of Agriculture shall establish a variable repayment schedule for all of the foregoing types of loans such that the repayment of interest and principal in any single year shall bear a reasonable relationship to the income of the participating family in that year.

PART- AND FULL-TIME OFF-FARM EMPLOYMENT

SEC. 6. Whenever the family determines to seek part-time or full-time farm or nonfarm employment off the farm, the problem shall be presented to the nearest farm labor placement center of the State employment service cooperating wtih the Department of Labor. Information concerning farm labor opportunities also shall be made available to the family by the State and county farmer committees.

VOCATIONAL EDUCATION

SEC. 7. The Secretary of Health, Education, and Welfare is authorized to provide a program of adult vocational training in the designated counties both in farm and home management and in such other farm and nonfarm activities as the family plans of eligible applicants indicate as needed to maximize family income and productivity of family labor within the area.

INDUSTRIAL DISPERSION

SEC. 8. To provide for the national defense, to promote interstate commerce, and to improve the general welfare by assisting in the sound economic growth and development of the country, it is the policy of the Congress to encourage and stimulate the establishment of new or expanded private industrial, commercial, or service enterprises in widely dispersed rural areas as required to reduce vulnerability to modern war risks and in which, over an extended period of time, because of the number of underemployed rural persons with excessively low incomes, the number of existing industrial, commercial, or service enterprises, and the available markets and resources there are reasonable prospects for successful operation of additional private enterprises which would more fully utilize available manpower in rural areas. To effectuate this policy of industry dispersal, the departments and establishments in the executive branch of the Government shall be utilized and coordinated to—

(a) provide technical aid and assistance to, and consult and cooperate with, farmers, businessmen, workers, cooperatives, civic organizations, clubs, and committees, community study and planning groups, and local and State governmental agencies;

(b) prepare and distribute technical, defense, and economic information on opportunities in and necessities of private enterprise in various industries and areas in order to aid individuals, business firms, civic organizations, and local units of government in developing new or expanded industries best suited to local conditions; and the requirement of civil defense;

(c) assist new or expanding industries in finding adequate private financing through local capital or otherwise and where such financing is found to be unavailable, extend Government loans or guaranties under existing authority; and

(d) use all appropriate means and authority to encourage and stimulate the maximum expansion in private employment and private enterprises consistent with the needs for national defense, with a sound, growing national economy, and with the necessities of civilian defense.

APPROPRIATIONS

SEC. 9. There is hereby authorized to be appropriated such sums as may be necessary for carrying out the provisions of this Act.

Mr. KEFAUVER. Mr. President, will the Senator from Alabama yield for a question?

Mr. SPARKMAN. I yield.

Mr. KEFAUVER. I desire to congratulate the distinguished Senator from Alabama upon his sponsorship of this measure, and I am glad to know that a similar measure is being sponsored in the House of Representatives by Representative PATMAN.

In the effort in various ways to sustain the family-sized farm may lie, I believe, the answer to the problem of price-supports and the many other problems which have been disturbing American agriculture, and with which the Nation has to cope.

I know some consideration has been given to the matter for a long time, and I am glad that the distinguished junior Senator from Alabama is going to push for early hearings on, and consideration of, the very excellent bill he has introduced.

Mr. SPARKMAN. Mr. President, I appreciate the remarks of the distinguished senior Senator from Tennessee. I should like to remind him that the President, in his state of the Union message, said something must be done for the low-income farmers; and we were supposed to have gotten a special message on the subject, as I understand. I am hopeful it will come to the Congress soon.

I regret that I did not have time to invite other Senators who might wish to do so, to join in the sponsorship of this measure. I do not claim it is perfect, but I certainly hope it will start something which will work into a good program. So I should like to invite any Senators who may wish to do so, to join in sponsoring the bill.

Mr. KEFAUVER. I ask the distinguished Senator from Alabama please to include my name as a cosponsor.

Mr. SPARKMAN. I shall be very pleased to do so; and I ask unanimous consent, Mr. President, that the name of the distinguished senior Senator from Tennessee [Mr. KEFAUVER] be placed on the bill as a cosponsor of it.

The PRESIDENT pro tempore. Without objection, it is so ordered.

WINNERS IN THE "I SPEAK FOR DEMOCRACY" CONTEST

Mr. MARTIN of Iowa. Mr. President, this week marks the culmination of the annual "I Speak for Democracy" contest. This year, 48 States and 4 Territories were represented. Over 29,000 high schools, parochial schools, and private schools entered the local contests. Over 1,200,000 of the best students of the land wrote speeches.

Four nationwide winners have been selected. I am privileged to note that 1 of the 4 winners is an outstanding boy from Iowa, Dwight David Walker, of Oskaloosa. The other winners are Judy Abramson, of Yuba City, Calif.; Avron Joseph Maletzky, of Schenectady, N. Y.; and Catherine Esther Styles, of Minneapolis, Minn.

Mr. President, I ask unanimous consent that the four prize-winning scripts in the national "I Speak for Democracy" contest be printed in the RECORD following my remarks.

There being no objection, the essays were ordered to be printed in the RECORD, as follows:

JUDY ABRAMSON, AGE 17, YUBA CITY UNION HIGH SCHOOL, YUBA CITY, CALIF.

I speak for democracy.

And why am I doing so?

Because I am an American, enjoying to the fullest the benefits of democracy. The greatness of this democracy is not to be found in the waters, the mines, the field, or the mills, but must be sought in the hearts and the minds of the people. It isn't something that can be weighed or measured by any device yet known to man. It has a value that cannot be detected—yet has infinite value. We possess it, here in America, in such abundance that we might, at times, display an unpremediated contempt for it. Yet other nations who have lost it—find it impossible to regain.

None of us could describe it in the same terms—yet, each senses its power, its importance, and the conviction that it must be preserved at all costs. For want of better expression, let us call it the American way of life. For it can mean different things to different people. This way of life is like a gigantic tree with many branches extending in all directions. The tree—its branches and its fruit—give comfort and support to the weak, food to the hungry, strength to the small. The tree, like democracy, has fought for survival through the ages, and shows scars resulting from this treatment. When lacking water or sun for survival it begins to wither—and such is democracy. There is no country in the world, nor any human being, who, in its span of duration, has not been affected by the many facets of democracy.

Wars have been fought for it.
Laws have been made for it.
Schools are founded upon it.
Rights have been declared for it.

But in order to benefit the people, it must be guarded and protected by all who wish to share in it. Without help and support, democracy—as the tree—would die. Its many branches offer a hope and a promise to all people. For through democracy we can attain our only hope for lasting world peace—the brotherhood of man.

This brotherhood will come about only through freedom and equality for each person. And so the greatest attribute democracy has is that it releases the full potential of each individual. Our characteristics, as people living in a democracy, show that we strive hard to do this not only because we have the opportunity, but because it is our obligation to ourselves, our God, and our country.

The key to this democracy we possess is our faith in the dignity and the worth of each human life, and our determination that in every phase of our society we shall build from the bottom up, and not from the top down. The only true happiness is that which the individual creates for himself—and values—because it is his own. To fulfill his own ambitions and to satisfy the needs which are his own expression—that is the goal of each human being. And this can be accomplished only under democracy.

It was once said that there is a destiny that makes us brothers, and none shall go his way alone. For that which we send into lives of others comes back into our own. Democracy is our destiny—sending to each one of us, and our coming generation, a free sense of being that brings with it security and a knowledge that each and every man is equal.

This destiny—democracy—has given us a rich inheritance. Our forefathers fought for it. And through them—and democracy—we have been given the richness of the earth and its resources—personal freedom—equality—justice.

Working as a democracy, our Union of States, and Nation of people, can work together to create and to achieve—to make this democracy stronger, constant, and ever enduring. May God will it so.

AVRON JOSEPH MALETZKY, AGE 16, NOTT TERRACE HIGH SCHOOL, SCHENECTADY, N. Y.

I speak for democracy—a force that means life, liberty, and freedom for millions of human beings—a force that elevates the dignity of man toward the divine—but a force that defies definition.

Scores of interpretations do not embrace the meaning of democracy, and none of us know where to find the words to express our belief in it. Perhaps the fact that we have not yet achieved democracy is the key to the whole situation—for true democracy is a quality toward which one strives, rather than a concrete object which one encloses in a glass case. Then how is it possible to defend something that is as basic as the world we live in, but must be thought of as a goal never quite attained?

It was not until we faced the possibility of its loss that we began to visualize the meaning of this precious inheritance. It was not until we saw other democratic countries, filled with people not unlike ourselves, submerged and conquered, that we began to appreciate democracy as both a moral ideal and a historical institution.

The theme of democracy goes back much farther historically than the great documents of the American, French, and English revolutions. The idea goes back to the Hebrews with their theories of divine justice; to the early Christians with their ideal of brotherhood; to the Romans with their stress on equality and justice. Those who feel that democracy is young, and thus is an unstable force, forget what a long history it has, and how deeply it is imbedded in the culture of nations.

Today, we are beginning to think of democracy not as a political institution, but as a moral ideal, and a way of living together. The early Christians had an appropriate saying—"We are all," as they put it, "members of one another." We must, if our democracy is to succeed, believe as they did. We must realize that no one can stand alone. True, society recognizes a person as an individual with his individual liberties and freedoms, but only if the person recognizes society as a brotherhood of individuals. To be part of a democracy, one must fight the natural tendency to demand equality and freedom for oneself, and not for others.

Of course, there are those who say that because it opposes, or conflicts with man's natural desire for personal gain, democracy will defeat itself. But democracy has its own peculiar strength. This strength lies in the fact that democracy tends to bring men together into agreement—it satisfies and reconciles all involved. Its strength thus lies in the justice, humanity, and loyalty which are evolved from this agreement between men.

To be sure, as long as democracy exists, there will always be a mild state of confusion and conflict. But what are these conflicts? Conflicts are the instruments of change and progress—they are the propelling force behind democracy.

For democracy there is always a future, and a bright one, too. Its potentialities have never been fully realized, and it would take a person gifted with a fertile imagination to think of all the many possibilities that democracy has in store for a nation of the 21st century.

As the well-known philosopher, Irwin Edman, has written: "It is by the fire of this dream (democracy), that the future is lighted, rather than by the flames of destruction that now, as often in the past, have violated—but never for very long—the faith in the human dignity of each man in a society of brotherhood and freedom."

Democracy is a powerful force. It represents a gigantic struggle towards some unattainable goal. But even if this struggle never succeeds entirely, out of it can come the courage and the faith that will maintain democracy as a dynamic force for eternity.

CATHERINE ESTHER STYLES, AGE 18, SOUTHWEST HIGH SCHOOL, MINNEAPOLIS, MINN.

I am not an American. My people are not American. And yet I, too, speak for democracy.

Not much over a hundred years ago, the race that founded American began to found another nation. Surrounded by the vastness of the Pacific Ocean, a new land had been discovered. The brown-skinned people who already lived there called it Aotearoa the land of the long white cloud. Today we call it New Zealand. It is a young country, a virile and growing country. It is a country of sea and sunshine, of snow on the mountains, of trout lakes and primitive fern forest; of weird pools where the boiling mud leaps and bubbles, cracks in the rock where the steam comes white from the insides of the earth.

The people who live there are a people who love freedom.

The people who live there are my people, and when I speak for democracy, I speak for them.

I have seen something of America.

I have watched the crowds in the streets at night, seeing the advertisement signs flashing on the saw-edge of the horizon saying: "Buy my product; no, buy mine; mine is finer yet." I have seen, back home in the early morning, the man with his horse and his dogs, driving sheep. I remember the jostle and pattering rush of the delicate forefeet, and the clean smell of the bracken, and the sharp barking of the dogs. I remember this, and I know that those crowds with their faces colored by the glow of the advertisements, and that man out early with his flock, although they are 7,000 miles apart, are people, with the same ideals and beliefs, the same love of individual freedom. And I am glad that I can say this, and I speak with all the sincerity in my power. I know that people, these people, all people, are the most terribly important thing in the world. I know that to make as many people as possible as happy as possible is the greatest ideal in the world. And I know that this is the ideal of democracy.

You people of America do not stand alone. Democracy extends further than America. Two thousand years ago the Christian doctrine proclaimed the equality of man. Belief in the equality of man means acceptance of all races, all creeds. Belief in democracy means belief in the equality of man. It means respecting the individuality of every human being.

At home, in the summer evenings, near the time of Christmas, I would sit on the low veranda steps, and hear the baby owls calling in the darkness, and the cows coughing and stamping in the paddock, and see the

white bobs of the rabbits scuttle in the half-light. And by the gate I would hear the voices of a couple murmuring together, the young man and woman. And I would think—this is good; this is good, this life, this land, this people. All this is good; the best that ever was.

I still believe it is good, but I know now it was no single nation I was believing in, but the truth of free people everywhere. And I know that the most wonderful thing in the world is the freedom of the individual—in my country, in your country, and in every country.

Not as an American, not as a New Zealander, but as a free citizen of the world in which I have faith, I am speaking to you now. I am not remembering that you are American and I am British. I am not remembering that our voices are different, and our manners, and the cut of our clothes. I only remember that, together, we believe in the individual freedom and right.

I only remember that, together, we speak for democracy.

DWIGHT DAVID WALKER, AGE 17, OSKALOOSA HIGH SCHOOL, OSKALOOSA, IOWA

My name is democracy. I am the beacon of hope in a troubled world.

I can be found in an abandoned foxhole in Korea; in the Senate of the United States, and at a meeting of the PTA. I am present when you spend a quiet evening at home with your family, and when you go to church on Sunday. Yes, I can even be found in the broken spirit of a Russian peasant as he goes about his menial tasks under the surveillance of his government.

I cannot tell you my exact age, for no one knows just when I was born. First, I was an attitude in the minds, a gleam in the eyes, a hope in the hearts of men who sought a new way of life, free from the oppression of a tyrannical ruler, by divine right. These men were my fathers.

These men brought me when I was still but an idea, with them to found a new land. The land was called America. It is my land—the land of democracy. It was here that my life began. America and I grew up together.

My fathers loved me. They developed me, nursed me, and even fought a war that I might live and continue to grow.

The torment and anguish which my fathers endured for me, left its permanent mark on my history. Guns roared, armies battled, and fires raged through my land, taking an immense toll of blood and human life.

But I lived, experiencing myself and bringing to my people a richer and fuller life. For, from out of the blood which my fathers shed for me, emerged the greatest document ever conceived in the mind of man—the Constitution—which gave substance to the ringing declaration * * * "that all men are created equal, and that they are endowed by their creator with certain inalienable rights, that among these are life, liberty, and the pursuit of happiness."

My horizons widened. Countless people, imbued with the ideals of freedom, braved the wilderness, fought the Indians, endured hardships and death, and all for the sake of me—democracy.

However, there continued to be threats to my security. My history has been blackened by a succession of wars. From the struggle for the emancipation of slaves and the preservation of my Union, to the bloodbath of World War I. I emerged triumphant from all these trials, but my people failed to acknowledge the opportunity that fate had laid in their hands. They looked to idealistic remedies to guarantee peace to man forever.

The result was the rise of Hitlerism, and ultimately, World War II. Now it is communism, and the cold war.

But I have learned through bitter experience. I have grown from my infancy, to take my rightful place as leader of a troubled world. I have seen and assumed my duties. May I remind you of a few of my accomplishments—the Marshall plan, food trains, the point 4 program, the Berlin airlift, and military aid to Greece?

I have grown—until now I am adult. But I shall never become aged as long as my people continue to value the principles for which I stand. As I was the child of my fathers, so am I now the father of my own children. As the minds of men gave birth to a great idea, so has this idea given birth to certain of my principles.

Election of public officials by all the people is one of these principles. Others are our public-school system, the four freedoms, representative taxation, racial equality—countless proofs of my greatness.

This has been my past. But what about my future? It has been said that my greatest enemy is indifference on the part of my people. We have seen that neglect of their duties and obligations led my people into the Second World War. Citizens of America, don't let this happen again.

Speak, act, and think democracy. Live it. Breathe it. Support it. Defend it and believe in it. But, above all, do not take it for granted.

Don't become careless to the point that you lose your most precious heritage.

A great American patriot once said that I am the last, best hope of the earth.

But who am I? What kind of a power am I that I am the hope of the world?

I am democracy. I am the power of the people.

EXECUTIVE MESSAGE REFERRED

As in executive session,

The PRESIDENT pro tempore laid before the Senate a message from the President of the United States submitting sundry nominations, which were referred to the Committee on Foreign Relations.

(For nominations this day received, see the end of Senate proceedings.)

ADJOURNMENT TO FRIDAY

Mr. CLEMENTS. Mr. President, I move that the Senate stand adjourned until noon, on Friday next.

The PRESIDENT pro tempore. The question is on agreeing to the motion of the Senator from Kentucky.

The motion was agreed to; and (at 4 o'clock and 19 minutes p. m.) the Senate adjourned until Friday, February 25, 1955, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate February 23, 1955:

DIPLOMATIC AND FOREIGN SERVICE

The following-named persons for appointment as Foreign Service officers of class 2, consuls, and secretaries in the diplomatic service of the United States of America:

Robert H. S. Eakens, of Texas.
Henry H. Ford, of Florida.
Merrill C. Gay, of Ohio.
Graham R. Hall, of Arkansas.
Mose L. Harvey, of Maryland.
Frank K. Hefner, of Virginia.
James R. Johnstone, of Virginia.
Clifford C. Matlock, of California.
Dwight J. Porter, of Nebraska.
Philip H. Trezise, of Maryland.
J. Raymond Ylitalo, of Minnesota.

Randall S. Williams, Jr., of New York, for promotion from Foreign Service officer of class 3 to class 2.

Henry C. Ramsey, of California, now a Foreign Service officer of class 3 and a secretary in the diplomatic service, to be also a consul general of the United States of America.

The following-named persons for appointment as Foreign Service officers of class 3, consuls, and secretaries in the diplomatic service of the United States of America:

John W. Auchincloss, of the District of Columbia.
John A. Chappelear, of the District of Columbia.
John F. Correll, of Ohio.
Joseph F. Donelan, Jr., of New York.
Donald B. Eddy, of Connecticut.
Robert Eisenberg, of Virginia.
John W. Ford, of Virginia.
Leo A. Gough, of Rhode Island.
Stanley I. Grand, of Missouri.
Herbert W. Griffin, of California.
Robert J. Halliday, of New Jersey.
Henry S. Hammond, of Pennsylvania.
William K. Hitchcock, of Virginia.
Russell B. Jordan, of Wyoming.
Abe Kramer, of California.
Stanley R. Lawson, of California.
Edgar L. McGinnis, Jr., of Virginia.
Louis C. Nolan, of Florida.
Richard C. O'Brien, of New Jersey.
Charles E. Rogers, of Connecticut.
Joseph M. Roland, of Pennsylvania.
John D. Tomlinson, of Illinois.

The following-named persons for appointment as Foreign Service officers of class 4, consuls, and secretaries in the diplomatic service of the United States of America:

Rodger C. Abraham, of Maryland.
Edwin M. Adams, of Illinois.
Hugh M. Adamson, of Virginia.
John L. Barrett, of Texas.
George A. Berkley, of Pennsylvania.
Keirn C. Brown, of New York.
Robert W. Caldwell, of North Carolina.
Miss Margaret A. Fagan, of Iowa.
George S. Freimarck, of Maryland.
Justie E. Gist, of Iowa.
Harold M. Granata, of New York.
Warren G. Hall, of Washington.
Dwight B. Horner, of Virginia.
Thomas D. Huff, of Indiana.
J. Alfred LaFrenière, of Massachusetts.
John S. Meadows, of Massachusetts.
John G. Oliver, of California.
Harold W. Pfau, of New Jersey.
Harry M. Phelan, Jr., of Tennessee.
Ferdinand F. Pirhalla, of Pennsylvania.
Normand W. Redden, of New York.
Reed P. Robinson, of Utah.
Kenneth J. Ruch, of Pennsylvania.
Miss Eleanor W. Sandford, of Massachusetts.
Schubert E. Smith, of New York.
Richard L. Sneider, of New York.
Mrs. Lucille M. Snyder, of Missouri.
William B. Sowash, of Ohio.
Bertus H. Wabeke, of Massachusetts.
William H. Wade, of California.
Frederick S. York, of New Jersey.

Scott George, of Kentucky, for promotion from Foreign Service officer of class 5 to class 4 and to be also a consul of the United States of America.

Charles C. Gidney, Jr., of Texas, for promotion from Foreign Service officer of class 5 to class 4.

Robert M. Beaudry, of Maine, a Foreign Service officer of class 5 and a secretary in the diplomatic service, to be also a consul of the United States of America.

Chester G. Dunham, of Ohio, for promotion from Foreign Service officer of class 6 to class 5.

The following-named persons for appointment as Foreign Service officers of class 5, vice consuls of career, and secretaries in the

diplomatic service of the United States of America:

Karl D. Ackerman, of Oklahoma.
Joseph P. Bandoni, of California.
William P. Boswell, of New Jersey.
Hampton E. Brown, Jr., of Maryland.
Robert L. Burns, of the District of Columbia.
William J. Bushwaller, of Iowa.
Max R. Caldwell, of Texas.
Everett L. Damron, of Ohio.
John R. Diggins, Jr., of Maine.
George A. Ellsworth, of Georgia.
Miss Helen V. Garrett, of Oklahoma.
John W. Gordhamer, of California.
Miss Anna C. Gustavs, of California.
Arvid G. Holm, of Washington.
Thomas J. Hunt, of New York.
Anthony J. Jay, of Illinois.
John W. Jelich, of New York.
Edward P. Kardas, of Pennsylvania.
Miss Mary A. Kellogg, of Michigan.
Joseph A. Livornese, of Colorado.
Miss Charlotte M. McLaughlin, of Washington.
Jack C. Miklos, of Idaho.
William D. Morgan, of New York.
Robert L. Mott, of California.
Mathias J. Ortwein, of Pennsylvania.
James B. Parker, of Texas.
Richard W. Petree, of Virginia.
John M. Powell, of Illinois.
Ralph C. Rehberg, of South Carolina.
W. Courtlandt Rhodes, of California.
Charley L. Rice, of Texas.
Emery Peter Smith, of the District of Columbia.
Mrs. Virginia C. Stryker, of Washington.
Miss Margarite H. Tanck, of South Dakota.
Charles P. Torrey, of California.
Miss Irene Toth, of California.
Allen R. Turner, of Missouri.
James M. Turner, of Tennessee.
Miss Mary L. Walker, of Georgia.
Leland W. Warner, Jr., of Kansas.
Miss Alice D. Westbrook, of California.
Ralph H. Wheeler, Jr., of New York.

The following-named persons for appointment as Foreign Service officers of class 6, vice consuls of career, and secretaries in the diplomatic service of the United States of America:

John Daniel Barfield, of Tennessee.
Robert T. Burke, of New York.
Robert J. Carle, of California.
Charles M. Gage, of Illinois.
Harold E. Grover, Jr., of Florida.
Stanley P. Harris, of New York.
Mrs. Elizabeth B. Johnsen, of California.
Henry G. Krausse, Jr., of Texas.
Franklin O. McCord, of Iowa.
Donald W. Mulligan, of Kentucky.
John Patrick Owens, of the District of Columbia.
James A. Parker, of Maryland.
James G. Sampas, of Massachusetts.
William R. Smyser, of Pennsylvania.
Arthur H. Woodruff, of the District of Columbia.

The following-named Foreign Service staff officers to be consuls of the United States of America:

Edward J. Conlon, of Tennessee.
Charles F. Edmundson, of Illinois.
Tom A. Noonan, of Kentucky.
Lawrence E. Norrie, of California.
John P. Rhodes, of Ohio.

Thomas J. Needham, Jr., of Florida, a Foreign Service Reserve officer, to be a consul of the United States of America.

Jack Liebof, of New York, for appointment as a Foreign Service officer of class 6, a vice consul of career, and a secretary in the diplomatic service of the United States of America.

(This nomination is submitted for the purpose of correcting an error in the nomination as submitted to the Senate on November 8, 1954, and confirmed by the Senate on December 2, 1954.)

HOUSE OF REPRESENTATIVES

WEDNESDAY, FEBRUARY 23, 1955

The House met at 12 o'clock noon.

Rev. Charles W. Holland, Jr., pastor, Fountain Memorial Baptist Church, Washington, D. C., offered the following prayer:

Dear Heavenly Father, we thank Thee this day for Jesus, and for His shed blood that made it possible for every man to have eternal life.

Dear God, we pray for the President of the United States, that Thou wilt give him wisdom and strength. We realize as we have studied the history of the rise and fall of great nations that what our President has said is true, America has only one salvation, a return to God.

And now, dear Heavenly Father, we pray for the Speaker and this body of lawmakers. We realize that our own wisdom and their wisdom will be as sounding brass and tinkling cymbals except it be from Thee. Help us as citizens to remember our Government leaders prayerfully instead of critically. Bless each home represented here, in the name of Jesus. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Tribbe, one of his secretaries.

NATIONAL RESERVE PLAN

Mr. BROOKS of Louisiana. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana.

There was no objection.

Mr. BROOKS of Louisiana. Mr. Speaker, the chairman of the Armed Services Committee, the distinguished gentleman from Georgia [Mr. VINSON], has appointed Subcommittee No. 1 of the House Committee on Armed Services. At the present time this committee is considering the national reserve plan and kindred legislation. The committee has been holding these hearings every day for the last several weeks. We have some 50 witnesses yet to be heard.

The committee this morning discussed the matter and suggested that I as chairman of the subcommittee make the announcement on the floor of the House that these meetings are being held so that every Member of the Congress may be fully aware of the hearings and may have an opportunity to attend and listen to any witnesses they are interested in. I take this time this morning for this purpose, to let you know that we are going ahead with the hearings as fast as we can handle them in an orderly manner. We will be delighted for any Member to be in attendance.

UNEMPLOYMENT SITUATION IN THE ALTOONA, PA., AREA

Mr. VAN ZANDT. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. VAN ZANDT. Mr. Speaker, the acute unemployment situation in the Altoona, Pa., area has had my undivided attention for the past many months. Despite the fact that Altoona has been classified since 1949 as a labor-surplus area, the degree of unemployment has mounted during the past 16 months so that it is now classified by the United States Department of Labor as being in an area having a very substantial labor surplus.

It is encouraging to state that the unemployment situation in Altoona and vicinity has been attacked on all fronts with business and labor groups working collectively while the citizens of Altoona voluntarily contributed better than three-quarters of a million dollars in a "Jobs for Joes" campaign to finance the efforts being made to attract new industries to the Altoona area. This "Jobs for Joes" campaign supplements the program of the Altoona Enterprises, Inc., a subsidiary of the Altoona Chamber of Commerce, which raised in excess of $600,000 for the purpose of assuring continued employment. Already several new industries have been secured because of the splendid response to the appeal of Altoona Enterprises, Inc.

The unemployment situation in Altoona is the result of a sick coal industry which is reflected in a marked decrease in employment in the railroad and other related industries. Nearly 18 percent of the employables in the Altoona area are unemployed, or a total of 10,000 jobless persons, 6,000 of which are furloughed railroad employees. This unemployment situation is attributable to three factors: First, loss of coal markets because of the use of substitute fuels, chiefly foreign residual oil; second, dieselization of the Nation's railroads, which replaced steam locomotives; third, the general effect of unemployment in the coal and railroad industries, which is reflected in allied industries.

Recently I had occasion to write to Mr. Murray M. Gassman, national CIO representative in Altoona, Pa., on the subject of unemployment in the Altoona area outlining the efforts that have been and are being made to relieve the unemployment situation.

My letter to Mr. Gassman follows:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
WASHINGTON, D. C., *February 19, 1955.*

Mr. MURRAY M. GASSMAN,
United Railroad Workers of America, CIO, Local Union 2017, Altoona, Pa.

DEAR MR. GASSMAN: Further reference is made to your letter of February 14, our telephone conversation of February 16 and my telegram to you of February 19 regarding my attendance at a mass membership meeting

of your organization in Altoona, February 23, 1955.

As mentioned in my telegram of February 19, according to the legislative program announced by the House leadership early Friday evening, February 18, a busy legislative program is scheduled for Wednesday and Thursday, February 23 and February 24, 1955. In addition, committee meetings are scheduled for both morning and afternoon on these dates when matters affecting my congressional district will be discussed which require my presence.

Since there is no legislative business scheduled for Washington's birthday, February 22, as mentioned in our telephone conversation on February 16, I am committed to spend the entire day at the Pennsylvania State University, State College, Pa., which is in my congressional district. To keep this engagement at State College which concerns the 100th anniversary of the establishment of Penn State, I will travel by train in both directions because of weather conditions. Therefore, you will understand regardless of the legislative program on Wednesday and Thursday that it is a physical impossibility for me to be in Altoona on Wednesday evening, February 23, as I will not get back to Washington until Wednesday morning.

You stated in your letter of February 14 that the meeting on February 23 was called for the purpose of accelerating efforts in helping alleviate the unemployment crisis and to receive a report from the United States Representative from the 20th (not 23d) Congressional District regarding a program he may have to help the unemployed. Since it will be physically impossible for me to attend the meeting, the following report is presented which contains information which was furnished several weeks ago to the Altoona Community Welfare Council, copies being furnished to your associates of the Blair County United Labor Council as well as to the Altoona newspapers. There is herewith enclosed copies of the information furnished which has been designated exhibits A, B, and C. Copies of the bills mentioned in these exhibits are also attached.

As you will note in my letter of January 7, 1955, to Charles A. Mentzer, executive director, Altoona Community Welfare Council marked as exhibit A, after exhausting all efforts to find legal authority on the part of the Federal Government to cope with the Altoona unemployment situation, the following program was developed as represented by the following bills I introduced on the first day of the 84th Congress, January 5, 1955, all of which are pending before appropriate committees having jurisdiction over the subject matter contained in each bill.

H. R. 860 provides a program of public facilities construction which will stimulate employment in areas having a substantial surplus of labor and for other purposes.

H. R. 861 provides temporary unemployment benefits to unemployed railroaders whose benefits terminated after January 1, 1955, by extending the period of eligibility for railroad-unemployment insurance to July 1, 1955.

H. R. 862 amends the Social Security Act by prohibiting the several States from taking a lien against the real estate of the recipient of public assistance benefits as is being done under existing law in Pennsylvania.

H. R. 863 provides for the distribution of certain surplus food commodities by use of a food stamp plan.

Since introducing H. R. 863 and as a result of further consultations with the Department of Agriculture and representatives of labor organizations, H. R. 3144 and H. R. 3145 were introduced by me, copies of which are enclosed. Both of these bills place the cost of distribution of surplus food commodities in labor surplus and disaster areas on the Federal Government as well as authorizing the Commodity Credit Corporation to process these food commodities into a form suitable for home consumption such as wheat into flour, corn into meal, etc. I am informed that H. R. 3144 and H. R. 3145 provide a better approach than H. R. 863 providing for a food stamp plan.

As mentioned, all of these bills that I have introduced are pending before the House committee having jurisdiction over the subject matter contained in them. Each committee chairman concerned has received a letter from me a few days after the bills were introduced requesting that he immediately secure a report from the Government agencies concerned on the bill or bills pending before his committee and upon receipt of such report that hearings be scheduled on the bill at the earliest possible date. In addition to writing each committee chairman, I have had a personal conference with each of them furnishing them full information about the Altoona unemployment problem and urging the earliest possible action on the legislation. In addition to my contacts with the committee chairmen, the White House, the Office of Defense Mobilization, and the leadership of both parties in the House of Representatives, all agencies of Government concerned have been fully informed of the unemployment situation and of my program designed to alleviate it.

As you will observe from exhibit B which concerns H. R. 861, a bill designed to provide temporary extension of railroad unemployment insurance benefits, after many hours of research on my part, all available information concerning not only the Altoona unemployment situation but also the national picture was placed in the hands of the Chairman of the House Committee on Interstate and Foreign Commerce on January 22, 1955. Since that date I have had several conferences with Chairman Percy A. Priest whose home town, by the way, is Nashville, Tenn., where there are 2,500 railroaders unemployed. I have also written a personal letter to every member of the House Committee on Interstate and Foreign Commerce and furnished the same information I gave Chairman Priest.

In order to develop nonpartisan support of my legislative program, I wrote a personal letter to the Governor of Pennsylvania on January 22, 1955 and a similar letter to the legislative representatives of the CIO, the A. F. of L., the International Association of Machinists, the Railway Labor Executives Association and the Operating Railroad Brotherhoods. I have received replies from the legislative representatives of the organizations mentioned and in addition, I have been in personal contact with each of them. In each instance they have given me helpful suggestions and have agreed to work collectively with me in an effort to enact my legislative program.

With reference to H. R. 861 providing for the extension of railroad unemployment insurance benefits to July 1, 1955, it is only fair to tell you that there is a division of opinion as to the practicability of its provisions. First, because the bill may lead to Federal control over railroad unemployment insurance benefits; second, because of its effect on collective bargaining in the field of wage increases and third, the bill will establish a precedent for other unemployed groups covered by unemployment insurance as administered by the several States.

As you probably know, a new Congress such as the 84th Congress spends the first two months of the year organizing and being brought up-to-date by various agencies of the Government with respect to their legislative requests to Congress which include appropriations. The result is that unavoidable delay is encountered in perfecting legislation since it has to run the gauntlet of the various congressional committees before reaching the floor. In the meantime, you can be certain that I am not leaving any opportunity pass to expedite early consideration of my legislative proposals.

In addition to the legislative program I have described, your attention is called to Exhibit C which concerns the Government's efforts to provide employment opportunities to the unemployed in the Altoona area. This program results from my request which brought a governmental committee to Altoona for the purpose of inventorying the skills of those unemployed and seeking to obtain employment for them. As you know, this program is in full effect at this moment.

With respect to railroad unemployment insurance problems such as delays in certifying claims or the tardy receipt of checks, a complete review of the office procedure in handling these claims was made at my request with the result that through my Altoona office I have given 24-hour service and complaints have been reduced to an absolute minimum. In addition to the personnel of the Cleveland regional office of the Railroad Retirement Board being increased and authority given for overtime pay in processing unemployment insurance applications, at this moment the United States Treasury Department is setting up the machinery whereby authority is being delegated to the regional offices of the Railroad Retirement Board to write their own checks instead of the Treasury Department, thus saving a whole day in issuing them. I have spent hours in contact with officials of the Railroad Retirement Board reviewing every procedure for the purpose of eliminating delays and I feel that we have gone the limit in cutting corners.

In an effort to alleviate the unemployment problem by bringing about a diversification of industry in the Altoona area, I have been active the past several years in cooperating with individuals and groups in Altoona and my entire congressional district in furnishing information, running down leads, and otherwise aiding in trying to attract new industries. A useful information kit compiled by the United States Department of Commerce and containing material designed to assist local groups in organizing for the purpose of securing new industries has been sent to interested persons in this congressional district.

From your knowledge of Altoona, I think you will agree that the organized effort of Altoona Enterprises, Inc., is unequalled anywhere in the United States. This fact is confirmed by the United States Department of Commerce who has commended Altoona Enterprises, Inc., for its initiative and success in raising funds for the purpose of attracting new industries to the Altoona area. At frequent intervals, I have sent a list of industrial firms that the United States Department of Commerce reported as being interested in expanding their facilities mostly as a result of the Government's dispersal order under the civil defense program. This information has been furnished to all community groups in my congressional district where there is a committee organized for the purpose of seeking new industries. As you know, at my request representatives of several Government agencies visited Altoona about a month ago and conferred with officials of the Altoona group to make certain that everything possible was being done to utilize the aid of the Federal Government in diversifying industries in the Altoona area.

Over a period of weeks I have had lunch on numerous occasions with key officials of Government and labor organizations in an effort to coordinate my activities and to develop new approaches to solving the Altoona unemployment problem. In all fairness to

those with whom I have talked, they have been unable to suggest any new approach. In fact, some of these Government and labor organization officials have commended me for the determined and energetic effort I have made the past many months in trying to alleviate the unemployment situation in my congressional district.

There is attached as exhibit D several pages of the CONGRESSIONAL RECORD of February 17 and February 18 which reveals an additional effort on my part to relieve the unemployment situation not only in Altoona but also in the central Pennsylvania area by my opposition to the unregulated flood of foreign residual oil from Venezuela that has captured the eastern seaboard coal market thus destroying the jobs of coal miners, railroaders, and those in related industries.

In regard to the series of resolutions adopted by the county and city commissioners, there is no doubt that the unemployment problem is being attacked on all fronts; namely, at the local, county, State, and national levels. With such fine spirit of cooperation, I feel that our collective efforts cannot help but produce results. In view of the activities of so many persons and groups in helping to solve the unemployment situation in Altoona, I am sending a copy of this letter to interested persons.

With every good wish, I am

Sincerely yours,

JAMES E. VAN ZANDT.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D. C., January 7, 1955.

CHARLES A. MENTZER,
Executive Director, Altoona Community Welfare Council, Altoona, Pa.

DEAR CHARLIE: For your information, Dr. Arthur S. Flemming, Director of the Office of Defense Mobilization, furnished me the following information on January 4 relative to the designation of Altoona as a disaster area:

"This has further reference to your inquiry relative to the designation of Altoona as a disaster area. The Surplus Manpower Committee of the Office of Defense Mobilization has given very careful consideration to your proposal, and after consultation with the General Counsel of ODM, the Committee has found that the present Disaster Relief Act does not permit Federal assistance for the alleviation of unemployment.

"As you know, the Disaster Relief Act (42 U. S. C. 1855–1855g) authorizing Federal assistance to States and local governments in major disasters reflects the intent of Congress to alleviate suffering and damage resulting from major disasters, and to foster the development of such State and local organizations and plans to cope with major disasters as may be necessary. As defined in the act, the term 'major disaster' means any 'flood, drought, fire, hurricane, earthquake, storm, or other catastrophe' in any part of the United States."

With the ODM decision that the provisions of the Disaster Relief Act are not applicable to Altoona, I arranged a meeting with representatives of the Departments of Commerce, Labor, the Small Business Administration, and the Railroad Retirement Board, which was held in Washington this week. At this meeting Mr. Dewey Coates, former resident of Altoona, and community employment consultant, Bureau of Employment Security, United States Department of Labor, Washington, D. C., was named as the coordinator of the efforts the Federal Government will make to aid unemployed railroad workers in the Altoona area.

Already the Chairman of the Railroad Retirement Board, as part of the Committee's program, has designated Mr. Merritt Robson, a Railroad Retirement Board representative from Chicago, to proceed to Altoona immediately for the purpose of determining the skills of those unemployed so that the United States Department of Labor and the Railroad Retirement Board may unite their efforts in securing employment for such persons.

Another step in the program will bring to Altoona representatives of the United States Department of Commerce and the Small Business Administration, who will make an inventory of the production potential of all industries other than the railroad to aid the Altoona Chamber of Commerce and Altoona Enterprises, Inc., in their efforts to secure new industries. This Committee will function in accordance with the Eisenhower administration's directive that areas like Altoona with a very substantial labor surplus shall be given every possible assistance in rehabilitating their economy.

In addition to the Committee mentioned in the above paragraph, I introduced on January 5, 1955, H. R. 861, a copy of which is attached. This bill provides an extension of the payment of railroad unemployment insurance benefits to July 1, 1955 for the unemployed railroaders whose benefits terminated after January 1, 1955. The bill provides that the sum of $10 million shall be appropriated from the general funds of the Treasury of the United States to cover the cost of all the benefits provided in the bill. Through the extension of railroad employment insurance benefits for the first 6 months of 1955, assistance will be rendered the unemployed while they await either recall to service or obtain employment elsewhere through the united efforts of the Railroad Retirement Board and the United States Department of Labor.

In addition to H. R. 861, I introduced H. R. 860 to provide for a program of public facilities construction which will stimulate employment in areas having a substantial surplus of labor. This bill which I had pending in the 83d Congress when it adjourned, also provides for an appropriation of $3 billion to cover the cost of my proposed public works program.

To further assist the unemployed and their families, I introduced on January 5, 1955, H. R. 863, to provide for the distribution of certain surplus food commodities by use of a food stamp plan, and requested that the necessary expenses of administering the food stamp plan be borne by the Federal Government.

To protect the property of all those who may be called upon to depend on public assistance from the Commonwealth of Pennsylvania, I introduced H. R. 862, which prohibits the several States from taking a lien against the real estate of the recipient as is being done under existing law.

The legislative program for the relief of the unemployed railroaders in my congressional district outlined in this letter has been called to the attention of the leadership of the Democratic-controlled 84th Congress and the chairman of the congressional committees concerned urging immediate consideration of the legislation. In addition, I am personally contacting every Member of Congress and officials of organized labor including railroad brotherhoods, asking their assistance in securing early congressional action.

As you know, the 84th Congress convened this week and it will be the early part of February before the legislative machinery will begin to function. Meanwhile, you can be certain that I shall continue my determined efforts to provide relief for the unemployed by obtaining early action on my legislative proposals.

I am sending copies of this letter to interested persons in the Altoona area for their information.

With best wishes, I am

Sincerely,

JAMES E. VAN ZANDT.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D. C., January 22, 1955.

Hon. J. PERCY PRIEST,
Chairman, House Interstate and Foreign Commerce Committee, Washington, D. C.

DEAR PERCY: You will remember our recent conversation concerning my bill, H. R. 861, a copy of which is attached and which provides temporary extension to June 30, 1955, of railroad unemployment insurance benefits to those who have or will have exhausted their rights under existing laws.

There are 24 areas in the United States where a substantial number of railroad workers are unemployed because of a permanent or indefinite shutdown of railroad facilities. Starting early this month, many of these unemployed railroad workers exhausted their rights to railroad unemployment insurance with the result that there exists a most acute economic problem in these areas.

For an illustration, according to information furnished me by the Railroad Retirement Board, in Nashville, Tenn., 2,500 railroaders are unemployed and the survey reveals that the local industry other than the railroads will be able to absorb only a few of them. The result is that in your hometown of Nashville there are some 2,500 unemployed railroaders and their families who have lost or are about to lose their unemployment-insurance benefits which is their only source of income.

In my hometown of Altoona, Pa., there are 6,000 unemployed railroad workers whose unemployment-insurance benefits began to expire January 10, and in the matter of a few weeks some 4,500 will have exhausted their rights to unemployment-insurance benefits. Since Altoona's basic economy is the railroad industry, the only source of income left for these furloughed railroaders and their families is public assistance because local industries cannot provide employment for them. Therefore, my hometown has a similar acute economic problem to that of your hometown of Nashville.

At my request, the United States Department of Labor and the Railroad Retirement Board have made a survey of the Altoona situation with the result that the skills of unemployed railroaders have been classified and every effort will be made to secure employment for them elsewhere. While this effort is being made to obtain employment for this group, my bill, H. R. 861, will extend their railroad unemployment insurance benefits to the end of the present fiscal year as if they had retained their eligibility. You will observe that I have requested an appropriation of $10 million from the general funds of the Treasury of the United States so as to finance the cost of the extension and not disturb the solvency of the railroad unemployment insurance fund.

As I said in the beginning, there are 24 areas in the United States which include your hometown and my hometown that are faced with this acute economic problem resulting from unemployment in the railroad industry. I have delayed writing this letter to you so as to permit adequate time for perfecting the organization of your committee. Now that your committee is organized, it is my hope that you can give the subject of railroad unemployment top priority and arrange to discuss it at either a full committee meeting or assign it to a subcommittee so hearings can be held.

On behalf of the citizens of Altoona, I wish to inform you that everything possible is being done from a community standpoint to relieve the unemployment situation, and it is hoped that the extension of unemployment-insurance benefits will receive early consideration by your committee.

With kindest personal regards, I am

Sincerely,

JAMES E. VAN ZANDT.

Twenty-four areas where a substantial number of railroad workers are unemployed because of a permanent or indefinite shutdown of railroad facilities

Area	Number currently unemployed	Number estimated to obtain other employment in the community	Number estimated to remain unemployed

CHICAGO, ILL., *January 25, 1955.*

To: Regional Directors, regions 1, 2, 3, 4, 5, 6, and 7.

From: Director of unemployment and sickness insurance.

Subject: Railroad unemployment, Altoona, Pa.

Please refer to our memorandum of January 18, 1955, on the above subject. In that memorandum we mentioned that unemployment of railroad workers in Altoona, Pa., is attracting national attention and informed you that you would be requested to ask your field offices to develop orders for recruitment in Altoona as soon as information was available from the inventory of unemployed railroad workers then in progress.

Attached is a tabulation showing by age groups the number of unemployed railroad workers in Altoona (Blair County) in each occupation or occupational group listed. A majority of these claimants have already been paid the maximum amount of UI benefits to which they are entitled this benefit year. A high proportion do not have enough 1954 earnings to be qualified next year.

You are requested to forward this tabulation to each field office in your region and ask them to contact all railroad hiring officials who might possibly have need for the services of employees in any of the occupations listed. Any orders developed are to be written up on form ES–113a and forwarded direct to the district manager at Altoona, Pa. All sections of form ES–113a should be carefully completed. Depending on the conditions of the order, particularly arrangements for transportation and physical examination requirements, the district manager at Altoona will either (1) refer applicants in person direct to the hiring official shown on the order, or (2) will forward to the hiring official an application form similar to exhibit A of FOM–III–4.

Please request your field offices to give top priority to this attempt to develop orders for recruitment in Altoona. It is requested that all hiring officials be contacted and all possible clearance orders obtained and forwarded to Altoona no later than February 4, 1955.

H. L. CARTER.

Active claimants, Jan. 1, 1955, Altoona, Pa. (Blair County)

[From the CONGRESSIONAL RECORD of February 17, 1955]

Mr. VAN ZANDT. Mr. Speaker, I am opposed to the rule because it will not permit amendments to H. R. 1 when it is read under the 5-minute rule.

This closed rule is a gag rule and denies me as a representative of some 300,000 people to offer amendments to the bill that will protect their interests as American wage earners.

We who live in the 20th Congressional District of Pennsylvania, have made every effort possible to obtain relief from the adverse effects of the unlimited and unrestricted importation of foreign residual oil which is one of the main factors in wrecking our economy. Unless those of us from coal-producing States are permitted to offer amendments to H. R. 1 curbing the flood of foreign residual oil, we have no other means of stopping it.

The unemployment in my congressional district is mounting daily and as of January 1, 1955, there were 18 percent of our employables unemployed. It is in the name of the unemployed in my district who are today living on public assistance and surplus food commodities, that I ask that this closed rule be defeated.

I am sure that the membership of this House if given an opportunity to vote on an amendment providing for a 10 percent quota limitation on the importation of foreign residual oil that such an amendment will be approved overwhelmingly, since it will restore employment and also protect the jobs of those presently employed.

[From the CONGRESSIONAL RECORD of February 18, 1955]

Mr. VAN ZANDT. Mr. Chairman, the opposition expressed by a great many Members of this House to the gag rule now in effect on H. R. 1 reveals the feeling on the part of a great percentage of the American people that this legislation should be open for amendments.

I opposed the gag rule yesterday, and shall vote to recommit the bill. If the motion to recommit the bill fails, I shall vote against H. R. 1 on final passage because the interests of American wage earners are not protected.

After all, it is only through appropriate amendments that the jobs of American wage earners can be protected.

As the printed hearings on H. R. 1 will show, a long list of Members of Congress as well as spokesmen for numerous industries appeared before the House Ways and Means Committee pleading that H. R. 1 be amended in order that relief might be provided to many of our basic industries which have suffered because of the unfair competition resulting from a flood of cheaply manufactured foreign goods.

Many Members of Congress who appeared before the House Ways and Means Committee in protest against the damaging effects on the jobs of American wage earners resulting from reciprocal trade agreements have supported the principle of reciprocal trade in previous Congresses but to use their own words—they could not continue to do so any longer unless appropriate amendments were adopted.

When I first came to Congress in 1939 I opposed reciprocal trade agreements on the grounds that they were destroying the jobs of coal miners in my congressional district in Pennsylvania. At that time, imported Russian coal had captured some of the eastern seaboard coal markets from coal producers in my congressional district.

During the early part of World War II and before resigning my seat in Congress to return to military service, I supported the extension of reciprocal trade agreements in the 78th Congress because we were at war and the demand for coal revived our coal industry.

When I was elected to the 80th Congress I voted in favor of extending reciprocal trade agreements with the understanding that American industries would be protected from

unfair competition resulting from a flood of cheaply manufactured foreign goods.

For example, in Pennsylvania residual oil from Venezuela was beginning to flood the eastern seaboard, thus destroying the market for Pennsylvania-mined coal.

During the 82d Congress I voted to extend reciprocal trade agreements because there was contained therein the so-called peril-point amendment which was designed to provide a checkrein on imports that could destroy the jobs of American wage earners.

During the 83d Congress I joined many of my colleagues in an effort to stop the uncontrolled flow of foreign goods. Many of you will recall that we were supporting the Simpson bill. My special interest was in regulating the flood of foreign residual oil by placing a quota limitation on the importation of such oil. As many of you will recall, the Simpson bill was returned to the committee.

During the early part of 1954 the so-called Randall committee was created and took testimony from spokesmen for industries adversely affected by the importation of cheaply manufactured foreign goods. I regret to state that the coal industry was denied the opportunity to present its side of the case. Consequently the Randall report ignored the increasingly serious situation existing in the coal-producing States of our Nation.

Mr. Chairman, by my votes as a Member of Congress there is ample proof that I believe in the principles of reciprocal trade agreements and that I supported them until I found a wholesale disregard for protecting the jobs of American workmen.

It became evident that the so-called peril-point amendment was meaningless and that the Randall committee merely performed a window-dressing job and actually by their recommendations threw American wage earners to the wolves.

Mr. Chairman, I voted against the extension of reciprocal trade agreements last year and I intend to continue to do so until the interest of the American working man is protected.

As a means of attaining the objective of protecting the jobs of American workmen, I have 3 bills pending before the House Ways and Means Committee, namely: H. R. 345, H. R. 864, and H. R. 3019.

H. R. 345 is designed to provide a 5-percent quota limitation on imports of foreign residual oil; while H. R. 3019 would increase the limitation to 10 percent.

H. R. 864 provides a permanent procedure for the adjustment of tariff rates on a selective basis and regulates the flow of imported articles on a basis of fair competition with domestic articles. H. R. 864 also contains a 5-percent quota limitation on imports of foreign residual oil.

Mr. Chairman, I am opposed to H. R. 1 because it will continue the disastrous effects on our economy by the reckless importation of foreign goods manufactured at a fraction of the wages paid American workmen.

For several weeks the House Ways and Means Committee has heard expert testimony from spokesmen for various industries regarding the adverse effects reciprocal trade agreements are having on our industrial economy. These experts produced facts showing that the employees of the industry affected not only lost their jobs but many of the manufacturing plants have been driven to financial distress, and in some instances were forced to close their doors.

Spokesmen for the coal industry told how the flood of foreign residual oil from Venezuela has destroyed the domestic coal markets of the miners in Pennsylvania, Maryland, and West Virginia.

Back in 1939 when I first voiced my opposition to the importation of slave-mined Russian coal and other cheaply manufactured foreign products, I predicted that such a reckless policy would create ghost towns out of many communities in my congressional district and throughout the Nation.

Mr. Chairman, my prediction of 1939 has become a reality. Practically all of our deep mines in central Pennsylvania are closed and thousands of miners have been out of work for several years. In fact, many mining towns have been abandoned and their empty and dilapidated rows of houses stand as a monument to the destructive effects of the importation of foreign residual oil. Because they have nowhere to go, there are only a few of the unemployed in the coalfields of central Pennsylvania that have left the area. The result is that today, according to the United States Department of Labor, my congressional district is classified as a critical area because of the fact that nearly 18 percent of the civilian labor force is unemployed.

This unemployment is not confined to coal miners, but includes those employed in affected related industries such as the railroads.

Mr. Chairman, in my home city of Altoona, Pa., nearly 10,000 people are unemployed, 6,000 of whom are railroad employees with 4,100 of this number having exhausted their rights on January 10, 1955 to railroad unemployment insurance benefits. A similar condition exists among coal miners and others who have lost their right to unemployment compensation benefits from the State of Pennsylvania.

Mr. Chairman, every community in my congressional district has an active committee engaged in trying to attract new industries and millions of dollars have been raised by voluntary subscription to finance this long-range program of rehabilitating the industrial economy of the area.

While this united community effort goes on, thousands of my constituents—all good Americans and victims of this reckless foreign-trade policy—are today dependent for their existence upon public assistance and surplus food commodities.

I regret that every member of this Committee is unable to talk to these unemployed Americans as they stand in line to pick up their food coupons. If it were possible for you to talk to them, you would hear the pitiful story of their plight as citizens of a nation that boasts of its high standard of living.

As I mentioned a moment ago, communities affected by unemployment in cooperation with the State and Federal Government are endeavoring to rehabilitate their economy by attracting new industries. The unemployment situation, however, is getting worse as mines continue to close and more miners and railroaders are losing their jobs.

While this unfortunate situation prevails in the United States, residents of Venezuela, which is the chief exporter of residual oil, are enjoying unbridled prosperity.

Let me read you excerpts from Hal Boyle's syndicated column of January 24, 1955, titled "Venezuela Seen as the Texas of South America":

"So much money is being made here (Venezuela) that visiting Texans actually get an inferiority complex and the United States dollar feels like 50 cents. * * * The visitor has a dazed sensation he is caught in a mid-century Klondike gold rush. The atmosphere of quick money is overwhelming, and tales of riches made overnight are a bolivar a dozen. * * * Venezuela is bigger than Texas and Oklahoma combined and larger than any European country except Germany. * * * Its chief income is from oil—no land except the United States produces more. * * *

"Although the nation has a population of only 5½ million, the Government spent half a billion dollars in 1954 on vast public-works projects and still ended up with $80 million left in the till. * * * Foreign investors from the United States and Europe are pouring untold millions into the industrialization of the country. It has taken in more than 100,000 immigrants from Europe the last 10 years. * * *

"Caracas, the 388-year-old capital, is now one of the world's greatest boom cities. Fifty years ago milkmen herded cows through its ancient streets. Today they are jammed by thousands of new high-priced motorcars. * * * Nearly a million people live in the metropolitan area, and so many new buildings are going up construction workers have no time to even take Sundays off to go to the bullfights.

"But the city has abysmal poverty as well as tremendous wealth. The shanties of the poor still crowd many of the raw red hills that stud Caracas. The Government has torn down thousands of these eyesores and replaced them with forty 15-story apartment buildings at a cost of $24 million. Workmen can rent the apartments for $6 to $30 a month, own them after a period of 20 years.

"In 1955 the Government plans to tear down 6,500 more shacks and spend $25 million more on apartment projects for low-income workers."

Mr. Chairman, what a contrast it is to compare living conditions in Venezuela with the coal fields of Pennsylvania.

May I add that the prosperity enjoyed in Venezuela is to a great extent at the expense of the misery and suffering of residents of the coal-producing States of our Nation and especially of my congressional district.

At this very minute a quarter of a million ton tanker ship is tied up at an east coast dock carrying disaster to the coal, railroad and related industries of this Nation, in much the same manner as rat-infested vessels brought disease into our port cities in years gone by.

This foreign tanker with its bunker space filled with residual oil is dumping it in violation of every American concept of fair competition. As a matter of fact, even if the miners of our Nation would work for nothing and the railroads transported the coal for practically nothing, the coal industry could not compete with this unfair competition from foreign residual oil because its price is continually manipulated downward to capture the eastern seaboard coal market.

Mr. Chairman, it is being said in defense of residual oil that the oil companies have been requested to restrict voluntarily the amount of residual oil imported quarterly.

It has also been said that if any restrictions are placed on the importation of foreign residual oil that we will offend Venezuela.

Let me state, Mr. Chairman, that every time a coal miner loses his job because of the unfair competition from foreign residual oil a railroader has also been added to the list of the unemployed.

Mr. Chairman, those of us who represent coal-producing States recognize foreign residual oil as the archenemy of our industrial economy.

Therefore, I plead with you that H. R. 1 be returned to committee so that appropriate amendments can be adopted.

As far as I am concerned, it is about time we start adopting some of the policies foreign nations apply against us in protecting the jobs of their industrial workers.

Mr. Chairman, H. R. 1 without appropriate amendments will not correct the unemployment situation and afford the necessary relief to distressed industries and therefore I cannot conscientiously vote for it.

NATIONAL FOREST RESERVATION COMMISSION

The SPEAKER. Pursuant to the provisions of title XVI, section 513, United States Code, the Chair appoints as members of the National Forest Reservation

Commission the following Members on the part of the House: The gentleman from Mississippi, Mr. COLMER, and the gentleman from Oregon, Mr. COON.

THE LATE FREDERICK HERBERT BROWN

The SPEAKER. The Chair recognizes the gentleman from Massachusetts [Mr. MCCORMACK].

Mr. MCCORMACK. Mr. Speaker, a great fighter for the cause of right, a doer of good deeds, and a stalwart of the Democratic Party has departed this mortal scene.

Frederick Herbert Brown died a few days ago at his home in Somersworth, N. H., and I cannot let this sad occasion pass without paying my tribute to the memory of this former Member of the United States Senate who was a leader and an inspiration of the New Deal at the height of its power.

His death at the age of 75 recalled his long years of public service in a variety of important and responsible posts on local, State, and national levels.

In his rise Fred Brown carried the banner of the Democratic Party to rare victories in New Hampshire, where he was elected Governor in 1922 and United States Senator 10 years later.

Previously he had served with distinction as city solicitor of Somersworth, a member of the State constitutional convention, and, for 8 years, as mayor of that community. He was, also, during this period, United States district attorney and a member of the electoral college, casting a ballot for the Woodrow Wilson-Thomas Marshall ticket in 1912.

Renowned as an athlete in his youth, when he starred for Dartmouth College and, later, the Boston Braves, he carried sportsmanship from the baseball field into the arena of politics. He fought hard but cleanly for the principles in which he believed.

One of his greatest and most successful battles in the Senate, to which he came directly from the bench of his State's public service commission, was in behalf of legislation outlawing utility holding companies except those essential to operation of single systems.

He fought and helped to win this victory for protection of consumers against the practices of financial jugglers who used the holding companies to siphon off illicit profits at the expense of the rate payers.

Before his long illness struck him down and forced him to relinquish official duties Senator Brown served creditably but briefly as Comptroller General of the United States and as a member of the United States Tariff Commission.

He was a close friend and adviser of the late President Franklin Delano Roosevelt who found Senator Brown's sagacity, his penetrating humor, and his deep sense of justice a source of invaluable aid.

Frederick Herbert Brown was a man who rose to professional and public eminence to meet the needs of his times on the national scene, yet who never lost the common touch or contact with the New England soil from which he sprang.

Of him it may be said: "Well done, thou good and faithful servant."

COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE

Mr. TRIMBLE. Mr. Speaker, I call up House Resolution 105 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That effective from January 5, 1955, the Committee on Interstate and Foreign Commerce may make such investigations and studies as it deems advisable with respect to any matter within its jurisdiction. For the purposes of such investigations and studies the committee, or any subcommittee thereof, may sit and act during the present Congress at such times and places within or outside the United States, whether the House is in session, has recessed, or has adjourned, to hold such hearings, and to require, by subpena or otherwise, the attendance and testimony of such witnesses and the production of such books, records, correspondence, memoranda, papers, and documents, as it deems necessary. Subpenas may be issued under the signature of the chairman of the committee or any member of the committee designated by him, and may be served by any person designated by such chairman or member.

The committee may report to the House at any time during the present Congress the results of any investigation or study made under authority of this resolution, together with such recommendations as it deems appropriate. Any such report shall be filed with the Clerk of the House if the House is not in session.

With the following committee amendment:

Strike out all after the resolving clause and insert in lieu thereof the following: "That effective from January 3, 1955, the Committee on Interstate and Foreign Commerce may make investigations and studies into the following matters within its jurisdiction—

"(1) the competition among the various modes of transportation, whether rail, air, motor, water, or pipeline; the preservation of the inherent advantages of each mode of transportation; expedition of the operations of the regulatory bodies; the adequacy of the national transportation system for defense and for the expanding needs of our growing economy;

"(2) the allocation of channels to radio and television stations; educational television; subscription and theater television; the administration by the Federal Communications Commission of the statutes which it administers;

"(3) the treatment of nonscheduled and feeder airline carriers; improvements to air safety; the restrictions placed on American air carriers which impede the free flow of commerce; rates and continuance of subsidy payments; airport construction, and hazards of adjacency to airports; condemnation of air space; aircraft and airline liability;

"(4) the adequacy of the protection to investors afforded by the disclosure provisions of the Securities Acts measured in terms of the purposes intended and the practice in distribution and underwriting; the adequacy of the protection to investors in investment companies; the adequacy of the current protection to customers of broker-dealers; the expediting of the liquidation of the work under the Public Utility Holding Company Act in the simplification and integration of utility holding companies;

"(5) the availability and adequacy of petroleum, natural gas, and electric energy resources for defense and the expanding needs of our growing economy; the development of synthetic liquid fuel processes; the expediting of rate cases;

"(6) advertising generally, fair competition, and the administration of such statutes administered by the Federal Trade Commission;

"(7) research in weather, including air pollution and smog; artificially induced weather, and the sovereignty of a cloud;

"(8) the effects of inflation upon the benefits provided under railroad retirement and railroad unemployment provisions; inequities in provisions of the statutes relating thereto, with comparison of benefits under the social security system; and the operations of the Railroad Retirement Board;

"(9) provision for medical care; the adequacy of supply of hospitals, treatment centers, nursing homes, medical personnel, and medical teaching facilities; research into human disease; the operations of the Public Health Service, and of the Food and Drug Administration;

"(10) research in the basic sciences being undertaken by the National Science Foundation;

"(11) disposition of funds arising from the operation of the Trading With the Enemy Act; and

"(12) the current and prospective consumption of newsprint and other papers used in the printing of newspapers, magazines, or such other publications as are admitted to second-class mailing privileges; the current and prospective production and supply of such papers, factors affecting such production and supply, and possibilities of additional production through the use of alternate source materials:

Provided, That the committee shall not undertake any investigation of any subject which is being investigated by any other standing committee of the House.

"For the purposes of such investigations and studies the committee, or any subcommittee thereof, may sit and act during the present Congress at such times and places within or outside the United States, whether the House is in session, has recessed, or has adjourned, to hold such hearings, and to require, by subpena or otherwise, the attendance and testimony of such witnesses and the production of such books, records, correspondence, memoranda, papers, and documents, as it deems necessary. Subpenas may be issued under the signature of the chairman of the committee or any member of the committee designated by him, and may be served by any person designated by such chairman or member.

"The committee may report to the House at any time during the present Congress the results of any investigation or study made under authority of this resolution, together with such recommendations as it deems appropriate. Any such report shall be filed with the Clerk of the House if the House is not in session."

Mr. TRIMBLE. Mr. Speaker, I yield 30 minutes to the gentleman from Illinois [Mr. ALLEN] and yield myself such time as I may consume.

Mr. Speaker, this is a regular resolution reported by the Committee on Interstate and Foreign Commerce of the House. It has been amended to conform with the suggestions of the Committee on Rules and has been unanimously approved by our committee. So far as I know, there has been no objection to it.

COMMITTEE ON RULES

Mr. SMITH of Virginia. Mr. Speaker, I ask unanimous consent that the Committee on Rules may have until midnight tonight to file certain privileged reports.

Mr. ARENDS. Mr. Speaker, reserving the right to object, may I ask the chairman of the Committee on Rules if he is referring to the bill which was under

consideration before his committee this morning.

Mr. SMITH of Virginia. Does the gentleman refer to the tax bill?

Mr. ARENDS. Yes, the tax bill.

Mr. SMITH of Virginia. Yes, that bill and one other bill.

Mr. ARENDS. Under the circumstances, in view of the fact that the Committee on Rules has not yet reported the rule and not knowing whether or not they will, and because of the fact that this whole matter has been handled rather expeditiously and in the best interests of all Members of the House and probably even of the country, I am constrained to object to the filing of the report at this time.

The SPEAKER. Is there objection to the request of the gentleman from Virginia [Mr. SMITH]?

Mr. ARENDS. Mr. Speaker, I object.

COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE

Mr. ALLEN of Illinois. Mr. Speaker, I know of no opposition to this resolution, and I yield back the balance of my time.

Mr. TRIMBLE. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on the committee amendment.

The committee amendment was agreed to.

The resolution was agreed to.

The title was amended so as to read: "Resolution to authorize the Committee on Interstate and Foreign Commerce to conduct investigations and studies with respect to certain matters within its jurisdiction."

A motion to reconsider was laid on the table.

FOREIGN AFFAIRS

Mr. MADDEN. Mr. Speaker, by direction of the Committee on Rules, I call up the resolution (H. Res. 91) authorizing the Committee on Foreign Affairs to conduct thorough studies and investigations of all matters coming within the jurisdiction of such committee, and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That the Committee on Foreign Affairs, acting as a whole or by subcommittee, is authorized and directed to conduct thorough studies and investigations of all matters coming within the jurisdiction of such committee.

SEC. 2. For the purposes of this resolution, the committee, or any subcommittee thereof, is authorized to hold such hearings, to sit and act during the present Congress at such times and places as the committee may determine, whether or not the House is in session, has recessed, or has adjourned, to require the attendance of such witnesses and the production of such books, papers, and documents by subpena or otherwise, and to take testimony, as it deems necessary. Subpenas may be issued under the signature of the chairman of the committee and shall be served by any person designated by such chairman. The chairman of the committee or any member designated by him may administer oaths to witnesses.

With the following committee amendment:

Strike all after the resolving clause and in lieu thereof insert the following:

"That effective from January 3, 1955, the Committee on Foreign Affairs, acting as a whole or by subcommittee, is authorized and directed to conduct a full and complete investigation and study of all matters—

"(1) relating to the laws, regulations, directives, and policies including personnel pertaining to the Department of State and such other departments and agencies engaged primarily in the implementation of United States foreign policy and the overseas operations, personnel, and facilities of departments and agencies of the United States which participate in the development and execution of such policy;

"(2) relating to the carrying out of programs and operations authorized by the Mutual Security Act and to other laws and measures to promote the foreign policy of the United States;

"(3) relating to activities and programs of international organizations in which the United States participates;

"(4) relating to the effectiveness of United States programs of assistance and information; and

"(5) relating to legislation within the jurisdiction of the Committee on Foreign Affairs pursuant to provisions of rule XI of the Rules of the House of Representatives:

"Provided, That the committee shall not undertake any investigation of any subject matter which is being investigated by any other standing committee of the House.

"The committee shall report to the House (or to the Clerk of the House if the House is not in session) as soon as practicable during the present Congress the results of its investigation and study, together with such recommendations as it deems advisable.

"For the purpose of carrying out this resolution the committee or subcommittee is authorized to sit and act during the present Congress at such times and places within or outside the United States, whether the House is in session, has recessed, or has adjourned, to hold such hearings, and to require, by subpena, or otherwise, the attendance and testimony of such witnesses and the production of such books, records, correspondence, memoranda, papers, and documents, as it deems necessary. Subpenas may be issued under the signature of the chairman of the committee or any member of the committee designated by him, and may be served by any person designated by such chairman or member."

Mr. MADDEN. Mr. Speaker, I yield myself such time as I may desire, and yield 30 minutes to the gentleman from Illinois [Mr. ALLEN].

Mr. Speaker, this resolution was acted on by the Committee on Rules unanimously. This is the usual resolution giving the Committee on Foreign Affairs the customary power of investigation. This resolution gives the committee authority to make a survey and investigation of all branches of the State Department and other matters pertaining to our foreign relations. I do not know of any opposition to the resolution.

Mr. Speaker, I now yield 10 minutes to the gentleman from South Carolina [Mr. RICHARDS].

Mr. RICHARDS. Mr. Speaker, I ask unanimous consent to proceed out of order for 10 minutes.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. RICHARDS. Mr. Speaker, when the Congress passed the so-called Formosa resolution a couple of weeks ago, by a vote of 409 to 3 in the House and 85 to 3 in the Senate, I think we all believed that our position was clear, that our leaders knew where we were going and that Red China and the men in the Kremlin were being put on notice as to our intentions.

As of today, it seems to me that confusion has replaced determination among some of our leaders in the executive branch and that the Communist dictators, instead of being given notice that we would not acquiesce in any further aggression in the area of Formosa, apparently are being invited to bargain with us for territory held by the Nationalist Government of China.

The key to the whole situation seems to be whether or not we are ready to help Nationalist China defend Quemoy and Matsu.

Evidently Foreign Minister Chou of Red China thinks we are not. He still boldly asserts that he will take Formosa by force of arms; and that the Tachens which we refused to help defend provide the first stepping stone. There are few to deny that Quemoy and the Matsu group will be next unless we dispel all doubt as to what we will do.

Our friends, the British, according to the papers, are dismayed at the harshness of the resolution. They are out to soften us up and Mr. Eden goes to the Bangkok conference, one of his avowed purposes being to convince us that we have no stake in Quemoy and Matsu and to lead us further down the road of appeasement.

Chiang Kai-shek, thinking that we would announce to the world without equivocation that we would help defend Quemoy and Matsu, stands aghast that there is confusion on that point.

The other non-Communist peoples of Asia stand with their fingers crossed, still doubting that we would fire a gun if Matsu and Quemoy are attacked.

I am sorry that our Secretary of State, Mr. Dulles, did not, in his speech of February 16, make the position of the United States crystal clear in this connection.

With his statement that "the United States has no commitment and no purpose to defend the coastal positions as such" I find no quarrel, but he might have gone further and said that on the basis of our best military advice, if Quemoy and Matsu are lost, the job of defending Formosa will be much more difficult and costly, and we would defend them on that basis.

It is true that it is good military policy not to tell your enemy what points you are going to defend, but where the strategic importance of a defense point is obvious to both sides we lose no military advantage by declaring our intentions.

I am glad that the Secretary called to the attention of the world that "a great danger in Asia is the fear of many non-Communist peoples that the United States has no real intention of standing firmly behind them. Already that fear has mounted to the danger point."

He said further:

If the non-Communist Asians ever come to feel that their Western allies are disposed to retreat whenever communism threatens the peace, then the entire area could quickly become indefensible.

I, of course, cannot speak for the executive department of our Government. I cannot say with authority what our foreign policy and commitments abroad are. I can say, however, and I feel that I am duty bound to say that, as the sponsor of the Formosan resolution and chairman of the committee which unanimously reported it to the House, it was and is my understanding that the United States would defend Quemoy and Matsu as necessary outposts for the defense of the Pescadores and Formosa.

This House in authorizing the President to defend Formosa did not believe that this action was intended merely to provide propaganda or to try to buy a cease-fire agreement with territory held by Nationalist China. When we acted as we did on the resolution, I am sure that it was because we were convinced that it was vital to the security of the United States that Formosa should be defended and that we expected the President to use the authority granted him for that purpose.

The congressional authority to secure Formosa and the Pescadores against armed attack said:

This authority to include the securing and protection of such related positions and territories of that area now in friendly hands and the taking of such other measures as he judges to be required or appropriate in assuring the defense of Formosa and the Pescadores.

It was made plain that our military experts think that Matsu and Quemoy are among the related positions necessary for the defense of Formosa and the Pescadores.

Let me repeat in order to make my own position clear. As the sponsor of the Formosan resolution in the House, I understood after consultation with and evidence from the executive department, bolstered by military opinion, that if we were going to defend Formosa and the Pescadores, we would assuredly defend Quemoy and Matsu. It was made to appear just as plain as that to me.

If Quemoy and Matsu were needed for the defense of Formosa 2 weeks ago, it seems to me that they are needed for this purpose today and that they will be just as essential for this purpose next year and the year after that. If these islands are given to Red China as part of the price for a cease-fire agreement, where will we be a year from now, or 2 years from now, if the Communist leaders fail to live up to the agreement?

I believe, and the Congress believed, when we authorized the President to defend Formosa that he was prepared to use the resources of this Nation for such defense. We can easily bargain away our strength in the Far East, not only by our loss of strategtic territory but even more important by the loss of the confidence of the free peoples of that area that they can count on our help.

I do not believe that a cease-fire bought on such terms will lead to peace. I thought we were telling the Communist dictators 2 weeks ago that the United States had taken a firm stand and that we believed that a policy of strength and determination was the surest way to peace. Rubber words by the executive branch can only weaken us at home and abroad in this emergency.

Mr. ALLEN of Illinois. Mr. Speaker, I yield 5 minutes to the gentleman from Nebraska [Mr. MILLER].

Mr. MILLER of Nebraska. Mr. Speaker, I ask unanimous consent to speak out of order and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Nebraska?

There was no objection.

Mr. MILLER of Nebraska. Mr. Speaker, I wish the gentleman from South Carolina, chairman of the Foreign Affairs Committee, had made the speech he just made when we were considering the resolution on Formosa. Some of us were complaining that we did not know where the line was drawn. I have stated that apparently the Foreign Affairs Committee knew, the Security Council knew, the military people knew, and the State Department knew, but Members of Congress who represent the people back home were not entitled to know where the line was to be drawn.

Nothing was made clear as to where that line would be, and when we asked if it included the islands of Matsu and Quemoy, we were told, "Hush, hush. You should not know that; do not tip your hand on this thing." Yet the gentleman, who was the chairman of the committee, sponsored a hazy resolution, one which was not clear. He brought it in here before the Congress and said, "This is it, accept it." I voted for it with the understanding that it was going to make clear the position of this Government in relation to the Communist. I think it did just that. The gentleman now has the temerity to blame the administration because he sponsored a resolution which he says was unclear and does muddy the waters. So he comes now and asks, "Why do you not do something about it?" Yet he did not have the frankness and the courage to tell the House of Representatives where that line should be drawn when the problem was under consideration.

I submit to the gentleman from South Carolina that the next time he brings in a resolution that he has the same frankness in his foresight that he has in his hindsight. Then perhaps the Members of the House of Representatives will know something about the resolution upon which they may express their judgment.

Mr. RICHARDS. Mr. Speaker, will the gentleman yield?

Mr. MILLER of Nebraska. I yield to the gentleman from South Carolina.

Mr. RICHARDS. The gentleman from South Carolina made it as plain as he could when this resolution was brought before the House that he considered the spirit of the resolution to cover the defense by arms of Quemoy and Matsu. I made that just as plain as I could. Some other people may be hazy on the subject but I was not and so stated.

Mr. MILLER of Nebraska. If the gentleman will read the debates on the subject he will know that Members of the Congress did raise the question of where the line of defense would be. I state again that if the gentleman had made the speech he made this morning at the time we were discussing the resolution, there would be little of which to complain. His resolution was so hazy and confusing that Members of Congress were not quite sure where this mystery line was to be drawn as to the defense of Formosa. I am sure the President will exercise sound judgment in carrying out the provisions of the Formosa resolution. As a Member of Congress I trust future resolutions will spell out clearly our intention. The chairman bringing in resolutions has a duty to make crystal clear where defense lines will be.

Mr. MADDEN. Mr. Speaker, I yield 7 minutes to the gentleman from Massachusetts [Mr. MCCORMACK].

Mr. MCCORMACK. Mr. Speaker, now that this subject has been brought up I think a little plain speaking will do some good. We have heard a lot about bipartisan policies in our foreign affairs.

We had a meeting in April of last year which was very important, one that was called by the Secretary of State. We also had another one. Both of these were high policy meetings where it was expected the legislative leaders would commit themselves or make a commitment—at least that was my impression. Those meetings should have been called by the President. Those were meetings that should have been on the Presidential level. But they were called by the Secretary of State. I remember well what the meeting last April was called for. It was that the leaders in the Congress, you and I, would commit ourselves in Indochina without any assistance from any other country. We were definitely told by the Secretary of State that the President asked him to call the meeting, and if he did not make that statement I would assume he did anyway.

Mr. MILLER of Nebraska. Mr. Speaker, will the gentleman yield?

Mr. MCCORMACK. I yield to the gentleman from Nebraska.

Mr. MILLER of Nebraska. Did the majority leader have the understanding when the Formosa resolution was under discussion that there was a definite line drawn as the gentleman who sponsored the resolution said there was?

Mr. MCCORMACK. My impression is absolutely in line with that of the gentleman from South Carolina on the Formosa resolution.

Mr. MILLER of Nebraska. Does he think that expression was definitely outlined here when it was under discussion?

Mr. MCCORMACK. I do not know. I certainly think that the debates clearly show that such an impression did exist. I remember the speech I made where I said it called for unity, and a firm position on the part of the representatives of the people of the United States. Certainly no other construction could be

placed upon such language than that. I know what the conversation was and I know what they said to us, and the gentleman from South Carolina is to be highly complimented for the speech he made today.

Now, coming back to what I started to say, so far as I am concerned, outside of one meeting before Christmas, or several weeks before Christmas, there was really no necessity for calling that meeting, because I knew nothing more after I left than I did when I came down from Boston to attend it. Outside of that, and one just prior to Christmas, which I could not attend, there have been two high policy meetings, one in April of last year and one this year before the Formosan resolution. They were held by leaders of both branches in the Secretary of State's office. Admiral Radford was there. No other members of the Joint Chiefs of Staff were present at any of those meetings. I thought it very strange that there was not another member of the Joint Chiefs of Staff present last April, and I asked Admiral Radford if the views that he expressed then represented the views of the Joint Chiefs of Staff, and to my surprise he said, "No." Then Senator CLEMENTS asked him later, "What was the division?" And he said, "The others did not agree with me." Now, there are four members of the Joint Chiefs of Staff, and "the others" in number are three.

Now, we had a meeting with the Secretary of State on the Formosan resolution, and the next Monday the Republican Members had a meeting with the President on the contents of the message in relation to the Formosan resolution. It seems to me that the contents of a message are just as much bipartisan as any other part of the consideration which entered into the making of the message. I do not know whether the Speaker knew about the contents of the message on Formosa, but I had a copy of the message, when it was handed to me, when it was about a third through being read and when it was being handed to the Members of the House. I later found out that the Speaker—according to my recollection of what he told me—received a copy of the President's message about 5 minutes before it arrived here or was read. Now, you can do your own evaluating, but my evaluation is that that is not leadership in the White House that results in real bipartisan action, and we Democrats, under restraint and at a great sacrifice, have been giving the country the greatest exhibition of bipartisanship on the part of the Democratic Party that the country could possibly expect. They can continue such course if they want to; I cannot stop it.

On the ticker today there is a statement made by the President about the program of the House. I do not even know when messages are coming up. It is immaterial to me, but we ought to know. The Democratic leadership is still the majority leadership in the House. I do not expect to be consulted by the President on domestic matters or the leadership of the House, but certainly on foreign matters it is a different proposition; at least, we ought to be advised when things are coming up here, because the House looks to the majority leadership to inform them as to the program of the House. Yet, I have never been advised by the White House as to when any message is coming up here. I have to go and ask the Republican leaders as to when any messages are coming up. While I like the Republican leadership, it is rather embarrassing for me to have to go to the Republican leaders as to when a message is coming up to this body from the White House.

Now, on the ticker today is a statement by the President at a press conference that he knows SAM RAYBURN so well that if Sam wants to know what he is going to do, he can call him up or something to that effect. He overlooks the fact that he is talking about the Speaker of the House of Representatives. He overlooks the fact that the initiative ought to come from him. Certainly he ought to keep the constituted leadership of both parties advised. He keeps the Republican leadership advised. At least, he ought to keep some of us advised. I do not expect the President to pick up the phone, but some of his administrative assistants can do it, or the secretary acting for the President. Certainly, they ought to keep the Democratic leadership advised as to matters coming up in this branch.

So far as I am concerned, it does not mean anything personally to me, but from the angle of leadership and coordinated action, from the angle of the country, it seems to me that the White House or someone acting for the President or the President through someone acting for him should keep not only the Republican leadership advised on matters of importance to the House but should keep the Democratic leadership advised.

Mr. ALLEN of Illinois. Mr. Speaker, I yield 10 minutes to the gentleman from Indiana [Mr. HALLECK].

Mr. HALLECK. Mr. Speaker, I somewhat regret that things have taken the turn here that they have. I do not quarrel with the right of the gentleman from South Carolina, who is the chairman of the Committee on Foreign Affairs, to make the statement he has just made, although I do not agree with parts of it. As the chairman of that committee he had the initial responsibility for the Formosan resolution.

I still believe that the action of the President in submitting that proposition to the Congress of the United States was one of the finest things that has happened in respect to our foreign affairs in a long, long time. It demonstrated not only a sincere devotion to the traditional constitutional doctrines of our Government, but I think, more importantly than that, it afforded a way by which we could make known to the world, to our people, and to the peoples of other lands, both potential enemies and friends, where we stood with respect to continuing threats of aggression by the sword-rattling Red Chinese war lords.

To my mind, that resolution was sufficiently definite. Obviously, with various outlying related areas involved, it was not practical, in the nature of our own operation, to try to spell out every little detail of our policy. The thing I think we ought to hold fast to is that affirmative action was taken and a line sufficiently definite has been drawn. I think it is highly desirable that there is yet a certain area where decisions and determinations may be made, may I say, by people who in my opinion, in this most delicate, critical time are eminently qualified to make those decisions.

The situation is so sensitive that I sincerely hope that for whatever reason we may want to speak we do not rock the boat too much. I still believe we are going to win through the difficult situation that confronts us without becoming involved in any war. That certainly ought to be the heart's desire of every right-thinking American.

Now in respect to what the gentleman from Massachusetts has spoken about, concerning bipartisanship in foreign policy and in domestic policy, he will recall with me, I am quite sure, that one day a few years back I was in the position he how occupies. I was the majority leader of the Republican 80th Congress when our President was Mr. Harry S. Truman. I want him to recall with me that as the majority leader in that Republican Congress I was sent for to come to the White House to have there presented to us the Greek-Turkey aid, the interim aid to France and Italy, the Marshall plan, and the North Atlantic Pact. Will he not agree with me when he speaks of bipartisan cooperation that we there cooperated? It is a matter of record also that after we were defeated in 1948, I was not called back to the White House. I did not get any communication from the White House or anybody down there until things began to go bad in Korea. The gentleman speaks of the meeting last April. I thought it was a satisfactory meeting. He can claim all the credit he wants to, but we have not been plunged into any more Koreas and we were not committed in Indochina.

I was privileged to attend the meeting which was called last December. Possibly the gentleman thought he did not know any more when he left than when he came, but I did not feel that way about it.

I was not invited to the last meeting held before the Formosan resolution. The gentleman from Massachusetts was there. I was not there so I am not in a position to speak as to the conversations at that time.

Mr. ARENDS. Mr. Speaker, will the gentleman from Indiana yield?

Mr. HALLECK. I yield.

Mr. ARENDS. With reference to that particular point, may I say I was in attendance at this meeting at the State Department, not because I happened to be a part of the leadership of the House but only because of the fact that the gentleman from Missouri, Mr. DEWEY SHORT, the ranking Republican member of the committee, was not able to be present. The gentleman from Georgia [Mr. VINSON], who is chairman of the Committee on Armed Services, was present. We heard for the first time some of the suggestions with relation to what might be done about Formosa. The gentleman from Massachusetts was there. The Speaker was there, CARL VINSON was there, all from the majority side. I do

not recall whether the gentleman from North Carolina, as chairman of the Foreign Affairs Committee, was there, but I think he was. We had a free exchange of ideas and opinions at that time with the Secretary of State and Admiral Radford, Chairman of the Joint Chiefs of Staff. After that I attended a leadership meeting at the White House, and during a general and usual discussion of matters which regularly come before such weekly meetings we also discussed the Formosa situation, but this was after the initial meeting held at the State Department.

Mr. McCORMACK. Who went to the White House?

Mr. ARENDS. The Republican leadership went to the White House later on a date subsequent to the meeting at the State Department, when the Formosa matter I have just referred to was discussed, along with other items.

Mr. HALLECK. Mr. Speaker, I wanted to get to the second matter about which the gentleman from Massachusetts talked because I think, first of all, it is highly important that in respect to our foreign affairs we try to avoid political considerations as far as possible. May I remind you again, as one who was in a position similar to that occupied by the gentleman from Massachusetts, I certainly proved my devotion to that sort of operation. Now the gentleman speaks of a separate meeting of the Republican leaders to discuss the message that came up on Formosa. I do not recall any such meeting. I was not present at any such meeting. My recollection is that on the occasion of our regular meetings at the White House, discussing many other things that were properly a matter for discussion, only between the Republican leaders and the President and the people at the White House, there may have been some further discussion about the resolution, but I just want the gentleman to understand that so far as I am concerned and so far as I know the action of the President in connection with the Formosan resolution was wholly and completely on a nonpartisan—I think that is a better way to say it—on a nonpartisan basis.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. HALLECK. I yield.

Mr. McCORMACK. I might say that the newspapers carried the story and the gentleman's name was not among those who were present on the Monday morning that the message came up. I want to say that for the record. That confirms what the gentleman has said. But they did mention the names of those who were there to go over the message. Now I am sure, whether it is a bipartisan or a nonpartisan action, call it anything you want to—I am sure that that would be part of the bipartisan action. Will the gentleman agree or disagree that the contents of a message certainly are a part of bipartisan action?

Mr. HALLECK. I think in any discussion which involves a matter like the Formosan resolution, of course, the resolution would be the thing that you are talking about. I had understood that that was discussed at the meeting which was held by the Secretary of State. As I say, I was not there. But I would say to the gentleman very quickly, speaking for myself, that the content of the resolution we would be asked to adopt certainly ought to be a matter for discussion with the Democratic as well as the Republican leaders.

Under the rules of the House, I understand that messages coming up here are to be transmitted to the Speaker. Of course, as far as I am concerned, and as far as I believe now, that practice will be followed, whatever departure there may have been from that requirement in the past. I have every reason to believe any message properly within those rules will be transmitted to the Speaker, in the manner agreed upon.

Mr. McCORMACK. That is not so important. That can be easily adjusted.

Mr. HALLECK. I thought the gentleman made that appear to be quite important.

Mr. McCORMACK. Yes, I did. But I have Members on my side who have come to me and asked me, "John, can you tell me what messages are coming up next week?" I have to tell them, "No, I cannot tell you because I do not know." I telephoned my Republican leadership and asked them if they could let me know so that I could advise the Members. That can be very easily taken care of, and I am sure after this colloquy today, it will be, or at least ought to be. But the gentleman will recognize the fact, at least that if you were majority leader, you would want to know when messages are coming up, would you not?—not as an individual but as representing the leadership in this body.

Mr. HALLECK. If the gentleman will permit me, the important messages——

Mr. McCORMACK. That is what I mean.

Mr. HALLECK. The important messages certainly were referred to in the state of the Union message and the dates were fixed.

Mr. McCORMACK. Oh, the President made that. He made that himself.

Mr. HALLECK. Yes; and as I remember that timetable was pretty well followed, was it not?

Mr. McCORMACK. The President came up by himself on the message on the state of the Union, but other messages, like the Health Department——

Mr. HALLECK. The dates with respect to those were fixed, and the messages came up here on the days when the President had said in his state of the Union message that they would come up here, I think with few exceptions. In any event, in cases where the original timetable was changed advance notice was given of the new date. The gentleman is much too wise and informed to not understand that certainly the time of arrival of these messages was well publicized.

The SPEAKER. The time of the gentleman from Indiana has again expired.

Mr. MADDEN. Mr. Speaker, I move the previous question on House Resolution 91.

The SPEAKER. The question is on ordering the previous question.

The previous question was ordered.

Mr. HOFFMAN of Michigan. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER (after counting). Evidently a quorum is not present.

CALL OF THE HOUSE

Mr. McCORMACK. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 13]

Anfuso	Fino	Meader
Avery	Flood	Merrow
Baker	Fulton	Miller, N. Y.
Baumhart	Gamble	Morrison
Becker	Garmatz	Nelson
Blitch	Granahan	Norblad
Bolton, Frances P.	Green, Pa.	O'Brien, N. Y.
	Griffiths	Philbin
Bolton, Oliver P.	Gubser	Phillips
	Gwinn	Prouty
Bowler	Hays, Ohio	Radwan
Boyle	Hébert	Reece, Tenn.
Broyhill	Hinshaw	Riehlman
Burnside	Hoffman, Ill.	Rivers
Byrne, Pa.	Jensen	St. George
Carrigg	Judd	Scott
Celler	Kearney	Scrivner
Chatham	Keating	Sheehan
Christopher	Kilgore	Shelley
Chudoff	King, Pa.	Sheppard
Church	Klein	Sieminski
Corbett	Kluczynski	Smith, Wis.
Curtis, Mo.	Knox	Spence
Davidson	Knutson	Taylor
Davis, Tenn.	LeCompte	Thompson, Mich.
Dawson, Ill.	Lesinski	
Derounian	McConnell	Thompson, N. J.
Dingell	McCulloch	Tumulty
Dixon	McDonough	Velde
Dollinger	McDowell	Wainwright
Dolliver	McGregor	Wharton
Dorn, N. Y.	Macdonald	Withrow
Eberharter	Machrowicz	Wolcott
Engle	Mack, Ill.	Yates
Fallon	Martin	Young
Fine	Mason	

The SPEAKER. On this rollcall 321 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

FOREIGN AFFAIRS

The SPEAKER. The question is on the committee amendment.

Mr. ALLEN of Illinois. Mr. Speaker, I have one more Member who wants to speak. I was going to object to ordering the previous question, and I had not used up all of my time.

The SPEAKER. The previous question has been ordered.

Mr. ALLEN of Illinois. Mr. Speaker, I had not yielded back the balance of my time.

The SPEAKER. If the gentleman from Illinois desires, the previous question will be vacated, and without objection it is so ordered.

There was no objection.

Mr. ALLEN of Illinois. I thank the Speaker.

Mr. Speaker, I now yield 2 minutes to the gentleman from Illinois [Mr. SPRINGER].

Mr. SPRINGER. Mr. Speaker, I think the statements which have been made by the gentleman from Massachusetts [Mr. McCORMACK] and the gentleman from Indiana [Mr. HALLECK] rather got away from the point which was being made by the chairman of the House

Committee on Foreign Relations [Mr. RICHARDS].

The gentleman from South Carolina [Mr. RICHARDS] was asking where does the administration now stand on the defense of Quemoy and Matsu? Some days ago I listened to the debate by the gentleman from South Carolina on this particular point. It was my understanding at that time, as was stated by the gentleman from South Carolina today, that we would defend Quemoy and Matsu because both were necessary to the primary defense of Formosa and the Pescadores.

As the Members of this body will recall, there was raised later that day in the other body the question of the Chinese Nationalists using these two island groups as an invasion base to the mainland of China. At that point in the debate the President issued a statement through the chairman of the Foreign Affairs Committee of the other body that he, the President, would at all times have control over the military operations in order that the Chinese Nationalists could not get us into a war without our consent. With these reservations it was my understanding, as stated by the gentleman from South Carolina, that we would keep possession of Quemoy and the Matsus.

The gentleman from Indiana [Mr. HALLECK] and the gentleman from Massachusetts [Mr. MCCORMACK] have both made excellent statements here this afternoon with reference to the necessity of unanimity on the Formosa resolution, and the necessity also of working closely together in the House of Representatives when matters having to do with foreign affairs arise in debate. After the exchange of views between those two had finished I believe my colleagues on both sides of the aisle saw that there was not a great deal of political party difference over the matter under question.

Today every nation in Asia is watching us to determine what action we are going to take with reference to Quemoy and Matsu. And more important, whether or not we are going to use those islands as bargaining points with Communist China in order to get a cease-fire over Formosa. I have been somewhat disturbed, as I am sure many of my colleagues have during the past few days, over the activities which some other governments are carrying on to get the United States to yield on this point. It was not my understanding that this administration intended to use these islands as bargaining points to buy peace in the Far East.

In all matters in which I have watched the gentleman from South Carolina he has decried partisanship when it came to foreign affairs on the floor of this House. It seems to me that he is to be commended for the forthrightness with which he has presented this problem here and the sincerity with which he has made this statement because it raises a serious question going to the very heart of the way in which we conduct our foreign relations in the Far East. How we handle Quemoy and Matsu could make all the difference in the world as to whether or not we can hold some of our smaller allies in the Far East. The Formosa issue is the psychological barometer of our standing in Asia. If we yield on this, due to Chinese Communist pressure on our allies, we are in for some real trouble.

The SPEAKER. The time of the gentleman has expired.

Mr. MADDEN. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on the committee amendment.

The committee amendment was agreed to.

The resolution was agreed to.

The title was amended so as to read: "Resolution authorizing the Committee on Foreign Affairs to conduct a full and complete investigation of matters relating to the laws, regulations, directives, and policies, including personnel pertaining to the Department of State and such other departments and agencies engaged primarily in the implementation of United States foreign policy and the overseas operations, personnel, and facilities of departments and agencies of the United States which participate in the development and execution of such policy."

A motion to reconsider was laid on the table.

NATIONAL CAPITAL HOUSING AUTHORITY—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER laid before the House the following message from the President of the United States, which was read, and, together with the accompanying papers, referred to the Committee on the District of Columbia:

To the Congress of the United States:

In accordance with the provisions of section 5 (a) of Public Law 307, 73d Congress, approved June 12, 1934, I transmit herewith for the information of the Congress the report of the National Capital Housing Authority for the fiscal year ended June 30, 1954.

DWIGHT D. EISENHOWER.

THE WHITE HOUSE, *February 23, 1955.*

COTTON ACREAGE ALLOTMENTS

Mr. COLMER. Mr. Speaker, by direction of the Committee on Rules, I call up the resolution (H. Res. 150) providing for the consideration of H. R. 3952, a bill to amend the cotton-marketing-quota provisions of the Agricultural Adjustment Act of 1938, as amended, and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 3952) to amend the cotton-marketing-quota provisions of the Agricultural Adjustment Act of 1938, as amended. After general debate, which shall be confined to the bill, and shall continue not to exceed 1 hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Agriculture, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

Mr. COLMER. Mr. Speaker, I yield 30 minutes to the gentleman from Illinois [Mr. ALLEN].

I now yield myself such time as I may consume.

Mr. Speaker, this is an open rule, making in order the consideration of H. R. 3952, known as the cotton-acreage bill.

I am not going to take a great deal of time to go into a discussion of the merits of this legislation. I simply want to make a few pertinent observations.

No. 1, there is urgent need for the enlargement of the acreage in order to take care of certain hardship cases. When the allocation of the acreage was made last fall on a largely reduced basis over the previous years, some 8 or 9 million acres, it was discovered that many small farmers were practically put out of business. To those of you who are not familiar with the cotton industry, I would like to call your attention to these pertinent facts: In the whole country, in cotton growing belt, it was discovered after these allocations had been made last fall, that there was a total of 291,809 farmers who had less than 5 acres of cotton allocated to them. Of that total there was in my State, largely in south Mississippi, my congressional district, a total of 47,000 farmers who were allocated less than 5 acres for the 1955 crop. You can imagine what that means to the small farmers of my section of the country, men who have to make a living, support their families, pay taxes, and send their children to school on less than five acres of cotton, which in most instances is his cash crop.

I realize that it will be argued that you cannot eat your pie and keep it too. With that I am in thorough accord. I realize that due to the increase in the number of substitutes, synthetics that have been produced in competition with cotton, that cotton consumption is constantly going down. Therefore, if we are going to have supports we are going to have to produce less cotton. With that I can find no fault, and we might just as well face that now.

But I also call your attention to the fact that you cannot do it by one fell swoop overnight. In my section, in the hill sections of south Mississippi, we have gradually been getting away from the production of cotton. We have been converting to other crops, trying to get away from this cash crop of cotton. That has been true over the cotton belt generally.

I call your attention to the fact, in substantiation of that, that 30 years ago there were 45,968,000 acres in the production of cotton in the cotton belt of this country.

If we grant the relief asked in this bill today the total would be 18,656,442 acres.

The figure for last year has slipped me for the moment. I ask my friend the

gentleman from Arkansas [Mr. GATHINGS] to tell us what the cotton acreage was last year.

Mr. GATHINGS. Last year the allotment was 21,379,342 acres.

Mr. COLMER. In round figures we had a reduction of from approximately 21 million last year to 18 million, which is a pretty sharp reduction and has resulted in these hardships which have just been recited.

Of course, we all have our troubles, we all hear from our people, but I just want to call your attention briefly to a letter I have which is typical of many others we in the cotton belt have all received.

In Perry County, which happens to be in my congressional district of Mississippi, there are 1,113 farms of which 580 are classed as cotton farms. To the 580 farms there are 1,900 acres of cotton allocated; 113 farms out of 580 have less than 1 acre of cotton allocated to them; 155 farms have from 1 acre to 1.9 acres allotted; 107 have 2 to 2.9 acres allotted; 95 of those farms have 5 acres or more; 150 farms who want cotton acreage cannot get it, for the county has only 50 hardship acres to allocate.

I could read you some of the most heart-rending letters from individual farmers here if time permitted. However, I think it would be more orderly and possibly more beneficial if I pointed out the situation in a few of the other counties in my district. For instance, in Covington County, which is largely a county of small farmers, the following letter graphically describes the situation there:

UNITED STATES
DEPARTMENT OF AGRICULTURE,
AGRICULTURAL STABILIZATION
AND CONSERVATION COMMITTEE,
Collins, Miss., January 3, 1955.

Hon. WILLIAM COLMER,
Representative, Mississippi,
Washington, D. C.

DEAR MR. COLMER: We, the agricultural stabilization and conservation committee of Covington County realize the strain you must be going through by the receipt of complaints in connection with the cotton allotment received by farmers for 1955. But we feel it is our duty to properly inform you as to the extent the farms in our county are affected by the reduction in cotton acreage for 1955. We realize it is impossible for you to know the conditions that prevail in each county without someone furnishing you with information, therefore, we are submitting figures taken from the Covington County ASC office official records which are available for public inspection in hopes that you may gain more knowledge of our situation and that this information can be used to some advantage by you to help correct the hardships imposed on our farmers. Our sympathy goes out to the small farmer whose efforts are directed toward earning sufficient money from his agricultural products to pay the outrageous price of the vital materials he needs to produce his products. If something is not done we farmers in the hill counties are going to have to quit farming for a living. It is our belief that our county is representative of the hill counties of Mississippi. We appeal to you as one who has been chosen by the people of Mississippi and Covington County to represent us in Washington to find some solution for our problem.

1. Number of farms in Covington County	2,457
2. Number of cotton farms in Covington County	2,028
3. Number of cotton farms receiving 5 acres or less of cotton for 1955	1,343
4. Number of cotton farms receiving 5 1/10 to 10 acres of cotton for 1955	406
5. Number of cotton farms receiving 10 1/10 to 15 acres cotton for 1955	113
6. Number of cotton farms receiving 15 1/10 to 20 acres cotton for 1955	46
7. Number of cotton farms receiving 21 acres or more for 1955	120

Yours very truly,
GUYCETT HUGHES,
W. J. LIGGETT,
CLIFTON KEYS,
County committeemen.

In Jones County there are 3,800 farms with 2,268 of these farms classed as cotton farms. For these 2,268 farms, there are 8,974 cotton acres allocated; 1,704 farms have less than 5 acres; 1,508 have less than 4 acres; and, 358 have less than 1 acre.

Neighboring counties, such as Covington County and Lamar County, have been cut as much as 43 percent from the 1954 allocated cotton acreage. This is the situation generally in the hill section of Mississippi.

Mr. THOMPSON of Texas. Mr. Speaker, will the gentleman yield?

Mr. COLMER. I yield to my friend from Texas who is very much interested in this subject.

Mr. THOMPSON of Texas. After reading many critical letters from farmers I think it might be interesting and very pertinent if I would read a short excerpt from a letter that came to me from a vice president of the Second National Bank of Houston, no country bank by any stretch of the imagination.

Mr. COLMER. I yield to my friend briefly.

Mr. THOMPSON of Texas. This banker writes as follows:

Many of the small farmers are being turned down daily by the banks for crop loans because their allotted cotton acreage is not large enough to repay the loans they need. I was in a bank in east Texas a few days ago and saw a man who had been borrowing from $500 to $600 per year to make a cotton crop; his acreage for 1955 was cut to 5 acres; he is 45 years old and has a family of 5 children. He has been a customer of this bank for 15 years and repaid his loan each year with the exception of $103 in 1954; this was due to the drought in 1954. He wanted to borrow $600 to make a crop in 1955; the bank could not make the loan because in a normal year 5 acres of cotton in this county would make around two bales and this is not enough to repay the loan.

He goes on to say that the people are getting very tired of this and urges that something be done to make it possible for the little cotton farm to be an economic unit within itself.

Mr. COLMER. I thank the gentleman from Texas. We are all conscious of the specific cases that have come to our attention. But I want to reiterate what I said in the beginning, that this is for the purpose of alleviating the hardship cases and softening the blow in the transition period that is constantly going on and yet not try to do it overnight.

I hope that the Members of this House, those who are interested directly in cotton and those who are just merely interested in the economy of the country generally, will go along with this bill.

I understand amendments will be offered to the bill when it is being considered in the committee. I shall not undertake to anticipate any of those amendments. I would like to mention in passing, however, that I introduced my own bill on this subject, House Joint Resolution 105, early in the session and have my own idea as to what should be done. It is in effect the amendment which I understand will be introduced by my colleague the gentleman from Wisconsin [Mr. SMITH]. But the thing I am most interested in is getting some relief for my people——

Mr. GATHINGS. Mr. Speaker, will the gentleman yield?

Mr. COLMER. I yield to the gentleman from Arkansas.

Mr. GATHINGS. The gentleman is rendering yoeman's service to the cotton farmers in the fight he is making. I want to commend the gentleman for the very fine statement he has made, particularly for bringing out the point that in 1954 there was an acreage of something like 21,379,000 allotted as compared to the 17,900,000 acres originally allotted by the Secretary of Agriculture. That is an increase of about 19.8 percent. That is most significant.

I appreciate the fact the gentleman has brought this point out. We are only asking for an increase of 3 percent. In 1954 the increase amounted to 19.8, practically a 20-percent increase over the original allotment. I appreciate the fine presentation made by the gentleman. I am grateful to the gentleman from Mississippi for his kindness and consideration accorded our Agriculture Committee when we appeared before the Rules Committee on this bill.

Mr. COLMER. In other words, to illustrate the transition that is going on, any reduction in acreage will not only reduce the acreage substantially under last year, but we are now reducing the percentage very sharply from 19 to 3 percent that we are asking in order to take care of these hardship cases. I thank the gentleman.

Mr. COOLEY. Mr. Speaker, will the gentleman yield?

Mr. COLMER. I yield to the gentleman from North Carolina.

Mr. COOLEY. Even after this 3 percent has been added the cotton farmers will this current year take a further reduction of 2,700,000 acres which is in itself a very substantial reduction.

Mr. COLMER. I appreciate the contribution of the distinguished chairman of the Committee on Agriculture. What I am trying to say is that we all have our own ideas about what should be done here but we cannot all have our own way. We are going to have to take the best we can get and certainly for the moment this bill seems to me somewhat of a compromise that will achieve that purpose.

Mr. Speaker, I yield 5 minutes to the gentleman from Missouri [Mr. JONES].

Mr. JONES of Missouri. Mr. Speaker, I think it might be well to go into some

of the background of the bill to be considered. The members of the cotton subcommittee, headed by our colleague the gentleman from Arkansas [Mr. GATHINGS], held several informal hearings, and it was apparent that there was a concensus of opinion that some kind of legislation providing for a reasonable increase in the national cotton allotment was in order, particularly if that increase could be directed toward the relief of certain inequities. Now, we were thoroughly conscious of the fact that the Department of Agriculture had indicated that it was opposed to any increase. However, under the circumstances and the fact that there were some 291,809 farmers who had acreage allotments of five acres or less who in prior years of 1952, 1953, and 1954 had grown that much cotton and who, under the allotments that had been made this year, were reduced below their plantings of those years, we felt that by an addition of less than 400,000 acres we could take care of that many people. Now, we could use only 400,000 acres to give some relief to 291,000 people. So, we were trying to take care of a social problem, you might say, as well as an economic problem.

Then we felt by an additional 150,000 acres that we could alleviate the hardship which was being experienced by the smaller farmers who had been cut more than 60 percent below what they had had the year before. It was on that basis that we felt the justification in making an increase in this allotment.

Then, the next thing, we realized we had to be practical to the extent of trying to have adopted a bill which the Department would approve. While we have no commitment from the Department, I think, by the grapevine, so to speak, we have every reason to believe that this relatively small acreage would be approved. While the bill would add 3 percent to the acreage of each State, it would not add 3 percent to the anticipated production, because much of this acreage would go into areas where the production is below the average. Also, we knew that we would have a difficult time if we tried to disturb the relative positions of the several cotton-producing States, and that is why we put this bill on the basis of adding only 3 percent to each State; not 3 percent to the national allotment but 3 percent to each State, so that the relative standing of the States would not be disturbed.

Frankly, I would agree with the gentleman from Mississippi, who is asking to interrupt me now and I cannot because of the time, that it would please me if we could go along on some plan whereby we could use more of this acreage in some States to alleviate the hardships that exist. But, we might as well be practical and realistic about it.

We are interested not in trying to get a bill that would embarrass anybody or the administration, but we are interested in providing a bill which will bring relief to the small farmers and furnish as much relief as we possibly can. I think every member of the cotton subcommittee, on which our colleague from Arkansas has done such a fine job in bringing together the thoughts on the bill he introduced, can say that this is the collective thinking of the entire committee, and the gentleman from Arkansas introduced the bill at the request of the committee to carry out those things that we felt were needed to be of help. I hope that the other Members of the House who may not have any cotton in their districts but who are interested in trying to help us in a situation that is very trying in many sections, will be very helpful in this regard.

I might say that when we were quoting the figures awhile ago about what the acreage was last year, when it was 21,379,000 plus, and the year before that we had planted 28 million acres. The year before that we had planted nearly 28 million acres. The year before that, in 1951, we had planted more than 29 million acres. So you see that we are confronted with a tremendously great reduction. This is a very important matter to those small farmers, and I hope we may have the sympathetic consideration of all the Members who are interested in extending aid to more than one-fourth of all cotton producers, particularly those who are the smallest producers.

Mr. COLMER. Mr. Speaker, I yield 8 minutes to the gentleman from Georgia [Mr. BROWN].

Mr. BROWN of Georgia. Mr. Speaker, I have previously discussed the extreme hardships which are being brought about among cotton farmers of Georgia, the Southeast, and other sections, due to the sharp reduction in cotton acreage allotted for the 1955 crop.

When I introduced H. R. 23, it was my purpose to raise the 1955 cotton acreage allotment up to the level provided by the 1954 law for each State whose 1955 allotment is below this level, the 1955 crop of cotton having been fixed at 18,100,000 acres in comparison with 21,400,000 acres for the 1954 cotton crop.

The Committee on Agriculture has favorably reported H. R. 3952, and the report accompanying this bill sets forth a 3 percent increase in the acreage allotment of each cotton State, thereby adding 543,234 acres across the country to the cotton acreage allotted for 1955.

The increase in the cotton acreage under H. R. 3952 will provide some help; however, H. R. 3952 increases the cotton acreage for 1955 much less than the bill which I introduced, H. R. 23. In introducing H. R. 23, it was my thought that the 1955 cotton acreage should not be less than the 1954 cotton acreage of 21,400,000 acres, for it appeared to me that the extreme drought of 1954 brought about a situation under which there was even more justification for increasing the 1955 cotton acreage than had previously existed in 1954.

The extreme drought in the southeast not only destroyed practically all food crops, but the farmers in my section produced about one-half of a normal cotton crop. The Committee on Agriculture recognizes in its report that no less than 4 years ago our Government was urging these farmers to produce more cotton. Since the cotton farmers in many sections of the Cotton Belt, including my own district, do not produce tobacco or peanuts, those who have attempted to diversify by producing livestock have not had profitable operations, and the cost of manufactured products which the farmers must buy are out of proportion in their relationship with agricultural products, there is in my opinion an obligation to dispose of the surplus cotton gradually and to allow the cotton farmers to remain on the farms rather than to force them to seek employment elsewhere.

I wish to again state that it is a mistake to undertake to dispose of the surplus cotton in a period of 1 or 2 years, for the surplus accumulated over a period of years. It is recognized in the report of the Committee on Agriculture that—

> The condition has come about by no fault of the cotton farmers but results from the sudden and severe constriction of acreage where a policy of gradual reduction over a longer period of years would have prevented the family income problem that now confronts so many of our farmers.

Cotton farmers in my section have never made large profits from cotton and they do not expect to do so, and as the committee report states, many small farmers have had their acreage allotments reduced so low they cannot support their families. The urgency of the situation is further recognized by the committee in the statement that—

> Unless Congress acts immediately the committee fears that many families on small farms, including tenants and sharecroppers as well as owners, will be forced to leave the land.

There are many cotton farmers who have reached an age at which it would be difficult to obtain employment in industry or elsewhere.

I again urge that greater effort be made to produce more tangible results in the administration of existing laws which have as their purpose and objective the sale of more cotton and agricultural products abroad. Cotton and agricultural products are an important part of the economy of the Nation. This is recognized by the Committee on Agriculture by the statement in the report that—

> The recent sudden and severe reduction in acreage has had a serious impact in the Cotton Belt and is sharply depressing the economy of areas where business is based chiefly on cotton.

The economy of the Nation cannot be isolated from the agricultural economy. The impact on business in the Cotton Belt cannot be isolated from the business of the Nation, for the manufactured products of other regions which would find their way to the Cotton Belt will diminish if there is inadequate income with which to purchase these products. It is doubtful if the goal of $500 billion in national income can be achieved if widespread unemployment on the farms is permitted.

As I have previously stated, H. R. 3952 increases the 1955 cotton acreage allotment less than the bill which I introduced, H. R. 23. I have also stated that due to the drought there is, in my opinion, even more reason to increase the cotton acreage allotment to a total of 21,400,000 acres in 1955 than there was

reason to increase the cotton acreage to this figure in 1954. However, I do recognize that there are many small cotton farmers in my section and other sections who will receive some benefit under H. R. 3952. Although the increase of 543,234 acres in the 1955 cotton-acreage allotment is less than that of the bill which I introduced, H. R. 23, I am anxious to secure as much relief for the cotton farmers as we are able to obtain. A vote favoring H. R. 3952 does bring some relief, although less relief than the emergency situation, in my opinion, requires. I hope we can adopt an amendment which will increase the allotment as provided in H. R. 3952.

Mr. HALLECK. Mr. Speaker, I yield 5 minutes to the gentleman from Oklahoma [Mr. WICKERSHAM].

Mr. WICKERSHAM. Mr. Speaker, personally I feel this bill is not nearly sufficient to take care of the actual minimum needs of farmers. It falls far short of providing sufficient acreage to provide for economical farm operating units. In Oklahoma alone, in the last 14 years, 51,000 farm families have had to leave their farms mainly because of the drought situation and because of insufficient wheat and cotton allotments and the prolonged drought. There is no other area in the country that has been so adversely affected as that particular area. This bill would increase Oklahoma's acreage by only 26,500 acres. Personally, I think Mr. Benson ought to take his Mormon theory out of Government and get down to some real, plain, old horse trading, and get rid of some of our surpluses. Mr. Benson has not exercised his rights and prerogatives under the law to dispose of this cotton on the world market, either by trading or by finding new uses for it. Furthermore, Mr. Benson and this Congress should take into consideration that in all probability we will again be asking the farmers to move into a mobilization effort, if conditions become critical.

Who is responsible for the farmers being in the difficulty they are in today? The Congress, and the Government of the United States, through the President and the Secretary of Agriculture are the ones who asked the farmers to increase production during the Korean war. In Oklahoma we were asked to diversify, and farmers did diversify in that great State, which at one time was about the largest producer of cotton in the United States. We diversified. We raised mung beans. Ninety-five percent of the mung beans raised in the United States of America were raised in my district in Oklahoma. The United States Department of Agriculture removed the price support. We raised castor beans, and Secretary Benson lowered the price support by one-third. We raised peanuts, and the administration lowered the support level. We also raised grain sorghums, and now the Secretary of Agriculture has reduced supports by 25 percent. In my opinion, Mr. Benson does not want the Agricultural Act of 1938, as amended, to work. The agricultural program was voted by the farmers and by the Congress. The farmers of my district supported it by 95 percent. Ninety-five percent of the farmers voted for the program, but they do not feel that Congress or the Secretary of Agriculture should reduce the farm allotments of the farms below economic operating units. When this is done you have destroyed the livelihood of the farmers. That is what has happened in Oklahoma.

Personally, I think we should run this Congress ourselves by voting in the interest of the farmers and the country, and find out if the Secretary of Agriculture is going to veto our legislation. Personally, I have offered an amendment to raise the acreage allotment to 19,500,000 acres. Furthermore, I think the suggestion of the gentleman from Texas [Mr. POAGE] that we should give consideration to making quotas on bales rather than acreage, should be favorably considered. Again I say that this House, which is representative of the people, should act on its own authority and not depend on the threat of a veto by the President of the United States or Mr. Benson. I believe we should act independently of the Senate and do whatever is right. May I again remind the House that some consideration should be given to the future of this country. The President of the United States himself has said that we ought to set aside a year's supply of cotton. Did the Secretary of Defense or did this committee take into consideration this set-aside in determining the carryover? Again I say that the increase needed, with the increased population, with the possibility of moving into a mobilization program, are important factors worthy of your consideration. I consider this bill about equal to an aspirin tablet when the acreage problem needs a dose of calomel or a major operation.

I should like to read a letter, a wire, and a resolution from a committee representing thousands of western Oklahoma farmers, which expresses my feelings, as follows:

UNITED STATES
DEPARTMENT OF AGRICULTURE,
AGRICULTURAL STABILIZATION
AND CONSERVATION OFFICE,
Hollis, Okla., February 18, 1955.

The Honorable VICTOR WICKERSHAM,
Representative, Oklahoma Sixth District, Washington, D. C.

DEAR MR. WICKERSHAM: We, the members of the Harmon County ASC Committee, make the following request and submit it to you for your consideration and approval.

Because of a total lack of subsoil moisture in this area and as a measure of drought relief for the dry-land farmer, we again request permission for producers to plant 2 rows of cotton alternated with 2 rows of summer legumes or summer fallow and be classed as 50-percent cotton and 50-percent legumes or fallow.

Trusting you will concur with our request and offer any assistance possible in securing its approval, we remain,

Very truly yours,

A. B. BURT,
J. B. CAIRNESS,
J. J. THOMASON,
Members Harmon County ASC Committee.

CORDELL, OKLA.

VICTOR WICKERSHAM,
House of Representatives,
Washington, D. C.:

Per your request following information: Washita County has 693 cotton farms with less than 39 percent of cropland under cash allotments. County needs not less than 20,000 additional acres cotton. All counties in southwest Oklahoma in same position.

WASHITA COUNTY ASC COMMITTEE.

To Congressman Victor Wickersham, Senator Robert S. Kerr, Senator Mike Monroney, and Congressman Cliff Hope, former chairman, and Harold Cooley, chairman, House Agriculture Committee:

We, the cotton farmers and businessmen of Tillman, Jackson, Harmon, Kiowa, Beckham, and Greer Counties do hereby adopt the following resolutions:

MANGUM, OKLA., *January 5, 1955.*

We, duly elected resolution committee, after listening to the general discussions in regard to the present cotton allotments of this group of farmers, professional, and businessmen of Greer, Jackson, Harmon, Tillman, Kiowa, and Beckham Counties present to you for your adoption the following resolutions:

Whereas the citizens of the above-named counties have met this 5th day of January in the county courthouse, Mangum, Okla., for the purpose of seeking a more equitable distribution of the present cotton allotments for said counties and the great Southwest which has been hard hit by the drought for the past 4 years.

Whereas hundreds of our young farmers have already left the farm seeking employment elsewhere. With little or no crops for 3 years and with the reduced acres, they cannot continue on the farm and feed their families and meet their obligations.

Therefore, we feel that this is the most serious situation that has come our way for many years, and without additional cotton acres for 1955, farmers and businesses alike will be paralyzed in this drought area.

We therefore appeal to you, the Congress of the United States, to secure additional acres to supplement the crop failures that have plagued this area for so long. Our farmers have not contributed to the so-called surplus the past 3 years and feel that since thousands of acres of wheat have never come up, some of this land should be permitted to be planted to cotton. Our taxes must be paid and our families fed. We must have a cash crop to do this with.

Therefore, we recommend that additional acres be allotted as a drought emergency act for the Southwest States. We want to go on record commending our county committees for their untiring work in their efforts in distributing the allotments. While some mistakes may have been made, as a whole their work has been splendid. This present catastrophe can only be corrected by reallocation of additional acres in the drought area, if our farms and businesses are to survive: Be it

Resolved, That each citizen present do all in his power to try to secure the same cotton quotas for their respective counties as were allotted last year and that each respective farm should receive like consideration according to their cropland. We feel that no other State would feel that this is anything but right and just. Our farmers are not asking for charity, but a chance to make a living on our land. We have always come to the aid of our sister States during perilous times, such as floods and tornadoes, and we feel that no dissension would come from them, for after all, we are our brothers keeper. We need help, and now.

RESOLUTIONS ADOPTED

We, the farmers of Tillman, Jackson, Harmon, Beckham, Kiowa, and Greer Counties, State of Oklahoma, hereinafter referred to as "these counties," approve of the basic principles of the Agricultural Adjustment Act of 1938, and the Soil Conservation and Domestic Allotment Act, as amended, except for its flexible price and modernized parity provisions, which is the law under which we operate our farms. This law provides for

adjustment of production to reasonable market demands through acreage allotments and price supports, marketing agreements, and other provisions designed to place agriculture on a parity with other groups.

In the recent referendum election, the farmers of these counties agreed with other farmers in Oklahoma who voted more than 5 to 1 for cotton acreage controls, and price supports. Cotton producers in the 20 cotton-producing States likewise registered 92 percent of all producers favoring cotton production controls, and price supports, which the Secretary of Agriculture announced would be 90 percent of parity for the year 1955.

However, with this approval, there is the general belief among those who are both directly and indirectly interested in cotton production, that the 18,113,000 acres national cotton allotment was too small for the best interest of all concerned. The approval was given under a limited protest against the allotment. Under present conditions, these same farmers would likewise be opposed to any cotton program which would permit maximum or unrestricted planting. They would prefer that Congress consider and assist in solving this problem on a reasonable, middle-ground basis.

With the above approval of the farm program as a whole, we wish to register the following objections to the administration of the program:

1. Administration of the present program of acreage allotments, through the application of the same reduction factor to all farms alike, has resulted in inequities and injustices to those who have followed good soil-conservation practices, through failure to give proper consideration to crop-rotation practices, and allotments to similar farms in the community.

2. Instructions, as set out in USDA Commodity Stabilization Service Instructions Bulletin No. 1006–1 of December 16, 1953, defines a farm or a farm unit. There have apparently been violations of these instructions by compiling unlimited numbers of farms, as 1 unit, in 1 worksheet without due regard as to whether these farms are adjacent or nearby to each other. If these instructions continue to be violated, it will defeat the purpose and objectives of this program in many ways. Transfer of acreage allotments from distant nonproductive farms, to more productive and irrigated farms, will not only exceedingly increase normal production, and displace many farm operators with a subsequent loss in local buying power, but will greatly encourage land speculators to purchase, or lease, such farms and combine them for speculative purposes.

3. Our attempt to adjust production of basic commodity crops, especially cotton, has set up an uneconomic program on many family size cotton farms, which, if continued without correction, will result in the possible liquidation of such farmers.

4. In recent years, many acres which were formerly classified as cultivated acres have been planted to grass and permanent pasture, yet they are still carried forward on current farm work sheets as cultivated acres, enabling some farmers to get greater consideration in acreage allotments than they should receive.

5. There is a general complaint relative to frozen bases and not enough flexibility in county administration of our program.

To correct these minor objections, and in the interest of the general welfare, we recommend that the present national cotton acreage allotment be increased from the 18,113,000 acres to 19,500,000 acres for the years 1955 and 1956. The above recommendation should be granted for the following reasons:

1. In this year, 1954, the relative position of both supply and demand in the cotton trade has materially changed. Our exports of cotton have increased from approximately 3,500,000 bales in 1953, to nearly 5 million bales in 1954. Our domestic consumption has also increased. Thus the increased demand has unexpectedly diminished the supply and carryover of cotton. Therefore, to have or make possible a continued long-range cotton-acreage adjustment program, we must increase the present cotton acreage in order to avoid a possible short supply in 1955, which would lead to unrestricted plantings, and probable acute overproduction in the next year, 1956.

2. We feel that the present small cotton acreage allotment has not fully considered the high cost of farm operations, the need to keep more people employed, and the need to provide a sustained local buying power, which is so necessary to maintain the continued turnover of goods and services, the basis of our entire economic system.

3. In any program which is added to from time to time, there will be discepancies and unintentional discriminations arise. With the present cotton allotment as small as it is, and present and estimated demand as large as they are, we are in an exceptionally good position to allocate acres to correct some of these discrepancies. These additional acres could be used to satisfy needs that can be satisfied by no other means, by giving the farmer who has been penalized an opportunity to help himself.

This problem merits a reconsideration by Congress. Such reconsideration will justify a more reasonable, middle-ground, solution of adjusting cotton production to reasonable market demands and potential needs. We feel that careful consideration by Congress will justify whatever action is necessary to increase the National cotton acreage allotment to 19,500,000 for 1955 and 1956.

We as cotton farmers and small-business men, have called your attention to the problem as we see it. Furthermore, net agriculture income has declined 13 percent in the last 3 years. In the same period the income of the industrial worker has increased. This has increased the overall cost of operations on the farm. In addition the latest report is that the minimum wage is likely to be raised to $1 per hour, which will further decrease net agriculture income.

The following recommendations are rendered, not as iron-clad rules, but as guides to aid you in your consideration of our problem:

1. We as cotton farmers and businessmen, call your attention to the serious need for a long-range cotton adjustment program on a middle-ground basis. We object to continuation and perpetuation of plans and planners who devise ways of swinging the pendulum of cotton production too far to the right one year and too for to the left the next. A long-range program would permit us to better and more safely plan our farm operations, financially, and otherwise. A program that is changed from year to year does exactly the opposite and keeps us in hot water. Therefore, we recommend that the acreage allotment be set at 19,500,000 for 2 years basis rather than 1 year. We also recommend that the method of factoring the allotment for the separate farms should not be changed from year to year, but maintain on a historical base period.

2. Consideration should be given, when allocating the increased acreage allotment on a nationwide basis, to areas which have experienced subnormal growing conditions.

3. We further recommend and insist that Congress provide the ways and means for extended uses and markets for cotton through development on increased exports, and expanded research to increase domestic use, and market development.

4. After the additional cotton acreage allotment has been granted, and it has been allocated to the respective States and counties, we feel that first consideration locally should be given to correction of the mistakes, inequities, and unintentional discriminations which have been set up against those who have followed diversified farming, and soil and water conservation practices.

5. We do not wish to discriminate, but would recommend that the rule in instructions bulletin No. 1006–1 of December 16, 1953, sec. II which deals with the definition of a farm, be specifically clarified and rigidly enforced, in what constitutes adjacent and nearby.

6. We would recommend that the county office concerned with such data, should build a new inventory of cultivated acres, and eliminate those acres planted back to permanent pasture.

7. We recommend that the county committee be given authority to permit exchange of cotton and wheat acreage allotments between individual farms, where requested, providing that total allotment on each individual farm does not exceed 50 percent of cultivated acres. In doing so the total county cotton and wheat acreage allotment cannot be increased. This authority would enable the county committee to fit the program to local needs, and will not impair the overall national program objective.

8. We recommend the county committee shall give each cotton farmer, or individual operator, notification of his allotment in acres for the year, far enough in advance of planting that he may come to the office of the county committee to declare his intention to plant, or not to plant, his allotted acres. Failure to do so would automatically return his allotted acres to a county pool for redistribution to other qualified operators.

We understand that there is, at the present time, a movement underway to scrap the agricultural program as it now stands, and write a completely new farm program. We farmers of these counties, State of Oklahoma, want to go on record as being opposed to any such movement, and in favor of continuing the present program incorporating the recommendation stated above. We realize that the present day farmer, through the application of the present program, is in the best financial position in the history of agriculture. This program, and present law, properly administered, is a Magna Carta which gives to farmers their economic freedom, and places them on a parity with other groups. Buying power has been sustained, and this program has been a basic support to businessmen and industry in general.

We the farmers of these counties wish to emphasize that the objections and recommendations herein stated, are a result of open meetings, and democratic action on the part of the farmers themselves, and are not proposed by any organized farm group. However, now that these objections and recommendations have been drafted, we seek the aid and assistance of any and all organized farm groups, and affected chamber of commerce and other business groups in bringing these objections and recommendations before Congress for their appraisal and study.

Basically we do approve of the principles of the Agricultural Adjustment Act of 1954, and strongly oppose any idea of scrapping the entire law. However, we have pointed out some concrete material objections, with specific recommendations for improvement.

We object:

1. Total national cotton-acreage allotment, as being too small.

2. Application of same reduction factor to all farms.

3. Farm work sheet combination practices.

4. County records now in use regarding cultivated acres.

5. Frozen bases on individual farms.

6. Flexible price supports and new parity formula.

We recommend:

1. Increase national cotton-acreage allotment.

2. More consideration to those who followed soil conservation practices before applying reduction factor.

3. Clarification and enforcement of rules set out in USDA Commodity Stabilization Service Instructions Bulletin No. 1006-1 of December 16, 1953 regarding farm designation and who constitutes an operator. Also who is eligible to sign county worksheet.

4. Reappraisal and adjustment of county records pertaining to total cultivated acres.

5. Flexibility of allotments allowing exchanges of allotted acres within the county.

6. Ninety percent price supports for 1955 and 1956.

Your Resolution Committee: Tillman County—W. A. Elsener, Tipton; W. M. Lovejoy, Tipton; Clyde Amyx, Frederick. Jackson County—Carl Ross, Duke; Clyde Doughty, Martha; Ralph Mitchell, Duke. Harmon County—Claud Ingram, Hollis; Marvin Curry, Hollis; Claud White, Hollis. Kiowa County—Fritz Jacks, Snyder; Edgar Portwood, Hobart; W. L. Bock, Roosevelt. Beckham County—A. F. Luthy, Carter; C. D. Mandrell, Mayfield; J. E. Sparks, Sayde. Greer County—Thomas Cunningham, Mangum; Leslie Hogg, Granite; Nathan Moore, Brinkman; Henry Worthington, chairman, Mangum, Okla.

Attest:

WELCOME MEIDHART,
Secretary, Hollis, Okla.

Passed this the 5th day of January 1955, at Mangum, Okla.

Mr. COLMER. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The resolution was agreed to; and a motion to reconsider was laid on the table.

Mr. COOLEY. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 3952) to amend the cotton marketing quota provisions of the Agricultural Adjustment Act of 1938, as amended.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H. R. 3952, with Mr. HAYS of Arkansas in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from North Carolina [Mr. COOLEY] will be recognized for 30 minutes; and the gentleman from Kansas [Mr. HOPE] will be recognized for 30 minutes.

The Chair recognizes the gentleman from North Carolina [Mr. COOLEY].

Mr. COOLEY. Mr. Chairman, I yield myself 3 minutes.

Mr. Chairman, members of the cotton subcommittee of the House Committee on Agriculture very carefully considered the problems with which this legislation seeks to deal. I know they will explain it very fully during this discussion.

Unfortunately, many of the small cotton farmers of the country are suffering great hardship because of the drastic reduction in acreage they have been required to take. This bill does not go far enough to take care of the needs of all the small farmers. Actually, in my own State, for instance, we have more small farmers than any other State in the Union—we actually have more people living on farms in North Carolina than in any other State. It would take 85,000 acres to provide for the small farmers of North Carolina who are producing less than 5 acres of cotton. Under the pending bill we will receive in North Carolina only an additional 15,471 acres.

The situation is somewhat similar in other places. On the back of the report submitted by our committee you will see the figures. It would take 398,316 acres to take care of the small cotton farmers of the Nation. When I say "small cotton farmers" I mean those producing under 5 acres.

The cotton farmers have taken a drastic cut in recent years, as has been heretofore pointed out. The essence of this situation is that cotton acreage has been cut from 25 million acres in 1953 to 18,100,000 in 1955. Even with the added 3 percent which this bill provides they will take an additional cut this year of 2,700,000 acres less than was allotted in 1954.

This bill will add a total of 543,000 acres to the national cotton allotment for 1955. Frankly, I do not know exactly what the views of the Department of Agriculture are regarding this measure, but I do know that officials of the Department of Agriculture sat in with the subcommittee; and I am sure that the gentleman from Arkansas [Mr. GATHINGS], who is chairman of the subcommittee, will be able to advise the committee with regard to Secretary Benson's views—if any views he expressed.

I think the bill should be adopted. There is no real opposition to it.

At this time, Mr. Chairman, I yield to the chairman of the subcommittee, the gentleman from Arkansas [Mr. GATHINGS], 5 minutes.

Mr. GATHINGS. Mr. Chairman, this bill is not a panacea for all the ills of the cotton farmer. This bill will aid many, many thousands of cotton farmers throughout the belt.

At the outset, Mr. Chairman, I wish to point out just a little information with respect to the history of cotton production and consumption starting with the 1954 cotton year. In 1954 the national acreage allotment was 17,910,000. This Congress added about 19.8-percent increase over that allotment, making a total allotment for 1954 of 21,379,342 acres.

There was produced in 1954 on the land that was allocated to cotton 13,569,000 bales of cotton. You may want to ask what uses were made of that number of bales. The estimated domestic consumption was 9,100,000, the estimated exports 4,200,000, totaling 13,300,000 bales. So, as a matter of fact, we produced in 1954 approximately 200,000 bales of cotton more than were consumed. That covers our domestic economy as well as the export trade.

There will be, on August 1, 1955, a carryover of 10 million bales of cotton, roughly. To my way of thinking, that is not an excessive number of bales. It is adequate to meet our needs and would probably carry this country for some 10 months. We went into World War II with more than 10 million bales of cotton in the carryover. So this is not an excessive number of bales, in my opinion.

In 1954 the Congress increased the acreage about 20 percent. This bill attempts to increase the cotton-acreage allotment by only 3 percent. Under the provisions of this bill each State's allotment would be increased by 3 percent. The total acreage added would be 543,234 acres.

The gentleman from North Carolina [Mr. COOLEY], chairman of the Committee on Agriculture, stated that he did not have any information from the Secretary of Agriculture as to his views on this legislation. The Secretary of Agriculture has not filed a report on the bill, or on some 16 bills that were pending before the subcommittee. No reports were filed on any of them by the Secretary. However, the Subcommittee on Cotton worked tirelessly for a number of days on this problem, and we had in our deliberations two members of the Department of Agriculture staff who gave us their views and observations with respect to the legislation. We were not told whether the Secretary would recommend to the President that this bill be approved, should it pass both Houses of Congress. It is hoped, however, in view of the fact that so many small farmers, sharecroppers, tenants, and cotton farmers with all sizes of production will be benefited, that the Secretary of Agriculture, and no doubt he should in my humble judgment, will recommend that the bill be approved, should it be placed on the President's desk.

Mr. COOPER. Mr. Chairman, will the gentleman yield?

Mr. GATHINGS. I yield to the gentleman from Tennessee.

Mr. COOPER. On behalf of the cotton farmers of the district which I have the honor to represent, I want to thank the distinguished gentleman from Arkansas and members of his subcommittee and the full Committee on Agriculture for the diligent efforts and splendid contribution that have been made with this very difficult problem. I would like to ask the gentleman if it is his considered judgment that the enactment of this legislation will definitely assist the small cotton farmers of the country?

Mr. GATHINGS. I thank the gentleman from Tennessee, and, in reply to his inquiry, may I say that it will to a great degree. In his State as well as in every other cotton-growing State all farmers with under 5 acres will be taken care of to a great degree. It is not going to be sufficient to go all around, however. For instance, the State of Tennessee would gain 17,816 acres as a result of this 3-percent increase in the State allotment, but 32,881 acres would be required to bring the Tennessee farmers up to a minimum of 5 acres per farm; that is to the 5 acres or to the highest acreage planted in the last 3 years, whichever is the smaller. It would go a long ways, however, in remedying

the situation that exists in the State of Tennessee and other States, but it will not give them the entire acreage that they should receive in order to give them all a minimum of 5 acres as the act of 1949 provided.

Mr. SMITH of Mississippi. Mr. Chairman, will the gentleman yield?

Mr. GATHINGS. I yield to the gentleman from Mississippi.

Mr. SMITH of Mississippi. That would give the farmers of Tennessee but about half of the acreage that they need to come up to the five.

Mr. GATHINGS. That is just the figure that I put in the RECORD.

Mr. SMITH of Mississippi. It would be about half.

Mr. GATHINGS. The actual percentage would be seventeen thirty-seconds of the amount required to bring them up to 5 acres.

Mr. RAINS. Mr. Chairman, will the gentleman yield?

Mr. GATHINGS. I yield to the gentleman from Alabama.

Mr. RAINS. Will the gentleman state for the benefit of the RECORD the sad situation in this regard that it leaves the State of Alabama in?

Mr. GATHINGS. Yes. I will say to the gentleman that in the State of Alabama you would gain 33,054 acres under the bill. That would be 3 percent added to the State of Alabama allotment, but 52,284 acres would be required to bring the small 5-acre farmer up to 5 acres.

Mr. RAINS. In other words, this bill as it is now would provide about three-fifths of the amount necessary to give each cotton farmer now about a minimum of 5 acres?

Mr. GATHINGS. It seems to me that he should be entitled to 5 acres. I wish it were possible to bring in legislation that would bring him up to the 5-acre minimum.

Mr. RAINS. I know the gentleman has done a diligent job on it, but does he not know that it is possible to provide by amendment some kind of a device to provide for each cotton farmer a minimum of 5 acres?

Mr. GATHINGS. I will answer the gentleman by saying that there is a breaking point. We wanted to see where we could get a bill that would be approved by this body and the United States Senate and signed by the President of the United States.

Despite the intent of the Congress, under the 1955 cotton acreage allotment program many farm families depending on cotton as their only money crop were deprived of enough acreage to exist.

What is the result of this cutback? The cotton subcommittee held hearings and representatives of the cotton areas came to Washington and testified. They related instance after instance of serious economic hardship. Entire counties, dependent on cotton as the basis of their economy, are destitute. Business men are faced with loss of customers. Banks are worried about the credit structure of their areas. The whole picture is one of gloom.

One group of farmers came up from the coastal area of Texas. There the growing of cotton as the basis of their economy is older than the history of their State. Cotton was grown in that area when the Lone Star State was a mighty republic. Under the drastic cutback in cotton acreages these farmers have been reduced to a state where they can no longer raise cotton profitably.

And, their testimony is borne out by statements from farmers and from the Representatives of districts throughout the cotton belt.

Parallel to their plight is the doubtful future of the tenant farmer—the sharecropper. The landowner also has been cut back on acreage. So far back in many cases that there are no longer acreages to be given to the tenant. There are no acres to share, and the tenant farmer and his family is forced to move away from the farm to a doubtful future in the cities where there may or may not be work for him. He and his family are faced with the problem of becoming public charges because there is no land for him to farm. His method of earning a living for his family has been wiped out.

These conditions have come about through no fault of the cotton farmer. It is the result of a sudden and severe constriction of cotton acreage where a policy of gradual reduction over a longer period of years would have prevented the family income problem that now confronts so many of these farmers. As a matter of fact, less than 4 years ago our Government was asking these same farmers to raise more cotton. It was national policy and these farmers were encouraged to raise more and more cotton. Now, we are requiring them to raise less cotton to the point that these farmers do not have enough acreage to exist.

That is the reason for this bill, we are seeking to increase the national allotment to a point where these small farmers can continue to feed and clothe their families. We are not asking for a large increase which would throw out of balance the national cotton acreage program. We are asking a very little.

But, by safeguards in the bill, we expect that this small increase can achieve economic relief for these families. The bill expressly provides that the additional acreage shall be apportioned first directly to farms to provide, as far as possible, a minimum allotment of the smallest of 5 acres or the highest number of acres planted to cotton on the farm in 1952, 1953, or 1954.

The State committee would withhold up to 10 percent of the remaining acreage should a State have more acreage than is required to satisfy the 5-acre provision. This State reserve is intended by the committee to be used as set out in the report on this bill, "for relief of hardships caused by drought, to correct errors in county acreage data in which differences exist between the reported acreage by the farmers and the adjusted figure made by the Agricultural Marketing Service." It was also intended to be used to relieve hardships among new growers in the State of Arizona.

That is the first apportionment of the new acreage—to the small farmer. Here in Washington we can all agree, as the Congress has agreed previously, that acreage less than 5 acres is not enough for the economic life of the family. So, in the bill we can allocate this new acreage so that it goes directly to this group of farmers.

Now, if the increase in acreage available to a State is in excess of the small farm requirements, this additional acreage shall be given to the counties under the same provisions of law as are now applicable to the States' existing acreage, and this acreage shall be used by the ASC committees of the various counties to alleviate hardships. The bill, and the intent of the committee, attempts to place a definition of hardship on that farm which received a 1955 allotment of less than 60 percent of the acres legally planted, or considered as planted, to cotton on the farm in 1954.

As the Members can see so plainly, it is the thought of the committee that this small increase will not do the whole job. It will not relieve all the hardships and economic distress in the cotton areas, but it will do the best job possible without throwing out of gear the national cotton program.

We were faced with economic pressures at both ends of the problem. We were anxious not to jeopardize the small farmer. We knew that some form of relief must be given him. The many bills that were introduced in the Congress for the relief of the small farmer attest to the desire of the Congress to help this segment of our rural population. Those measures were all studied by the committee. The best parts of each were selected and finally this bill was drafted as the best approach to the problem all the bills were seeking to solve.

Necessarily, in seeking to alleviate the cases other than the small 5-acre farmer, the Congress must place the obligation to administer fairly the distribution to those agencies on the local level who can be fully acquainted with the plight and hardship of each case.

Planting season is fast approaching. This matter is, therefore, urgent. If we are to aid these families we must act now. It can no longer be delayed. I am confident that this was the reason that the Rules Committee acted so speedily to give a rule to this bill for early consideration. That is why the House Committee on Agriculture gave priority to these hearings. That is why the subcommitee moved with dispatch and that is the reason that the Committee on Agriculture voted out the bill and is now asking your immediate consideration and favorable vote.

Time is of the essence. Delays or a failure to vote this increased acreage can mean only that these farm families have no choice other than the breadlines and the relief agencies. And, the pressure of their plight, spread across the great southern Cotton Belt, can be the weight of despondency that can drag down the entire area into economic collapse and depression.

I would like to insert a table at this point showing the effect of this bill on the various cotton-growing States:

1955 State acreage allotments and related data

State	1955 State allotment (1)	3 percent of 1955 State allotment (2)	Required for 5-acre or highest planted (3)
Alabama	1,101,804	33,054	52,284.7
Arizona	333,933	10,018	233.3
Arkansas	1,529,704	45,891	8,465.5
California	778,686	23,361	0
Florida	36,283	1,089	10,152.4
Georgia	950,818	28,525	41,776.4
Illinois	3,056		207.6
Kansas	35		3.8
Kentucky	8,374	251	608.0
Louisiana	648,442	19,453	20,101.6
Mississippi	1,750,852	52,526	68,497.0
Missouri	399,627	11,989	3,048.3
Nevada	2,324		0
New Mexico	182,194	5,466	292.8
North Carolina	515,714	15,471	85,943.2
Oklahoma	872,532	26,176	3,525.7
South Carolina	773,945	23,218	36,042.5
Tennessee	593,868	17,816	32,881.1
Texas	7,612,779	228,383	25,971.1
Virginia	18,238	547	8,281.1
United States	18,113,208	543,234	398,316.1

Mr. COOLEY. Mr. Chairman, I yield 5 minutes to the gentleman from Mississippi [Mr. WHITTEN].

Mr. WHITTEN. Mr. Chairman, I expect to support this bill, though I shall offer an amendment to strike out the 3 percent and substitute therefor 6 percent.

I have before me a 3-page letter from the Department of Agriculture pointing out the administrative problems connected with this bill due to the fact that, as has been stated here, acreage in many of the States is not sufficient to meet the minimum requirements. If my amendment is adopted, it will do much to relieve those administrative problems. Not only that, but in a far greater number of States it will provide enough acreage to meet this small farm problem and in addition leave some small amount of acreage to relieve hardship cases.

Here is what I would like to point out. The prime reason to support this bill and to support my amendment is that thereby you keep the production of cotton in the United States; at least, you help in that direction. I had the Department of Agriculture make a survey recently through the State Extension Departments and the county committees, and their own report shows that as a result of a cut in production this year to 18,100,000 acres, that 55,348 farm families were left without any homes—these are the Department's own figures—and 130,603 farm families with less than $1,000 gross annual income will be reduced by more than $100. Now, it may be that in the scheme of things those things happen, but, my friends, that has happened as a result of the Department of Agriculture's order under a law passed by the United States Government. It is the result of law. Not only that, but we do not cure the problem by cutting down United States acreage. If in cutting American cotton acreage you were cutting the world production of cotton it might have some reasoning behind it. But, you are not. We cut down our cotton production last year from 24 million to about 21 million acres, and the rest of the world increased their production by 1,200,000 bales. If you take the figures—and you can find them in the hearings of my Subcommittee on Appropriations just released this week—you will find that as we cut down cotton acreage in the United States, last year India increased her production by 2 million acres. You will find that Mexico increased her production of cotton by 240,000 acres, and you will find that Egypt increased her production over 200,000 acres, and you will find that Brazil increased her cotton acreage by 500,000 acres.

Mr. COOLEY. Mr. Chairman, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from North Carolina.

Mr. COOLEY. The gentleman is making a very fine argument, but I wish the gentleman would explain and emphasize just why that situation has happened. It certainly is not due to the acreage reduction alone.

Mr. WHITTEN. I appreciate what the gentleman has said, and I was coming to that point. This increase in foreign acreage is coming about in this way: We have a domestic support price in the United States, with which you are all familiar—there have been many arguments about it—but that same law provides that commodities that we produce move in world trade on a competitive price basis. But for a number of years the Government of the United States has fixed your domestic price as the world price. It has left four big financial cotton interests in the United States go into Mexico and Brazil and other countries operating under this umbrella that we fixed, not by law, but by governmental determination, and with almost an assurance of profits they have and continue to expand. Every acre you are cutting out here is going overseas and American financial interests are behind much of it.

I say that in spite of the three pages of trouble that the Department sees in the administration of this bill and the many troubles I see in it, this committee has worked awfully hard to make it workable. I say that if for no other reason it is worth passing, so that at least you will keep a half million acres of cotton in the United States instead of giving it to big financial interests that already have their plans set to go into Brazil and Mexico for further expansion.

If you will look on page 86 of our hearings you will find that when the Department gives the figure showing that under this policy of our Government fixing the world price at our support level, giving that protection and assurance to anyone with the know-how and the capital to go into these low-cost areas, last year when we cut our acreage down there was a 1,200,000-bale increase in foreign production. The Department did not have the figures as to what the outlook is for this year, but they already can see that in Mexico it will be increased 240,000 and they can see that it will be increased in Egypt. The Department knows that in Brazil the increase was 500,000 acres last year but they do not know the figure this year. But I can tell you that private sources say we have American financial interests already set to go into Brazil.

The answer is to put the acreage in the United States and keep it here, and make it possible to keep it here by selling our commodities in world trade at competitive prices, all as is now authorized by law.

Mr. HOPE. Mr. Chairman, I yield 5 minutes to the gentleman from California [Mr. HAGEN].

Mr. HAGEN. Mr. Chairman, this bill represents the carefully considered joint effort of the House Committee on Agriculture, which is representative of almost every State in the Cotton Belt with the exception of some States in the West. The subject of hardship was thoroughly discussed in the committee and the amount of acreage which could possibly be approved by the executive branch of the Government, and this bill is the result of that considered judgment. I may say that it came out of the Subcommittee on Cotton of the House with almost unanimous approval.

This subject of hardship is a difficult one. In that connection I would like to give a little bit of a picture of farming in the cotton area I represent. I may say that the State of California has suffered an approximate 50-percent cut in cotton acreage in the last 2 years. Our farmers are really hurting because there have been quotas imposed on sugar-beet production and there have been quotas imposed on wheat production. Many things that would provide alternate crops to some of our cotton growers are closed.

Recently in Tulare, Calif., Mr. T. R. Hedges, of the Gianini Foundation, which is a branch of the University of California, said that the most important farm in Tulare County is a farm that has around 40 acres of cotton.

He stated further that 75 percent of the cotton in that county was grown on ranches with 15 to 45 acres of cotton; 28 percent of the farms have from 1 to 15 acres of cotton; 75 percent of the 1954 cotton grown was grown on farms having 15 to 46 acres of cotton. Farms with 40 acres of cotton produced 22 percent of the cotton in 1954. Farms of over 100 acres produced only 8 percent of the crop.

In my home county of Kings there were 60 cotton farms with allotments of less than 5 acres, 259 cotton farms with allotments of less than 15 acres, 750 cotton farms with allotments of from 15 to 30 acres, 186 cotton farms with allotments of from 30 to 50 acres, 41 cotton farms with allotments of from 50 to 60 acres, 91 farms with allotments of from 60 to 100 acres, and only 31 farms with allotments of over 300 acres.

I bring these facts to you to show that we have a hardship problem in California. As a matter of fact, there is a hardship problem all over the United States in the Cotton Belt. It is impossible to equate or to arrive at an exact definition of hardship in terms of acreage because of the methods of production

where the cost of production in one area might dictate a somewhat larger farm as an economic unit than in some other area, for example, where they only have to depend on the natural rainfall, and so forth. The point I am emphasizing is that we have hardships in California. There are hardships in Arizona, New Mexico, Nevada, Alabama, Georgia, and all over the Cotton Belt. This bill was deemed by our committee to be fair because it treated every State equally on the basis of a 5-year formula which is in the law for an allotment of acreage among the States. That same 5-year base period is applied to every other of 6 basic crops with the exception of wheat. A moving 5-year formula is a recognition that these price-support laws and the quota provisions in connection therewith are not designed to be a straitjacket on agriculture, but are designed to recognize some shift in the trend of planting, and once that occurs to treat everyone equally. That is exactly what this bill does. It achieves complete equity among the States. Then there is a special provision written into the law for 5-acre farms. We recognized the problem of the 5-acre farmer. Our good intentions will apply in those areas where they have a great many of those farms. Actually, in my opinion, a 5-acre definition of hardship is a somewhat arbitrary definition because the question comes up then—what about the 6-acre farmer or the 7-acre farmer or the 8-acre farmer who might be more worthwhile preserving actually than a man who only grows 5 acres or less. But, nonetheless, this bill, rough as it may be in some aspects, is the closest approach to equity that we can achieve and it does achieve complete equity as between the States.

The CHAIRMAN. The time of the gentleman has expired.

Mr. COOLEY. Mr. Chairman, I yield 5 minutes to the gentleman from Texas [Mr. POAGE].

Mr. POAGE. Mr. Chairman, the subcommittee has after full discussion recommended a bill, which has been favorably reported by the full Committee on Agriculture, that gives some slight measure of relief to the cotton growers who have been most severely pinched by the cotton-acreage allotments this year. I want to pay tribute to the chairman of the subcommittee, our colleague the gentleman from Arkansas [Mr. GATHINGS]. I think he has done a splendid job handling a most difficult problem. When I came back to this session of the Congress, I recognized the serious situation which confronted us, but I had to tell a good many of my friends that the problem seemed almost insoluble.

After the gentleman from Arkansas [Mr. GATHINGS] was appointed chairman of the subcommittee, he went to work on this problem and with the help of the members of the subcommittee, and they were all most cooperative, he held a series of hearings, listening to the problems of the cotton growers and listening to the Department of Agriculture and to the suggestions as to how we might work out some relief. Of course, nobody came up with a panacea and, as the gentleman from Arkansas [Mr. GATHINGS] just said a while ago, this bill is not going to satisfy everybody and I doubt if it satisfies anybody 100 percent.

It is not going to involve any substantial amount of cotton. It is not going to materially affect the production of cotton. If every acre provided for in this bill is planted, and of course it will not be, it would not result in the production of more than about a quarter of a million bales of cotton. That is not going to upset the United States or the world cotton market. But just one bale is going to make a tremendous difference to a great many of our lowest-income farmers. It is not a proposition to help someone to get into cotton on a great commercial scale. That is not the objective of this bill.

The objective of this bill is to keep as many farmers as possible on the farms. We would not ask for this bill if it was simply intended to affect the price of cotton. It is a matter not affecting the price, not affecting the total amount, but a matter of trying to keep a larger number of farmers on the farms, and keep them out of the breadlines and off the relief rolls of our cities. I think we all recognize that as a worthy objective, and I doubt if many of you do recognize what a large percentage of cotton farmers is involved.

It has been pointed out that this bill would provide only 3 percent additional to each State allotment; that that allotment must first be used to take care of those farmers who have allotments of less than 5 acres, to bring them up to 5 acres, or the highest amount they planted in the last 5 years. When considering those men you are talking about one-third of our cotton growers in America. Frankly, I doubt if many of you know it, surely I did not know it, but 291,000 farmers in these United States have allotments of less than 5 acres, and there are less than a million cotton allotments in the United States. So you see the large percentage of cotton farmers that is affected. This bill is going to give great help to a large percentage of the growers.

This bill would, in some States, leave a substantial percentage of the total acreage for use in other hardship cases. As the gentleman from California pointed out, this bill attempts to treat each State with even-handed justice, so that after it is passed there will be no change in the relative position of one State as compared with another. Each State will have exactly the same percentage of the total maximum allotment that it has today. I think that is extremely important.

Mr. BELCHER. Mr. Chairman, will the gentleman yield?

Mr. POAGE. I yield to the gentleman from Oklahoma.

Mr. BELCHER. Is not the reason we are treating every State exactly alike in this bill because some States did a better job taking care of the small farmers than those in other States, and we felt it necessary to treat all States alike?

Mr. POAGE. I think the gentleman is exactly correct. And I must confess that I feel that the Texas State committee did a very poor job indeed.

Mr. TEAGUE of Texas. Mr. Chairman, will the gentleman yield?

Mr. POAGE. I yield to the distinguished gentleman from Texas.

Mr. TEAGUE of Texas. The gentleman knows that I feel our State committee improperly used the 10-percent reserve. Under this bill can they take the acreage that is left over and use that acreage the same as they used the original State reserve?

Mr. POAGE. No. Only 10 percent of what is left over. Ten percent of what is left over will be available to State committees. Frankly, the reason for that is not because all the members of the subcommittee wanted it, because I did not want it, but we felt that we did need much of what is in the bill. But we recognize that the bill does not take care of the situation in all States. In the State of Arkansas there was an error which the State committee recognized and admitted. They said if we gave them this 10 percent, they would correct that error. In the State of Arizona there is a group of veterans that need additional acreage, and the State committee said they would use this reserve for that purpose. I, frankly, dislike to give the Texas State committee any acreage for distribution, but I do feel that we must consider the problems of our neighbors.

Mr. TEAGUE of Texas. Does the gentleman expect the State committee of Texas to use this 10 percent for trends?

Mr. POAGE. We definitely believe that the State committees have no right to use it for trends. That is so stated in our report. We hope our State committee has seen the mistake it has made in the past, and that error will not be repeated.

Mr. EDMONDSON. Mr. Chairman, will the gentleman yield?

Mr. POAGE. I yield to the gentleman from Oklahoma.

Mr. EDMONDSON. Mr. Chairman, I want to express my appreciation to the gentleman for the very fine presentation he has made of this matter, and to express my appreciation as well to the committee for recognizing the particular problem in the drought areas.

Mr. Chairman, we need this legislation to increase cotton acreage, and we need it urgently.

Actually, we need a great deal more additional acreage than is provided for by the bill, and I believe the Committee on Agriculture is aware of this mounting need in the Cotton States.

I can understand the practical problems confronting the committee, however, and the need of writing a bill which will be signed by the President, if possible.

The 3 percent increase, apparently, is the best improvement obtainable, and I intend to vote for the bill.

The subcommittee, under the leadership of the able gentleman from Arkansas [Mr. GATHINGS], has rendered a real service by its report with its recognition of the special problem prevailing in the drought area—where farmers are leaving the land by the thousands and the need for additional cash crops is im-

perative, if wholesale farmer bankruptcy is to be avoided.

I sincerely hope the State committees will allocate these added acres to the counties where drought damage has been most severe, and the danger to the farm economy is greatest.

Passage of this bill is a much needed step in the direction of rebuilding our farm income, which must be restored and improved if we are to have sound national prosperity.

Mr. POAGE. I thank the gentleman. The whole question here, let me say, is whether we are going to get a part of something—some relief, a part of something—or whether we are going to demand something that we know we cannot get and wind up with all of nothing. The whole problem is just that simple. If you want something you had better vote for a bill that has some chance of passing and being signed, and we believe this bill has.

Mr. HOPE. Mr. Chairman, I yield 5 minutes to the gentleman from Mississippi [Mr. SMITH].

Mr. SMITH of Mississippi. Mr. Chairman, the bill we have before us today has been referred to by a previous speaker as relief for small farmers—in fact he mentioned the fact that there are 291,000 cotton farmers in the country who raise 5 acres or less of cotton. Unfortunately, this bill makes no real attempt to solve the problem of that 5-acre cotton farmer. It has been introduced to the public, to the Congress, and to everybody else as an attempt to provide something along that line, but it does not.

This bill would add to the national cotton allotment for the coming year 543,000 acres. Of that total acreage added more than 300,000 would go to farmers other than these small farmers. Now I ask the question, whether or not the language of the bill as it stands now is going to solve the problem of the small-cotton farmer if that provision stands?

Mr. GATHINGS. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Mississippi. Later, if the gentleman will permit me to proceed for the time being.

The further point should be made that in the areas where there are 5-acre farmers, something like 150,000, or more than half of the total mentioned by the gentleman from Texas, are not going to get 5 acres under this bill. I propose to offer an amendment at the proper time designed to meet what the proponents of this bill have stated is their definite purpose, to take care of the small-cotton farmer, and nothing else.

My amendment would provide that each State would have added to its allocation sufficient acreage to give each cotton farmer 5 acres, or the average of his planted acres under 5 if it is less. That would require no more than 398,000 additional cotton acreage. This bill would require 543,000. For those of you who are interested in trying to eliminate some of the problems the Secretary of Agriculture has with the cotton surplus, I would like to point out that under the amendment I intend to offer the increased production would probably be only about 100,000 bales as contrasted with what the proponents of this bill advocate, 250,000 bales.

Now I want to go to the heart of the matter and try to take care of the small-cotton farmer. I have no personal interest in the matter; I am disinterested, for my amendment would not benefit a single farmer in my congressional district. I am purely trying to work out a solution to take care of these small-cotton farmers about whom we hear so much every time a cotton-acreage bill comes before Congress. I hope you will carefully consider what I have said and will consider it in the light of the alternatives presented.

I believe the gentleman from Arkansas [Mr. GATHINGS] asked me to yield.

Mr. GATHINGS. I just wanted to make a statement.

In the gentleman's remarks he referred to the 5-acre minimum requirement as 398,318 acres as against 543,000, the total this bill would authorize.

Mr. SMITH of Mississippi. That is right.

Mr. GATHINGS. Or 398,000 against 543,000.

Mr. SMITH of Mississippi. The gentleman does not say that this bill would give all the 398,000 acres to the 5-acre farmers. Of course it does not.

Mr. GATHINGS. I did not intend to say that.

Mr. SMITH of Mississippi. The gentleman will concede this bill will give 300,000 additional acres to other than 5-acre farmers. That is what the figures in the report show.

Mr. GATHINGS. And the gentleman wants to amend the bill to provide for 398,000 acres?

Mr. SMITH of Mississippi. That is right.

Mr. GATHINGS. This bill provides 543,000 acres now.

Mr. SMITH of Mississippi. My amendment would knock out the 543,000 and provide for 398,000 acres.

Mr. COOLEY. The gentleman referred to 100,000 bales a moment ago.

Mr. SMITH of Mississippi. That is right.

Mr. COOLEY. The gentleman concedes that the 398,000 acres will take care of the little farmer?

Mr. SMITH of Mississippi. That is right.

Mr. JONES of Alabama. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Mississippi. I yield to the gentleman from Alabama.

Mr. JONES of Alabama. Does the gentleman concede that under the proposal we have now pending every 5-acre farmer will be given 5 acres.

Mr. SMITH of Mississippi. No. Some 150,000 5-acre farmers will be left out under the bill we have before us.

Mr. FORRESTER. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Mississippi. I yield to the gentleman from Georgia.

Mr. FORRESTER. As I understand the gentleman, what he is pointing out is that although there are over 500,000 acres to be set aside under the terms of this bill a lot of States in the Union, including the gentleman's State and my State, will not get enough acreage to give as much as 5 acres to each farmer?

Mr. SMITH of Mississippi. That is correct.

Mr. FORRESTER. On the other hand, there are several States that not only get their 5 acres but they get additional acreage?

Mr. SMITH of Mississippi. That is exactly right.

Mr. FORRESTER. What the gentleman is trying to do is to make this a real hardship relief bill?

Mr. SMITH of Mississippi. That is exactly what I am trying to do.

Mr. JONES of Alabama. Under the acreage allotment proposed in this bill Alabama will get up to approximately 3½ acres while the rest of the States west of the Mississippi will be getting 5 acres.

Mr. SMITH of Mississippi. Most of the States west of the Mississippi will get acreage beyond that needed for a 5-acre farm.

Mr. JONES of Alabama. So it is a 5-acre bill as far as the West is concerned but so far as the Southeast is concerned it is a 3-acre bill.

Mr. SMITH of Mississippi. That is one way of putting it.

Mr. COOLEY. It is a fact that under the bill we have here now it would take 85,000 acres in North Carolina alone to take care of the small grower of cotton, the ones with less than 5 acres?

Mr. SMITH of Mississippi. That is right. Under my amendment North Carolina would get 85,000 additional acres.

Mr. COOLEY. We need relief but we get very little. I want to say to the gentleman that I have no right to accept the amendment for the committee but I shall vote for the amendment.

Mr. SMITH of Mississippi. I appreciate the gentleman's remarks.

Mr. HAGEN. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Mississippi. I yield to the gentleman from California.

Mr. HAGEN. Does the gentleman's amendment make any provision for the 6-acre farmer, the 7-acre farmer or the 20-acre farmer?

Mr. SMITH of Mississippi. My amendment does not have any provision for those farmers, and I think I am being fair by leaving them out, for the committee does also in most of the States.

Mr. HAGEN. We have a lot of testimony before our committee of farmers in Texas who farm 15 or 20 acres and I may say that they were in just as much of a hardship position as some of these 5-acre farms.

Mr. SMITH of Mississippi. I think every farmer in my district is in just as much of a hardship position.

Mr. HOPE. Mr. Chairman, I yield 5 minutes to the gentleman from Michigan [Mr. HOFFMAN].

Mr. HOFFMAN of Michigan. Mr. Chairman, I would like to ask the chairman of the Committee on Agriculture, Does the Government have a market price to support for cotton?

Mr. COOLEY. Yes.

Mr. HOFFMAN of Michigan. Under the reciprocal-trade legislation that the gentleman's party put across last week,

can the President not give you relief and get you these foreign markets?

Mr. COOLEY. The President does not have to do that. We are not complaining about cotton being imported.

Mr. HOFFMAN of Michigan. There is not enough coming in?

Mr. COOLEY. It is the export of cotton.

Mr. HOFFMAN of Michigan. Is there anything to this piece I read in the paper this morning about there being at least 2 years' supply of cotton on hand?

Mr. COOLEY. No; I do not think we have a 2 years' supply.

Mr. HOFFMAN of Michigan. Nothing to that?

Mr. COOLEY. There is something to that. We have an abundance of cotton.

Mr. HOFFMAN of Michigan. Well, I do not know anything about cotton.

Mr. COOLEY. We probably have about a year's supply of cotton.

Mr. HOFFMAN of Michigan. If the world has a year's supply on hand other than as a relief measure, there would seem to be no reason for market support by the tax dollars.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. HOFFMAN of Michigan. I yield to the gentleman from Iowa.

Mr. GROSS. A number of gentlemen on the other side of the aisle who supported the Trade Agreements Act the other day, apparently are not worried about imported cotton textiles which destroys the market for their raw cotton.

Mr. HOFFMAN of Michigan. He said we do not import any cotton.

Mr. GROSS. We import textiles, which destroys the American market for cotton.

Mr. HOFFMAN of Michigan. That only takes the fellows in the North and the Northeast—Massachusetts and a few in the South—out of their jobs. That has not anything to do with the cotton program.

No—it just gives us unemployment of factory workers.

Mr. GROSS. It is too bad we cannot all cry for those here today who seek to increase cotton production, but who voted last week for what amounts to free trade in textiles.

Mr. HOFFMAN of Michigan. Those cotton boys are looking for some help, and I am looking for some help for our farmers and workers. I do not want to put anyone out of business, and I think everybody should have a chance to earn a livelihood, but if not able to find a job, some but not all can get social security, old-age pensions, or relief payments—and I would like to see those who have a job and are satisfied permitted to work.

But, I was wondering about this cotton business. We have been appropriating dollars and machinery and technical assistance to other countries and fixed it so that they can grow cotton, then manufacture it into textiles and send it into our markets and throw our employees out of their jobs. Is that not the way it is, as the gentleman from Iowa was telling me?

Mr. GROSS. The gentleman is exactly correct.

Mr. HOFFMAN of Michigan. You see, I have to get this information and education as I go along, but that is the way I understood it.

EXTORTION IN MICHIGAN

I want to talk about the hardships of my own folks for a while. When you cotton fellows want something, I notice you always get it—put peanuts and tobacco and rice in there, too. Now, look. Sometime I would like some help for the folks up in our country. We have people who grow berries—raspberries, huckleberries, strawberries, blueberries, cherries and a lot of peaches, plums and pears and apples as well as other fresh stuff for the markets.

Mr. PATTERSON. Raspberries, too?

Mr. HOFFMAN of Michigan. Yes, raspberries, too. Though you folks give us a lot of that here, and you folks buy a lot of our fruit—and if you would only help us sell for a decent price, we would like it better.

Now, about this berry business, I imagine some of your people have the same situation. We have market associations, big concerns, and the trucks come in from various places. When your tomatoes are gone down in Texas, they come up and buy from us, as well as peaches and pears, and we ship out West. For example, a couple of weeks ago, we had truckers—owner brokers they are called by some unions—they may have 2 or 3 or 15 or 50 trucks; they do a big business in that market. Some drive their own trucks, some hire drivers—union men. The other day a trucker who has 12 trucks—a broker, he is called by some—he sent out 12 trucks with frozen strawberries. Well, when they went out, these union boys, from the teamsters—you know, they have a contract now that covers 13 Mid-West States where they get a guaranteed weekly wage, where, if they work only an hour in a day, they get a full day's pay—the teamsters men followed the trucks. The union had its cars, radio-equipped, follow each one of those trucks, some loaded with frozen strawberries. The fleet carried $70,000 worth of frozen products—let us say—strawberries. When the trucks got out to their destination, these union representatives that had followed along in their cars said, "You cannot unload." Now, do not forget, the trucks were driven and operated by union members who were fully paid up in their dues and special assessments and in good standing. But, when they got out there to their destination the union business agent said, "You cannot unload." The drivers said, "Why?" "Well," says the extortionist, "We have a new contract coming up, and we want the boys to sign up." The driver said, "Well, here we are with frozen strawberries." "Well," he said, "you can telephone back to the truck owner." So, they telephoned back, and the local union representative says, "Yes, you can unload if the fellow who owns the fleet of trucks will sign this overall contract."

Now, what could the owner do? He had $70,000 worth of berries in refrigerated cars ready to be delivered. He either made delivery or he took a $70,000 loss.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. HOFFMAN of Michigan. May I have a little more time?

Mr. HOPE. Mr. Chairman, I yield the gentleman 2 additional minutes.

Mr. HOFFMAN of Michigan. I cannot even get started on this thing in 2 minutes. Do not think this situation is not coming to you boys—pardon me—to you gentlemen of the House, to you Members—my colleagues and to the people who send you here to protect them. So, the truckowner has to sign the contract, the overall teamster contract. If that is not coercion, if that is not a violation of the Hobbs amendment, the Anti-racketeering Act of 1934, then I do not know what that law was enacted to prevent.

That procedure is nothing less than extortion. It will finally get every congressional district where a ton of freight is moved. And that is not the end of this raid on the consumer and the taxpayer. It is what the Justice of the United States Supreme Court once said—before the Hobbs amendment—was highway robbery.

Mr. COOLEY. Mr. Chairman, will the gentleman yield?

Mr. HOFFMAN of Michigan. I yield to the gentleman from North Carolina.

Mr. COOLEY. Why does the gentlemon not report that situation to the Department of Justice? It sounds as if the Hobbs bill perhaps has been violated.

Mr. HOFFMAN of Michigan. It has. We have a dandy Attorney General with a good enforcement division, but he is so loaded down with similar cases that have accumulated from the last two administrations he just has not been able to get going on all these current cases. That is the only reason I have not reported this case. I am getting the case ready. Just as I readied a few others until the Committee on Government Operations for petty reasons of its own stopped me. I can pay my own expenses and get this and several other cases ready.

There is another little collecting station or two, a cooperative, in this shipping situation. The farmers haul their berries and other products to a collecting station, where they are held waiting for the trucks to come. Then if the big truck from the larger station or market wants to go down to the local co-op and collect a load, do you know what the truckowner has to pay? He has to pay $16 for the privilege of loading the farmer's produce on to a truck.

Nor is that the end of the racketeering by the teamsters. After the produce is loaded there at the local station and on a truck driven by a union driver, the truckowner has paid $16 to get that truck loaded. After it comes up to the delivery point then this truckowner often has to hire what they call a city man at the point of delivery and pay an additional fifteen dollars and some cents to get it unloaded. That cost is all coming back on the consumer eventually. Every unionman who eats any of that farm produce has to pay his share of that $30 of featherbedding.

Nor is that the end of the graft, but this is a long, long story, and you will get more of it as the days come on. The farmer, after he gets the strawberries or

other produce, has to have his pickers join the union and pay another fee. Then if he wants to take them to market he has to have his hired man join the union.

My colleagues have been talking about hardship. I feel sorry about you boys, but do not cry about it. You have not seen anything yet. You will see more of it if you stay in bed with Jimmie Hoffa and his crew.

Later, as opportunity offers, I will try to tell you a little more.

Mr. COOLEY. Mr. Chairman, I yield such time as he may desire to the gentleman from Texas [Mr. THOMPSON].

Mr. THOMPSON of Texas. Mr. Chairman, there are a number of points in connection with the bill, H. R. 3952, which should be either clarified or emphasized. For one thing, this bill has picked up the name of the 5-acre farm bill. This is somewhat misleading.

We do propose to take care of the group who has the smallest cotton acreage first. In most of the States affected, these are the ones whose economy will be worse upset if we do not provide some additional acreage. However, in my own section, the distressed farms include a great many with up to 10 and 15 acres. These would be materially helped by the bill now under consideration.

If you want to find a name to give the measure, I would suggest calling it the family farmers bill because in practically all the cases the acreage is going to farms which are operated by a farmer and his family.

Another point that needs clarification—when we speak of 5, 10, or 15 acres, we are referring to cotton acreage only and not to the acreage of the whole farm. In most of our States, where a small farmer has cotton acreage, it provides his only money crop. In my own county, for instance, these farmers plant other crops. They grow much of the food that they eat. They probably have a milk cow and a few pigs, chickens, and such as that, which are principally for their own use. They may sell off a few eggs or a little milk, but these do not provide a money crop.

The cotton which they grow is used to pay interest and taxes and buy the things in town which cannot be produced on the farm. Up to now, we have never found a money crop which can be substituted for cotton; and if we make it impossible for our people to farm cotton, then we are certainly going to force them to leave the land and seek employment elsewhere.

Just before Christmas I visited the part of my district which is the most seriously affected by the acreage cuts. For the first time, since I can remember, I saw signs along the highway advertising farm land for sale. I asked if it was selling and learned that it was. The buyers are mostly wealthy people from the cities nearby. They are buying up the land and the former owners are leaving and going to town.

It reminds you of the days just prior to the depression of the late twenties and thirties. We cannot depend on city employment for all of these country folks, and, sooner or later, we will have them to take care of. We submit that it is far better to take a little more time to reduce our cotton surplus, and, thereby, to make it possible for the small farmers to stay on the soil, than it would be to shrug our shoulders and say, "it's too bad, but there's nothing we can do about it."

The bill which is before you would soften the impact of the drastic acreage reductions decreed by the Department of Agriculture, and give the individuals and the communities time enough to work out their destiny. Let me emphasize the necessity for keeping available the production of cotton which could come from these farms. If we get into war or if any of our major allies have a war, the cotton surplus in this country would not last more than a matter of weeks. Very promptly the Secretary of Agriculture would be beseeching the farmers to produce more cotton for the war effort. That is what happened in 1950, and that is a big reason for our present troubles.

Speaking of the Korean war effort, let me point out to you that when the all-out production was no longer necessary, the Secretary of Agriculture did not impose acreage limitations. He did, however, ask the farmers to voluntarily cut their production. Some farmers did cut their production and others did not. Those who cut had every reason to believe that these self-imposed limitations would never react against them in later history computations. However, that promise was forgotten and when they reminded the Secretary of this obligation in Houston a few weeks ago, nobody in his office could remember anything about it. So unless we do something about it now, my farmers and yours are going to be penalized for doing a proper and patriotic job.

I am sorry that some of our colleagues seem opposed to the bill because it does not fully provide for their people. Of course it does not. It is, by no means, satisfying to me. However, it does provide some degree of relief for every State which produces cotton. We have tried to leave enough to the discretion of the State committees to enable them to work out some measure of help to their hardship cases.

The committee studied with great care every known avenue of approach to this troublesome subject. We could find nothing which came as near taking care of everybody and which could merit the support of every State which produces cotton.

Mr. COOLEY. Mr. Chairman, I yield such time as he may desire to the gentleman from Mississippi [Mr. WINSTEAD].

Mr. WINSTEAD. Mr. Chairman, I rise in support of this bill. I wish to congratulate the Committee on Agriculture for reporting legislation which will, if enacted, give some relief to hardship cases, especially among our small cotton farmers. Secretary Benson's reduction in acreage allotments to the lowest figure in the history of the country has made it practically impossible for many small farmers to provide for their families. I, along with other Members in the Cotton Belt, have introduced several bills to give increased acreage to our cotton farmers. I feel that some of these bills would be an improvement over the one we have under consideration today. However, the provisions of the bill which we are considering will go a long way toward adjusting hardship cases. I have received many letters from farmers, especially small farmers, in my district who are greatly disturbed over the present setup. The following excerpts are only typical of the many communications I have received:

I am writing you for advice on how to make a living. They took all my cotton acreage except 3.2 acres, so can you tell me how I can make a living for my wife and children. I am 56 years of age, cannot get a job at anything. I have three children in school. * * * All the loans have turned me down because I have so few acres in cotton. I can't change over to dairying because I have no money to buy cows. * * *

This is the first time I have ever written to any Senator or Representative. I am a very small farmer, among the smallest. I have 66 acres in cultivation with a cotton acreage allotment of 1.3 compared with 6.5 last year. * * * This is my only cash crop. * * * How can I support my family of eight with such a small allotment?

This is the first time I have ever begged for anything, but it seems like it is time I begged for something to be done about our cotton allotment. I have small farms of 135 acres. I have 2 places in cultivation and was allotted 9 acres of cotton for both places. This being our only money crop, how can we support a family of seven, send the children to school, etc.?

I need some more information as to how I can make a living. I had 11.2 acres in cotton last year and got 7.2 acres this time. I have 8 in my family; 6 children in school. I can't dig up 90 cents a day for lunches. It looks like we will lose our place.

This survey covers the following reports:

Number of counties with 1,000 or more acres of cotton and number of counties reporting

	Number of counties having 1,000 or more acres of cotton	Number of counties reporting
Alabama	67	67
Arizona	7	7
Arkansas	63	54
California	8	9
Florida	11	27
Georgia	138	139
Illinois	0	3
Kentucky	2	2
Louisiana	46	29

Tennessee	35	44
Texas	205	212
Virginia	6	14
Total	844	887

I would like to point out just what faces the small farmers unless we give relief now.

Summary of answers from 887 counties to the following question: How many renter families (tenants and sharecroppers) have been or will be forced off farms due to 1955 reduction in cotton allotments? The question is concerned only with the number of renters (as defined above) forced off farms due to the 1955 reduction in cotton acreage allotments and not for other causes such as mechanization, drought, etc.

State:	*Renter families*
Alabama	7,554
Arizona	127
Arkansas	4,246
California	0
Florida	279
Georgia	8,157

Oklahoma	1,477
South Carolina	4,147
Tennessee	3,075
Texas	5,580
Virginia	108
Total	55,348

Summary of answers from 887 counties to the following question: How many small cotton farmers (i. e., those with 5 acres or less of cotton alloted in 1954) will have net income for the farm reduced by $100 or more due to the 1955 cotton-acreage reduction? Do not include in this estimate the number who may have income reduced due to not planting full allotments. The value of crops produced on acres diverted from cotton should be considered in arriving at the net income loss.

State:	
Alabama	17,595
Arizona	38

Virginia	1,632
Total	130,603

These findings come from an official survey by the Department of Agriculture.

The plight of these farmers is far more serious than many people realize. It is near cotton-planting time in my district. I urge that we pass this bill today. I hope that the Senate will take immediate, favorable action, and that the President will sign the bill, thereby enabling the farmers to take advantage of the increases this year.

Mr. COOLEY. Mr. Chairman, I yield such time as he may desire to the gentleman from Texas [Mr. FISHER].

Mr. FISHER. Mr. Chairman, I rise in support of the pending bill which will add 543,234 acres to the amount of farmland that may be planted in cotton this year. This bill is designed to provide a measure of relief to farmers suffering from hardships due to the drastic cut in acreage. Out of this additional acreage the State of Texas will get its proportionate share, which is 228,383 acres. This amount is inadequate to meet many of the pressing needs, but the Committee on Agriculture, which conducted hearings on the measure, feel this is the largest amount that we can hope to get approved by Congress and by the President.

Unfortunately, the State committees in many of the cotton producing States did not use wisdom and good judgment in the allocation of the 10 percent acreage reserve. In Texas most of that reserve went to areas not as deserving as other sections where drought and other hardships have brought great distress to farmers and a drastic reduction in acreage that can be planted this year.

The pending bill will help. But there will remain many hardship cases that this limited increase in acreage will not help very much. But it is either this or nothing, and there is no time to waste. The planting season is approaching, and this bill must go through the Senate and then to the White House. All of that takes time. Therefore, I urge that the bill be promptly approved.

Mr. COOLEY. Mr. Chairman, I yield such time as he may desire to the gentleman from Mississippi [Mr. WILLIAMS].

Mr. WILLIAMS of Mississippi. Mr. Chairman, the legislation now under consideration is of vital importance to thousands of small farmers. This bill, H. R. 3952, simply provides for a 3-percent increase in each State's 1955 cotton allotment. The increased allotment would go first to small farmers to provide, so far as possible, each farmer a minimum allotment of 5 acres or the highest number of acres planted to cotton in 1952, 1953, or 1954, whichever is smaller.

The committee has estimated that there are 291,809 cotton farmers who will be affected by this bill. In the State of Mississippi alone, there are 47,164 farms which have been allotted less than 5 acres for the 1955 season. Anyone familiar with the hard work, and the indeterminate number of risks involved in growing cotton should realize that the farmer and his family cannot exist on 1, 2, or 3 acres of cotton. The high cost of fertilizer, seed, labor, and machinery make it imperative that Congress take some action to alleviate the hardships which currently confront the small cotton farmer.

The problem facing the small cotton farmer is illustrated by the following United States Department of Agriculture figures with respect to the situation in Lincoln County, Miss. With a total of 1,440 cotton farms, 1,143 farms—or 79.2 percent—have been allotted less than 5 acres in 1955; 312 or 21.6 percent have been allotted 1 acre or less. Producing about 250 pounds per acre and with cotton selling at about 30 cents per pound, it does not take much arithmetic to see that these 1,143 farmers and their families will not have very much income this year. Since Lincoln County is a typical Mississippi hill county, it is readily seen that the agriculture income in 1955 will be greatly reduced. Even now, southern farmers are in great difficulty because of the drought and depressed beef prices. In 1955 Mississippi farm income was $100 million less than in 1953—a decrease of more than 20 percent. If the legislation under consideration is not passed, the southern farmer can expect a further decline this year.

There has been some argument that this bill will, if enacted into law, further add to the present cotton surplus. Of course, any increase in acreage is bound to result in an increase in production. However, the increase which will result from enactment of this bill will be negligible compared with the cotton supply on hand which has accumulated over the years. Moreover, when compared with the benefits to be received by the thousands of small farmers through enactment of this measure, the additional cotton supply is again negligible. The committee estimates that only 250,000 bales will be produced from the additional amount of acreage provided in this bill. Certainly, a quarter million bales of cotton will not destroy our farm program.

Mr. Chairman, there is little resemblance between cotton farmers of the South and those of the Far West. According to acreage-allotment figures of the Department of Agriculture, Mississippi cotton farms average about 9 acres, while California cotton farms average over 90 acres. Relatively few cotton operations in the Southeastern States are large operations, while quite a large portion of western growers are corporations, owning or renting several thousand acres of land, and making use of the latest mechanical equipment. As a result, the cost of production to the little southern farmer makes it extremely difficult for him to compete with western production.

The bill presently before us is far from adequate to meet the needs of the cotton-growing section of the country. It falls far short of alleviating all of the hardships brought about by the acreage cutback. Even so, we accept the fact that half a loaf is better than none at all, and remember the old saying that "a bird in hand is better than two in the bush." I am willing to accept the committee's judgment in the matter, believing that they are better qualified than any others in the House to determine how far we will be able to go in providing additional acreage to take care of these situations.

My able and distinguished colleague from Mississippi [Mr. WHITTEN] has called to the attention of the House the damage that current policies of Government agencies has inflicted on the cotton industry, by permitting domestic supplies to accumulate, and withholding our cotton from sale on the world market at competitive prices. He might well have gone further, to point out that we have been subsidizing the production of cotton in foreign countries through our ridiculous and costly programs of foreign aid. In effect, we have subsidized our competitors, who are now driving us off the world market. All of these factors, taken into consideration together, must lead to the inevitable conclusion that Government policies have been the chief contributor to the unhappy conditions in which American agriculture, as a whole, finds itself. Congress and the Government agencies must assume their share of the responsibility for these conditions, and Congress will be failing to discharge its obligation to a large segment of its citizens if it neglects to pass this bill and provide this very necessary relief.

Mr. COOLEY. Mr. Chairman, I yield the remaining time to the gentleman from Mississippi [Mr. ABERNETHY].

Mr. ABERNETHY. Mr. Chairman, inasmuch as the gentleman from Michigan [Mr. HOFFMAN] made some reference to the supply of cotton, I think it appropriate at this time to comment on that. While the supply in a sense is generally large, it amounts to only 40 percent of a full year's supply over and above the normal carryover. Normally about 5 million bales of cotton are carried over from year to year. Such an amount is regarded as normal. But assuming that no carryover at all is required, still there would only be a 10 months' supply or thereabout on hand. To those of us who live in the Cotton Belt such is a large supply. It is seriously crippling our present farming operations. But insofar as the economy of the country is concerned, it is not a dangerously large supply. From that standpoint, it does not present a bad situation.

With that, Mr. Chairman, I would like to proceed to a few remarks about this bill. As is always the case when a bill of this character is brought to the House, it precipitates considerable discussion and brings forth sundry amendments and varied views. These same discussions heard today took place in the committee. Now as to the members of the committee, I would not say they are absolutely the best informed on the subject but I do say they have studied it as long as anybody in the House. Amendments similar to those to be offered were offered in the committee. Some of them I offered and favored. But the committee saw fit to vote them down. Similar arguments in their support were offered in the committee. Some of those arguments I approved and some I did not. So after compromising all views we finally got a bill and brought it to the floor. As I said a moment ago, we are now hearing more of the same arguments, which is healthy. I am glad we are hearing them but let us not overdo it and thereby kill the bill.

The issue before us is not a question of how much cotton we ought to consume or export. I am glad these points have been mentioned because they are important—nor is the issue how much your State is getting and how much my State is getting because each State is getting identically the same increase percentagewise. The only issue here, as I view it, is are we going to take this last chance. Time is getting late. It is running out. Are we going to take advantage of this last chance to do just a little something for the benefit of my own State involving about 47,000 Mississippi cotton farmers whose allotments have been cut under 5 acres. That is the only issue just now as far as my State is concerned. I know there are some in other States who do not have the small-farm problem. I know, too, they are getting some acres under this bill. I also know if they do not get their share, percentagewise, I probably will not get mine and we need it badly.

I disapproved of the formula adopted in the emergency bill of last year in making State allotments. I thought then and think now it was unfair. But the committee worked its will and so did the House of Representatives. In fact, I offered amendments last year in the committee which would reverse that situation, but the committee saw fit to vote them down. Unfortunately, they would vote them down again today. There is no need of us kidding ourselves about that.

Also there were amendments offered in our committee to make the pending increases even larger than we made them in this bill, and they also were voted down. There was one amendment offered to make the increase smaller.

I have good reason to believe the President will approve this bill. I cannot reveal the source of my information because I have it in confidence. I have good reason to believe that the Departments will approve it and recommend that the President sign it. I cannot reveal the source because that also has come to me in confidence. But I want to say to you, my friends, if you have some farmers who are hurt, I honestly believe—I honestly believe that this is a last chance to help them. Let us not kill this bill with wrangling and too much debate. We need the acreage provided for in this bill and we need it now. It may not be what you want. It isn't what I want, but it will help and, if we act speedily without argument, I believe we will get it.

The hour is getting late. They will be planting in my section of the country in a few weeks. Time is running out. It will take some time to get the bill through the other body and over to the White House to be signed. I do not know how long, but I know it will require considerable time. More time will be required in administration. Time is therefore of the essence. Let us move and move now. Let us not talk this bill to death or load it down with amendments.

We all know what is in it. We are not getting exactly what we want. None of us are. Of course not. But the Committee on Agriculture is pretty well informed about the situation and the need. Its members are very well informed of what can and cannot be passed. We believe we have brought you a bill that can be passed and will be signed by the President. So, let us pass it. Time is running out. Cotton-planting time is on us. This is our last chance.

The CHAIRMAN. The time of the gentleman from Mississippi [Mr. ABERNETHY] has expired.

Mr. HOPE. Mr. Chairman, I have no further requests for time.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Be it enacted, etc., That section 344 of the Agricultural Adjustment Act of 1938, as amended, is amended by adding at the end thereof the following:

"(n) Notwithstanding any other provision of law the 1955 cotton acreage allotment established for each State pursuant to the provisions of this section (excluding those States which received a minimum allotment under subsection (k)) shall be increased by 3 percent. The additional acreage made available to the States under the provisions of this subsection shall, in order to assist small farmers, be apportioned directly to farms so as to provide each farm a minimum allotment equal to the smaller of (1) 5 acres or (2) the highest number of acres planted to cotton on the farm in 1952, 1953, or 1954. If the additional acreage is insufficient to meet the total of the farm increases so computed, such farm increases shall be reduced pro rata to the additional acreage available to the State. If the additional acreage available to the State is in excess of the total of the farm increases so computed, in order to alleviate hardships, the acreage remaining after making such farm increases shall be apportioned to counties on the basis of their respective shares of the State acreage allotment heretofore apportioned pursuant to subsection (e) of this section, and the additional acreage so made available to counties shall be apportioned to farms in the county so as to provide each farm with an allotment for 1955 equal to 60 percent of the acres planted to cotton on the farm in 1954. If such additional acreage is insufficient to meet the total of the farm increases so computed, such farm increases shall be reduced pro rata to the additional acreage available to the county under this subsection. If the additional acreage available to the county is in excess of the total of the farm increases so computed, the acreage remaining after making such farm increases shall be added to the county acreage reserve under subsection (f) (3) of this section and shall be used by the county committee for the purposes specified therein. The additional acreage made available to States under the provisions of this subsection shall be in addition to the national acreage allotment and the production from such acreage shall be in addition to the national marketing quota. The provisions of this subsection shall not apply to extra long staple cotton."

With the following committee amendment:

Page 2, line 14, strike out all of lines 14 and 15 and insert "as provided in."

The CHAIRMAN. The question is on the committee amendment.

The committee amendment was agreed to.

Mr. WHITTEN. Mr. Chairman, I offer an amendment which is at the desk.

The Clerk read as follows:

Amendment offered by Mr. WHITTEN: On page 1, line 10, strike out the figure "3" and insert "6."

Mr. WHITTEN. Mr. Chairman, I ask unanimous consent to proceed for 5 additional minutes, and to revise and extend my remarks.

The CHAIRMAN. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. WHITTEN. Mr. Chairman, I repeat in some way the statement I made earlier. We have a system of price supports of which we are all aware, but the law provides that those price supports shall serve, in the case of cotton, that cotton can be sold on the domestic markets at the support-price levels plus reasonable carrying charges, but the same law which creates this price-support system provides that the Commodity Credit Corporation may sell that cotton in world trade on a competitive basis. That refers to surplus commodities, and surplus cotton. I say it is a challenge whether you have got any right to call anything surplus when you will not offer it for sale. That is the situation, and it is uncontradicted in our hearings before the Committee on Agricultural Appropriations. This cotton that is referred to is cotton that we got under the price-support system, but it is cotton which your Government has held for a number

of years and would not offer for sale in world trade on a competitive basis.

Now, that law provides that the Secretary of Agriculture, once the supply reaches a certain level, shall take into consideration first the supply; the expected exports; the domestic consumption; plus 30 percent. In those instances they count cotton which is a part of our supply but which has not been offered for sale on a competitive basis. He figures the export, but he does not figure what we might export if he would offer it for sale at the price level.

It provides that after he has taken those factors into consideration he shall issue an order fixing the number of acres that will produce the number of bales, with one limitation, he cannot go below 10 million bales in a year. Now, that is in connection with your own support system that you shall carry with it acreage reductions and marketing quotas. But the point I make is that with this holding of the domestic support price as the world price by the Department of Agriculture, we give assurances to the big American cotton interests that we are going to hold the world price at our domestic support price; and, Mr. Chairman, every time you have cut the acreage of American cotton farmers you have in reality shifted your cotton acreage to foreign countries.

I offer this amendment striking out the 3-percent increase in this bill and providing 6-percent increase. If this amendment is accepted it will double the amount of increase in cotton acreage and provide approximately 1,086,468 acres to the national acreage allotment, but will still leave a reduction from last year's acreage of 2 million acres. I believe this amendment will do much to make other features of this bill much more workable; but above all it will keep American farmers in the United States in the production of cotton, which I think is essential to our own economy and is certainly necessary to tenant and other small farmers who are being reduced below a subsistence level by the present order.

The Department of Agriculture, after numerous requests, finally made a report to our subcommittee showing that the effect of existing acreage reductions will be to put more than 55,000 renters and sharecropper farmers out of homes. This report, made by representatives of the Department of Agriculture, further shows that more than 130,000 small farmers with incomes of less than $1,000 gross per year will have their income reduced by more than $100.

I know that many people have been led to believe that if firm price supports are to be retained we must take this reduction in American cotton acreage. That should not be true when we will not offer for sale competitively and when the effect is to put many farmers out of business. It is not required by law.

Our hearings, which I have here before me and which I hope all of you will take time to read, clearly show that the support level is one thing under the law, and the sale price of CCC stocks in world trade is another. For the first time the Department of Agriculture agrees that it has full authority to sell CCC stocks on a competitive bid basis to our traders for export and sale in world markets. This authority the Department refuses to use. This cotton which the Department has on hand but will not offer for sale in world trade on a competitive bid basis has been used to bring about this drastic reduction in American cotton acreage, with the devastating effect on many farmers which I have heretofore mentioned; and all the time we move United States acreage overseas.

If the reduction in American acreage resulted in reducing on a permanent basis world supplies of cotton, that would be one thing, but the record shows that we cut down on American production and American acreage, and such acreage is merely transferred to foreign countries, where, I am told, the financing and operations are really foreign investments of American cotton operators.

This is clearly shown on page 86 of our hearings, where, according to the Department's own records, while we reduced our acreage last year by more than 3 million acres, the rest of the world increased its production of cotton by 1,200,000 bales. The records show that while the United States was reducing cotton acreage here Egypt increased her cotton acreage by 240,000 acres. Those records show that while we reduced our cotton acres here, India increased her cotton acreage by 2 million acres, and Brazil by 500,000 acres—because the Department of Agriculture made the United States support price the floor for United States sales abroad. This is not required nor contemplated by the Commodity Credit Corporation charter.

While the Department says that it does not know what producers in foreign countries will do this year, with the exception of Mexico and Egypt, their own figures show that as we reduce cotton acreage in the United States this year Egypt plans to increase her acreage by 340,000 acres and Mexico plans to increase her acreage by 275,000 acres. While the Department says it does not know about Brazil the record does show that last year Brazil increased her cotton acreage by 500,000 acres. Thus, my friends, we should not reduce the United States cotton acreage as provided by the Secretary's order.

The remedy must come from selling American production on a competitive basis. This the rest of the world is doing now. We must retain now and in the future our share of world production. This the Department of Agriculture has the authority to do. Instead of using the authority of the law to sell United States cotton competitively, we have followed the policy which is set forth on page 142 of our hearings in the following words, in a release of the Department of Agriculture entitled "Outlook for American Cotton in Foreign Markets," dated February 17, 1954:

> The present season again finds the United States in the position of residual supplier of cotton to the world, that is, with the demand for its exports limited until other exporters have largely sold out.

That is the policy our Department continues to follow. Notwithstanding that the Secretary and his Assistant Secretaries testified to our committee that in their judgment high United States support prices are pricing the farmer out of his markets. They then accept the responsibility for pricing him out of world markets by not offering his commodities in world trade on a competitive bid basis, as is authorized by law. It would appear then that the Department knowingly, if they believe domestic price support levels price the farmer out of domestic markets, by their determination to make the United States support price the world price are taking the responsibility for pricing the United States farmer out of world markets, with increased foreign production a matter of record.

Certainly there is ample evidence to show that large United States financial interests are taking advantage of the Department's fixing of United States support levels as the world price; and each time you cut out acreage in the United States, and thereby cut out 55,000 farmers and reduce another 130,000 below a subsistence level, you are giving those acres to foreign countries where United States financial interests are moving in where they do not have the high cost of labor and other high United States costs. And just as surely as I stand here, our failure to offer for sale on a competitive bid basis provides an umbrella for this expansion in foreign lands. United States operators in Brazil and Mexico run practically no risks at all.

I am not satisfied with all the provisions of the pending bill. I hope my amendment will be adopted, because at least it will have the benefit of returning to the farmers of the United States the right to farm, and will at least protect him in holding approximately one million acres of cotton which otherwise, according to what happened last year and what is in the offing this year, would be sent overseas. The many administrative problems will be relieved to a great extent because of more acres with which to deal.

May I point out to you that the Secretary of Agriculture agrees that he has full authority to sell cotton on a competitive-bid basis. If he would only move in and sell some part of it on such basis, retaining to the Department the right to determine how much is to be offered and the spacing between offerings he would cause American financial interests to give serious thought before they would continue to plant every acre we cut out here, in Brazil, Mexico, and other countries of the world. It is time we realize that the trouble comes from a refusal to sell our cotton on a competitive basis and not because we are producing more than our share of the world production. If we give it up the other countries take it, and all too frequently it is United States interests taking their finances and know-how into those foreign areas where instead of 90-cents-an-hour wages it is less than that per day.

Unless we pass this amendment and put ourselves back in the cotton business to stay, we will be gradually cut back to the domestic market. This is economically unsound and the only basis that I can see for any continuation of such policy would be to make the cuts so

harsh and the farmers so adversely affected as to get rid of the price-support system. Our Secretary of Agriculture says that is not his intent, but unless that be the intent of the Department there is no sound basis to make the United States price an umbrella over world prices, to cut out cotton acreage and cotton production, and thereby many farmers, in the United States only to send the same production overseas. I hope the amendment will be adopted.

Whether you believe in flexibles or firm supports, whether you believe in this or that, there is no farm program that can last if you do not let the farmers farm. It sounds big to talk about adding a million acres to this drastic reduction under the pending order but, after all, if you add a million acres, as my amendment would do, that is still 2 million acres under last year's production. I say that we ought to have, in addition to saving the million acres, a change in the United States Government policy so that our commodity will be offered to the consumers of the world, offered for sale, and the price made competitive. We certainly need to sell the products of the investment that we have in this country. If there is any reason in the world why we should not have done it before, when we see that it is reaching the place of putting thousands of people out of homes and others on a gross income of less than $900 a year, it is high time somebody wakes up to the erroneous policy that we have followed.

I hope that my amendment will be agreed to. There is no statement I have made that is not borne out by the record of the hearings before our Subcommittee on Agricultural Appropriations. Every last word is borne out. This is the Department's own figures I gave you as to the effect of the present order.

Mr. ALBERT. Mr. Chairman, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Oklahoma.

Mr. ALBERT. There certainly is a lot of merit in the gentleman's argument, but we are faced with a practical situation. I am sure the gentleman realizes that. Does the gentleman think the Department would recommend this bill to the President if we increased the acreage by a million acres?

Mr. WHITTEN. I have every reason to believe that the Department will approve it with my amendment in it just as readily as it would approve it with the amount that is in the bill.

Mr. COOLEY. Mr. Chairman, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from North Carolina.

Mr. COOLEY. The gentleman has made reference to the fact that more than 50,000 people have been driven out of their homes, leaving the impression that that is the direct result of the acreage allotment and marketing quota law. That is not altogether true. The point that the gentleman is failing to emphasize is that the administration now in power, and officials in the preceding administration, have not competed in the world market to sell the cotton.

Mr. WHITTEN. I do not want to leave any impression of that kind. I say that because we are counting cotton on hand which is not surplus because it has not been offered for sale competitively, the effect of counting this cotton that is not for sale and saying that it is surplus, has brought about the present order, which is erroneous as well as the policy in cutting acreage here. You are merely giving it overseas with a guaranteed profit to American financial interests.

I would like to read to you an editorial from the Jackson (Miss.) Daily News:

A TRAGIC FARM PICTURE

One of the most ominous phases of our economic picture in this Nation is the steady movement of population from farms to cities.

It is useless, however, to try to make official Washington realize what will eventually be the dire consequences of this migration.

All our cities are growing too rapidly. They cannot provide jobs for rural workers who are leaving the farms. Living conditions in the larger cities are becoming atrocious in spite of federally financed housing projects. School buildings cannot be built fast enough to furnish seats for the influx of rural children.

It is true that farm life in some parts of the Nation does not offer all the attractions people would like to have, but farm life at its worst is far better, and provides more of the comforts of life, than the slums in our overpopulated cities where the armies of jobless are steadily growing.

Yet in the face of this fact Congress is once more curtailing production of standard crops.

The Department of Agriculture whose Secretary is the principal promoter of acreage reduction, frankly admits that the cut in cotton acreage this year will force 55,348 families from southern farms, and another 130,603 families will barely get by because their incomes will be sharply reduced by the acreage slash.

Mississippi will furnish 11,981 of the families driven from farms and 34,414 of our families will be reduced below a decent subsistence level.

In the face of these tragic finds, won't somebody in official Washington please wake up, face the facts, and at least show the gumption that God gave geese?

We either move our farm production in world markets at competitive prices or else we cut back to producing for the domestic market, aggravating the situation my friend Major Sullins so well portrays.

Mr. GATHINGS. Mr. Chairman, I rise in opposition to the pending amendment.

Mr. Chairman, I hope the gentleman's amendment will not be adopted. There is a reason that the Farm Bureau and the various farm organizations of this country have not come out in favor of any increase in the national-acreage allotment. They are not here this year like they were last year. At that time, if you will recall, the beltwide group of representatives of cotton producers from the Carolinas across to California were right here in this Congress asking for aid and relief to alleviate the situation that existed at that time. This year you do not find that.

We are here because of the appeals of the farmers, the sharecroppers, and tenants who really need some aid. We would like to help them more, we would like to increase the allotment to a greater degree if it were possible to do so.

Mr. WHITTEN. Mr. Chairman, will the gentleman yield?

Mr. GATHINGS. I yield to the gentleman from Mississippi.

Mr. WHITTEN. Does the gentleman realize that when he refers to the big cotton organizations, that the Export Committee of National Cotton Council includes Mr. Fleming of Anderson & Clayton and Mr. Hohenberg, all of whom have large cotton interests in Brazil and Mexico, and who deal in cotton on a world basis?

Mr. GATHINGS. I do not have in mind the National Cotton Council. I was talking about the other farm organizations. The National Cotton Council is an overall cotton organization and not a growers' group alone.

May I say that the gentleman from Mississippi is one of the outstanding agriculturists in this Nation. He has studied this problem, he wants to do something to be helpful not only to his people but to cottongrowers throughout the Nation. However, I do not believe that to increase this allotment by 6 percent would get the bill signed by the President.

Mr. COOLEY. Mr. Chairman, will the gentleman yield?

Mr. GATHINGS. I yield to the gentleman from North Carolina.

Mr. COOLEY. If the gentleman's amendment is adopted Arkansas would receive more than 90,000 acres?

Mr. GATHINGS. That is right, however, if the Whitten amendment defeats the bill, Arkansas and all other States would get nothing.

Mr. COOLEY. Arkansas would only need 8,400 acres to take care of the small farmers of Arkansas.

Mr. GATHINGS. To take care of the 5-acre minimum.

Mr. COOLEY. And the gentleman from Arkansas, in opposing the amendment offered by the gentleman from Mississippi, is aware of that fact.

Mr. GATHINGS. Absolutely.

Mr. COOLEY. I would like to have the gentleman explain if the situation in Arkansas as it exists there now in regard to the little farmer is not brought about by the fact that those in charge of the program in Arkansas have properly administered the program.

Mr. GATHINGS. That is right. The State committee did a fine job in trying to alleviate the plight of the small-acre farmer. And an even greater work was done by the fine farmers who served on the various county committees. It is a remarkable thing how these men gave of their time and effort in an attempt to give fair treatment to all. If I may deviate at this point, I would like to commend all the farmers who have served on these county committees.

Mr. COOLEY. Whereas in other States they have used the cotton acreage allotment for taking care of the big farmers instead of the little farmers.

Mr. GATHINGS. In the gentleman's State, I would say that his State committee did not look after the small-farm folks and did not look after the new farmer.

Mr. COOLEY. I am not complaining about the way the program has been administered in North Carolina.

Mr. GATHINGS. Since the gentleman mentioned my State, our State committee did a fairly good job, because practically all of the small farmers have been brought up to the 5-acre minimum, and we require about 8,000 acres to bring the rest up.

Mr. COOLEY. I just wanted to get this in the RECORD, that while it appears that Arkansas is receiving 45,000 acres, it is due to the fact that your program has been administered in a certain way different than it has been administered in other States.

Mr. GATHINGS. That is right.

Mr. COOLEY. Whereas in North Carolina we are only getting 15,000 acres, we need 85,000 acres.

Mr. GATHINGS. Yes, in the State of North Carolina you need 85,000 acres to bring the small acreage farmer up.

Mr. COOLEY. I hope the gentleman's amendment will be defeated, because I actually do not believe that the Administration will approve the bill if we double this acreage.

Mr. GATHINGS. It is the straw that will break the camel's back. You can go just so far to get this bill approved.

Mr. POAGE. Mr. Chairman, will the gentleman yield?

Mr. GATHINGS. I yield to the gentleman from Texas.

Mr. POAGE. It is a fact, is it not, that while your State committee used about 80 percent of its State reserves to take care of the small farmers, the State of Mississippi did not use 1 single acre to take care of the small farmers, and neither did the State committee in North Carolina, and that is the reason those 2 States stand out like sore thumbs, because their committees did not use 1 acre to meet this situation.

Mr. GATHINGS. That is correct.

Mr. JONES of Missouri. Mr. Chairman, will the gentleman yield?

Mr. GATHINGS. I yield to the gentleman from Missouri.

Mr. JONES of Missouri. I take it it is fair to say that your committee and the subcommittee and the entire committee would have approved an additional allotment even as much as the gentleman from Mississippi proposes if it had been our judgment that it would have been approved by the Department.

Mr. GATHINGS. I really think so. The gentleman from Mississippi [Mr. ABERNETHY], who is one of the outstanding cotton proponents in this House, introduced an amendment, as he stated earlier on the floor, and our subcommittee asked that this not be brought back solely to be sure that it would be signed, and we wanted to be sure of that.

Mr. JONES of Missouri. Did we not give due deliberation and go as far as we thought we could safely go to bring about relief and actually get results?

Mr. GATHINGS. We did in the subcommittee as well as in the full committee.

Mr. Chairman, I trust that the amendment will not be agreed to.

Mr. JONAS. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I take this time in order to ask the gentleman from Mississippi [Mr. WHITTEN], a question for the purpose of clarifying in my own mind his position with respect to the dual or two-price system. Is it the gentleman's position—and I have listened with interest to his discussion of this bill today—that we should have one price for domestic consumers of cotton and another price for foreign consumers?

Mr. WHITTEN. I will put it this way: The whole program of price supports provided the authority for the Commodity Credit Corporation with regard to any farm commodities which might be accumulated above domestic needs to sell such commodities in world trade competitively. This does not necessarily mean reducing sale prices. For your international brokers could buy offerings at the domestic price, and it would not be then reduced. I spent the month of October with cotton importers in Europe who seemed to know about this problem. I learned that without exception every country on the face of the earth which has commodities that they do not need at home is offering them for sale and offering them competitively. We are the only ones who do not, and the law now authorizes sale of commodities in world trade competitively. The Government will not act.

Mr. JONAS. I think that is true, but I wanted to be sure I followed the gentleman's argument. Cotton of course is only consumed by textile plants. You cannot eat cotton. It can only be spun into cloth or other textile products. If cotton brings on the domestic market say 35 cents a pound, it is purchased by the textile plants of this country at that price and spun into cotton goods. If you sell cotton on the world market to the competing textile plants in England, Japan, and France and other nations on the continent for say 30 cents a pound, that puts our domestic textile industry at a competitive disadvantage, does it not?

Mr. WHITTEN. In the first place, in answer to the gentleman, I do not advocate that we offer these commodities at a reduced price but that we start selling on a competitive-bid basis, controlling ourselves as to how much and how often; in other words, ride the market and see the effects from day to day.

Mr. JONAS. The world price is lower than the domestic price today, is it not?

Mr. WHITTEN. No, it is slightly above it, because we have held part of the world supply off the world market. The world supply is kind of tight because part of our supply is not for sale on a competitive basis.

The point I would like to make to the gentleman is this: If we make our support price the world price, as the Department of Agriculture has done, then the big cotton operators can go into Brazil and Mexico, where they have low-cost labor, and then the Japanese spinning industry, having a source of cotton in a low-cost area, can run our mills out of all the export market, and the situation would get worse. To do as the gentleman says, to dump it at a given reduced price, might have an effect on the domestic mills if you did not ride it from day to day and watch it. That I have not advocated, but if you did not do something, as long as we continue our present policies and let our acreages go to foreign countries where there is low-cost labor, then our foreign competitors have low-cost cotton from other areas and they can run our mills out of the export market.

Mr. JONAS. I asked the question because it does not seem fair to charge domestic consumers a higher price than foreign ones.

Mr. WHITTEN. When you get to your domestic situation, you have had 13 freight rate increases since World War II. We have a whole lot of fixed costs in the United States which apply, and which have been the cause of the necessity for the price-support program. But if we go into making our own domestic price the world price, we invite the spread to foreign countries. Then the foreign competitors, having a low-cost supply, will have a much worse effect that way than the other.

Mr. JONAS. We are doing it that way right along, not only in the commodities we produce on the farm but in the field of manufacturing. We are doing that in textiles particularly.

Mr. WHITTEN. In so many, many ways, but here again if we just save 1 million acres of cotton for the American farmer to farm, we have at least done that much good.

We must either move American farm production in world markets at competitive prices or else we dry up to producing for the American domestic market. That is it.

Mr. POAGE. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, none of us likes to oppose an amendment such as that which has been offered by the gentleman from Mississippi. Everybody in this House would like to vote for unlimited production of everything if we could but get a fair price for it when we had produced it. But I think we all recognize that you cannot get anything like a fair price for many of our farm products if we provide unlimited production in the United States.

Mr. WHITTEN. Mr. Chairman, will the gentleman yield?

Mr. POAGE. I yield to the gentleman from Mississippi.

Mr. WHITTEN. I would like the RECORD to show that if my amendment is adopted it would still leave a 2-million decrease in cotton acreage from last year. I do not want any impression to get around that I am advocating throwing away all limitations.

Mr. POAGE. The gentleman's amendment does not give us unlimited production but he frankly states it is a step in that direction. Obviously it is. It is a step toward unlimited production. It is a frank step toward the desire to increase production.

The bill that comes from the committee is not primarily for the purpose of increasing production but for the purpose of relieving the hardship on individuals who have been cut so much now that they simply cannot make a living, whether they are growing 2 acres, 20 acres, or 50 acres.

I sympathize with the viewpoint expressed by the gentleman from Mississip-

pi to the effect that it would be fine for the United States to dispose of the cotton that we have in stock competitively. I agree with the gentleman that we should. I think part of our present trouble results from the hesitancy on the part of the Department of Agriculture, and probably more on the part of the Department of State, to actually sell what we now have competitively. But are we not attacking the problem in the wrong way to say that because we are not disposing of what we have on hand on a competitive basis, we, therefore, want to increase our surplus and to pile up more that we are not going to be able to sell either competitively or otherwise Would it not be better to concentrate our attack on the unsound disposal policies of the two departments involved rather than to say because you have not done what we think you ought to do in this respect we are going to create a more difficult situation?

Mr. WHITTEN. Mr. Chairman, will the gentleman yield?

Mr. POAGE. I yield.

Mr. WHITTEN. I would like to say there is real soundness in what the gentleman says except for this. That we have reached the crossroads where it is shown that 55,000 farm families are put out of their homes, and 130,000 farm families are reduced to less than $900 a year gross income. And as the situation now stands where the acreage and production is going to be just transferred to foreign countries, it makes us do some things just because we ought to, because it is right.

Mr. POAGE. Of course, there is so much truth in the position of the gentleman from Mississippi that I cannot just take a blanket position against him either. But it does seem to me that it would be a sounder thing for us to do something which would give relief not simply to 54,000 families, as the gentleman from Mississippi mentioned, but 291,000 families in the United States that have allotments of less than 5 acres. There are 291,000 cotton farms with allotments of less than 5 acres and I have an idea that most of them are going to be put off their farms unless we do something to relieve them. The bill we have brought in is going to give them some relief.

I recognize there is a good deal of discussion of the fact that this bill does not give all of these farmers all the relief they want. Of course not. It is not going to make anybody rich, but it is going to save a lot of people from being put out on the street. It is going to do a lot of good. We have a reasonable chance of passing this bill, and I believe we have a reasonable chance of getting it signed. I think the gentleman from Mississippi made it rather clear that he did not believe his bill would be signed. In answer to the question as to whether it would be signed or not, when he said, "Well, I think it has as good a chance as something else has to be signed." He did not tell us and he could not tell us whether it would be signed because no man knows that. He would not tell us he thinks his bill is going to be signed, and I do not think there is a Member in this House who can stand up and say that he sincerely believes that the bill proposed by the gentleman from Mississippi will be signed.

Mr. WHITTEN. I will say I have been assured that it has just as much chance of being signed as any other one has.

Mr. POAGE. I heard the gentleman the first time, and I realize the evasion in that answer, and that is exactly what I am calling to the attention of the House. The gentleman does not believe either bill will be signed. I recognize the gentleman's opinion is different from mine with regard to that. I think there is a reasonable chance, and the committee thought there was a reasonable chance of getting the bill that we brought on this floor signed and enacted into law. I repeat, we are trying to get part of something. We are trying to get something here even though it is but a part of all we would like rather than to try to get all of nothing.

All of nothing might look good in the newspapers back home. It would sound good back in Texas to say, "POAGE led a great fight to get 5 million additional acres." My people would like to have it, if they could have the acres, and maintain their price at the same time. But I know perfectly well, and you know, that I would be doing nothing but fooling the people back home. It is just that simple. Do not let anybody fool you. It is just a question of do we want something? Are we willing to take what we have a right to hope to get or are we just trying to get something in the papers back home about what a great thing we did for the folks getting all of nothing?

Mr. JONES of Alabama. Mr. Chairman, will the gentleman yield?

Mr. POAGE. I yield.

Mr. JONES of Alabama. Since this bill is for the purpose of affording relief in the inequitable situation that exists where farmers are operating with less than 5 acres, why cannot we have a bill which will have universal application to all cotton producers in every section of the United States, guaranteeing them a minimum of 5 acres?

Mr. POAGE. Because if you did, you would either get too much acreage to get the bill passed, or we would so disrupt the balance between the States that the bill could not pass. One thing is that you would get more acreage in the bill than you could have approved—just as the bill offered by the gentleman from Mississippi proposes, or you would be in the position of giving to one section of the country a greater percentage increase than you give to another section of the country. Again, I cannot think the gentleman from Alabama believes we can pass a bill here that will give some 70,000 or 80,000 acres to Alabama, and give absolutely nothing to California, and expect that kind of a bill to be signed.

Mr. JONES of Alabama. I understood that this was a bill to give relief to people, not to States.

Mr. POAGE. The bill does give relief to people, but we want to pass a bill that will be signed, and we know we cannot give relief to these people if you disrupt the balance that has been established between the States.

In all kindness, the gentleman from Alabama is an intelligent man. He knows very well that he has absolutely no chance of getting a bill signed which gives all of the acreage to States east of the Mississippi and none to California, none to Arizona, and none to New Mexico—I do not have to call the names of the Members whom he knows who would never allow such a bill to pass in the other body. If the gentleman wants any cotton for Alabama he will have, I think, to retain the balance with the Western States, because after all those States have an absolute veto on this kind of legislation.

I want to commend on the floor of this House, as I did in committee, the gentleman from California [Mr. HAGEN], for trying to make a fair and sincere effort to give the people of the Southeast some relief when it did not mean anything to his State. He did not gain anything by it, but he did the fair and honorable thing, and I appreciate it as a statesmanlike action.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. JONES of Alabama. Mr. Chairman, I move to strike out the last word.

The purpose of this bill is stated in the report as follows:

> H. R. 3952 aims at bringing some measure of urgent relief to those farmers in America's great Cotton Belt now threatened by severe hardships.

Now let us look at the agricultural picture, as far as people are concerned. Ultimately we are dealing with people and not territorial rights of States or political subdivisions of States. We are talking about people and their entitlement to relief. One-half of all the people who reside on the farms of this country reside in 14 Southern States, from Oklahoma-Texas eastward through West Virginia. One-half of the total number of people residing on the farms of this country obtain their principal source of income from cotton. Now if we are going to pass a measure to relieve the burdens of those farm people whose principal source of income is cotton, and who are the lowest per capita income group of any other group in America, then the way to do it is to provide a minimum allotment of 5 acres for all farmers whose allotment is now less than 5 acres.

If we are going to make acreage allotments just because Texas needs a little more or California needs a little more, then the quality of mercy is certainly strained, for we are dealing, as I said earlier, with the people who live on the farms, who are to produce this cotton.

I am, of course, going to vote for half a loaf if I do not get the full measure of benefits that I think the people of Alabama, the people of Georgia, and so on down the line are entitled to; but why should we not recognize the individual's need rather than the need of the various States.

Mr. BELCHER. Mr. Chairman, will the gentleman yield?

Mr. JONES of Alabama. I yield to the gentleman from Oklahoma.

Mr. BELCHER. I was seeking to go along with the gentleman on the 5 acres, as the members of the committee will testify, because I thought it was a social proposition. When it was finally pointed

out to me that this program is administered by States, and that in certain States last year they had this surplus and this would not take care of our farmers, I began to think differently.

Mr. JONES of Alabama. And we are here to correct the abuses and mistakes that were made last year at the State level of administration. The 5-acre producer had nothing to do with the lack of judgment that was exercised by State committees. The cotton farmer cannot be held responsible for the errors made in the administration of the law.

Mr. WHITTEN. Mr. Chairman, will the gentleman yield?

Mr. JONES of Alabama. I yield.

Mr. WHITTEN. The bill that is pending, in the absence of my amendment would only halfway do the job; it would do nothing for the 55,000 farm families who are left without homes.

Now, let us keep the record straight: Neither group has asked for an opinion from the Department of Agriculture as to whether they will or will not endorse this bill as it is or as it stands. I have in my hand three pages from the Department of Agriculture pointing out the administrative difficulties in the bill as it is. If my amendment is adopted the administrative problems will be reduced, be cut in half. Anyone who doubts that just read the three pages from the Department showing now the hard way they have of administering the bill as printed.

Mr. JONES of Alabama. Under this bill we call it relief to the 5-acre farmers; actually in its application it is not 5-acre relief to the farmers; it is a 5-acre relief in Texas; a 5-acre relief in California; but it is a 2-, and 3-, and 4-acre relief bill as far as the cotton producer is concerned in the States east of the Mississippi River that presently produce cotton.

It seems to me that we could provide for each 5-acre farmer to have a 5-acre minimum. By doing this we increase the total acreage by less than 400,000—almost 120,000 less than is proposed in the pending measure.

I hope that when the Smith amendment is presented it will be passed. Let us make certain that the first consideration will be given to the people who produce the cotton. A 3-percent fixed formula will not provide the relief we hope to see given our people.

Mr. RHODES of Arizona. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. The time of the gentleman from Alabama has expired.

(On request of Mr. RHODES of Arizona, and by unanimous consent, Mr. JONES of Alabama was allowed to proceed for 1 additional minute.)

Mr. RHODES of Arizona. I would like to ask the gentleman if it is not true that the county committee in any county in the United States, under the law as it now exists, could declare that the minimum acreage per farmer is 5 acres?

Mr. JONES of Alabama. The gentleman means that under this bill it is made mandatory?

Mr. RHODES of Arizona. No; under present law is it not true that any county committee can now declare that the minimum acreage per farmer is 5 acres?

Mr. JONES of Alabama. No, that is not my recollection.

Mr. WHITTEN. Mr. Chairman, will the gentleman yield?

Mr. JONES of Alabama. I yield to the gentleman from Mississippi.

Mr. WHITTEN. There are hundreds of counties where the total amount of acreage for the county is not that much.

Mr. RAINS. Mr. Chairman, will the gentleman yield?

Mr. JONES of Alabama. I yield to the gentleman from Alabama.

Mr. RAINS. Is the gentleman aware of the fact that in Alabama 80 percent of the State reserve was given in an effort to give 5 acres to each farmer, whereas in States like Texas only 16 percent was given to small farmers of the State reserve? In other words, Alabama made an effort by nearly 2 to 1 to give 5 acres out of the State reserves.

Mr. JONES of Alabama. And this increase will still not give them 5 acres of a minimum allotment under the law.

Mr. RAINS. That is correct.

Mr. THOMPSON of Texas. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I want to point out one thing to my distinguished friend the gentleman from Mississippi [Mr. WHITTEN]. I have much sympathy for his effort to get more acres. When I first introduced a bill on this subject, I suggested that we base our increase on the estimated underplanting for this year. That would have run 8 percent. It would have been higher than the 6 percent which he has suggested. I say to him, and the others who would like to have more acreage, that we battled that out in committee. We talked with people from the Department. I talked to my people at home and I told them I thought we could get 3 percent but I did not think we could get any more.

I feel that way about it now, and for that reason I express the hope that you will vote down the amendment, much as I myself would like a few more acres.

We keep on talking about minimum acreage. Let me assure the members of the Committee that before we go much further there is going to be a bill introduced which will provide for some kind of minimum production. It may not be minimum acreage. I recognize, as many of you, that unless we can provide a minimum cotton production for each small farm, be it 5 acres, 10 acres, or whatever is necessary, we are going to run into this trouble again. However, it is very complicated and it will require a great deal of committee study that can hardly be done on the floor of this House. True, that is not before us in this amendment, but I have a feeling it is going to be pretty soon, because it has been referred to many times by those who have preceded me.

So I ask you, if you want to help, if you want to be reasonably sure of doing something for these people of ours who need it so badly, then vote down this amendment and pass the bill as it has been presented to you.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Mississippi [Mr. WHITTEN].

The amendment was rejected.

Mr. WICKERSHAM. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WICKERSHAM: Strike out everything after line 5 and substitute in lieu thereof:

"Notwithstanding any other provision of law, the national acreage allotment established under subsection (a) of this section for the 1955 and 1956 crops of cotton shall be increased to 19,500,000 acres and apportioned to the States in the same manner in which the national acreage allotment heretofore established for 1954 was apportioned to the States. The additional acreage so made available to States shall be apportioned to counties on the basis of their respective shares of the State acreage allotment as apportioned in 1954."

Mr. WICKERSHAM. Mr. Chairman, I desire to make my statement very brief. I made this amendment apply to the years 1955 and 1956. We should make it possible for the farmers to plan ahead. A part of our present difficulty stems from the fact that the administration requested the farmers to increase their cotton acreage during the Korean war. Another fact that the Secretary of Agriculture has not taken into consideration in arriving at the carryover figure is the fact that the President of the United States asked that a part of 1 year's supply of this cotton be set aside. The gentleman from Mississippi [Mr. WHITTEN] has ably pointed out this fact. I wish to call your attention to another fact; i. e., that we are not at ease in this world. There is an event over in the Formosa area which could lead to a difficult situation. We have an international situation in Russia whereby the civilian Soviet leaders have turned over the reins to the military leaders. We have many crises throughout the world, for instance, in Iraq and Iran and Saudi-Arabia, Russia has her eyes on the vast oil reserves. If we are not careful, we may find ourselves in the same position that the Russian leaders say they are in. They have not produced sufficient agricultural products and consumer goods in recent years. Besides having failed to produce sufficient agricultural products, Russia openly admits the lack of production of sufficient forestry products. I trust that we will not get in that condition. If we separate the set-aside from the carryover, then we do not have too great a carryover of cotton. Furthermore, according to the statement of the committee itself and the Department of Agriculture's report on plantings, 10 percent of this 1955 allotted acreage will not be planted because of various conditions. Consequently, we should increase the acreage by 10 percent and still be safe.

Mr. ELLIOTT. Mr. Chairman, will the gentleman yield?

Mr. WICKERSHAM. I yield to the gentleman from Alabama.

Mr. ELLIOTT. I would like to ask the gentleman from Oklahoma, would his amendment to this bill, if adopted, provide a minimum 5-acre cotton allotment to every cotton farmer in America?

Mr. WICKERSHAM. This would come very nearly assuring them, because under the present bill farms are not assured 5 acres additional, even in Alabama. They are not assured more than

under the committee bill; under my amendment 3, and they would receive about 6 acres minimum. In Florida they would receive only one-half acre under this committee bill; in Georgia 3 acres, and in Mississippi 4 under this bill, and in North Carolina individual 5-acre farms will probably receive only 1 acre additional. This committee bill does not state that each farm will have a minimum of 5 acres or the average amount in cultivation on the farm in 1952, 1953, and 1954. It reads "whichever is the lesser." And, if the additional allocation is not sufficient to go around, individual farm increases will be decreased. For instance, in North Carolina 85,943 acres are required for 5 acre or highest planted acres, yet North Carolina will receive only 15,471 acres additional under this bill, consequently it would provide only 1 acre additional allotment to each small farm. This would fall considerably below the 1954 allotment.

Mr. ELLIOTT. How much less than last year?

Mr. WICKERSHAM. My amendment would fix the 1955 and 1956 acreage allotment at 19.5 million acres annually. In 1954 we had 21,379,000 planted acres. My amendment still leaves the allotment practically 2 million acres below 1954. In 1953 we had 28 million acres, in 1952, 27 million, and in 1951 we had 29 million acres planted.

Mr. POAGE. Mr. Chairman, will the gentleman yield?

Mr. WICKERSHAM. I yield to the gentleman from Texas.

Mr. POAGE. The gentleman has expressed great concern for the 5-acre farmer. There is nothing in this bill to require the State to use this for the 5-acre farmer.

Mr. WICKERSHAM. No.

Mr. POAGE. And when you get to a State like North Carolina where it would not have enough acreage under your bill to bring it up to 5 acres, there is no requirement that you use 1 single acre for the 5-acre farmer.

Mr. WICKERSHAM. The State committee could use it for that purpose.

Mr. POAGE. The State committee had 10 percent of its allotment and did not use any in North Carolina; it did not use any in Mississippi. Is there anything in here to require the State of Mississippi to use any of this for the 5-acre farmer?

Mr. WICKERSHAM. Under this bill they would at least receive some more. They already have some acreage.

Mr. POAGE. No. Under the gentleman's bill the State of Mississippi would get some more acreage, but the State of Mississippi had some 50,000-odd acres that they could have given to the 5-acre farmers, and the State committee did not give 1 single acre, and you are giving it right back to the same State committee. What reason does the gentleman have for believing that the State committee would act differently?

Mr. WICKERSHAM. I am more interested in taking care of any sized farmer. I might say that this bill is a misnomer. The gentleman from Texas has misnamed this bill if he believes it takes care of the little babies, family-sized farmer, or economical operating farm units, because half of the acreage goes to the State of Texas. This measure is not going to satisfy the needs of the country.

I predict the Senate will adopt, in substance, the provisions of my amendment.

Mr. GATHINGS. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, the gentleman's amendment attempts to add 1,387,000 acres to the national allotment for the year 1955 and the year 1956. Just a moment ago we voted on an amendment offered by the gentleman from Mississippi [Mr. WHITTEN] which attempted to add 1,086,000 acres, yet now we come up with an amendment to add 1,300,000 acres. Under this amendment the 5-acre farmer gets no priority. I do hope this Committee will vote down the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oklahoma.

The amendment was rejected.

Mr. WICKERSHAM. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WICKERSHAM: On page 3, after line 9, insert the following:

"(o) Notwithstanding any other provision of law, in areas where abnormal weather conditions make such practices desirable, the Secretary shall authorize the planting of cotton on allotted acreage in combination with legumes or other crops, or with summer fallow, and the 1955 farm allotments for farms in such areas shall be adjusted upon the written request of the farm operator to allow for such additional gross acreage allotment as will, in combination with such other crop or summer fallow, permit the planting in such combination of the net cotton allotment for the farm."

Mr. POAGE. Mr. Chairman, I make the point of order against the amendment that it is not germane, that it amends the wheat-allotment law and other allotment laws, whereas this bill relates only to the cotton-allotment laws.

Mr. WICKERSHAM. Mr. Chairman, this is a new section. It does not apply to wheat at all. It does not mention the word "wheat." This is a brandnew section. All in the world it does is this:

In Oklahoma we have had a drought, as the gentleman has had in Texas. This would merely allow the planting of 2 rows of cotton and 2 rows of grain sorghums. In that way it would save the erosion of the land from the blowing. It would also permit the production of both cotton and grain sorghums. As the gentleman from Texas knows, the man who grows cotton is limited. The man who grows grain sorghums is limited to this extent: The present administration has seen fit to reduce the price support on grain sorghums by 25 percent.

Mr. COOLEY. Mr. Chairman, the gentleman's amendment is certainly applicable to other crops than cotton. It seeks to amend another section of the law. It does not apply only to the cotton section which is under consideration.

Mr. WICKERSHAM. It applies to other crops which are not under the quotas, like legumes and grain sorghums.

Mr. COOLEY. In other words, the gentleman brings grain sorghums and legumes into the cotton section.

Mr. WICKERSHAM. I might say that these other crops are not controlled. They are not under acreage controls as are wheat and cotton.

Mr. COOLEY. That does not get away from the fact that the gentleman is attempting to put other commodities under the cotton provision of the law.

The CHAIRMAN (Mr. HAYS of Arkansas). The Chair is prepared to rule.

The gentleman's amendment does bring other crops into consideration. The pending bill is related to cotton acreage control. The gentleman's amendment is therefore not germane, and the point of order made by the gentleman from Texas is sustained.

Mr. SMITH of Mississippi. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SMITH of Mississippi: On page 1, line 5, strike out all beginning with line 6 and substitute the following:

"(n) Notwithstanding any other provision of law, farm acreage allotments established under this section shall be increased where necessary so as to provide each farm with the maximum allotment authorized in subsection (f) (1) of this section. The additional acreage so allotted shall be in addition to the national, State, and county acreage allotment established for 1955 pursuant to this section and the production from such additional acreage shall be in addition to the national marketing quota established for 1955 pursuant to section 342 of this Act."

Mr. SMITH of Mississippi. Mr. Chairman, the committee has just voted down two amendments which would enlarge the additional cotton acreage included in the committee's bill now before the House. My amendment is in the nature of a substitute to the entire bill before us today, and it would strike out the present 543,000 additional acreage included in this bill and substitute the equivalent of 398,000 acres. I call to the attention of the Members of the House who are interested in keeping down surplus cotton production that the amendment I offer would probably result in less than half the cotton yield than the bill which is now before us because the acreage involved in my bill has the lowest production-yield average of any acreage in the country, and there would probably be an additional cotton production of no more than 100,000 bales under my amendment.

Under the committee bill, however, as was mentioned by the proponents of the bill, there would be a production of at least 250,000 bales. So it is important from the point of view of those who may be concerned about the total cotton surplus since my bill would offer less in the way of adding to the cotton surplus.

FOR SMALL FARMERS

Primarily my bill, however, is designed to do what the proponents of the committee bill say they have in mind, and which they grossly failed to do in reporting out this legislation. They say they want to take care of the 5-acre farmer, and to take care of the small farmer, and to relieve the situation

whereby these small producers who under the law have a specific provision written into it so far as some counties are concerned, that they must be given their acreage. This bill entirely fails to give them the acreage that the small farmer needs for this 5-acre minimum.

As I pointed out, something like 150,000 small farms would not get acreage under this bill. Of the 543,000 acres involved in the bill, more than 300,000 go to farmers other than small farmers that we have been talking about. That certainly means that it is not a matter of hardship or relief for these small farmers. I agree that the 300,000 acres would be used for relief of hardship cases, but they would not be cases as hard as those involved for the 5-acre farmer.

I think I can comment on this matter disinterestedly because under my amendment not one single acre would go into my congressional district. I am not asking for anything for my people. In my congressional district, where there was an alternative involved in the county, the 5-acre farmers were taken care of before any other farmers in the county were taken care of, and as one committee member stated, that meant every farmer in the county other than the 5-acre people was a hardship case. But I say those hardship cases are just as bad as the ones we are talking about for the Western States.

My amendment would simply provide that a minimum of 5 acres, or the highest planted average, would be added to the acreage allotment for each State in order to take care of these 5-acre farmers and nothing else would be provided. In other words, the total acreage increase would be just 398,000. That takes care of the 5-acre farmers for whom there can be made a strong humanitarian claim, and at the same time we would be saving, by 150,000 bales, the extra amount of cotton that would have to go into loan and into this national surplus that we are talking about.

Mr. JONAS. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Mississippi. I yield.

Mr. JONAS. Under the provisions of your amendment, is that mandatory?

Mr. SMITH of Mississippi. Under the provisions of my amendment, it is mandatory that the 5-acre farmers be taken care of.

Mr. JONAS. In other words, the State committees could not change that?

Mr. SMITH of Mississippi. The amendment provides that the acreage shall be allotted so as to provide each farmer with 5 acres on the basis of the highest average planted.

Mr. JONAS. I intend to vote for the gentleman's amendment.

Mr. COOLEY. That actually means that the State of North Carolina would have 85,000 acres instead of 15,000 acres because it will require 85,000 acres to take care of the small producers?

Mr. SMITH of Mississippi. That is correct.

Mr. COOLEY. I would like very much for that to happen. I would like very much for the gentleman's amendment to be adopted. I hope very much it will be adopted. I want to make it perfectly clear that I am not talking for my colleagues on the committee, but we do have a rather unique situation in North Carolina because we have so many small farms.

Mr. SMITH of Mississippi. I appreciate the gentleman's statement.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. SMITH of Mississippi. Mr. Speaker, I ask unanimous consent to proceed for 5 additional minutes.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi.

There was no objection.

Mr. SMITH of Mississippi. Mr. Chairman, I would like to point out before I yield further that the question has been raised as to whether or not any bill that we pass would be signed by the President.

I do not pretend to know whether the President will sign any bill or not, but I know it is good commonsense, in view of the strong fight that he and Secretary Benson and all the other agricultural leaders have made, that they will prefer a bill that will offer the least additional surplus. I think it is good commonsense, in view of the strongly professed humanitarian principles of the President that he would prefer to solve these hardship cases than to provide some formula that everybody is talking about. I do not think anybody can say whether this bill will be signed or not, but I think anyone who uses commonsense in regard to the matter will feel that this substitute which I have offered is certainly more likely to get the support and signature of the President.

Mr. ROBERTS. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Mississippi. I yield to the gentleman from Alabama.

Mr. ROBERTS. Mr. Chairman, I want to compliment the gentleman on the fine statement he is making and to say that it seems to me it is the only thing that will really take care of the small farmer, I mean the 5-acre man, and I am supporting the amendment.

I ask unanimous consent to revise and extend my remarks, Mr. Chairman.

The CHAIRMAN. Without objection, it is so ordered.

There was no objection.

Mr. DORN of South Carolina. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Mississippi. I yield.

Mr. DORN of South Carolina. I would like to associate myself with the sentiment expressed by the gentleman from Mississippi. I have received a letter only this morning where a man owes $1,200, and he is allotted eight-tenths of an acre. He cannot possibly pay the debts he owes under the circumstances.

I commend the gentleman and I support his amendment.

Mr. SELDEN. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Mississippi. I yield to the gentleman from Alabama.

Mr. SELDEN. Should the amendment offered by the gentleman from Mississippi [Mr. SMITH] be adopted, would Alabama's 1955 acreage allotment be increased by 52,284 acres rather than 33,054 acres?

Mr. SMITH of Mississippi. That is correct.

Mr. SELDEN. Mr. Chairman, I rise in support of the amendment of the gentleman from Mississippi [Mr. SMITH] and ask unanimous consent to revise and extend my remarks at the conclusion of his statement.

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama?

There was no objection.

Mr. ELLIOTT. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Mississippi. I yield to the gentleman from Alabama.

Mr. ELLIOTT. I am supporting the gentleman's amendment. I appreciate the gentleman's interest in the small cotton farmer.

I think the Congress owes to these small farmers, of whom I represent about 34,500, the duty and responsibility to write a law that will provide them with enough acreage that they can at least have some opportunity to keep body and soul together, and the gentleman's amendment is the only proposal before the House that attempts to do that. The minimum should be at least 5 acres. And if the President wants to veto it, that is his responsibility.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Mississippi. I yield.

Mr. GROSS. This means there will be no increase in the allotments to those above 5 acres?

Mr. SMITH of Mississippi. There will be no increase in the allotments to those above 5 acres, under my amendment.

I would like to point out to the gentlemen on my left, who represent districts where cotton is not a matter of concern, that this amendment I have proposed offers the least trouble to the Administration. It offers the possibility for the Administration and the President to live up to his professed desire to put humanitarian methods above economic matters; to be liberal in humanitarian matters and conservative in economic matters. I hope you will support me in this effort.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. SELDEN. Mr. Chairman, early in the session I introduced a measure, H. R. 2438, which, had it been enacted into law, would have increased the national acreage allotment for the 1955 crop of cotton from 18,113,208 to 19,500,000 acres. I introduced that legislation because I knew that many of the cotton farmers in my State and district would undoubtedly undergo hardships and suffering due to the sharp curtailment in the 1955 acreage.

As we all know, the cotton farmers of the United States have demonstrated time and time again their willingness to cooperate in a nationwide program which enables them to keep production in line with reasonable consumer demands. There are occasions, however, when sudden and severe constriction of acreage causes such hardships that a policy of gradual reduction over a longer period of time is much wiser. I believe 1955 is a year, certainly in the district I represent, in which our national acre-

age allotment should not be reduced as drastically as 3 million acres.

Our national acreage allotment in 1954 was almost 4 million acres less than the 1953 acreage. In addition, my section of the country as well as other areas suffered the most disastrous drought that can be remembered. Another cut in cotton acreage for 1955 amounting to more than 3 million acres could only mean bankruptcy for some of the cotton farmer in my State and district. I am certain it would be better at this time to spread out our acreage reduction over a longer period of time rather than throw thousands of cotton farmers out of work by another drastic acreage cut this year.

I therefore commend the members of the Committee on Agriculture for taking cognizance of the hardships which the cotton farmers of this country will face unless acreage adjustments are made. At the same time, I regret that the acreage increase contained in the measure now under consideration is not greater.

The acreage in my State of Alabama will be increased under H. R. 3952 by 3 percent of the 1955 allotment, or 33,054 acres. In order to give to the cotton farmers of Alabama a minimum allotment of the smaller of (a) 5 acres, or (b) the highest number of acres planted in cotton on the farm during the past 3 years, 52,284 acres is required.

Under the amendment offered earlier by Mr. WHITTEN, of Mississippi, the total acreage would have been increased by 6 percent of the 1955 allotment. This not only would have brought all farmers in my State up to 5 acres or their highest planted average in the past 3 years, whichever is smaller, but there would have been additional acreage available for the larger farmers who have suffered the severest acreage cuts. I favored this amendment and regret that it failed to pass.

The amendment now offered by Mr. SMITH of Mississippi would make available the acres necessary to give each farmer a minimum allotment of 5 acres or the highest number of acres planted in cotton on the farm during the past 3 years, whichever is smaller. In the case of Alabama this would be 52,284 acres. At the same time, the total number of additional acres to be made available would be reduced from 543,234 to 398,316. I shall support the amendment offered by the gentleman from Mississippi [Mr. SMITH], and I urge its passage.

Mr. POAGE. Mr. Chairman, I rise at this time to impress upon the House just what is involved in some of these proposals. That Members may better understand just what is involved, let us understand there are certain States that did not use all of the State reserve or any appreciable part of the reserve that they had available to take care of the 5-acre farmers, let us understand that the two outstanding examples are North Carolina and Mississippi. North Carolina did not use one single acre to take care of the small farmer.

Mr. COOLEY. Mr. Chairman, will the gentleman yield?

Mr. POAGE. I yield to my chairman from North Carolina.

Mr. COOLEY. I would just like to say this in behalf of those charged with administering the program in North Carolina: They are not to be blamed. The situation was just this: Had they taken care of the little farmer there would have been nothing left for those who grow above 5 acres.

Mr. POAGE. That is right. I am sure I understand why; I do not condemn your committee. I know they faced a difficult problem, but the fact remains that North Carolina did not use any of the 10 percent reserve it had available; they did not use 1 single acre for the small farmers.

The State of Mississippi had a reserve of about 175,000 acres, enough, I believe to have given every small farmer in the State 10 acres, but the State of Mississippi did not use 1 single acre to take care of the small farmers, but it used 170,000 acres "for trend" whatever that means.

Mr. SMITH of Mississippi. Mr. Chairman, will the gentleman yield for a correction?

Mr. POAGE. I yield.

Mr. SMITH of Mississippi. I think it is exactly the opposite, for I know that in my own congressional district the county committee took care of the 5-acre men.

Mr. POAGE. I have not said one word about county committees nor one word in criticism of the county committees, but I repeat and repeat again my statement that the State committee of Mississippi had available adequate reserves to take care of every small farmer in the State of Mississippi and they did not use 1 single acre for that purpose.

Now we find a strange diversity of opinion amongst the representatives from Mississippi. They come before us and they tell us on the one hand: "Give us twice as much acreage as anyone else proposes to take care of everybody, large and small alike; use a million acres." And the other side Mississippi comes in and says: "Do not give anyone anything except enough for a few small farmers." But that is going to bring Mississippi 70,000 acres, without adding anything to the allotment in California—at least that would be the effect if the proposal were to become a law, which we all know it never will.

Mr. BELCHER. Mr. Chairman, will the gentleman yield?

Mr. POAGE. I yield.

Mr. BELCHER. Their attitude was that the county committees should take care of the big farmers and they would come back and let the Congress take care of the small ones.

Mr. POAGE. I do not know whether that is correct or not but I do know the practical results of what some county committees did down in the area represented by the distinguished gentleman who is chairman of the subcommittee on appropriations—it was to take care of the small farmers except in one county, and there were 122 acres there that they needed, whereas in many other sections of the State of Mississippi the county committees did not do one single solitary thing to help small farmers.

Mr. WHITTEN. Mr. Chairman, will the gentleman yield?

Mr. POAGE. I yield.

Mr. WHITTEN. The gentleman says I wanted everything for everybody but that I did not want the bill to be large enough to cover the small farmer because they admitted that the bill as it now stands will answer the needs of only about half of the small farmers.

Mr. POAGE. Yes, and he has made that perfectly clear. He has made it perfectly clear what the case is in Mississippi, but right across the river in the State of Arkansas—and of course similar conditions exist there—we find that this bill is adequate to take care of all the small farmers in Arkansas and that they have them just like they have them in Mississippi. The difference is that the State committee in Arkansas used 80 percent of the State reserve to take care of those small farmers.

Had the State committee of Mississippi used but half of its State reserves it could have taken care of all of the small farmers of Mississippi.

Mr. SMITH of Mississippi. Mr. Chairman, will the gentleman yield?

Mr. POAGE. I yield.

Mr. SMITH of Mississippi. The gentleman poses as a great expert on the State of Mississippi. I want to ask him what the State of Texas did for the small farmer?

Mr. POAGE. The State committee did a very, very poor job, but it did use 120,000 acres of the State reserve for small farmers. It then, very unwisely, I think, used 62½ per cent of our State reserves "for trends." That is what the State committee of Texas did.

Mr. SMITH of Mississippi. Does not my amendment provide that it shall be mandatory that the small farmer shall be taken care of and that we solve this problem of whether the State will take care of the small farmer?

Mr. POAGE. Oh, yes, after your State committee used 170,000 acres to take care of the big farmers they rise and champion the small farmer, and the gentleman comes in and says that our State committee has thus far taken care of the big farmer, now let us come in here and have the cotton growers of the rest of the United States pay the bill to take care of the small farmers of Mississippi.

Of the cotton-raising States there are only two which made no effort to take care of the small farmers and those two are Mississippi and North Carolina.

Mr. POAGE. Mr. Chairman, I ask unanimous consent to proceed for an additional 5 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. POAGE. Mr. Chairman, I think it is worthwhile to know what the States did and maybe then we will have a better background as to why we have these complaints from the particular areas that we have. Never let yourselves be fooled, Mr. Chairman, these States that now come in and say: "You make it up for these small farmers" are asking you and everybody else to pay the bill for the negligence or failure of their own State committees to do the things that the law authorized the State committees to do in the first place. They do not come in with clean hands. They come

simply asking that we do the thing that they did not do.

Mr. ELLIOTT. Mr. Chairman, will the gentleman yield?

Mr. POAGE. I yield to the gentleman from Alabama.

Mr. ELLIOTT. Is it not true that the only forum the small farmer has is right here today?

Mr. POAGE. No.

Mr. ELLIOTT. It is the only one?

Mr. POAGE. No, that is not true, because their State committees made these allotments. These State committees had a 10 percent reserve which the State of Arkansas used for the small farmer. But in some other States it was not so used, and I do not absolve my own State committee. You heard me criticize it as loudly as anybody. I think our State committee was in great error. But we did do something. We did make some effort. Texas did use some of its reserve for small farms. In fact it took care of about four-fifths of theses cases.

Let us see about those States that do not have this problem. It has been stated here we were trying to bring in a bill simply to take care of small farmers. That is not true and nobody said that. Nobody said that is the only thing involved in this bill. This bill will give relief to small farmers. If it did not give relief to small farmers we would not be here with it.

Mr. JONES of Alabama. Mr. Chairman, will the gentleman yield?

Mr. POAGE. I yield to the gentleman from Alabama.

Mr. JONES of Alabama. The report states that the condition has come about through no fault of the cotton farmer.

Mr. POAGE. That is exactly right, nobody denies that, and I repeat, it comes about through no fault of the cotton farmer. But the small farmer is not the only man who has suffered. The man who has 6 acres has suffered, the man who has 11 acres has suffered. This bill will give some relief to a lot of other people who have been suffering. The fellow who has a cut of more than 40 percent, the man who has been cut from 50 acres down to 25, for example. I do not condemn the bill because it helps a lot of people.

Mr. SMITH of Mississippi. Mr. Chairman, will the gentleman yield?

Mr. POAGE. I yield to the gentleman from Mississippi.

Mr. SMITH of Mississippi. The gentleman is correct that in Texas that sort of relief will be given, but it will not be given to the other States. Is it not true that under this bill 49 percent of the additional acreage goes to Texas?

Mr. POAGE. Forty-two percent, which is exactly the percentage that Texas has of the total national cotton acreage on the 5-year history. The State of Texas has historically grown substantially more than any other 2 or 3 States and still does. The State of Texas is as big as some five States like Mississippi and, of course, it is entitled to more acreage than those other States. The State of Texas has taken exactly the percentage cut that every other State has, and should, of course, receive exactly the same percentage increase. That is what this bill does from the very beginning. It recognizes that we have to treat everybody alike.

We are saying, "Let us treat everybody exactly alike." When we declare a dividend as it were, let us treat California that has no 5-acre farms, like the other parts of the Nation, let us treat Arizona like we treat Alabama, let us treat Texas just like we are going to treat the Carolinas, let us treat them all alike. That is what this bill does. Then, if perchance your own State committee has done a bad job let the State where the committee has done a bad job pay the bill. We are in the position of a parent with several children. Two of the children have wasted their money. Maybe they suffered sickness. Anyway their money is gone. The parent wants them to have some more money and give not only the unfortunate ones something, but also gives the other children exactly the same. Do the improvident children have any right to complain?

The whole question comes down to this: Who is going to pay the bill for the negligence of certain State committees? Some State committees have not done a fair job. Those States and those States only are being heard here today to complain about this bill which gives a fair deal to everybody. I would just like to suggest that we be fair to everybody, that we give every State the same increase in allotment, and then that we try to pass a bill that we hope can get enacted into law. You are not going to help the small farmer in Mississippi, Alabama, or anywhere else to pass a bill that we know is not going to go through the other body.

The CHAIRMAN. The time of the gentleman from Texas has again expired.

Mr. THOMPSON of Texas. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I think the gentleman from Texas, [Mr. POAGE], has just summed the whole thing up in about 1 sentence. We on the committee tried to be equitable to all cotton-producing States, and we think we were. We did not single out, as the gentleman from Mississippi would do in his amendment, 3 States to get over half of the proposed new allotment to the detriment of other States. We treated them all alike, and that is exactly what this Congress has generally done in any legislation. They have not legislated for just a few.

Now, it is quite significant even my beloved chairman now foresakes and goes along with the amendment. Sure, and so are the others who have spoken in behalf of the amendment. They are from States that directly profit by it, but they do so at the expense of some of the other States.

Mr. JONES of Alabama. Mr. Chairman, will the gentleman yield?

Mr. THOMPSON of Texas. I yield to the gentleman from Alabama.

Mr. JONES of Alabama. The State of Alabama had 80 percent of its reserves to go into the 5-acre farms. Now, even this 3-percent increase will not provide the minimum 5 acres that we hope to give them in this bill. What is the objection of the gentleman from Texas to having the Alabama farmer receive the minimum allotment which the State of Texas already has?

Mr. THOMPSON of Texas. I have no objection whatever. But what is the gentleman's objection to taking care of the hardship cases beyond the 5-acre group in my State? I think it is unfortunate that we have hung any 5-acre grouping on our acreage, because there are a whole lot of hardship cases in my State, and I think in most of the other cotton-producing States, that are on farms where production is up as high as 10 or 15 acres. I submit to this committee that the bill which was proposed by the Committee on Agriculture will come closer to do it than any which has been proposed as an amendment.

Mr. GAVIN. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. GAVIN. Mr. Chairman, I just wanted to ask whether anybody from the northern States, in view of the fact that my State of Pennsylvania helps pay the bill on these various agricultural programs, will be permitted to participate in the debate on increasing cotton acreage? If so, I rise in opposition to the amendment.

The CHAIRMAN. The Chair will recognize all Members in the order they address the Chair. The Chair tries to move from one side of the aisle to the other.

Mr. GAVIN. Well, we have had 4 or 5 speakers from the other side. I wonder if we could have one from my side of the aisle to offer some suggestions which may clarify this situation?

The CHAIRMAN. I will say for the information of the gentleman that the Members on this side addressing the Chair were members of the Committee on Agriculture, and he intended to recognize the gentleman the first moment that no member of the committee addressed the Chair. I am very happy to recognize the gentleman from Pennsylvania to strike out the last word.

Mr. GAVIN. I move to strike out the last word, Mr. Chairman, and I want to thank the Chairman, my very good and able friend from Arkansas, whom we all greatly admire, for the consideration given.

Really, Mr. Chairman, I was rather hesitant about participating in this debate on cotton acreage as it is a little out of my line, however, in view of the fact that in the final analysis we all have to help pay the bill, particularly my State, the great State of Pennsyvania, with its 10 million people. We have been making these contributions in taxes along with the other States for many years in order to carry out these various agricultural programs.

I have some informtion relative to increased cotton acreage which I thought was interesting; a news article, which states that Secretary Benson pointed out that 92 percent of the cotton producers voted to accept the production controls on the basis of last October's estimate, and the crop would be 12,511,000 bales. A revised estimate made last December 4 indicated the harvest will rise to 13,569,000 bales. The Secretary did not see how controls could be eased in view

of this jump of 1,058,000 bales in expected yield. I have every confidence in Secretary Benson. He is a great agricultural secretary and is turning in a fine performance.

He states that 92 percent of the cotton producers accepted willingly these allocations.

What I am concerned about is that you are coming in here today to increase these allocations of acreage after the matter was settled satisfactorily with the cotton producers. Really, it almost brings tears to my eyes to hear the sympathetic appeals here today for the small cotton farmer. Certainly we all want to help the small cotton farmer; he has our deepest sympathy. I certainly would do anything and everything I could to help the small cotton farmer. But the allocations are made. The State committees accepted them, so I understand from this interesting debate. So the matter then went down to the county committees. Therefore, the county committees should have handled their allocations in a fair and equitable manner and given the small cotton farmer the consideration he was entitled to. Did he get it? Certainly not, from what I heard here today.

With all the bleeding hearts here today, I cannot understand why you did not bleed and move in on your State committees and your county committees to give the small farmer his rightful opportunity to participate fairly and equitably in the allocations that were made to your respective States so that he would be taken care of above all others. You now come back to the Congress and want us to iron out that which you could not handle in your own States and that is increase the cotton acreage to take care of the small cotton farmer; all of which will produce a greater surplus of cotton.

It appears to me that this is pretty much of a war now in the southern States, your own States, producing cotton. I say to you champions of States rights, due to the fact that you have States rights and the allocations have been definitely and specifically made to your respective States, why bring this argument into the Congress? Go argue with your own State and county committees as to why they did not make the proper allocations of acreage and respect the position of the small cotton farmers in this program. You all realize the difficulties they have, and recognize the problems of the small farmer, yet you did not give him the consideration he was entitled to at the time and so evidently you heard from him. Now you are back here asking the Congress of the United States to increase the acreage in the interest of the small farmer, all of which will produce more cotton and make it necessary for the American taxpayer to carry the load. You should have thought about the small farmer at the time the allocations were made. I wonder how many stood up for the small farmer with the State and county committees when the allocations were made.

Mr. JONES of Missouri. Mr. Chairman, will the gentleman yield?

Mr. GAVIN. I yield.

Mr. JONES of Missouri. Does the gentleman know how much the taxpayers pay into this program on this cotton?

Mr. GAVIN. I cannot give the gentleman any figures. I am not an agricultural statistician.

Mr. JONES of Missouri. It has not cost them any money since the cotton program has never resulted in a loss.

Mr. GAVIN. Let us leave that argument out of it, and turn it back to your respective States and your respective county committees. Why did not your respective county committees respect the position of the small farmer with five acres or less, and take care of him first and then after he had been taken care of allocate to the big farm producer what was left, if you wanted to be so sympathetic and understanding of the problems of the small farmer? The big cotton farmers are the ones responsible for the big cotton surpluses. If any cutting was to be done why did not your county committee cut the big farmer rather than the small farmer?

I do not think that this cotton acreage problem belongs here. I think it belongs back in your respective States and your respective county committees, and not in the Congress of the United States.

Mr. JONES of Missouri. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I want to bring just 2 or 3 things to the attention of the House and to the gentleman from Pennsylvania. I would like to call your attention to the condition that exists. Some of the States committees and some of the county committees did make mistakes. Affected are 291,000 farmers who produce cotton, and more than one-fourth of all the people who produce cotton do have allotments of 5 acres or less. By this small increase of only 3 percent of the acreage, not 3 percent of the production, we can give some help to every one of those 291,000 people without adding anything to the cost of this program. I think that would be a fair statement. Then we will take care of those people and relieve a tremendous hardship.

May I say just one other thing before I close, in reply to the argument of the gentleman from Mississippi who offered the amendment. It appears that he rather resents the fact that last year we did give a bonus, so to speak; when we added acres we gave a bonus to California. I did not like it at the time, but we realized then it appeared to be necessary to give some relief at that time.

I think he would like to put himself in the position of an umpire or referee who, if he made one mistake, now wants to go on and rectify that by making another wrong decision.

I think it is fair to say that a bill which is passed on the premise of the amendment offered by the gentleman from Mississippi, and while it would give half of the added acres to, let us say, three States in the South, and would give nothing to some of the States in the West and Southwest, could not be expected to have the support of some Members when it comes to a vote on the passage of such a bill. Certainly, if it is passed here, I do not think it would pass in the other body. I do not think the President would approve the bill because I think he is going to look after his friends out west. I do not blame him. There will be a little politics on this thing. I think we must be realistic about that. So what we are trying to do, and what I would like to impress upon those who may have missed the first part of the debate on this bill, is that we are only asking for 3 percent to be added to each State to add to the acreage—not to the production.

Mr. GAVIN. Mr. Chairman, will the gentleman yield?

Mr. JONES of Missouri. I yield.

Mr. GAVIN. What I am interested in is this. When the county committees knew about these small farmers and the hardships which would take effect in the event they were not recognized, why did not the county committees first take care of the small farmers so that they would not be in a difficult position, and then later on you could argue about this other problem. Why did they not give consideration to the small farmers first?

Mr. JONES of Missouri. If the gentleman heard the chairman of our committee a minute ago, he explained the situation adequately.

Mr. GAVIN. I am very glad to listen to the chairman.

Mr. JONES of Missouri. He explained that if they had taken care of every one of those 5-acre small farmers in the State of North Carolina, that would have been the only cotton produced in the State of North Carolina which would have brought about a bad situation, and which still would not have been equitable. Also, many of these counties did not have sufficient acreage to bring the small producer up to 5 acres. Some of the committees did a poor job and we are here today just as we have come to the Congress before on many other occasions trying to rectify a mistake that has been made. We have held our requests down to a very minimum, but I think if we go ahead now and defeat the amendment which is now pending, and adopt the bill which the committee reported to the House which, while it is not the exact bill that anyone here, individually, would have recommended, it does represent the collective thinking of all the members of the committee. I think it is a reasonable bill, and I hope the gentleman from Pennsylvania can go along with us and help us to relieve these people.

Mr. GAVIN. Why did 92 percent of the cotton producers agree to this acreage if they felt it was not sufficient?

Mr. JONES of Missouri. I do not know whether the gentleman understands or not, but they were not voting for that. They were voting as to whether they would have 90-percent supports or whether they were going to have 50 percent. To put the proposition simply, I am in favor of taking a half a loaf and trying to get that rather than have somebody offer me a whole loaf, and not find the loaf there. Here is another point. While 92 percent voted for it, perhaps the 8 percent who voted against it represents more than the 3 percent which we are trying to help now.

Mr. GAVIN. I think you people have a little problem to work out in the county committees to see that the small farmers do get some consideration.

Mr. JONES of Missouri. I think the gentleman is absolutely right, and I pledge myself to try to iron that out and improve it so we will not have to come back here.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HAGEN. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I rise to speak in opposition to this amendment which would upset the exact equality of treatment among the States which exists in the committee bill. If I can, I would like to add a note of humor to these proceedings. In references to the bonuses which the gentleman from Missouri referred to, we from California approach these bonuses with a state of mixed emotions, something like a man who is watching his mother-in-law drive over a cliff in his new Cadillac, because every time something is given out, something is written into the permanent law which takes something away. But I would like to invite your attention to the fact that in 1954, the law relating to the 5-acre farm was changed. Before 1954 the law required first provision for the 5-acre farmer, but apparently someone decided that 5 acres was not a real test of equity and a real test of hardship so in 1954 we amended the law to take out the mandatory protection for the 5-acre farmer and shoved the subject over to the State and local committees to decide in their discretion who was a hardship case. I am not criticising that action, but I say that it indicates that 5 acres is not a fair test of hardship, and we recognize that under the law, as I said before, there is hardship all over the Cotton Belt. Some of these State and county committees have done a very poor job. They have totally ignored not only the interest of their 5-acre-and-less farmers, but all small farmers.

Mr. JOHNSON of California. Mr. Chairman, will the gentleman yield?

Mr. HAGEN. I yield.

Mr. JOHNSON of California. I would like to have the gentleman state to me whether or not the Gathings bill is the one that you think will give most equity to everybody.

Mr. HAGEN. The gentleman means the Gathings bill without amendment.

Mr. JOHNSON of California. Yes. Without the Smith amendment.

I liked Mr. POAGE'S argument. He brought out that this bill would give something to everybody.

Mr. HAGEN. That is exactly correct.

Mr. JOHNSON of California. And would offer more equity than any other proposition before the House today.

Mr. HAGEN. That is correct. This bill recognizes that there are hardships in all States, and it will give exactly the same amount of acreage in terms of their 5-year average to every State.

Mr. JOHNSON of California. I thank the gentleman very much.

Mr. HAGEN. Now, what the gentleman from Mississippi [Mr. SMITH] is asking us to do is to give a bonus to those States and county committees which did a poor job with respect to their own 5-acre farmers. In other words, he is asking you to compound a felony. I say that should not be done at the expense of those States and those counties which did a good job with respect to their 5-acre-and-less farmers.

The CHAIRMAN. The time of the gentleman from California [Mr. HAGEN] has expired.

Mr. COOLEY. Mr. Chairman, I ask unanimous consent that all debate on the pending amendment and all amendments thereto close in 10 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

The CHAIRMAN. The Chair recognizes the gentleman from Louisiana [Mr. LONG].

Mr. LONG. Mr. Chairman, I have waited all afternoon to get a minute and a half. I am from a cotton-growing State, too. I have used up a great deal of time trying to study this matter. Last year we called meeting after meeting all over Louisiana trying to work out some program that would be fair to all. Some people have said that some States did not do a good job. I think the Congress failed to do a good job when it did not provide for these little fellows who have only 5 acres of cotton; these fellows who must make a living and support a family on 5 acres. Some of them have been cut down to as little as one-quarter of an acre. Members come here and say that Mr. Benson and the President would not approve so and so. When we listen to that kind of talk we are not doing a good job. Are we, the Congress, not supposed to pass the laws? Do we not represent all the people, the large the small, the wealthy, the poor? The laws we pass are applicable to all, not just a few. Therefore, in passing laws which affect everyone let us consider everyone and be fair to all. Daily I receive letters from small farmers, stating their plight. Only today, I had such a letter from a small farmer who owns 20 acres of new farm land. In past years he has rented cotton land, until such time as he could clear enough to begin planting on his own farm. Now, the rented land is not available and with no cotton history on his new farmland, he is left with only four-tenths an an acre allowance. I represent that man as much as I do the large planter and I feel he should be protected. A minimum of 5 acres should be established for the protection of this type situation. Members of Congress are close to their constituency. We know and understand conditions. Let us stand on our own feet and protect those we represent rather than bow to the dictates of bureaucrats.

I wonder if some of these fellows who said we are not worth $25,000 a year were not right. We ought to come here and do the job ourselves and not depend on Mr. Benson to do it. That is what we are paid to do.

The CHAIRMAN. The Chair recognizes the gentleman from North Carolina [Mr. FOUNTAIN].

Mr. FOUNTAIN. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Mississippi [Mr. SMITH]. I think that is a humanitarian piece of legislation, designed to assist the very little cotton farmers of America.

The CHAIRMAN. The Chair recognizes the gentleman from California [Mr. SISK].

Mr. SISK. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Mississippi [Mr. SMITH].

As a representative from one of the largest cotton-growing districts in this country, the San Joaquin Valley of California, I feel that the people I represent are entitled to participate fairly and equitably in any increase in cotton acreage allocated by this House. They have their economic problems and hardship cases and they need a just and equitable share of the acreage allotted to the farmers throughout the country. So certainly I shall oppose this amendment offered by the gentleman from Mississippi, my friend, Mr. SMITH. I appreciate fully his feelings; but, after all, I feel that these States that have neglected the proper placing of the acreage already allotted and the placing of it in the hands of the smaller farmers have only the State committees to blame; whereas our California State Committee and many others take care of the small farmer, there are many other growers in the West that present hardship cases; and I might say to my distinguished friend, the gentleman from Mississippi, that I have some of his former constituents out in my area in the San Joaquin Valley of California, and they want representation here too. For that reason I want an equitable share of any acreage allowed under this bill.

The CHAIRMAN. The gentleman from Mississippi [Mr. ABERNETHY] is recognized.

Mr. ABERNETHY. Mr. Chairman, I favor this amendment.

In order to completely solve the problem of the 5-acre cotton farmer in Mississippi we need 68,497 acres. The bill before us gives Mississippi only 52,526 acres. This leaves us about 16,000 acres short of a quantity sufficient to solve the 5-acre problem.

It is true, as some have argued, that the State committee in Mississippi failed to reserve any acreage whatever for small farms or hardships. It may be true that the State committee is subject to some criticism for not doing so, more particularly since all other States did use their reserve for this purpose. On the other hand, these little farmers for whom I plead are not responsible for this situation. They had nothing to do with it. The acreage is now given out. The allotments cannot be withdrawn. The only means whereby this problem can be completely solved is by adoption of this amendment.

The Smith amendment appeals to me for a further reason. There is a reasonably large supply of cotton on hand. The committee bill would provide for an increase of 543,000 acres whereas the Smith amendment would provide for an increase of only 398,000 acres. The Smith amendment would, therefore, result in a great reduction of the surplus. Ordinarily the yield is low in the areas where allotments under the Smith

amendment would be increased. So, when considering the surplus this is another attractive feature of his amendment.

Furthermore, this amendment has a great humanitarian appeal. It provides for increases in allotments to farmers who now have only the barest subsistence. They need this increased acreage very badly in order to support themselves and their families.

I realize that in adopting the amendment some States, and particularly the Western States, would get no acreage under the bill. On the other hand they are not confronted with the problems now confronting small farmers in my section of the South. Last year Western States, through their Representatives, made a particular appeal to the Congress for bonus acreage. Their cause, so they said, was based on economics. They contended that they were being cut so low that the cuts would result in terrific losses and even bankruptcy to some of their farmers. As the bill finally passed the Congress they got their bonus, although I opposed it. In any event, this set a precedent for increasing acreage in certain areas of the belt based on economic reasons. Now the economic problem is actually confined to the South and Southeast where farmers find themselves cut to 1, 2, and 3 acres of cotton. Secretary Benson has fixed the national allotment at the smallest acreage in all history. It presents a case of dire consequences for thousands of small farmers throughout the South. The Smith amendment would go a long way toward healing this problem.

I shall support it and urge you to do likewise.

The CHAIRMAN. The gentleman from California [Mr. PHILLIPS] is recognized.

Mr. PHILLIPS. Mr. Chairman, cotton allotment legislation is a very delicately balanced piece of legislative equipment, and if we are to do anything to upset this delicate balance it should be done in the committee on agriculture by serious consideration and not by an amendment from the floor.

The problem now before us has been explained by the gentleman from Texas [Mr. POAGE], the gentleman from California [Mr. HAGEN], and others. I concur in what they say. I shall vote against the amendment offered by the gentleman from Mississippi and for the bill as presented by the committee.

The CHAIRMAN. The gentleman from North Carolina [Mr. COOLEY] is recognized.

Mr. COOLEY. I do not care to use my time, Mr. Chairman.

Mr. WHITTEN. Mr. Chairman, will the gentleman yield to me?

Mr. COOLEY. I yield to the gentleman from Mississippi.

Mr. WHITTEN. I thank the gentleman for yielding to me. I would just like to point out this as far as the State of Mississippi is concerned and its difficulties with the cotton-allotment program. In 2 years, cotton acreage has been reduced by 7 million acres by our Government. Any State committee in the South tries to meet its problems. If it grants all the small landowner acreages it does not have the acreage it needs to meet the other problems. There are areas in my own district where they took care of the 5-acre farmers at the expense of the 5- to 30-acre farmers and that meant that on those not so large farms, renter families could not grow any acreage at all.

So I do want to say in defense of the southern area that the total amount given to the State has been inadequate for them to take care of all their problems. If they try to take care of the 5-acre landowner they must do so at the expense of the 5- to 30-acre landowner; and, as I said earlier, that means that on those farms, renters are unable to grow cotton; and, certainly, the renters are entitled to consideration just as are the other small growers.

I do not mean to subscribe to the way they are trying to handle the problem because I do not have sufficient detail to do that. If they handled one side of the problem they threw the other out of balance. The trouble is they did not have enough cotton to meet these two problems, and, as I pointed out earlier, the acreage we cut here today by failing to adopt my amendment goes overseas to compete with ours in the world market.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Mississippi [Mr. SMITH].

The question was taken; and on a division (demanded by Mr. SMITH of Mississippi) there were—ayes 42, noes 102.

So the amendment was rejected.

Mr. MAHON. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I have sat attentively in the House of Representatives all afternoon listening to the debate on this bill. Early in the afternoon I prepared an amendment which I had intended to offer and which is now at the Clerk's desk. It is now crystal clear that the House will not amend the pending bill in any way, Members having voted down all amendments which have been offered. To be perfectly frank about it, I, myself, have voted against all the amendments which have been offered up to this point.

In the light of these circumstances, I shall not offer the amendment which I have sent to the Clerk's desk unless I am assured in advance that it will be accepted. To offer it and have it defeated would be hurtful to the idea which I had wanted the House to accept. I have submitted a copy of the amendment to the chairman of the Committee on Agriculture, the gentleman from North Carolina [Mr. COOLEY], and to the ranking minority member of the House Committee on Agriculture, the gentleman from Kansas [Mr. HOPE]. If they, themselves, are willing to accept the amendment, then, of course, I shall offer it. I would like to get an expression from these key members of the House Committee on Agriculture in regard to the problem which I have in mind.

In 1954 the Secretary of Agriculture placed into operation a regulation with respect to cotton allotments on new farms and on farms where cotton has not heretofore been grown which I think is unwise. The regulation provides that a farmer cannot get a cotton allotment on a farm not heretofore producing cotton if such farmer has within the county a farm which does have a cotton allotment. I would amend the pending bill as follows:

> No farmer shall be denied a cotton acreage allotment on a farm not heretofore producing cotton on the sole basis that such farmer has a cotton allotment on another farm within the county.

My point is this: The Secretary of Agriculture has deprived the State committees and the county committees of discretion in making allotments to cotton farmers on certain farms which have heretofore not produced cotton. It is true that under the present regulation, if a cotton farmer in one county seeks a cotton allotment in another county for a farm on which cotton has not heretofore been grown, a new grower allotment can be secured. It seems to me that the State and county committees should be left free to decide individual cases on their merits regardless of county lines. To have in effect the present arbitrary rule is not good. I think we all realize that in some cases the county committees would not want to give new grower allotments on land which had not previously been planted in cotton. In other cases, I think the county committees would feel that new grower allotments were thoroughly justified.

My amendment would make the program more elastic and would give the State and county committees more authority to work out the individual cotton allotment problems within the counties.

I realize that, relatively speaking, only a small amount of acreage is involved in the pending bill and that my proposed amendment would have a very minor effect in 1955. My point is, I do think the regulation of which I complain should be abandoned.

I would like to ask the chairman of the Committee on Agriculture and the ranking minority member, the gentleman from Kansas [Mr. HOPE] if they would be disposed to go along with the amendment I have submitted to them? Of course, if they are not I am not going to offer it, but I did want to present this important matter.

Mr. COOLEY. Mr. Chairman, if the gentleman will yield, I would like to say with such a small amount of acreage involved in the legislation now under consideration, it seems to me expedient to permit the gentleman's amendment to be considered at another date, and I can assure the gentleman it will be discussed with the Committee on Agriculture. But, I do not think it is appropriate to consider it now. I would object to it if the amendment were offered. I hope the gentleman will not offer it at this time.

Mr. MAHON. I think the gentleman from Kansas knows from his long experience that there has been a change in the handling of the problem which I present. If he cannot support my proposal I would like to have his assurance that he, too, would give this problem every consideration in connection with the overall picture. My amendment would have but a minor effect on this bill, but in the overall picture and

in future years the amendment would be important.

Mr. HOPE. I will be very glad to give the gentleman that assurance as far as I am concerned. I think it is a matter which should properly be considered by the committee as a part of the overall cotton program rather than as a part of this temporary bill which we have before us today. I would certainly feel that the matter should be considered by the full committee at the proper time.

Mr. MAHON. I thank the gentleman, and I shall not now offer the amendment.

Mr. FLOOD. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I have learned more here in the last 10 minutes than I learned in the last 10 years. This debate has generated enough heat to be in some way connected with the coal industry of Pennsylvania. I have just discovered, in conferring with some of my colleagues from Pennsylvania, that anthracite coal is actually a derivative of vegetable matter, and all of our coal legislation, with which we get no place around here, should have been referred by the Parliamentarian or by the Speaker to the Committee on Agriculture. I find out that coal, coming from the ground—coal being a carbonization of ancient vegetation—my bills are in the wrong committee. There is no doubt at all from the abilities and the generated heat and the intensity of this argument and the brilliance of its presentation on both sides that had my anthracite coal stockpiling bill been referred to the Committee on Agriculture, had my bill to remove the indecent and damaging 4 percent transportation tax on anthracite coal been referred to the Committee on Agriculture, had the bill which my colleague, the gentleman from Pennsylvania [Mr. WALTER], my colleague the gentleman from Pennsylvania [Mr. FENTON], who is now sitting back here, and the gentleman from Pennsylvania [Mr. CARRIGG] sponsored, my bill would have received proper consideration. We now have before the House a bill to dewater the mines. I am afraid we are before the wrong committee.

Mr. McDONOUGH. Mr. Chairman, will the gentleman yield?

Mr. FLOOD. I yield to the gentleman from California.

Mr. McDONOUGH. Do I understand that the gentleman is suggesting that John L. Lewis should be Secretary of Agriculture?

Mr. FLOOD. I can say this, if you want my opinion, as to whether or not you should remove the present Secretary of Agriculture and put in Mr. John L. Lewis, my answer is absolutely. There is no question about that. If you want something done, yes, yes.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. FLOOD. I yield to the gentleman from Iowa.

Mr. GROSS. We might not have had an average drop of $9.11 a hundred in the price of hogs in the past year if somebody else had been Secretary of Agriculture.

Mr. FLOOD. The gentleman is an authority both on the Secretary of Agriculture, and he knows much more about hogs than I do. There is no question about that.

Mr. TEAGUE. Mr. Chairman, I do not believe I need to call the attention of the Members of this body to the fact that the problem of cotton acreage allotments before us today is a pressing one to the area which I have the honor to represent. My congressional district is and has been for a number of years a cotton-producing area. At one time it produced more cotton than the entire State of Texas and had the leading cotton-producing county in the United States. However, this is not the case today.

When the Department of Agriculture released the allotment figures for the individual States, and the State committees made the apportionment among the counties, it became apparent that many hardships would result. It was not long afterward that I began to receive indications from the district that my fears were well founded. Based on the letters I had received, I addressed a communication to the Secretary of Agriculture, as follows:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D. C., October 19, 1954.

Hon. EZRA TAFT BENSON,
Secretary of Agriculture,
Washington, D. C.

MY DEAR MR. SECRETARY: You are quite familiar with the prolonged drought conditions which have persisted during the past several years throughout the Midwest and greater Southwest. While the Federal Government has taken the necessary steps to alleviate the situation through extension of credit and emergency feed programs, none of the programs currently authorized by law are able to alleviate an ever-increasing threat—the economic status of the individual farmer who has suffered from these droughts.

While I do not want to detract from the assistance programs administered by the Department of Agriculture, the ultimate end of such programs under continuing drought conditions only tend to place those farmers with limited operations further and further in debt. Unless these farmers are favored with several good crop years in succession they will be bankrupt and helplessly over their heads in debt to the Government or local banks. This situation will not lend to a healthy economic status for our country.

Because cotton is the main agricultural enterprise in my congressional district and for that matter it comprises a large portion of such enterprise in the South and Southwest, it is respectfully requested that in accordance with the authority granted you to make adjustments in cotton acreage account abnormal weather conditions, that you make additional cotton acreage available to the farmers in this drought area for the 1955 crop year.

I would appreciate your favorable consideration of this request and an early reply from you on this matter.

Sincerely,

OLIN E. TEAGUE,
Congressman.

Under date of November 5, 1954, the Department of Agriculture advised that an adjustment had already been made by them in the planted cotton acreage in cotton for the year 1953 account adverse weather conditions as per the following:

DEPARTMENT OF AGRICULTURE,
Washington, D. C., November 5, 1954.

Hon. OLIN E. TEAGUE,
House of Representatives.

DEAR CONGRESSMAN TEAGUE: This is in reply to your letter of October 19, 1954, regarding adjustments in cotton allotments for 1955 on account of abnormal weather conditions.

The economic effect on farmers in the drought areas is recognized and their difficulties sympathetically understood. It is the desire of this Department to alleviate insofar as possible under applicable provisions of law, the conditions caused by drought and other adverse weather conditions in the areas affected.

Section 344 (b) of the Agricultural Adjustment Act of 1938, as amended, authorizes adjustment in State cotton acreages where it is found that the acreage of cotton during any year of the base period was affected by abnormal weather conditions. In order for any State to qualify for such an adjustment, the adverse weather conditions must have been of such intensity and duration as to make it impossible to seed land to cotton and must have continued until the end of the planting season for the area.

On this basis the State agricultural stabilization and conservation committees were requested some time ago to study weather conditions for the State during the base years 1948, 1950, 1951, 1952 and 1953, and to recommend adjustments in the planted cotton acreage for any year in the base period when, in its opinion, such adjustment was justified. In the case of Texas the State committee after an exhaustive study of the effect of abnormal weather conditions in 1953 recommended an adjustment of 1,548,030 acres. This recommendation by the Texas State ASC Committee has been approved by the Department.

In apportioning the State acreage allotment among counties, adjustments for abnormal weather conditions are made in the acreages planted to cotton in counties on the basis of recommendations by the State committee. Any such adjustment in the acreage planted to cotton in the county is the amount established by reference to available information and data as the net reduction of planted acreage in the county attributable solely to abnormal weather conditions. The State committee also is authorized to adjust computed county acreage allotments out of the State acreage reserve, which in the case of Texas is 10 percent of the State acreage allotment, for either or both (1) trends in the acreage planted to cotton in recent years, excluding 1949 and (2) abnormal conditions adversely affecting plantings of cotton in the county.

The State reserve may also be used for one or more of the following: (1) to make adjustments in the allotments for small farms, (2) to establish allotments for new cotton farms, and (3) to correct inequities in farm allotments and to prevent hardship.

Your interest in this matter is appreciated and if we can be of further assistance, please advise.

Sincerely yours,

ROSS RIZLEY,
Assistant Secretary.

Now Mr. Chairman, I should like to include at this point the exchange of correspondence between myself and the State administrative officer of the ASC for Texas. You will note that Mr. Price states despite the adjustment made for the State of Texas, no adjustments were recommended by the committee for the

Sixth Congressional District which I represent:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D. C., November 8, 1954.

Mr. R. T. PRICE,
State Administrative Officer, Agricultural Stabilization and Conservation Committee, College Station, Tex.

DEAR Mr. PRICE: I am enclosing herewith a copy of a letter I addressed to the Secretary of Agriculture asking that he take steps under the authority granted him to make adjustments in the cotton acreage in the State of Texas account the abnormal weather conditions experienced by our farmers during the past several years.

Also enclosed is a copy of the reply I received today signed by Mr. Ross Rizley, Assistant Secretary, in which you will note that he states the Agriculture Department has approved recommendations of the Texas State ASC Committee for an adjustment of 1,548,030 acres account abnormal weather conditions in 1953.

I would appreciate very much your advising me how this adjustment will affect the eight counties comprising my Congressional District, namely Brazos, Ellis, Freestone, Hill, Limestone, Leon, Navarro, and Robertson.

I would appreciate hearing from you as soon as possible and I know that the cotton farmers in the 6th District are appreciative of the action of the State committee in recommending this adjustment.

Sincerely,

OLIN E. TEAGUE,
Congressman.

AGRICULTURAL
STABILIZATION AND CONSERVATION,
College Station, Tex., November 15, 1954.

Hon. OLIN E. TEAGUE,
House of Representatives,
Washington, D. C.

Dear CONGRESSMAN TEAGUE: This will reply to your letter of November 8 in which you requested information pertaining to 1955 county cotton allotments and particularly the adjustments made in 1953 county cotton acreages prior to the establishment of 1955 allotments.

As was stated in the letter of November 5 from Mr. Rizley, Assistant Secretary, the State Committee recommended the adjustment of 1953 county cotton acreages for some 50 counties for abnormal weather conditions prior to the time that the 1955 cotton base acreages for the State and for our counties were computed. The total of these recommendations amounted to 1,548,030 acres, but no recommendation was made to adjust the 1953 acreage for any of the eight counties in your Congressional District. An examination of rainfall records of United States Weather Bureau stations in the District at planting time for the 1953 crop did not support a recommendation to adjust the actual planted acreage upward. On the other hand, in a county like Dawson, where some 375,000 acres of cotton were planted for the 1951 and 1952 crops, only 73,000 acres were planted and measured for the 1953 crop.

We are pleased that the Secretary has accepted the recommendations made by the State Committee to adjust 1953 county and State acreages since the use of such adjusted acreages has resulted in the State sharing in the 1955 national cotton allotment in the manner that it would have shared had the abnormal weather conditions not prevailed. It follows then that all other counties in the State have benefited indirectly since none of them will have to bear the load of adjustments in 1955 cotton allotments computed for the counties in which a normal acreage of cotton was not planted for the 1953 crop. Congressman BOB POAGE has pointed out this latter fact several times in discussions on the authority given the Secretary for making adjustments.

It is our understanding that sections 344 (b) and 344 (e) of the Agricultural Adjustment Act of 1938, as amended, do not authorize or permit the Secretary of Agriculture to make adjustments in county cotton allotments to compensate for any series of years of poor crops brought about by abnormal weather conditions such as drought during the growing season. We understand the provisions of law to mean that the Secretary is authorized to make adjustments in county planted acreages to compensate for acreages that were not planted because of abnormal weather conditions at and during the planting season.

I appreciate having your letter and your interest in the cotton allotments computed for counties in the central Texas area. We will be glad to furnish any additional information that will be helpful to you.

Very truly yours,

R. T. PRICE,
State Administrative Officer.

I wish to point out here, Mr. Chairman, that I hold no malice toward Mr. Price nor the many faithful employees of the Department of Agriculture who work under him for the State ASC Committee in Texas. But I do question the actions of the appointed State committee throughout the entire apportionment of the 1955 cotton acreages.

When the new Texas State ASC Committee was appointed in 1953 under the present administration, not a single member was named from the east central part of the State which has been the historic cotton-producing area. This is the blackland country of Texas and cotton has been their main cash crop for a good many years. In fact, Mr. Chairman, cotton is the major crop of Texas; yet we were given no representation on this State committee.

Recent interpretations of the basic law by the Department of Agriculture and the State committee with respect to the trend feature has proven most detrimental to my area and, if the practice is continued, the historical cotton-producing area of Texas will be adjusted by legislation out of business.

I hold in my hand at the moment an amendment to the bill now under consideration which would provide that the additional acreage made available to counties for the 1955 crop of cotton by reason of adjustments for trends in acreage shall not be taken into account in establishing future county acreage allotments. Earlier this year I introduced a bill which, in addition to providing that each farm would receive for 1955 the same amount of acreage they planted in 1954, would have deleted this trend feature from the basic law. I am not going to introduce this amendment, however, as I have been assured by the committee that they intend to give consideration in this Congress to the deletion or modification of this feature of the basic law.

Subsection (e) of section 344 of the Agricultural Act of 1938, as amended, states, in part, that the State committee may reserve not to exceed 10 percent of its allotment which shall be used to make adjustments in county allotments for trends in acreage. I call to your attention the fact that the word "may" is in the law and not the word "will." In any event our Secretary of Agriculture issued a directive to the States to the effect that they would reserve 10 percent unless they could prove to him that they did not need it. Accordingly, the State committee reserve the entire 10 percent which came to a total of 761,278 acres. Heretofore our State committee reserved slightly over 1 percent when such action was left to the discretion of the State committee and not controlled by a directive from Washington.

From this reserve of 761,278 acres, the State committee of Texas used approximately 63 percent or 475,805 acres for trend adjustments despite the fact that the basic law also states that this reserve can be used to make adjustments for small farms, establish allotments for new farms, and to correct inequities in farm allotments and to prevent hardships. I should like to include a set of figures for the eight counties comprising the Sixth Congressional District of Texas which will indicate how this trend feature has worked to the detriment of this historical cotton producing area.

County	5-year base history used for determination of 1955 cotton allotment	1955 allotment	10 percent withheld by State ASC committee by directive	Returned under trend feature
Brazos	29,668	19,765	2,119	689
Ellis	208,982	139,539	14,930	5,170
Freestone	29,810	19,724	2,130	557
Hill	185,730	122,534	13,268	3,115
Leon	16,772	11,548	1,198	764
Limestone	111,882	72,469	7,903	532
Navarro	170,437	112,182	12,176	2,596
Robertson	41,058	27,007	2,933	608
Total	794,339	524,768	56,747	14,031

From the above figures, Mr. Chairman, it is apparent that over 40,000 acres were adjusted out of the Sixth Congressional District which is in the heart of the blackland country of Texas and is historically a cotton producing area.

While the bill we have under consideration here today, which I will support, will provide some measure of relief to a great number of cotton farmers throughout our country, the trend feature in the basic law and the interpretation placed upon it for the 1955 acreage allotments is the item with which I am most concerned.

In closing Mr. Chairman, I wish to commend the Committee on Agriculture and in particular the gentleman from Arkansas [Mr. GATHINGS] whose subcommittee has brought to the floor a most commendable piece of legislation in answer to a complex problem.

Mr. ROBERTS. Mr. Chairman, I rise in support of the Smith substitute amendment and hope that it will be adopted. It is the only chance for the small farmer to receive adequate relief, and I feel that it is highly necessary that this large segment of our farm economy be protected against further hardship. The Smith amendment is in line with the principles of House Resolution 130 which I introduced, along with other southern Members, early in the session. My bill,

House Resolution 130, would have guaranteed each farmer a minimum of 5 acres.

I have heard a lot of criticism here today about the action of State committees in attempting to consider the plight of the small farmer, and I take this opportunity to say that I am proud of the record made by the gentlemen of the committee in Alabama. The figures show that Alabama had the best record of all the cotton-producing States in this respect and used 80.1 percent of its State reserve to take care of the small farms. It used 9.2 percent to take care of inequities and hardships and 9.8 percent for new farms. The attached table supplied by the Committee on Agriculture shows the fact that our committee went as far as it could go to prevent hardships under the law.

The Smith substitute amendment is the only bill which would make it mandatory that the Alabama small farmer has needed relief. As I pointed out earlier, on February 16, 1955, on the floor of the House of Representatives, the cuts in acreage have created a serious social problem to most of the farmers in Alabama and is doubtless resulting in distress and destitution for many farm families. Many of the farms in the Cotton Belt of Alabama do not possess the degree of fertility found in the western areas and, therefore, a cut below 5 acres simply leaves the small cotton farmer without any cash crop, and he cannot possibly earn a living, nor can he provide his family with the necessities of life.

The amendment by the gentleman from Mississippi will improve or correct this situation.

Percent of State reserve used for

	Percent in State reserve	Trends	Abnormal conditions	Small farms	Inequities and hardships	New farms	Remaining Feb. 4, 1955
Alabama	10	0		80.1	9.2	9.8	0.9

[1] Acres.

Mr. BROOKS of Louisiana. Mr. Chairman, H. R. 3952 by Mr. GATHINGS, of Arkansas, is a good bill and should be passed. This bill provides for an increase in the allotment of cotton acreage throughout the United States for the current planting year of 3 percent. Three percent is not a great increase in the amount of acreage available for the planting of cotton. It will not, in my judgment, affect the overall production of cotton for the current year. At the same time, this small increase in cotton acreage allotment will help in thousands of instances to relieve serious hardships which have developed in the State of Louisiana, and especially in my part of the State of Louisiana. The bill provides that each farm shall receive a minimum allotment equal to the smaller of 5 acres or the highest number of acres planted in cotton on the farm in question for the years 1952, 1953, and 1954.

I have received many letters from cotton farmers in Louisiana who are literally cut to pieces by such drastic reductions of small acreages. The small farmer has been especially hard hit and it is my hope that with the passage of this bill, he may receive enough benefit with increased acreage to provide for himself and his family.

While this bill will provide only 19,453 acres of the 20,101.6 needed in Louisiana to bring the total allotment up to a minimum of 5 acres per farm, this increase will aid many of the farmers in Louisiana who were hit by the drought. This additional acreage, together with the 648,442 acres already allotted to Louisiana for 1955, will afford very substantial relief with only a small increase in the overall cotton production.

Since some reduction must be made, I am interested in a fair and equitable reduction. In some instances, in my judgment, the reduction has been too drastic and if this measure will guarantee a minimum of 60 percent of the acres planted in cotton on farms in the year 1954, it will be of considerable help.

The Committee on Agriculture has carefully considered the severe economic strain our farmers experienced due to these adverse conditions and offer this bill as a remedy. I hope it will pass without a dissenting vote.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the Chair, Mr. HAYS of Arkansas, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H. R. 3952) to amend the cotton marketing quota provisions of the Agricultural Adjustment Act of 1938, as amended, pursuant to House Resolution 150, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

The question is on the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The bill was passed.

A motion to reconsider was laid on the table.

SPECIAL ORDER GRANTED

Mr. ELLSWORTH asked and was given permission to address the House for 10 minutes today, following any special orders heretofore entered.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. McBride, its enrolling clerk, announced that the Senate had passed, with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H. R. 3828. A bill to adjust the salaries of judges of United States courts, United States attorneys, Members of Congress, and for other purposes.

The message also announced that the Senate insists upon its amendments to the foregoing bill, requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. KEFAUVER, Mr. KILGORE, Mr. EASTLAND, Mr. WATKINS, and Mr. DIRKSEN to be the conferees on the part of the Senate.

JUDICIAL AND CONGRESSIONAL SALARIES

Mr. WALTER. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 3828) to adjust the salaries of judges of United States courts, United States attorneys, Members of Congress, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request from the gentleman from Pennsylvania? [After a pause.] The Chair hears none, and appoints the following conferees: Messrs. CELLER, WALTER, and REED of Illinois.

REVENUE ACT OF 1955

Mr. SMITH of Virginia, from the Committee on Rules, reported the following privileged resolution (H. Res. 153, Rept. No. 71), which was referred to the House Calendar and ordered to be printed:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 4259) to provide a 1-year extension of the existing corporate normal-tax rate and of certain existing excise-tax rates, and to provide a $20 credit against the individual income tax for each personal exemption. After general debate, which shall be confined to the bill and shall continue not to exceed 4 hours, to be equally divided and controlled

by the chairman and ranking minority member of the Committee on Ways and Means, the bill shall be considered as having been read for amendment. No amendment shall be in order to said bill except amendments offered by direction of the Committee on Ways and Means or one amendment to strike out all after line 17, page 4, of the bill, but said amendments shall not be subject to amendment except pro forma amendments which shall be in order. At the conclusion of such consideration, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion, except one motion to recommit.

AUTHORIZING CONSTRUCTION OF AERONAUTICAL RESEARCH FACILITIES

Mr. THORNBERRY. Mr. Speaker, by direction of the Committee on Rules, I call up the resolution (H. Res. 148) providing for the consideration of H. R. 2581, a bill to promote the national defense by authorizing the construction of aeronautical research facilities and the acquisition of land by the National Advisory Committee for Aeronautics necessary to the effective prosecution of aeronautical research, and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 2581) to promote the national defense by authorizing the construction of aeronautical research facilities and the acquisition of land by the National Advisory Committee for Aeronautics necessary to the effective prosecution of aeronautical research. After general debate, which shall be confined to the bill, and shall continue not to exceed 1 hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Armed Services, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the consideration of the bill for amendment, the committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

Mr. THORNBERRY. Mr. Speaker, this rule provides for consideration of the bill (H. R. 2581) which authorizes the construction of aeronautical research facilities and the acquisition of land by the National Advisory Committee for Aeronautics, which is necessary for the effective prosecution of basic aeronautical research. If enacted, it will involve the expenditure of $8,450,000 of Federal funds. I understand it was unanimously approved by the House Committee on Armed Services.

Mr. Speaker, I now yield 30 minutes to the gentleman from Oregon [Mr. ELLSWORTH].

Mr. ELLSWORTH. Mr. Speaker, this resolution was adopted unanimously by the Committee on Rules and is for the purpose of bringing to the floor the bill reported by the Committee on Armed Services.

Mr. Speaker, we have no further requests for time on this side, and I yield back the balance of my time.

Mr. THORNBERRY. Mr. Speaker, we have no requests for time on this side.

Mr. Speaker, I move the previous question.

The previous question was ordered.

The resolution was agreed to.

Mr. DURHAM. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 2581) to promote the national defense by authorizing the construction of aeronautical research facilities and the acquisition of land by the National Advisory Committee for Aeronautics necessary to the effective prosecution of aeronautical research.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H. R. 2581, with Mr. IKARD in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

Mr. DURHAM. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, you and many Members of Congress are pretty well familiar with the results achieved by the National Advisory Committee for Aeronautics—we see these results around us every day. And during the Korean conflict, their achievements found dramatic representation in the record of our fighter planes as against the Russian MIG's.

I wonder, however, how many of us are familiar with just how the NACA works—and because I did wonder about this—I suggested that the committee report on this bill summarize in brief form just what the NACA is and how it goes about its work.

Now, if you will look at the report, you find on pages 2, 3, and 4 a great deal of information to which I commend your attention.

You will see, for example, that the NACA avoids wasteful and costly duplication of research and development effort by having a large number of technical subcommittees which range over the whole field of military and civilian aviation. In addition to their own research and development, which, of course, is very extensive, the NACA coordinates and assists everybody else in this field right down to the plane manufacturers themselves.

In addition to this, the NACA sponsors and finances programs of research at 27 nonprofit scientific and educational institutions. In this way, scientists and other research people whose skills and talents otherwise might not be available, contribute importantly to the Government's program of aeronautical research. Also, promising students receive scientific training through NACA programs which makes them useful additions to the country's supply of technical manpower.

You will note on page 3 of the report a list of the institutions which participated in the NACA's program during 1954.

I recommend that all of you Members devote a little time to reading this report, because it describes in some detail the workings of an organization on which our whole airpower development is ultimately based.

The committee had a most rewarding hearing on H. R. 2581 with Dr. Dryden, the Director of NACA, as the principal witness. I want to assure every Member of this House that the position we find ourselves in today with respect to the capabilities of our aircraft is directly attributable to the NACA.

I was particularly impressed, and always have been, with the attitude of the people at NACA. They have but one thing in mind: how to build better airplanes than any other country in the world.

This bill will give NACA authority to construct items totaling $8½ million. The committee examined into each of the items and was fully satisfied that every one of them was needed; that every one of them tied directly into the achievement and maintenance of superiority in airpower; and that not one of them was unnecessary by reason of similar facilities existing elsewhere.

The NACA was established in 1915, under Public Law 271, of the 63d Congress. However, it was not until 1950 that the NACA was placed under the jurisdiction of the Armed Services Committee. Since that time the NACA has come to the Congress each year for authority to construct facilities and install items at its various installations throughout the United States.

This year the bill as submitted to the Congress involved authority in the amount of $13,300,000. The committee, after reviewing the request, cut it from $13,300,000 to $8,450,000. This cut was made not on the basis that the facility eliminated was unnecessary, but rather because the item is one which is being considered generally by the Joint Committee on Atomic Energy. I have introduced another bill, H. R. 3761, which would authorize the construction of a facility for research in nuclear propulsion. This bill will be considered by the Armed Services Committee and language will be inserted in it which will place the NACA reactor within the general framework of the reactor program which is under the jurisdiction of the Joint Committee on Atomic Energy. I hope that that bill will be on the floor in the not too distant future, since it is a research tool which is urgently required by the NACA.

I think that a rundown of the specific items which were included in this program would be helpful to a fuller understanding of the bill.

They are set out in rather general terms in the bill itself, but I would like to break them down in somewhat greater detail.

First, at the Langley Laboratory, at Hampton, Va., there would be the following items:

Air-removal system for the 16-foot transonic tunnel	$3,275,000
Improvement of roads	120,000

At the Ames Laboratory, Moffett Field, Calif., there would be the following items:

High-speed free-flight facility	$635,000
Range for aerodynamic heating and dynamic stability testing	230,000
Data-reduction equipment for the 1- by 3-foot supersonic tunnel	190,000

At the Lewis Laboratory, Cleveland, Ohio, there would be the following items:

Conversion of the 8- by 6-foot propulsion tunnel to transonic operation	$2,595,000
Addition to the high-energy fuels laboratory	310,000
Modification of the air distribution system	490,000
Construction of additional fuel storage tanks	145,000
Alterations to the propulsion systems laboratory shop building	195,000
Repair of No. 9 altitude exhauster	175,000

At the Pilotless Aircraft Station, Wallops Island, Va., there would be the following item:

Fuel-storage magazine	$90,000

The total of the items I have enumerated above is $8,450,000. Virtually all of the foregoing items are extensions or modifications of existing facilities. Actually, I feel that I am belaboring the obvious when I stress the importance of the research programs carried on by the NACA. Any of you who has visited their laboratories knows the magnificent job that they are performing in keeping us one—and we hope several—steps ahead of our potential enemy.

We saw in the press last year photographs of very advanced long-range bombers which the Soviet Union has constructed. Doubtless they have gone on to improve these bombers and perhaps developed new ones since that time.

Run down the list of our bombers, fighter interceptors, fighter-bombers, and you will see that every one of them had many major contributions to its development provided by the National Advisory Committee for Aeronautics.

It is not too much to say that our air defense today is a projection of the work done by the NACA. The fighter plane of today was a NACA experimental design a few years ago; the fighter-interceptor of tomorrow is being experimented on today by the NACA.

Research is their mission; adequate air defense is their accomplishment. I urge all members, on both sides of the aisle, to give this bill their full-hearted support in order that this fine organization may take another step forward and further provide for progress toward the maintenance of a free world.

It is headed by Dr. Dryden, an able scientist, with a personnel of about 7,000 people today. It is carried on primarily in these laboratories and in 29 institutions of this country on a cooperative basis. We get much information that is valuable to this organization and also to our efforts and also to the airplane producers from these private organizations which have cooperated in a very fine manner.

Mr. Chairman, I do not think it is necessary for me to make a further statement. I think the bill is absolutely necessary to keep us ahead, as we have been and will continue to be if we have such fine organizations as this scientific body working for the development of supersonic airplane speeds.

Mr. VAN ZANDT. Mr. Chairman, will the gentleman yield?

Mr. DURHAM. I yield to the gentleman from Pennsylvania.

Mr. VAN ZANDT. I wish to commend the gentleman from North Carolina for the able leadership he has given the committee in this field; and may I ask a question? What has happened to the program of increasing the number of wind tunnels now being operated for research purposes by various educational institutions in the country?

Mr. DURHAM. That program has not advanced as fast as we had hoped it would. It was promoted in the unitary plan, as the gentleman, who is a member of the Armed Services Committee, and I believe was chairman of the subcommittee at the time we authorized the unitary plan, knows. I am not entirely familiar with all the facilities existing today in the institutions of the country. I can secure the information for the gentleman and give him a breakdown of it if he wishes.

Mr. CUNNINGHAM. Mr. Chairman, I yield myself 5 minutes.

The CHAIRMAN. The gentleman from Iowa is recognized.

Mr. CUNNINGHAM. Mr. Chairman, I am a member of the subcommittee which considered H. R. 2581. The bill was reported unanimously from the subcommittee and unanimously from the full committee.

I want to join the chairman of the subcommittee, the gentleman from North Carolina [Mr. DURHAM], and other Members who will speak on this bill in urging the wholehearted and nonpartisan support that a bill of this kind should receive. When it comes to providing the basic research facilities for our military aircraft program there is no difference of opinion between the two sides of the aisle, and I know that all Members of this House agree on that statement. We all have exactly the same thought in mind and the same intention behind that thought, and that is to provide a stronger, better air force than any other in the world. The excellence of our air force today is in very large part the direct result of the unselfish service which has been performed by the National Advisory Committee for Areonautics.

I have no doubt that many of the scientists and other personnel of the NACA could benefit themselves greatly from a financial standpoint by leaving the NACA and going with aircraft manufacturers and private research groups. I am told that this is an extremely rare occurence, and this is a clear indication that service to the country is a prime motivation of the fine group of people who work for the NACA.

I am not one who is prone to forget cost, and, indeed, I am not forgetting costs in this particular instance, but I cannot bring myself to believe that the investment of some $8½ million contained in this bill will not pay dividends of one-hundred fold; dividends not only in a better and more efficient Air Force, but dividends in the saving of the lives of our young men who fly these airplanes.

Passage of this bill is an investment in our future—an investment which I am pleased to make—an investment which I feel every Member of this House is pleased to make. With all sincerity I urge the prompt passage of H. R. 2581, in order that the National Advisory Committee for Aeronautics can continue to protect our future.

Mr. DURHAM. Mr. Chairman, I yield 2 minutes to the gentleman from California [Mr. MILLER].

Mr. MILLER of California. I think that any of you who have availed yourselves of the opportunity to visit one of the laboratories of the National Advisory Committee for Aeronautics well realizes the great progress that that committee has made in the field of aviation. It has put this country out in front in aviation.

This is merely another and a very small contribution in the matter of dollars to the fine work it has done.

If there is one branch of Government that has fulfilled its obligation without the hurrah or fanfare of publicity it has been the National Advisory Committee for Aeronautics. The men who constitute that committee from top to bottom are dedicated men. They are scientists who work long hours with one thought in mind, that is to fulfill their obligations toward science and toward their country. When one sees the work that has been done you realize what their great accomplishments have been. They no longer measure the speed of an airplane in terms of miles per hour, but have introduced new units of speed strange to the layman. The NACA has pioneered in a new field and licked what at one time seemed insurmountable obstacles in aerodynamics. Transonic and supersonic speeds have become commonplace.

This great institution played a part in the research that made the Nike and other guided missiles possible.

I want to congratulate the chairman of the subcommittee of the Armed Services Committee, the gentleman from North California [Mr. DURHAM], and the members of that subcommittee who have worked on this bill and I join with them in urging its immediate enactment.

Mr. CUNNINGHAM. Mr. Chairman, I yield 5 minutes to the gentleman from California [Mr. WILSON].

Mr. WILSON of California. Mr. Chairman, I would like to give you a very brief example of the vital role played by the National Advisory Committee for Aeronautics in the development of our Nation's military aircraft. In San Diego, Calif., the Convair Division of General Dynamics is building the F–102.

The F–102 is a new Air Force interceptor airplane. It was designed to fly at supersonic speeds. On a given date, the F–102 design was necessarily frozen on the basis of the most current research information available in the country. Subsequent to the freezing of the design, new research information produced by the NACA on the drag at transonic and supersonic speeds indicated the need for design changes if the required speeds were to be obtained.

At about this same time a new design concept was evolved from the NACA's basic research program which pointed the way to the solution of the drag problem on this airplane. A comprehensive series of tests was immediately undertaken by the NACA using one transonic wind tunnel, three supersonic wind tunnels, and rocket-powered flying models. As a result of the NACA's work, Convair was able to incorporate modifications into a production prototype.

The F–102 has successfully flown at supersonic speeds approximately 100 miles per hour in excess of the original design and at altitudes appreciably higher than the original design.

The NACA's work on this airplane is one of many examples of the vital nature of their work. Their efforts in large measure determine the quality and success of our military aircraft.

Mr. DURHAM. Mr. Chairman, I yield such time as he may desire to the gentleman from Georgia [Mr. VINSON].

Mr. VINSON. Mr. Chairman, it is easy to understand results achieved by the National Advisory Committee for Aeronautics, but it is not so easy to understand how they achieve those results.

Now, what I mean by this is the NACA is probably as highly a technical organization as we have in the Government. It is an independent Government agency, entirely supported by appropriations. It has been in existence since 1915, and since 1950 has been under the jurisdiction of the Armed Services Committee.

Perhaps the most important function of the NACA is the coordinating of aeronautical research carried on in the United States. There is not a military or commercial plane flying today in this country which does not reflect in some way the research of the NACA.

Because the NACA performs such complicated research, and because its activities are not easily understood by the layman, I think it was a wise decision of the gentleman from North Carolina [Mr. DURHAM] to insert in his report some of the background of this fine organization. He is dealing with this particular matter in more detail than I will at this time.

I believe that the activities of the NACA can be pretty well appreciated through an understanding of the construction items which are in this bill. I will describe them briefly, and I feel that the very nature of this construction points up the kind and the importance of the work they perform. The total of the bill is $8,450,000, all of which is being requested from the Appropriations Committee.

Now let us look at the individual construction items:

At the Langley Laboratory, in Virginia, the one big item is an air-removal system for the 16-foot transonic tunnel. This will provide a simpler and less expensive method for testing large-scale airplane models.

At the Ames Laboratory, at Moffett Field, Calif., the bill will authorize a high-speed free-flight facility. There are today no facilities for investigating the tremendous heat generated by missile speeds of from 7,000 to 14,000 miles an hour. The military possibilities of such a missile are obvious. Also at Ames the bill will provide a steel pipe test chamber, a firing chamber, and an instrument room which will permit the investigation of airplane heating and stability at speeds ranging from about 2,000 miles an hour to 6,000 miles an hour. This will permit research under conditions very closely approximating actual flight. The last item at Ames is the installation of equipment to record data received from the 1- by 3-foot supersonic tunnel. This will result in a saving in time and cost of about 25 percent, and will permit the tunnel to handle at least one more major research program each year at no increase in operating cost.

At the Lewis Laboratory, in Cleveland, Ohio, authorization would be granted for the conversion of the 8- by 6-foot tunnel so as to permit transonic operation. NACA advises the Committee that the next generation of military airplanes will be capable of flying at speeds about twice the speed of sound or some 1,500 miles an hour. In order to achieve this speed and operate efficiently they will pass from a speed less than the speed of sound into a speed greater than sound. This is a highly critical matter and requires intensive investigation. Another item at Langley is the construction of two test cells and installation of equipment that goes along with these cells, in order to engage in research on high-energy fuels for ramjets and turbojets. This is a field in which great progress is expected in the very near future. Three fuel-storage tanks also will be constructed at Langley, each of them with a capacity of 125,000 gallons. A lesser item, from the standpoint of cost, will be the alteration of the propulsion systems laboratory shop building. The last item at Langley is the repair of a facility in the engine research building which was wrecked during an experiment.

Wallops Island, Va., is the location of the Pilotless Aircraft Station. Only one small item is involved here and that is the construction of a reinforced concrete magazine, 37 by 52 feet, to provide storage for the larger rocket motors scheduled for firing in the near future.

Mr. Chairman, we have the finest Air Force in the world today. Probably no other single action can assure us of staying out in front than providing the NACA with the tools it needs to make the airplane of tomorrow as far ahead of those of our enemy as are our planes of today.

This country is faced, and will always be faced, with the choice of going ahead in the development of our military airplanes or falling behind our enemy. There is no such thing as standing still in the development of airpower. The National Advisory Committee for Aeronautics insists, and I agree with them, that we will not stand still.

Mr. CUNNINGHAM. Mr. Chairman, I yield such time as he may desire to the gentleman from Indiana [Mr. HALLECK].

Mr. HALLECK. Mr. Chairman, I have asked for this time only to inquire of the majority leader about the timetable for tomorrow on the measures that might be called and as best he can to tell us what the Members might expect in the way of final action, because a number of Members on this side have inquired of me as to the possibility of a meeting on Friday, having regard for certain engagements to which they have been committed.

Mr. McCORMACK. I am very glad the distinguished gentleman from Indiana asked me.

We meet tomorrow at 12 o'clock. There is a Republican conference at 9:30. Of course, we could not meet before 12. There is 1 hour debate on the rule and 4 hours of general debate and 10 minutes on the one motion that is in order, and pro forma amendments in order. The tax bill will be the first order of business. If we get through with that bill tomorrow and also the GI voting bill, which I do not think will take long, then it is my intention to adjourn over until Monday. It is important that we dispose of that bill as quickly as possible in order that the States whose legislatures are in session might be alerted and act upon it while they are in session. In other words, if we dispose of the tax bill, which we reasonably ought to be able to, or may have to sit a little later, and also the voting bill, then we will go over until Monday. Otherwise we will have to meet on Friday.

Mr. HALLECK. I thank the gentleman.

FURTHER LEGISLATIVE PROGRAM

Mr. McCORMACK. Mr. Chairman, will the gentleman yield?

Mr. O'HARA of Illinois. I yield to the distinguished majority leader, the gentleman from Massachusetts.

Mr. McCORMACK. Mr. Chairman, a short while ago the acting minority leader, the gentleman from Indiana [Mr. HALLECK] and I had a colloquy about the legislative business tomorrow. At the time, I was not aware of the fact that there was a possibility of a conference report coming in this week, which we want to dispose of. If the conference report is available tomorrow, of course, it will be brought up, but if it is not available tomorrow and it is available on Friday, then we will have to meet on Friday to dispose of that particular conference report. I want to advise the gentleman from Indiana and to have the Members so advised and the record clarified that when I made my previous observations I was not aware of the possibility that a certain conference report might be available this week.

Mr. DURHAM. Mr. Chairman, I yield such time as he may desire to the gentleman from Ohio [Mr. VANIK].

Mr. VANIK. Mr. Chairman, I want to commend the gentleman from North Carolina [Mr. DURHAM] and his subcommittee for its considered report.

The promotion of aeronautical research is one of the most vital functions of our Government.

We are pleased in Cleveland that the Lewis Flight Propulsion Laboratory can contribute to this very important work.

If America is to maintain its necessary and proper position in the field of aeronautical research it must give hearty and enthusiastic support to the expansion of these research facilities.

Mr. DURHAM. Mr. Chairman, I have no further requests for time.

Mr. CUNNINGHAM. I have no further requests, Mr. Chairman.

The CHAIRMAN. The Clerk will read the bill for amendment.

The Clerk read as follows:

Be it enacted, etc., That, pursuant to subsection (b) of section 1 of Public Law 672, approved August 8, 1950 (50 U. S. C. 151b), the National Advisory Committee for Aeronautics is authorized to undertake additional construction, to acquire land, and to purchase and install additional equipment at the following locations:

Langley Aeronautical Laboratory, Hampton, Va.: Improvements to an existing transonic tunnel and improvements to roads, $3,395,000.

Ames Aeronautical Laboratory, Moffett Field, Calif.: High-speed free-flight facility, range for aerodynamic heating and dynamic stability testing, and data-reduction equipment, $1,055,000.

Lewis Flight Propulsion Laboratory, Cleveland, Ohio: Component research facility for nuclear propulsion, improvements to an existing transonic tunnel, additions to two existing laboratory buildings, repairs and modifications to utility installations, and acquisition of not to exceed 500 acres of land, $8,760,000.

Pilotless Aircraft Station, Wallops Island, Va.: Fuel-storage magazine, $90,000.

SEC. 2. Any of the approximate costs enumerated in section 1 of this act may, in the discretion of the Director of the National Advisory Committee for Aeronautics, be varied upward 5 percent to meet unusual cost variations, but the total cost of all work so enumerated shall not exceed $13,300,000.

SEC. 3. There is hereby authorized to be appropriated not to exceed $13,300,000 to accomplish the purposes of this act.

With the following committee amendments:

Page 2, line 8, strike out "Component research facility for nuclear propulsion, improvements" and insert "Improvements."

Page 2, line 11, strike out "and acquisition of not to exceed 500 acres of land, $8,760,000" and insert "$3,910,000."

Page 2, line 20, strike out "$13,330,000" and insert "$8,450,000."

Page 2, line 22, strike out "$13,300,000" and insert "$8,450,000."

The committee amendments were agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. IKARD, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H. R. 2581) to promote the national defense by authorizing the construction of aeronautical research facilites and the acquisition of land by the National Advisory Committee for Aeronautics necessary to the effective prosecution of aeronautical research, pursuant to House Resolution 148, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en bloc.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The bill was passed.

The title was amended so as to read: "A bill to promote the national defense by authorizing the construction of aeronautical research facilities by the National Advisory Committee for Aeronautics necessary to the effective prosecution of aeronautical research."

A motion to reconsider was laid on the table.

A BRIGHT DAY FOR SMALL BUSINESS

Mr. PATMAN. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD concerning the small-business meeting this morning and include statements and excerpts of the different subcommittees as to their plans and intentions.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. PATMAN. Mr. Speaker, this has been a cloudy and rainy morning for Members of the House here in Washington—but it has been a very bright morning indeed for 4 million small business firms all across this Nation. The House Small Business Committee met this morning at 9:30 a. m. in suite 129 of the House Office Building to announce its program for the coming 2 years. Despite the bad weather, 35 representatives of the press—representatives of newspapers, magazines and trade associations of all kinds—attended this meeting to hear about our program. A press turnout of this size, as the Members know, is quite remarkable, and it demonstrates a very broad and keen interest in what the Small Business Committee would have to offer. I do not think that the members of the press were disappointed.

SELECT COMMITTEE ON SMALL BUSINESS, HOUSE OF REPRESENTATIVES OF THE UNITED STATES IN THE 84TH CONGRESS

WRIGHT PATMAN, Texas, chairman; JOE L. EVINS, Tennessee; ABRAHAM J. MULTER, New York; SIDNEY R. YATES, Illinois; TOM STEED, Oklahoma; JAMES ROOSEVELT, California; WILLIAM S. HILL, Colorado; R. WALTER RIEHLMAN, New York; HORACE SEELY-BROWN, JR., Connecticut; WILLIAM M. MCCULLOCH, Ohio; TIMOTHY P. SHEEHAN, Illinois.

The chairman of each of our subcommittees made a statement outlining the part of the small business program which each of our five subcommittees will carry out.

SUBCOMMITTEES

Subcommittee No. 1, Regulatory agencies: Hon. JOE L. EVINS, chairman; Hon. ABRAHAM J. MULTER; Hon. WILLIAM M. MCCULLOCH.

Subcommittee No. 2, Small Business Administration and problems related to procurement, loans, disposal: Hon. ABRAHAM J. MULTER, chairman; Hon. JOE L. EVINS, Hon. R. WALTER RIEHLMAN.

Subcommittee No. 3, Minerals, raw materials: Hon. SIDNEY R. YATES, chairman; Hon. TOM STEED; Hon. TIMOTHY P. SHEEHAN.

Subcommittee No. 4, Aircraft industry: Hon. TOM STEED, chairman; Hon. JAMES ROOSEVELT; Hon. HORACE SEELY-BROWN, JR.

Subcommittee No. 5, Distribution problems: Hon. JAMES ROOSEVELT, chairman; Hon. TOM STEED; Hon. TIMOTHY P. SHEEHAN.

They made important statements, and, as I said in my introductory remarks, they described an important program, and an ambitious program. I think the Members will be interested in hearing these statements. With your permission, Mr. Speaker, I would like to read these statements in the order in which they were presented following my introductory remarks:

STATEMENT OF HON. WRIGHT PATMAN, CHAIRMAN, SELECT COMMITTEE ON SMALL BUSINESS, TO MEMBERS OF THE PRESS ON THE PROGRAM OF THE SELECT COMMITTEE ON SMALL BUSINESS OF THE HOUSE OF REPRESENTATIVES

Gentlemen, I invited you here this morning to meet with the Small Business Committee so that you may hear about the program we have planned for the coming 2 years. We have organized five subcommittees, and in a moment the chairmen of these subcommittees will tell you about the part of the program each subcommittee expects to carry out. You may want to ask them questions, too, or to ask questions of other members.

In choosing the topics of our investigations, we have chosen only those which we think are most important to small business. We had a wide selection to choose from, as almost every subject which concerns Congress or concerns an executive agency impinges upon the welfare of small business. Every question Congress decides, and every question an executive agency or bureau decides, or fails to decide, affects the welfare of small business. These actions and failures of action may affect particular firms in a very direct way, as when someone in the Department of Defense decides who is to have a contract; or they may affect the general business environment in which individual firms must succeed or fail. All the laws, regulations, taxes, subsidies, tariffs, and so forth all add together to create an environment which is friendly to one class of business or another. Business environment in this country long ago became one which is friendly to big business and which is unfriendly to small business.

The objective of our national policy ought to be to try to create a business environment which is most hospitable to firms of the most efficient size. But by efficiency I mean only the pure engineering, production, and marketing talents. The ability to influence and manipulate the ways of Government so as to favor particular firms or particular classes of firms is not efficiency in any wholesome sense of the term. Nor does a big corporation's ability to win the competitive game by coercive and predatory tactics have anything to do with efficiency. We cannot assume that a corporation is efficient merely because, some years ago, it got there "firstest" and now has the "mostest."

This generation inherited a great ideal, and a great practical experiment with an ideal, which is relatively new in the annals of civilization. This ideal has been to keep the door of opportunity open: never to let the practical means for carrying on trade become so preempted or monopolized that new generations and new organizations of people cannot enter. What we must do now is to eliminate, insofar as we can, or try to offset, the special, noneconomic advantages which have come to surround big business.

It has been principally for the reason that so many subjects impinge upon the welfare of small business that the House of Representatives has maintained a Small Business Committee during the last 14 years. This

committee's job is to study these subjects from the standpoint of small business and to keep the House advised. For the same reason, however, our committee can hope only to investigate those subjects which are of more pressing importance to small business. Yet, even so, our agenda is an ambitious one. To do even passing justice to the subjects we have chosen will mean a great deal of hard and determined work on the part of every member of the committee, and on the part of every member of our small staff.

Now about our method of investigation. We are keenly aware of the Democratic leadership's determination to restore congressional investigations to a place of usefulness, which is in the realm of careful fact finding, not fact invention. We do not believe, however, that we need engage ourselves in writing down the elementary rules for distinguishing fact from fiction, and for according witnesses fair and dignified treatment. All of the members of our committee are civilized and intelligent men with records of responsible public service. We will not be browbeating witnesses, mixing fact with innuendo, or headline seeking.

This does not mean, however, that we will draw pussyfooting conclusions where our facts warrant strong conclusions. Nor does it mean that we will hide our facts and conclusions under a bushel. On the contrary, we would be failing in the task assigned to us if we failed to make less than candid findings and if we failed to make them known.

STATEMENT OF HON. JOE L. EVINS, CHAIRMAN, SUBCOMMITTEE NO. 1, ON FEDERAL REGULATORY COMMISSIONS

Our subcommittee will investigate the organization and procedures of the Federal regulatory commissions. These commissions are constantly promulgating regulations, or enforcing laws and regulations, which directly affect small business.

We shall pay particular attention to those commissions which have been reorganized under a Hoover Commission reorganization plan. These regulatory commissions were originally conceived to be nonpartisan, or at least bipartisan, and they were intended to be of a judicial character. Most certainly, they were set up to be independent of the executive branch of the Government. The Hoover Commission plans made a radical change from this original conception. These plans made the chairman of each commission responsible to the President, to serve at the pleasure of the President, and they gave the chairman complete control and direction over the commission's staff. It is now time to find out how these reorganizations have worked out. If it proves to be true, as we frequently hear, that these supposedly independent commissions have become political puppets on telephone wires leading from the White House, or from a political committee, then it is time we made the facts known. Small business will then at least know where to go to plead its causes.

Specifically, we expect to find out if these reorganizations have changed the effectiveness of these commissions in carrying out their responsibilities to small business. And whether there has been reorganization or not, we expect to inquire whether the conduct of these commissions and their officials makes for effective enforcement of the laws designed to protect small business against monopolistic pressures and unfair competitive methods.

In the case of the Federal Trade Commission, I am advised that there have been at least two reorganizations in that agency since the Hoover Commission submitted its recommendations. We believe it is proper for us to inquire into the purposes of those reorganizations and the effects upon small business. Also, it is planned for Subcommittee No. 1 to inquire into the organizations and functioning of other commissions and regulatory agencies for the purpose of determining how they are affecting small business.

In view of the recent actions and decisions of the Securities and Exchange Commission in its handling of the Dixon-Yates financing arrangements, and in view of other reports regarding the Securities and Exchange Commission actions, Subcommittee No. 1 will attempt to find out whether the organization and operations of this Commission are conducive to a fair and equitable treatment of small business.

STATEMENT OF HON. ABRAHAM J. MULTER, CHAIRMAN, SUBCOMMITTEE NO. 2, ON GOVERNMENT PROCUREMENT, DISPOSAL, AND LOAN ACTIVITIES

For several years now we have had statutes which declare our public policy to be that small business shall have an equitable share of Government procurement contracts, and that small firms shall be given an equitable chance to buy whatever surplus property the Government decides to sell. The question is, then, Is this public policy being carried out and if not what can be done to see that it is carried out?

Of course, we already know many of the answers; the problem is in many respects not new to us. The solution of the problem requires constant attention and hard work. Perhaps our public policy can never be carried out completely but we think that improvements can be made. Great improvements already have been made in past years, largely as a result of the work of this committee.

The Department of Defense alone will spend about $16 billion with private business during the present fiscal year. In addition, this same Department will spend another $1.3 billion on research and development contracts, which expenditures will affect the competitive positions of private firms for many years to come. The business firms that are lucky enough to get research and development contracts not only gain through commercial uses of the new know-how they acquire under these contracts, but they are permitted to take out patents on any inventions they make at Government expense.

In its disposal activities, the Federal Government is also a very big seller of materials, equipment, and finished goods. I don't think I need labor the point that the manner in which these procurement and development contracts are distributed, and the methods by which this public property is sold, are matters of great importance to small business.

One of the things our subcommittee will want to learn is the effect of Secretary Wilson's recent announcement that he is reversing his policy and is now going to spread the defense business around among small and medium-sized companies in order to maintain a broad base of production. We will want to know to what extent this policy has been put into practice.

The procedures and practices surrounding the Government's transactions with private firms are vastly complex. It was largely for this reason that the programs of the Small Business Administration were established. In instituting these programs, Congress created an agent to stay on the job constantly, to work continuously at finding ways to carry out our public policy on safeguarding small business in these procurement and disposal matters, and to provide certain technical and informational assistance to small business of all kinds, so as to build up the Nation's economic strength. These programs have now been in operation for many years. They were created in World War II as an emergency measure.

In 1953, when the RFC was abolished, Congress enacted a new law providing for Government lending operations to be continued for small business, as part of the small business program, the name of which was then changed to the Small Business Administration. On June 30th of this year the legal authority for the Small Business Administration will expire. Consequently, this agency will be first on our list of programs for review. We are therefore scheduling a hearing in Washington to commence March 1, 1955. That hearing will deal with the Small Business Administration and all its operations and it will develop whether the agency should be continued after June 30, and if so, under what form of organization and law. We expect to make a full appraisal of these programs, and to try to find methods to improve them if improvements are needed, so that we can make appropriate recommendations to the House.

STATEMENT OF HON. SIDNEY R. YATES, CHAIRMAN, SUBCOMMITTEE NO. 3, ON MINERALS AND PRODUCTION MATERIALS

In the 83d Congress, the House began an investigation of the mining industry and made a preliminary report on lead and zinc mining. This subcommittee will complete that study and then take up some of the other minerals, including uranium.

Our investigations so far have revealed that our national policy with reference to our domestic minerals industries is not realistic. This policy, or lack of policy, is neither realistic in terms of present strategic problems nor in terms of modern-day trade conditions. Nor is it realistic even in terms of our historic antitrust policy. Small mining companies are forced to try to survive the unfair competition created by cartel action in other countries. Only the international giants can survive under these conditions. We hope to present the facts on these problems, so that Congress will at least have the basis for formulating a considered policy.

Today we are rapidly developing a new mining industry—in uranium. As yet these are mostly small firms. In short, this new industry is at the stage where mining in other minerals was 50 or 75 years ago, before these came under the control of a few giant corporations. Perhaps if we develop an intelligent policy for this industry now, we can avoid the mistakes which have led to monopoly in other minerals.

As for production materials, our subcommittee will look into those that are in short supply. As we know, when there is a shortage of an essential production material, it is the small firms that are denied supplies, or get less than an equitable share of the available supply. We plan to look into natural rubber. This is an essential production material for many small manufacturers. It has suddenly become short, and the price has doubled within the last 11 months. We will want to know what methods are being used for distributing available supplies, and whether small users are getting a fair share.

The country is now faced with another shortage of copper. This shortage results from the strikes and political unrest in Northern Rhodesia, and it is possible that it may continue for some time. We shall want to know what methods are being used in distributing available United States supplies among industrial users. It is apparent that these supplies are being allocated, not by any public agency, but by some private allocation methods of the 3 or 4 big companies which control virtually all of the supply in this country. By what methods, then, are these companies allocating? What standards do they have for deciding which uses of a scarce material are best for the Nation? And how do they decide who the users shall be? How do they allocate between a small company and a big competitor needing copper for the same purpose?

We expect to get the answers to these questions.

We also expect to look into the export controls on copper. At the end of last month the Department of Commerce issued an order which severely limits exports of scrap copper and scrap brass, while at the same time there is no effective limitation on the amount of new copper that may be exported. The people whose business has been interfered with are, of course, the many small scrap dealers. And the reason they would like to export copper and brass scrap is that the copper companies have raised prices of new copper much more in Europe than they have here, and, of course, prices of scrap are higher in Europe. I seriously question the propriety of the Government's interfering with the profit opportunities of one group of businesses when, for the same purpose, it fails to interfere with the profit opportunities of another group.

We have a similar situation in nickel. The International Nickel Co. supplies substantially all the nickel used in this country under a system of allocation of its own. Nickel is in very short supply. This company decides how much nickel shall be used to make nickel-alloy steel, and how much shall be used in electroplating. It decides which steel companies shall make nickel steel, and how much, and it decides which companies shall do nickelplating. Presumably the Department of Commerce maintains supervision over allocations made by this company, but the effectiveness of its surveillance is open to question. We expect to try to find out what this company's allocation methods are. We are not sure who the principal owners of this company are. It was once incorporated in the United States, but later moved over the border into Canada—to escape, it is said, the United States antitrust laws. If we can't get direct answers, then I shall ask the Canadian Combines Commission if they will help us get the answers.

This whole matter of recurring shortages of certain raw materials needs a searching investigation. The small businesses that depend upon these essential production materials cannot survive unless steps are taken to see that they get a fair share of whatever supplies are available.

STATEMENT OF HON. TOM STEED, CHAIRMAN, SUBCOMMITTEE NO. 4, ON THE AIRCRAFT INDUSTRY

We began a study of the aircraft industry last year, and held some hearings. The subcommittee will complete this study and get out a report.

The problems as we see them can be simply stated.

The aircraft parts industry is largely a small-business industry. It is composed of firms which make a countless variety of parts, pieces, components, instruments, and so forth, which go into the assembled aircraft. This is a relatively new industry which was developed, for the most part, of the necessities of World War II. The full productive potential of these firms will be urgently needed if a national emergency arises. But there is a serious question whether they will be killed off, not by any productive problems, but by the military's procurement and paper work procedures.

These firms grew up under a system of direct contracting with the military. The problems incident to this system were always bad enough. The procedures were complicated and subject to arbitrary change by the military. Now the latest thing that has happened is the so-called "Weapons System." Under this system the Department of Defense awards a prime contract with the assembly firm and leaves it up to this firm to obtain the necessary parts by subcontract. This raises a new set of problems. Whereas the small parts maker was formerly plagued by complicated procedures and arbitrary changes by the military, he is now plagued by complicated procedures and arbitrary changes by military, plus arbitrary changes by the prime contractor. The results seem to have been twofold.

First, the prime contractors are negotiating the subcontracts on private deals instead of placing them on competitive bids. This means that the smaller parts makers are getting a smaller share of the subcontracts in the first place. When these big assembly corporations are free to negotiate, they place the subcontracts out of considerations of commercial strategy and cross-ties of financial interest, not where they can get the lowest price.

In the second place, the small parts maker who does get subcontract work can never be sure that he can keep it. Whenever production schedules are curtailed, or the prime contractor has idle capacity for other reasons, he is likely to pull the parts work into his own plants. Thus, the prime contractor stabilizes his workload while the subcontractor may be in production one day and out the next.

There are other problems of course. For example, there is still confusion as to whether the subcontractors can receive progress payments, and if so, under what conditions. And as far as we know, the Air Force and the Navy are still using different inspection systems for the same parts.

Certainly, the small firms in the aircraft industry have shown great flexibility and great adaptability to a rapidly changing technology. In fact, it is their quick adaptability and ingenuity which make them an essential part of a dynamic industry. If and when aircraft manufacture ever becomes unprogressive, with methods and designs long unchanged, then perhaps the parts making can as well be done in huge centralized plants. But as long as small firms are essential, we expect to keep informed on what is happening to them. I hope that we can soon bring ourselves up to date and make a report.

STATEMENT OF HON. JAMES ROOSEVELT, CHAIRMAN, SUBCOMMITTEE NO. 5, ON DISTRIBUTION PROBLEMS

Our subcommittee is concerned with what, to my mind, are some very serious sore spots in our business system. These arise in the trade relations between numerous small and highly competitive firms on the one hand, and a few big monopolistic or quasi-monopolistic suppliers on the other hand. In the typical distribution pattern today, you find these small companies dependent upon such monopolistic suppliers—either for the products they distribute or for essential production materials—and there is a constant struggle to try to get fair and equitable treatment. If these monopolistic sore spots are not cleared up, not only will the small-business man suffer, but the consumer will be paying higher prices.

We have had some vigorous complaints from retail gasoline dealers about the treatment they get from their suppliers—the large oil companies. We plan to look into this. There are now about 200,000 retail gasoline dealers who are called independent businesses. The majority of them distribute the products of the six top oil companies. It has been alleged that they are free to manage their businesses, however, only on the terms and conditions dictated by the oil companies. If such hard terms are found in our investigation, then this is one area where both small business and the millions who buy gasoline need to be protected through the restoration of free, and independent, enterprise.

We also plan to look into whether there are unfair, coercive, and monopolistic practices in the distribution and sale of automotive parts and accessories, and many of the foods, including dairy products, for which the housewife is now paying the highest prices in the history of our economy. We are disturbed by reports that large processors and distributors of dairy products are extending their controls over marketing and prices by buying up small independents. If this is true, we want to know what effect this will have upon the price of milk at the grocery store.

We have plans for our program to include inquiry into the distribution of electric equipment and appliances. We want to know whether a freer and better distributive system can be evolved which will not only aid the small-business man and the consumer but will also impose no burden or hardship upon the manufacturer. We believe that in many cases the manufacturer will actually find it in his own self-interest to work with the Committee to see that the fullest possible play is given to free enterprise.

We shall be interested particularly in the deleterious effects and results flowing from terms and conditions imposed on purchasers, lessees, and franchise holders by big suppliers. Also we shall expose the facts regarding the practice and the effects of price discriminations in the areas I have mentioned.

Monopolistic prices are bad anywhere. But to my mind they are intolerable when they strike at the consumers' grocery basket. Certainly, therefore, we shall be most unrelenting in our search into these food matters. As we know, the profits of small business—the small wholesalers and retailers—have been going down. And as we also know, the prices which farmers receive have been going down. Yet the prices which consumers have to pay have stayed up, and in some cases increased. We want to know why. We think that the welfare of small business, the welfare of farmers, and the welfare of consumers are all of one piece, and if we can do something to help one we will help all.

SPECIAL ORDER GRANTED

Mr. BASS of Tennessee asked and was given permission to address the House for 30 minutes on Monday next, following the legislative program of the day and any special orders heretofore entered.

DISPOSITION OF SITE ACQUIRED FOR CHICAGO, ILL., POST OFFICE, JACKSON PARK POSTAL STATION

The SPEAKER. Under previous order of the House, the gentleman from Illinois [Mr. O'HARA] is recognized for 30 minutes.

Mr. O'HARA of Illinois. Mr. Speaker, in addressing the House today on what may seem to be a matter only of local interest I am exercising the right of a Member of Congress to protest the actions of administrative officers of the Federal Government and to check as far as it is possible an indifference and an arrogance that would not be tolerated in an elected official answerable to his constituents.

It is because the Members of this body are answerable every 2 years to the people, whose Representatives they are, that there is on us this responsibility. In a very true sense, we are the voice of our constituents. If our constituents suffer grievous wrongs from the inattention of public servants, deriving their power of office from appointive sources and not answerable directly to the people, it is properly expected of us that in this Chamber we should raise in pro-

test the voice which we have here, the voice of our constituents delegated to us to use in their behalf.

The relations of the Federal Government with the various local governments, and with the residents subject to those local governments, should be conducted in a climate of cordiality and sympathetic understanding. The determination of where the Federal jurisdiction takes over from State or local jurisdiction is with the Congress and the courts, not with the administrative offices. Nothing is more repugnant to the spirit of love of country in the heart of every loyal American than the assumption of an attitude of "the public be damned" by those who by appointment are vested with a temporary power in the administrative offices of the Federal Government.

Long ago the American people decided they would have no more of "the public be damned" attitude on the part of corporations and rugged individuals. Everyone is happier because of the change that has come with the adoption and development of a policy of good public relations. As I understand our duty and responsibility as Members of the body closest to the people, being answerable every 2 years, it is to protest and bear down whenever in the Federal public service the spirit of "the public be damned" even by inadvertence or with ultimately good but presently lazy intentions manifests itself.

ABANDONED POSTAL SITE

In my district in Woodlawn in the heart of the beautiful South Shore of Chicago is a condition so shocking that it seems beyond belief. For 13 years a property owned by the United States of America and under the control of the Post Office Department, has remained a plague spot, breeding disease and encouraging delinquency. It originally was intended as the site of a new post office building. Changing conditions, with an increased mail burden and demand for a larger building for the necessary handling of the mail, have rendered the original plan impracticable.

Pending release of the property by the Post Office Department the land is being administered by General Services, which admittedly finds it impossible to maintain it in decent condition because the abandoned foundation invites dumping. General Services has recommended that this property be made both serviceable and a source of income simply by leasing it for parking, which is badly needed by business and churches in a congested area. However, this simple solution cannot be achieved without a release from the Post Office Department. This release has been refused on the ground that within the next 2 years they may proceed with a building.

COMMUNITY DEMANDS ACTION

After enduring for more than 13 years an unsightly mess bearing the sign, "United States Property—No Trespassing" the citizens of Woodlawn are up in arms and determined to get action. The Chicago Daily News and community newspapers have taken up the cudgels. Letters from churches, parent-teacher organizations, other civic groups, as well as individuals have poured into my office urging me to take action. Similar protests have been made to the Post Office Department and General Services Administration.

On February 1 I talked with the Honorable Ormonde A. Kieb, Assistant Postmaster General, Bureau of Facilities and with Mr. Edmund A. Mansure, Administrator of General Services.

I confirmed my conversation with letters to both gentlemen and in reply the Assistant Postmaster General states:

Custody of this site is in the Public Buildings Services Administration.

Public Buildings and Services Administration countered:

The property could be leased out for a specified term provided that the successful bidder is permitted to demolish the present floor slab, fill in the excavated portions and pave the site with an asphalt topping.

Assuming that we had a solution, I advised the many who had written me that an alert Government at Washington had listened to their protests and the eyesore they had endured so long would speedily be cleaned up.

February 17 my office called the office of the Assistant Postmaster General to get a report on progress. We were advised to contact General Services to have "the holes boarded up."

February 18 a telephone call from Mr. Cornwell's office informed me that the Chicago police would be ordered to arrest and prosecute violators who dumped refuse on United States property.

Mr. Speaker, the protests of a great Chicago newspaper, the community press, the neighborhood churches, civic groups and outraged citizenry have added up to a heroic gesture of asking the Chicago police to make arrests for trespassing.

PASSING THE BUCK

The good people of Woodlawn are entitled as taxpayers and loyal Americans to something more than a brushoff. Passing the buck to the Chicago police is an affront. They have a just grievance, which they presented in an orderly way and in documental form. The answer is an implied threat that if any of them slips on Uncle Sam's criminally neglected sidewalk and falls into the debris labeled "United States Property" presto he will be yanked in as a trespasser.

The dignity and the honor of the United States require that the Federal Government should set an example in keeping up the appearance of a neighborhood, not in bearing it down to slum conditions. What is required is that the Federal Government immediately should rehabilitate this plague spot, remove the debris and ruins, repair and keep in condition the sidewalk and other parts of its property the same as the nearby church does and the homeowners in the community do as a matter of ordinary self-respect.

If the Assistant Postmaster General cannot make up his mind what he wants to do with the property, and meanwhile he fears that he cannot make a record for economy by spending a little money in making this property at least safe, for goodness sake let him turn it over to General Services.

Fiddlesticks with the heroic solution—end a headache of 13 years by asking the Chicago police to arrest a few trespassers. Then go along to the end of this administration with the Government of the United States of America advertised by a big sign on this plague spot in Woodlawn notifying all the world that the owner is none other than Uncle Sam.

CONGRESSIONAL INVESTIGATION

Mr. Speaker, this is a matter of far larger importance than one having application to but one locality. What is happening in Woodlawn can happen in any city, in any hamlet. Whether there are similar instances in other districts in sufficient number to justify an investigation nationwide by a select committee of the House or a subcommittee of the appropriate standing committee I do not know. I would appreciate hearing from my colleagues as to their experiences.

If the situation in my district, shocking beyond belief, furnishes an index of a general policy, certainly it is a matter demanding immediate investigation and action by the Congress. At a later day, after my colleagues have had opportunity to study the facts as recited in the many letters I am including in my remarks, I shall press, if necessary, for such action by this body as shall seem to be required for the proper upholding of the dignity and the honor of the United States Government.

I now yield to the distinguished and able gentleman from Illinois [Mr. MURRAY], who is a member of the Committee on Appropriations, and who is familiar with the conditions we are meeting in Chicago, in an effort to rehabilitate certain areas in that great city.

Mr. MURRAY of Illinois. I would like to commend the gentleman from Illinois [Mr. O'HARA], who represents a district adjoining mine in the great city of Chicago, in so ably calling the attention of the House to this problem.

To my mind the problem of which the gentleman speaks is by no means a problem of a local nature. The gentleman from Illinois [Mr. O'HARA], very notably represents a beautiful urban district in the city of Chicago, the residents of which have taken national leadership in the field of conservation of urban neighborhoods by community action. Our Federal administration has voiced a great interest in slum and urban conservation by local action, yet in the district that has taken the lead in this field we find a Federal administration not only failing to conserve its own property, but rather leaving its property in such condition that if joined in by others, would cause slum and blight which the administration itself condemns.

I thank the gentleman.

Mr. O'HARA of Illinois. May I inquire of the gentleman from Illinois if it is his information that the present plan of the Post Office Department is to build a post office on the site in Woodlawn some 2 years from now?

Mr. MURRAY of Illinois. It is a proposed plan, as I understand.

Mr. O'HARA of Illinois. I wonder if the gentleman knows whether the Post Office Department has been informed that because of the increased mail burden and the necessity of a much larger

postal building than originally planned, the site on Woodlawn Avenue could not possibly be used for such purpose.

Mr. MURRAY of Illinois. They have been so informed.

Mr. O'HARA of Illinois. Then do I understand correctly from what the gentleman has said, based on information that has been given him in his attendance upon the Appropriations Subcommittee dealing with the Post Office Department, that the Post Office Department intends to permit this disgraceful situation to continue to exist for another 2 years, when at the expiration of that period, it can have no reasonable expectation of using the site?

Mr. MURRAY of Illinois. It has not been so stated, but they have been asked to state if there was any other plan in mind, and I would gather that was their intention from the information I have received.

Mr. O'HARA of Illinois. I thank the gentleman for his very helpful contribution. The gentleman is heart and soul for everything that is for the welfare of the people of Chicago, and I know that no one in Chicago has a wider or more intellectual grasp of the problems of the people of that great city. This is especially true in the field of urban rehabilitation. It is a fortunate circumstance that the able gentleman is a member of the very important Subcommittee on Post Office Expenditures of the Committee on Appropriations.

MANSURE'S HANDS TIED

Mr. Speaker, I regret that my remarks today were made necessary. I had hoped that a matter so simple in its solution could be worked out amicably, certainly without taking the time of the House. For days running into several weeks I worked to that end. I am sure that I had the sincere and understanding cooperation of the Honorable Edmund F. Mansure, Administrator of General Services Administration. Mr. Mansure is a Chicagoan. He personally is familiar with the situation. Moreover, Mr. Mansure is one of the ablest and most outstanding members of the present administration. Chicago, with all the Nation, is proud of the record Mr. Mansure is making in the high position he occupies. The contribution of his intelligence, his integrity, and his industry highlights the Eisenhower administration.

I do not wish any criticism in my remarks to be fixed upon the able Administrator of General Services. His hands are tied. Authority is with the Postmaster General to untie them. If the Postmaster General has one good and valid reason for keeping Mr. Mansure's hands tied, while the entire program of urban rehabilitation in Chicago suffers, he should appear before the proper committee of Congress and make it known.

The people of Woodlawn are in no mood to be pushed around. They have passed the stage of patience. As I came into this well a telegram was handed me. Let me read it:

We urge that you demand the Post Office Department and General Services Administration relinquish the present vacant post-office site and take immediate steps to provide facilities that will replace the inadequate Jackson Park and Kenwood Stations in Woodlawn. A new post office and our projected new police station and new parking facilities are absolutely essential for the prevention of a slum area in Woodlawn. These achievements would give a rebirth to Woodlawn. We hail your personal efforts in this direction and pledge our cooperation in achieving positive actions.

JOHN R. COULSON,
President, Associated Clubs of Woodlawn Association.
JIM EARLE,
President, Woodlawn Business Men's Association.
WALTER MARSHALL,
President, United Woodlawn Conference.

THE DOCUMENTED CASE

Here is the story of how obstinacy, arrogance, or at the best procrastination on someone's part is operating to shame the Government of the United States, to blight an entire neighborhood, to imperil the lives and limbs of children, to spread disease, and to put the Government of the United States in the position which Uncle Sam never should occupy of defying even the ordinances of a great city as regards the maintenance of sidewalks in good and safe repair and the shovelling away of snow and ice:

First. In 1941 the Post Office Department began construction on a new post office on Woodlawn Avenue south of 63d Street in the district in Chicago which I have the honor to represent.

Second. Work proceeded as far as the foundation, then was abandoned because of shortage of materials occasioned by World War II.

Third. Thirteen years passed. The place became a ruin, near the campus of the University of Chicago, in the heart of Woodlawn, close by a church that went to considerable expense in sidewalk repairs while the sidewalk around the site of the property with the large sign "United States Property—No Trespassing" went further and further into delapidation, unsafe for use, with unshovelled ice and snow in wintertime.

Fourth. The Chicago Daily News, the Woodlawn Booster, the Hyde Park Herald, and the South Side News-Courier with other community newspapers took up the cudgels. During the last week of January letters from churches, parent-teacher organizations, civic groups, and individuals poured into my office protesting the filthy, unsightly mess placarded: "United States Property—No Trespassing." The contents of these letters I later will recite in detail.

Fifth. On February 1 I talked with the Honorable Ormonde A. Kieb, Assistant Postmaster General, Bureau of Facilities, and with Mr. Mansure of General Services. On February 4 I received the following letter from Assistant Postmaster General Kieb:

DEAR CONGRESSMAN O'HARA: This will acknowledge your letter of February 2 confirming our telephone conversation relative to the condition of the Government-owned site on Woodlawn Avenue which was acquired for the erection of a Federal building in which to house the Jackson Park Station of the Chicago Post Office.

I appreciate your interest in this situation and your bringing it to my attention. We here have been familiar with the condition of this property and recognize that it presents anything but a pleasing appearance, and are sympathetic with the desire of the local citizens to have the site cleaned up. However, our appropriations are not available for the expenditure necessary to improve this unsatisfactory condition.

Custody of this site is in the Public Buildings Service, General Services Administration, and I am taking the liberty of referring your letter to Hon. Edmund F. Mansure, Administrator of that Agency, encouraging him to give this subject his personal attention with a view to remedial action.

Ed is from Chicago and I feel that he will be pleased to give this his prompt attention.

I am asking him to communicate with you direct and to forward me a copy of his response for our information and guidance.

Cordially yours,

ORMONDE A. KIEB,
Assistant Postmaster General.

Sixth. Later I was furnished with a copy of a letter dated February 3, 1955, from J. E. Strawser, Acting Commissioner of Public Buildings, to Mr. Kieb. The letter follows:

DEAR MR. KIEB: Your letter of November 3 stated that a decision had not been made at that time with respect to the disposition of the site acquired for the Chicago, Ill., post office, Jackson Park Postal Station.

Congressman BARRATT O'HARA has communicated with this administration concerning the unsightly condition of the property. We are taking immediate steps to place the site in a presentable condition.

Pending a decision as to the disposition to be made of this property, there is an interim measure which could be taken to keep the property from being an eyesore and, in addition, provide revenue. The property could be outleased for a specified term provided that the successful bidder is permitted to demolish the present floor slab, the north, south, and west foundation walls, fill in the excavated portion and pave the site with an asphalt topping, thereby achieving maximum utilization of the entire site for parking and maneuvering of automobiles.

An additional copy of a report dated July 13, 1953, from our regional office in Chicago on this subject is enclosed.

May we have your comments with respect to the suggestion made by the regional office.

Cordially yours,

J. E. STRAWSER,
Acting Commissioner of Public Buildings.

Seventh. In his letter the Assistant Postmaster General had stated:

Custody of this site is in the Public Buildings Services Administration.

Public Buildings and Services Administration had countered:

Pending a decision * * * there is an interim measure which could be taken to keep the property from being an eyesore and in addition, provide revenue. The property could be leased out for a specified term provided that the successful bidder is permitted to demolish the present floor slab * * * fill in the excavated portions and pave the site with an asphalt topping, thereby achieving maximum utilization of the entire site for parking.

In other words the Assistant Postmaster General said action was up to the Commissioner on Public Buildings and the Commissioner on Public Buildings offered the solution.

Relying upon this, I advised the many who had written me that an alert Government at Washington had listened to their protests and that the perilous eyesore they had endured so long speedily would be removed.

Eighth. On February 17 my office called the office of the Assistant Postmaster General to get a report on progress. We were advised to contact General Services to have the holes boarded up.

Ninth. On February 18 a telephone call from the office of Mr. Cornwell, management coordinator under Assistant Postmaster General Kieb, informed me that the Chicago police were to be ordered to prosecute violators who dumped refuse on United States property.

THE EVIDENCE IN THE CASE

Affiliated with the Associated Clubs of Woodlawn are 50 churches, civic, and veteran organizations and clubs in all the various fields of community activity in a metropolitan area. Here is the letter of January 31, 1955, addressed to me by Joseph Wahala, corresponding secretary of the organization:

Members of the Associated Clubs of Woodlawn voted unanimously in their last meeting to appeal to you to use your influence in getting rid of the old post office foundation on Woodlawn Avenue, south of 63d Street.

For 13 years it has been an eyesore. Within sight are churches and hotels. Just 3 blocks to the north is the new $2 million American Bar Center. And across the Midway the beautiful campus of the University of Chicago.

Weeds grow high in summer. Snow and ice cover the sidewalk in winter. The site has become a dumping ground for refuse, garbage, junk, old cars, and refrigerators, and the like, and is a menace to children who play in the vicinity. Two signs proclaim to passersby the property is owned by the United States Government. Federal officials have done nothing to clean up the place. Foundation was started in 1941 and stopped by the war.

May we count on your help in pressing for prompt action? The site should be sold by the Federal Government. Then, the eyesore can be eliminated.

Similar letters were received by me from 12 other organizations of large and representative membership, from 6 churches and from many individuals. I quote from some of these letters:

CIVIC GROUPS AROUSED

Rosalia P. Isaacs, president, John Fiske Parent-Teachers Association:

All the civic organizations in Woodlawn, including the Parent Teachers Associations, who have a vital interest of their children in mind, have banded together to make Woodlawn a cleaner and better place in which to live. The action of the Government in abandoning and completely neglecting this tract of land is at best an oversight; at the worst it is an invitation to crime and delinquency.

Marcia W. Dill, corresponding secretary of Woman's Auxiliary to Woodlawn Hospital:

For 13 years this abandoned foundation for a postoffice has distressed all who passed and it has disheartened all of us who are interested in making the Woodlawn area a credit to ourselves, our city, State, and Nation.

DISGRACE TO OUR UNITED STATES

Carl S. Sholeen, president, Howson Fellowship Bible Class of the Woodlawn Methodist Church:

In addition to the disreputable condition of the foundation and surroundings, the sidewalk adjacent to this property is in a terrible state of repair and has so remained for several years whereas our Methodist Church in the same block was required to spend considerable money only recently repairing sidewalks that already were in much better condition. This property is a disgrace to our community and to our Government.

Mrs. Ruth Schaefer, Woodshore Woman's Club:

Pathetic and deplorable—unsightly and unsafe.

Rev. Walter C. Bihler, rector, Christ Episcopal Church:

It is an atrocious eyesore on a main thoroughfare of our community. There is refuse strewn about, auto wrecks, etc., as well as undesirable loiterers. Furthermore, the sidewalks are badly in need of repair and not cleared of ice and snow in the winter. The citizens of Woodlawn feel that since the foundation is useless it should be removed and the property sold or properly maintained.

FROM THE CHURCHES

Rev. Harold Leonard Bowman, minister:

Representing 1,600 members of the First Presbyterian Church of Chicago, I am writing to plead with you to secure action regarding the unused post office site on Woodlawn Avenue, south of Sixty-third Street.

This church is located just a block from that unsightly discarded foundation, which bears signs, "Property of U. S. Government."

We protest against the filth and rubbish which this neglected plot collects.

We protest further its being withheld from much needed use. This densely populated community is strangled with parked cars. There is a desperate need for off-street parking which this property could help to provide.

We therefore urge you to use your influence, not only to have this property properly cared for, but especially to have it released for sale and for improvement.

Rev. Charles R. Graham, pastor the Sixth United Presbyterian Church of Chicago:

It is a matter of Biblical record that a foundation without a house thereon is a matter which invites ridicule to the builder. This is precisely the situation which prevails on Woodlawn Avenue at the 6300 block south. In the Biblical record, it is implied that the builder may have been lacking in foresight. A foundation without a building daily raises a question as to the sagacity of its source.

As a defender of an inherent integrity in Federal and local government, we recommend appropriate action to remove this altogether embarrassing situation.

Rev. Robert Odean and Rev. Earl Elledge, interim co-pastors, Woodlawn Baptist Church:

Since this is United States property we urge you to press for action. With the foundation removed the ground should be kept in decent condition or it should be placed on sale. This place overgrown with weeds in summer and constantly littered with refuse, garbage and junk would certainly be a much greater asset to the community if it were converted into a playground for the use of the children who play there in all seasons.

Rev. Robert M. Herhold, pastor, Woodlawn Immanuel Lutheran Church:

Many of us are concerned not simply to arrest Woodlawn at the status quo, but in every way, to seek to make it a more desirable place to live.

This abandoned foundation is a collecting place for junk of all kinds and is an increasingly dangerous place for children who play among the debris. Besides the negative physical effect, a community liability like this serves to further demoralize the people of the community.

If this is no longer a proper site for a post office building, cannot the area be cleared for a parking lot or used for some other desirable purpose?

Immediate action on this problem would go a long way toward the renewal of Woodlawn. The United Woodlawn Conference, the churches, and civic organizations as well as citizens of all races and creeds, are united in seeking a satisfactory solution to this problem. Your immediate attention and cooperation would be greatly appreciated.

Rev. J. J. Hitchens, minister Woodlawn Methodist Church:

This site owned by the United States is an abomination and a reflection to the people of the churches near, as well as to the people of the community as a whole.

The churches keep their property in repair, but visitors always comment on this site in question as an insult to the community. Weeds that grow in summer, garbage, bottles, and other litter make this place look like a Gehenna.

Sidewalks are dangerous, a menace to everyone who tries to use them. Surely when the Government is spending lavishly through so many avenues, it should immediately remove this blot on our Woodlawn area.

FROM THE BUSINESS GROUP

Clarence A. Beutel, president the South East National Bank of Chicago:

Recently, with pictures and an article in the rotogravure section, the Chicago Daily News focused attention on the Woodlawn community's No. 1 eyesore, the old post office foundation on Woodlawn Avenue, just south of 63d Street. The foundation was started in 1941 and stopped by the war.

Conditions that have existed for over 13 years have been the subject of widespread disparaging remarks. Two signs reading "U. S. Property—No Trespassing" proclaim to all who pass that the property is owned by the United States Government. Consequently, everybody in the community knows where to place blame for conditions. It seems logical that steps should be taken at once to transfer ownership to other hands so that the eyesore may be removed.

Frank L. Moran, treasurer of the Southeast Safe Deposit Co.:

The site is a menace to the health of the community and a hazard to school kids every day. Who in thunder is in charge of this mess? Who has the authority to do something about it? Not one of our representatives in Government seems to have the guts to do anything about it. It could be turned into a parking lot—city or privately operated. Most anything will be an improvement over the dump that it is. Let's have some action.

FROM THE NEIGHBORHOOD

James H. Clardy, 6653 South Minerva Avenue, Chicago:

How long must we put up with this abandoned wreck that the Government refuses to remove, repair, or even attempt to keep in decent and sightly condition. Sidewalks are badly in need of repair and in winter are covered with snow and ice that is never shoveled. The community wants action. The foundation, we are told, has deteriorated and is useless and should be removed. Post-office officials, we are told, no longer consider this a proper site for a large post-office building as (1) there would be little available parking space for post-office trucks, and (2) it is too near the busiest intersection in the community. With foundation removed, the ground should be kept in decent condition, or it should be placed on sale.

C. H. Nibloc, president, Kiwanis clubs of southeast Chicago:

As it now stands with a basement completed and the premises littered with tin cans and junk, it is unsafe for children who sometimes try to use it as a playground, the sidewalks are never kept clear of mud and snow and it is a discredit to the United States property sign which appears on it. We hope the Post Office Department can be prodded into action. If the foundation were removed the vacant lot could be maintained in a decent condition, but if the Government has no plan for its use we can see no point in continuing the property in its present deplorable state.

Nellie M. Hearns, corresponding secretary, the 6600 Blocks Minerva-Woodlawn Civic Club:

It is an eyesore of long standing, and the community wants action.

PTA JOINS IN PROTEST

Mrs. Marshel L. Beason, president, Wadsworth Parent-Teacher Association:

We join with all of Woodlawn in protesting this eyesore we have endured for 13 years. Woodlawn is very much in need of additional space for playgrounds. If the United States has no further use or plans for this site we urge the sale of the property.

Mrs. P. A. Gray, president, Woman's Auxiliary of the Woodlawn Boys' Club:

Thousands of people view this ruin daily. The useless foundation should be removed and the ground kept in decent condition.

Robert H. Chorley, director, Woodlawn-Chicago Boys' Club:

Our boys' club is located a short block away and many of our youngsters play in and around this foundation, which we feel is very hazardous. We in Woodlawn are very much concerned with keeping up the beauty of our property and this eyesore does not help. We would suggest the removal of the foundation and have it converted either into a playground or housing, which are both badly needed in the community.

Mrs. P. A. Gray, president, Woodlawn WCTU:

We join in the protest against this eyesore.

Wilda J. Dailey, secretary, Woodlawn South Shore District Family Service Bureau:

It is a blight on the Woodlawn community, discourages surrounding landlords from keeping up their property and maintaining good standards of living for their tenants. It encourages slum conditions with all their attendant social evils. It is a dangerous place where children can get hurt in their play, where gangs can gather and where vagrants loiter.

THE PACIFIC NORTHWEST POWER PROBLEM

The SPEAKER. Under the previous order of the House, the gentleman from Oregon [Mr. ELLSWORTH] is recognized for 10 minutes.

Mr. ELLSWORTH. Mr. Speaker, the pressure for the development of the nationally needed resources of the Pacific Northwest States of Oregon and Washington has created a situation which cannot be met in the future in the same way we have been endeavoring to cope with it in the past. The availability of raw materials and demand for the products has brought industrial development. Industry must have power—electrical energy. Water flowing to the sea in our beautiful rivers can generate power. It is generating power, but not enough. Power generating capacity must be increased faster than it is being built on the present basis. There is a way to do it, by an act of Congress, and a way that will save added investment of Federal money. That way has come to be known as the partnership plan for financing Federal multiple-purpose projects by using local money.

In the Pacific Northwest is located the last remaining stand of virgin timber in the United States. It takes men and it takes electrical energy to develop the wood products from these great forests.

The Northwest mountains are known to contain vast quantities of minerals. In the southern part of Oregon in the district I represent, a large mining company of Cleveland, the M. A. Hanna Co., has developed a mine and smelter for the production of nickel on a very great scale. The investment to date has been some $28 million. Their need for electrical energy amounts to 60 or 65,000 kilowatts.

On the Columbia River in the vicinity of Portland the aluminum industry of the country is located. These aluminum plants require hundreds of thousands of kilowatts of electrical energy. These plants produce a substantial part of the aluminum used in this country which, as everyone knows, is so vital to the defense of the country.

The natural resource which makes possible the development of the material resources of the Northwest is the electrical energy available from the swift clear rivers that flow to the sea from the mountains in the Pacific Northwest. The development of hydroelectric energy from these rivers has gone ahead at a rapid rate, especially so since 1940. In 1940, the total generating capacity in our area was around 800,000 kilowatts. In 10 years, up to 1950, the installed generating capacity was increased to some 3½ million kilowatts. Engineers and economists who have projected the need of the Northwest power lines into the future state that these two States will need a total of 10 million kilowatts installed capacity by the year 1965.

The Federal Government through the development of multiple purpose projects on the great Columbia River, which flows between the States of Oregon and Washington, now owns and operates many hundred thousand kilowatts of installed electrical generating capacity. The privately-owned and municipally-owned utilities of the area also have built generating capacity as rapidly as possible. In other words, both the Government of the United States and the people locally, have endeavored to meet the power needs of the area. But there is still a gap as between what has been installed plus what can reasonably be expected to be installed under existing conditions over the next 10 years, and what the need actually is.

In the Willamette Valley of Oregon, in the area which I represent in Congress, we have two streams, the Santiam River and the McKenzie River, which are partially controlled under the flood control plan of the Willamette Valley Flood Control Project but which each year run wild over a large area. The flood-control project, as planned and authorized for the middle fork of the Santiam and one of the forks of the McKenzie River, is not completed. The completion of that work is vitally needed in order to protect the valuable soil of the farms which is being washed away by the floods every year. The annual loss from those floods is $2 million.

The Congress has already authorized the construction of flood-control dams on both of these streams. Last year the authorization was expanded to make those dams multiple-purpose projects, including power. The Federal Government Department of the Army through the Corps of Engineers will ultimately build those two flood-control and power dams, but we know also that many years may elapse before that can be done.

The people of the States of Oregon and Washington have studied this situation. We face an urgent need for increased power from our streams. We desperately need the two flood-control dams I mentioned, but we realize it is not reasonable to expect that appropriations for construction of public works in the Northwest will suddenly be expanded to around a billion dollars a year which would be required for the needed construction of these dams and the big Columbia River dams which are authorized. Realizing these things, the people in the Northwest have proposed that local interests be permitted to join with the Federal Government in financing the construction of multiple-purpose dams, which include power facilities. We want to have the right, which must be authorized by Congress, to participate with the Government to the extent of paying for the power facilities in the dams.

Heretofore, the Federal Government has built multiple-purpose dams in various parts of the country and has built many of them in the States of Oregon and Washington. It has always been assumed because the dams provided flood control, irrigation, navigation, and power that it would be impossible to divide up those functions moneywise so that the power part of the dams could be paid for locally. A plan has been worked out so that this can be done.

At the last session of the Congress, I introduced two bills to authorize the partnership construction of dams on each of the two rivers I spoke of earlier. One of them, the bill for the Cougar Dam, was passed by the House of Representatives without opposition. At the present time I am drafting legislation which will, if passed, authorize the Federal Government to enter into contracts with local utilities for financing a portion of both the Cougar Dam and the Green Peter Dam. If this bill is passed by Congress, the Federal Government will be saved approximately $50 million in construction costs, and the local utilities will have the power that they so badly need. The dams will be built years sooner.

The people of the State of Oregon want this program enacted by Congress. Our legislature, in session now, recently passed House Joint Memorial No. 3

which has been sent to the Congress. That memorial specifically requests the Congress to pass the legislation I have spoken of to authorize the partnership plan for the construction of the multiple-purpose dams known as Green Peter on the middle Santiam River and Cougar on the McKenzie River. The legislature spoke with an overwhelming majority in both the house and the senate on the passage of this memorial. Forty-four to sixteen was the count in the house of representatives of the State legislature, and 21 to 6 in the senate. In other words, Mr. Speaker, the people of Oregon, through their own representatives in the State legislature, have formally asked the Congress to let people in the State of Oregon help finance these multiple-purpose projects which otherwise would be built entirely at the cost of the Government. It seems to me a very simple and reasonable request to make, and I am sure a majority of the Members of Congress, both in the House and the Senate, will approve this partnership legislation. The memorial reads as follows:

House Joint Memorial 3

To the Honorable Senate and House of Representatives of the United States of America, in Congress assembled:

We, your memorialists, the 48th Legislative Assembly of the State of Oregon, in legislative session assembled, most respectfully represent and petition as follows:

Whereas the control of floods in the Willamette River Basin has long been recognized by the Congress to be necessary and desirable; and

Whereas certain river control projects have been built by the United States and are in service within the Willamette drainage area; and

Whereas the early construction of other flood-control facilities on certain tributary streams is urgently needed to balance operation of already existing facilities and thereby check recurring and aggravated damage to lands and property adjacent to the principal uncontrolled streams; and

Whereas the Green Peter flood-control project on the Middle Fork of the Santiam River and the Cougar project on the McKenzie River are among the most urgently needed to round out the Willametter Basin river-control program; and

Whereas full utilization of the hydroelectric power potential of the Green Peter and Cougar sites would add 120,000 kilowatts of electric generating capacity at strategic points in an area where power requirements are rapidly increasing; and

Whereas local electric utilities, one municipal and one private, have shown willingness to finance and construct such electric facilities as an integral and coordinated part of the desired flood-control plan, thereby relieving the United States Government of that part of the costs: Now, therefore, be it

Resolved by the House of Representatives of the State of Oregon (the Senate jointly concurring therein),

That the Congress of the United States be and it hereby is memorialized to make available funds to begin the planning and construction of the flood-control facilities needed at the Green Peter and Cougar projects and, at the same time, authorize the licensing by the Federal Power Commission of hydroelectric installations to be financed and constructed by local agencies in harmony with the overall Willamette River Basin development plan.

Be it further resolved, That the secretary of state of the State of Oregon be and hereby is directed to send a copy of this memorial to the President of the United States; to Douglas McKay, Secretary of the Interior of the United States; to the President and Chief Clerk of the United States Senate; to the Speaker and the Chief Clerk of the House of Representatives of the United States; and to each Member of the Congress.

Adopted by house January 25, 1955.

E. A. GEARY,
Speaker of House.

Adopted by senate February 8, 1955.

ELMO E. SMITH,
President of Senate.

However, there is opposition in the congressional delegation from Oregon, to the partnership plan. I will recite the objections that I have heard about the partnership plan. These objections have been widely published in magazine articles, on the radio, and in the newspapers. Opposition No. 1 seems to be that the partnership plan, which, incidentally, has been endorsed by the administration, represents a change in policy and that the administration now has abandoned the traditional all-Federal method of building multiple-purpose projects for flood control, power, and navigation and is about to turn the whole of such construction over to the partnership plan. That, of course, is an absurdity. There is no change in policy by the administration. What the partnership plan does is to provide another way for the construction of multiple-purpose projects in addition to the construction that is going ahead right now in the Northwest by the Government on such projects. It is just a supplement which will expedite this construction for the benefit of the people of the Northwest, stop the flooding which is causing annually a $2 million loss, catch up with our electric power needs a little sooner, and relieve the Federal Government of millions of dollars of additional investment in such projects.

The second objection which these people raise to the partnership plan of constructing and operating multi-purpose-dam projects is that it represents a loss of profit to the Federal Government because, they say, the Federal Government will give away—that is where the give-away phrase came from—the part of the project which makes money and retain to itself, the Federal Government, only those parts of the project which are costly. That statement, although I am sure that it has a lot of political and emotional appeal, because people generally speaking are not able to dig into the facts of these things, is on the face of it not correct. There is no provision in any law of the United States for revenue in the form of net profit furnished by Pacific Northwest flood control and navigation projects in which power generators are located, to go to the United States Treasury. The rates charged for the electricity generated by those plants are based upon the cost of amortization over a period of 50 years, plus maintenance and operation. After the amortization period is completed, the rate charged for the power must be rebuilt on the basis of the remaining cost of operation and maintenance. In other words, when the dam is paid for, the Federal Government has received its money back. Then the Federal Government's financial interest in that project has ended. The Government merely gets its investment back with interest. The people of the area have paid for the project through buying the power, and they will get the benefit of it.

But those who are opposing what we are suggesting now, this partnership plan, would try to have the folks out there and everywhere else believe that in some way we are trying to rob the Federal Treasury. I recommend to those people who are speaking against this partnership plan that they obtain and read a copy of the Bonneville Act, and find out how wrong they are when they talk about millions of dollars being lost to the Treasury.

We in the Northwest and I think generally over the country do not think it is an obligation of the Federal Government to furnish electric energy for the people of this country. If we thought that, we would be advocating a Socialist form of government, because that fundamentally is socialistic. We do not believe in socialism. The Federal Government has gone into the business of generating electrical energy as the result of having built multipurpose dams in which power generators must be located because it would be uneconomic to allow falling water to go to waste without making power from it. It is unreasonable to assume that because the Federal Government has entered into the production of power it thereby has assumed an obligation in the Pacific Northwest to generate all of the power that is generated out there. The Federal Government's obligation is only to do those things with reference to power that are reasonably necessary in the construction and management of the projects which have been authorized by Congress primarily for flood control, and for navigation. The Federal Government has no further obligation than that, nor do we consider that it has. If local money is available to finance the power part of such a project it should be allowed to do so.

Mr. Speaker, the legislation for the partnership plan for financing construction of the Cougar Dam and Green Peter Dam will be introduced by me in the very near future. At that time I shall endeavor to further explain the principle involved in this legislation.

Mr. ELLSWORTH. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and to include House Joint Memorial 3.

The SPEAKER. Is there objection to the request of the gentleman from Oregon.

There was no objection.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the RECORD, or to revise and extend remarks, was granted to:

Mr. FEIGHAN in four instances and to include extraneous matter.

Mr. PRICE.

Mr. RODINO in three instances.

Mr. MORANO and to include a tribute to three young people in his district who have been honored by the Westinghouse Co. for outstanding achievements in the field of science.

Mr. FJARE.

Mr. VAN ZANDT.

Mr. KLEIN (at the request of Mr. McCORMACK).

Mr. ANFUSO (at the request of Mr. McCORMACK) and to include extraneous matter.

Mr. CELLER.

Mr. DEROUNIAN (at the request of Mr. LAIRD).

Mr. LOVRE and include a speech delivered by Mr. BROWN of Ohio.

Mr. COON and to include a memorial adopted by the Oregon Legislature.

Mr. MCDONOUGH in two instances and to include extraneous matter.

Mr. LECOMPTE. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD and include a short tribute to our late lamented friend, the Honorable Pete Jarman, and I further ask unanimous consent to extend my remarks and include the four prize-winning essays in the Voice of America national contest which has just been completed. The four may be slightly more than the limit, but I believe this is of the utmost importance, so I ask that they be included, notwithstanding that fact.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. YOUNG (at the request of Mr. HOLT), for 1 week, on account of sickness.

Mrs. KEE (at the request of Mr. BAILEY), for the remainder of the week, on account of sickness.

Mr. THOMPSON of New Jersey (at the request of Mr. RODINO), for today, on account of official business.

ADJOURNMENT

Mr. MURRAY of Illinois. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 40 minutes p. m.) the House adjourned until tomorrow, Thursday, February 24, 1955, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

460. A letter from the Acting Secretary of State, transmitting a draft of proposed legislation entitled "A bill to provide for the presentation by the United States of a statue of Gen. George Washington to the people of Uruguay, and for other purposes"; to the Committee on Foreign Affairs.

461. A letter from the Secretary of the Army, transmitting a draft of proposed legislation entitled "A bill for the relief of William Henry Diment, Mrs. Mary Ellen Diment, and Mrs. Gladys Everingham"; to the Committee on the Judiciary.

462. A communication from the President of the United States transmitting a proposed amendment to the budget for the fiscal year 1956 for the Post Office Department involving a reduction in the amount of $183,000 (H. Doc. No. 94); to the Committee on Appropriations and ordered to be printed.

463. A communication from the President of the United States, transmitting a proposed amendment to the budget for the fiscal year 1956 for the General Services Administration involving a reduction in the amount of $169,000 (H. Doc. No. 95); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. ROGERS of Colorado: Committee on the Judiciary. H. R. 3659. A bill to increase criminal penalties under the Sherman Antitrust Act; without amendment (Rept. No. 70). Referred to the Committee of the Whole House on the state of the Union.

Mr. SMITH of Virginia: Committee on Rules. House Resolution 153. Resolution for consideration of H. R. 4259, a bill to provide for a 1-year extension of the existing corporate normal-tax rate and of certain existing excise-tax rates, and to provide a $20 credit against the individual income tax for each personal exemption; without amendment (Rept. 71). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BENNETT of Florida:

H. R. 4290. A bill to provide that leave accrued by members of the Armed Forces while held as prisoners of war in Korea shall not be counted in determining the maximum amount of leave which they may accumulate or have to their credit; to the Committee on Armed Services.

By Mr. BERRY:

H. R. 4291. A bill to amend the Packers and Stockyards Act, 1921, to authorize additional market services for livestock purchasers; to the Committee on Agriculture.

By Mr. BURDICK:

H. R. 4292. A bill to provide for the return to the former owners of certain lands, including Indian tribal lands, acquired in connection with the Garrison Dam project of mineral interests in such lands; to the Committee on Public Works.

By Mr. DODD:

H. R. 4293. A bill to provide for the issuance of a special postage stamp in commemoration of the 200th anniversary of the birth of Nathan Hale; to the Committee on Post Office and Civil Service.

By Mr. DOYLE:

H. R. 4294. A bill to amend section 640 of title 14, United States Code concerning the interchange of supplies between the Armed Forces; to the Committee on Armed Services.

By Mr. FORAND:

H. R. 4295. A bill to amend section 2402 (a) of the Internal Revenue Code; to the Committee on Ways and Means.

By Mr. JOHNSON of California:

H. R. 4296. A bill to provide that certain professors at West Point shall not be deprived of certain retirement benefits; to the Committee on Armed Services.

By Mr. McMILLAN:

H. R. 4297. A bill to exempt meetings of associations of professional hairdressers or cosmetologists from certain provisions of the acts of June 7, 1938 (52 Stat. 611), and July 1, 1902 (32 Stat. 622), as amended; to the Committee on the District of Columbia.

By Mr. MILLER of California:

H. R. 4298. A bill to amend the Wildlife Restoration Act (16 U. S. C., secs. 669–669i) by providing that the amount of money currently in the Federal aid to wildlife restoration fund shall be available for use during the fiscal year beginning July 1, 1955, defining "wildlife restoration project," and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. MUMMA:

H. R. 4299. A bill to amend the War Contractors Relief Act with respect to the definition of a request for relief, to authorize consideration and settlement of certain claims of subcontractors, to provide reasonable compensation for services of partners and proprietors, and for other purposes; to the Committee on the Judiciary.

By Mr. PATMAN:

H. R. 4300. A bill to improve the income-earning capacity and standard of living of low income rural people, to strengthen the Nation by providing additional credit for farm enlargement and development, industrial dispersion, and for other purposes; to the Committee on Agriculture.

By Mr. O'KONSKI:

H. R. 4301. A bill to amend the Railroad Retirement Act of 1937; to the Committee on Interstate and Foreign Commerce.

By Mr. PERKINS:

H. R. 4302. A bill to provide for emergency Federal financial assistance to the States and Territories in the construction of urgently needed public elementary and secondary school facilities, and for other purposes; to the Committee on Education and Labor.

By Mr. RHODES of Arizona:

H. R. 4303. A bill for the relief of desert land entrymen whose entries are dependent upon percolating waters for reclamation; to the Committee on Interior and Insular Affairs.

By Mr. ROOSEVELT:

H. R. 4304. A bill to provide for an annual report of the President on the effect of the Trade Agreements Extension Act of 1955 upon labor, employment, and industrial activity in the United States; to the Committee on Ways and Means.

By Mr. SMITH of Mississippi:

H. R. 4305. A bill to amend the Railroad Retirement Act to increase by 25 percent the amount of the annuities payable thereunder, and to provide full annuities at age 60 for men who have completed 30 years of service and at age 55 for women who have completed 25 years of service; to the Committee on Interstate and Foreign Commerce.

H. R. 4306. A bill to amend the Railroad Retirement Act to increase the amount of the annuities payable thereunder, and to provide full annuities at age 60 for men who have completed 30 years of service and at age 55 for women who have completed 25 years of service; to the Committee on Interstate and Foreign Commerce.

By Mr. THOMPSON of New Jersey:

H. R. 4307. A bill to amend the joint resolution of May 17, 1938, to provide for the construction and maintenance of a National Collection of Fine Arts Museum on the site set aside for an art gallery thereunder, and for other purposes; to the Committee on Public Works.

By Mr. UDALL:

H. R. 4308. A bill for the relief of desert land entrymen whose entries are dependent upon percolating waters for reclamation; to the Committee on Interior and Insular Affairs.

By Mr. WEAVER:

H. R. 4309. A bill to provide for construction by the Secretary of the Interior of Red Willow Dam and Reservoir, Nebr., as a unit of the Missouri River Basin project; to the Committee on Interior and Insular Affairs.

By Mr. HINSHAW:

H. R. 4310. A bill to amend section 401 (e) (2) of the Civil Aeronautics Act as amended; to the Committee on Interstate and Foreign Commerce.

By Mr. HYDE:

H. R. 4311. A bill to provide that school districts which filed applications for payments under Public Law 815, 81st Congress, before November 24, 1953, shall not be penalized on account of school construction con-

tracts made after that date; to the Committee on Education and Labor.

H. R. 4312. A bill to amend the District of Columbia Unemployment Compensation Act, as amended; to the Committee on the District of Columbia.

By Mr. MILLER of New York:

H. R. 4313. A bill to encourage the prevention of air and water pollution by allowing the cost of treatment works for the abatement of air and stream pollution to be amortized at an accelerated rate for income-tax purposes; to the Committee on Ways and Means.

By Mr. REES of Kansas:

H. R. 4314. A bill to provide certain benefits for persons who served in the Armed Forces of the United States in Mexico or on its borders during the period beginning December 8, 1910, and ending April 6, 1917, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. STAGGERS:

H. R. 4315. A bill to provide grants to municipalities in those States which are parties to the Ohio River Valley sanitation compact to aid in the construction of sewage treatment works to prevent pollution of waters in the Ohio River Basin and tributaries, such as Monongahela River and others; to the Committee on Public Works.

By Mr. THOMPSON of New Jersey:

H. R. 4316. A bill relating to the rendition of musical compositions on coin-operated machines; to the Committee on the Judiciary.

By Mr. WESTLAND:

H. R. 4317. A bill to amend section 631 of title 28, United States Code, so as to provide that National Park Commissioners shall be appointed upon recommendation of the Secretary of the Interior; to the Committee on the Judiciary.

By Mr. PRIEST:

H. J. Res. 230. Joint resolution providing for an objective, thorough, and nationwide analysis and reevaluation of the human and economic problems of mental illness, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. RODINO:

H. J. Res. 231. Joint resolution to proclaim a National Better Material Handling and Packaging Week; to the Commitee on the Judiciary.

By Mr. GREEN of Pennsylvania:

H. Con. Res. 86. Concurrent resolution extending the congratulations of Congress with respect to the celebration of the Jewish tercentenary in America; to the Committee on the Judiciary.

By Mr. BARDEN:

H. Res. 154. Resolution to authorize the Committee on Education and Labor to conduct studies and investigations relating to matters coming within the jurisdiction of such committee under rule XI, clause 6, of the Rules of the House of Representatives; to the Committee on Rules.

H. Res. 155. Resolution to provide funds for the studies and investigations to be conducted pursuant to House Resolution 154; to the Committee on House Administration.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

By Mr. HESELTON: Resolutions of the House of Representatives, Commonwealth of Massachusetts, memorializing Congress against passing legislation reducing tariff rates on textile imports from foreign countries; to the Committee on Ways and Means.

Also, resolutions of the House of Representatives of the General Court of the Commonwealth of Massachusetts memorializing the Congress of the United States against the enactment of legislation lowering the tariffs on the importation of rubber products; to the Committee on Ways and Means.

By Mr. PRESTON: Memorial of the State Legislature of the State of Georgia memorializing the Congress of the United States to call a convention for the purpose of considering an amendment to the Constitution of the United States relative to the administration by the several States of their respecive school systems; to the Committee on the Judiciary.

By Mr. WICKERSHAM: Concurrent resolution of the House of Representatives of the State of Oklahoma, the Senate of the State of Oklahoma concurring therein, memorializing the Congress of the United States to enact necessary legislation giving aid to certain farmers of the State of Oklahoma; to the Committee on Agriculture.

Also, concurrent resolution of the 25th Legislature of the State of Oklahoma relating to cotton-acreage control, memorializing the President and the Congress of the United States to pass suitable legislation increasing present cotton-acreage allotments and establishing a long-range cotton-acreage program; to the Committee on Agriculture.

Also, concurrent resolution of the House of Representatives of the State of Oklahoma, the Senate concurring therein, relating to the importing of crude oil from foreign countries, memorializing the President and the Congress of the United States to enact suitable legislation to curb the imports of crude oil from foreign countries; to the Committee on Ways and Means.

By the SPEAKER: Memorial of the Legislature of the State of Massachusetts memorializing the President and the Congress of the United States against passing legislation reducing tariff rates on textile imports from foreign countries; to the Committee on Ways and Means.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ABERNETHY:

H. R. 4318. A bill for the relief of certain dependents of the late James Anderson O'Donnell, lieutenant (junior grade), United States Naval Reserve; to the Committee on the Judiciary.

By Mr. BOSCH:

H. R. 4319. A bill for the relief of Samuel Turteltaub, Mrs. Lotta Turteltaub, and Adam Turteltaub; to the Committee on the Judiciary.

H. R. 4320. A bill for the relief of Guerdon Plumley; to the Committee on the Judiciary.

By Mrs. BUCHANAN:

H. R. 4321. A bill for the relief of C. J. Pobojeski; to the Committee on the Judiciary.

By Mr. CURTIS of Massachusetts:

H. R. 4322. A bill for the relief of Robert A. Saar; to the Committee on the Judiciary.

By Mr. CURTIS of Missouri:

H. R. 4323. A bill for the relief of Sumiko Takae; to the Committee on the Judiciary.

By Mr. DAVIS of Georgia:

H. R. 4324. A bill for the relief of Mrs. Lyman C. Murphey; to the Committee on the Judiciary.

By Mr. DELANEY:

H. R. 4325. A bill for the relief of Gen. and Mrs. Yeh Nan; to the Committee on the Judiciary.

H. R. 4326. A bill for the relief of Regina Dippold; to the Committee on the Judiciary.

H. R. 4327. A bill for the relief of Lelas Constantinos Tsamopoulos; to the Committee on the Judiciary.

By Mr. DEMPSEY:

H. R. 4328. A bill conferring jurisdiction upon the United States District Court for the District of New Mexico, to hear, determine, and render judgment upon certain claims arising as a result of the construction by the United States of Elephant Butte Dam on the Rio Grande; to the Committee on the Judiciary.

By Mr. DIGGS:

H. R. 4329. A bill for the relief of Angelo Rapa; to the Committee on the Judiciary.

H. R. 4330. A bill for the relief of Joe Camilleri; to the Committee on the Judiciary.

H. R. 4331. A bill for the relief of Andreau Vincent Joseph Fava; to the Committee on the Judiciary.

H. R. 4332. A bill for the relief of John Micallef; to the Committee on the Judiciary.

H. R. 4333. A bill for the relief of John Grech; to the Committee on the Judiciary.

H. R. 4334. A bill for the relief of Doris Vella; to the Committee on the Judiciary.

By Mr. FASCELL:

H. R. 4335. A bill for the relief of Otto Arild Sletta; to the Committee on the Judiciary.

By Mr. FOUNTAIN:

H. R. 4336. A bill for the relief of Z. A. Hardee; to the Committee on the Judiciary.

By Mr. GENTRY:

H. R. 4337. A bill for the relief of Francesca DeStefano; to the Committee on the Judiciary.

By Mr. JARMAN:

H. R. 4338. A bill for the relief of Elfriede Kienappel; to the Committee on the Judiciary.

By Mr. KEOGH:

H. R. 4339. A bill for the relief of Maria P. Morra; to the Committee on the Judiciary.

By Mr. LIPSCOMB:

H. R. 4340. A bill for the relief of Guiseppe Fissore; to the Committee on the Judiciary.

H. R. 4341. A bill for the relief of Leopold Danihel; to the Committee on the Judiciary.

By Mr. McMILLAN:

H. R. 4342. A bill to direct the Secretary of Agriculture to release on behalf of the United States conditions in two deeds conveying certain submarginal lands to Clemson Agricultural College of South Carolina so as to permit such college, subject to certain conditions, to sell, lease, or otherwise dispose of such lands; to the Committee on Agriculture.

By Mr. MORANO:

H. R. 4343. A bill for the relief of Edward Constantine; to the Committee on the Judiciary.

By Mr. MORRISON:

H. R. 4344. A bill for the relief of Eno Picou; to the Committee on the Judiciary.

By Mr. O'BRIEN of New York:

H. R. 4345. A bill for the relief of Manhattan Lighting Equipment Co., Inc.; to the Committee on the Judiciary.

By Mr. POWELL:

H. R. 4346. A bill for the relief of Rosario Troia; to the Committee on the Judiciary.

By Mr. RILEY:

H. R. 4347. A bill to direct the Secretary of Agriculture to release on behalf of the United States conditions in two deeds conveying certain submarginal lands to Clemson Agricultural College of South Carolina so as to permit such college, subject to certain conditions, to sell, lease, or otherwise dispose of such lands; to the Committee on Agriculture.

By Mr. ROGERS of Colorado:

H. R. 4348. A bill for the relief of Toshiko Higuchi; to the Committee on the Judiciary.

H. R. 4349. A bill for the relief of Lucito G. Gamboa; to the Committee on the Judiciary.

By Mr. ROOSEVELT:

H. R. 4350. A bill for the relief of Albert Shanfield; to the Committee on the Judiciary.

By Mr. SADLAK:

H. R. 4351. A bill for the relief of Stanley John Rybezyk; to the Committee on the Judiciary.

By Mr. SHEPPARD:

H. R. 4352. A bill for the relief of Robert Julius MacGavin and family; to the Committee on the Judiciary.

By Mr. THOMAS:

H. R. 4353. A bill for the relief of Chung Pang Ja and her minor child; to the Committee on the Judiciary.

By Mr. WEAVER:

H. R. 4354. A bill for the relief of Anna Ilona Purins; to the Committee on the Judiciary.

By Mr. WILLIAMS of New York:

H. R. 4355. A bill for the relief of Cheddid El Kharrat; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

116. By Mr. HALE: Petition of the Maine State legislative committee, Brotherhood of Railway and Steamship Clerks, protesting any legislation to modify or repeal Public Law 199, 82d Congress, which provided limitations on the weight and size of parcel-post packages; to the Committee on Post Office and Civil Service.

117. Also, petition of the Maine State legislative committee, Brotherhood of Railway and Steamship Clerks, protesting the diversion of mail transportation to trucks and airplanes when adequate rail facilities exist; to the Committee on Post Office and Civil Service.

118. By the SPEAKER: Petition of the secretary, Tarrant County Medical Society, Fort Worth, Tex., with reference to going on record as opposing any infringement by the Veterans' Administration on the rights of the Industrial Accident Board of Texas; to the Committee on Veterans' Affairs.

119. Also, petition of Richard Bladel Mossman, Bettendorf, Iowa, requesting the appointment of a special joint committee to investigate the acts of attainder committed against him by the Government; to the Committee on Rules.

EXTENSIONS OF REMARKS

Personal Income-Tax Exemption of $800

EXTENSION OF REMARKS
OF
HON. PETER W. RODINO, JR.
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Wednesday, February 23, 1955

Mr. RODINO. Mr. Speaker, about this time of year some 60 million taxpayers are struggling over the preparation of their income-tax returns. This mental struggle, coupled with the painful duty of paying the taxes, is not restricted to persons of large or even moderate incomes. It extends to persons of very low income as well. It is my conviction that the law is exacting tribute from millions of persons living far below what we like to think of as a fair standard. I believe that equity and economics both demand that the level of personal exemptions be raised to at least $800.

The tax on income has long been recognized as potentially the fairest tax in the whole lexicon of public finance. It is the one tax which lends itself to manageable progressivity, and measures out its burdens according to the financial capacity of those upon whom its burdens fall. But the Congress has pushed the application of the tax too far. The law now lays a heavy hand on the poor and economically depressed. Reason protests this anomaly. Here we have in the income tax the most perfect tool for distributing burdens according to ability to pay, yet, as it were, we take billions of dollars out of the hides of millions who lack any real taxpaying ability. When personal exemptions under an income tax are so low that the burden of the tax falls on persons whose incomes are below a level capable of supporting a minimum standard of living, then the tax ceases to be levied in accordance with ability to pay.

Economists and sociologists have figured out what is the minimum that any individual or family can receive and still maintain a reasonable living standard compatible with American concepts. These minimums give recognition to the requirements of health, education, decent housing, clean living, an opportunity to share in a minimum of the good things of life. Certainly the Congress, even if it does not guarantee such a minimum, should not deliberately lower the standard of those who already are sub-par. Yet that is exactly what the Congress does when it exacts a toll from the person whose income barely exceeds $600.

The Congress has not always been so niggardly. Except for a single year, Federal personal-income-tax exemptions, measured in terms of buying power, are lower today than they have ever been in the past. When the income tax was first enacted in 1913, a family of 4 was entitled to an exemption of $4,000. In terms of the buying power of depreciated 1955 dollars, that was the equivalent of about $11,000. But actually today, a family of 4 enjoys an exemption of only $2,400. In 1931, the legal exemption was $4,300. This had a purchasing power of around $7,600. Even in 1944, when World War II was at its height, the exemption had a purchasing power in excess of 3,000 of our 1955 dollars. But today, as I said, the exemption is only $2,400. This is at least 50 percent and more below what is held out as being necessary to provide a minimum American standard of living. And every dollar exacted in income tax from persons below that minimum drives them one rung farther down on the economic ladder. My point is: If we cannot help to raise up these poor, the least we can do is to refrain from pushing them farther down.

If we raise the exemption to $800, we will reduce the tax of everybody, and at the same time—and this is the most important thing—abolish the tax on 13.2 million taxpayers with very low incomes. This will give relief not only to these taxpayers, but also it will reduce the tax compliance burdens of thousands of employers who now have to withhold for these low-income taxpayers. Removing some 13 million taxpayers from the rolls will also greatly reduce the administrative burdens and costs of the Internal Revenue Service and permit that agency to apply its personnel in much more constructive and revenue-producing work.

There are those who support tax relief for the wealthy but oppose tax relief for those at lower levels. They protest against removing anyone from the tax rolls. Everybody should pay their fair share, they say. Nobody should be exempt. Happily there are those who read statistics differently, and have a different concept of what is fair. I cannot understand how ordinarily intelligent well-thinking men can argue the justice of all levels of government in the United States taking in taxes more than one-fourth of the income of families with incomes below $1,000, $2,000, $3,000, or even $4,000. Yet that is what the statistics show. To repeat so there will not be any misunderstanding, the combined Federal, State, and local tax burdens on families with incomes of $1,000, $2,000, $3,000, or $4,000 exceed 25 percent of their income. To be sure, much of this burden comes from excise and property taxes, but the Federal Government in taxing their incomes also adds to the burden. It is at least this added burden that I insist should be removed.

I consider all that I have just said to be of great importance, but I have not yet reached what to me is one of the most important economic consequences of increasing personal exemptions. Increasing the personal exemption by $200 will reduce the tax burden of persons in the lowest bracket by a maximum of $160 for a family of four. With taxes reduced, take-home pay will be increased. But much more important is the fact that the tax savings of all these taxpayers will add about $4.5 billion in purchasing power, principally of persons in the low-income brackets. They will spend this money for clothing, better housing, more adequate food, refrigerators, automobiles, and the thousand and one items and services that consumers buy. But the net effect on the Nation's economy will be much greater than simply an increase in retail sales by $4.5 billion. This increased spending will result in higher business profits, higher tax revenues for the Federal Treasury, and greater employment for all. Recognized economists in the country estimate that increased purchasing power of $4.5 billion could raise aggregate income by perhaps double that amount when secondary or induced effects are taken into account.

We should remember that many workers are being displaced each year through technological improvements. We cannot and should not try to fight this. Hundreds of thousands of new workers are also moving into the labor market each year. We certainly cannot fight this. But we must ever be on guard to prevent developing unemployment. I

caution that 3 million unemployed—the approximate figure today—is not to be viewed with complete disinterest and unconcern. I point out, too, that the average period of unemployment toward the end of last year was nearly 13 weeks. We can only view this with the greatest seriousness.

There are those in the United States who seem to think that the way to promote prosperity is to maintain an economic system and policy which favors business, the great corporation, the wealthy stockholder. Their thought is that some of the benefits accruing to these groups will trickle down to the mass of workers and consumers. It is thinking such as this which dominated the enactment of the 1954 tax law. It seems to me to be far more logical to assure a continued prosperity by increasing consumer purchasing power. With increased purchasing power will come increased demand. Investment, production, and sales will rise, and these in turn will promote more investment, more jobs, continued prosperity. Congress should be ever alert to do all that is necessary to prevent economic depression. But the Congress must also realize that one consequence of concentrating incomes in a relatively few hands is a reduction of consumer buying power. Depressions have been born and will continue to be born so long as the mass of the population have a purchasing power inadequate to buy our potential tremendous industrial output. The Congress must realize that failure to give some relief to consumers from heavy tax burdens is depression creating. The 84th Congress has an opportunity to enact an economically sound, and equitably just, tax measure. An increase in personal exemptions to $800 is just such a measure, and I call upon the Congress to act favorably and speedily thereon.

H. R. 1

EXTENSION OF REMARKS
OF
HON. ORVIN B. FJARE
OF MONTANA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, February 23, 1955

Mr. FJARE. Mr. Speaker, under leave to extend my remarks by way of explanation of my vote against H. R. 1, I am concerned with the protection of America's industrial and agricultural production. During the past 20 years we have seen a tremendous reduction in our tariff barriers, and abnormal world conditions have been such as to make it difficult to assess the full effect of these changes in our tariff structure on our national economy. It is safe to say that the United States is no longer one of the high tariff nations. Our tariffs are now at their lowest point in history, and average only about 5.1 percent of the value of imports. In addition, it is to be considered that actually our tariffs affect less than one-third of our total imports.

There are many factors that affect free trade between the nations of the world. Import quotas, currency restrictions, monopolies, government trading, cartels, and other devices are far tighter barriers to free trade than tariffs. The United States actually permits freer trade than any other industrialized country in the world, because, except with respect to quotas on agricultural products subject to price supports, it does not engage in these practices. The use of such devices by other nations has increased markedly during the past 20 years.

It is my feeling that a sound, stable, and prosperous economy in the United States is the world's greatest hope at this time. The theory that the United States should import those things that can be produced more cheaply abroad and emphasize production of those things which we ourselves can produce more cheaply is not true under present world conditions. We need a broad base of all industries for our Nation's economic strength, and some segments of our economy have to be protected to insure that condition.

Our Government is great because it is composed of a system of checks and balances and I believe that the escape-clause provisions should be strengthened and implemented toward that end. In addition, I feel that H. R. 1 was too great a departure from the time-proven basic American concept that we should have a Government of law and not a Government of men.

Roslyn News Celebrates 75th Birthday—Second Oldest Weekly on Long Island

EXTENSION OF REMARKS
OF
HON. STEVEN B. DEROUNIAN
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, February 23, 1955

Mr. DEROUNIAN. Mr. Speaker, I am delighted to join in congratulating the Roslyn News on its 75th birthday today. The American weekly newspaper, as I have stated previously, is as American as the Constitution of the United States and has contributed much to our progress since the birth of this great Nation. I am proud to claim the Roslyn News as one of my constituent newspapers and I am pleased to present its history.

February 23 marks the diamond jubilee for the Roslyn News of Roslyn, N. Y.

Three-quarters of a century of publication is a long time and in the space of those 75 years many changes have come to both the paper and the area it serves.

The first issue of the paper was published late in the nineteenth century by Pier Keeler and his brother in a small print shop on a winding country lane, now Main Street. They called their paper the Tablet, and since the town had but a handful of residents that, too, was the size of the paper's circulation.

One of the town's early visitors was George Washington, one of its best remembered sons, the poet, William Cullen Bryant. Through the years the sleepy village has changed to a smart and beautiful residential area on Long Island's famous North Shore, but it still houses famous artists, writers—Christopher Morley—television and theatrical celebrities.

A year after the Keelers started their paper, they sold it to William R. Burling who changed its name to the one it now bears. After him there were several other owners who struggled to make a small village weekly pay for itself. One of these was Maj. George M. Robertson, Roosevelt Raceway official and winner of the famous Vanderbilt Cup in 1908.

Today, instead of measuring its readers on the fingers of both hands, the Roslyn News can point with pride to a wide readership in an area that covers Roslyn, Roslyn Heights, Roslyn Harbor, Roslyn Estates, Greenvale, East Hills, Glen Head, Albertson, Williston, and Williston Park.

The Roslyn News is a part of the Griscom Publications, Inc., which consists of seven important Long Island weeklies.

In 1933, the Roslyn News, together with the Great Neck Record and the Oyster Bay Enterprise and Pilot were acquired by Bronson W. Griscom, of Syosset, and Barklie Henry, of Wheatley Hills, to form the Township Press. Two years later, in April 1936, the Township Press had grown to be a chain of nine papers and it then merged with the Woodyard Publications of New York—publishers of seven weekly papers—to form the Griscom-Woodyard Publications, Inc.

Later, Bronson W. Griscom formed the Griscom Publications, Inc., which has been responsible for the publication and growth as a community force of the Roslyn News.

In October 1954 the Roslyn News, under the editorial leadership of James J. Tuite, went into the tabloid format, a move which was hailed by local residents as giving the paper easier readability and a new freshness. Under Mr. Tuite's guidance, the Roslyn News has increased its circulation almost 50 percent.

In celebration of its anniversary, the Roslyn News is planning to move next month into modern and larger offices located at 45 Lincoln Avenue, Roslyn Heights.

The staff of the Roslyn News includes, in addition to editor, James J. Tuite; Harry V. Forgeron as advertising manager; Mrs. Esther T. Jacobs, associate editor; and Mrs. Anne Schlansky, circulation manager.

The Late Pete Jarman

EXTENSION OF REMARKS
OF
HON. KARL M. LeCOMPTE
OF IOWA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, February 23, 1955

Mr. LeCOMPTE. Mr. Speaker, I take this opportunity to express my appreciation of the life and services of the late Pete Jarman.

The untimely death of Hon. Pete Jarman, of Alabama, a former distinguished and very useful Member of this House, brought very great sadness to me, and my heart aches for his charming wife. Mr. Jarman was a Member of Congress and was serving with distinction on the Foreign Affairs Committee when I came in January of 1939. He continued to serve his constituents and the country as a whole for a number of years, gaining in statute each year. After his retirement from the House he was appointed Ambassador to the Commonwealth of Australia where he represented our Government at Canberra in this far-away, but relatively new country. In that capacity he gave his best efforts at all times, and he continued in this capacity until 1953.

In 1951 I was a member of a delegation sent by Congress to Australia to help in the observance of 50 years of free government in Australia, and it was my opportunity to learn at first hand about the outstanding service performed by Mr. Jarman. He was respected by the government officials of Australia and by the representatives of other nations at the Australian capital. Our country gained in prestige as a result of his constructive work.

Mr. Jarman died years too soon, but he left an indelible impression on our foreign service, and in all this his charming wife was an active and splendid participant.

A Tribute to Youth

EXTENSION OF REMARKS

OF

HON. ALBERT P. MORANO

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1955

Mr. MORANO. Mr. Speaker, under leave to extend my remarks in the RECORD, I wish to include a tribute to three fine young people from my district who have been honored by the Westinghouse Co. for outstanding achievement in the field of science.

All the people of Fairfield County, Conn., which comprises my district, are proud of the fact that one of 40 winners of the nationwide Science Talent Search, conducted by the Westinghouse Electric Corp., three of these gifted students are from the Fourth District.

This is the 12th year that Westinghouse has carried on this search for scientific ability, a program which has done and will do a large part in helping the United States to maintain its leadership in the field of research. Such a program is indeed both patriotic and beneficial not only for those immediately concerned but also for the security of the United States.

It is a distinct privilege therefore for me to pay tribute on behalf of the people of my district to Edward J. Foster, of Bethel, and Robert A. Buccino, of Stratford, both students of Fairfield Preparatory School and to Miss Alice K. Hartley, of Easton, a senior in Bassick High School, Bridgeport.

These three young people are coming here to Washington to compete for Westinghouse scholarships that may carry them on to even greater achievements in the scientific world.

Young Foster, who hopes to enter MIT, has constructed an oscilloscope, an instrument for showing visually on the face of a cathode ray tube the changes in varying electric current, an instrument he uses in his self-operated radio-TV repair business. Miss Hartley, who aims for Radcliffe College, has carried on unique experiments with vegetables to determine changes in color as the result of immersion in solutions of varying acidity. Young Buccino, who plans to begin his medical studies at Holy Cross College, has built and used a spectrophotometer, used to identify the different elements in a metallic compound by the light given off by their vapors when heated to incandescence.

Their selection among the 40 winners nationally is a tribute to the educational system in my State, especially the teaching of science as carried on by the good Jesuit fathers in Fairfield and by the Bridgeport high school system.

These three young people should be an inspiration to all of us because of their desire for greater knowledge and because of their ingenuity and demonstrated abilities. In the vision and determination of our young people, in their faithfulness to hard work, in their sense of responsibility, in these qualities lies the best hope of the free world. I shall be happy to greet these three young students and to wish them well at a crucial time in their lives. I express the fervent hope that they will continue to succeed in the fields for which they are so well qualified.

Freedom Message to People Behind the Iron Curtain

EXTENSION OF REMARKS

OF

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1955

Mr. RODINO. Mr. Speaker, one of the principal aims of our post-World War II foreign policy is to gain and hold the confidence of all freedom-loving peoples in our unrelenting struggle against totalitarianism. In this global battle in defense of our beliefs and ideals we need to have all believers in democracy closely united spiritually and morally to our cause. We and our friends and allies are convinced that the cause for which we are prepared to fight with all our might is the cause of humanity; it is the sacred cause of all free men. On that issue there is and should be no question in our mind. There can be no doubts or uncertainties. For when one is girding himself for a bloody battle, he must have no misgivings about the righteousness of his cause.

Today in our struggle against totalitarian communism, that fearsome and godless doctrine whose fanatical adherents have already enslaved almost one-third of the world's population, not only should we help all free peoples, but we should also seek ways of encouraging and inspiring those unfortunate millions in Communist-dominated countries who are being held in servitude against their will.

In this connection our principal task should be to keep alive the spirit of freedom in those peoples. Next to actual liberation, the best thing we can do, and I am sure we can do it effectivley is, to inspire them with confidence and instill in them some hope, to show them some gleam of light, something indicating that they have friends and sympathizers in the free world who are seriously concerned with their fate. That is the purpose for which the Voice of America has been working, an endeavor which our taxpaying citizens are gladly supporting. The broadcasts sponsored by the free Europe group have similar ends in view. These broadcasts have done a good job in enlisting more friends for the cause of democracy. However, radio broadcasts have certain limitations. Many people in the Communist-dominated countries do not have radios, and furthermore radio broadcasts can be jammed. Consequently, alternative methods of reaching the people of Eastern Europe are required. One very effective method of dealing with the situation is by distributing leaflets with freedom messages to Iron Curtain countries by balloons. Of course, there is nothing novel in this suggestion. It has been tried on various occasions in the course of the past several years and has proved to be quite effective. In the resolution—House Joint Resolution 76—which I recently introduced, it is proposed to regularize this system, and thus make it more effective. This resolution also suggests an additional measure. It proposes that not only freedom messages but also food packages be dropped over Iron Curtain countries by balloons. This should prove far more effective than the leaflets alone. Our experience with distributing food parcels in Berlin has demonstrated that this type of psychological weapon has a powerful impact. If we should now use it in conjunction with freedom messages, it would not only give added force to those messages and help to convince the recipients of our sincerity, but the food might also help save many victims of Communist tyranny from starvation.

In view of our past experience, this idea of sending our freedom messages and food packages to Iron Curtain countries by balloons is certainly worth trying. As has been stated in the proposed resolution, the food for this purpose is to come out of our surplus agricultural commodities. The administration of the whole scheme under the Secretary of State, would cost no more than $2 million. It would be one of the cheapest and most effective methods of winning deserving and worthy friends behind the Iron Curtain for the cause of humanity and for free democracy. I sincerely suggest that we try it.

Five Proposals To Amend the Refugee Relief Act

EXTENSION OF REMARKS
OF

HON. VICTOR L. ANFUSO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1955

Mr. ANFUSO. Mr. Speaker, there is unquestionably widespread dissatisfaction and no small degree of disappointment concerning the operation of the refugee relief program. Enacted just about 18 months ago—August 7, 1953, to be exact—this law authorized the admission of 214,000 aliens to become permanent residents of the United States by the end of 1956, with preference being given to refugees, expellees, escapees from Iron Curtain countries, and certain close relatives of American citizens.

After 18 months, what are the results?

Mr. Speaker, I regret to say that the results to date of this refugee relief program are very meager, indeed. Here are the latest available official figures:

Number of visas issued, 18,936—as of January 28, 1955.

Number of refugees admitted, 15,034—as of January 28, 1955.

Such is the dismal result of this program after about half of its effective period has elapsed. It is clear by now that the goal of 214,000 refugees to be admitted will never be reached in the time specified. While I dislike to speculate on the number finally to gain entry under this program, it does not seem to me that we will even fulfill half the program by the time it expires.

Such was not the intention of Congress when it enacted the refugee relief program in 1953. When Congress set a figure of 214,000 to be admitted over a 3-year period, it was done so in the belief that this goal could be reached. Unfortunately, certain sections of the act and administrative interpretations have made the law unworkable and the whole program has become a travesty.

Mr. Speaker, I do not see eye to eye with Judge FRANCIS WALTER, the distinguished gentleman from Pennsylvania, on matters of immigration. Yet even Judge WALTER, who is opposed to liberalized immigration, recently stated in a public address:

> I consider the Refugee Relief Act of 1953 a fraud and a phony.

He also referred to it as an example of sloppy legislation, an ill-conceived and half-baked proposal, and an unworkable law. And he is so right about it.

There is also tremendous dissatisfaction among church groups and voluntary agencies which are active in obtaining housing and employment assurances for the aliens and helping them to meet other requirements of the law. In fact, some of them are considering giving up their programs because of the great difficulties involved. On January 30, 1955, the Washington Post and Times Herald published an Associated Press report from New York which stated that church agencies were on the verge of junking huge programs for bringing refugees to this country because they could not get them through the redtape. The report then added:

> So far, church officials said, the requirements for admission of refugees have been so complicated that only a mere trickle have gotten through the maze of checks and doublechecks.

By way of example, the report cited the meager accomplishments of these church groups due to the complications of the act:

> Up to the end of 1954, Church World Service had 115 refugee arrivals. The Roman Catholic War Relief Service reported 147, the Jewish United Hias Service about 50, and the Lutheran Service 9.
>
> This would be less than 500 refugees brought here in the act's first 18 months. In comparison, under the old Displaced Persons Act whose terms were less restrictive, 114,494 DP's were resettled in the first 18 months.

Mr. Speaker, the Refugee Relief Act of 1953 needs to be amended drastically, and it needs to be done as soon as possible while there is still sufficient time to complete the program sucessfully. Each month, each week that we wait will mean the loss of thousands of visas going to waste when the program ends in 1956.

Consequently, I am now introducing a bill containing five important amendments to the act which, I feel certain, will speed up the flow of refugees in the short time that is left and will make possible the successful completion of this program.

The five changes recommended in my bill are the following:

First. Age limit for admittance of orphans: Under the Refugee Relief Act of 1953 a total of 4,000 orphans are permitted to enter the country as nonquota immigrants, but they must be under 10 years of age. Because of the age limitation and other difficulties, less than 500 orphans have gained admittance to date. I, therefore, propose to raise the age limitation to 14 years. This should make possible the successful completion of this part of the program.

Second. Elimination of employment and housing assurances: It is generally admitted by all concerned, including State Department and immigration officials, that the greatest factor in delaying the flow of immigrants under the refugee relief program is the requirement that certain assurances must be submitted in behalf of an alien before he is granted a visa. Section 7 (a) of the Refugee Relief Act provides that three assurances must be given by an American citizen on behalf of the alien seeking a visa:

(a) That the alien will have suitable employment without displacing some other person from employment;

(b) That the alien will have housing without displacing some other person from such housing; and

(c) That the alien will not become a public charge.

I propose to eliminate the employment and housing assurances and to leave only the requirement that the alien is not to become a public charge. The housing shortage has eased up considerably in the country and is no longer as acute as a few years ago. Employment, too, is holding up in recent months and the general economic situation does not appear to be threatening. There is no need to retain these requirements in the law. By eliminating them it will be possible to increase greatly the entry of immigrants under the refugee program.

Third. Elimination of readmission guaranties: Another factor contributing to the slowness of the refugee-relief program is the requirement that an alien must present an unexpired passport or other suitable travel document and a certificate of readmission from the country where he obtained the visa guaranteeing he will be readmitted to that country in the event he is later found to be deportable from the United States. This has been a real bone of contention and aroused much dissatisfaction and protests from a number of European countries. I propose that this section be eliminated from the act.

Fourth. Refugee relief commission: Under the present act, the refugee-relief program is administered by the Bureau of Security and Consular Affairs of the Department of State. There has been considerable criticism of the Administrator of this Bureau, Mr. Scott McLeod, for the manner in which he is administering the whole program, his rigid interpretations of the act, and his general approach to the problem.

I propose to take this program out of the Department of State and set it up as a separate and independent Government agency to be known as the Refugee Relief Commission. The commission is to consist of three members, appointed by the President, each of whom shall receive a salary of $17,500 annually. The commission shall formulate regulations in compliance with the Refugee Relief Act, and it shall report annually to the President and to Congress on the operations of the program. This commission and its operations would be similar to that of the Displaced Persons Commission which administered the Displaced Persons Act of 1948 with such success.

Fifth. Termination of the act: The termination date of the refugee-relief program has been set for December 31, 1956, after which no visas are to be issued under this program. In view of the small number of visas issued under the act to date and the fact that nearly half of the time has already expired, it is generally conceded that the program's goal of 214,000 immigrants, as envisioned by Congress originally, will not be reached by the end of 1956.

Therefore, I propose that all visas authorized under the Refugee Relief Act which remain unissued after December 31, 1956, shall be redistributed proportionately among the countries and categories established in the act, and that these visas be issued only to relatives of American citizens. I further propose that the time be extended for the issuance of the unused visas for a period of 1 year until December 31, 1957.

My purpose for extending the termination date is twofold: First, so that more time is allotted for the unification

of families; second, so that as many of the unused visas be utilized in the extra time allotted. The unification of families has always been a traditional and humane principle with the American people. The extra time allotted is to make up for the slow start of the program in setting up its administrative machinery, which is another factor in the delay of entries until now.

CONCLUSION

Mr. Speaker, I feel reasonably certain that if these amendments are enacted the Refugee Relief Act of 1953 will be administered in the spirit in which Congress intended it to be administered. I also feel certain that these amendments will enable the program to be successfully completed and the full goal of 214,000 immigrants to be reached.

We must correct the early errors committed under this program, particularly the lapse of valuable time and the unnecessary requirements for housing and employment assurances. Let us consider the people who stand to benefit from these changes, the very people for whom the whole program was initiated. I mean the relatives who desire to join their families in this country and cannot do so because the regular immigration quotas in their countries are oversubscribed, the refugees and the escapees who are the victims of religious and political persecution.

I call upon all my colleagues to support these changes. The Refugee Relief Act of 1953 was overwhelmingly supported by both parties. Let us amend it so that the Congress and the people of America will be proud of this act and its accomplishments, instead of regarding it as a fraud and a phony. Let us make it a workable act.

Ukrainian Independence

EXTENSION OF REMARKS
OF
HON. MELVIN PRICE
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Wednesday, February 23, 1955

Mr. PRICE. Mr. Speaker, it is a privilege to pay tribute to thousands of Americans of Ukrainian descent who this year celebrated the 37th anniversary of Ukrainian independence on January 22. Their fervor for liberation of their homeland parallels the faith of all freedom-loving people in the hope that all enslaved nations under the Communist yoke will regain their self-determination.

The Ukraine enjoyed independence a short time before Communist domination placed them behind the Iron Curtain in 1920. However, their hopes for return to self-determination have not waned. It is important that our Voice of America continue to reach them to bolster that hope.

It is appropriate that we reaffirm our strong faith in the aspirations of the Ukrainian people who yearn for independence from totalitarian subjugation. On the occasion of the celebration of the anniversary of Ukrainian independence, all Americans joined in fervent prayer that the Ukraine and all other captive homelands will soon be free again.

New 50-Star Flag Designed by Orpha Klinker, Noted California Artist

EXTENSION OF REMARKS
OF
HON. GORDON L. McDONOUGH
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, February 23, 1955

Mr. McDONOUGH. Mr. Speaker, now that statehood for Hawaii and Alaska is a definite possibility, it is appropriate to give some advance consideration to the necessary change in the design of our flag which must be made when statehood is granted.

Too often while much time is given to the deliberation on the question of so vital an issue as statehood for a Territory, little attention is given to the necessary flag changes until statehood is granted and an immediate change is necessary so that our flag will carry the white star to represent the new State on the field of blue, which represents the whole of our Union.

Miss Orpha Klinker, of Los Angeles, Calif., one of our outstanding artists whose paintings have been exhibited in public and private showings, has become interested in probable change in our flag design, and has developed one of the most appropriate suggestions, in my opinion, to be submitted for consideration since the original design was completed by Betsy Ross.

Miss Klinker is a native daughter of the Golden State of California, from one of the first families of the State. She is established as an artist of great creative ability, and is especially noted for her portrait and landscape paintings.

She is also the creator of a series of paintings of historical events and sites depicting the history of the State of California. Among her famous works is her painting of The Four Freedoms in which freedom of religion, freedom of the press, freedom from want, and freedom to petition the Government of the United States are represented.

Miss Klinker has conceived a new and unique design of the American flag which includes two additional white stars on the blue field to represent Hawaii and Alaska, when they are admitted as new States in the Union.

The total of 50 white stars are arranged on the blue field to spell the word "Freedom." Nothing else in the design of our flag is changed.

I have seen the design and it is very inspiring, patriotic, and carries a message to the world of the precious freedom the people of the United States enjoy under the United States Constitution and the Government of the United States.

In my opinion, Miss Klinker's design adds beauty and additional interest to the flag of the United States, and it has already been submitted to the Heraldic Branch of the Department of Defense for consideration with any other new designs proposed for the flag when Hawaii and Alaska are admitted to the Union.

The proposed freedom design is most appropriate because the flag of the United States of America is an emblem which stands for freedom from oppression to people of every other land on earth. It represents a Nation where there is equal opportunity for every citizen, where there is complete freedom of religion, where a free press can publish the truth to the people uncensored by Government dictatorship.

We seldom hear of a citizen of the United States renouncing his native land and leaving America to take up citizenship in some foreign land.

But millions upon millions of people from all other parts of the world are constantly seeking admission to the United States, eagerly awaiting the day when they can leave their native lands to come to America where they may enjoy the benefits found nowhere else in the world.

The United States has established in the world a unique experiment in human relations. Here under the Stars and Stripes, the American people established a nation dedicated to the individual liberty of every citizen. This is a far cry from many other parts of the world where men for generations have been ruled by monarchs or dictators, and have never known true freedom.

Today it is of vital importance, if we are to preserve our Nation and our American way of life, that our citizens be aware of the blessings that are our heritage, and that we realize that only through constant vigilance can we maintain the freedoms which were guaranteed to us by our Constitution and Bill of Rights when the United States was founded.

Our flag is the symbol of all that America represents, of the opportunity offered to us in this Nation, of the wealth of our land which supplies our food and daily needs, of the freedom which makes each man the master of his own destiny.

On June 14, 1777, the Continental Congress adopted a resolution which stated that "the flag of the 13 United States shall be of 13 stripes of alternate red and white, with a union of 13 stars of white in a blue field representing the new constellation." This resolution was promulgated by the Secretary of the Congress on September 3, 1777.

Since that date the Stars and Stripes has proudly flown as the official emblem of our great Nation. It was first carried into battle in the Battle of the Brandywine on September 11, 1777, and has gone with our troops into every battle since that day on land, on sea, and in the air, and from our own shores to the far corners of the earth.

Since that day in 1777 when the Stars and Stripes first unfurled as the emblem of our great Nation, the country has steadily expanded, and with each forward step new States have been admitted to the Union, each State a new star in the flag.

The rearrangement of the constellation on the field of blue has followed the admission of each new State, and now, once again the American frontier has expanded so that two more Territories clamor for admission to statehood.

They cannot be long denied, and again we must consider a change in the design of stars on the flag. The design created by Miss Klinker symbolizes the spirit of freedom which has ever represented the guiding principle of our American way of life, and when we again rearrange the stars of the flag, adoption of this design would truly represent within our flag the spirit of America.

Welcome to Premier Mario Scelba

EXTENSION OF REMARKS
OF
HON. PETER W. RODINO, JR.
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Wednesday, February 23, 1955

Mr. RODINO. Mr. Speaker, we are anticipating in March a visit to our city by the Premier of Italy, Mario Scelba. Premier Scelba comes to Washington at a time when the friendly spirit and cooperation between our two countries has reached an unprecedented level. We welcome this visit as an opportunity to pay honor to Premier Scelba—for in a short period as head of his country's Government, he has, indeed, won the respect and esteem of us all.

Scelba has been Premier a little more than a year—and in that short time he has guided his Government to notable achievements both at home and in its relations toward Italy's neighbors and allies. Scelba was De Gasperi's Minister of the Interior for 6 years; his experience in that office may be said to have prepared Scelba uniquely for the premiership. As Minister of the Interior for 6 years, Scelba became the scourge of Italy's strong Communist following. On becoming Premier, Scelba ejected the Communist organizations from many of the office buildings they had seized from former Fascist owners after World War II. He has forced their press to conform to libel and slander laws and has transferred many Communists out of sensitive positions in the civil service. He has also reduced Communist Party revenue from such sources as businesses run by Communists for profit. In numerous ways he has met the challenge of Communist subversion and infiltration by practical countermeasures.

Some of the other tasks being tackled by Scelba's government are—a public works program which it is hoped will alleviate Italy's unemployment; an impressive housing program; and new income tax enforcement laws. It is very difficult for the Premier to get such legislation passed in the Parliament, for Communists and fellow-travelers, who hold more than a third of the seats in Parliament, continuously sabotage and delay measures put forward by the center coalition which he heads.

In his government's foreign policy, Premier Scelba has inaugurated a new phase of trans-Adriatic cooperation. For 9 years the Trieste issue set Italians and Yugoslavs against each other and stirred bloody riots and demonstrations. In October of last year, the Italian-Yugoslav agreement returning the port city of Trieste to Italy and giving part of the Trieste territory to Yugoslavia, was signed. Since then Scelba has forthrightly held out the hand of friendship to the Yugoslavs and called for an end to the suspicions and recriminations that long poisoned relations between the two neighboring countries. This was a bold act on the part of Premier Scelba because it brought violent attacks from the extreme right and left in his own country. He has assumed the political risks, however, in order to show clearly his eagerness for peaceful cooperation with Italy's neighbors. The benefits of Rome-Belgrade cooperation extend far beyond the boundaries of the two countries. There have recently been reports that Italy may join the Balkan Entente which already unites Greece, Turkey, and Yugoslavia. Italy's adherence to this group would give the entente additional strength and would add Italy's 10 divisions to the approximately 60 of the 3 Balkan states.

Italy has recently signed the Paris Agreements which bring Italy and West Germany into the Brussels Pact. The Italian Chamber of Deputies has approved ratification of these agreements. This is but one more indication of the marked progress Italy has made in the last year, under the statesmanlike leadership of its Premier, Mario Scelba.

Next month as Premier Scelba visits our city—he may be assured of our high regard and of a very warm welcome.

Eleven-Year-Old Girl Gains Recognition for Work in Scientific Research

EXTENSION OF REMARKS
OF
HON. ARTHUR G. KLEIN
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, February 23, 1955

Mr. KLEIN. Mr. Speaker, Miss Lucy Ehrlich, of 100 Thayer Street, New York City, an 11-year-old girl, has recently been notified that her work in scientific research is worthy of recognition and accordingly she received a plaque for her remarkable collection of insects.

Lucy is the granddaughter of Mr. and Mrs. Leo Ehrlich, old and dear friends of mine, and both they and I are very proud of her.

I took it upon myself to write to this gifted youngster in congratulations and good wishes for her achievement, and in encouragement of her continued interest in science. I wrote to her as an indication of the recognition that I think is due to those young Americans who, by their devotion to science, are strengthening our country and contributing to a more informed world.

Anniversary of the Founding of Rotary

EXTENSION OF REMARKS
OF
HON. BARRY M. GOLDWATER
OF ARIZONA
IN THE SENATE OF THE UNITED STATES
Wednesday, February 23, 1955

Mr. GOLDWATER. Mr. President, last evening it was my pleasure and honor to address the Rotary Club of Muncie, Ind., on the occasion of the observance of the 50th anniversary of Rotary. I ask unanimous consent to have my remarks printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY HON. BARRY GOLDWATER, OF ARIZONA, BEFORE ROTARY CLUB, MUNCIE, IND., FEBRUARY 22, 1955

When you asked me to be with you tonight to help commemorate the 50th anniversary of the founding of Rotary, I was both honored and surprised. Honored because my friends in Muncie would want me for this important occasion—surprised because you would risk the perfection of the program by exposing it to the usually dull and overextended verbage associated with the office which I hold.

The feeling of honor, though, far outweighed that which bespoke of surprise and, being constantly aware of my debt to Muncie, I accepted. The source of that debt sits by my side tonight, as she has done constantly for the 21 years since she brightened the dull garden of my life by marrying me. The memories of her loving patience and high inspiration, her devotion to our children and her tolerance of the vicissitudes of being a politician's wife, make me look to the future with anticipation and with a knowledge that my debt to Muncie will forever remain an IOU, for it is not within either the material or the spiritual capacities of a man to repay to the full measure a debt of devotion such as the one I hold.

We are gathered here tonight to pay tribute to Rotary—not a tribute that would laud its many fine deeds, but a tribute to the lofty objectives of Rotary which have caused it to be what it is. We can pay homage, also, not so much to the men whose foresight patterned those objectives, but to that foresight itself; for today we, as never before, must draw upon the basic purposes or creeds of our lives for renewed strength and inspiration to meet the trials and challenges of the future.

Objectives or creeds are as much a part of our lives as is the sunshine, but, unfortunately for the ultimate good, too many of us treat them as casually as we do the warm rays of the sun, forgetting that only by storing the warmth of the sun do we stay warm during the cold of night. So must we store within us, by a proper adherence to them, the protection and strength of our credos, so that, come the cold nighttime of trial, we will not be found wanting in the elemental power which their words bespeak.

You and I, as Americans, are not the only people who work and live under the writings of creeds. A constant reminder to a leader of communism in New York City is a placard across his desk that says "A world to win." This glaring creed tells that Communist that his aims are not bound by the corner drugstore or the next street, but that the world must be won. No job is too trivial, no time too long, no risk too great for him and his comrades as they pursue the dedicated task of the Communist, which is to win the world.

Why this devotion? They have been wise enough to their mad hatred of Christ to steal for their own foul purposes His command "Go ye into the whole world and preach the Gospel to every creature." They have taken this basic instruction and they are using it against the very ideal that gave it to us: "Go ye into the whole world and preach the Gospel to every creature."

When we do this, as Americans, then I suggest that peace will come. Yet, you might ask, "Where do I start? The world is a big place and I am but one." If that is your question, then it is only proper that we start with ourselves by making sure that we know the tune as well as the words of our objectives of life.

Words alone are not the fullness of the objectives; there is a tune of meaning behind them, so the tune alone will not suffice. The 2 must be 1 and, as we recite our objectives, our mottoes, our beliefs, or our creeds there must be in our hearts the full music of understanding and love and devotion to them, or else we say empty words and we lead neither ourselves nor our friends into belief and following.

The end result of a wordless belief is illustrated by the story of the Pied Piper of Hamlin, who, by playing a tune on his flute, lured all the rats of that city into the death that came with their plunge into the sea. They followed blindly, neither knowing nor caring why. It was a pretty tune, friends they knew were in the vanguard, so they joined in also, to their sad regret. The Pied Piper had no words or reason to offer, only his lilting flute, but he was successful, for they followed who only cared for the tune.

Let me burden you with another illustration. Mark Twain carried the doubtful reputation of being quite profane. His wife was greatly disturbed by this disagreeable leaning and tried in vain for years to cure her husband of it. She tried the pleasant approach and the harsh approach, both of which wives are masters of, but to no avail. Then one morning she put into operation the attack at which she had long worked—Mark had cut himself while shaving, and had gone into a long and garish dissertation, fully embellished by foul oaths, on the distastefulness of shaving. His wife entered the bathroom during the tirade, and when it had finished she looked him calmly in the eye and repeated in exact order every foul oath he had used. Mark smiled at her, at the completion of this approach, and said benignly, "Honey, you have all the words but you haven't got the tune."

To further answer the question "What can I do?," I will put a question to you first concerning this great organization to which you and I pay tribute tonight. Do you want to be a Rotarian? Not just a dues payer or one who attends meetings, but do you really want to be a Rotarian enough to live the meaning of Rotary? Are you willing to live your daily lives so that the people of the world will hear and understand the words and music of Rotary's great objective of service. Stated as the first of the six objectives of Rotary is "the ideal of service as the basis of all the worthy enterprises," and the word "service" appears in four of the remaining objectives of this club.

In fact, we call Rotary a service club, and not without reason. We look to you for service as a unit of our local and international society, but service as a unit or a club does not carry out your individual responsibilities to your accepted creed. To be only a part of it is not enough. It must also be a part of you, for service to man, service to Christianity, and service to your country are the words and music which you and I must preach to the world if free men, Christianity and our country are to survive and, in the survival, stamp out the evil alternative to these, which is communism.

True service is not for one's self. It becomes an unconscious acceptance of our responsibilities to one another and an automatic doing of those things which will be of service to our brothers. Service goes out to all, wherever we see it needed. Unlike the signal station attendant who saw a trainload of commuters stalled in deep snow and did nothing about it because, as he said, "It was not in my territory," it goes out without question or hesitation.

It is easy to lose sight of the true meaning of service and to live exclusively for ourselves and to be interested in service only when it serves us. This habit of forgetting that we are our brothers' keepers is one of the major wrongs of the world today. Shakespeare said something about it when he wrote: "That, sir, which serves and seeks for gain, and follows out for form, will act when it begins to rain, and leave thee in the storm."

We see in service, then, a fundamental creed that not only Rotarians, but all of us must accept if we are to approach our full obligations as Christian citizens of a free Republic. As one who is not a Rotarian, I salute your organization for making the words and the music of service available to so many thousands of men all over the world. Now, if they all really want to be Rotarians, and if those of us who are not want earnestly to emulate you in your decision, then all of us will, together, reap the blessings of this objective.

Having assumed a readiness for service and an understanding of its true unselfishness, we must now go two steps further for its full meaning. In addition to serving men by being our brother's keeper, there is also the responsibility of service to God. This does not mean just service to your church by attendance, or service to your church by donation of your time or money, but it means service to the teachings of God.

Here, again, I will counter your question, "What can I do?" with another question: Do you really want to be a Christian? It isn't hard to be a good one. It merely requires a desire to live by the teachings of the Lord and to practice what we preach.

It's as simple as that, and when you and I have the words and the music of His teachings in our hearts, so that they are reflected in our daily lives, then we will be serving God in the truest sense. "Love thy neighbor as thyself," "Do unto others as you would have them do unto you" is the creed or objective of Christian living, and it is a creed subscribed to by everyone. Unfortunately, however, it is one that is not practiced devoutly by each person as an individual. Do you want to be a Christian? The answer rests within you and your willingness to be of service to the Christian cause.

As I indicated earlier in my discussion with you, there are three questions that come to mind when we think of the word "service" in connection with our lives. These have not been developed tonight in their natural or normal order because, if they had, I would first have asked you, "Do you want to be a Christian?" Then I would have asked you the question that will come next, "Do you want to be an American?" and lastly I would have asked you, "Do you want to be a Rotarian?" Inasmuch, though, as the creed of Rotary brought the word "service" into tonight's discussion, I purposely started with the question concerning your willingness to assume all of its responsibilities.

I followed that with questions directed at your acceptance of the responsibilities involved in being of service to God, and my third, and final, question is directed at your willingness to assume the full responsibilities to being an American. If you live up fully to the responsibilities of being a Christian and being a Rotarian, then I suggest to you tonight that you will find it easy to live up to the full qualifications called for in an answer to the question "Do you want to be an American?"

Here, again, we must search for a basic objective or creed—we must find it out and understand it, so that we may know fully that which we pledge ourselves to serve. When one thinks of being an American one immediately thinks of the word freedom. One is constantly reminded of the blessings of this freedom: our ability to meet as we meet tonight and to discuss any issue that we care to discuss; our ability to print on the pages of our newspapers and in the chapters of our books words that we know might be disagreed with, but words that we know we will not be punished for printing. We associate freedom with our ability to go to the church of our choice. We associate freedom with our method of business, which we call the free enterprise system. We associate freedom with our ability to travel any place that we can or care to in this broad land of ours, and we associate freedom with our friends—our unrestricted ability to make them or to lose them according to our actions, and not the actions or choice of some dictator.

We associate freedom with all of those things, but do we stop often enough to ponder the source of that freedom, because in the recognition of the source of that freedom is the basic difference between our Republic and all of the governments of history that have come and gone before us. When people came to our shores from Europe, over 200 years ago, they did not come seeking wealth because they left wealth at home. They did not come seeking education because they came to a land devoid of schools from lands that were rich in educational institutions. Rather, they came seeking relief from the oppression of tyranny, and not long after they came they began to realize that the freedom which they sought was not to be obtained from the strength of material things, from the strength of armies and money, but instead, from the strength of something that had never been recognized.

We slowly began to feel the great strength of freedom, but here we differed from other people in history who struggled to their various victories, to their brief moments of freedom. We, through the strength our people had in their great belief in God and their willingness to serve God, realized that we would not become free because of arms or physical might, but that we would become free only when we knew and believed that our freedoms came from God and that we were the free children of God. When that realization came, our wise forefathers worked out on paper those ideals of government which they pledged themselves to serve and which they served so well. For the first time in the history of man's free search for government the answer was found by people who recognized the source of their freedom. Those men wrote in the Declaration of Independence "We hold these truths to be self-evident: that all men are created equal; that they are endowed by their Creator with certain inalienable rights; that among these are life, liberty, and the pursuit of happiness."

This, then, expresses the basic ideal or credo of our Government. On these wonderful words has been constructed this great Nation of free people. On the adherence to these ideals depends our future as free people. I might suggest, also, that on our adherence to these ideals and to the daily living of these ideals, depends the freedom of the world. Without them we become but another government waiting for the sands to run their sure course through the glass of time. With them we remain forever the only government in history to have found the real source of freedom. By living them we become the beacon light that will guide the oppressed of the Communist world to the freedoms of our life. We must show

them by our willingness to serve our ideal, by our belief in our ideals, and by our constant practice of them that we have a vision which they can share.

That, then, becomes your challenge as you answer the question "Do you want to be an American?" To put it simply, it means that you must be as convincingly and as constantly willing to serve our ideals of government as you are to serve the ideals wrapped up in your religion and in Rotary. We must, by our actions, show the darkened world that light and freedom still live. It is a rich challenge, one that man has never before been presented with, because never before has the concept of government been based on the idea that freedom springs from God. It is a thrilling challenge because, by accepting it, we can help change the world from a place of distrust and oppression to a place of trust and freedom. It is a dutiful challenge, for we owe it to our children to live by these ideals so that this which we have might be passed on to them in the clearness with which we received it.

When we talk of service in connection with our country we are too prone to associate that word only with serving the Nation in time of trouble, such as many of you men and women have done during the wars of this Nation. Yet, the kind of service that will maintain this free Republic, and cause it to grow to even greater heights in the years to come, is not confined just to the wearing of the uniform. It applies to our everyday responsibilities, to their perpetuation of our basic ideals of government.

Remember the Communist credo: "A world to win." Remember that communism does not recognize God, so that communism cannot recognize a government whose source of strength stems from the freedom of God. Remember that communism works 24 hours a day to destroy that which is yours and mine. So when we speak of service in connection with our Republic, we speak of service 24 hours a day—the dedicated task of being an American.

Still you say "What can I do? I am only one." Let me start to answer that question by reminding you of what has been said, "The greatest strength of those dedicated to evil lies in the indifference of those dedicated to good." While the good people have been taking care of themselves, the wrongdoers have been taking care of everyone else. We can just as truthfully say that bad politics are caused by good citizens who don't vote.

So, what can you do? Start now to see that in your next municipal or State or national election the dismal record of voter apathy is changed. Start with yourself by registering. Your party affiliation is not important because the majority of America has usually been right, but register yourself and encourage your friends and employees to do so as well.

During a hearing I recently sat through, a witness made what I think to be a very pertinent and timely remark. He said, in the course of the discussion, that he thought we had "been Americans too long." What he inferred by that, of course, was that we, as American citizens, accept all the pleasures and wondrous things that our freedom gives us, but we pay little attention to what can take that freedom from us. It is an amazing and frightening criticism of our bland acceptance of this freedom when we realize that we, as citizens, will fight and die for our Republic, we will pay taxes to keep it going, we will give our blood for our soldiers, but, when it comes down to the question of voting, the question of working at this business of being free, it actually takes a major catastrophe, a revolution, to arouse the American people to the point that they will exercise their franchise. Freedom has never been something that was designed for lazy or indifferent people. It requires a constant dedication, a constant willingness to serve its basic principles if this freedom is to survive.

That, though, is only the first part of this challenge to you in seeking your willingness to serve your America. Voting is not enough. There are other things in the political fields that you can do to serve your country well, and American businessmen must recognize this and be willing to expand their fields of service to include them. There is the active arena of political life, where you engage, either at the precinct level, the district level, or the State level, as an active, working member of your party, or even go a step further and become a candidate for public office.

Remember, though, that in this area the enemies of our Republic not only want but seek the opportunity to serve their army of rottenness in any capacity for which that army calls them. Theirs is an army of vigilance—ours must also be an army of vigilance. Our Army, however, will be vigilant in its dedication to the basic concepts of our freedom, while theirs cannot be dedicated to this same cause because their philosophy does not recognize the existence of God.

It is obvious that there is a relationship between these three fields of service which we have discussed tonight. The relationship is carried through by one concurrent recognition in all fields, and that is that to serve each well one must carry a faith in his God and a willingness to perform His work. In service in these three fields we find a great strength in a common song that has at the same time meaningful words and a purposeful tune.

It is good that this exists, because today as we sail this great ship of freedom through the dark and uncharted seas, we can be reminded of the cruise of Greek mythology that sailed the oceans of that day. You will recall that, as the ships came upon a certain part of the sea, they could hear strange and wonderful voices coming from the shoreline—voices of enticement, voices that spoke of great promise—and the ships would turn from their course and head toward these dark shores. They they would be wrecked upon the uncharted shoals and reefs from whence these voices of the sirens came, and it seemed that no ship's crew could forego the temptation to seek the source of these songs. One skipper plugged the ears of his sailors and then tied his hands to the mast, but he could hear the songs and he directed the ship to its sure course of destruction.

It remained, though, for one Greek skipper to solve this, Orpheus. He was a man possessed of a marvelous voice and he sang a strong and meaningful tune, and as he approached the dangerous part of these seas he began to sing, and he sang in such a loud and wondrous way that the voices of the sirens were drowned out and his ship passed that place safely and sailed on out into the broad seas.

We can liken that story of Greek mythology to our present day, when our ship, sailing as it is through the sea of life, is tempted to deviate from its true course of freedom to investigate the tunes of socialism and communism coming from the black shores that line this sea. If you and I know this great song of freedom, and if we are willing to serve man and to serve God and to serve our country by singing this song daily as we go through our lives, then I suggest to you that we can be as that one successful Greek ship, safe and secure in our passage through these trying times, and that we will emerge onto the great bright sea of freedom and move ahead in our journey through our free way of life.

South Carolina Day Address by Hon. Olin D. Johnston, of South Carolina

EXTENSION OF REMARKS

OF

HON. EDWARD MARTIN

OF PENNSYLVANIA

IN THE SENATE OF THE UNITED STATES

Wednesday, February 23, 1955

Mr. MARTIN of Pennsylvania. Mr. President, on February 20, the distinguished senior Senator from South Carolina [Mr. JOHNSTON] delivered a very interesting address at Valley Forge, in my State. I think his address should be generally read, and therefore I ask unanimous consent that it be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

SPEECH BY HON. OLIN D. JOHNSTON, OF SOUTH CAROLINA, ON SOUTH CAROLINA DAY AT THE GEORGE WASHINGTON MEMORIAL CHAPEL, VALLEY FORGE, PA., SUNDAY, FEBRUARY 20, 1955

Reverend Hart, ladies and gentlemen of the Washington Memorial Chapel, and friends, the invitation to participate with you in the South Carolina Day observance at this historic shrine so beloved by all Americans is both a pleasure and an honor. It is my lot to have been born near the site where the great Battle of Ninety-six was fought. The greater portion of my adult life has been lived almost within the shadow of Kings Mountain. Cowpens is only 10 miles away. Often from my window have I seen the monument to Gen. Daniel Morgan as the rays of the morning sun clothed it in spendor. These connections attach me by inheritance and sentiment to this place which we are privileged to honor today—Valley Forge.

The encampment here at Valley Forge 178 years ago has been, through the succeeding decades, of great and abiding significance to America. The example of personal sacrifice, privation, devotion, and fortitude of the men who weathered the storms here during the winter of 1777–78 is unparalleled in any other nation's struggle for freedom. The quality of men who were quartered in this valley tempered the mettle of the American Patriot. The zeal of the Patriot was here solidified into an unrelenting determination to proceed with the work at hand and persevere until victory should crown his efforts.

These Sunday commemorative services, assigned to each of our sovereign States, have a larger purpose than merely to recount the suffering and sacrifices of Washington and his Continental Army as they wintered in these surroundings: A review of Valley Forge also quickens within us a deeper sense of our personal obligations to God and country. By recalling the trials which were here met. and resolved by our forebears, we are inspired to a renewing of their high purposes. Except we approach these services in such a purposeful and dedicated attitude, we shall miss the sublime lessons of Valley Forge.

In his centennial address here, Dr. Henry Armit Brown reminded us that "a country is benefited by great actions only so long as her children are able to repeat them."

Not many years ago, the late Dr. Henry Nelson Snyder, president of my alma mater, Wofford College, in making reference to the Memorial Day services each year held at the Tomb of the Unknown Soldier in Arlington

National Cemetery, repeated the same injunction in other words:

"Whenever a people forgets its worthy past, the day will come when it will not have a past worth remembering."

It is well, therefore, that we commune with the past, for we then may better appraise our heritage. As we revisit the springs which nourished our roots, we gird our loins for the present and fortify ourselves for the future.

It has been rather truthfully said that the American Revolution was won at Valley Forge. To this wooded and desolate winter retreat Washington gathered his half-defeated, half-naked, half-starved forces. It was fire-cake and water for breakfast, water and fire-cake for dinner. No battle was fought here. These valleys and hills were not the scene of any military triumph. What then are our special remembrances of this place? Not a military engagement involving technical skill, nor the valor and glory of men sacrificing their lives to cannon and bayonet. That was to come later. Valley Forge is etched indelibly in our memories because here it was that the spirit of the war for independence was rekindled and kept alive. Here the military skill of the army was developed to achieve the glorious victories ahead. Those who survived the encampment emerged as confident, well-drilled, and inspired soldiers—an army of intent, stouthearted, tenacious men with a will to win. And thus the clarion call to arms reverberated and reechoed throughout every colony. With clarity and unity of purpose, the American patriots redoubled their efforts. Moreover, it was here at Valley Forge that the adversity of want from within and evil conspiracies from without met their challenge. Here was born the steadfastness of purpose and will, during the darkest hours of the Revolution, in which the greatness of our Nation as a symbol of freedom was crystallized. At Valley Forge our brave men suffered, sacrificed, and endured that a newly born nation might live.

It is therefore appropriate that we set aside these days—these Sabbath days—for Representatives from our States to reflect in sober contemplation upon the participation of our fathers in the War for Independence. Ours is a great legacy, if we but pause to realize and revere it. Let us not be distracted by the glib tangents in some current writings whose authors lack a deeper appreciation of the significance of these surroundings and the history here made. No sacrifice is recorded in history comparable in magnitude to the trials and experiences at Valley Forge.

The soldiers were not given to much whining, but often glossed over their hardships, as did Richard Wheeler, who reassured his mother:

"We are very comfortable and are living on the fat of the land."

George Ewing modestly entered in his journal:

"Were I to describe the hardships and the difficulties we underwent, no person but those who were with us would credit my relation. Therefore, I choose to pass it over in silence."

Notwithstanding their heroic silence, the record is replete with accounts of the cruel suffering borne so valiantly by the American troops here. In a letter to Clinton of New York, General Washington said:

"Naked and starving as they are, we cannot admire enough the incomparable patience and fidelity of the soldiery."

Lafayette in writing to a friend, said:

"The unfortunate soldiers were in want of everything: They had neither coats, hats, shirts, nor shoes. Their feet and legs froze till they had become almost black, and it was often necessary to amputate them. * * * The patient endurance of both soldiers and officers was a miracle which each moment served to renew."

Bitter indeed was the cup of which they drank at Valley Forge, but oh! how glorious the ideal which sustained and inspired them to ultimate victory! Dr. Brown stated the ideal thus:

"And here, in this place of sacrifice, in this vale of humiliation, in this valley of the shadow of death out of which the life of America rose regenerate and free, let us believe with an abiding faith that to them union will seem as dear and liberty as sweet and progress as gloricus as they were to our fathers and are to you and me, and that the institutions which have made us happy, preserved by the virtue of our children, shall bless the remotest generation of time to come."

Let us, for a moment, get our historical setting in mind. Politically the Continental Congress began its meetings in Philadelphia in September of 1774. I shall refer to the Congress in more detail later. The tea-party episodes in Boston, Mass., and Charleston, S. C., had occurred in 1773. Militarily, the encampment followed Lexington, Concord, Bunker Hill, and the forced evacuation from Boston of General Howe. The attack on Charleston, S. C., on June 28, 1776, had been repulsed by Colonel Moultrie. John Adams referred to this event as the first real victory of our land and naval forces in the Revolution. South Carolinians glory in the fact that 5,000 pounds of ammunition seized by their militia aided Washington in his siege of Boston. Washington made his successful retreat from New England and New York with his victory at Trenton and Princeton during the Christmas season of 1776. Then, with singular magnitude, followed the occupation of Philadelphia by the British under General Howe during the fall of 1777. Congress moved to Lancaster, settling later at Yorktown (now York), Pennsylvania. The news of the capture of Philadelphia had a depressing effect on our fortunes abroad. Our enemies were rallied. Our friends were stunned. But the sage admonition of Franklin softened the blow:

"Howe," he said, "had not captured Philadelphia;" rather, "Philadelphia has captured Howe."

Later events proved the truth of that sober reflection.

Having these events in proper focus, South Carolina is proud of her contribution to the dividends accruing from Valley Forge:

South Carolina was the first colony to organize and by formal act declare its freedom from Great Britain; in history little noted, representatives duly chosen from every district in South Carolina met in Charleston on January 11, 1775, and organized a provincial congress. On February 1, 1776, its delegates formalized a document declaring that South Carolina was no longer a province subject to the King of England, but "that she was now, by her own act, a free and independent State." At 4 o'clock in the afternoon of March 26, 1776, the members of the provincial congress declared themselves members of the General Assembly or Legislature of the State of South Carolina, with John Rutledge as president and Henry Laurens as vice president. The term "governor" came into official usage 3 years later.

Henry Laurens was born in Charleston, S. C., of Huguenot parents who theretofore proceeded from New York. He became a great leveling influence in the Continental Congress during the American Army's suffering at Valley Forge. Succeeding John Hancock as President of the Congress on December 1, 1777, he was a man of great Christian virtue and charity. He served without salary, working from 18 to 20 hours a day, though physically handicapped by a prolonged attack of gout and fever. He never complained, but rather compared his own physical discomforts as greatly less than those of the estimable leader and his men at Valley Forge. He once remarked that at least his sufferings were beside a fire, whereas the men and General Washington were on the cold ground with little straw and clothing to keep them warm. His son, John Laurens, as a colonel, became a valued and trusted aide to General Washington. Through President Laurens' voluminous letters to his son, we find that Congress maintained the closest liaison with General Washington. When the conspiracy and intrigues of the day were bearing heavily on the cause of the Colonists, President Laurens, in writing to his son, said:

"In (Washington's ruin) would be involved the ruin of our cause. On the other hand, his magnanimity, his patience, will save his country and confound his enemies."

The estimate of President Laurens by John Adams is worthy of note. Adams makes reference also to the first great victory of the Revolution in Colonel Moultrie's preservation of Charleston. Having only a month's acquaintance with President Laurens, John Adams wrote his wife on August 19, 1777:

"I feel a strong affection for South Carolina for several reasons: (1) I think them as stanch patriots as any in America; (2) I think them as brave; (3) they are the only people in America who have maintained a post and defended a fort; (4) they have sent us a new Delegate whom I greatly admire, Mr. Laurens, their Lieutenant Governor, a gentleman of great fortune, great abilities, modesty, integrity, and great experience, too. If all the States would send us such men, it would be a pleasure to be here."

Daniel Roberdeau, of the great Commonwealth of Pennsylvania, is credited with saying that President Laurens was a "worthy, sensible, and indefatigable gentleman."

Three great measures affecting the fortunes of the Colonies marked the contribution of South Carolina through the civil service of Henry Laurens as President of the Congress:

(1) The Treaty of Alliance with France;

(2) The conclusion of the proposals for the Articles of Confederation; and

(3) The rejection of the Proffer of Peace with Great Britain in 1778. (Peace without freedom and independence was unacceptable to Laurens.)

The Continental Congress is worthy of a moment of favorable historical recollection. Congress through the years—Continental, under the Articles of Confederation, and under the Constitution—became the whipping boy for all our ills except, possibly, the sudden changes in the weather. Some of the writers of that day failed to realize its origin, its loose association, and the utter lack of constitutional power. That error has been perpetuated by subsequent historians and commentators because of their failure to recognize that the Continental Congress should be immediately differentiated from the constitutional Congresses that have succeeded them.

The colonial governments in 1774, 1775, and 1776 were houses divided against themselves, a condition naturally to be found in colonial governments aspiring to self-determination. The call for a convention of the Continental Congress lacked constitutional or sovereign authority. The British authorities had dissolved the colonial legislatures, and our States had not yet been organized. The selected representatives were not invested by their constituencies with sufficient power to execute either the will of their constituencies or even their own. The Congress ruled more by persuasion and patriotic fervor for a common cause than by any set rules of delegated authority. Therefore, to assess such an association with blame is to overlook its lack of delegated powers. The high resolves passed by the Congress on October 14, 1774, were instrumental in unifying and consolidating the thoughts and actions of the Colonies.

A great historian (Dr. David Duncan Wallace) under whom I had the privilege of

studying put it this way in his life of Henry Laurens:

"Moreover, the situation of the Congress at the best was precarious and difficult. Suddenly placed under the necessity of conducting a war, it was unsupplied with every power, authority, and resource for its task and could rely only on a steady sense of public duty in its constituents—a devotion which it was useless to expect. The war was conducted without any formal constitution, adequate authority, or orderly Government, and in the face of an apathetic or hostile party embracing probably a majority of the population. Yet, under difficulties almost beyond belief of a generation accustomed to well ordered institutions enjoying authority beyond derogation and supported by an ardent patriotism practically universal, the old Congress in one way or another kept the Government going and, with the aid of their great general and a handful of devoted patriots up and down the country, brought it to a successful termination and meanwhile performed a service for which they have received scant recognition in laying the permanent foundations of national administration which endure to this day. A Congressman had a difficult and thankless task, and those who performed it with ability and disinterested patriotism deserve a credit which they have not usually received. The earlier runners in a relay race have been forgotten in the shouts of acclamation for those of the later course who arrived bearing the torch of a completed constitutional system. The final runner could not take even his first step until the previous bearer of progress had arrived, and doubtless the first mile was as dusty and toilsome as the last."

In December of 1777, during the sojourn here at Valley Forge, the Congress consisted of only 14 Representatives. Eight Colonies had 1 representative each, 3 had 2, and 2 Colonies had none. Many of the able men of the day returned to their respective homes to strengthen their local governments. The First Congress met without an agenda. Their sessions were of necessity bound to secrecy. In the absence of constituted authority, a chief executive and departmental heads, it is a remarkable tribute to their common sense, ardent patriotism, and unity of purpose that the Continental Congress was able to carry on foreign affairs, raise an army, conduct a war, and bring it to a successful conclusion. Hence, I deprecate the rather general and unfounded criticism, often gratuitously and never rightfully heaped upon the achievements of the Continental Congress. Let us ever remember that the Congress then was and now is the only spokesman and the last resort in expressing the will of our people. Without such an elected, representative body, we drift aimlessly but certainly into the despotism of a one-man government or an oligarchy of tyrants. The meaning of Valley Forge becomes depreciated if we minimize the real worth of the representatives of the people of that day.

Slowly but in orderly succession the fruits of the sacrifices at Valley Forge appeared upon the American scene. Out of the darkness and despair of the suffering here, victory in time emerged.

From this crucible of hardship General Green was enabled to prepare the artillery and gather necessary supplies. General Von Steuben brought a knowledge of military science and tactics to our determined but untrained Continentals. The lesson of warfare learned and practiced here are reflected in the great result that followed. The first effects of such training appeared at Monmouth. After Savannah and Charleston had been taken by the enemy, important events followed closely in my native State. The strongholds of the enemy had been reduced to New York, Camden, and Charleston. Generals Green and Morgan were deployed to the South because it was there that the British hoped to divide our colonies and later conquer Washington's forces. The battles of Camden, Kings Mountain, Cowpens, and Guilford Court House forced Cornwallis to retire to Wilmington. This led Cornwallis to Yorktown, Va., and the surrender there on October 19, 1781, followed by the signing of the peace on November 30, 1782.

Incidents and events—small and large—form significant links in our chain of recollections of Valley Forge and contemporary happenings:

Henry Laurens fathered for a time the wounded Lafayette. He made him a personal loan of $6,000. Many years thereafter (1825) Lafayette laid the cornerstone of the monument to De Kalb at Camden, S. C.

Col. John Laurens in defense of the honor of his chief, challenged and wounded Gen. Charles Lee because of the latter's disregard of General Washington.

We recollect the capture of Henry Laurens by the British while he was en route to Holland as our ambassador. Laurens' value to our cause was illustrated in his exchange by the British for Lord Cornwallis, and confirmed by his appointment as one of our peace commissioners along with Franklin, Jay, Adams, and Jefferson. Edmund Burke commented in Parliament on the coincidence that Lord Cornwallis upon his surrender at Yorktown was held as prisoner in America by Colonel Laurens while the latter's father was imprisoned in the Tower of London, over which Lord Cornwallis held authority as constable.

History likens Col. John Laurens, the able son of Henry Laurens, to Alexander Hamilton. Being detached from Washington's headquarters and because of his fluent use of the French language he was made Special Minister to France to secure and expedite loans, ships, men and supplies. The several ships filled with supplies, money, men, and sinews of war were testimonials to his ability, zeal, and accomplishments. It will be of particular interest to you to recall that from the funds he brought back, $250,000 was used by Robert Morris, who with his associates added $150,000, to establish and capitalize the Bank of America at Philadelphia. The early and untimely death of Colonel Laurens, on August 27, 1782, on a completely unnecessary battlefield in South Carolina, was the occasion of much grief and a fine expression of regard from General Washington. The English poet, Day, in an epitaph for young Laurens, wrote:

"Beyond the rage of time or fortune's power, remain, cold stones, remain and mark the hour when youthful Laurens yielded up his breath and sealed his country's liberties in death. For injured rights he fell and equal laws the noble victim of a noble cause. Oh! May that country which he fought to save shed sacred tears upon his early grave."

Valley Forge had a great bearing on subsequent events in South Carolina. After Lord Cornwallis and Admiral Parker captured Charleston, they began to overrun the State. They met great resistance at the hands of our militia. General Gates lost Camden to Cornwallis. The riflemen of the State under Moultrie, Sumter, Pickens, Harden, Thompson, Marion, Hampton, and others together with some forces from North Carolina and Virginia under Generals Green and Morgan began a wearing-down process of Cornwallis' forces. He was defeated at Kings Mountain on October 7, 1780; Tarleton's forces were defeated at Cowpens in January 1781. These battles and those in North Carolina forced Cornwallis to Wilmington, whence he left to Yorktown, Virginia, where, as I have said, he surrendered to Washington.

History records 137 battles—large and small—fought in South Carolina; 103 of these were fought by her own troops, and in 20 major engagements other South Carolinians participated.

Turning the pages of history it is easy to recall that great events and noble achievements often are born in moments of seeming despair and periods of depression and hardship. Traditional history relates that the great Homer was blind when he gave the world his Iliad and Odyssey, as was Milton when he wrote Paradise Lost. Dante, while suffering, produced his greatest works, and the music of Beethoven, much of which was written after he became completely deaf, will inspire the world as long as time lasts. Tennyson in the depth of his grief gave us the immortal In Memoriam. Historians credit Gen. Robert E. Lee with even greater stature achieved in his civil accomplishments following the War Between the States than for his brilliant exploits in battle. The French rose to their greatest heights at Verdun. Helen Keller has persevered despite deafness, blindness, and muteness to become a great crusader for others similarly afflicted. Dunkirk is too fresh in our minds for proper evaluation, but in all of these events we find that in periods of doubt and circumstances of greatest stress, men have arisen to their greatest stature. So it was with Washington, his brave generals, and the invincible soldiers at Valley Forge.

The feat of Sergeant Jasper at Charleston, S. C., had its sequel in the flag-raising at Iwo Jima. Such has been the history of the bravery, fortitude, and steadfastness of purpose of America and her fighting soldiers from the very beginning.

From the date of the Stamp Act Congress in 1765 in New York, of which John Rutledge, of South Carolina, was President, when the members were stirred by the plea of Christopher Gadsden, another South Carolinian, that "there ought to be no New Englanders, no New Yorkers known on the continent, but all of us Americans," and running through the services of those I have so briefly sketched, are found the indissoluble links that have bound our fate and fortune to Valley Forge. These events of such historic importance which you have given me the honor to relate today, happenings before and after the winter of 1777–78 and the events forged here, made possible the chain of successes that followed. We are the beneficiaries of the dividends from the despair of that fateful period in American history. May we never fail to recall them. Let us ever cherish them, teach our children to revere them. In a spirit of gratitude to a divine providence which has guided and multiplied our Nation's fortunes, let us all be thankful.

A Political Program To Prevent World War III

EXTENSION OF REMARKS
OF
HON. MICHAEL A. FEIGHAN
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Wednesday, February 23, 1955

Mr. FEIGHAN. Mr. Speaker, under leave previously granted, I insert in the RECORD my address entitled "A Political Program To Prevent World War III," delivered before the annual Conference on Freedom and Peace Through Liberation, at its luncheon meeting held at the Washington Hotel, Washington, D. C., February 22.

The address follows:

Mr. Chairman and members of the conference, I am very happy to be able to join with you on this Washington's Birthday anniversary to discuss how we may attain the

goals of peace and freedom through liberation. I want first of all to congratulate you on choosing such an excellent name for the conference because it connotes a positive goal. Equally important, it leaves no doubt that it is not a "me too" organ of Kennanism, containment, and surrender.

On this occasion when we commemorate the anniversary of the birth of the father of our country, soldier, statesman, and patriot, it is appropriate that we ask ourselves the question:—What should we be doing to advance the cause of human freedom at home and throughout the world?

George Washington and the men who joined hands with him in preparing and signing the Declaration of Independence never stopped thinking about individual liberty and the basic human freedoms. We must never forget that the American patriots, though but a handful of men, gave birth to political concepts soundly based in morality and alive to the basic dignity of man which fired the imagination of all mankind. So appealing was the cause they represented that other fearless souls from the four corners of the earth came to the shores of America to offer their personal fortunes and their very lives in support of that cause.

After the independence of the United States of America was won, the cause of national independence, as represented by that victory, was not seriously challenged in the world political arena until 1918. It might be said that the concept of nation and the cause of national independence held an unchallenged hold on the loyalties of mankind for a period of 140 years.

Today we see the cause which the American patriots gave to the world challenged by a new type of imperialism which seeks to turn back the pages of history by thousands of years and to make of mankind some sort of robot, completely devoid of all human feelings. That challenge is a vigorous and dangerous one as attested to by the fact that in the short course of 37 years, Russian Communist imperialism has enslaved over 30 nations, in excess of 800 million human beings, and now occupies almost one-third of the earth's surface.

The so-called Russian experts have offered us a number of catch phrases to symbolize the courses of action open to us in our struggle to survive as a national entity. One of these slogans is peaceful coexistence, which, by the way, is a slogan coined by Lenin, and which has but recently been resurrected by Khruschev the latest czar of the Russian Communist empire. The promoters of this slogan claim loudly that unless we are willing to engage in peaceful coexistence with the empire of communism, all mankind will be doomed because war will surely result. These same advocates maintain that if war breaks out, most of mankind will be wiped from the face of the earth because of the tremendous destructive power of the hydrogen weapons possessed by the free world and by the mad men of the Kremlin. These messengers of doom and despair are telling us that we must accept the realities of communism, that we must learn to accommodate ourselves to it, else we shall surely perish from the earth.

There is only one reward for those who make the fatal error of attempting to make any accommodation with the conspiracy of communism, and that reward is death or slavery. This is the irrefutable, unquestioned record established by communism during the course of its 37 years of tyrannical existence. There is not the slightest evidence at hand which indicates there has been a change in Communist doctrine or objectives. The events of the past 37 years remain as the only reliable index of what happens to nations and people who seek to work out a modus vivendi with Moscow.

Another slogan has been coined to describe what these experts claim as the only other course of action open to us, and that slogan is "preventive war." The creators of this slogan maintain that if the United States takes positive and overt action against the Communist conspiracy, a new world war will surely result. The creators of this slogan also maintain that anyone who advocates positive and overt action against the Russian Communists is per se advocating war of a preventive type. The promoters of this slogan, like those promoters of the slogan of peaceful coexistence, really maintain there is no other course open to us but to submit to the strangling embrace of the Russian bear. When you cut away all their fancy language and tortured reasons you arrive at no other conclusions.

It is my considered judgment the American people are being subjected to a series of brain washing through the constant repetition of these slogans—"Peaceful coexistence and preventive war." These series of treatments which automatically exclude consideration of any other course of action, are calculated to break the American spirit, to destroy our creative initiative as freemen, and to paralyze action of any type that would challenge the right of way of world communism.

Recent events which have taken place in Moscow leave no doubt in my mind that the empire of communism is threatened by powerful internal forces generated by the enslaved non-Russian nations and people. These forces, in my judgment, are so powerful that their impact upon the Russian central authority located in the Kremlin, is such as to make it impossible for the Red imperialists to conduct a successful war against the free world. In the event of open war, these captive nations and people would rise up against their alien oppressor. While this is true today, I am not certain this will be the case for all time to come. I am certain it is true today, and that is a fact we must act upon while we still have time.

The long-winded oration given by Molotov on the occasion of Khrushchev being crowned the Czar should have been entitled "Fear of Freedom." The windy, almost childish, boasting, and bullying of the supposedly suave international diplomat, Molotov, must be regarded as a reliable index of the turbulent storms which now best the masters of the Red colonial empire. All of us recall the story of the little boy who, while walking by the graveyard in the dark of night, whistled loudly in the hope that he could drive away the evil spirit. To say that Mr. Molotov was whistling in the dark would be an understatement. More accurately stated he was shrieking in a hurricane.

Recently this practical appraisal of the situation was made by a committee of Congress:

"That the time was never more opportune or the world situation more demanding for a bold positive political offensive by the United States and the entire free world; this is the only course which gives reasonable hope for avoiding all-out war."

This is a quotation from the published Summary Report of the Select Committee To Investigate Communist Aggression of the House of Representatives, dated December 31, 1954. This estimate, as you will note, was made before the recent turn of events in Moscow. I believe that this conclusion has even stronger foundation in fact today than it had then, back in December, and I, as a member of that committee, was absolutely convinced, based on irrefutable evidence in possession of the committee, that this conclusion was conservative. Now the question before us is, What should make up that bold, positive, political offensive? Of one thing we may be certain, slogans, catchwords, and speeches do not mean action. What is needed is the launching of concrete steps calculated to return the initiative in the struggle for the minds and loyalties of all mankind to the cause of human freedom, as represented by the United States of America. I would like to offer you some concrete steps which I believe we must take as soon as possible and which are, without doubt, well within our capabilities. I take pleasure in recalling to your attention the 13 recommendations made by the House Select Committee To Investigate Communist Aggression as the concrete, starting steps in such a bold, positive, political offensive. Those recommendations are:

1. The committee again recommends that the President of the United States take the initiative in convening an international conference of all free non-Communist nations for the following purposes:

A. To express formal recognition of the fact that the Communist governments, which now control over 800 million human beings, are not representative of the will of the people.

B. To seek agreement whereby the free non-Communist nations acting in concert will withdraw diplomatic recognition from all Moscow-controlled Communist governments.

C. To reaffirm the friendship and solidarity of the people of the free world with the people and nations enslaved by communism.

D. To develop a program for the rapid and complete termination of all commercial treaties and trade with Communist governments and the initiation of a program of trade among all non-Communist nations which will strengthen the security of the free world.

E. To develop an overall, dynamic program for the defeat of the international Communist conspiracy.

2. That Congress establish a joint committee on all United States overseas information programs in order that maximum results may be assured in bringing the full force of truth to all the people of the free world and increased hope to the millions of people enslaved by communism.

3. That Congress by appropriate action reiterate and make clear that the eventual liberation of all the nations enslaved within the Communist empire, together with unqualified support for the principle of national self-determination through free elections and the secret ballot, are firm and unchanging parts of our national policy.

4. That in the advancement of the American program for world peace and freedom all efforts therein be measured against the criteria of whether they assist the captive peoples to hasten the day when they may achieve their liberation, and that all acts or omissions which tend to confirm their enslavement be rejected.

5. That the spirit of resistance to Communist tyranny behind the Iron Curtain be encouraged and supported through the judicious use of funds already authorized by Congress for such purpose.

6. That the appropriate agencies of the Government concerned with the threat of world communism give maximum opportunity to those private American organizations, groups, and individuals that have a natural bond with the enslaced nations and people, to play a major role in the restoration of freedom in the lands of their ancestry.

7. That, as a demonstration of our genuine sympathy for the enslaved nations and peoples, and to weaken the will of the armies under Communist rule to fight and support the Kremlin's plan for world conquest, the President immediately direct the establishment of the national military units formed from escapees from the enslaved nations as authorized by section 101 (a) (1) of the Mutual Security Act of 1951, as amended, thus providing a concrete symbol of a genuine coexistence and unity between the nations and peoples on both sides of the Iron Curtain.

8. That Congress at the next session enact H. R. 8000, known as the Political Asylum Act of 1954, to provide for the rapid and effective restablishment of selected escapees

from communism and to encourage the defection and escape of others.

9. That the Congress give the United States Information Agency full support not only by way of an increase in funds but also by strengthening its role in our Government's political offensive. Similarly, foundations, private organizations, and individual citizens are urged to continue and increase their support to the Committee for Free Europe (Radio Free Europe).

10. That an International Juridical Commission be established within the framework of the North Atlantic Treaty Organization so that Communist crimes perpetrated against humanity may be fully recorded and officially noted for prosecution.

11. That the Department of State transmit copies of this report, together with all other reports of the committee to each member nation of the United Nations.

12. That the Department of State formulate a resolution based upon the findings, conclusions and recommendations of this report, branding the U. S. S. R. as an aggressor against all the nations enslaved by communism and that the United States delegation to the United Nations be instructed to take immediate steps to place this resolution on the agenda of the General Assembly for early action.

13. That the work of this committee be continued in order to complete the investigation of all phases and techniques of Communist aggression in areas of the world not already covered by the committee, together with further inquiry into conditions of life within the Communist empire; a program that lack of time has thus far prevented.

I leave to your judgment whether or not this 13-point program will advance the cause of freedom and peace throughout the world. I believe that we, as a Nation, must initiate such a program because unless we do so, we must face up to the inevitability of all-out war or the alternative of abject surrender to a life of slavery now threatened by the Communist conspirators. We, the inheritors of this sacred heritage of individual liberty, government under law, and dependence upon divine providence, must not fail in the historic mission the enslaved nations and suffering peoples of the world have called upon us to fulfill. Remaining true and firm in the support of our great American ideals, we cannot fail in this historic mission.

Washington's Birthday Address by Hon. William F. Knowland, of California

EXTENSION OF REMARKS
OF

HON. WILLIAM F. KNOWLAND

OF CALIFORNIA

IN THE SENATE OF THE UNITED STATES

Wednesday, February 23, 1955

Mr. KNOWLAND. Mr. President, I ask unanimous consent to have printed in the RECORD an address which I delivered last night at the Washington's Birthday banquet of the Sons of the Revolution at the Waldorf-Astoria Hotel in New York.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

Mr. Chairman, distinguished guests, and members of the Sons of the Revolution of the State of New York, I am greatly honored to be called upon to respond to the toast to General George Washington.

As the leader of the Army of the Revolution he was first in war and his courage and ability played a major part in the winning of our independence.

After this great service to the new Nation, he felt he was entitled to retire, but we consider him first in peace because he presided over the Constitutional Convention which gave us the basic framework of our Government and then later became the first President under the Constitution.

In the period of our national life since then, he has been truly first in the hearts of his countrymen.

While we are here to pay tribute to George Washington and the service he rendered to our Nation, it is also fitting and proper that we review some of the current problems and the effect they may have upon the institutions he did so much to help create and to preserve.

The world balance of power has been so upset that no prudent person can ignore the realities of the situation. Not only the future of this Republic but the hope for a free world of free men largely depends upon the policies that we follow and the firmness with which we and the free nations deal with future communist aggression or threat of aggression.

In the past 10-year period international communism has increased its power, its area, and its population. Ten years ago at this time there were less than 200 million people behind the Communist Iron Curtain. Today over 800 million people live under the most ruthless, godless tyranny the world has ever known.

Recognizing the inherent danger in further Communist conquest, the Government of the United States has undertaken a series of commitments under the North Atlantic Alliance, the ANZUS (Australia-New Zealand-United States) Mutual Defense Pact and mutual defense pacts with the Republic of the Philippines, the Republic of Korea, Japan, southeast Asia, and the Republic of China.

The last two treaties were overwhelmingly ratified by the Senate this month.

In a display of national unity that should have encouraged our friends abroad, given courage to the neutrals and opened the eyes of the would-be aggressor, the House of Representatives passed the resolution by a vote of 410 to 3 and the Senate by a vote of 85 to 3.

This action had no sooner been taken and the two treaties ratified than diplomatic moves started on the part of certain Asian and European powers to bend the line of defense in the Pacific and lay the groundwork for a conference which would have all the unfortunate results of a Munich, a Yalta or a Geneva wherein the aggressor gains his objectives at the conference table.

Unfortunately, the history of these conferences has been that it is always the free world that gives up territory and surrenders human beings to the control of the Communists. It is never the other way around, wherein the enslaved people gain their freedom. We must not permit Gulliver to be tied down by the Lilliputians. There are those, at home and abroad, who seek to advance the cause of world government. Until now it has not been a major threat to our Constitution or our sovereignty. The development of the atomic and hydrogen weapon has caused some persons at home and abroad to believe that world peace and security depend upon some form of world state. This is a fallacy that could cost us our freedom.

This country cannot join its political system with the other nations of the world, including Communist or other dictatorships, without diluting our constitutional guaranties. How can a Communist dictatorship, or any other kind, have an equal voice with this free Nation without compromising our constitutional structure of government and the rights of free men? How can a Socialist or Communist economic system be tied to ours without first compromising and then destroying the free economic system, the rights of private capital, and the unregimented life of our people? How can we join our productive capacity and resources to the unproductive who lack resources without destroying the living standards of our people whose enterprise and thrift helped them accumulate property and capital for new industry? This has been the great incentive that has advanced us from a small colony of 3 million to a great Nation of 165 million people, the most productive the world has ever known.

It is one thing for the American people by deliberate choice, after thorough debate, to amend our Constitution to meet changing conditions. To allow it to happen by default would be a betrayal of our responsibilities.

We must not permit court decisions of Executive agreements to raise such to the status of treaties. Nor will we long preserve our Constitution, drafted at Philadelphia under the chairmanship of George Washington, if we fail to challenge any effort to amend our Constitution by use of a loophole which may provide a treaty or Executive agreement short-cut to what was intended to be a difficult process.

Let us examine the record of the United Nations as an agency for effective collective security as envisioned by some or as a basis for a world government as contemplated by others.

World War II had not yet terminated in 1945 when the United Nations Conference was held in San Francisco. The people of the world did not know that we were on the threshold of the atomic age though those high in Government had reason to believe a vast new power that ultimately could be used for destructive or constructive purposes was soon to be unveiled.

Hopes were high everywhere that the Soviet Union, though a dictatorship, had learned the folly of aggression and of war and because of the vast help given by the free world to them they would be willing to help establish a system of international law and order to preserve the peace of the world for ourselves and our children.

Unfortunately both during the San Francisco conference and in the 10 years that have followed a vast propaganda effort has taken place to build the United Nations into something which its charter provisions could not or did not permit it to become. In the United Nations different people envisioned different things.

Some envisioned it as a mighty force of collective security that would rally most of the nations of the world to resist aggression and preserve the peace. In moments of oratorical fancy some even suggested that the fact the United Nations was in being would warrant free nations to scrap most, if not all, of their armed forces and place their reliance upon the "police power" of the United Nations and the collective moral persuasion of that organization. On June 25, 1950, this concept was shattered shortly after it appeared to be confirmed.

When the Communist forces crossed the 38th parallel, the United Nations Security Council promptly acted and first called upon the Communist aggressor to cease the aggression. The Communists, of course, forthwith showed they were not impressed by a United Nations resolution or the adverse moral reaction of that organization. The Security Council next called on the 60 members of that organization to give aid and support to the victim of the aggression, the Republic of Korea.

What is the record on this? After 3 years of the Korean war, of the 60 members of the United Nations only 17 contributed a single soldier, sailor, or airman to the resistance of aggression. Outside of the United States of America, the other 16 contributed armed forces in the amount of 45,000. The United States of America alone contributed more than 450,000, and we rotated more than 1 million men through

the Korean theater of war. The little Republic of Korea, which was the victim of the aggression, supplied over 600,000.

This means that of the United Nations members the United States of America supplied more than 90 percent of the manpower and better than 90 percent of the resources.

When the forces of the Republic of Korea, not being a member of the United Nations (having been kept out by a Soviet veto), are added to those of the United States, it means that our two nations alone supplied better than 95 percent of the manpower.

Does this indicate that the United Nations is an effective instrument of collective security? The answer must come back in the negative.

Our associates in the United Nations so tied us down that a stalemate was all that could be gained after 3 years of struggle in Korea.

We were denied the right of hot pursuit and the enemy was protected in his sanctuary across the Yalu.

With that example are you prepared to risk the future of our Nation and the safety of our people upon the collective ability of the United Nations to function in the event of aggression? The answer likewise must be in the negative.

Has the time not come for a realistic appraisal of just what part the United Nations is qualified to play and to stop kidding ourselves into believing it is something it is not and, in my judgment, cannot be.

There are some who have envisioned the United Nations as a world state to which openly or clandestinely, individual nations would surrender their sovereignty. Some of the more enthusiastic proponents of this type of super state compared the San Francisco meeting with that of our own Constitutional Convention at Philadelphia. Of course, the two gatherings are not comparable when one considers the building of a government upon which man might depend for the protection of his life and his religious, economic, and intellectual freedom.

In the first place, those who met at Philadelphia spoke a common language and had a common heritage. True, they had come from different areas of the world, but they or their predecessors had come seeking a new way of life, freedom from Old World tyranny or a desire to worship God according to the dictates of their own consciences.

They had fought a common battle against the mightiest empire of that time. They had carried over from the old country the background of the Magna Carta and of representative government. They had had experience as an independent nation, much of it unsatisfactory, under the Articles of Confederation.

With that background, under what I believe was divine inspiration, drafted the greatest document produced by the mind and hand of man for his self-government and protection of his natural rights.

A little more realistic understanding of the history of the nations gathered in San Francisco should have made it clear that such an organization could not be and should not be considered a basis for world government.

There is no common language or common heritage. Nations which have had no experience with representative constitutional government sit on equal terms with those that have had long experience. Nations of less than 1 million have equal representation with those of over 300 million. The Soviet Union, which is perhaps the most tyrannical government since western civilization entered the modern era, sits as an equal partner with nations with long-established constitutions of law, order, and a respect of the rights of man.

Now, there are those who urge the admission of Communist China which was the aggressor in the Korean war. This, together with the other Communist states, would give that system of tyranny over 800 million people that they claim to speak for.

As for me, as long as I have a voice or a vote in the Senate of the United States, I shall never consent to permitting the guaranties of freedom under our Constitution being diluted or modified directly or indirectly by any organization having in powerful policy positions nations which have no appreciation of or respect for free institutions.

Lest we be gradually edged into such a world state before we learn too late wherein we have been taken, I believe that every candidate for public office—executive, legislative or judicial—should be asked to give a forthright view upon this great public issue. It is later than you think.

The United Nations, if it does not destroy its moral position by actions which I shall mention, does have a function it could perform. It could be a forum wherein the views of the free world and the Communist world might be aired provided that there was assurace the debates in the General Assembly or the Security Council were receiving as widespread coverage behind the Iron Curtain as they do in the free nations.

Otherwise, it becomes a vast propaganda forum for the Communists wherein the point of view of the West does not have the equal opportunity to get to the people in the Soviet Union and its satellites because of the strict censorship those governments exercise.

Even in regard to its position of moral leadership the United Nations has allowed itself to become seriously compromised.

Following the intervention of Communist China into the Korean war the United Nations, after great hesitation, declared Communist China the aggressor. There had been no such hesitation when the small aggressor Communist Korea, crossed the 38th parallel in June of 1950.

To close observers this seemed to indicate that there would be alacrity to pass a resolution and to act against a small aggressor but there would be procrastination and delay in acting against a large aggressor. This seemed to be an abandonment of principle for expediency.

Later, when the evidence was conclusive that the Soviet Union was not only giving moral support to Communist aggression in Korea but was supplying MIG planes, tanks, artillery, ammunition, and other weapons in clear violation of the United Nations resolution and the charter of the organization, no steps were taken to expel the Soviet Union from the United Nations.

Later on, the official representative of the Soviet Union baldly and boldly admitted the fact that such support had been given and in effect defied the United Nations to do anything about it. They did nothing and by inaction underscored their futility when dealing with Soviet charter violations.

Every member of the United Nations knows that the terms of the Korean armistice have been violated on numerous occasions. The neutral nations commission is not allowed to function in Communist North Korea as it was intended though they have complete freedom in the area of the free Republic of Korea. In violation of the terms of the armistice, the Communists have brought in equipment and built military airfields. No effective steps have been taken to require respect for the terms of the armistice.

The most flagrant violation has been the admitted holding of 15 members of the American Air Force, 11 of whom have been sentenced to prison terms of from 4 to 10 years. Under the terms of the armistice it was required that all prisoners of war who wanted to be returned should be allowed to do so.

There is strong reason to believe that there are at least several hundred additional United Nations and United States prisoners of war being held in violation of the terms of the armistice.

The United Nations passed a resolution expressing its concern in this matter. The Secretary-General, Mr. Hammarskjold, made a special trip to Peking. He returned without the release of the prisoners and without any date upon which they might be expected to be returned in the future. It is apparent that they are being held for the purposes of international blackmail on the part of the Chinese Communists.

Impotent and paralyzed, the United Nations Security Council and General Assembly have taken no effective steps to enforce the release of our airmen in accordance with terms of the Korean armistice. Again I ask: "What effective steps, if any, does the United Nations intend to take?"

In the matter of the Chinese Communist aggression against the Republic of China which is a charter member of the United Nations, that organization invited the Chinese Communists to come to New York to discuss a cease-fire.

Arrogantly, the Chinese Communists laid down terms that a victor would be expected to lay down to the vanquished—namely that the Republic of China should be removed from the Security Council and that the Soviet Union resolution condemning the United States should be made the order of business rather than the New Zealand resolution relative to a cease-fire.

When this message was received the United Nations again demonstrated its ineffectiveness by postponing the whole situation, while some of the neutralist friends of the Soviet Union and Red China are trying, through diplomatic channels, to provide for a Far Eastern Munich whereby the Chinese Communists will be given the key coastal islands of Quemoy and Matsu and membership in the United Nations. This, of course, would be another defeat for the free world and throughout all of Asia looked upon as another victory for the Communists, comparable to that growing out of the Geneva Conference, wherein the Communists gained control of Northern Vietnam and 15 million more human beings.

I am strongly opposed to the admission of Communist China into the United Nations.

If, as part of a Far Eastern Munich, the appeasers force Red China in I shall devote the balance of my life to taking the United States out.

These are not pleasant facts, and there are many in this country and elsewhere who, because of the vast amount of publicity and propaganda, have gotten a distorted view of the capabilities of the United Nations Organization.

Certainly, in this day and age of the airplane and the atomic weapon, a nation can no more return to isolationism than an adult can return to childhood.

It is important that we have a system of effective collective security and to demonstrate to the Communist world that there will be no further retreats or the abandonment of free people into Communist hands.

This Nation will live up to all of its treaty obligations, and we have the right to expect that our allies will do likewise.

I have a deep conviction that the American people and those throughout the free world who understand the dangers facing us will never again pay the price of another Yalta or another Geneva in order to buy a temporary respite from the insatiable appetite of international Communists to destroy human freedom.

If we as a free people will show the same courage and commonsense that motivated Washington and the others who under divine inspiration gave us our Constitution there are none of our great domestic problems we cannot solve and there is no foreign foe we need fear.

The John Day Project on the Columbia River

EXTENSION OF REMARKS
OF
HON. SAM COON
OF OREGON
IN THE HOUSE OF REPRESENTATIVES
Wednesday, February 23, 1955

Mr. COON. Mr. Speaker, I wish to bring to the attention of the House a joint memorial I have received from the Senate and House of Representatives of my home State of Oregon. This resolution, House Joint Memorial 2, memorializes Congress to provide the necessary funds for preliminary investigations and planning for the John Day project on the Columbia River, and then indicate its intention to build the John Day project promptly and solely with Federal funds by making the necessary appropriation to start construction immediately upon completing the preliminary planning or, in the alternative, enact without delay such enabling legislation as is required to permit local agencies to advance funds, under appropriate arrangements with the United States, so that construction of such project by the Federal Government can be initiated immediately.

This resolution is of great importance, Mr. Speaker, first because it sets forth the vital interest which the Oregon Legislature has in expediting construction of the great John Day Dam. And may I point out at this time that the Oregon State Legislature is representative of the thinking and wishes of the electorate of the State of Oregon. Therefore this memorial presents the wishes of that electorate. I make this point purposely in answer to certain public statements which were made concerning a "mandate" having been given by the voters of Oregon to their United States Representatives to prevent legislation in support of the administration's "partnership plan" from being passed.

The Members of the Senate and House of Representatives of the State of Oregon are necessarily more closely representative of the people, and more sensitive to the views and feelings of the people of Oregon than any one Member of the United States Congress could possibly be. And now they urge that we go ahead with the John Day Dam—in this memorial they say:

Whereas the growth of the region requires over 500,000 kilowatts of new power capacity annually and such multipurpose projects as John Day must be started immediately in order to be completed and to avoid a serious power shortage by the early 1960's; and

Whereas various local public-utility agencies have offered to advance funds toward the preliminary engineering and planning costs of John Day, and have indicated a willingness to advance over one-half the estimated cost of the project to expedite its construction by the United States as a Federal project.

Opposition to new ideas in power development is quick to claim that the people share its prejudices. Those who oppose President Eisenhower's partnership plan are more willing to try to confuse and propagandize the people than they are to lay the facts before the people and let them make up their own minds. They make the fatal mistake of underestimating the intelligence of the voter. The administration's program for construction of power projects shows both imagination and courage in proposing boldly new approaches, and this memorial which I proudly present to this body shows clearly that the people of Oregon, through their elected State representatives, support it.

The memorial follows:

House Joint Memorial 2

To the honorable Senate and the House of Representatives of the United States of America, in Congress assembled:

We, your memorialists, the Senate and the House of Representatives of the State of Oregon, in legislative session assembled, most respectfully represent and petition, as follows:

Whereas the Federal Government, through its construction of multiple-purpose projects, has become a major supplier of electric power to the Pacific Northwest; and

Whereas the present and continuing growth of the region, including Oregon, requires the further and immediate development of its low-cost power potential in order to provide the energy base for industries, job opportunities, and the needs of its people; and

Whereas the John Day project on the Columbia River between Oregon and Washington is one of the major integral units in the overall plan of comprehensive development of the Columbia River and has already been authorized and approved as such by the Congress of the United States (81st Cong., 2d sess., H. Doc. No. 531); and

Whereas its construction will complete slack water navigation from the mouth of the Columbia River to Pasco, Wash., a distance of some 328 miles; and

Whereas it will provide approximately 500,000 acre-feet of storage for flood-control purposes and will also provide irrigation and recreational benefits; and

Whereas such project will produce in excess of 1,100,000 kilowatts of low-cost power, fully integrated with the Federal grid and the Northwest Power Pool and close to Oregon load centers; and

Whereas the growth of the region requires over 500,000 kilowatts of new power capacity annually and such multipurpose projects as John Day must be started immediately in order to be completed and to avoid a serious power shortage by the early 1960's; and

Whereas various local public utility agencies have offered to advance funds toward the preliminary engineering and planning costs of John Day and have indicated a willingness to advance over one-half the estimated cost of the project to expedite its construction by the United States as a Federal project: Now, therefore, be it

Resolved by the House of Representatives of the State of Oregon (the Senate jointly concuring therein), That the Congress of the United States be and it hereby is memorialized to (a) appropriate immediately the funds necessary to enable the Corps of Engineers to complete the preliminary investigations and planning for the John Day project; and (b) indicate its intention to build the John Day project promptly and solely with Federal funds by making the necessary appropriation to start construction immediately upon completing the preliminary planning or, in the alternative, enact without delay such enabling legislation as is required to permit local agencies to advance funds, under appropriate arrangements with the United States, so that construction of such project by the Federal Government can be initiated immediately; be it further

Resolved, That the secretary of state of the State of Oregon be and hereby is directed to send a copy of this memorial to the President of the United States, to the Honorable Douglas McKay, Secretary of the Interior of the United States, to the President and Chief Clerk of the United States Senate, to the Speaker and the Chief Clerk of the House of Representatives of the United States, and to each Member of the Congress.

Adopted by house January 28, 1955.
E. A. GEARY,
Speaker of House.
Adopted by senate February 8, 1955.
ELMO E. SMITH,
President of Senate.
Filed: February 9, 1955.
EARL T. NEWBRY,
Secretary of State.

STATE OF OREGON,
OFFICE OF THE SECRETARY OF STATE.

I, Earl T. Newbry, Secretary of State of the State of Oregon, and custodian of the Seal of said State, do hereby certify:

That I have carefully compared the foregoing copy of House Joint Memorial No. 2 with the original thereof adopted by the House of Representatives and the Senate of the 48th Legislative Assembly of the State of Oregon and filed in the office of the Secretary of State February 9, 1955, and that the same is a full, true and complete transcript therefrom and of the whole thereof, together with all endorsements thereon.

In testimony whereof, I have hereunto set my hand and affixed hereto the Seal of the State of Oregon.

Done at the capitol at Salem, Oreg., this 10th day of February 1955.

[SEAL] EARL T. NEWBRY,
Secretary of State.

Schools of Blaj, Rumania

EXTENSION OF REMARKS
OF
HON. MICHAEL A. FEIGHAN
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Wednesday, February 23, 1955

Mr. FEIGHAN. Mr. Speaker, under leave to extend my remarks in the RECORD, I wish to insert an address I delivered at a banquet in Cleveland on October 17, 1954, sponsored by the Association of Rumanian Catholics of America, on the occasion of the 200th anniversary commemoration of the inauguration of the schools of Blaj, Rumania:

It is with pleasure that I join in this commemoration of great import for the culture and spiritual life of Rumania. The deep appreciation I hold for my many Rumanian friends and acquaintances, as well as my long interest in the Rumanian cause, have brought closer to me many events of Rumanian history and various aspects of Rumanian national life.

I know well the illustrious place which Blaj holds in the history of Rumania. I was impressed especially by the fact that the spiritual rebirth that is indissolubly associated with the name of Blaj has been fundamentally an expression of Rumanian nationalism. The religious union with Rome came as a manifestation both of Catholic allegiance and of a strong national reaffirmation. For those pious and fiery ancestors of yours, who forged the history of

Blaj, Rome was the true symbol of Christianity, but at the same time it stood as the living reminder of the origins of their people, a people who could never renounce their national freedom and independence.

The great scholars and patriots of Blaj made their pilgrimage to Rome, both to the Vatican and to the Column of Emperor Trajan, the founder of Dacia Felix, their ancient land. The students sent from Blaj to acquire knowledge and wisdom at the "De Propaganda Fide," were driven also by that urge, which led Badea Cartan, to walk from his abode in Transylvania, with his desagi on his back to Rome, in order to give a fresh impetus to those national aspirations.

The consciousness of a heroic national past was strengthened and deepened by this contact with Rome. The Rumanian saga of eternal resistance against the barbaric invasions, their outstanding contribution in the fight to defend Christendom against the Ottoman penetration into the heart of Europe, were thus again brought to the fore in the minds of your fellow countrymen. The epic figures of Stephen the Great and Michael the Brave reminded them again of the days of national pride and independence. It was Michael the Brave, who coming to the "land beyond the forests," at Alba Julia, embodied for an historic moment the unity of all Rumanians.

The Catholic tie thus decisively helped the Rumanian cultural and national revival. This is only natural because Christianity stands for the freedom of all people. So Blaj, through its schools and religious institutions, through the spirit which gave them inspiration, became one of the most revered centers of your nation. The cultural climate of Blaj gave birth to the Latinist current which strongly nourished the national consciousness of your ancestors. In those periods of darkness, when Rumania was under a foreign rule, Blaj stood as a guiding light. It was therefore natural that the national revolutionary movement which swept over the whole of Europe in 1848, found a quick response in Blaj. This famous seat of Rumanian spiritual and intellectual life, which we are honoring today, on the 200th anniversary of the inauguration of its renowned schools, was the rallying point of the Transylvania patriots.

On the Blaj Field of Liberty, as it has been so aptly called, through the voice of Simeon Marnutiu and other patriotic leaders, the human, Christian and national aspirations of a people under foreign rule were forcefully and dramatically expressed. The great national poet, Andrei Muresanu, voiced the significance of this movement in what might be considered as the "Marseilleaise" of the Rumanian people, "Wake thou, Rumanian";

"Wake thou, Rumanian, from your sleep of death
In which you have been engulfed by barbaric tyrants."

More than a hundred years have elapsed since this call was heard for the national resurrection of an oppressed people. And now the valiant Rumanian people, who had at long last regained their freedom, are now crushed as never before by the most ruthless and Godless despotism ever known to mankind. Among the victims of Russian Communist aggression, Blaj, the stronghold of the Rumanian Uniate Church, so closely bound to Rome, of national culture and learning and of the consciousness of Rumania's Latin heritage, stands as a martyr of the Godless tyranny of communism.

The Russian invaders and their agents do everything, from intimidation to assassination, in order to eradicate all the pillars of Rumanian nationalism. Nevertheless, in spite of all their ruthless killings and inhumanities, the Russians have been unable to destroy in the heart of every Rumanian, those lasting forces which Blaj and its Field of Liberty symbolizes.

It is an incontrovertible historical fact that the most powerful and persistent driving force of the ages is that of national consciousness. This has been well demonstrated today by the resistance of the subjugated peoples against the new Red Russian colonialism. It is all the more evident that enlightened nationalism is one of the strongest barriers against communism and a necessary foundation for the establishment of a free and peaceful world. National freedom and independence expresses on the international plane what the dignity and liberty of the individual signifies in a free community. Independent and sovereign nations, however small, are thus the strongest assets for a free and democratic world. Conversely, it is well established that the sacrificing of national entities to autocratic empires constitutes the major cause of internal strife, international restlessness and, eventually, a major war.

If we look with confidence to the immense and invincible forces of the human soul, we who are enjoying freedom and its God-given benefits, we must squarely face up to our own responsibilities for the tragedy of the enslaved peoples. The errors on our part which have been and are being made, either through direct support of the Godless tyranny, or through our lack of support for the victims of that tyranny, throw a dubious light on our own future as a free nation. There is no doubt in my mind that if we persist in ignoring our moral duty toward the subjugated nations, the consequences of such a course will work against our own security and freedom. Those of us who have made a careful study of the problem are keenly conscious of the gravity of the present situation, the fruit of past errors. The hundreds of millions of human souls forced under the tyranny of the Red yoke, if completely abandoned by us, as the so-called policy of coexistence requires, would eventually be reduced to the role of unwitting instruments in the advancement of the objectives of our enemies. Those objectives lead to world domination. On the other hand, we know these peoples are our true allies and that when we recognize and support their moral rights to national freedom and independence, we give fresh encouragement to their will to resist and strengthen their fortitude to struggle on until the day when the foreign occupier of Rumania and all the other non-Russian nations held captive within the Red colonial empire are once again free and independent.

1955 Lincoln Day Address

EXTENSION OF REMARKS
OF

HON. JAMES E. VAN ZANDT

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1955

Mr. VAN ZANDT. Mr. Speaker, it was my privilege during the period set aside for the observance of Lincoln's Birthday to deliver the following address to Lincoln Day dinners at Keene, N. H.; Indiana, Pa.; New Brighton, Pa.; and Huntington, Clarksburg, and Charleston, W. Va.:

LINCOLN DAY 1955

You have honored me by your invitation to join in this annual tribute to the memory of the immortal Lincoln, our first Republican President.

Lincoln, in all his greatness, was a common man with common attributes, yet by character and self-education he elevated himself to such a degree that world historians acclaim him as one of the six greatest personalities in the history of the human race.

Thus, as the Great Emancipator's soul took flight from his weary body, Edwin Stanton, Secretary of War, proved himself a prophet when he announced his death in these historic words: "Now he belongs to the ages."

Many times the question is asked, Why do we look to the philosophy of Abraham Lincoln for inspiration and guidance in the conduct of public affairs even though 90 years have elapsed since his passing?

The answer is that Lincoln was a common man whose words and deeds enshrined him forever in the hearts of mankind.

But this great Republican President did not reach the heights of world acclaim without experiencing heartaches and bitter disappointments.

A close study of his many reverses in life reveals that few men could have weathered such a series of trials and tribulations.

When you read of Lincoln's life, you are reminded of his statement in speaking of his lack of formal education when he said, "I do not know much—my schooling was limited to reading, writing, and ciphering to the rule of three."

This statement reveals the humility and sincerity of Lincoln, who was not ashamed of his early life and humble surroundings.

This humility of Abraham Lincoln was reflected in his first campaign for a political office when he was a candidate for the State Legislature in Illinois in 1832.

At that time, Lincoln said, "I presume you all know who I am. I am humble Abraham Lincoln. My politics are short and sweet, like the old woman's dance. I am in favor of a national bank. I am in favor of the internal-improvement system, and high protective tariff. These are my sentiments and political principles. * * *"

On clearly defined political principles Abraham Lincoln was content to place his future in the hands of the American people.

It took courage on his part to stand on his principles and to bypass the political magic of promising everybody everything in the hope of garnering a vote, a practice that became so popular with the New Dealers and Fair Dealers.

Lincoln, because of his courage and convictions, went down to defeat in 1832 as a candidate for the legislature.

He was defeated again in business in 1833 and lost everything of a material value.

In 1832, as candidate for speaker, he was again defeated.

In 1840, he lost as a candidate for elector.

In 1843, he was defeated as a candidate for Commissioner of the General Land Office and also as a candidate for nomination to Congress.

In 1848, he lost in his campaign for reelection to Congress.

In 1855, he was the losing candidate for United State Senator.

In 1856, he was defeated as candidate for Vice President.

In 1858, he was defeated as a candidate for United States Senator.

But in 1860, he was elected as the first Republican President of the United States.

What a glowing tribute Lincoln's crowning victory was to his perseverance and to the truth of the old saying, "You can't defeat a man who will not quit!"

Abraham Lincoln refused to quit because he knew in his heart that the principles he espoused must be adhered to if this young Republic expected to become strong materially, morally, and spiritually.

He declined to surrender or compromise his principles with the result that his patience and perseverance have become a national symbol.

By comparison, the Republican Party of Abraham Lincoln can take a lesson from his determined and persistent attitude.

The Republican Party is still smarting over the reverses suffered in the November elections of 1954 when we lost control of Congress and met a similar fate in some State elections.

As members of the Party of Abraham Lincoln, we should honor his memory by abandoning our negative thinking and present a united and militant front behind the forward-looking program of our Republican President, Dwight D. Eisenhower.

It has been a little more than 2 years since the American people repudiated 20 years of the New Deal-Fair Deal brand of political philosophy by entrusting the affairs of Government to a Republican President.

There is none who can deny that under President Eisenhower remarkable progress has been made in the transition from a wartime to a peacetime economy.

At the same time, a more realistic and firm foreign policy has been formulated with the result that Uncle Sam is no longer being pushed around in the field of foreign affairs.

It is gratifying to realize that this new, firm foreign policy under President Eisenhower is responsible for the following accomplishments, namely:

(a) Brought an end to the Korean war.

(b) The Iranean oil situation has been ironed out.

(c) The explosive problem of the Suez Canal which concerns the British and the Egyptians is being settled in a peaceable manner.

(d) The troublesome problem of Trieste which has been a threat of war for years has been settled.

(e) The Communist-inspired activities have been halted involving countries in Central America.

(f) International relations are improving with respect to the arming of West Germany as part of the defense against Communistic aggression, and finally

(g) In the Middle East, the real desire of the United States for peace and friendly relations is truly understood.

It should be remembered that President Eisenhower inherited the hopeless situation in French Indochina which had deteriorated to the point where it was beyond diplomatic solution.

Yet today in French Indochina, there is hope of saving at least a part of that area from the Iron Curtain.

In true Lincoln style, President Eisenhower redeemed his election pledge to the American people that he would consult Congress before sending United States Armed Forces into conflict.

Unlike his predecessor, Mr. Truman, who sent American troops to Korea on his own initiative, President Eisenhower asked and received from Congress the authority to employ United States Armed Forces in defense of Formosa, the Pescadores and related positions and territories in that area.

By consulting Congress regarding the Formosa situation, President Eisenhower clearly demonstrates his bipartisan foreign policy which is a vital factor in uniting the American people.

At the same time, President Eisenhower served unequivocal notice on the Chinese Reds that they will be at war with the United States if they attack the Formosan area.

This bold decision which results from the firm foreign policy on the Eisenhower administration is at the same time a blunt warning to Soviet Russia that its policy of wars by proxy or through its satellites will no longer be tolerated.

This courageous attitude on the part of President Eisenhower will restore not only our dignity as a nation but it also serves notice on Russia that we are sick and tired of her role as an enemy of world peace.

In backing up this bold and courageous decision of President Eisenhower, we have his assurance that every single order concerning the Formosan situation will have to clear his desk before it receives approval.

What a contrast this is to the conduct of the Korean war when the State Department headed by Dean Acheson tied the hands of General MacArthur by preventing American forces from pursuing and destroying the Chinese Reds north of the Yalu River in Korea.

It was this spineless and vacillating foreign policy that prolonged the Korean war, took the lives of 143,000 of the cream of American youth and left us with the irritating and troublesome problems we have now concerning the Chinese Reds.

The result of the futility of the Dean Acheson policy in Korea is demonstrated by the fact that it was America's first military defeat, not because our forces were wanting in valor, courage, or sacrifice, but only because it was a war rigged against victory from the very outset.

This statement is supported by every American field general who served in Korea.

For example, testimony given before a committee of the United States Senate reveals that General Stratemeyer, commander of the United States Air Force in the Far East, complained: "The enemy can hit me where I am based. I cannot hit them."

Gen. Edward M. Almond in answer to a question by a Member of the United States Senate as to how many opportunities did our side have to win the war, answered by saying: "Two * * * First, in November 1950, following the historic Ichon envelopment of the North Korean forces; and second, in June 1951, when some 50 Chinese divisions were trapped and routed clear across the Korean peninsula."

General Almond continued his testimony by saying: "At that point, 2 months after President Truman had fired General MacArthur, the whole American offensive was halted and abandoned on direct orders from Washington."

Gen. Mark Clark, in his testimony, said that Chiang Kai-shek on more than one occasion, had offered General Clark three of his best divisions with supporting air.

General Clark said, "I recommended it shortly after I got over to the Far East, but my recommendations were never answered."

Questioned as to whether he agreed with General MacArthur that the enemy should not have been allowed a sanctuary beyond the Yalu River, General Clark replied, "Yes, sir. I agreed at the time when the Chinese came in."

Continuing, General Clark said: "They came across the Yalu and killed our men.

"I think at that time we should have indicated that we were at war with Red China and should have retaliated with everything we had at our disposal."

General Clark was then asked, "Did you ever fight a war like this before and would you ever want to fight another one like it?"

General Clark replied with an emphatic, "No, sir."

These quotations from the testimony of three of America's great generals prove the oft-repeated assertion that officials in our State Department by their bungling tactics and with the consent of President Truman denied our American forces the opportunity to win the Korean war.

By contrast, President Eisenhower, as Commander in Chief of the Armed Forces and fortified by his outstanding military experience on the field of battle, assures us that the folly in Korea will not be repeated.

We have the added assurance that America with an adequate national defense in this atomic-hydrogen age stands ready to give the American people the maximum of national security even if it requires using atomic and hydrogen weapons.

In support of this firm and realistic foreign policy on the homefront, the Eisenhower administration as the result of action by the Republican-controlled 83d Congress is meeting the problem of Communist infiltration.

This is made possible through a subversive-control program that is proving a mighty weapon to the Department of Justice and its FBI in the all-out effort to combat the Communist threat within our country and the worldwide menace of international communism.

This two-fisted militant anti-Communist program is designed to stop playing patty-cake with the Communists here and abroad.

It permits the granting of immunity to witnesses who are willing to testify concerning subversive activities but who heretofore have invoked the fifth amendment against self-incrimination.

It provides the death penalty for peacetime spies.

It makes bail-jumping a serious crime.

It closes many loopholes in existing laws through which Judy Coplon and others of her kind escaped prosecution.

It provides for the loss of citizenship to persons who knowingly engage in Communist conspiracy.

It requires the registration of Communist-action and Communist-front printing equipment.

It increases the penalty for harboring or concealing a fugitive who is wanted on a felony charge or who has been convicted of any offense irrespective of whether it is a felony or a misdemeanor.

It denies Government pensions to convicted felons like Alger Hiss.

In addition, the Republican-controlled 83d Congress enacted a law which outlaws the Communist Party of the United States.

It likewise applies to any successor organization whose purpose is the overthrow of the Government of the United States or any political subdivision therein by force or violence.

This subversive control law makes it a felony for any person to be a member of such an organization when he has knowledge of the revolutionary activities of such an organization.

In addition to this subversive-control program and our vigilant attitude in tracking down, exposing, and prosecuting Communists one of our mightiest weapons is a strong and solvent America.

For that reason, our domestic economy is of paramount significance because if we allow it to decay morally, spiritually, and financially, we become an easy and certain prey to world communism.

The Eisenhower administration's program designed to transfer the economy of our country from a wartime to a peacetime basis has been acclaimed by friend and foe as being in the best interests of the United States.

Unfortunately, the dove of peace brought with it serious economic dislocations in certain areas of the country where unemployment occurred when the manufacture of war materials was terminated.

In general, however, business is good and the savings and spending of the American people as a whole have increased.

The President's dynamic and progressive legislative program resulted in a revision of the tax structure that brought about one of the greatest tax reductions in the history of the Nation.

In addition, the Federal Government is now being operated at greater economy, with the result that it has been possible to lessen the tax burden on the people by many billions of dollars.

President Eisenhower's program in the field of health, social security, highways, housing, agriculture, and commerce has attracted bipartisan support which is indicative of its real merit.

Ladies and gentlemen, this dynamic Eisenhower program that is building a stronger America is a tribute to the genius and sincerity of our Republican President.

With less than 2 years remaining of his present term in the White House and confronted by a Democratic-controlled Congress, make no mistake that President Eisenhower's dynamic and progressive program is facing the acid test.

With the 1956 Presidential election in the offing, we Republicans cannot afford dissension in our ranks or sulking in our tents.

Therefore, it is incumbent upon us as disciples of Abraham Lincoln to close our ranks and present a united front in meeting Democratic attacks on our President and on the Republican Party.

May I warn you as a battle-scarred veteran of the political arena, that the Democratic Party will leave no stone unturned to lure us into political booby-traps in its effort to recapture the White House.

Frankly, we can expect a knock-down drag-out political fight with no holds barred in the 1956 campaign.

While we listen to loud protests about political smears, I predict that the campaign of 1956 will outsmear the despicable New Deal attack on President Hoover in 1932.

The campaigns of 1952 and 1954 will prove to have been "cream-puff" affairs in comparison to the 1956 campaign already underway and spearheaded by Chairman Butler of the National Democratic Committee.

Chairman Butler's attacks on Vice President NIXON reveal the pattern to be followed in next year's campaign.

These smear attacks make a mockery of the so-called Democratic pledge of bipartisan support of the Eisenhower program.

Fellow Republicans, time is running out on us.

This is February 1955 and already the Democratic campaign to recapture the White House and continue Democratic control of Congress is well underway.

Therefore, I say to you in all sincerity, it is time that we Republicans spring into action.

As I have said before, let us bury our party differences, close ranks and join hands on the firing line.

First. We should recruit more followers, especially among the younger generation.

Second. We should tell the American people of the forward-looking program of the Eisenhower administration and the success of its efforts to restore honesty and integrity to Government.

Third. We should refresh the memories of the American people of the 20 years of Roosevelt-Truman rule whose only means of providing employment was based on two wars with jobs and overtime at the expense of the flesh and blood of American fathers and mothers.

Fourth. We should convince the American people that as a Nation we are at peace and that the transition from a wartime economy cannot be accomplished overnight and without some economic dislocations.

Ladies and gentlemen, as Republicans we have nothing to hide in giving an account of the stewardship of the Eisenhower administration during its 2 years in office.

The Republican Party is leading this Nation out of the valley of destruction by providing real leadership in President Dwight D. Eisenhower.

I repeat, we must bury all selfish desires and settle petty differences that if not compromised will divide our ranks and render us completely helpless.

Fellow Republicans, the task before us is to restore to Republican control our city halls, our courthouses, our Statehouses, and the Congress of the United States as well as to retain control of the White House in 1956.

As I have warned, the hour is getting late.

This is no time for party bickering or weak-kneed Republicans who are timid about reshouldering the pack and moving into battle.

Let us never forget that in 1952 after 20 long years of political exile, the American people gave the Republican Party control of Congress and the White House.

At this moment with the Democrats again in control of Congress, further defeats in 1956 could lose us the Presidency and the opportunity to recapture control of Congress.

Therefore, fellow Republicans, I beseech you to guard against any defeatist attitude by meditating on the long 20-year battle we had to regain the White House and Congress in 1952.

In addition, let us not lose sight of the fact that Abraham Lincoln after 10 crushing defeats from 1832 to 1858 finally achieved a glorious triumph in 1860 when he was elected as the first Republican President of the United States.

In commemoration of the 146th anniversary of the birth of Abraham Lincoln, let us rededicate ourselves to the task before us—the preservation of our form of Government, keeping in mind as the great Emancipator did that, "You can't defeat a man who will not quit."

In 1952 with President Eisenhower as our standard bearer, we promised the American people who were weary of the New Deal-Fair Deal philosophies a new birth of freedom.

We are well on the road to redeeming that pledge under the brilliant and dynamic leadership of our beloved President, Dwight D. Eisenhower.

Therefore, in the knowledge that our cause is just, let us reconsecrate ourselves to the task before us by presenting a united front.

At the same time, let us recall with pride and confidence that down through the years the Republican Party has faithfully followed the sage advice of Abraham Lincoln.

As we gird ourselves for the 1956 campaign, let us adopt as our battle cry the ringing words of Abraham Lincoln uttered nearly 100 years ago when in 1856, during the formative years of the Republican Party, he said:

"Let us, in building our new party, plant ourselves on the rock of the Declaration of Independence and the gates of hell shall not be able to prevail against us."

District of Columbia Fine Arts Auditorium

EXTENSION OF REMARKS

OF

HON. EMANUEL CELLER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1955

Mr. CELLER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following statement made by me before the House District Committee, Wednesday, February 23, 1955, on H. R. 630, District of Columbia Fine Arts Auditorium:

Progress in a democracy has many and varied faces. Sometimes it has a swift look about it which carries action forward by leaps and bounds. Sometimes it has a stubborn look and great effort is required to relax its hold. At other times it has an indifferent look, and endless patience and resolution must be applied before interest can be sparked in it. It is one of our great strengths as a democracy that will and determination are demanded, required and permitted, so that the strides we make are our own and belong inevitably to us all.

These thoughts have been turning around in my mind as I look at the bill we have before us, H. R. 630, to create a Federal Commission to formulate plans for the construction of a civic auditorium in the District of Columbia. This bill is part of a larger program to encourage the growth and development of the fine arts throughout the Nation, which has been the concern of many Members of Congress for the past 20 years. It is only a small part, but a most vital one. And as I consider its provisions, I think of the many times in the past that I have been called upon to speak on the importance of such a program, and the many times I have asked permission to do so. But the patience I spoke about earlier that is demanded of us in a democracy, and the grace that that patience is permitted us, gives me great courage that we are indeed on our way.

We are often spoken of by our many friends from abroad as the country of experts. Give us a material thing and we will plumb the depths of its capacity, and when we have reached those depths we will search even further and our resourcefulness will find greater depths than man could have envisioned. Our friends from abroad respect our known capacity for such imagination and creativity, but in their hearts, and yes, even on their tongues, they belittle our culture and refer to us as crass materialists. Nothing could be farther from the truth. Of course, we have unlimited vision in our industry. Of course, we believe in a high standard of living for all, and of course, we will continue to use our inventiveness to the full in that direction. But we as a Nation love culture. We have respected it since our Founding Fathers wrote the Declaration of Independence in words which ring out forever not only in faith but in beauty as well.

Apparently, we have not had the time as a country to solidify this love of culture into a thing for all to see. But as a people we have demonstrated time and time again that it is deep within our hearts. Our songs are sung all over the world. Our books are read all over the world. But our art, our theater, our opera, our music have not yet found their full rein. They have not as yet become the integral part of our lives which our industrial prowess has already defined. As a Nation so far developed, so great a power on this earth, so responsible to the hope of peace on earth, we cannot afford to dally any longer on our cultural front. It is not only because we need it for our own happiness and fulfillment, but also because we need it to combat forces in our world today which abuse every lack and feed on it like vultures, deadening hope and spirit wherever they can.

It has been said that democracy is difficult to define to peoples who have not lived under it. The arts, however, have an international language of their own. They speak a universal language which all who live on this earth can understand. They speak to the spirit of man—to his hope and his faith and his longing. They can reach out and spark the hearts, where things cannot even touch them.

Let us begin in the Capital of our great Nation, and build a center for all to see. I have traveled all over the world and have found beautiful cities in beautiful climes. When I return to Washington, I feel great pleasure in the physical beauty which meets my eye, and I am proud that it is often called the capital of the world. But if we wish to be a nation which can speak to the hearts of mankind, we must bring together and plant the fruits of our genius, talent and ability in the fine arts, and let them flourish in our Capital.

H. R. 630, and all the other similar bills which are being discussed at this hearing, is a modest one indeed. It asks for an appropriation not to exceed $25,000, for a purpose which can do much toward making this city one of the cultural centers of the world. We can afford this sum. Those of us who have spoken repeatedly of building a national theater, of creating a Fine Arts Commission, and other projects to encourage and develop the fine arts in our land, look to this measure as a significant beginning of a great hope.

United States Surplus Wheat Gift to Russia Sheer Folly

EXTENSION OF REMARKS
OF
HON. MICHAEL A. FEIGHAN
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Wednesday, February 23, 1955

Mr. FEIGHAN. Mr. Speaker, there has been considerable discussion about the critical food shortage in the Soviet Union, and some speculation as to the effect this shortage might have upon the stability of the Russian autocrats sitting in the Kremlin. On the other hand, it has been suggested that since we have a wonderful bounty of foodstuffs accumulated as a surplus over a period of several years, that we should turn over a goodly part of this surplus to the Communist masters for distribution by them throughout their empire. The argument is advanced that this would be a great humanitarian act and that we would win many friends and stimulate better understanding between the Communist world and our free society.

Another point of view has been advanced that since one of the principal reasons for the critical food shortage within the U. S. S. R. has been the resistance of the farmers and their refusal to cooperate in the collectivist farming scheme of the Russians, there seems little doubt but that the farmers in the Soviet Union who despise the Russian Communists, have set out to create a crisis by creating a critical food shortage. It is reasoned, therefore, that we, a free people, should not upset the hard-earned gains of the farmers in the U. S. S. R. who are engaged in a death struggle with the Russian tyrants.

On Wednesday, February 23, there appeared in the Cleveland News, an editorial entitled "United States Surplus Wheat Gift to Russia Sheer Folly." This editorial, in my considered judgment, is the most practical analysis I have yet seen on the question as to whether we should give or trade any of our surplus wheat to the Russian tyrants. It expresses a most refreshing point of view and I commend it to the reading of every Member of the House:

The United States Information Agency, which operates the Voice of America network, reports Russia's massive drive to step up farm output has failed so badly that the Soviet population has less grain per person than in 1926.

After more than a quarter of a century of collective farming under communism, says the USIA, the Russian people are still crtically short of foodstuffs, and livestock production is 3 million less today than before the Bolshevik revolution of 1917.

Malenkov walked the Kremlin plank because he failed to improve Russia's agricultural output.

This brings us to the current suggestion of some Members of Congress to President Eisenhower that the United States make a gift of some 350,000 bushels of our surplus wheat to Russia as a "humanitarian act" which would improve relations between the Soviet and this country.

There is no question that there is a serious Russian food shortage, but not so grave but what Russia sold thousands of bushels of its wheat to Iran earlier this month.

The United States has a big wheat surplus, probably enough to supply this country's needs for 2 years. But to make a gift of 350,000 bushels of our surplus wheat to Russia seems to us a dubious proposition. If the Kremlin rulers would tell the Soviet population where the wheat came from, that it was a gift and why such a gift was necessary, then the proposal might possibly be in order.

Such knowledge, however, would never be given the Russian people by the Kremlin dictators. It would spoil their whole international act.

When the Marshall plan was inaugurated after the last war, Russia was responsible for those "Yankees go home" placards that appeared all over Western Europe, if you recall.

It would not pay now for the Kremlin to admit to their victims of terror within Russia that America is a humanitarian nation of people who have no quarrel with the Russian people.

Under the circumstances, it would be sheer folly and fantastic for us to turn over any surplus United States wheat to the Soviet bosses.

Once the gift was made, they'd laugh in our faces.

The Natural Law—The Family: The Basis of All Good Government

EXTENSION OF REMARKS
OF
HON. GORDON L. McDONOUGH
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, February 23, 1955

Mr. McDONOUGH. Mr. Speaker, the basis of all good government for orderly society, for the greatest good for the greatest number springs from the family unit, which springs from the natural law. Any government that overlooks the family or subordinates it to the state—the state which depends upon its very existence because of the family unit, controverts the natural law and thereby becomes a dictatorship, an oligarchy, an oppressive government, against the family and the natural law.

Communism in the Russian Soviet Union and Red China are classic examples of the type of government which denies the family unit and violates the natural law. In these governments the state is supreme and all family units are pawns of and are dominated by the supreme state.

The United States is the direct opposite, we recognize the family unit as the basis of and the reason for the existence of the state and we also recognize that the family unit permits the state to exist and can abolish it, if the state violates the natural law. Here the family unit is supreme, not the state.

The following statement by Dr. William V. Lawlor is a clear and easily understandable expression of the importance of the family unit and its place in and relation to Government. The United States Constitution recognizes the great power and value of the natural law and the family unit in this free and independent Nation:

There is no authority or agency operated by the State that does not spring from the basic unit of society—the family. There is no organization or agency or power within the State or beyond it that has any claim to validity unless it operates in conformity with that natural law that has dictated the very existence of the family.

Just as the parent has the right to delegate his authority to the various segments of society, so has he the right to withdraw it. When the parent sees the State or any of its segments violating that natural law, he has not only the right to withdraw such authority, but he has a duty to withdraw it. * * * The preservation of the family, operating according to the moral code upon which it is founded, is the only fundamental excuse for the very existence of the State.

Then and Now

EXTENSION OF REMARKS
OF
HON. HAROLD O. LOVRE
OF SOUTH DAKOTA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, February 23, 1955

Mr. LOVRE. Mr. Speaker, many times during each session we are given many opportunities to hear our colleagues speak outside the Halls of Congress. We all receive many invitations, and, time permitting, we usually attend. I had the pleasure yesterday of hearing one of the finest such talks I have heard since coming to Congress. It was delivered by our very esteemed colleague from Ohio, Representative CLARENCE J. BROWN, I call this talk to your attention because it serves as a caution to all of us:

ADDRESS BY HON. CLARENCE J. BROWN, OF OHIO, BEFORE THE DISTRICT OF COLUMBIA SOCIETY, SONS OF THE AMERICAN REVOLUTION, FEBRUARY 22, 1955, WASHINGTON, D. C.

Mr. Chairman, ladies, and gentlemen, when my good friend, Colonel Baxter, extended the invitation to me to be with you here today I broke a rule established some time ago not to make public appearances such as this while Congress is in session and promptly accepted. I did so, not only because of my high regard for the colonel, and my recognition of the Sons of the American Revolution as one of our greatest patriotic organizations, but also because I have reached the place where it has become virtually impossible for me to sit quietly on the floor of the United States House of Representatives while some Member goes through the mockery of reading George Washington's Farewell Address to a legislative body which, in recent years, has consistently failed or refused to heed, or to pay attention, to the advice and warnings given by the Father of our Country in that address.

So, on this 223d anniversary of the birth of the immortal Washington, I shall not devote my time to, or bore you with, repeating the usual tributes to the Father of our Country. Instead I have chosen the subject Then and Now, and shall attempt to give a rather condensed comparison of our beloved country and its Government, as it existed at the end of Washington's first term as President, and as it exists today.

Washington, as you will recall, took office as President, under our newly created system of representative Government as defined by the Constitution, in April of 1789.

At the end of his first term, in 1793, the United States was made up of 15 States, 2 of which had been added to the original 13. They were—Connecticut, Delaware, Georgia, Kentucky, Maryland, Massachusetts, New Hampshire, New Jersey, New York, North Carolina, Pennsylvania, Rhode Island, South Carolina, Vermont, and Virginia. Of these only Kentucky lay west of

the Alleghanies. Today, as you all well know, the Union consists of 48 States, embracing all of the land and territory between the Atlantic on the east, the Pacific on the west, Canada on the north, and Mexico on the south. But even now legislation is pending in the Congress to admit into the Union, two additional Territories as States—Hawaii and Alaska—neither of which is contiguous to any of the 48 States. And in addition, of course, Texas has the right, under the Annexation Agreement, to divide into five States any time that great empire may wish to do so.

The first United States census was taken in 1790, and fixed the population of the United States at 3,929,000. By the time the 1800 census was taken the fledgling Republic, had grown in population by 1,400,000—or by more than 34 percent—to a total of 5,308,000 people.

According to the first census and during Washington's Presidency, Virginia was the most populous State, having a population of 748,000, almost twice that of any other. Pennsylvania was next in population, having 434,000 persons within its borders. North Carolina was third, with 394,000, and New York—believe it or not—ranked only fourth, with a population of 340,000.

Back in Washington's time the Federal Government had its national headquarters in Philadelphia, the city of brotherly love, although the Father of our Country was even then planning the establishment of a new Federal City which was later to bear his name, in the District of Columbia—a 10-mile square area to be carved out of the States of Maryland and Virginia—along his beloved Potomac and near his home at Mount Vernon.

Under the Constitution, upon which the new system of government headed by Washington was established, and which, of course, is still in effect, each State has two Senators representing it in the United States Senate.

So, during Washington's administration the membership of the Senate totaled only 30, as compared to the present-day membership of 96. The House of Representatives consisted of 105 Members, based upon the census of 1790. Today, and for more than three decades past, the United States House of Representatives has had 435 Members, also apportioned on a population basis.

During Washington's first term the individual Member of Congress represented an average district population of about 40,000 people. Today each Member of Congress represents an average of nearly 400,000 persons—somewhere around 380,000 to be more accurate.

Back in the days when the new Republic was just getting underway, a Member of Congress did not have as many duties and responsibilities, or as much correspondence to handle, or messenger work to do for his constituents, as during the present time, but he certainly had a great deal more difficulty getting to his job at the Nation's Capital. It may be of interest to know that in journeying to Philadelphia for the meeting of the first Congress in 1790, 1 Member of Congress was shipwrecked, 2—and I quote, "were forced to land with considerable difficulty on Cape May and travel the remaining way to Philadelphia in a wagon"—end of quote; 2 Members suffered grave injuries when a stagecoach upset; and 1 reported he was—and again I quote, "forced to travel by ship for 16 days through perpetual storms with serious and painful effect upon my digestive apparatus."

Those who served in the early Congresses of Washington's time did not need as much clerical help as we do today, for the only means of communication between Philadelphia and the various congressional districts of the United States, as well as the rest of the world, were: (1) The new and negligible postal service, (2) by special messenger, (3) quote, "any trustworthy person who happened to be traveling in the right direction," unquote, and, (4) masters of sailing vessels.

In fact, the postal service was, not only new, but most irregular, in those days. At the very best, according to the records, it took from 4 to 7 days to get a letter from Boston to New York, around 13 days for a letter mailed in Philadelphia to reach Georgia, and at least 20 days for a Kentucky Congressman to get a letter from Philadelphia back to his home district in the blue grass State. Such time schedules were kept, of course, only if everything went right, and quite often there were long and serious delays. For instance, a letter written by Governor Telfair of Georgia to Thomas Jefferson, posted January 2, 1791, did not reach its destination until March 4—61 days later.

Of course, foreign communication was even more difficult, for to complete an exchange of correspondence between America and Europe, back in those days, required an average of about 6 months. And difficulties often arose through capture, pirating or shipwreck, which resulted in the loss of much overseas mail.

While George Washington was President, Members of the House and Senate of the United States received the munificent salary or pay of $6 a day for their services, as compared to the $15,000 annual salary now paid Members of Congress, and to the $25,000 salary provided in the new Federal pay legislation which cleared the House last week.

So, perhaps many of us who now serve on Capitol Hill should be grateful, not only for the difference in pay, but also for the difference in travel conditions, which now permit a Representative or Senator from California to leave his western home in the early morning and arrive in Washington in time for the opening of the Congressional session at 12, noon, of the same day.

But many present-day Members of Congress may be none too appreciative of the great improvement which has taken place in the Nation's postal service since the time of Washington. For instance, our modern postal service brings an average of 400 communications of different types to my office each day, all requiring the attention of myself and my secretarial staff. And believe it or not, there are times when my congressional mail reaches a grand total of 1,500 to 2,000 pieces in a single day.

During his first term as President, Washington had a cabinet consisting of 4 members, as compared to the 10 in the Eisenhower Cabinet. They were the Secretary of State, Thomas Jefferson; Secretary of the Treasury, Alexander Hamilton; Secretary of War, Henry Knox; and Attorney General, Edmund Randolph. In addition, President Washington had a Postmaster General, Timothy Pickering, who was not a member of the Cabinet. Vice President John Adams had little work to do, and did not encounter too much difficulty in presiding over the Senate, with a membership of 30, for the short time it was in session.

The executive branch of the Government, under Washington, was made up of three departments—State, Treasury, and War. Today, as I mentioned a moment ago, President Eisenhower has ten members in his Cabinet, representing as many departments, and in addition the Director of Mobilization, the Director of the Budget, and the Director of Foreign Operations Administration, sit with the Cabinet regularly, while the Secretaries of the Army, Navy, and Air Force, frequently join the group.

So actually today, on this Washington's birth anniversary of 1955, our Government is made up of 13 departments and 48 independent agencies, boards, and commissions, which, in turn, include another 2,133 different operating components to which personnel assignments are made.

You may be interested to know that, when Washington was President, the Treasury Department maintained the most extensive establishment, with agencies and officials in every large town, and in every section of the country. There were tax collectors then, even as now, though not in nearly as great a number. Our original Treasury Department, of course, had the responsibility, not only for the routine conduct of the young Nation's fiscal affairs, but also for such diverse functions as the collection of customs and tonnage dues; establishment of lighthouses, beacons, buoys, and public piers, registration and clearance of vessels; carrying of mail; surveying of public lands in the western territory; supervision of the banks of the United States; the granting of bounties on fish; and the collection of excise and other taxes.

Washington's War Department, besides operating and managing the Army, handled payment of pensions to disabled war veterans; regulated trade with the Indians; made grants of land to veterans, and regulated the militia of the several States.

The Department of State, then had as its primary duty, the conduct of our foreign affairs, as it does now. But it also granted patents and copyrights, supervised Federal marshals and attorneys, helped govern the Western territories, managed the Mint, took the census, and performed other miscellaneous functions.

The United States Attorney General, although he attended Cabinet meetings, had almost no administrative and few legal duties. It was not until the end of Washington's service as President that the Congress became magnanimous and furnished an office for the Attorney General, and generously appropriated funds to hire a clerk for him.

By the end of Washington's first term the Federal Government had established some nine different field services, outside of the Military Establishments and territorial governments. These services included Customs, Lighthouses, Attorneys of the United States, Federal Marshals, Post Offices, Revenue Cutter service, Indian Superintendents, Commissioners of Loans, and—believe it or not—the Internal Revenue Service.

Even back in those days, the United States had a so-called civil service covering civilian employment totaling 780 persons, not including the Deputy Postmasters of whom about 660 worked for the Department of Treasury. It may be interesting to note that as of last December the total number of civilian employees of the Federal Government, according to our mutual friend Senator BYRD, and his Joint Committee on Federal Expenditures, stood at 2,368,073.

But back in Washington's time the central Government's office staffs, located in Philadelphia remained small, and most Federal employees worked out in the field. For example, the largest Department of Government at that time—the Treasury Department—had only 70 persons employed at its departmental headquarters in Philadelphia. State Department personnel consisted of 5 clerks, 1 interpreter, 1 doorkeeper, and 1 messenger, in addition to the Secretary of State himself.

At the end of Washington's service as President, the War Department had grown to where it had a central staff of 17 people—believe it or not—while Postmaster General Pickering performed all of the duties of his governmental position in 2 rooms of his own home, with the aid of 1 assistant and 1 clerk.

President Washington and the United States had diplomatic representatives in just five major foreign capitals—London, Paris, The Hague, Madrid, and Lisbon.

Most Federal officers of that time received their official income from two main sources, salaries and fees. Today the fee system, as far as the Federal Government is concerned, as well as in most States, has been entirely eliminated. President Washington drew the

highest salary of all the Federal officials of his day—$25,000 annually, plus some expenses, which amounted to much less than his salary. The Secretaries of State and Treasury each received a salary of $3,500 annually; while the Secretary of War drew but $1,500. Perhaps the Secretary of War's low pay was accounted for by the fact that the United States was not then trying to feed, finance, and police the entire world, and uniformed Americans were not serving in more than 75 different lands outside continental United States. Under Washington, who appears to have been a frugal man, the Comptroller of the Treasury of the United States and the Governor of the Northwest Territory, each drew salaries of $2,000, while the Clerk of the House and Senate received the magnificent yearly amount of $500 each.

Most Federal officials of that period—outside of the ones just mentioned—were compensated for their services through fees. Some did quite well. For instance, a number of the collectors of customs had higher annual incomes from fees than the Secretary of the Treasury received in salary. At the other end of the line, however, many postmasters in small towns were paid as little as $25 per year.

As Commander in Chief, Washington had under him an Army of about 5,000 men, but no Navy or armed ships of any kind, until 1794. And I have been unable to find, from sources I believe to be reliable, where George Washington had any kind of an Air Force at all. Today our Army, Navy, and air services consist of well over 3 million men. But when George Washington, in his first term, moved to put down the so-called Whisky Rebellion in western Pennsylvania, he was compelled to enlist the aid of State militiamen, at a time when the States maintained complete control over the activities of their military units.

The Father of our Country, during his two administrations as President, did not have too much money with which to "play around," and certainly not the $60 to $100 billion yearly budgets which have been available to recent Presidents. During the 8 years of Washington's Presidency, Federal revenues averaged $5,717,000 annually, while—believe it or not—annual Federal expenditures during the same period averaged $5,776,000, which indicates that even the Father of our Country had to worry about "red ink," and Treasury deficits.

Most of the revenues of that day came from customs duties, and, later, from the first excise taxes which were imposed by Congress in 1791 on spirits distilled in the United States. It was this excise tax, by the way, which touched off the Whisky Rebellion. The Federal Government received only meager funds from postage, sale of public lands, fines, penalties, and forfeitures. And at the end of Washington's first term, the public debt of the United States totaled $70 million, or perhaps a few dollars more. Today our public debt stands at approximately $280 billion—or, to put it another way—280 thousand million dollars.

But to turn to our Government of today. You may recall it was my original idea and legislative bills which created both the First and Second Commissions on the Organization of the Executive Branch of the Government, better known as the First and Second Hoover Commissions. You may also be aware that I served as a member on both Commissions, and have devoted more than 4 years of my life to the study of the organization and functions of the Federal Government, especially the executive branch.

You may be interested in knowing that, in comparison with the 3 postal workers of Washington's time, the Post Office Department now has 8,688 employees here in metropolitan Washington alone, and a total employment of 508,519 throughout the country; that the State Department now has 5,106 employees in Washington, and a total overall personnel of 21,061; that the United States, through its State Department, maintains 68 embassies and 9 legations in 77 foreign countries, in addition to the 106 consulates, which are administered in 105 foreign colonies, territories, and directorates. The Defense Department alone, including the Army, Navy, and Air Force, employs 1,144,994 civilians, of which some 340,000 are nationals of other nations, working overseas. In addition, of course, we have 3,300,000 Americans serving in our Armed Forces.

The Treasury Department has grown from its original 70 to where it now has 13,115 employees in Washington, and an overall employment of 79,459.

Of course, in addition to all of these departmental employment figures I have given you, the legislative branch of our Government has 4,113 employees, and the Federal judiciary 22,125.

You may also be interested in hearing some other facts which have been developed by our Hoover Commission and its task forces. Earlier I talked of travel in Washington's day. Well, today our Federal officials travel much farther and faster, and in more safety and comfort. According to the best information I can gather, not a single Government employee has been injured recently in a stagecoach upset—at least not during the present administration. But the latest reports do show that we have a little more than 261,000 motor vehicles being used by officials of the Federal Government, with an annual consumption of 29,418,577 gallons of gasoline. These vehicles, according to the General Services Administration, traveled the equivalent of 70,000 trips around the world during the past year—or about 1,800 million miles.

The Federal Government is doing something about the health of our citizens. At the present time we have 26 Federal departments and agencies engaged in one or more health programs, at an aggregate cost of approximately $4,200 million during the present fiscal year. Under them some 27 million Americans are receiving free medical service from the Government. Approximately 10 percent of all American doctors and dentists now work for the Federal Government.

And, of course, we have 104 different Government agencies loaning your money and mine, under one arrangement or another, not only to our own citizens, but to almost every foreign Government or activity in the world, wherever we can find anyone to take our cash. All of this, despite George Washington's warning against foreign entanglements. Yet we are now giving away free to other nations and peoples each year 1,000 times as much money as the entire Government cost to operate in Washington's time.

But before I close my remarks, I think you may be interested in knowing that our public debt, which I mentioned to you a moment ago as standing at $280 billion, equals the value of all taxable property of every kind and description west of the Mississippi River—and then some. Yet, at the same time our Federal Government owns considerable more property than it did when Washington was President. On June 30, 1954, the issuable personal property held and owned by the Federal Government amounted to $66,250,000,000, and this amount, of course, did not include such items as naval vessels, military weapons, vehicles, furniture, and other equipment in use; nor did it include our Government industrial installations—all of which are estimated to be worth an addition $48,500,000,000.

The overall inventory of the Federal Government's personal property actually totals, at cost price, more than the total inventory of our entire free-enterprise system, all combined.

And on top of all this, outside the public domain itself, our Federal Government today owns real property, purchased at the taxpayers' expense at one time or another, having a total estimated value of $30,500,000,000. So, all together our Government owns and possesses some $145 billion worth of property—which is a fairly good offset against our public debt—were it not for the fact that our Government has also incurred secondary obligations, or made promises to pay if someone else does not, an additional grand amount of $255 billion.

So, I cannot help but wonder, as I suspect you may be doing, just what the Father of our Country—the man whose anniversary and memory we honor here today—would think and say if he were to come back to earth this day, and look about him in this city bearing his name—look at the Government and the country he did so much to create and to establish. Would he think we had made real progress and, if so, in what direction? Would he find our present-day life better, more enjoyable, and less troublesome than in his day?

George Washington had his problems, as did the new Republic he headed. Modern-time Americans have their troubles and problems, too. What do you think? Are we, as Americans, doing as good a job of making free and representative Government work, all things considered, as did George Washington and his compatriots of 160 years ago?

Regardless of your views on the questions I have just propounded, I am sure all of you will agree there is a great difference between then and now.

The Ukrainian Insurgent Army: Prime Symbol of Freedom in the Russian Communist Empire

EXTENSION OF REMARKS
OF
HON. MICHAEL A. FEIGHAN
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Wednesday, February 23, 1955

Mr. FEIGHAN. Mr. Speaker, students and observers of developments in the Communist empire have for a long time marveled at the patriotic tenacity and national exploits of the Ukrainian insurgent army in its heroic fight against Russian occupation of Ukraine. For 10 years, without any assistance from the free world, it fought the Communist enemy, both militarily and politically.

Since 1952, because of tremendous odds, it has continued its underground, patriotic struggle politically and through various propaganda channels. Periodic reports on its successes still continue to filter through the Iron Curtain. Not so long ago the British veteran soldier, William Piddington, who spent years in the Russian slave labor camps, attributed the widespread strikes in the Vorkuta camps to the Ukrainian underground movement—United Press release, Berlin, July 9, 1954. That such reports amply show the Ukrainian Insurgent Army to be truly in the vanguard of freedom's struggle behind the Iron Curtain, there can be no doubt.

Being intimately familiar with the imposing record of patriotic, national heroism on the part of the Ukrainian Insurgent Army, it was my privilege last year to provide the introduction to the fascinating and informative book entitled "The Ukrainian Insurgent Army in Fight

for Freedom." This compact and factually packed work has furnished countless Americans with a genuine insight into the liberation struggle of the large Ukrainian nation against the domination of imperialist Moscow.

It is my pleasure now to insert in the RECORD, under leave to extend my remarks, an address on the subject of the Ukrainian Insurgent Army, delivered by Dr. Lev E. Dobriansky, professor of economics at Georgetown University and president of the Ukrainian Congress Committee of America, before the Society of Veterans of the Ukrainian Insurgent Army in United States of America, at the Hotel Commodore, New York City:

THE UKRAINIAN INSURGENT ARMY: PRIME SYMBOL OF FREEDOM IN THE RUSSIAN COMMUNIST EMPIRE

Anyone who has honestly and objectively reviewed the concrete and tangible evidence provided by the Ukrainian insurgent army in its truly heroic struggle against the tyranny of Moscow-centered communism can arrive at only one conclusion—that the Ukrainian insurgent army is the prime symbol of freedom in the Russian Communist Empire. The imposing record that it has built up in behalf of the forces of freedom behind the Iron Curtain is the object of respect on the part of many leading Lithuanians, Bulgarians, Rumanians, Poles, Slovaks, and Hungarians. It is the object of keen interest on the part of numerous West European nations and many leading Americans. Above all, it is a shining tribute to the invincible urge and aspiration of the highly important Ukrainian nation to cast off the yoke of Russian Communist rule for genuine self-government, sovereignty, and independence.

Many notable events and developments over the past 12 years lend themselves to much sober reflection and appraisal of our own political behavior as a nation. It is significant that while the forces of the Ukrainian insurgent army were fighting since 1942 both the German Nazis and Russian Communists, the Western democracies, whether out of necessity or no, were incautiously allied with the totalitarian forces of the Soviet Union which, to add vinegar to salt, were widely publicized by some of our governmental agencies as being essentially democratic. The threat of the Red totalitarian menace had not yet struck home. But those whose national homes had been invaded, pillaged, and ravaged well knew that the struggle for freedom would not cease with the defeat of Nazi Germany and the elimination of its brand of totalitarianism. Those, like yourselves, who joined the ranks of the Ukrainian insurgent army to wage battle against both Russian Communist totalitarianism and the Nazi German type were in every sense of the word in the vanguard of the continued struggle for national and individual freedom. The patriotic sons and daughters of Lithuania, White Ruthenia, Poland, Slovakia, and others who aided and collaborated with the Ukrainian insurgent army, who were inspired by its tremendous truth that the Soviet Union is not and cannot be monolithic, are united in this vanguard of freedom.

In full and essential reality, the glorious Ukrainian insurgent army is the manifest historical projection of the continuous struggle of the large Ukrainian Nation for independence. Its spirit is the spirit of the patriot, the spirit of enlightened nationalism, the spirit that every true, patriotic American can easily recognize, sense, and uphold. Its will is one of natural resistance to a dehumanizing force that through skillful technologic means of systematic genocide is unalterably bent upon the destruction of nations, including our own country. The military battles that it fought during and after World War II, even to the point of necessitating the tripartite agreement among Moscow, Warsaw, and Prague to stamp out its military resistance, are feats of human glory that no historian of the contemporary fight for freedom will be able to ignore. The irresistible force of enlightened nationalism, so brilliantly and heroically crystallized in the unassisted exploits of the Ukrainian insurgent army, cannot be extinguished by the Red empire builders of Moscow. It is the basic force of freedom throughout the world today. It is the natural force that Russian Communist imperialism fears most, and seeks to destroy every form of its evidence, as in the case of the Ukrainian insurgent army. Enlightened nationalism—patriotism for God and country—is the preserver of our own nation. And it should be clearly understood that anyone who deliberately plays down the gallant expressions and evidences of enlightened nationalism in either the free world or in the slave world of the Russian Communist empire deserves to be questioned as to his true loyalty. The freedom of nations is as important as, and oftentimes a prerequisite to, the freedom of persons.

Despite the increasing disclosures of the aboveground and underground operations of the Ukrainian insurgent army in the 1940's, disbelief prevailed in the free world as to its very existence. Much of this was dispelled by the appearance of several of its members in Western Germany in 1947, living proof that under extreme hazards made its way from the depths of the Carpathian forests to convince the skeptical free world of the freedom fight being waged in the very front yard of imperialist Moscow. Still, as you and I know, there were some in this country who continued to disinform the American people as to the existence, no less the performances of the Ukrainian insurgent army. Curiously enough, representing themselves as anti-Communists, they repeated here the denials of Stalin and the Kremlin as to the existence of any such army and its resistance forces in Ukraine and elsewhere. It is this same Russia-first clique in this country, made up of certain Russian emigre writers and politicians, their unwitting American friends, and the most loyal followers of Mr. Kennan, that today argues against any utilization of the powerful centrifugal forces, as represented by the non-Russian nations in the Soviet Union, for the defeat of Russian communism. By their words and deeds, they appear to be Russia first, in its basic territorial empire and its present power, rather than America first, in its proclaimed universal independence of all nations.

The perseverance and continued existence of the Ukrainian insurgent army, now an underground in political rather than military warfare, is a thorn in the side of Kennanism and its advocates of the myth of peaceful coexistence. Despite the change in the administration of our Government, this breed is still heavily entrenched in the State Department, and influences greatly the foreign policy of our Nation. It would like to see no policy formulated toward the Soviet Union other than the one of status quo. But so long as resistance continues on the part of the Ukrainian insurgent army and on the part of other non-Russian groups in the Soviet Union, the day cannot be long postponed when such a formulation will become necessary. The opportunity and capacity for resistance, as exemplified by the Ukrainian insurgent army, constitute also the basis of justification for a sound policy of liberation which, sooner or later, must come to pass. It it should come to pass too late, it might well fall short of success.

The expansion of national political undergrounds in the Russian Communist empire is in the crucial interest of our Nation. Aid and assistance for such expansion can only be provided through a policy of liberation interpreted solely as a continuous process of political warfare on the terrain of the Russian Communist empire. Given time—the chief commodity they are seeking today with their New Look of peaceful coexistence—the Russian Communists can attain to a superior advantage of position over us, in spite of all of our alliances, in spite of all of our nuclear weapons. Once their empire is consolidated and the sources of national resistance with leadership reduced to a shell, this position will have been formed for aggression with reasonable expectation of success. Present containment facilitates this: the policy of liberation, with its premium on resistance groups, can obstruct this and save nations from destruction.

HOUSE OF REPRESENTATIVES

THURSDAY, FEBRUARY 24, 1955

The House met at 12 o'clock noon.

Rev. Clarence W. Cranford, Calvary Baptist Church, Washington, D. C., offered the following prayer:

We pause in this moment, O God, to recognize Thy sovereignty over us. Help us always to remember that we are the sheep of Thy pasture, the people of Thy hand.

We thank Thee for the air of freedom that Americans are privileged to breathe. We thank Thee that among our other freedoms, we are free to worship Thee as we choose. Men have died to prevent Hitler, or any other person, from taking that freedom from us. Help us not to neglect a freedom that has been purchased for us at such an awful price.

We thank Thee that here every person is considered a child of Thine. Help us, therefore, in our efforts to achieve and maintain liberty and justice, not for just a chosen few, but for all. May the decisions that are made here this day be pleasing in Thy sight, and become effective in lifting mankind to new levels of joy and hope. And whether we pray in Jesus' name, or in the name of the religion in which He worshiped, help us to come to Thee humbly, believing that Thou will give guidance to all who sincerely seek it. Amen.

The Journal of the proceedings of yesterday was read and approved.

CALL OF THE HOUSE

Mr. O'BRIEN of New York. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Evidently, a quorum is not present.

Mr. McCORMACK. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 14]

Avery	Buckley	McGregor
Baker	Cooley	Meader
Bass, N. H.	Eberharter	Norblad
Bolton, Oliver P.	Engle	Powell
Bow	Gross	Prouty
Brooks, La.	Keating	Robsion, Ky.
	Kee	Scrivner

Shelley Mich. Young
Smith, Wis. Wainwright
Thompson, Yates

The SPEAKER. On this rollcall 402 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

NATIONAL SYSTEM OF INTERSTATE HIGHWAYS

Mr. CANNON. Mr. Speaker, by direction of the Committee on Appropriations, I move that the bills (H. R. 4260 and H. R. 4261) to create a Federal highway corporation for financing the construction of the national system of interstate highways; to amend and supplement the Federal Aid Road Act approved July 11, 1916 (39 Stat. 355), as amended and supplemented; and for other purposes, be re-referred from the Committee on Public Works to the Committee on Appropriations.

The SPEAKER. The question is on the motion.

The question was taken; and on a division (demanded by Mr. CANNON) there were—ayes 87, noes 131.

Mr. CANNON. Mr. Speaker, I ask for the yeas and nays.

The yeas and nays were refused.

So the motion was rejected.

JOINT COMMITTEE ON THE ECONOMIC REPORT

Mr. PATMAN. Mr. Speaker, the Joint Committee on the Economic Report voted unanimously this morning that 15 days be allowed the committee to file the final report on the Economic Report of the President, and, therefore, I ask unanimous consent that the committee may have until March 15 to file its report.

Mr. MARTIN. Mr. Speaker, reserving the right to object, did the gentleman say that that was unanimously agreed to by the committee?

Mr. PATMAN. It is a unanimous request. The request is made pursuant to section 5A, Public Law 304 of the 79th Congress.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

IN CLOSING MILLS AMERICAN WOOLEN MUST ANSWER FOR HUMAN LOSS

Mr. LANE. Mr. Speaker, I ask unanimous consent to extend my remarks at this point.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. LANE. Mr. Speaker, there is no provision for social responsibility in the decision of the American Woolen Co. to close out its three large mills in Greater Lawrence, Mass.

There is no consideration of the human loss.

We deplore the announcement by Joseph B. Ely, president of the American Woolen Co., who was given overwhelming support by these textile workers some years ago when he became a Democratic Governor of Massachusetts, that the Wood, Ayer, and Shawsheen Mills of Greater Lawrence would be liquidated.

These mills had a normal employment of 7,200 by a conservative estimate. Many of these workers have given their lives to this occupation.

Some of them, now middle-aged, will never be able to find jobs to replace the ones they have lost unless the closed mills are taken over by other industries.

My point is that the American Woolen Co. cannot abandon these displaced workers. It cannot just lock up the mills and depart, shrugging off all responsibility for the loyal workers it has left behind.

It should make arrangements to have new industries take over these empty mills before it says goodby.

In the past, we have asked the officials of the American Woolen Co., who are now part of Textron American, Inc., which resulted from the recent merger of American Woolen, Robbins Mills, and Textron, Inc., to act on one of the following alternatives:

First. To keep 1 or all of the 3 mills operating in the production of textiles.

Second. To gradually adapt them to the production of goods other than textiles.

Third. To arrange for the sale of these properties to growth industries that will absorb the displaced textile workers.

But the American Woolen Co. refused to cooperate.

Enlightened American industry does not limit itself to the balance sheet.

Raw materials, wages, plant, machinery, sales, taxes, profits, dividends, these do not end its responsibilities.

There are also the human costs and sacrifices.

The textile industry cannot escape its moral obligations to the workers who have stood by it in good times and bad, investing not merely money, but brain and brawn and skill and faith—the essence of their lives—in an enterprise that they believed would never let them down abruptly and completely.

The challenge of the guaranteed annual wage is coming up from the horizon, to test the partnership between the auto and steel industries and their respective employees.

But what elemental security is available for textile workers who are told by management that there is no hope—not even for a day's work—because mills are posted with no trespassing signs so that runaway management can build pilot plants far away?

Mr. Ely, who will become chairman of the executive committee of the consolidation to be known as Textron American, was quoted as saying:

> You must remember that this is a business operation, and we have a responsibility to our stockholders.

But Mr. Ely made no mention of the responsibility toward displaced workers. And Mr. Royal Little, who is to be the new board chairman, has no comment.

A hint of a solution may be found in the fact that one of the companies in the three-way merger—Textron—has been gradually moving into other nontextile lines. Most of Textron's earnings during the past year came from this new production.

Why cannot Textron American adapt the Wood, Ayer, and Shawsheen Mills of Greater Lawrence to the production of goods other than textiles in order to keep faith with our workers?

Today, February 24, the directors of the new corporation plan to meet in New York.

Since the end of World War II, 640 textile mills in New England have closed their gates permanently.

Mergers are closing others and absorbing those that will continue to operate, thus concentrating control: American Woolen-Robbins-Textron, M. Lowenstein-Wamsutta, and others. In all of these cases, survival through streamlined efficiency and resumption of earnings is given as the reason.

But many of the merged companies, although losing money during the past several years, have considerable assets and reserves which leads us to believe that powerful forces are behind these mergers—a handful of overambitious men who have little or no regard for the human pawns in the game of pyramiding wealth and economic power.

Monopoly? Conceivably so.

These textile giants have demonstrated no concern for the economic and human loss that has been left in the wake of their maneuvers, as they battle for supremacy in the textile field. The situation calls for a thorough congressional investigation, because no financial manipulations that benefit a few, by taking jobs away from tens of thousands of people, can ever be tolerated by the Government of the United States which has authority to prevent or restrain monopolistic practices under the Antitrust Division of the Department of Justice, and the Federal Trade Commission.

Therefore, I am introducing a resolution calling for an immediate and searching investigation by a proper committee of the House of Representatives into the motives and the far-reaching effects of monopolistic mergers in the textile industry—mergers that are junking mills and machines and human beings.

A NOTABLE BEQUEST

Mr. CANNON. Mr. Speaker, I ask unanimous consent to extend my remarks at this point.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. CANNON. Mr. Speaker, Hon. S. W. Arnold, a former Member of the House, calls attention to an article by the widely read columnist, Peter Edson, relative to the bequest left by the late Supreme Court Justice Oliver Wendell Holmes. As will be recalled, Justice Holmes, a son of the beloved poet, Oliver Wendell Holmes, one of the outstanding

figures in American literature, served on the Supreme Bench for nearly a third of a century, and on his death in 1935, left a substantial portion of his estate to the United States as a token of his gratitude and appreciation of the Government under which it had been his privilege to live.

When finally probated the bequest amounted to $263,288.20. It is a matter of surprise to learn that this generous and patriotic legacy to the Nation was apparently placed on deposit without interest, and after lying there for approximately 20 years is still $263,288.20.

Had it been invested in Government bonds, the most elementary form of safe keeping, the interest on it would have by this time exceeded $150,000.

Sometime after the receipt of the legacy a joint resolution was passed by the Congress providing for the expenditure of the fund in the establishment near the Supreme Court building on Capitol Hill of an Oliver Wendell Holmes memorial garden. The construction of such a memorial was estimated to cost $400,000 and as the bequest was $136,711.80 short of this amount, the matter was dropped, and seems to have been entirely forgotten. Had this gracious and generous contribution by one of America's great jurists received even the most casual attention, the income from the fund would by this time have more than supplied the amount necessary for the memorial.

Mr. Speaker, no condemnation is too severe for the dereliction which up to this time has completely vitiated one of the most remarkable and inspiring incidents in the history of the Republic.

LEGISLATIVE PROGRAM FOR TODAY

Mr. MARTIN. Mr. Speaker, I ask unanimous consent to proceed for 1 minute, in order to inquire about the program for today.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. McCORMACK. If the gentleman will yield, it was agreed between the leadership on both sides that in relation to the tax bill the debate will be confined to the rule and after a rule is adopted there will be 4 hours of general debate. Then we will go over until tomorrow for further consideration of the bill as provided in the rule under the 5-minute rule for final passage. In other words, there will be general debate today.

If opportunity presents itself thereafter, we will take up the GI voting bill, about which I understand there is not very much controversy. I would like to bring it up because we want to get through with it as quickly as possible. I understand there are legislatures meeting in 44 States, and it is necessary that they have as early an opportunity as possible to enact State legislation to implement and carry out the Federal act which we will pass.

If the conferees on the pay-raise bill agree in time, that will be brought up after general debate.

EXPENSES INCIDENT TO INVESTIGATION BY COMMITTEE ON INTERIOR AND INSULAR AFFAIRS

Mr. BURLESON. Mr. Speaker, by direction of the Committee on House Administration, I offer a privileged resolution (H. Res. 31) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That the expenses of the investigations to be made pursuant to House Resolution 30 by the Committee on Interior and Insular Affairs (now comprised of the six former Committees on Insular Affairs, Territories, Public Lands, Irrigation and Reclamation, Mines and Mining, and Indian Affairs), acting as a whole or by subcommittee, not to exceed $50,000, including expenditures for the employment of stenographic and other assistants, shall be paid out of the contingent fund of the House on vouchers authorized by such committee, signed by the chairman of such committee, and approved by the Committee on House Administration.

The SPEAKER. The question is on the resolution.

The resolution was agreed to; and a motion to reconsider was laid on the table.

COMMITTEE ON MERCHANT MARINE AND FISHERIES

Mr. BURLESON. Mr. Speaker, by direction of the Committee on House Administration, I offer a privileged resolution (H. Res. 89) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That the expenses of the studies and investigations to be conducted pursuant to House Resolution 88 by the Committee on Merchant Marine and Fisheries, acting as a whole or by subcommittee, not to exceed $50,000, including expenditures for the employment of investigators, attorneys, and experts, and clerical, stenographic, and other assistants, and all expenses necessary for travel and subsistence incurred by members and employees while engaged in the activities of the committee or any subcommittee thereof, shall be paid out of the contingent fund of the House on vouchers authorized and signed by the chairman of such committee and approved by the Committee on House Administration.

SEC. 2. The chairman with the consent of the head of the department or agency concerned is authorized and empowered to utilize the reimbursable services, information, facilities, and personnel of any other departments or agencies of the Government.

SEC. 3. The official committee reporters may be used at all hearings held in the District of Columbia, if not otherwise officially engaged.

Amend the title so as to read: "To provide funds for the studies and investigations to be conducted pursuant to House Resolution 118."

With the following committee amendment:

Line 2, page 1, following the word "That", insert "effective January 4, 1955."

Line 2, strike "House Resolution 88" and insert "House Resolution 118."

The committee amendments were agreed to.

The SPEAKER. The question is on the resolution.

The resolution was agreed to; and a motion to reconsider was laid on the table.

PROVIDING FOR EXPENSES OF CONDUCTING STUDIES AND INVESTIGATIONS AUTHORIZED BY RULE XI (8)

Mr. BURLESON. By direction of the Committee on House Administration, I offer a privileged resolution (H. Res. 110) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That effective January 3, 1955, the expenses of conducting the studies and investigations authorized by rule XI (8) incurred by the Committee on Government Operations, acting as a whole or by subcommittee, not to exceed $495,000, including employment of experts, special counsel, and clerical, stenographic, and other assistants, and which shall also be available for expenses incurred by said committee or subcommittees outside the continental limits of the United States, shall be paid out of the contingent fund of the House on vouchers authorized by said committee and signed by the chairman of the committee, and approved by the Committee on House Administration.

SEC. 2. The official committee reporters may be used at all hearings held in the District of Columbia, if not otherwise officially engaged.

With the following committee amendment:

Page 1, line 1, strike out "January 3, 1955" and insert "January 4, 1955."

The committee amendment was agreed to.

The SPEAKER. The question is on the resolution.

The resolution was agreed to; and a motion to reconsider was laid on the table.

INVESTIGATION OF CERTAIN SURVIVORSHIP BENEFITS

Mr. BURLESON. Mr. Speaker, by direction of the Committee on House Administration, I offer a privileged resolution (H. Res. 128) and ask for its immediate consideration.

The Clerk read as follows:

Resolved, That effective January 4, 1955, the expenses of conducting the investigation and study authorized by House Resolution 35, 84th Congress, incurred by the Select Committee To Investigate and Study the Benefits Provided Under Federal Law for the Survivors of Deceased Members and Former Members of the Armed Forces, not to exceed $35,000, including expenditures for the employment of experts, special counsel, and clerical, stenographic, and other assistants, shall be paid out of the contingent fund of the House on vouchers authorized by such committee, signed by the chairman of the committee, and approved by the Committee on House Administration.

SEC. 2. The official stenographers to committees may be used at all hearings held by such select committee in the District of Columbia, if not otherwise engaged.

The resolution was agreed to; and a motion to reconsider was laid on the table.

COMMITTEE ON VETERANS' AFFAIRS

Mr. BURLESON. Mr. Speaker, by direction of the Committee on House Ad-

ministration, I offer a privileged resolution (H. Res. 129) and ask for its immediate consideration.

The Clerk read as follows:

Resolved, That the expenses of the investigation and study to be conducted pursuant to House Resolution 63 of the 84th Congress incurred by the Committee on Veterans' Affairs, acting as a whole or by subcommittee, not to exceed $50,000, including expenditures for the employment of experts, and clerical, stenographic, and other assistants, shall be paid out of the contingent fund of the House on vouchers authorized by such committee, signed by the chairman thereof and approved by the Committee on House Administration.

SEC. 2. The official stenographers to committees may be used at all hearings held in the District of Columbia unless otherwise officially engaged.

The resolution was agreed to; and a motion to reconsider was laid on the table.

COMMITTEE ON THE DISTRICT OF COLUMBIA

Mr. BURLESON. Mr. Speaker, by direction of the Committee on House Administration, I offer a privileged resolution (H. Res. 131) and ask for its immediate consideration.

The Clerk read as follows:

Resolved, That, in carrying out its duties during the 84th Congress, the Committee on the District of Columbia is authorized to incur such expenses (not in excess of $2,000) as it deems advisable. Such expenses shall be paid out of the contingent fund of the House on vouchers authorized by such committee, signed by the chairman thereof, and approved by the Committee on House Administration.

The resolution was agreed to; and a motion to reconsider was laid on the table.

STENOGRAPHER TO THE POSTMASTER OF THE HOUSE

Mr. BURLESON. Mr. Speaker, by direction of the Committee on House Administration, I offer a privileged resolution (H. Res. 140) and ask for its immediate consideration.

The Clerk read as follows:

Resolved, That effective March 1, 1955, one position as messenger, Office of the Postmaster, at the basic salary rate of $1,940 per annum shall be vacated and in lieu thereof there shall be paid out of the contingent fund of the House, until otherwise provided by law, compensation at the basic salary rate of $2,300 per annum for the employment of a stenographer to the Postmaster of the House.

With the following committee amendment:

Page 1, line 6, strike out "$2,300" and insert in lieu thereof "$2,100."

The committee amendment was agreed to.

The resolution was agreed to; and a motion to reconsider was laid on the table.

REVENUE ACT OF 1955

Mr. SMITH of Virginia. Mr. Speaker, I call up House Resolution 153 and ask for its present consideration.

The Clerk read as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 4259) to provide a 1-year extension of the existing corporate normal-tax rate and of certain existing excise-tax rates, and to provide a $20 credit against the individual income tax for each personal exemption. After general debate, which shall be confined to the bill and shall continue not to exceed 4 hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means, the bill shall be considered as having been read for amendment. No amendment shall be in order to said bill except amendments offered by direction of the Committee on Way and Means or one amendment to strike out all after line 17, page 4, of the bill, but said amendments shall not be subject to amendment except pro forma amendments which shall be in order. At the conclusion of such consideration, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion, except one motion to recommit.

Mr. SMITH of Virginia. Mr. Speaker, I yield 30 minutes of my time to the gentleman from Illinois [Mr. ALLEN], and at this time I yield myself such time as I may consume.

Mr. Speaker, the rule that has just been called up is one providing for the consideration of the so-called tax bill that has been a matter of quite a bit of discussion recently. I hope I may have the attention of the Members of the House because they will all be interested in knowing how this rule will operate. I want to explain this rule because it is a little bit unusual.

Ordinarily the Ways and Means Committee has a fully closed rule. In this case the Rules Committee has reported for your consideration a closed rule with one exception. That exception is that the bill will be subject to one amendment only. That will be an amendment striking out the provision relating to the $20 tax reduction. The amendment will be offered subject to the rules of the House under the 5-minute rule. That is, pro forma amendments only will be in order to that amendment. I hope that is clear to everyone.

Mr. Speaker, now I want to talk a little bit about the merits of the bill itself. It is quite important for the Members here to realize just what we are proposing to do to the country by this bill. I may say that I know it is a Democratic bill and I do not like to oppose the Democratic Party. I have been a Democrat longer than most of the people who sit around me and I do not oppose a Democratic measure unless I think it is in the best interests of my country to do so.

May I state here that this is a very dangerous thing for you to do, and I address myself to my colleagues on the Democratic side of the House particularly. We have been running a deficit in this country for some 20 years or more. We are gradually and consistently and continuously going deeper and deeper into debt for future generations to pay.

What we are proposing to do here by this bill is to borrow money to be paid by future generations for the purpose of reducing taxes for the present generation and I might say—I do not want to be sarcastic—to reduce the taxes for the present generation of voting age. This is too serious a subject for us to play politics with.

Mr. Speaker, in my opinion, we ought to analyze just what we are doing here in dollars and cents. It has been said that we are going to continue the corporation tax and the excise tax and then we are going to give the people a little sop in the way of a reduction of $20 which will not cost as much and, therefore, the Treasury will gain. That sounds very nice, but what we are actually doing is retaining the corporate and excise taxes for only 1 year with a retention of the $2,800,000,000; but you are reducing taxes and reducing the revenues of this country permanently at the rate of $2,300,000,000 a year.

In other words, for the continuation of one tax for 1 year you are reducing taxes permanently to the extent of $2.3 billion a year. I think that when we sit down with our consciences and think this thing over carefully and think what we ought to do, we are going to say that we ought not to reduce these taxes until the budget is balanced. My friends on the Democratic side, I think between now and the time you vote on this amendment, in your consciences you have got to sit down and study this thing pretty carefully. Yes; I know the Members of the House want to do what is right, and I am not going to criticize anybody for the position that they take. In speaking to you here today I speak only my own sentiments and what I think, and I know that other Members here are just as conscientious about their duties and responsibilities as I am. All I ask you to do is to analyze this proposition that is put before you, and do not think about whether this is going to benefit the Democrats or is going to do harm to the Republicans. I think in a matter of this importance we ought not to be concerned about that any more than we ought to be concerned when we vote on a declaration of war, because unless you have a sound financial system in this country, if you break this Government, it is just as bad as war, if not worse.

All I am saying to you now is, I would just like to ask you to give it serious consideration when this vote comes. Forget politics. There were many of us here last year who, when our friends the Republicans proposed a tax reduction, voted against it. Why can we not forget politics when it is a Democratic proposal and do what is in the best interest of our country? I think when the time comes and the chips are down, knowing the Members of this House as I do know them, and knowing the consciences that guide them in the welfare of their country, they are going to do the right thing; at least, what I think is the right thing.

Mr. FORRESTER. Mr. Speaker, will the gentleman yield?

Mr. SMITH of Virginia. I yield to the gentleman from Georgia.

Mr. FORRESTER. As I understand the gentleman, the gentleman does not think that this is a wise thing to do in

1955 and does not think it is the right thing to do in 1956, or any other time, until the budget is balanced. Is that it?

Mr. SMITH of Virginia. That is exactly my position.

Mr. FORRESTER. I thank the gentleman.

Mr. SMITH of Virginia. I do not think we should do it at all until we have the fiscal affairs of this country in a safe position, and God knows they are in the most dangerous position now that they could be, and anything that you do in the way of further unbalancing this budget is going to increase the pressure of inflation. This $20, this little money that we are handing out to our constituents, is not going to buy much when you increase this terrible inflationary spiral.

Let me also say this to you, and then I am through: I have a philosophy about taxation that is probably not shared by many of my friends, and I can respect their beliefs about it. I have the philosophy that in order to have good citizenry, thoughtful citizenry, people who are interested in our Government, every person should pay some tax, however small, in order that he might have an interest in the fiscal affairs of his country. Do you know that if you pass this bill today, you will take 5 million taxpayers off the tax rolls? And do you realize that you take away from those 5 million taxpayers the high privilege of participating in carrying on and sustaining the finances of their Government?

Mr. Speaker, I reserve the balance of my time.

Mr. ALLEN of Illinois. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, the able gentleman from Virginia [Mr. SMITH] has explained the rule. This rule provides for 1 hour under the rule and 4 hours of general debate on the bill. I do not believe that much can be added to the American philosophy just expounded by that great American. The first section is the title. The second section deals with the extension of the corporation tax rate which will bring the United States Treasury $1,750,000,000; and the third section deals with the extension of excise taxes which will bring the Government another $1 billion.

I know of no one who is opposed to the first three sections of this bill, but there are many who oppose section 4 which gives a $20 credit and would take 4,987,000 income tax payers completely off of the rolls.

It was stated before the Committee on Rules that individuals making as much as $5,000 a year would be exempted from paying any income tax at all.

What is the condition of this country? We owe $278 billion. It has been estimated that we are going to go into the red by another $2,400,000,000 this fiscal year. In addition to that, we know that we are in a precarious world condition. So I ask you on the one hand what possible logic can there be in continuing taxes which would bring in $1,750,000,000 from corporations and continuing excise taxes which would bring in $1 billion, and then on the other hand in the same bill reducing taxes in the amount of $1 billion?

I wish to speak about section 4. Using the simple process of arithmetic, $20 a year means 37 cents a week; that is all it amounts to, just a little more than it costs to purchase a package of cigarettes. With my good friend from Virginia [Mr. SMITH], I cannot conceive how any American would be unwilling, in these precarious times, to contribute 37 cents a week for our military, to provide the best equipment possible for those who are in the armed services; to provide good food and clothing; to provide for our disabled veterans and their widows or orphans; to provide for unfortunate, old people.

I repeat, I cannot conceive of any real American who would feel on the one hand that they should have those deserved advantages and on the other hand say, "I refuse, I am unwilling to pay 37 cents a week toward their provision; just let the other person pay."

The press of the country have called section 4 such things as "pie a la mode;" "lack of financial stability;" and "$20 prizes." I am not going into that matter, but I do want to make a few observations.

There were no hearings on this section 4. The Committee on Ways and Means met. I think it was agreed and understood that they would consider the extension of the corporation taxes and the excise taxes. According to the best information I have, not a responsible person on the other side of the Capitol, not one responsible person knew about it, but last Saturday this amendment was hurriedly added.

The bill provides for a reduction of these taxes 6 months from now. It starts next January. The Committee on Appropriations has not brought even one bill before the House of Representatives for consideration. Many of my Democratic friends are always voting for amendments to increase appropriations; to put the Government in the red even more. They want to spend more for everything. All of which would increase that $2,400,000,000 deficit. I repeat no appropriation bill has come before the Congress so we really do not know what the deficit will be.

Some say the President has stated that he hopes to reduce taxes next year. I venture to say that if you appropriate more in this Congress for military purposes and other things the deficit will be much larger than $2,400,000,000, and the President next year will not be coming in here asking for a tax reduction.

I sincerely believe that this body under these conditions should not vote for section 4 of this bill. If we do a good job and cut down expenditures this year, and world conditions change so that we do not need to spend as much as we now contemplate for military equipment, let the leaders on both sides of the aisle, the Democratic leaders and the Republican leaders, come in here together next January and then, if after considered judgment they feel there should be a tax reduction, it could be done.

In conclusion, let me say this. The President of the United States has come out for peace and prosperity. We all hope for peace. We all hope for prosperity. But as long as we do not have financial stability, I think you will all agree that we will not have prosperity.

Mr. FORRESTER. Mr. Speaker, will the gentleman yield?

Mr. ALLEN of Illinois. I yield to the gentleman from Georgia.

Mr. FORRESTER. The gentleman said that if there was a deficit this year he did not anticipate the President would ask for a reduction next year, in 1956. Pursuing that, under the facts the gentleman has related, may I ask him if he could possibly envision any state of affairs in the year 1956 where the gentlemen on the other side of the aisle would support a tax cut in 1956?

Mr. ALLEN of Illinois. I cannot envision that, if the appropriations this year through the enlargement of the Army, and some on the Democratic side have come out for an increase as high as 100,000 more in the Army, and other benefits and handouts which would increase the appropriations so that the deficit this fiscal year would amount to much more than $2,400,000,000. Speaking only for myself, I certainly would not favor a tax reduction even next year under such circumstances.

Mr. FORRESTER. Would not the gentleman agree that the argument that is advanced by the gentleman now for 1955 would in the very nature of things have to be applicable for the year 1956? If we take that view today we should take it in 1956 also?

Mr. ALLEN of Illinois. The gentleman is correct.

Mr. FORRESTER. I thank the gentleman.

Mr. ABERNETHY. Mr. Speaker, will the gentleman yield?

Mr. ALLEN of Illinois. I yield to the gentleman from Mississippi.

Mr. ABERNETHY. Would the gentleman favor tax reduction at any time before we have a balanced budget?

Mr. ALLEN of Illinois. Not under the present world conditions.

Mr. ABERNETHY. Is that in line with the views of the gentleman a year ago?

Mr. ALLEN of Illinois. Yes. The 82d Democratic Congress in 2 years appropriated $187 billion. The 83d Republican Congress reduced that $187 billion appropriated by the 82d Congress down to $123 billion, a saving of $63 billion. Many of us on this side of the aisle, I am convinced, thought that was a wonderful reduction. We thought we would be able to make further reductions in taxes. Then along came the Formosa situation.

Mr. SMITH of Virginia. Mr. Speaker, I yield 10 minutes to the gentleman from Texas [Mr. DIES].

Mr. DIES. Mr. Speaker, one of the greatest Presidential messages ever sent to this Congress in my lifetime by any President contains these immortal words:

> The Nation is deeply gratified by the immediate response given yesterday by the Congress to the necessity for drastic action to restore and improve our banking system. A like necessity exists with respect to the finances of the Government itself which requires equally courageous, frank, and prompt action.

For 3 long years the Federal Government has been on the road toward bankruptcy.

For the fiscal year 1931 the deficit was $462 million.

For the fiscal year 1932 it was $2,472,000,000.

For the fiscal year 1933 it will probably exceed $1,200,000,000.

For the fiscal year 1934, based on the appropriation bills passed by the last Congress and the estimated revenues, the deficit will probably exceed $1 billion unless immediate action is taken.

Thus we shall have piled up an accumulated deficit of $5 billion.

With the utmost seriousness I point out to the Congress the profound effect of this fact upon our national economy.

I want to invite your attention to those words which were true when they were uttered, and which are true today, and all history and the experience of all governments has demonstrated time and again the truthfulness and the soundness of this advice:

Upon the unimpaired credit of the United States Government rest the safety of deposits, the security of insurance policies, the activity of industrial enterprises, the value of our agricultural products, and the availability of employment. The credit of the United States Government definitely affects these fundamental human values. It, therefore, becomes our first concern to make secure the foundation. Too often—

I want you to listen carefully to these words especially you who call yourselves liberals—

Too often in recent history, liberal governments have been wrecked on the rocks of loose fiscal policy.

Can there be any question about the lessons of history that governments which lack the courage and the honesty to balance their outgo with their income will ultimately be destroyed? Has not the experiment of extravagance and loose fiscal policy resulted invariably in the destruction of freedom wherever and whenever it has been tried?

Mr. SMITH of Virginia. Mr. Speaker, will the gentleman yield?

Mr. DIES. I yield.

Mr. SMITH of Virginia. The gentleman failed to state what President made that statement.

Mr. DIES. That message is by Franklin D. Roosevelt.

If those words were true, when we had a public debt of $5 billion, how much more true is it today with a national debt of $278 billion. The American people should be credited with sense, and certainly with patriotism. Do you believe for 1 minute that the American people who are constantly struggling to balance their budgets in their homes and in their businesses and in their everyday affairs will respect our intelligence and our integrity when, in the face of an enormous public debt and a great deficit, we reduce taxes for political purposes? Not only do we have this debt which our children must pay, but we have the prospect of more deficit this year. It seems to me that the greatness of a generation can be measured by the concern of its people for posterity. A generation which lives solely for itself, which thinks only in terms of immediate advantages and immediate profits, is not worthy of its offspring.

You and I have no moral right to continue to pile up enormous deficits. I voted against the tax-revision bill last year because it provided for reduction. I shall vote against this measure because it provides for reduction. I am not thinking of what will happen to me. I am thinking of my three sons and my grandchildren. I am thinking of the generation that is yet to come, a generation which will inherit a crushing debt as its legacy; and if we continue, what will be the result? The dollar has already lost half of its purchasing power. The dollar is the symbol of our Nation's honesty. When the dollar goes down, it means that the integrity of the Government has diminished. And who loses by it? Not the rich. The rich profit because of their equities, their ownership of stocks, and of lands, and farms, and property that steadily rises in monetary value with inflation. Where there were millionaires 10 years ago there are now billionaires, simply because the price of all lands, all property, and all stocks have skyrocketed as a result of the steady destruction of the honesty and integrity of the American dollar.

What do we face in the future? The greatest crisis in all history. I said on this floor in 1932, I said to this House, that in our age and generation we must struggle for survival; that the insidious forces of communism would not stop until they were either defeated or until the whole world was engulfed in the Red tide. I say to you that those of you who vainly hope that you can prevent the inevitable—I should not use the word "inevitable," because only God can decree inevitability—but a probable showdown between the evil forces of communism, dedicated to the destruction of freedom and liberty, with its heart and core being the conquest of the world, ignore the lessons of history. With such a thing as that facing you and me, with the probability that our cities will be bombed, shall we sit here in apathy, unconcerned and indifferent, and say, "Well, we Democrats have got to beat the Republicans to the draw? We suspect that the Republicans in 1956 will recommend tax reduction, for political purposes. Therefore, we Democrats are going to beat them to the draw."

I wish the President would come out four square and clearly state to the American people, "I will not support a reduction in taxes until the budget is balanced." I plead with him not to evade the issue, but to speak frankly. I believe that if the President will issue such an unqualified statement, the majority of Democrats in this House will oppose reduction, for I know that the members of my party are as patriotic and loyal to America as any one in our land. I know that those who believe in liberalism, in progressive government, who wish to move forward to meet the ever changing needs of the people, understand that the bedrock of all liberalism must be sound fiscal policies. If people demand increased governmental services, as they have during my public career as a Member of Congress, they must be prepared to pay for those services by increased taxes. It is dishonest and wrong that the burden, should fall upon our children and grandchildren.

I plead not for partisanship, not for political advantage, for it is a matter of little moment who wins a political election; those who exalt themselves today pass into oblivion tomorrow. The entire gallery to the rear of us is decorated with the portraits of speakers who have long since been forgotten in the maze of time. Presidents are forgotten, all men are forgotten; the only thing that endures and gives permanence to our lives is the consciousness of duty well done, and I appeal to the Democrats of this House as well as to the Republicans to forget partisanship and political advantage and what will happen to our own little petty political aspirations. This is a great nation given to us by the grace of God. We owe a solemn duty to our children to preserve it for them and for all who are yet to come. America, which has blessed so many of our people, given us an abundance of material and spiritual blessings, America with its goodness and its grandeur—you and I are its trustees; and today let us rise to the stature of statesmanship regardless of what we may think of party; let us remember the glorious heritage of the Democratic Party.

The SPEAKER pro tempore. The time of the gentleman from Texas has expired.

Mr. ALLEN of Illinois. Mr. Speaker, I yield the gentleman from Texas 3 additional minutes.

Mr. DIES. I thank the gentleman. Let us remember the immortal words spoken by President Roosevelt in 1933, and before him the words of Grover Cleveland, of Woodrow Wilson, of Thomas Jefferson, of all the great men who have led the Democratic Party, not along the road of bankruptcy and loose fiscal policy, not along the road of cheap politics, but toward the great destiny of our Nation. This is an oportunity for courage and for statesmanship, an opportunity that will not come perhaps again in this session; and I can assure you who may fear political reprisal that if we would only credit the people of this country with more intelligence and more honesty and speak frankly to them and tell them that they can never get something for nothing, that if they want social security and expanded governmental services, they must pay with their taxes, that they cannot get the money from the rich alone but that they themselves must contribute, each and every one of them, to the support of such a vast program, you will have nothing to fear from the voters. We cannot eat our cake and have it at the same time.

I have an abiding faith in the intelligence and honesty of the American electorate; and I for one do not hesitate to say to the people of my great State: I did not come to Congress to be a mountebank or charlatan; I am here to do my duty under God as I see it. I may make mistakes and probably have made many mistakes, but when the welfare and the future of my country is at stake, when its whole progress toward the great and grand destiny which lies ahead is in jeopardy, I shall not hesitate now nor at any time in my career to vote and to speak that which I believe will protect my children and my grandchildren and all the children of this generation.

Mr. ALLEN of Illinois. Mr. Speaker, I yield to the gentleman from Illinois [Mr. SPRINGER] for a consent request.

Mr. SPRINGER. Mr. Speaker, on last Friday the gentleman from Tennessee and chairman of the House Ways and Means Committee [Mr. COOPER] and the gentleman from New York [Mr. REED] each introduced identical bills, H. R. 4200 and H. R. 4201, to extend for 1 year the excise and corporation income-tax rate which would otherwise be reduced automatically on April 1. These two extensions have been recommended by the President as necessary to the fiscal stability of the Nation.

On Friday it was first publicly announced that the Ways and Means Committee would meet on Monday morning and be presented with the so-called $20 tax-cut amendment.

The House Ways and Means Committee did meet on Monday and the amendment was adopted to H. R. 4200.

There have been no hearings of any kind on the subject of individual income-tax reduction. No one has had an opportunity to express views on this problem which would reduce the revenue for this year by $815 million and $2.3 billion a year thereafter. This will add almost a billion dollars to the deficit next year alone. It seems to me to be extremely dangerous to make this kind of a reduction without any hearings at all before the Ways and Means Committee. In my time in the House I cannot remember such a far-reaching measure being put through without any hearings of any kind. With the condition of the budget as it is, it means the Treasury would have to go into the market and borrow an additional $815 million in 1956 to finance this tax cut and apparently would have to borrow over $2 billion a year thereafter in order to allow these tax cuts to stay in effect.

Does it seem reasonable to anyone with the least financial responsibility at all that we should take this step without going into the matter thoroughly and giving everyone in our economy an opportunity to be heard?

In the second place, in the orderly process of doing business why should not this tax-cut provision be separated from the extension of the excise and corporation tax bill? That would allow this reduction to be heard on its merit and I am perfectly willing to have it heard in that manner and to give the bill every reasonable consideration.

At this point I ask unanimous consent that I may be allowed to insert in the RECORD several newspaper articles upon this important matter in order that the House may have the benefit of thinking on the tax cut, from all over the United States:

[From the New York Herald Tribune of February 21, 1955]

BARGAIN-BASEMENT CAMPAIGNING

The Democrats, rather desperately shopping around for issues, have picked up a little thing in the political bargain basement that they hope will be cheap and popular. It is an across-the-board income tax cut of $20 for each taxpayer and dependent, to be tacked on to an administration measure extending corporation and excise taxes.

This is about as cynical a piece of petty politics as Washington has seen in a long while. It is certainly not justified by present budgetary prospects—the deficit would be increased from the $2.4 billion now expected to at least $3.1 billion. The impact of the measure would be extremely unequal, wiping out tax indebtedness in the lowest bracket and giving relief of a fraction of 1 percent to those paying the higher rates. By adding the tax cut as a rider to another bill, thus hoping to avoid a Presidential veto, the Democratic leadership is resorting to a device which is unsound in itself and completes a picture of shoddy dealing.

Speaker RAYBURN, after the cut was resolved upon by the Democratic members of the House Ways and Means Committee, announced that the reduction was aimed to help low and moderate income families. "They are the people who will put the money in circulation," he said. To which Representative REED, the ranking Republican member of the committee, retorted: "This would invite every man, woman, and child to line up in front of the Treasury and get a $20-handout. The American people do not expect or want a handout of this sort especially at the present time of international crisis."

The Eisenhower administration has been working earnestly to reduce the economic burdens which the crisis imposes, without endangering national security. It has endeavored to correct inequities in the tax structure on a sensible basis and, by cutting down unnecessary expenditures, to make possible, an eventual substantial saving to the taxpayer. This approach is not dramatic, but it is essential if the Nation is to have fiscal health, without impairment of essential services. Such an orderly and scientific effort to solve the country's financial problems stands in sharp contrast to the offhand, hasty and dangerous methods of the House Democrats.

Fortunately, one can expect that not every Democrat will join in this raid on the Treasury. Senator BYRD has already attacked the plan. Others may decide that the scheme is too transparent to succeed as a vote-getting device. The American people are wary of politicians bearing gifts. They know they will have to pay the bill in one form or another.

[From the Washington Post and Times Herald of February 23, 1955]

TAX CUTS A LA MODE

Democrats on the House Ways and Means Committee engaged in a piece of capricious irresponsibility in approving an income-tax cut of $20 a person. It is dismaying to see Speaker RAYBURN and Floor Leader MCCORMACK lending their prestige to the disruptive kind of politicking. The chagrin of the Democrats over the administration's gambit in holding out hope of a tax cut in 1956 is, of course, understandable. The administration, too, has its eye on the 1956 campaign, and it attempted to steal the Democrats' thunder. The difference is that a cut at the end of this year would play hob with a budget already submitted. It comes with ill grace for the Democrats to be talking about greater defense expenditures and chiding the administration about an unbalanced budget, and then voting to unbalance the budget further.

Moreover, the cut is unnecessary as an economic stimulant. The economy has recovered from the recession, and the pious concern for the plight of low-income taxpayers has far more political than economic justification at this time. All groups benefited from the tax cuts last year. If a further reduction were warranted now, a broad interest in keeping the economy expanding would call for permitting the scheduled reduction in corporation taxes and the elimination of certain excises to take effect. The administration has opposed even these reductions in the current year, and possibly the Democratic strategy is to put the administration over a barrel by giving it a choice of accepting a $20 per person cut or a lapse in the higher corporation rate that could be exploited demagogically. The hope of curbing this jag of irresponsibility seems to lie in the Senate and in the statesmanship of such men as Senators GEORGE and BYRD.

[From the New York Times of February 24, 1955]

POLITICAL HANDOUT

Led by Speaker SAM RAYBURN, the Democrats of the House of Representatives seem ready to act on the belief that it's politically smart to offer to every man, woman, and child in the United States a $20 cut in his Federal income-tax bill. This reduction may win a few votes for the Democrats next year; but it is our hope and belief that more Americans will be revolted than pleased by this irresponsible action.

It is irresponsible, as every Member of the House from Speaker RAYBURN down must know, because it would wipe out most of the returns from the proposed extension of present corporation and excise-tax rates. It is irresponsible because this Government is still running at a huge deficit despite valiant efforts of the present administration to bring the budget into balance. It is irresponsible because it is precisely the kind of action that promotes inflationary forces, just at a time when the price level has achieved stability. It is irresponsible because it fosters the idea that we're all getting something for nothing when in actuality we are all obligating our children to pay in the future for our own fiscal cowardice of the present.

Until Speaker RAYBURN and his Democratic colleagues sprang this political trick last Saturday the Democrats had played a moderate and encouraging role in this session of Congress that was bound to strengthen their already great vote-getting power with the mass of independents who are necessary for the success of either party on election day. But how can this $20 prize to each taxpayer and to each member of his family fail to convince those selfsame independents that a large part of the Democratic Party in the House is still bewitched by that disastrous inflationary philosophy that can do more to undermine the basic security of this country than all the security risks between here and Wisconsin?

The proponents of this 100 percent political deal know that it has not enough merit to stand by itself, or they would not have tacked it on to the administration tax-extension bill as a rider—incidentally, a rider going in the opposite direction from the horse that bears it. They know that it is essential to the Government that the corporate and excise taxes be continued at present levels, and they do not oppose that; but if the $20 handout remains in the bill they know that the President cannot kill it without vetoing the entire measure. If the rider goes through the House today it will be up to the Democrats of the Senate to save the Democratic Party from itself, and to save the Nation from as crude an example of playing politics with the Nation's fiscal structure as we have seen in several years.

[From the Chicago Daily News of February 22, 1955]

A THINNING CLAIM

The pre-November claim that a Democratic Congressman was just naturally President Eisenhower's best friend is wearing thin in the rough game of politics. The bill to reduce income taxes by $20 per person, approved Monday by the House Ways and Means Committee, is the newest evidence.

The idea is to tie it to the President's own revenue plan in a way that deprives him of

credit for future tax cuts that may be warranted by reduced spending.

Mr. Eisenhower has asked a year's postponement of the drop in corporation taxes from 52 to 47 percent, now scheduled for April 1. He also wants to keep present excise taxes on liquor, automobiles, and cigarettes. To this bill, the Democrats plan to add their proposal that in 1956 every taxpayer shall receive a $20 tax credit for himself and $20 for each dependent.

The political appeal of this is that it would take about 4 million persons off the tax rolls entirely. It would also give identical treatment to taxpayers in every bracket—a formula that is much more popular when taxes are being cut than when they are being raised.

The revenue loss for the calendar year would be some $2 billion, half of which would come in the 1955 fiscal year ending June 30. Inasmuch as the present estimate is for a deficit of $2.4 billion in the fiscal year, action adding another billion to the debt cannot be justified.

In justification of their political motivation, the Democrats can justly point out that last year's Republican Congress lopped $1 billion off the excise-tax rates over the President's opposition. They also have Mr. Eisenhower's statement that the administration hopes that further tax cuts will be possible next year.

The strategy of tying the $20 credit to the extension of other taxes is designed to make it hard for the Senate to block or the President to veto the combined measure. It should not be too difficult, however, to force the extension through at the last minute, when the choice becomes that or no tax bill at all.

With crucial elections coming up, this sort of jockeying for position is to be expected. There is one Democrat, however, who can be counted upon to back the President in this matter. He is Senator HARRY F. BYRD, of Virginia, and he holds the key post of Finance Committee chairman.

No matter how foxy the House may get, Senator BYRD is sure to take the position that tax bills should be determined by revenue needs and not by political advantages. We wish there were more like him.

[From the Washington Evening Star of February 22, 1955]

NOT TIME TO CUT TAXES

Secretary of Treasury Humphrey has made a properly forceful protest against the Democratic move in the House to cut individual income taxes at this time. By his estimate, the proposal to give a $20 tax credit to each taxpayer and dependent would cost the Government $2.3 billion revenue for a full calendar year. Ways and Means Committee officials estimate the potential loss at $2.1 billion and point out further that the proposed credit would result in removing about 7 million taxpayers from the income-tax rolls. Whichever estimate of loss is correct, approximately half of the drop in revenue would occur in fiscal 1956—in which the administration already foresees a budget deficit of about $2.4 billion. Adding a substantial sum to this deficit would increase the inflationary pressures which the administration has succeeded over the past 2 years in bringing under reasonable control, a result which could be greatly damaging to the public interest.

Approximately $7 billion in tax relief has been given during the past 2 years. In the same period, Government spending has been curtailed to bring closer the prospect of a balanced budget. The administration is recommending now that scheduled reductions in the corporation income tax rates and in certain excises—involving an estimated $3 billion in annual revenue—should be extended for 1 year at their present levels in the hope that another "general, though moderate," tax reduction program might be enacted in 1956.

It is unfortunate that political considerations are playing a large part in the maneuvering on tax legislation. For example, the Democratic proposal to reduce individual taxes is attached to the administration plan to maintain current corporation and excise tax rates—a maneuver obviously intended to minimize the danger of a Presidential veto if the combination bill should be passed. Clearly enough, the Government needs the revenue involved in this combination of proposals and it is an act of political irresponsibility to jeopardize it. The Democrats, especially those who are accusing the administration of spending too little on national defense, should not stoop to this kind of shabby politicking with tax revenues.

[From the Washington Evening Star of February 22, 1955]

DEMOCRATIC "WRECKING CREW"—MAJORITY PARTY IN CONGRESS ACCUSED OF LAUNCHING MOST VIOLENT ATTACK IN HISTORY ON THE DOLLAR

(By David Lawrence)

The Democratic majority in Congress has apparently decided to constitute itself a "wrecking crew" with the obvious purpose of wrecking the Eisenhower administration even if it means wrecking the Nation's economy at the same time.

The party that promised the electorate in the congressional campaign last autumn that it would uphold the hands of the President and support his measures now has turned on him and on the country, too, and has embarked upon a course of irresponsibility which cannot be justified even on the ground of partisan benefit. For the new proposal to buy the American voters by giving everybody $20 off his tax bill and also freeing nearly 5 million voters from paying any taxes at all is the cheapest form of demagoguery.

The worst phase of it is the way it is being attempted—that is, by a trick of legislative procedure which seeks to tie the President's hands so that, if he wishes to veto the proposal, he will also have to veto the continuance of the corporation taxes at the present rate of 52 percent. The Treasury needs the $1,750,000,000 in revenue which would be lost if the corporation taxes are automatically reduced to the 47-percent rate.

Also imbedded in the tax expiring on April 1—unless extension is voted now—are certain excise taxes which, if not continued, would cost the Treasury another $1 billion. This is all wrapped up in the same package, which the Democrats assume the President would not dare to veto.

But the proposal to cut off $20 from everybody's taxes would mean a loss to the Treasury of about $2 billion. So, if the President vetoes the bill with the $20 tax cut in it, the Treasury stands to lose about $1 billion in excise-tax receipts because the Congress wouldn't care to let the corporation taxes go down to 47 percent. A bill to extend corporate taxes could be passed any time between April 1 and December 31, 1955, and still be made retroactive for the full calendar year.

Mr. Eisenhower, therefore, has no choice. He has to veto the $20 vote bribe, which—because the taxpayers would not get it—the Democrats assume would create widespread resentment at the polls. As between a $2 billion loss on that scheme, however, and a $1 billion loss in excise taxes, it is preferable for the President to accept the excise-tax reduction.

There is no certainty, on the other hand, that Congress would refuse to pass a separate bill, after the veto, which would continue the excise taxes; hence, the loss to the Treasury might not materialize at all. Then, if business conditions are booming and tax receipts increase, it may be that in 1956 a general tax-reduction bill could be enacted in which all taxpayers are treated equitably.

The idea of letting anyone who gets an income of $3,000 a year become exempt from the payment of any Federal taxes at all, including the cost of national defense, is not one that will appeal to the sense of fair play of the electorate as a whole. Yet if the "wrecking crew" have their way, it will mean that many persons in that very income group will be exempt from the payment of Federal taxes.

What may prove to be the most serious damage done by the "wreckocrats" on Capitol Hill, as someone has dubbed them, may be in the effect on the purchasing power of the dollar. If inflation is to be the accepted policy of America for the years ahead—and that's what a continuance of the unbalanced budgets could mean—then the dollar will be driven steadily downward in terms of other currencies of the world.

The Eisenhower administration since taking office has made a heroic effort to work toward a balanced budget. The promise has been made that such a balance can be attained in the fiscal year beginning July 1, 1956, or that it will be so close to a balance as to assure the dollar a sound position. But if the spenders are to take hold then confidence will disintegrate. For if a "$20-for-everybody" doctrine is to be the political device to win elections, then there is nothing to stop the politicians from making it $50 next time and so on. It would be joyful news to the Kremlin, which hopes in one way or another to see the collapse of the private enterprise system in America.

There are some Democrats in the Senate, like Senator HARRY BYRD, of Virginia, chairman of the Senate Finance Committee, who are opposed to the idea of any tax reductions until the budget is balanced. But the Virginia Senator will have a hard time blocking the $20 bribe plan unless other Democratic Senators line up with him to conserve the dollar from the most violent attack that has ever been made upon it. The political conspiracy would have no chance of success if it were not assumed by the "wrecking crew" that the people can be and will be deceived.

Mr. Speaker, it can be readily seen that this kind of action here today without any hearings upon the bill is not sound and is not going to be well received by people throughout the country. For that reason I believe it advisable for the House here today to amend the bill. That will give the committee a chance to separate the extension of the excise and corporate levies. In that way we will be able to bring in the so-called tax reduction measure separately and to discuss the matter on its individual merits. However, for us to pursue this matter and pass this bill in its entirety would certainly constitute an irresponsible action of the worst sort. I can assure my colleagues on the other side of the aisle that I will be glad to consider this matter and to give it every consideration after hearings have been had by the Ways and Means Committee and such a bill is recommended to the House for action.

Mr. Speaker, I ask unanimous consent to insert at this point in my remarks certain articles and charts with reference to the importance of this bill and ask unanimous consent to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ALLEN of Illinois. Mr. Speaker, I yield 3 minutes to the gentleman from North Dakota [Mr. BURDICK].

Mr. BURDICK. Mr. Speaker, I just want to call attention to one small fact that may be of some influence on the vote that will be taken on this matter after general debate. Since January 2, our gold reserve has shrunken $1,400,000,000. We have gone into debt during this 6 weeks to the extent of $10 billion. So that we are worse off today by $12 billion than we were on January 2.

If I were running my own business, and that is about all I know anything about, is what I run myself, and if my herd of cattle had shrunken by 40 percent and I was going into debt to the extent of double what I had the year before, I would feel strongly that I was headed toward bankruptcy.

It is pretty difficult to understand how the Democrats can make any good politics out of this move because I apprehend when the vote is taken that some of you who voted billions to be scattered all over this world will not be in position then to talk about the reduction of taxes. There is only one good reason I can think of in my mind why I should vote for this bill and that is we should appropriate less so that we cannot carry on some of these great projects. If you would clean out the money you would not have anything to appropriate. But that would be a matter of strategy.

In this case I think it is a dangerous thing for us to hand out $20. I do not see any reason for it. Why did you not hand out $2,000? I have not heard any argument on this bill so far to indicate what the equation is. Why did you make it $20? Why did you not make it $60 or $100?

I do not know anything about the attitude of the President because I do not always follow him, but I will follow the President when I think he is right as I have followed Democratic Presidents when I thought they were right. I got a little bit of condemnation from my own side but that did not seem to hurt me any. In this case, if the President opposes this tax cut I will support him because I think this is no time, when we are skidding down $12 billion in 6 weeks, to talk about a tax reduction. It cannot be that you want to give the people $20 apiece because you got yourselves some money recently. That would not be the reason, would it?

Mr. ALLEN of Illinois. Mr. Speaker, I yield such time as he may desire to the gentleman from Indiana [Mr. HALLECK].

Mr. HALLECK. Mr. Speaker, certainly the speeches that have been made here have been eloquent and they have been enlightening. The gentleman from North Dakota [Mr. BURDICK] spoke of supporting the President when the President is right. I trust that I shall offend no one when I recall that the present Democratic leadership in the House of Representatives, being the majority, has frequently said that they were ready to support the President when he was right but they reserved the right to oppose him when he was wrong. Now, I am quite sure that those gentlemen, worthy and estimable as they are, must know in their hearts and minds that in this opposition to the President's position they are failing to support him when he is clearly and without question right.

You say to me, "How do you document that? How do you establish that?" All right. I will establish it. In the first place, the very way in which this matter is being handled is to me conclusive evidence of its wrongness. The timing of the action here sought to be taken is further evidence, but if you need concrete evidence, the gentleman from Tennessee [Mr. COOPER] in 1947 said this:

> We are unable to know yet just what our fiscal situation will be. Only two of our annual appropriation bills have gone to the President. Considerably more than half of our annual appropriation bills are still pending in the Congress. Nobody knows at this point what they are going to finally amount to. * * *
>
> So it is time for us to try to be certain that we can afford a tax reduction before we rush in here for political expediency and provide a tax reduction before we know exactly what our budget situation will be.

How can the gentleman from Tennessee support this action today? Not the first appropriation bill has even been reported by the Committee on Appropriations.

Then, our great Speaker, the gentleman from Texas [Mr. RAYBURN] in 1948 said a number of things in respect to his being disturbed about the economy. And then he added:

> Those who would recklessly cut taxes at the risk of deficit spending may, indeed, be endangering their country to enemies, both foreign and domestic, against whom they have sworn to protect and defend.

So I ask in all sincerity, much as I love him and respect him, how does the great gentleman from Texas support the action here today?

Then, last year, the gentleman from Massachusetts [Mr. MCCORMACK], whom, as he knows, I hold in the highest regard, in a colloquy with me when the tax matter was before us, said:

> Does the gentleman clearly understand my state of mind?
>
> Now, the gentleman asked me a further question: Do I think tax reductions should take place?
>
> My answer is "No."

He started out then to help us avoid reducing the taxes by backing the amendment to raise the exemptions $100, which I did not think would help to improve the fiscal situation.

I am glad this thing has developed this way for one reason. It shows what the real situation is. Now, bear in mind we started out to extend the 52-percent tax on corporations. And, would it interest you to know that the other noon, during a speech at the Pennsylvania Manufacturers Association in Philadelphia, Pa., they adopted unanimously a resolution saying that they approved of the extension of that 52-percent rate. I thought that was a fine, patriotic statement, and I thought, by the same token, the people who get this $20 are willing to pay their share of the Government in these critical times.

We all know that those excise taxes have to be extended. I thought it was all agreed to and understood, and it was, apparently, until last Saturday, after we had adjourned over the weekend, to be back here for Washington's Birthday on Tuesday, when all at once we read in the paper that a little huddle had taken place, with the result that we now have the $20 arrangement tied on to the 2 things that must be done, the 52-percent corporation tax and the excises.

Now, I suppose blackjacking is a strong word, and if it is unparliamentary I will withdraw it, but coming from Indiana it well looks to me like this is a sort of blackjacking operation to put the President and a lot of us over the barrel by saying, "Well, if you do not take this $20, you are jeopardizing the excise extension and the 52-percent corporation tax." My friends, if it is to be a war of nerves, just let me say this, that I have been in them before, and I think the President has been in them before, and we will see who comes out on that.

No, to me it is perfectly obvious that the expectation here is political advantage.

Mr. COOPER. Mr. Speaker, will the gentleman yield?

Mr. HALLECK. I yield to the gentleman from Tennessee.

Mr. COOPER. The gentleman has referred to the Pennsylvania Manufacturers Association. I would like to read one line from a letter from the National Association of Manufacturers, addressed to me as chairman of the Committee on Ways and Means, in which they say:

> I urge the committee to give the most serious study to the dangers of continuing the 52 percent rate to April 1 a year hence.

Mr. HALLECK. Mr. Speaker, let me respond to that by saying that I am for the 52-percent rate extension.

In any event these times are too serious for monkey business. The word "irresponsible" is also a rather rough word, but I do not think there is any other phrase that more adequately describes this proposal. And may I say to my friends over here on my right who are in control of this Congress that "You have the majority. Ours alone is not the responsibility for sound fiscal management. You share that responsibility with us, and you ought to be willing to accept it."

I just hope and pray, because I am very sure that over here we are going to be very, very solid, that today and tomorrow, as in times past, there will be enough of you who will stand for what I am sure you know is right.

Tax reductions? I do not know when there will be any more tax reductions.

Mr. FORRESTER. Mr. Speaker, will the gentleman yield to me?

Mr. HALLECK. I yield, if the gentleman would please be brief.

Mr. FORRESTER. I should like to ask the gentleman what is the difference between attacking this problem in 1955 and attacking it in 1956?

Mr. HALLECK. I will answer that. The gentleman from Tennessee [Mr. COOPER], in the statement to which I referred previously, made reference to the condition of appropriation bills in order to see what might be done. I do not know whether any tax reduction can be made next year or not. There has been no commitment, no assurance that

there will be any. And yet that deserves the most careful consideration.

And if I may say further to the gentleman, if there is to be a tax reduction measure, it should not be something like this, dragged out of a hat, with no hearings, no careful consideration. Perhaps there ought to be an increase in exemptions. If we are going to have a tax reduction, possibly we should consider these percentage increases, where we went in 1948 from 16.6 percent to 17.4 in 1950; to 20.4 in 1951; 22 percent in 1953, and then dropped back to 20 percent. If we are going to have a tax reduction, perhaps we ought to go back the same way that we went up. At any rate, this is no time to consider the matter, and certainly it is a subject that should be given much more consideration than it has had up to this time.

Mr. FORRESTER. Mr. Speaker, will the gentleman yield further to me?

Mr. HALLECK. If the gentleman will be brief.

Mr. FORRESTER. I should like to ask the gentleman, in view of the fact that the gentleman says that we are in the majority here now—and that is true—we will be in the majority next year, in 1956; what would be the gentleman's attitude toward making this kind of reduction in 1956?

Mr. HALLECK. As a matter of fact, I will be very honest with the gentleman. As far as I can discover, I see no reasonable prospect for a tax reduction in 1956. But I should like to point out to the gentleman that this is a Democratic Congress, and if there is any political advantage to be gained by a reduction of taxes, the bill will be reported from the Committee on Ways and Means, if and when there is one, and it will have a Democratic name on it and the Democrats will get whatever political advantage there is in it.

Also, as an expert on the subject, I might say that some of us have found out that apparently there is not very much political advantage in a tax reduction. In any event, whatever kind of reduction it ought to be, it ought to have more consideration than this proposal has had. It is true that on occasion we have supported tax reductions. In the 80th Congress, the budget was in balance, because we cut expenditures. In the 83d Congress, as the gentleman from Illinois pointed out, we made tremendous cuts in the cost of government, and reduced expenditures substantially, to a point where we came within striking distance of a balanced budget. As a result we enacted a tax program, may I say to my friends on the right, that did much to prevent a recession you talk so much about and prospects of which was disturbing all of us. So I do not think anything wrong was done. We are now within striking distance of a balanced budget. The real issue is, How are we going to act on these appropriations? All the talk I have heard from some who seem to be the most vigorous in support of this $20 cut is that we are going to need more money for the Army, more money for the Air Force, more money for the postal workers, more for the classified employees, and we have to spend more money building schoolhouses. All the talk has been for more money.

We have a great battle on our hands to hold down the appropriations. Let us not get the cart before the horse, certainly at this particular time. If Democrats and Republicans go to work through this session of Congress and cut these appropriations enough, then you will balance the budget. You might even be able to have some tax reduction. But, as I say, let us demonstrate first our ability to do something about the appropriations.

Word has been spoken here already of the threats of inflation. You know the position of the people who work for a living, and about everybody does, has been improved because the wage increases many have had have not been gobbled up by the decreasing value of the dollar. We have stabilized the value of the dollar under this program and that is real achievement.

Who gets hurt first from inflation? I know there are people in the gallery today who are employees of the Post Office Department. Some of them came to see me. They ought to know and I am sure they do know that the man on a fixed income is the fellow who gets hurt worse as inflation starts over again.

Heed the words of our great Speaker, SAM RAYBURN, who on another occasion pointed out the dangers of inflation. Let us not make this situation worse instead of better. Let us not rock the boat now.

Mr. SMITH of Virginia. Mr. Speaker, I yield the remaining time to the distinguished majority leader the gentleman from Massachusetts [Mr. MCCORMACK].

Mr. MCCORMACK. Mr. Speaker, my good friend from Indiana [Mr. HALLECK] has forgotten already some of the observations made by the President in his budget message sent up here only a few weeks ago. I quote for his recollection. The President said:

> I hope the tax reductions will be so justified next year.

That is 1956.

> If so, I shall recommend a reduction in taxes to spread the relief fairly among all taxpayers in a way which will be the most effective to relieve individual tax burdens and to increase incentive for effort and investment.

The very fact that he says he hopes to make a recommendation in 1956, which clearly indicates he intends to, because we all know the Republicans might forget that 1956 is an election year, that he is going to spread the relief fairly, would indicate that the Republican tax reduction bill of last year was not fair. That is the proposition. We are undertaking now to rectify the injustice of the Republican tax reduction bill of 1954 when only a small percentage of the $3 billion in reductions—and nobody knows what it will be from the long range angle—goes to a small percentage of the taxpayers and in the main to the large corporations. Twenty-three percent of the immediate tax relief and only 9 percent of the long range tax relief contained in the 1954 Republican tax bill went to taxpayers with incomes under $5,000. Mark that. That violates the heritage of the Democratic Party, which my friend, which has been referred to, and I certainly am imbued with the fundamental principles of Thomas Jefferson, as every other Democrat is. We believe that taxes should be levied on the basis of the capacity to pay, and that when reductions are made, that the low-income tax groups should not be discriminated against. Everyone here knows that there was discrimination against the low-income group in the tax bill of 1954. The gentleman from Tennessee [Mr. COOPER] very properly presented the issue in the statement he made the other day to the press. I quote:

> There is one thing which our proposal will set straight right now and that is whatever the President may have in mind in the way of tax reductions next year—

And do not think, my friends, that he has not because he does—

> We will be assured that the low-income taxpayer will be adequately recognized.

Any time anyone stands up in the well of the House to speak for the average person in America where taxes are involved, then we are accused of politics or some other accusation is made against us. The gentleman from Indiana [Mr. HALLECK]—and I like him just as much as he likes me—talked about "a blackjacking operation." Why, my dear friend is a past master in the art of "a blackjacking operation." Do you think we have forgotten what happened only a year ago? Do you remember when the Republicans reported out a bill extending certain excise taxes which were expiring and they wanted to make them permanent? We forced them to accept a 1-year amendment. They had to offer it themselves; but what did they do? Did they follow their President? They made him take close to a $1 billion reduction in excise taxes, and they tagged it on to the bill extending the expiring excise-tax law which brought in in the course of a year $2 billion. So, my friend, you are an able master and we are only copying a page out of your book.

Mr. MARTIN. Mr. Speaker, will the gentleman yield?

Mr. MCCORMACK. Always to my friend. My friend does not deny what I said, there was a nice blackjacking operation last year.

Mr. MARTIN. I am not going to comment on that.

Mr. MCCORMACK. All right, then.

Mr. MARTIN. I ask the gentleman if he thinks two wrongs make a right.

Mr. MCCORMACK. Oh, you admit last year was a wrong?

Mr. MARTIN. No, I do not.

Mr. MCCORMACK. What we are trying to do today——

Mr. MARTIN. If the gentleman will yield—the gentleman is misinterpreting what I say.

Mr. MCCORMACK. What we are trying to do today is to afford relief to the backbone of America, the average person on whom was imposed in the tax bill of last year a grave injustice. I yield to my colleague from Massachusetts.

Mr. MARTIN. Then the gentleman admits that he is wrong this year?

Mr. MCCORMACK. No, I do not admit I am wrong this year.

Mr. MARTIN. If that is the case, then I might follow the gentleman.

Mr. McCORMACK. Oh, of course, the gentleman would never follow me.

Mr. MARTIN. I might be sensible about that.

Mr. McCORMACK. But the gentleman may be correct—the gentleman might be correct. When you raise the question of being sensible, I will agree that my friend is always sensible. Even when I disagree with him from his point of view, of course, he is sensible.

Mr. MARTIN. I appreciate that.

Mr. McCORMACK. The gentleman from Indiana [Mr. HALLECK] says times are too serious for "monkey business." Well, it was only the other day when H. R. 1 was under consideration, 65 percent of the Republicans voted against their own leader in the White House. I wonder where the monkey business was then. I exclude the gentleman from Indiana [Mr. HALLECK], and the gentleman from Massachusetts [Mr. MARTIN], but they were the leaders with few followers.

So again, when the question of blackjacking is raised by the gentleman from Indiana [Mr. HALLECK], I will admit he is a past master at it. When the question of monkey business is raised, I will admit that we Democrats are naive.

Now, let us view the facts in their just light. Is there any objective-minded Member in this House looking over the 165 million people, this great country of ours, who thinks the small groups were treated right last year? The answer is "No." Does anyone doubt that next year the President is going to recommend lowering taxes? My dear friend from Massachusetts [Mr. MARTIN], in an interview in the Boston Traveler, about 10 days ago, stated or strongly intimated that they were going to recommend lowering of taxes next year.

Mr. MARTIN. Mr. Speaker, will the gentleman yield?

Mr. McCORMACK. I yield.

Mr. MARTIN. Does the gentleman claim that I made the statement we were going to lower taxes?

Mr. McCORMACK. No; I said "intimated."

Mr. MARTIN. We could do that if the gentleman would cooperate with us in making some real economies this year. We will do that.

Mr. McCORMACK. Oh, yes. Last year they put through a tax-reduction bill of about $3 billion. Secretary Humphrey admits it is $1,900,000,000, when they knew there would be a deficit of $4,500,000,000. They are talking about a deficit now, but they did it last year, and they imposed an inequity and an injustice upon the great bulk of America, the backbone of America, the average American and the average American family. Knowing that tax reductions are going to be proposed next year, our intention is to see that there is not another injustice done, by putting upon the statute books this benefit to the lower tax groups, effective January 1, 1956. With the evidence we have, the Democratic leadership and the Democratic Party would be recalcitrant in our duty to the people of America if we failed to do that which is carried in this bill.

Mr. HALLECK. Mr. Speaker, will the gentleman yield?

Mr. McCORMACK. Yes; I yield.

Mr. HALLECK. Of course, I am sure the gentleman will agree with me that if the people on his side should determine there should be no tax reduction, it is completely within their power to block any tax reduction because of the composition of the Ways and Means Committee.

Mr. McCORMACK. My dear sweet-minded friend, President Eisenhower sends up a tax-reduction recommendation, and we propose a reduction for the lower income tax groups, because they were discriminated against last year. What a brilliant and powerful contribution that is to this job. My friend from Illinois [Mr. ALLEN] on one hand comes down here and says in a most pious way, "All it amounts to is 37 cents to each taxpayer each week." But he also says, "It will cost $2 billion" on the other hand.

Mr. Speaker, the purpose of the Democratic leadership and the purpose of the Democrats on this bill is to correct an injustice that the Republican Party tax bill did last year.

The SPEAKER. The time of the gentleman from Massachusetts [Mr. McCORMACK] has expired.

Mr. SMITH of Virginia. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

Mr. COOPER. Mr. Speaker, I ask unanimous consent that all Members speaking on the bill H. R. 4259 may have permission to revise and extend their remarks and include excerpts and material that may be appropriate.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Mr. COOPER. Mr. Speaker, I also ask unanimous consent that all Members of the House desiring to do so may extend their remarks on the bill H. R. 4259 at the conclusion of the general debate and include such excerpts and materials as may be appropriate.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Mr. COOPER. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 4259) to provide a 1-year extension of the existing corporate normal-tax rate and of certain existing excise-tax rates, and to provide a $20 credit against the individual income tax for each personal exemption.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H. R. 4259, with Mr. PRIEST in the chair.

The Clerk read the title of the bill.

By unanimous consent the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Tennessee [Mr. COOPER] will be recognized for 2 hours and the gentleman from New York [Mr. REED] for 2 hours.

Mr. COOPER. Mr. Chairman, I yield myself 15 minutes.

GENERAL

Mr. Chairman, the pending bill carries out the recommendations of President Eisenhower that the present corporate tax rate and certain excise-tax rates be continued for an additional year, from April 1, 1955, to April 1, 1956. It will be recalled that these increases were enacted originally in the Revenue Act of 1951 and were scheduled to drop back to their level before that act on April 1, 1954. They were continued last year to this coming April 1.

In addition to continuing these taxes the bill also would provide a taxpayer a $20 credit for each of his exemptions.

EXTENSION OF PRESENT CORPORATE TAX RATE

The bill would continue until April 1, 1956, the present total corporate tax rate of 52 percent which is now scheduled to be reduced to 47 percent on this coming April 1. This would be accomplished by continuing the corporate normal tax rate at 30 percent which would otherwise be reduced to 25 percent. The 30-percent rate applies to the first $25,000 of taxable corporate income and the 52-percent rate applies to corporate income in excess of that amount due to the application of the surtax rate of 22 percent.

EXTENSION OF CERTAIN EXISTING EXCISE-TAX RATES

The excise-tax rates which will be continued for 1 year, from April 1, 1955, to April 1, 1956, are those on distilled spirits, cigarettes, gasoline, diesel and special motor fuels, motor vehicles, and parts and accessories. This means that on April 1, 1956, the tax on distilled spirits will drop from $10.50 per gallon to $9; on beer from $9 per barrel to $8; on wine, which is subject to various rates depending on their alcoholic content, the increase was approximately 12½ percent and, of course, the reduction will be in that amount; on cigarettes from $4 a carton to $3.50, which is, on a package basis, from 8 cents to 7 cents; on gasoline, diesel and special motor fuels from 2 cents per gallon to 1½ cents; on automobiles and motorcycles from 10 percent to 7 percent; on trucks, buses, truck trailers, and automobile parts and accessories from 8 percent to 5 percent.

TAX CREDIT OF $20

The bill provides a credit against income tax for all individuals of $20, which credit is allowed to the taxpayer for each of his exemptions. This means that a single person would get a $20 credit against his tax, a married taxpayer with two dependents would get an $80 credit against his tax and that a person who is over the age of 65 or who is blind would get a $40 credit against his tax.

An estate which is now given one $600 exemption would be given one $20 tax credit.

The tax credit allowed a taxpayer would not exceed his liability. In other words, if a married taxpayer with 2 children has a tax liability of $60, the

credit allowed him would be limited to this amount even though, without taking into account this limitation, he would be entitled on the basis of 4 exemptions to a credit of $80. The effect would be to eliminate completely the tax liability of a taxpayer where such liability is less than the tax credit to which he is entitled. This prevents a situation arising whereby a taxpayer would become entitled to a refund in an amount of the difference between his tax liability and his tax credit. Similar provisions are now contained in existing law in those cases where tax credits are now allowed, such as for dividends and retirement income.

The present requirement that a declaration of estimated income tax must be filed in those cases where a taxpayer's gross income for a year is expected to exceed $100 from sources other than wages—on which there is no withholding—and is expected to exceed, in total amount, the sum obtained by multiplying $600 by the number of the exemptions to which he is entitled plus $400, would be amended by changing the $600 figure to $700 in order to adjust this filing requirement to the $20 tax credit.

The $20 tax-credit provision would be effective January 1, 1956.

The withholding-tax tables would be revised so as to reflect the $20 tax credit and thereby increase the take-home pay of taxpayers for income which they receive on and after January 1, 1956. The optional-tax table, which is used by those taxpayers who have an adjusted gross income of less than $5,000, would be amended so as to reflect the $20 tax credit.

REVENUE EFFECTS

This bill would increase revenues for fiscal year 1955 by $191 million, and, for fiscal year 1956, by $1.149 billion. The full-year effect would be an increase in revenue of $737 million. The $191 million increase in revenue for fiscal year 1955 would be brought about by the extension of the excise-tax rates, which I have enumerated earlier, through the last 3 months of this fiscal year. The $1.149 billion increase in revenue for fiscal year 1956 would be brought about by the extension of the present corporate tax rate producing $1.075 billion and the extension of the excise-tax rates producing $889 million. The $20 tax credit would reduce revenues in fiscal year 1956 by $815 million, giving the net increase of revenues of $1.149 billion.

In a full year of operation the extension of the corporate tax produces $1.750 billion and of the excise taxes $1.080 billion. The reduction provided by the $20 tax credit in a full year of operation would be $2.093 billion, giving a net increase in revenues in a full year of $737 million.

NEED FOR THE $20 TAX CREDIT

Low-income families who account for the vast bulk of our taxpayers received only token relief in the Internal Revenue Code of 1954 last year. The major portion of the relief provided went to businesses and high-income taxpayers. Even those very meritorious provisions such as the allowance for deductions for child care to working mothers, the credit against tax for retirement income, and so forth, by their very terms were selective and this meant that for a low-income taxpayer to benefit he would have to be in exceptional circumstances. The $20 tax credit which this bill would provide will benefit each and every taxpayer in the country. It is equitable in that it is distributed to every taxpayer evenly on a dollar basis for each of his personal exemptions. Regardless of a taxpayer's income he would get a $20 tax credit for each of his exemptions—no less and no more.

The main argument advanced for the selective tax relief which was granted last year was that it was needed to encourage investment in productive capacity. It was my contention then, and it is still my contention, that this is putting the cart before the horse. No sound businessman will expand his productive capacity if he does not envision markets for the goods which he produces. My position has been confirmed by actual evidence. Our gross national product declined from 1953 to 1954 by $8 billion—from $365 billion to $357 billion. We all know that with the increase in our population, labor force, and productivity the level of our gross national product should continually rise just in order to keep pace. Not only did it not rise in 1954, compared to 1953, it slid backward. Investment in plant and equipment has continued to decline since the middle of 1953.

Another reason for providing a $20 tax credit for taxpayers for each of their exemptions is to reduce to some extent the unbalance in our tax system which was brought about by the tax relief provided last year in the Internal Revenue Code of 1954 for businesses and taxpayers in the high-income brackets.

I would like to bring to the committee's attention a statement by the President in his recent budget message, wherein he said:

> I hope that tax reductions will be so justified next year. If so, I shall recommend a reduction in taxes to spread the relief fairly among all taxpayers in a way which will be the most effective to relieve individual tax burdens and to increase incentive for effort and investment.

Both administration and congressional leaders in the last Congress had the country believing that the relief which they granted in the legislation which they sponsored was spread fairly among all taxpayers. By now those taxpayers who have already filed their returns for 1954 have found for themselves that this was not true. I can think of no better proof of this fact.

The $20 tax credit will make a reality out of the hope expressed by the President in his statement which I have just quoted and we, on our part, by enacting this credit, will insure that all taxpayers, about whom the President finally seems to be concerned, will be given fair and equitable tax relief.

Of the total tax relief of $2.093 billion provided by the $20 tax credit, $1.374 billion, or 66 percent, will go to taxpayers who have an adjusted gross income of less than $5,000. It will relieve almost 5 million taxpayers completely from tax liability, and everyone of these taxpayers have an adjusted gross income of less than $5,000.

I note that it is estimated in the current budget that our deficit for the year 1956 will be $2.4 billion. Since the $20 credit proposed would not become effective until January 1, 1956, this would add approximately $815 million to the estimated deficit, making the total $3.2 billion. I would like to point out that the deficit for the current fiscal year was estimated at $4.5 billion, which is $1.3 billion higher than the estimate for the deficit for the fiscal year 1956 after taking into account the revenue loss involved in the $20 tax credit proposal.

I feel that this tax relief for these low-income taxpayers is justified, and that the amendment which will be offered to strike this provision from this bill should be voted down, and that the pending bill should be passed as it was reported from your committee.

Mr. CURTIS of Missouri. Mr. Chairman, will the gentleman yield?

Mr. COOPER. I yield.

Mr. CURTIS of Missouri. Were those various figures and estimates, and so forth, considered by our committee at the time this measure was presented? Did we have hearings? Did we discuss this?

Mr. COOPER. Of course, that question hardly does the gentleman from Missouri credit. He was present. He knows there were no public hearings held on the bill.

Mr. CURTIS of Missouri. Will the gentleman explain why there were no hearings?

Mr. COOPER. If the gentleman does not have anything more important than that to suggest, I should like to continue. The gentleman knows the full committee agreed to not hold public hearings.

Mr. CURTIS of Missouri. May I ask the gentleman to explain to the House why hearings were not held?

The CHAIRMAN. Does the gentleman from Tennessee yield to the gentleman from Missouri?

Mr. COOPER. I do not yield further. If the gentleman cannot make any more contribution than that to this discussion, I do not care to detain the Committee with that kind of a question.

Mr. REED of New York. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, we have heard a great deal here about the debt. I wonder who created this debt. Which party created this debt of $275 billion?

I might go back just a little bit here. I made a few notes. I have a little record. Back in the 80th Congress we cut taxes by $5 billion a year. Old folks over 65 years got an extra $600 exemption. Seventy-one percent of the tax reductions went to people earning less than $5,000 per year. We gave the country the largest surplus in history. We pared $6 billion from Truman's padded budget demands and paid off $7 billion on the national debt, the first reduction in 17 years. Eight and five-tenths billion dollars surplus was left in the Treasury in 1948.

There has been a good deal said here with regard to tax policy. I introduced a bill to cut taxes and to revise the laws,

and I followed a sound principle that I do not think anybody can deny; that is, that when your country is moving into a depression business and individuals must have a stimulation so that they can have jobs and prosper.

As the result of those tax cuts, what happened? What is the condition of the country? You have a stable dollar now. You have people employed now. You are having payrolls built up all the time to take up the unemployed that are coming into the market every year. We stopped inflation. The cost of living has been stabilized. What we hope today to do, with your assistance, is to prevent inflation, which means that we do not want to see the cost of living begin to climb again.

Inflation is taxation. It always has been. I followed carefully the condition in Germany under inflation. Long before that I studied in detail the effect of inflation on France. Look at her Government today. She is still suffering from that inflation of more than 100 years ago. The question is whether it will not be another 100 years before she recovers from that inflation. They shake and tremble in France whenever there is the slightest threat of further inflation, even to this day. They became so desperate at one time for cheap money that what did they do? They sacrificed the church property and all the gold that was in the churches at the time. They said that was the finest backing possible for stable money. Now we have to watch our step on this question of inflation, and that is what we Republicans are trying to do.

We stimulated business. As I said, business is prospering. People are at work. Business has confidence, and that is going to create more revenue. What are we doing here? Let me give you a little outline of what I have to say on the Democratic inflationary Mills proposal.

Mr. Chairman, last Friday, Chairman COOPER and I each introduced identical bills, H. R. 4200 and H. R. 4201, to extend for 1 year the excise tax and corporation income-tax rates which otherwise would be reduced automatically on April 1. These two extensions have been recommended by the President as necessary to the fiscal stability of the Nation.

The deficit for fiscal 1956 is estimated at $2.4 billion, assuming that these two tax extensions are enacted.

Last Saturday morning, Speaker RAYBURN had a meeting in his office of 8 of the 15 Democratic members of the Committee on Ways and Means—a bare majority. They got their orders then to cut the guts out of our Nation's fiscal program.

They announced through the press Saturday night—and that was the first any of us learned about the plan—that our committee would meet Monday morning and be presented with this tax-cut amendment. We met Monday and it was rammed down our throats.

No hearings have been held on the subject of individual income-tax reduction. The public has had absolutely no opportunity to express its views on the problem. No other method of income-tax reduction was even discussed in our committee. No consideration was given to the impact of this proposal upon the fiscal stability of the Nation. Not even a guess was hazarded as to next year's budget and economic situation. Still it was rammed through.

Let us take a look at what is in this bill.

First, it contains the corporation-tax extension.

Second, it contains the excise-tax extensions.

Third, it provides, effective next January 1—10 months away—a $20-tax credit for each taxpayer, his wife, and other dependents.

This proposal will cost $815 million in fiscal 1956 and $2.3 billion a year thereafter. Therefore, it will add almost a billion dollars to the deficit next year alone. It will reduce receipts after 1956 by $2.3 billion a year.

If the majority are honest and sincere in their belief in individual income-tax reduction, why do they not propose such a cut to take effect now? The answer is simply this—even the Democrats realize that present defense and other budget needs make such an immediate reduction unwise and irresponsible. If that is the case, what crystal ball permits them now to foresee the budgets cuts which will justify a $2.3 billion tax reduction next January? Obviously, none.

The Democratic leadership have tied their individual income-tax proposal to the two extensions of the excise-tax and corporation income-tax rates. These two extensions will retain $2.8 billion of revenue. Practically all are in agreement on the absolute necessity of these extensions in order to preserve the fiscal stability of the Nation, and the Democratic leadership is taking advantage of this situation by making their two point three billion income-tax reduction a part of the extension bill. They hope by this legislative device to make responsible consideration of their proposal impossible. I challenge them to answer this question: "If you sincerely believe that your proposal is justified, why do you not offer it separately so that it can be considered on its own merits?" That, at least, would represent orderly process. Of course, the answer to the question is that such a procedure would not serve their purpose of embarrassing the administration and hamstringing its program.

We are told that this proposal is designed to help the little fellow. We are told that the Republican program has not done so. Do not be fooled by that old chestnut. I say to you that the President, by bringing about financial stability, has done more to help the average person in this country than tax cuts such as this can ever do.

Look at the record. Inflation has been stopped. Workers are no longer losing a major portion of their wage increases through price increases. Retired people, widows, and surviving dependents no longer find that hard earned savings are being destroyed by increases in the cost of living. This is an accomplishment of which we can all be justly proud.

Let me quote from press reports of what the staff economists of the A. F. of L. told their executive council recently:

> Unionized labor fared better in 1954 on the wage front than in any other postwar year. Higher hourly wages and stable living costs had given most workers their greatest postwar gain in purchasing power. This was true even though the average pay rise of 5 to 9 cents per hour was modest by comparison with increases in previous years. Last year the wage earner got the full benefit of a fatter pay envelope. In other years inflation gobbled up much of his gain.

That is our real accomplishment. We have no apology to make to the wage earners of the country.

We have given the country a sound dollar. We have stopped the ruinous increase in the cost of living. That means more to the people of this country than any tax reduction. We have given the American people new confidence in the free enterprise system.

That is what this dishonest tax reduction proposal drawn up by the CIO is designed to destroy. It is not designed to help the little fellow. It is designed to destroy confidence in our economy. It strikes at the very heart of the administration program.

Do not be fooled by the propaganda and trickery. The very future of our country and its economy is at stake. If you put your country above politics, you will vote to strike this tax-cut proposal out of the bill.

Mr. Chairman, there is nothing so important to every person in this country as the great heritage that has come to a free people. We are still in the balance. We are still confronted with enemies at war. We know that our chief enemy has brought within its power something like 800 million people. They are all lined up against us. We have this war in the Pacific. I think too much of my country to do anything that would possibly damage it. We cannot afford to do it. Think of the wonderful system we have under our great Constitution. We ought to be all pulling together now when we know that these foreign nations are doing everything in their power to get us into trouble.

I am looking back a little bit. Before this time we had 19 revenue bills come before the House, one following right on the heels of another, which placed a bigger burden on the people of this country.

Mr. MILLS. Mr. Chairman, I yield 15 minutes to the gentleman from Michigan [Mr. DINGELL].

Mr. DINGELL. Mr. Chairman, it is not my intention to expatiate at length upon the merits of the bill before us because there is no question about it in my mind. It is not even a matter for debate. The President just does not know what he is talking about when he attacks the $20 tax cut for each taxpayer and dependent, and which concession is predicated upon the most pressing of all taxpayers' problems—dependency. Just think of what that will mean. A taxpayer in the medium class with a dependent wife and 4 children will get a tax concession of 6 times $20 or $120 a year. The President derides that and belittles the Congress, or I should say the Democrats, with his reference to

our lacking "courage" because we failed to make this proposal in a separate bill.

I wonder who it was that lacked courage in the 83d Congress, 2d session, when the Republicans made several shifts in the tax law in order to give a very special concession in a tax cut having to do solely with the upper crust among taxpayers who derive most or all of their incomes from unearned sources; namely, dividends. There was no courageous outcry on his part at that time for the President is with big business, and big dividends for big stockholders, first, last, and above all. He did not know, or if he did he was ominously silent, that of the 71 million subject to the income tax approximately 4 million receive dividends, and, mind you Members of the House, about 10 percent of the 4 million or 400,000 receive 80 percent of all dividends paid out by our prosperous corporations. It would take no courage whatsoever for a righteous President to have protested that kind of a move and to condemn it, but this did not occur.

He could have supported the $100 increase in dependency exemptions but our courageous President failed to take advantage of the opportunity which we Democrats advocated and presented. Now, however, granting a $20 concession for each taxpayer and each dependent seems to roil the President until he is unable to rationalize and arrive at the only sensible answer, so he belabors the Democratic leadership and the Democratic members of the Committee on Ways and Means for this just and farsighted proposal. It labels the President clearly as an opponent of the average taxpayer and puts him in the proper perspective and place.

I think this is an opportune time, Mr. Chairman, to insert for the RECORD three exhibits, A, B, and C, which are self-explanatory:

EXHIBIT A

OCTOBER 29, 1954.

The PRESIDENT,
The White House,
Washington, D. C.:

Do you deny that the 11 percent individual income tax cut of 1954 was provided by the automatic expiration date of December 31, 1953, by the Democratic tax bill which was passed and became the law in 1951 and that therefore neither you nor the Republicans did anything about it but let it take its course? Do you deny that the total estimated tax cuts as provided for by the same Democratic tax bill of 1951 totaled approximately $8 billion as compared with a $7,500,000,000 cut claimed in the rewritten Republican bill which you signed? Do you deny that the Republicans nullified the excise tax cuts we Democrats provided in the tax bill of 1951 which were to expire April 1, 1954, on cigarettes, liquor, beer, wine, and automobiles and that you Republicans set the expiration date a year later to April 1, 1955? Didn't you, Mr. President, in fact recommend making these excise taxes permanent? Do you and the Republicans deny delaying the expiration dates of the excess-profits tax, the excise taxes abovementioned as provided in the Democratic tax bill of 1951, and do you deny opposing higher exemptions for all taxpayers demanded by the Democrats so that an unwarranted tax cut could be given to stockholders whose income derives from dividends? Do you, I repeat, deny this? I respectfully request an immediate simple and unequivocal reply to these pertinent questions so that the people may have the truth before going to the polls on Tuesday, November 2. Your administrative assistant, Gerald Morgan, who is right at your side as a former adviser to the Ways and Means Committee on tax legislation, can give you the answers in less than 5 minutes and you are free to promptly release the facts to which the people are entitled directly from the White House. Either you and the Republicans are wrong in making spurious and unfounded claims which mislead the people about tax reductions or I am. Believe me, I am not wrong, because I am right. I was there and helped write these tax-relief provisions in 1951.

JOHN D. DINGELL,
Member of Congress, Ways and Means Committee, 15th District of Michigan.

EXHIBIT B

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D. C., November 16, 1954.

The PRESIDENT,
The White House,
Washington, D. C.

MY DEAR MR. PRESIDENT: On Friday, October 29, preceding the election, I sent you a telegram pertaining to the misrepresentation rampant throughout the country relating to claims made by the Republican candidates and their party spokesmen from top to bottom with reference to recent tax cuts. I pointed out that these claims were for the large part in error and untrue and I sought your assistance and cooperation in making the truth known by a statement of fact emanating from you as the President and head of the Republican Party. To date I have not had even as much as an acknowledgment that you received the telegram.

For the benefit of the people I felt I should bring to their attention the truth of my contentions that the Republicans as a party had nothing whatsoever to do with providing that an approximate 11 percent reduction in individual income taxes should take place on January 1, 1954. All they did was to merely extend the date of payment of these and other taxes 1 month to April 15 for 1954, and the ensuing years. I say to you now that there was a serious attempt made to split this 11-percent cut to 5½ percent relief for 1954 and 5½ percent for 1955, but this was defeated because of the attitude of the solid Democratic minority, which expected a sufficient amount of support from Republicans who feared it as a political threat. I contend, moreover, that the Democratic tax bills of 1951 provided automatic expiration dates for a total reduction of $8 billion per annum while the Republicans have, instead of reducing taxes, actually in net effect increased them by $1.4 billion by delaying the expiration of the excess-profits tax and continuing the corporate rate of 52 percent for another year. The Republican claim of cutting excise taxes was spurious because the Korean increases were not permitted to expire as provided for in the Democratic tax bill of 1951 on April 1, 1954. The termination date of these taxes on automobiles, whisky, beer, wine, gasoline and cigarettes was delayed under the Republican tax bill and will take effect April 1, 1955, 1 year later than provided for in the Democratic bill of 1951. I specifically asked whether or not you recommended to the Congress that these excise taxes be made permanent. This in particular I stressed and asked for your verification.

The telegram pointed out to you that the Republicans provided favored treatment for a relatively small and preferred class of taxpayers who derive their incomes from the unearned source of dividends paid to stockholders. It further stated that the Republicans, by a solid party vote in the Committee on Ways and Means, of which I am a member, rejected the Democratic substitute proposal to provide additional exemptions for all taxpayers instead of exempting dividends from taxation as income. The Republicans took the same position on the House floor.

I should appreciate an early reply to my questions.

Respectfully yours.

EXHIBIT C

THE SECRETARY OF THE TREASURY,
Washington, December 7, 1954.

Hon. JOHN D. DINGELL,
House of Representatives,
New House Office Building,
Washington, D. C.

MY DEAR MR. DINGELL: This is to acknowledge and reply to your telegram of October 30 and your letter of November 16 to the President, relating to the recent tax reductions. The following facts seem to me to be the most significant ones in answering your questions.

When this administration took office, tax reductions involving an annual revenue loss of $8 billion were scheduled to take effect between July 1, 1953, and April 1, 1954. There was also an estimated deficit in the Federal budget for the fiscal year 1954 of $9.9 billion. If expenditures had been allowed to remain at the level planned by the previous administration and the scheduled tax reductions allowed to go into effect, the result would have been a severe blow to the stability of the economy and a sharp stimulus to the further deterioration in the value of the dollar.

By a vigorous scrutiny of the spending programs of the Federal Government, this administration was able to recommend substantial reductions in appropriations and to curtail sharply the disbursement of previously appropriated funds. Actual expenditures in the fiscal year 1954 were $10.1 billion less than the estimate of the previous administration. It was this reduction in expenditures which made it possible for the Republican Congress to permit and enact the $7.4 billion in tax reductions this year.

As you know, the $7.4 billion includes the $3 billion cut in individual income taxes of January 1, 1954, a $1 billion reduction in excises on April 1, and the elimination of the inequitable and repressive excess profits tax. The total also includes reductions of $1.4 billion in the fiscal year 1955 under the Internal Revenue Code of 1954.

Of the $7.4 billion, no less than $4.6 billion, or 62 percent, was for the direct benefit of individuals. Of the $4.6 billion, about $1.7 billion, or 37 percent, went to taxpayers with incomes of $5,000 or less. Previously, such taxpayers paid about one-third of the total take from the individual income tax and those excises which were reduced.

If the so-called automatic reductions had been allowed to take effect as scheduled, more than half of the direct benefit, or $4.2 billion, would have gone to corporations; whereas, corporations received only 38 percent of the $7.4 billion reduction which the economies of this administration made possible.

Sincerely,

GEORGE M. HUMPHREY,
Secretary of the Treasury.

Preceding the election, on October 29, 1954, I sent a telegram, which is exhibit A, to the President seeking a true statement regarding the automatic tax cuts which were previously provided by the Democrats. I merely sought to correct the misrepresentation of the Republicans during the campaign. I wanted the President to answer whether we Democrats were entitled to the credit, or any part of the credit, or whether the tax cuts were the sole accomplishment of the Republicans. I received no reply whatsoever. My purpose of course

was to get the reply before election because the Republicans were using or misusing the opportunity for their own particular advantage by misleading the people, but the President lacked the initiative or the "courage" about which he now speaks so boldly and remained silent. I was compelled to write him a letter, marked exhibit B, under date of November 16, 1954. Even then I failed to hear from the President. Instead he took the way out so customary in the Army and "passed the buck" to Secretary of the Treasury, George H. Humphrey, from whom I received a letter dated December 7, 1954, and which is marked "Exhibit C." While I will not at this juncture treat the reply as thoroughly as I shall later, I shall, however, refer to the spurious claim of the Secretary that the so-called tax cuts were made possible only because of the Republican record of the 83d Congress and the savings effected. That is the purest kind of bunk imaginable. The tax law of 1951 governed the situation, and the Democratic tax cuts would have become effective on the stipulated dates regardless of whether there were any savings or not. As a matter of fact, there was a tremendous deficit of $3.1 billion for the same fiscal year. There properly was no saving and no tax concession argument could be predicated on the Secretary's claim. One other point I want to stress directly and strongly is that Mr. Humphrey claims that the Republicans have increased the amount of the tax cut to the individual income-tax payer as originally provided for in the Democratic tax bill of 1951. But, deliberately, I am sure, the Secretary of the Treasury fails to admit to me, and I pass it on to you and to the people, that the added percentage to the individual taxpayer is due to the tax cut applicable to the unearned income from dividends to which I so strenuously objected then and still oppose. The Democratic cut accrued to the benefit of all income-tax payers, but the additional percentage was the big bonus that went to the favored coupon-clippers who are fortunate enough to collect dividends. When last I visited President Truman at the White House I remember seeing on his desk a small sign which stated, "Buck passing stops right here." It is too bad that President Truman did not leave that little admonition for the benefit of his military successor, who throughout his lifetime has been so used to the practice, or if President Truman did leave it behind that it was set aside or ignored. When I write a letter to the President I believe, in matters pertaining to taxes at least, I am entitled to a personal reply embodying the President's own ideas or opinions. As I pointed out in my telegram, the President had one of the shrewdest advisors on tax matters, who had served with the Committee on Ways and Means, at his right hand and in the White House where he could have given a straightforward reply to my inquiry in a brief moment. But the President did not want the people to have the requested facts. Thus he who now charges Democratic leadership and the Democratic members of the Ways and Means Committee with a lack of "courage" failed to give a prompt and a simple answer to an honest question.

My telegram to the President as well as the letter requesting a reply points up and stresses the fact that the Republicans aside from granting extra-special concession for the coupon clippers, who receive so much or all of their income from dividends, in their tax bill of 1954 proposed a delay of the automatic corporation tax cut from April 1, 1954, to April 1, 1955, as well as delaying elimination of the so-called Korean excise taxes. This year the President asked Congress to extend the corporation tax rate of 52 percent instead of permitting the scheduled reduction to 47 percent on April 1, 1955. The President courageously, oh so courageously, recommended that the already delayed automatic reduction of the Korean excises, which are largely borne by the poor, also be continued. For all practical purposes this means the same thing as a similar move made by the Republicans in the 80th Congress, and which applied to the excises levied in 1941; that is permanency. The Republicans are sales-tax-minded and they will courageously do anything to make this type of tax borne by the consumers, which means 97 percent or more of us, bear the burden, with the greatest stress upon the man having the greatest number of children and other dependents. That too, my friends, is an indication of the kind of courage our President has in mind when he charges the Democratic leadership and the members of the Committee on Ways and Means as lacking in courage when we did not provide for a separation of the $20 individual income-tax cut from the extension of the excise and corporation taxes which he recommended and asked for. That to my notion is a contemptible reference and a spurious argument. The President knows, if he knows anything, that the Democratic proposal to grant a concession to those who need it most because of the heavy burdens of dependency is germane and can properly be included along with his recommendations about the continuance of the Korean excise taxes and the 52 percent corporation tax rate. There is nothing courageous about the President's attitude, clothed as it is in Presidential aura, in demeaning the Democratic Members of Congress, and especially the Democratic members of the Committee on Ways and Means, now in majority, who have forgotten more about tax and fiscal matters than he will ever learn. This same group has served to maintain the country in a state of solvency more than 20 years.

The President if he chooses can show real courage by vetoing this bill which the House is sure to pass, with the Senate concurring. Will he do so? I doubt it. The House leadership and the Democratic members of the Ways and Means Committee propose nothing in this bill which the President did not have in mind when he recommended the extension of the Korean excise taxes and the retention of the 52 percent corporate income tax rate, as well as a tax cut which he did not delineate but mentioned as a possibility in his budget message to the Congress. We Democrats are merely providing for this concession to the taxpayer now; but we make its effective date January 1, 1956.

If the President who spoke so deprecatingly about congressional courage or lack thereof, wants to set an example of courage all he need do, I repeat, is to veto this bill when it gets to him. It is a challenge I know he will not dare accept, even though it is the President's privilege and responsibility to do so in view of his stated convictions. He will learn that the Congress which has the right to propose and dispose will have the courage to overwhelmingly override his veto. Therein lies the test of Presidential and congressional courage.

Anent the excise taxes and other matters let me add that I support fully the enactment of H. R. 4259. I would prefer that the bill not provide for the extension of the Korean excise tax rates. I endeavored to have this extension defeated in committee. However, because I believe it is essential that low-income taxpayers receive tax relief and because I believe a 1-year extension of the 52 percent corporate rate is necessary, I am in favor of the enactment of H. R. 4259.

My voting record will clearly indicate that I have consistently opposed the imposition of excise taxes and any rate increases with respect to excise taxes. My opposition to these Federal sales taxes stems from the fact that they are viciously regressive and have their greatest impact on low-income families. In many cases these excises are imposed on articles that could be considered necessities under our American standard of living. In addition to unfairly taxing the incomes of our small taxpayers, excise taxes have also adversely affected the level of business activities and the jobs of American labor.

In the last session of the 83d Congress, the Republican majority voted to report a bill extending for 1 year the excise-tax increases enacted in 1951 to finance the Korean war. One of the excises extended in this measure was the 10-percent tax on automobiles. This tax was continued at this exorbitant rate at a time when the automobile industry was laying off thousands of persons in my home city of Detroit. The automobile industry was at that time in a depressed condition and the continuation of this high excise tax on automobiles did nothing to alleviate the situation. I fear, Mr. Chairman, that we may soon again find automobile production forging ahead of sales with the result that job layoffs will occur in the automobile industry.

In view of the record of the Republican Party with respect to excise taxes, it does not surprise me that President Eisenhower has again requested that these excise taxes be continued at their present level. I would remind my colleagues in the House that the infamous Republican 80th Congress made permanent the temporary wartime excises that had been enacted to finance World War II. In extending the excise taxes last year the Republicans endeavored to make the Korean war increases a part of our perma-

nent tax structure. The Democratic Members in the House forced the Republican majority to agree to limiting the extension for 1 year. President Eisenhower has now asked the Congress to extend these excises for another year. Mr. Chairman, let us tell the President now that this is the last year we will extend these iniquitous excises. We will not let the Republicans again make temporary war excises a part of our permanent tax structure. Let me again state, Mr. Chairman, that I am opposed to the extension of the excise-tax rate increases because of their regressive effect and the unfair way in which they tax low-income families.

I regret that it is necessary to continue the 52 percent corporate rate but it is my belief that this rate must be continued until such time as the budgetary situation will permit substantial reductions in individual income taxes and excise taxes.

With respect to the sections of H. R. 4259 which extend a $20 tax credit to individual taxpayers, I would like to commend my colleagues on the Ways and Means Committee for their meritorious action in granting this fair and equitable tax relief. Much more substantial relief is necessary and must be soon granted but this is an important first step in the right direction.

I can well understand the concern of the Republican Party over this Democratic action. The President and the Secretary of the Treasury termed this tax relief "political." When it is considered that 65 percent of the tax reduction will be realized by taxpayers with adjusted gross income of less than $5,000, I suggest it is the Republican opposition to this measure that is political.

The record clearly suggests that giving the small taxpayer a break is not the Republican Party's idea of equitable tax relief. I would call my colleagues attention to what the Republican 80th Congress did in the way of granting tax relief. That Congress enacted a law that gave the average American family of 4 with an adjusted gross income of $2,400 a tax cut of $1.46. That is an increase in take-home pay of 3.3 percent. However, in that same tax-reduction measure the Republicans gave the $25,000 family a tax reduction of $58.50 a week, increasing the take-home pay for this family by 18.5 percent. The little man got a take-home pay increase of 3.3 percent and the high-income man received a take-home pay increase of 18.5 percent.

The story was no different in the Republican 83d Congress. The Republicans claimed they granted $7.4 billion in tax relief in 1954. What they neglected to state was that $6 billion of that $7.4 billion total came from tax-termination dates which were written into the law by a Democratic-controlled Congress. Actually, the net effect of the affirmative actions of the Republicans in the 83d Congress was to increase taxes by $1.4 billion. This resulted from an increase of $800 million due to the 6 months continuation of the excess-profits tax and an increase of $2 billion due to a continuation of the 52 percent corporate rate for 1 year. The $1 billion increase in excise taxes due to the continuation for another year of the Korean excise increases were in net effect offset by the $1 billion in reductions which were made in excise taxes. So what we have as the Republican record in the 83d Congress on tax reduction is an increase in taxes of $2.8 billion and a reduction in tax for the fiscal year 1955 of $1.4 billion with a net tax increase of $1.4 billion.

What the Republicans did succeed in doing during the 83d Congress was to shift the tax burden from a principle of taxation according to ability to pay to a philosophy of continuing the heavy burden of taxation on low-income families while granting preferential tax treatment to the more fortunate few. It has been estimated that of the claimed $7.4 billion in tax relief granted by the Republicans, 71 percent of it went to approximately one-third of the taxpayers—that group having adjusted gross income of $5,000 and over. The remaining two-thirds was realized by the 66 percent of our American families having adjusted gross income of under $5,000.

The Republican tax relief granted in 1954 ran true to form and took care of the Republicans' friends while doing nothing for the average American. For example, they took care of the coupon clippers in the provision of the 1954 Code which grants an exclusion of a credit against tax for dividend income. When fully operative the coupon clippers will benefit to the extent of $362 million a year. When you realize that only 8 families out of 100 in the United States own publicly held corporate stock, you can see how concentrated the relief for the individual income taxpayer is in favor of the wealthy.

We all recall how the Democrats in the House of Representatives came within four votes of throwing out the provision for the coupon clippers in substituting a provision which would have increased individual income exemptions by $100. I opposed the Rich Man's Tax Act of 1954 in committee, on the floor of the House and in conference. I fought the Republican relief for coupon clippers from the time it was first proposed in committee until the conference report was adopted by the two Chambers. Failing in all my efforts to bring about an equitable and balanced tax relief program, I refused to sign the conference report on the new law.

The irresponsible tax discriminations enacted into permanent law during the Republican 83d Congress has made the $20 tax credit an essential balancing factor that must be enacted into law. The $20 tax credit provided in H. R. 4259 will help to offset the preferential tax treatment granted by the Republicans. It is a source of great satisfaction to me that table 2 on page 6 of the committee report accompanying this legislation indicates that 5 million families will be relieved from income-tax liability. It is also a source of satisfaction to me that 65 percent of the tax reduction benefits coming from this $20 tax credit will be realized by families having adjusted gross income under $5,000.

Mr. Chairman, I have briefly highlighted the Republican record of discriminatory tax relief enacted by the Republican Party and supported by the Republican administration as compared with the fair and equitable tax relief which the Democratic Members of the House are sponsoring today. It is time that the American public received the benefits of a tax reduction program that applies fairly across the board and does not give tax relief exclusively to the wealthy coupon clippers and the large corporations. For that reason, Mr. Chairman, I urge my colleagues in the House to support the enactment of H. R. 4259.

Mr. MILLS. Mr. Chairman, I yield 5 minutes to the gentleman from Missouri [Mr. KARSTEN].

Mr. KARSTEN. Mr. Chairman, after listening to the debates on the tax bill this afternoon one cannot help but come to the conclusion that the Republicans, as well as the Democrats, favor tax reductions. The major area of Republican disagreement centers around the fear that the Republican Party will not receive adequate political credit if this bill is passed today. This is the main basis for Republican opposition.

The Democratic objective in this legislation is to try to grant some tax relief to the working people who were overlooked in the tax bill which passed last year. That bill carried tax reductions of somewhere around $3 billion but most of this went to coupon clippers and those in the upper brackets.

It is my hope that the bill will have a measure of Republican support. President Eisenhower, in his recent budget message, said:

> However, further tax reduction remains a firm goal of this administration. * * * I hope that tax reductions will be so justified next year. If so I shall recommend a reduction in taxes to spread the relief fairly among all taxpayers in a way which will be the most effective to relieve individual tax burdens and to increase incentive for effort and investment.

I should like to point out that the pending bill does not take effect until next year. That is the time President Eisenhower referred to in his budget message. It might also be said that the bill spreads the tax relief fairly among all the taxpayers in such a way as to most effectively relieve individual tax burdens. That conforms with the President's intentions as expressed in his budget message.

Since the November elections, the responsibility of leadership does not rest entirely upon the President. We must not forget the people repudiated the Republican party at the polls. They were displeased with the Republican 83d Congress. The Democratic majority is expected to furnish leadership along with the President and we are doing so in presenting this bill. In carrying out this responsibility, we feel we should indicate the kind of tax relief that should be granted next year. This bill would make it certain that if taxes are reduced as the President indicates the reductions will go to those in the low-income brackets who are least able to bear the tax burden.

The Secretary of the Treasury, Mr. Humphrey, in his appearance before the Committee on Ways and Means thoroughly convinced me that we should pass this bill. He frankly admits he has no program along this line, and it is unlikely he will develop one. He seems to follow the Wilson theory of, "What is good for General Motors and the big corporations is good for the country." Under this theory the little fellow will never get any direct tax relief.

Mr. CURTIS of Missouri. Mr. Chairman, will the gentleman yield?

Mr. KARSTEN. I yield to the gentleman from Missouri.

Mr. CURTIS of Missouri. The gentleman realizes he is making a quotation that is out of context and was not true; does he not? We have had that up on the floor of the House before.

Mr. KARSTEN. The gentleman knows I have great respect for his views, but I will have to differ with him, because Secretary Wilson did make that statement, and it plagued you gentlemen on that side of the aisle during the last 2 years.

Mr. CURTIS of Missouri. Secretary Wilson made his statement very clear and I read his complete statement into the CONGRESSIONAL RECORD during debate in the last Congress. I said at that time that I hoped this would put an end to this misquoting. Apparently, my hopes have not been realized.

Mr. KARSTEN. It plagued you for the last 2 years and I venture to say it is going to plague you for the next 2 years.

Mr. Chairman, the controversy about personal income-tax reductions has obscured the fact that this bill is primarily a revenue-raising measure. It continues the present 52-percent corporate income-tax rate which expires on April 1, 1955. In addition, it extends various excise-tax rates, which also expire on April 1. Failure to continue these taxes will result in a revenue loss of somewhere between two and three billion dollars. President Eisenhower has recommended that they be extended because we cannot afford any further loss of revenue this year. In my opinion if we do not continue these taxes there will be absolutely no possibility of any income-tax reductions next year, or in the foreseeable future. It is imperative, therefore, that we act in this matter and that we do so promptly.

I hope this bill will be passed for it is the only way to insure tax relief to those in the lower income brackets. Many of us are afraid the Republican Party in opposing this bill is following the rule of Alice in Wonderland, "Jam tomorrow, jam yesterday, but never jam today." Pass tax relief last year, pass tax relief next year, but never pass tax relief this year. Now is the time for those who really favor tax relief to make their position clear.

Mr. CURTIS of Missouri. Mr. Chairman, I yield 10 minutes to the gentleman from Ohio [Mr. JENKINS].

Mr. JENKINS. Mr. Chairman, while it is fresh in our minds, I should like to comment on what my good friend from Missouri has just said with reference to our distinguished Secretary of the Treasury who appeared before the Ways and Means Committee a few days ago. In all of my experience, and I have been a member of the Ways and Means Committee for nearly as long as any of its members, I do not know of anyone who came before our committee so courageously and defended himself so completely as did our great Secretary of the Treasury. He convinced me that he is a man that knows his business. He came before the Committee just as soon as he heard about this proposal to grant this $20 deduction and really knew what would be the result as to what the Democrats were supposed to do. He knew, and we all knew, that this Congress in this session should pass legislation with reference to a number of commodities upon which the excise tax was expiring and that this had to be done by the first of next month. He had planned everything accordingly. He was away some place for a day or so, but when he came back he found out that the Ways and Means Committee was going to do this thing with reference to this $20 exemption business.

What did he do? Did he hide out? No. He immediately demanded that he be allowed to appear before the committee. He came before the committee and answered every question asked him. He outlined his position and delineated the facts and figures to prove what he had in mind. I thought a whole lot more of him after I heard him testify. He handled himself very ably.

How does this legislation come before us? We would not have this legislation if it were not for the fact that there are a number of excise taxes that are going to expire in a short time and here is a list of most of them—special fuels, motor vehicles, gasoline, distilled spirits, perfumes, liquors and wines, beer, cigarettes, and other similar commodities.

Here was a big, magnificent tax structure that was going to fall down if we did not do something about it. The tax coming to the Treasury from these commodities amounts to $1 billion per year. It was time for us to bring this important tax matter up so as to extend the law. The Democrats brought it up. It was their business to do so because they had the majority and had the responsibility.

Nobody, apparently, up to this time, had any thought about this other business of reducing the taxes on individual incomes by $20. How about this $20 deduction? It has been stated that this is altogether for the benefit of poor people. Whom do you consider to be a poor man? What is usually considered as a poor man is a man who does not pay any income tax. As you know a man who does not earn more than $600 does not pay any income tax. If he is married his wife is entitled to a $600 exemption so he does not pay any tax if he does not earn more than $1,200 per year. Then if he has 3 children he is allowed $600 for each of them. So then if he does not earn more than $3,000 per year he pays no tax. And again if the man and his wife are past 65 years of age they are allowed an exemption of $1,200 each.

So, my colleagues, do not vote for this bill if you think you can claim credit from most of the people that are considered as poor people.

Now, what does this legislation do? If I were doing it I would take off a larger percentage of the small taxpayers and leave a larger percentage on the rich people. I would take a lot of these folks who make 3 or 4 thousand dollars and let them out. But you did not do that. You come on here and with great gesture say that you are doing something for the poor people. You would make those people believe you have done a wonderful thing for them. In my opinion, that somewhat lacks decency, for it is not truthful, it is not the fact, and it ought not to be circulated in that manner.

What did the Secretary of the Treasury say in addition to what I have told you? You know, I never thought that the position of Secretary of the Treasury was such a difficult job. I knew that it was a very responsible position. But Mr. George Humphrey showed us how he and his associates had studied the financial activities of the Government. They found that our Government owed many billions and that there was no definite plan for its payment or its reduction. He and his associates have set up a program that they think will carry us out of this financial forest. Already their efforts have had a remarkable effect on our national financial affairs. It was only natural that Mr. Humphrey was chagrined when he heard about this $20 proposal.

Nobody had told him anything about this $20 business. He quickly saw that it was going to upset his calculations. He saw that this matter could be a terrific setback to the financial program of the Government.

If you are a small-business man, you cannot let anybody fool with your cash register for if you do your day's work will come out wrong. But, the Secretary of the Treasury has a great big gigantic program of figuring out finances, and he is going along with it, and he has brought us good results, as everybody knows. The condition of the Treasury is in much better shape than it was a year and a half ago—there is no question about that—and there is every reason to believe that it is going to get better and more secure. Now, you throw this little thing in, and what does it do? It does not amount to much, but it is enough to throw everything out of its proper perspective, as it were, and I believe it is not right. It does not justify your intelligence and your ability, and furthermore it is not right for all the rest of us. It is not right for the taxpayers of the country; it is not right for the businessman who is planning to work himself out of inflation, and he knows now what he can depend upon.

And, over and around us are the clouds of war that are coming before us, and nobody knows what they are going to bring to us. If you throw this tax matter into the financial plans it is like throwing a money wrench into a delicate machine. You can stop it and maybe you can wreck it. It seems that is what you are trying to do; you are trying to stop the financial program that has been set up by the Treasury. And, the man

came up and defended it, and he defended himself against everybody.

Mr. Chairman, I am proud to add this little testimony of mine to help out, if it does, with the people, to have a right appraisal of our big American who knows how to finance this Republic. We should do what we started out to do when the Ways and Means Committee was called into session. We should abandon this dangerous new-fangled proposal to allow this $20 deduction. This is misleading and deceptive.

Mr. MILLS. Mr. Chairman, I yield 5 minutes to the gentleman from Texas [Mr. IKARD].

Mr. IKARD. Mr. Chairman, there has been a great deal said here during the last 2 days about politics and irresponsibility in loose and loud terms. As one of those who happened to believe in the principle of this bill last year and for a great length of time, I, at least, plead not guilty to any immediate switch in viewpoint or playing in politics.

In order to get this thing into its proper perspective I think it might be well if we examine what the facts are. Really, what has happened here? What is this bill? There has been a lot of talk about one part of it. What does it do? It does principally three things:

First, on April 1, 1956, it will reduce the corporate income tax 5 percentage points.

On April 1, 1956, secondly, it will reduce the excise taxes on automobiles, liquor, tobacco, and other items by some eight-hundred-million-odd dollars.

And thirdly, there is a proposal which has caused all the heat here, and that is that the taxpayers of this country will be guaranteed a $20 tax credit. That is this bill.

Now, where do we stand? Are we deciding here today whether or not we will have tax reductions? Is that the question? Is the matter of reducing taxes in the face of a deficit the question that we here are debating? My friends, that was decided over a year ago. A year ago the administration decided we would reduce taxes in face of a deficit, and that now is the law. Certain tax laws have expired that brought about the reduction in taxes in excess of $7 billion. If the reductions provided for in this bill go into effect next April 1, we will have reduced taxes over $10 billion in 2½ years without one cent of it having gone to the individual taxpayer. That is the question here. It is whether or not, in this program of reduction that has been embarked upon there will be any assurance to the taxpayers that they will receive their proportionate part of the reduction.

A great deal has been said and probably will be said about whether or not we should reduce taxes in the face of a deficit; and many allusions have been made to good business practice and what a businessman would do under the circumstances. I do not profess to be an expert in the field of business, but I have had some little experience and I know this, that many times to expand a business, to make it grow, it is necessary to borrow capital, and to keep up with expansion it is necessary to expend funds. The President has made a similar recommendation with regard to taxes.

I know that if our economy is to continue to grow, which it has not done in the last year, with our expanding population and increasing labor force, and if we are to provide employment and good business, we are going to have to find new funds to go into the market for consumer goods. Furthermore, we have the capacity in this country at this time to produce almost any amount of consumer goods that is required. This $20 tax credit, most of it, will find its way back into the consumer market.

I have been told and I have heard some illustrious Members of this body argue that a dollar turns over about seven times a year and there is a tax cut taken every time it turns over. So this $815 million that would be provided next year would provide, I believe, additional tax revenues.

I am one of those who believes that our tax burdens and our tax laws have reached the point of diminishing returns. Our tax burden in this country is something like 32 percent-plus of our national gross income. We are told that when it passes 25 percent we have reached the danger point. I think if we reduce that percentage toward 25 percent, we will probably collect as much as or more taxes and I, for one, will support this whole bill to reduce corporate taxes in 1956, to reduce excise taxes in 1956, and to reduce personal income taxes in 1956.

Mr. REED of New York. Mr. Chairman, I yield 10 minutes to the distinguished gentleman from Pennsylvania [Mr. SIMPSON].

Mr. SIMPSON of Pennsylvania. Mr. Chairman, I cannot understand why the Democratic Party is so very, very eager to show its unsoundness with respect to the finances of the United States Government; so eager, in fact, that over a year in advance of the time anybody would get any alleged benefit under this bill, and regardless of the situation which will exist a year from now when the bill would become effective, and entirely without regard to the forty, fifty, sixty, or seventy billions of dollars which will be spent by the United States Government during that year, as yet unappropriated and, of course, uncollected at this time; in view of all those facts I cannot, for the life of me see why it is that the Democratic Party is so eager to approve irresponsible and unsound financial practices at this moment.

Evidently there is some belief that they will be able to guide the people into believing that they are getting a real tax concession effective over a year from today, and that it will make friends of people who benefit thereby.

I want the people of the country to know that if there is any more unemployment between now and some time next year, in the event this proposal by the Democrats to cut taxes becomes law, that factor will be one of the major contributing factors in the cause of that unemployment.

I will attempt to illustrate it and prove it in this manner.

The moment this irresponsible type of tax reduction becomes law not one businessman who, after all, is the man who provides the jobs in the United States, will have any confidence whatever but that our financial record being made by Mr. Eisenhower and our party up to date is to be disregarded in the future, certainly to be disregarded so long as the Democratic Party controls the House and the Senate. By that I mean to say that the policy brought about to date through hard work of attempting to balance the budget will be out the window, as the saying goes. In the future any businessman who, I repeat, is the employer, will have every reason to believe that the financial policies in Washington are changed and that no longer are we to be guided by an effort to have a balanced budget and retain the stability of the dollar, but that on the contrary we are going back to the old practices of spend and spend and inflate and inflate the dollar, and thereby kid the American voters.

I have heard people who know better stand up here and say that a year ago we passed a tax bill which did not dollar-wise reduce taxes among all the people of our country evenly, as though it were possible to give a man a $500 tax reduction when the total of his taxes might be less than $100. That kind of argument means nothing. But I say to you that in the tax bill of last year we did those things which permitted us to keep on our tax rolls millions of taxpayers, a substantial number of whom would be eliminated in your proposed bill.

The easiest way to reduce taxes for anybody, to take people entirely off the tax rolls, is to put them out of a job. I tell you that this $20 proposal you have will put people out of jobs by creating a condition of uncertainty in the great employing forces of our country, and instead of having work for the man who expects to save $20 on taxes he may not have a job, as the result of this kind of loose financial policy.

Your corporation, a collection of individuals, gets its dollars somewhere, from selling goods, of course, and having got those dollars what does it do with them? It goes out and buys the materials upon which people work. It spends a large proportion of its money for that. It pays wages. A still greater proportion of its income goes for wages. It pays taxes. Fifty-two percent of all the money that corporation makes comes into the Federal Treasury. Then it pays dividends, rent, if you please, for the use of other people's money, to provide the—what is it?—$10,000, $12,000, $14,000 that must be invested before any man can have a job.

What did that tax bill we passed last year do to make all of the people support it? What did it do? It made possible for the management of business to know that for a while in the future there would be some relationship between income and outgo in our country, that there would be a reasonably healthy atmosphere in which business might hope to expand, in which jobs would be provided, and in which, if the emergency spending for war and the preparation for war gradually tapered off, as the country became more economy- and more efficiency-minded, business might take up the slack.

And so H. R. 8300, 83d Congress, making no pretense of dividing the tax savings among the individuals of the country, but designed to take up the unemployment in our country, designed to provide jobs, became the law of our land. And it has worked. It has worked magnificently so that today, in a day when Government spending is dropping off, where business is taking its place, and private capital is going into the investment field instead of the money being taken from the people by way of taxes, I urge you all to support legislation which will keep our Federal financial stature strong, and to do nothing to lead business to become nervous, to depend upon Government for largesse and kindnesses, and on the contrary let business realize that our Government now and in the future is going to provide a healthy place for expansion and the providing of jobs right here in the United States. If we do that, then this Congress will have made the greatest contribution it can make for the continued financial stability of our country. In this day, as we face the future with uncertainty, we want to be sure, that should the worst come to pass and our country be called upon to face the enemies abroad, we have here at home a healthy economy, an economy capable of providing jobs in the area in which the help of the individuals will be needed in the carrying on of war. We can do that only if we enact sound legislation here which in the final analysis will provide a healthy climate for the expansion of business.

Mr. Chairman, I yield back the balance of my time.

Mr. MILLS. Mr. Chairman, I yield 5 minutes to the gentleman from Minnesota [Mr. MCCARTHY].

Mr. MCCARTHY. Mr. Chairman, the Republican spokesmen in opposition to the proposal to reduce personal income taxes by $20 per person have made a great point of irresponsibility of action on the part of Democrats and of the unsound economic character of this proposal. I think it is interesting to look back at the economic situation in January 1953, when the gentleman from New York [Mr. REED] reported from his committee a bill to advance by 6 months the date of the 10 percent income tax cut scheduled for January 1954. In the fourth quarter of 1952, the gross national product was running at $362 billion. This was an increase of between $3 and $4 billion over the previous quarter. In 1953, gross national product reached $364.9 billion. If I understood the gentleman from New York here a few minutes ago, he said that he proposed this advance because the country was on the verge of a depression, at the beginning of 1953, and he wanted to head that off—to anticipate it. Unemployment in 1952 averaged 1,524,000 men. At the present time it is averaging 3,230,000 men. Unemployment is twice what it was in 1953 when the gentleman from New York wanted to head off a depression by advancing the date at which the income-tax reduction would go into effect. The cost of living index then was 113.5 and it was moving upward. Yet, the gentleman states that he was afraid a depression was coming upon us; consequently he proposed to reduce income taxes 6 months earlier than they were scheduled to be reduced. The budget deficit in 1952, that is the fiscal year 1952, was $4 billion. In 1953, the year during which he proposed that reduction, it reached $9.5 billion. It is estimated that the deficit for 1956 will be $2.5 billion. Now when the Democrats, under conditions which indicate much more justification for a tax cut of this kind, make a proposal to cut personal income taxes, they are charged with being irresponsible and with having no regard for the economic facts of life. Yet, the gentleman from New York proposed a reduction of twice as much under conditions in which there was much less justification.

Mr. HYDE. Mr. Chairman, will the gentleman yield?

Mr. MCCARTHY. I yield to the gentleman from Maryland.

Mr. HYDE. The gentleman referred to the proposed tax reduction of 1953, a 10 percent reduction. Was that ever seriously proposed by the Republican Party?

Mr. MCCARTHY. It was reported by the Ways and Means Committee which was controlled by the Republicans. That is sufficient for me. It was supported by the leaders in the Republican Party in the House of Representatives.

Mr. PRICE. Mr. Chairman, will the gentleman yield?

Mr. MCCARTHY. I yield.

Mr. PRICE. In answer to the gentleman from Minnesota that perhaps it was not proposed by the Republican Party, as I remember it neither were the reductions in excise taxes, although the Republican Party, after those things were forced upon them, later took credit for it.

Mr. MCCARTHY. Of course. There is more justification for what we are doing today, because this is part of the Democratic program.

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

Mr. COOPER. Mr. Chairman, I yield the gentleman 3 additional minutes.

Mr. MCCARTHY. The criteria for evaluating taxes and tax systems have not changed very much since Adam Smith wrote about them in the middle of the 18th century. There are four recognized standards: First, the standard of justice, including equity of imposition and equality of tax treatment; second, the economic effects; third, the ease of administration and compliance; and fourth, consideration of revenue. It is my intention to examine the legislation which is before us in the light of these standards, particularly the $20 tax credit proposal and to make certain comparisons with the tax revision bill of 1954.

It is well known that the Tax Revision Act of 1954 gave little or no relief to low-income citizens. Its concessions were principally to business and industry and to people in the high-income brackets. It was argued, of course, that personal income tax had been reduced by the income tax reduction which went into effect in January of 1954. This, of course, was true. It was argued further that the tax changes proposed in the 1954 act were necessary for business, that they would have a stimulating effect upon the economy, that eventually everyone would be better off.

Let us consider first the justice of the proposed $20 income tax credit. In the Federal tax system the income tax, individual and corporate, has become an accepted vehicle for the levy of a tax based upon ability to pay. Obviously ability to pay income tax is reduced in low-income tax brackets. One of the arguments frequently used, if not most frequently used, by the opponents of part 4 of this bill is that this provision would have the effect of eliminating approximately 5 million taxpayers from paying any taxes. Some will go further and propose that by being removed from income-tax liability somehow these American citizens lose their sense of responsibility and become second-class citizens. As a matter of fact, they will not escape the payment of taxes. Their tax load other than the Federal individual income tax will continue to bear heavily upon these citizens, who now pay taxes every time they buy a gallon of gasoline, whenever they pay rent or make payments on their home mortgages, almost every time they buy food or engage in any kind of economic activity. Studies show that the lower income groups bear an extraordinarily heavy share of the tax burden over and above their income-tax load. This tax burden consists of excise taxes, shifted corporation taxes, and taxes paid to other units of Government in the United States. One authoritative study reported in the National Tax Journal shows that the income group having an income of less than $1,000 per year pays 23.6 percent of its income in taxes. The proposal contained in part 4 of this bill will give direct and needed relief to people in the low-income groups.

It is particularly important and equitable that the Federal tax load be reduced at this time since the present administration is pursuing a policy which will shift government and other responsibilities to State and local governments, and thereby make necessary higher taxes at these levels. It is well known that taxes at the State and local levels of government are not graduated in the manner in which Federal taxes are graduated and that the burden falls much more heavily upon low-income groups. There is no reason to believe that those citizens who are freed from paying Federal income tax through this amendment will be freed from the payment of all taxes, or become unaware of their tax liabilities. I am satisfied that they will remain good citizens of communities, of States, and of the Nation.

The second important consideration with regard to taxes is their economic effect. It is generally agreed that the productive capacity of our economy is high; that it possesses the potential of producing ample goods sufficient to meet any reasonably anticipated demand. On the other hand, there has been a lag in demand. This $20 tax saving will increase the purchasing power of every taxpayer and the majority of them will use the money either to buy goods, or to make payments on goods already purchased.

The opponents of the bill have argued that the $20 credit will be inflationary.

The President has lent his own support to this view. I assume that Republicans who last week argued that the President's authority should not be given weight on the trade question because he knew little or nothing about tariffs, will argue today that his authority should be given great weight on an even more complicated economic question of taxation. Inflation occurs when the increase in purchasing power is not matched by an increase in available goods and services. There was an inflationary situation existing in 1948 when the 80th Congress passed a tax bill over the President's veto. Under the present bill this tax saving for each taxpayer will be distributed through the year at the rate of about 37 cents a week. This is certainly a gradual increase in purchasing power and should allow for an orderly adjustment on the production side. The result should not be inflation but rather an increase in the gross national product and an increase in employment and business activity.

Supporters of H. R. 8300 in the last Congress argued that the adoption of that tax program would result in the broadening of investment, in increases in production, and in decline of unemployment, and so on. Actually not one of these has been accomplished. It can, of course, be argued that conditions would be worse if the tax bill had not been adopted but this point cannot be proved. Let us look at some of the facts. It was stated that the use of bonds to raise money was dangerous and that through the passage of H. R. 8300 encouragement would be given to the purchase of stocks. Figures from the Securities Exchange Commission show that the ratio of new issues of bonds to stocks has not been materially altered. The so-called little investor for whom the Republicans were so concerned last year has not been moved to purchase shares of stock. There is some reason to believe that the high price of stocks has served as a barrier to the purchase of stock by the small investor. I pointed out last year when the tax-revision bill was being debated that the favored status for dividend income would raise the price of stock to those who then held stock and that it was in effect a windfall gain for those stockholders. High administration and Treasury officials have admitted that in their judgment there is a speculative factor at work in the stock market today. This cannot be explained in terms of anticipated inflation. It cannot be explained in terms of anticipated higher corporate profits since corporate profits from operations declined last year. It can be explained, in my judgment, only in terms of the effect of the tax program of last year and possibly of anticipated tax changes of a similar nature in the future. The weight of economic argument is in favor of the $20 income-tax credit.

The third criterion for a good tax has to do with the ease of administration and compliance. Proposed before us is a model of simplicity. Taxpayers will have no difficulty with it. It will involve no additional administrative attention. Consider this element of simplicity in contrast with the complexity and confusion which has arisen in connection with the administration of H. R. 8300. Complaints have come in from every section of the Nation regarding the complexity of its form. Taxpayers are not able to determine their tax liability with certainty or confidence.

The fourth criterion of taxes is that of revenue. The revenue loss for the fiscal year 1956 resulting from the adoption of this amendment will be $815 million, according to the best available estimates. Some of this should be made up through increased business activity and consequently increased tax collections from other taxes. This tax reduction will not go into effect until January 1956. The action here proposed gives substance to the promise or expressed hope of administration leaders. The postponement of the effective date until January 1956 gives the administration time to consider the possible effects of this reduction and to propose other legislation as a means of replacing this lost revenue if the administration remains convinced that undesirable economic and fiscal consequences will follow the adoption of this proposal. In face of a budget deficit of approximately $4½ billion last year, the administration supported a bill which diminished revenue by at least $1.5 billion. Loss of revenue is likely to increase in the years to come as a result of the use of depreciation allowances, the full effect of the dividend credit, and the cumulative effect of other changes made in the law. Today, with an anticipated deficit of $2.5 billion, the administration opposes as unsound a reduction of $815 million.

The passage of this bill with the $20 income-tax credit serves notice of the determination of Congress to give tax relief to the individual income-tax payer. This should not embarrass the administration since in effect it has promised such relief. Moreover, it gives the administration time to propose and recommend a better tax program or tax changes to replace the income which will be lost as a result of the passage of this bill.

Arguments of opponents that the passage of this act now is dangerous since we do not know what world conditions are likely to be are without substance since the Congress, particularly the Democratic Members, have repeatedly demonstrated their willingness to cooperate with the executive branch of the Government in meeting emergencies of every kind.

Mr. COOPER. Mr. Chairman, I ask unanimous consent that the gentleman from Pennsylvania [Mr. EBERHARTER] may extend his remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Mr. EBERHARTER. Mr. Chairman, various administration spokesmen have used pretty drastic language in opposing the Democratic move to reduce the income-tax burden of the American people by a small amount. They have called it a maneuver completely contrary to the public interest. They have alleged, "this move is playing fast and loose with the welfare of 160 million Americans."

Last fall Mr. Humphrey and his administration took a different view of lower taxes. "At last we have a tax cut," the President himself told a nationwide TV audience on October 8, 1954. "It brings benefits to every family in every American home," he claimed.

That, of course, was election time and the President was anxious to get a Republican Congress elected. Today the administration considers it "playing politics" to speak of tax cuts.

Tonight and every night until April 15, the lights will be burning late in a great many American homes as people struggle with their income-tax returns. I use the word "struggle" advisedly because these new Republican tax forms are so bewildering and complex, I am surprised they did not tangle up the Government's printing presses. At any rate, a great many American families are discovering right now just who is playing fast and loose with their welfare.

They are discovering, as Democrats told them all along, that the new Republican tax bill of 1954 does not save most of them a penny. It provides little or no benefits for people in the low and middle income groups, people who need a little more money to buy more food, more consumer goods, more services. The lion share of the tax benefits from the Republican tax bill went to the big corporations and those who receive all or part of their income from corporation stock dividends. They constitute just about 8 percent of our population.

"Oh, but don't be disappointed," the administration says to these people. "Our tax benefits for the wealthy and for the corporations will trickle down to you eventually. Our depreciation allowance, for instance, will stimulate new investments. New investments will mean more jobs and greater prosperity."

Mr. Chairman, there have been many excellent speeches presented here today which have properly pointed out the preferential tax treatment given to high income taxpayers under the Republican tax program of the 83d Congress. I will not attempt to repeat the many facts that clearly point out the tax discriminations that the Republican Party made a permanent part of our Federal tax laws. I would, however, like to express my complete endorsement of the remarks made by my Democratic colleagues who have preceded me.

Also, Mr. Chairman, rather than repeating what has already been said in explaining the bill, H. R. 4259, I will merely commend my beloved chairman and friend, the Honorable JERE COOPER, of Tennessee, for his very clear explanation of the provisions of this bill.

I would now like to direct the attention of the Members of this Chamber to a particular aspect of the Republican tax program which I think is typical of the manner in which the Republican Party has given tax preferences to a fortunate few without achieving the successful operation of the Republican trickle-down theory of tax relief. The particular aspect to which I refer is the so-called liberalized depreciation allowances on capital goods and equipment.

Well, let us look at these new depreciation allowances which were written into the Republican tax revision bill last year. Just what has this device stimulated? How many new jobs have been created by it?

Under the old system, as you know, a business firm deducts the cost of plant and equipment for tax purposes evenly over its estimated life. If a new machine has an estimated life, say, of 20 years, its costs is written off as a cost item over 20 years at the rate of 5 percent each year.

Under the new Republican depreciation allowance a business firm is permitted to deduct each year twice the percentage allowed under the old regulations. The double percentage is applied each year, not to the original cost, but rather to the unamortized balance. This has the effect of permitting about two-thirds of the cost of a business investment in a new machine or a new plant to be written off in half its estimated life.

This scheme is supposed to induce business to invest more money in new plant and equipment. Actually, however, this medicine was concocted for an ill which did not exist, at least when the Democrats were at the helm. Business expenditures for new plant and equipment rose steadily up to 1953. Investments of this type were $5½ billion in 1939. They were at an annual average of $19.2 billion in 1946 to 1949. In the following 2-year period they rose to an average $25.1 billion a year. Just before the Republican doctors, or should I say medicine men, forced this miracle pill down our throat, in the third quarter of 1953, total business outlays for new plant and equipment reached $28.92 billion annually.

Since then it has been declining slowly but steadily. It is still going down.

We Democrats said right from the beginning that the fast writeoff provisions of the Republican tax bill would not and could not cure this evil. We said that Dr. Humphrey's pill would not stop the decline in new investments. It did not.

The curve on the chart is still going down. Business outlays for new plant and equipment stood at $27 billion in the third quarter of 1954, at the time the provision went into effect. The fourth quarter of 1954 it was down to $26.59 billion, according to Government estimates. And in the first quarter of this year it is expected to sink still lower, to an estimated $26.03 billion.

When and how are we going to stop this alarming decline in investments? When and how are we going to face up to our responsibility to make possible full employment and an adequate standard of living for all Americans?

The Republican tax policy surely will not do it.

Instead of stimulating more investment and greater expenditures for new machines and more plants, as its sponsors claimed it would, the fast writeoff provision actually scares investors away. That is what many corporation managers themselves claim it does.

I was much interested in an article in the New York Times of Sunday, February 13, 1955, on this subject. According to this article, Willard F. Stanley, president of Corporate Services, Inc., says that the changes in the rules for depreciating new property will cost the Federal Government about $1 billion in taxes this year. And because few corporate managers will use one set of figures for the collectors and another for their shareholders. Mr. Stanley says, the same changes are likely to cut apparent corporate net profits by $450 million.

In fact, the president of Corporate Services, Inc., urges corporations to keep two sets of books. Otherwise, he fears, the investing public may not understand what is happening and that would have an unfortunate effect on the market for securities.

Mr. Stanley says that 80 percent of those planning to use the rapid writeoffs intended to book the rapid rate. They will thus deduct large chunks of money from profit, but to be held as cash. This, he thinks, is quite unnecessary and means not only letting the tail wag the dog but using a tail never intended for that particular dog. Keep a different set of books for your stockholders, he says, to show them profits. He does not say reinvest.

But double books or no, a majority of businesses are not using the new fast writeoff provisions at all. The New York Times of February 17, 1955, reported that only 45 percent of companies recently surveyed are using the new provision. Two-thirds of them hasten to add that it is not affecting their plans for capital spending.

The survey was conducted by the National Industrial Conference Board, a nonprofit research organization. It found that 35 percent of companies have definitely decided against using the new plan. Twenty percent are still undecided. They are still studying the new rules, presumably still looking for the great stimulus it is to give to new investments for making more products—products which people cannot afford to buy because they lack purchasing power.

The plain fact is that this fast tax writeoff provides no incentive to new investments and economic expansion.

We have noted that this new Republican policy has not stopped the decline of our economy. We have noted that it tends to alarm investors and results in double bookkeeping. And now this new survey of the National Industrial Conference Board tells us that a majority of corporations does not even want it.

These firms, according to the New York Times, are apprehensive over the Internal Revenue Service's interpretation of the new law. They would like a stable rate of writeoff. They prefer not to gamble on tax rates which, of course, may go up again in an emergency. They are perfectly satisfied with the old straight-line method.

Most of all, however, the business world is beginning to realize that the way to encourage and stimulate new investment is not by new gimmicks in the tax law but by the proven law of supply and demand. There must be a demand for products and money to buy them.

Here is what George Shea writes in the Wall Street Journal of February 21, 1955:

> The answers that say depreciation methods won't affect spending plans go on to explain that these plans depend, as before, on three factors: demand for products, advantages of technological improvements, and the availability of cash.

The key words in this sentence are, of course, "demand for products." No such demand can be created by the administration's tax policy of 1954. In fact, let us face it, this whole theory of giving the breaks to the big fellow and then letting the benefits trickle down to the little fellow has been a failure. Our entire economy is afflicted by creeping stagnation. The Republican cure did not work.

The only way to create the needed demand is to put more money into the hands of the little fellow who will buy more products. The only stimulus to needed expansion at this time can come from rising consumer purchasing power and sales. This is not playing politics but sound economic thinking, confirmed and reconfirmed by experience.

Our national economy requires a strengthened mass consumption base. That is why I shall vote to cut the taxes of every American by $20. Our people need this added cash in their pockets, not to keep double books but to buy the goods and services to keep our factories rolling and to make certain our men and women are at work.

Mr. REED of New York. Mr. Chairman, I yield 15 minutes to the gentleman from Missouri [Mr. CURTIS].

Mr. CURTIS of Missouri. Mr. Chairman, I am sorry the gentleman from Minnesota did not yield on the point he was making in regard to the purpose of the stock dividend credit. Its purpose was to switch corporate financing. I know, because I personally am very much interested in the provision and have watched it with a great deal of interest. The point is that it did not go into effect from the practical standpoint until after July 1954, so we have little basis on which to observe whether or not what we were hoping to accomplish has been accomplished.

Mr. McCARTHY. Mr. Chairman, will the gentleman yield?

Mr. CURTIS of Missouri. I yield.

Mr. McCARTHY. The only basis we have for judgment is what is reported in the Securities and Exchange index; there has been no change.

Mr. CURTIS of Missouri. But the point is, as I have been saying to the gentleman, that the tax has not been in effect long enough to have had any economic impact at all. I might say that there is one specific thing which is a very significant thing. General Motors in their refinancing went to a new stock issue instead of a bond issue just recently; and one of the main factors in their going away from bond financing to equity financing was this very provision in that bill. Whether or not that one isolated case is going to be indicative of what does happen within these next few

months as far as corporate financing is concerned is the important thing; and I personally am most interested to see whether or not that is accomplished; because, as I said on the floor of the House during the debate on H. R. 8300, if our theorizing of its economic effect does not materialize, I would be in favor of going back on that particular thing. My objection at the time was the fact that folks who did not know what the purpose was should argue there were other reasons behind it. I thank the gentleman for pointing out the real reasons, although I do say that we have certainly not had enough opportunity of observing the effect of that law to see whether or not we have achieved anything at all.

Mr. McCARTHY. Mr. Chairman, will the gentleman yield?

Mr. CURTIS of Missouri. I yield.

Mr. McCARTHY. I think the gentleman has made a fair statement about the need to reserve judgment. My point is that up to this time there is no basis for economic certainty that this provision has had any great stimulating effect upon industry or for saying that it has accomplished the purpose that those who supported it had in mind.

Mr. CURTIS of Missouri. One significant occurrence is the action of General Motors, which I pointed out. Whether or not there will be other such issues I do not know.

Mr. ALLEN of Illinois. Mr. Chairman, will the gentleman yield?

Mr. CURTIS of Missouri. I yield to the gentleman from Illinois.

Mr. ALLEN of Illinois. We have had just about enough talk about the 1954 tax reduction bill. It will be recalled that that bill provided an income-tax reduction of $3 billion of which 62 percent went to people who earned less than $6,000 a year.

Mr. CURTIS of Missouri. Yes. The gentleman is referring to the 10-percent tax cut that everyone got in this country beginning January 1, 1954.

Mr. ALLEN of Illinois. Under that same bill the excise taxes were reduced $1 billion. We all know those excise taxes were on luggage, travel, toilet articles, hunting equipment, and sporting goods. How can anyone say that that reduction of a billion dollars in excise taxes, when it went for those things—travel, luggage, toilet articles, and so forth—was in a wealthy man's bill? I think it also reached out to people of low income.

Mr. CURTIS of Missouri. I agree with the gentleman exactly and will go even further than that. Communications and transportation taxes are taxes on business and those taxes are passed on to the consumer of any product, be it a loaf of bread or a bottle of milk. They are the most vicious form of excise taxes because they in effect are a national sales tax.

Mr. ALLEN of Illinois. The gentleman will agree with me that when we passed last year the excise tax bill, giving a reduction in excises along those lines, it affected the wealthy and the poor as well?

Mr. CURTIS of Missouri. It not only affected them but it affected a lot more people, people that my Democratic friends are overlooking entirely in this bill. That is the little fellow who does not make enough money to pay taxes. I refer to people on pensions and on social security. They pay these hidden taxes on their loaf of bread and their bottle of milk just as much as the other man does.

Mr. ALLEN of Illinois. Another feature of that bill was the reduction of $2 billion in excess-profits taxes.

Mr. CURTIS of Missouri. That is correct.

Mr. ALLEN of Illinois. According to the best information I have, in connection with that reduction of $2 billion in excess-profits taxes, 61 percent of that money was used by the employers to build new factories, to put in equipment, and so forth in order to give work to hundreds of thousands of men. Does the gentleman remember at that particular time there were many gloomy people who were saying there was going to be a recession or a depression and spoke along those lines? So I repeat, the best information I have is that 61 percent of that went to the building of factories to give work to people which in turn brought more taxes back than the amount involved in the excess-profits tax structure.

Mr. CURTIS of Missouri. I thank the gentleman. He is making a very fair observation. The hearings held by the Small Business Committee under the control of the Democratic Party incidentally and the hearings held by the Committee on Ways and Means, indicate that the businesses that were being hit the hardest were the small and growing businesses, those that wanted to expand and build the plants the gentleman refers to. The name "excess profits" was not descriptive of that tax at all. It was really a tax on the "growth" and new companies in this country. I honor those on the Democratic side of the aisle who recognized that and voted with us. We agreed on that and we eliminated that tax entirely.

Mr. ALLEN of Illinois. Another item was the $1.4 billion involved in the tax revision bill.

Mr. CURTIS of Missouri. Yes.

Mr. ALLEN of Illinois. Those speaking with authority, agree that the $1.4 billion tax-revision bill was spread out in some form or other to practically every individual in the United States regardless of his income. Will the gentleman agree with that?

Mr. CURTIS of Missouri. I agree with the gentleman. The tax-revision bill was not a tax-reduction bill at all, as was pointed out in committee and on the floor of the House, and has never been contradicted on the floor of the House or in committee. It was a tax-revision bill, it was a bill to correct a lot of inequities that we knew existed. We did give some tax relief, but that was incidental in correcting some inequities.

Let us take, for example, the additional reduction we gave a working mother which has been referred to here. That was not because we singled out working mothers for benefit. It was based upon the argument that the businessman could deduct from his gross income a business expense: Why should a mother not do likewise, who had to pay a baby sitter to look after her 3- or 4-year old child while she worked, deduct the expenses of a baby sitter? We felt that that was a fair argument and it was an inequity that existed in the interpretation of the law. The purpose was to correct the inequity.

Let me illustrate again. Why did we give an additional $1,200, or about $1,000, credit to the people on retirement pensions like teachers who were not on social-security retirement? To give that to them? No. It was because of this argument. It was pointed out that we gave people who had social-security retirement complete exemption from taxation for their social-security benefits, and the argument of the teachers and others was "Here we have paid for our own retirement plan. Why should those who get it through social security get special tax treatment over and above the treatment we are getting?" And the committee felt that that was an inequity, and that is why we corrected it.

The proof of the pudding is in the eating, and all this is going over the debate we had last year. As I say, the proof of the pudding is in the eating. If this were a tax-revision bill, surely there should be some tax loopholes closed which would get more taxes, and that is exactly what the case was. I think we counted over 50 specific provisions in that tax-revision bill where we closed loopholes and gained revenue.

Mr. McCARTHY. Mr. Chairman, will the gentleman yield?

Mr. CURTIS of Missouri. I yield.

Mr. McCARTHY. Does the gentleman not agree that the Republicans will be in approximately the same position in January of 1956 that they were in January 1954 when the 10-percent income-tax provision went into effect? Now, as you know, that provision was included in the law under a Democratic-controlled Congress. There was a deficit of about $9 billion.

Mr. CURTIS of Missouri. What is the question?

Mr. McCARTHY. I will get to the question.

Mr. CURTIS of Missouri. I want to correct the gentleman's statement first.

Mr. McCARTHY. All right. Correct it.

Mr. CURTIS of Missouri. In committee it was the Republicans who put in the expiration date of that particular bill.

Mr. McCARTHY. In any case, it came out under a Democratic Congress.

Mr. CURTIS of Missouri. Yes, a Democratic Congress passed it.

Mr. McCARTHY. And you had a Republican Congress in control previous to January 1954.

Mr. CURTIS of Missouri. That is correct.

Mr. McCARTHY. Anticipating a 10-percent cut in the income taxes.

Mr. CURTIS of Missouri. Correct.

Mr. McCARTHY. And you had a budget deficit at the end of fiscal 1953 of about $9 billion, so there was ample time for the Republicans to say "This is unsound; we are going to head this

off, and this 10-percent cut will not go into effect because we want a sound fiscal policy."

Mr. CURTIS of Missouri. That is true.

Mr. McCARTHY. The Republicans did not do that. On the contrary, they claimed that it was a Republican reduction, and the President just yesterday included that $3 or $4 billion in saying the Republicans had reduced taxes by $7 billion under his administration.

Mr. CURTIS of Missouri. Now, I will be happy to explain what the facts are. In the first place, the Korean war was in the past, and we had the problem, which so many people failed to recognize, of trying to revert from a wartime economy to a peacetime economy, and that required different economic treatment. And, if you will note, the Eisenhower administration plans at all times were based on this. But, above all, by cutting $14 billion out of the Truman budget, we were able to allow that tax reduction to go in, and I will say to you gentlemen here and now if in these ensuing months you will join with us in trying to cut these appropriations and get this budget in hand, why, of course, we can give tax relief. But, except from the standpoint of one segment of your group over there, you have always been going through the aisle on a teller vote to put money back into the budget, and every time we try to get a reasonable cut in appropriations you are the ones that prevent us from doing it. There is only one way to balance the budget, and that is to grapple with these appropriation problems, in my estimation.

Now I want to say why I took the floor in the very beginning. It was mainly to give an opportunity to anyone on the Democratic side who wanted to take exception, to speak up to anything I said in my supplemental views in this report on this particular bill. In the concluding paragraph I say:

> The procedures adopted by the majority members of the Ways and Means Committee make a mockery of orderly legislative process. They bring the Ways and Means Committee and the Congress itself into disrepute.

Now, I can see why the distinguished chairman of this committee, the gentleman from Tennessee [Mr. COOPER], did not want to explain to this House why the committee had followed the procedures that they had followed and, in fact, said that my remarks in asking him to explain were not contributing anything to this debate.

I will say to the ladies and gentlemen of the House that every word uttered on the Democratic side of the aisle in behalf of this legislation is so much ashes until you can explain away why you have proceeded in this fashion; not permitting the Committee on Ways and Means even to consider this matter. All of these facts and figures that you are quoting are only your own ideas, nothing that the Committee on Ways and Means has ever had an opportunity to look into to check their accuracy.

I can understand why the gentleman from Massachusetts [Mr. MCCORMACK] when I asked him to yield to me and to tell me where he got his figures which applied to H. R. 8300, the tax-revision bill, was reluctant to tell me where they came from. Perhaps at this time he will tell me who computed those figures on the effect of H. R. 8300.

Mr. McCORMACK. Why, certainly. My understanding is that Secretary Humphrey has admitted that it would cost $1.9 billion.

Mr. CURTIS of Missouri. No. I am talking about the tax-revision bill of last year. When the gentleman was trying to point out that people with incomes under $5,000 per year were not getting very much benefit, that it was a rich-man's tax bill, that is when I asked the gentleman to yield and to explain where he had gotten the figures. Did the gentleman compute those himself?

Mr. McCORMACK. I am going to put them in the RECORD.

Mr. CURTIS of Missouri. The point is who compiled them? I think I can answer the question myself.

Mr. McCORMACK. I have a table here showing revenue effects, estimated revenue loss in the fiscal year 1955 and the number of taxpayers affected by the changes made by the Internal Revenue Code of 1954. That will be made a part of the record, and it will show that under the Internal Revenue Code of 1954—that is the Republican bill——

Mr. CURTIS of Missouri. Yes, that is the Republican bill, and I am proud of it.

Mr. McCORMACK. The gentleman may well be. Only 23 percent of the immediate tax relief and only 9 percent of the long-run tax relief contained in the law went to taxpayers with incomes under $5,000.

Mr. CURTIS of Missouri. What are the details behind that? The gentleman is begging the question up to this point.

Mr. McCORMACK. Oh, no.

Mr. CURTIS. Yes, the gentleman is.

Mr. McCORMACK. No. The gentleman is caught and says that I am evading the question.

Mr. CURTIS of Missouri. I am giving the gentleman plenty of time to explain.

Mr. McCORMACK. The income group with incomes of over $5,000 received 38 percent of the immediate relief and 18 percent of the long-run relief. It is estimated that corporations received 39 percent of the immediate relief and 73 percent of the long-run relief.

Mr. CURTIS of Missouri. Those figures are inaccurate, and I am asking the gentleman where they came from and who compiled such figures. I think I can tell the gentleman, and I shall tell him. This morning I came from an executive session of the Joint Committee on the Economic Report. Under our procedures I may not discuss what goes on in an executive session, other than to say this: I have seen those conclusions from the alleged statistics. They are from the PAC of the CIO. I have had the pleasure—and it was a pleasure, because I respect those gentlemen of the CIO—of sitting with them for over 2 or 3 hours and going over some of those estimates with them last year. And, believe me, I can say this, that at the end of it they said, "Well, we cannot discuss it further. We had better get our tax experts and economists to come in and give you our information," and these tax experts and economists have not appeared to this day, because, gentlemen, they cannot back these figures up. Those are just a lot of figures that mean nothing. That is why I asked the gentleman where he got them. He was just begging the question.

I know you have been saying this has been a rich man's bill, but on the floor of the House no one has dared to try to establish that in honest debate, and no one ever dare to try to establish it in honest debate in the Committee on Ways and Means.

Mr. McCORMACK. Can the gentleman state what the tax reduction will be in the 1954 tax bill?

Mr. CURTIS of Missouri. Does the gentleman mean H. R. 8300?

Mr. McCORMACK. Yes.

Mr. CURTIS of Missouri. The actual estimate of tax losses over the long range, about which I am mainly concerned, with the exception of things like baby sitters and people not on social security—I have never actually computed all these things—those were losses, but the essential features of the bill that you all have been saying were losses, like depreciation allowance, as a typical example, like stock dividend credit, in my judgment, and the arguments we advanced in the Committee on Ways and Means, were that those were not overall revenue losses although there were estimates of the immediate loss for the next year or two until the losses began bringing back in what your originally anticipated loss might be.

I can illustrate it, for example, on your stock dividends. A corporation, say, borrows a billion dollars in bonds or bank borrowings. It deducts the interest it pays on that billion from its gross income, so that is not subject to the 52-percent tax. If we could get the corporations to finance through equity investment, that is, stocks, then that equivalent amount earned on the investment capital would be subject to 52 percent tax. Take in the case of General Motors, if they will issue, as they apparently are going to, a stock issue instead of a bond issue, we are going to pick up 52-percent tax on the earnings from that capital investment.

As I said in the Committee on Ways and Means when we were discussing this thing, I can understand honest disagreement as to whether that economic theory would work. I thought it would. But certainly the whole measure was passed on that basis, not on the basis that we were giving any tax relief to stockholders or any group of that nature more than in the depreciation allowance that we were giving any benefit to companies, because over the lifetime of the equipment you do not get one cent more from depreciating early than you do from depreciating later. As a matter of fact, we think the Government will gain more taxes.

Many of your Democratic members on the Committee on Ways and Means agree with that philosophy on stock dividends and certainly on depreciation, that there

is no over-all tax loss; that, if anything, there is a tax gain.

That is why it is so important to get into the details of these things and know where your figures came from. That is what the Committee on Ways and Means should have been doing, in studying whether or not this particular Mills amendment was justified. We did not go into one iota of anything, with no public hearings. I was shut off there, I might state, in just about the same fashion the chairman responded to my inquiry here on the floor as to why he would not explain to this membership why the great Committee on Ways and Means had not had hearings, had not even had a discussion of this measure, instead of coming in at night, on Saturday evening with this brand new proposal. I was called in my office. I happened to be working on Sunday. A newspaper reporter asked me what I thought of this tax-reduction bill. I said, "What tax-reduction bill?" That is where I learned about it.

I came here to the Committee on Ways and Means at 10 o'clock on Monday morning. The written notice that we had did not say we were taking up the Mills amendment. I asked in the Committee on Ways and Means that the chairman rule that the Mills amendment was not germane to this bill, and that the procedures were not correctly followed in notifying the members. The chairman full well knew that I was within my rights as a member of that committee in asking that ruling be favorable. His response was, "We have never followed technical procedure in the Ways and Means Committee." That was the reason given for overruling my motion.

I want to say this: It is this kind of procedure, and I would say it whether it is Republican or Democratic, that will destroy the independent legislative branch of this Government.

I would like, and I would hope, that the Speaker, the gentleman from Texas, the Honorable SAM RAYBURN, will take the floor, as he did on the other measure last week when he asked us to follow correct procedure on this floor. I hope he will explain to this body why he thinks this procedure is proper, and why he thinks this procedure is conducive to good legislation because, in my judgment, this irregular procedure is what will wreck this country and this is what can very easily wreck this country.

Mr. McDONOUGH. Mr. Chairman, will the gentleman yield?

Mr. CURTIS of Missouri. I yield.

Mr. McDONOUGH. I appreciate the lucid explanation of the gentleman and his familiarity with the bill. Does the gentleman have any information that he can give to the Committee for our information as to the benefit that the average taxpayer will receive, and in what manner and at what date it will be received if this bill passes?

Mr. CURTIS of Missouri. The taxpayers will receive a $20-cut beginning January 1, 1956. However, I might say that that is a questionable benefit because I predict, as I say in my minority views, that we are going to have 1 cent go out of the purchasing power of the dollar and every $5,000 income is going to be reduced $50 in order to get this $20. The Federal debt for every man, woman, and child, by increasing the debt $2.3 billion in order to get this $20 is increased $15 per capita.

Mr. McDONOUGH. But in your minority views, you indicate the $20 allowance will increase the national debt to the extend of $15 per individual. Is that not so?

Mr. CURTIS of Missouri. That is correct.

Mr. McDONOUGH. Then, in addition to that, the taxpayer will receive the benefit of this in his payroll deduction whereby he pays his income tax?

Mr. CURTIS of Missouri. That is correct.

Mr. McDONOUGH. That is in the latter part of the fiscal year 1956, as I understand it?

Mr. CURTIS of Missouri. No, many people will be given it at the beginning of 1956 because it is a payroll deduction beginning on January 1, 1956, the calendar year. That is correct.

Mr. McDONOUGH. And if he is only eligible for the full $20, that is, if he has no dependents, the amount per month will be very small beginning the 1st of January until the $20 allowance is granted?

Mr. CURTIS of Missouri. It would be a small amount. It could be computed by dividing 12 into $20. Well, that is not entirely fair—no—because not only does the individual taxpayer get $20, but there is a $20 allowance for the wife and children. We want to be fair about this thing.

Mr. McDONOUGH. But if he only was eligible for a $20 deduction.

Mr. CURTIS of Missouri. Yes, that is true.

Mr. McDONOUGH. The offer that is made in this bill as compared to the proposal made a year ago by the Democratic side of the House was a $100 exemption, which they computed in this year evidently as equal in tax credit.

Mr. CURTIS of Missouri. That is correct, yes.

Mr. McDONOUGH. So that this year, they are now offering the public $20, and last year they were offering a $100 exemption.

Mr. CURTIS of Missouri. Yes, I think one reason for the change was the argument that the rich man who pays 87 percent would get $87 for every $100 credit, while the person with a lower income only gets $20.

Mr. MILLS. Mr. Chairman, will the gentleman yield?

Mr. CURTIS of Missouri. I yield.

Mr. MILLS. In answer to the gentleman from California, I think it should be pointed out that the $20 per dependent credit is equivalent at least in the first or minimum bracket to a $100 increase in the exemption allowed; is that not correct?

Mr. CURTIS of Missouri. Yes, I believe that is correct.

Mr. HALLECK. Mr. Chairman, will the gentleman yield?

Mr. CURTIS of Missouri. I yield.

Mr. HALLECK. First of all, I want to commend the gentleman for his very constructive, informative, and straightforward and fair presentation, which demonstrates his great knowledge of this entire subject. Apropos of the last question which was asked, of course, the $20 tax credit is the equivalent of the increase in the exemption of $100 only in the lowest bracket; is that not correct?

Mr. CURTIS of Missouri. Yes.

Mr. HALLECK. But as to anybody making more than $2,000 a year, it amounts to a discrimination as against the $100 exemption; is that not correct?

Mr. CURTIS of Missouri. That is right.

Mr. HALLECK. As to why the position of our friends on the other side of the aisle last year has been reversed in this fashion this year, I would not undertake to guess. However, I think this ought to be pointed out, since earlier in the debate there was much discussion of the tax program enacted in the last Congress. I think it ought to be understood, and why it is not understood I do not know, but, first of all, an overwhelming majority of the Members of the House of Representatives last year on both sides of the aisle supported these various programs, including the 10-percent reduction in personal income taxes which was made possible by savings, as you say, of $3 billion, which went right into the pockets of the taxpayers, and the people in the lowest brackets got the greatest benefit. In that case, we came back from the Korean war, where the tax was cut in the lowest bracket from 22 percent down to 20 percent.

Now, the billion-dollar reduction in excise taxes, I think in overwhelming measure, went likewise into the pockets of the taxpayers, even those in the lower brackets, because they paid less for a telegram or for a railroad ticket or to buy many other things where relief was afforded. We extended the excess-profits tax for 6 months. The gentleman has pointed out that that has been good for the economy. I do not find any objection to it.

There has been a lot of conversation about the big tax-revision bill, $1,400,000,000. There, most of the benefits are going to people—farmers, with a better tax-amortization program; working mothers, with better treatment and more favorable allowances on medical expenses, and so on down the line.

The gentleman from Massachusetts says that this $20 proposition is to overcome all of the inequities of the tax program of the 83d Congress, $7.4 billion. But to me it is significant that there is not one word in this proposal to undo anything that was done with respect to taxes in the last Congress. That amounts to a tacit approval at this time of that program.

Mr. CURTIS of Missouri. The vote on H. R. 8300 was 339 to 80. I think the House rather overwhelmingly endorsed H. R. 8300, which, incidentally, was really a codification and revision of our tax laws, which had not been revised for the past 75 years.

The CHAIRMAN. The time of the gentleman from Missouri [Mr. CURTIS] has expired.

Mr. COOPER. Mr. Chairman, I yield 15 minutes to the gentleman from Louisiana [Mr. BOGGS].

Mr. BOGGS. Mr. Chairman, one of the principal matters discussed this afternoon has been the so-called tax revision bill of 1954.

As far as I have been able to find out, nobody has been able to provide an accurate estimate of what that bill may eventually cost. The fact remains that the President of the United States signed that bill when he knew that it would increase the deficit facing the United States of America. Estimates of revenue losses range to all sorts of figures. Of course, the debate waxes back and forth on recapture, and so forth and so on, but just one provision of the bill, the so-called depreciation provision——

Mr. YOUNGER. Mr. Chairman, will the gentleman yield?

Mr. BOGGS. Yes, I yield.

Mr. YOUNGER. Did the gentleman vote for the bill?

Mr. BOGGS. Yes, I did, after voting for a motion to recommit.

Mr. YOUNGER. But the gentleman did vote for the bill?

Mr. BOGGS. Yes, sir; I did. And you will find it in the RECORD. There were many very good provisions in the bill which revised the entire Revenue Code and involved very little revenue.

One estimate is that the depreciation provision alone would cost a billion dollars this year. I would like to read a paragraph or two from an article appearing in the New York Times of Sunday, February 13, 1955, just a week or so ago:

Changes in the rules for depreciating new property will cost the Federal Government about $1 billion in taxes this year, one expert estimates. And because few corporate managers will use one set of figures for the tax collectors and another for their shareholders, he says, the same changes are likely to cut apparent corporate net profits by $450 million.

Willard F. Stanley, president of Corporate Services, Inc., is the man responsible for these figures. He holds that corporations should keep two sets of books. Otherwise, the investing public may not understand what is happening, he fears, and the effects on the market for securities may be unfortunate. The new rapid-depreciation rule is a purely artificial device to permit corporations to hold on to more of their cash in their early days—

And so forth. That is one expert's opinion.

I cite that only because of the fact that this legislation was signed by the President in the face of a deficit considerably larger than the deficit he faces at this time or may face on January 1, 1956.

Mr. McCARTHY. Mr. Chairman, will the gentleman yield?

Mr. BOGGS. I yield.

Mr. McCARTHY. Does the gentleman recall that the President was asking for a $15 billion increase in the public debt at the same time he was accepting this tax cut?

Mr. BOGGS. That is correct; nevertheless, that did not deter the Republican leadership in pressing for that bill.

So we are faced with a situation where this administration despite all of the pious platitudes we have heard has actually embraced deficit financing.

The acting minority leader can talk about what he saved and what he did not save, but the fact remains that the budget has not been balanced and that there is no recommendation contained anywhere in the President's budget message that it be balanced. As a matter of fact it was a bit ironical to me last fall to hear some of the spokesmen for the Republican Party talking about the so-called planned deficits of the previous administration. The truth of the matter is that this is the first time we have had planned deficits. We had deficits before, but they were not planned. Let me read a few excerpts of testimony before our committee over a period of years.

Mr. McDONOUGH. Mr. Chairman, will the gentleman yield?

Mr. BOGGS. I yield to the gentleman from California.

Mr. McDONOUGH. I think the gentleman ought to explain that his reference to planned deficits is a planned determination to reduce deficits—which we have been trying to do—as compared with a voluntary deficit spending program, that we have referred to frequently, under the previous Democratic administration. There is a difference, and I think the gentleman will admit there is a difference between involuntary deficit spending and voluntary deficit spending. We believe there has been a lot of voluntary deficit spending in previous administrations, and we are trying to plan to reduce the deficit spending. That is the reference the gentleman just made to what we are attempting to do.

Mr. BOGGS. The gentleman makes a fine statement. Unfortunately it does not stand up.

Mr. McDONOUGH. I do not agree with the gentleman.

Mr. BOGGS. The gentleman is certainly incorrect. Let me give the gentleman a few examples. In the fiscal year 1951, for instance, the spending for nondefense items was $18.5 billion.

In 1952 it was $19.4 billion.

In 1954 it was $19.9 billion.

In 1955, that is this fiscal year, it is estimated at $21.8 billion.

These are your nondefense items. You have done some trimming on defense items. Maybe they have been wise and maybe they have not, but the point I am making is that in each year in the previous administration the representatives of that administration came in here and asked for the taxes to finance it. I will read it to you if you do not remember it. I will read you from Secretary Snyder's statement before the Ways and Means Committee in 1947:

The first requisite of such a tax system is that it should produce adequate revenue to balance the budget and to provide substantial payment on the public debt—

He asked for more than a balanced budget. He asked for payment on the public debt as well—

in order to sustain the confidence of the public in the integrity of the Government's obligations and its financial strength.

In 1950:

As the President stated in his tax message on January 23, 1950, our general objective should be a tax system which will yield sufficient revenue in times of high employment, production, and national income to meet the necessary expenditures of the Government and leave some surplus for debt reduction.

Mr. McDONOUGH. Mr. Chairman, will the gentleman yield?

Mr. BOGGS. I yield to the gentleman from California.

Mr. McDONOUGH. Insofar as deficit spending is concerned, there is not any question but that the deficit spending was much greater under previous administrations.

Mr. BOGGS. That is not necessarily true. As a matter of fact, in 2 or 3 years the budget was balanced and we had a surplus.

Mr. McDONOUGH. If you would follow your own Secretary of the Treasury's advice now you would not bring in a bill to reduce revenue $2,300,000,000 when at the same time the gentleman just read a statement of his Secretary who said that the first obligation is to reduce deficit spending and tax revenues.

Mr. BOGGS. I thank the gentleman for his contribution, but I would say to the gentleman this administration has embraced deficit financing and, in addition to that, this administration has said it will reduce taxes next year. This simply anticipates what they have promised and sets up a fair method of reducing taxes.

Let us talk about some of the other positions that have been taken right here in this body. I recall the debate in the 80th Congress on a tax measure advanced by the gentleman's party and I quote from our distinguished former Speaker:

Oppressive taxes have toppled many a government to destruction, and many a monarch from his throne. I urge you to remember three vital facts: First. The tendency of all governments is to continue endless expansion of spending to the point of ruin.

Tax cuts do not necessarily mean corresponding losses to the Treasury. The history of this Nation abounds in evidence that lower tax rates stimulate commerce and trade, which in turn yield greater Federal revenues.

In the other body the distinguished chairman of the Senate Finance Committee had this to say:

In the 1920's, after we had come out of World War I and were in conditions that are comparable to those of today, only on a smaller scale, we passed tax-reduction bills, we increased exemptions, we reduced income and corporation taxes. We passed those bills in 1921, 1924, 1926, and 1928, and we did not lose revenue, we gained revenue, through the operation, I suggest, of a simple axiom, that when the economy is loaded down with oppressive rates of taxation, and they are released, there is bound to be a stimulation of business.

Mr. President, I repeat, the likelihood is that this reduction will not destroy surpluses, that it will enhance surpluses, because it will enhance the revenues.

Well, now, the distinguished gentleman from New York, my good friend, the former chairman of my committee, advanced the same argument at the same time when we were considering that bill in the 80th Congress. So, it seems to me that what we are confronted with here today is not an administration which has dedicated itself to balancing the budget. If that had been the case, the administration certainly would not have sponsored H. R. 8300 last year in the form

which they approved. That bill increased the estimated deficit last year by approximately $1.5 billion, making the deficit for this year about $4.5 billion. Now, if that was not inflationary, if that did not do all of the things which my distinguished friends say today our $20 proposal will do, then how can it be logically argued that a $20 across-the-board exemption or tax credit which increases the deficit considerably less than H. R. 8300 increased it last year could possibly have all of these dire effects?

Mr. EVINS. Mr. Chairman, will the gentleman yield?

Mr. BOGGS. I yield to the gentleman from Tennessee.

Mr. EVINS. The gentleman spoke earlier of the former chairman of the Committee on Finance. It might also be pointed out that he was chairman of the Republican policy committee in the other body and he advocated in the last session of the Congress the identical proposition which the Democrats are proposing now.

Mr. BOGGS. I thank the gentleman. Although the proposition was not exactly identical, the proposal which he offered, if I recall correctly, was a $20 tax credit to the taxpayers. Ours is across the board and much more beneficial to the average taxpayer with a family to support.

Now take a look at the economic situation. If all of the arguments advanced in the 80th Congress about the necessity of stimulating the economy, increasing employment, putting more money in circulation, were valid, certainly they are more valid today.

Mr. YOUNGER. Mr. Chairman, will the gentleman yield?

Mr. BOGGS. I yield to the gentleman from California.

Mr. YOUNGER. I am somewhat troubled by the gentleman's argument. If they are valid, why are they not valid for the income for 1955?

Mr. BOGGS. They might very well be.

Mr. YOUNGER. That is the point. Why was the bill made for the income for 1956? If all of those dire things that the gentleman pointed out are true, why was not the bill designed to give relief to the income for 1955?

Mr. BOGGS. I will answer the gentleman by saying that it was my hope that such relief would have been given in 1955. That was one reason that I sponsored the $100 exemption in the committee last year.

Mr. MILLS. Mr. Chairman, will the gentleman yield?

Mr. BOGGS. I yield to the gentleman from Arkansas.

Mr. MILLS. Is it not true that the committee was attempting to act within the limits of the hope expressed by the President for relief in 1956?

Mr. BOGGS. Exactly.

Mr. McCORMACK. Mr. Chairman, will the gentleman yield?

Mr. BOGGS. I yield to the gentleman from Massachusetts.

Mr. McCORMACK. And to be sure that the injustice of last year was rectified by justice for the lower income groups.

Mr. BOGGS. I thank the gentleman.

Mr. YOUNGER. Mr. Chairman, if the gentleman will yield further, if it is an injustice, would it not be better to relieve that injustice now than to wait a year?

Mr. BOGGS. I answered the gentleman's question. If the gentleman wants to engage in a colloquy with the gentleman from Massachusetts, I suggest he get his own time.

That leads me to a discussion of only one other thing. There have been a lot of words thrown around here. I have heard the word "irresponsible" used. You know, it is a bit interesting to me to be responsible one week when a majority of the Members on our side are passing the President's trade agreement program with only 66 Members on the other side voting with the President, despite all the campaign slogans about how Ike needs so and so and so and so, and then come back a few days later and be irresponsible because we are advocating a tax reduction that the President of the United States says he will do next year except we advocate doing it in a little different way.

I would suggest that it is the function of the Committee on Ways and Means, the constitutional function of the Committee on Ways and Means, to institute tax legislation. And despite all of these convenient epitaphs, the Chief Executive of our country does not look too good when in one breath he accuses us of irresponsibility and in the next breath says, "I will do it myself next year."

Let us look at the economic conditions of the country. I hear all these statements about our great advances. The truth of the matter is that our net national product was $8 billion less in 1954 than it was in 1953. You say that is not very much. But when you consider that our labor force as a whole adds 800,000 young men and women every year, when you realize the advance of technology in contributing to unemployment, then that figure becomes a very large figure indeed.

The hope expressed by the President that he would balance the budget by increasing revenues derived by an expanding economy becomes more of an idle dream than a fruitful hope, because if you continue losing $8 billion a year, instead of ending up with a total gross national product of $500 billion as the President estimated, for I believe, 1965, you could very easily end up with much less than you have now.

Mr. McCARTHY. Mr. Chairman, will the gentleman yield?

Mr. BOGGS. I yield to the gentleman from Minnesota.

Mr. McCARTHY. Would it not be consistent with the policy of progressive moderation that this should be the third best year?

Mr. BOGGS. In any event, I think from every point of view, from the point of view of existing economic conditions in our country, from the point of view of justice and fairness, from the point of view of the President's known commitment, this proposal is a fair one and should be adopted by the Members of this body.

Mr. REED of New York. Mr. Chairman, I yield 10 minutes to the distinguished gentleman from Pennsylvania [Mr. SCOTT].

Mr. SCOTT. Mr. Chairman, I should like to congratulate the gentlemen on the other side of the aisle for their continuing and loyal support of the President, in keeping with their numerous promises on this floor and otherwise as exemplified by their desire to increase the national deficit, to increase the national debt, to add to the inflationary pressures in the country, and to give everybody 20 bucks and a mule.

In my city, which is controlled by a Democratic city hall gang, the top price paid for a vote, according to current report, is never more than $1. I am wondering what you gentlemen plan to do with the other $19. Perhaps you are figuring it is cheaper to promise the voter $20 than to pay him $1. This is a sort of government by gimmick rather than responsible government. It is a government by a wrecking crew of "Wreckercrats" rather than members of a responsible political organization. It represents a reversal of every considered statement made by your fiscal and political leaders. Therefore, I wish to congratulate you on the continuing, consistent inconsistency of your party in the hope of befuddling the voters and confusing the electorate, all of which I sincerely believe you will completely fail to do.

Before this $20 income-tax proposal goes any further, I think we ought to consider carefully the unusual conditions under which it was born. The last speaker mentioned the constitutional and legislative functions of the great Committee on Ways and Means, yet, as I understand it, those functions were flouted in this very bill by reason of secret sessions and midnight work and failure to consult the minority and failure to hold hearings, and reliance entirely upon political expediency rather than upon fiscal commonsense. It was not the product of any normal bipartisan procedure.

Mr. COOPER. Mr. Chairman, will the gentleman yield?

Mr. SCOTT. I yield to the gentleman from Tennessee.

Mr. COOPER. May I point out to the gentleman that I submitted the question to the full committee and the full committee agreed not to hold public hearings.

Mr. CURTIS of Missouri. Mr. Chairman, will the gentleman yield?

Mr. SCOTT. I would be glad to yield to my colleague from Missouri, because again I think I see the gimmick.

Mr. CURTIS of Missouri. I do not think it was ever submitted. We had a notice for an executive session Monday morning. As to what the gentleman was saying, it was agreed there would be no hearings on H. R. 4200, which was the mere extension of the excise tax and the corporate increase. But as to this Mills amendment, there was never any agreement on that, there was never any full committee decision because it was never presented to us. You all put that through Monday morning, the first day we met and the only day we met.

Mr. COOPER. It was agreed in the full committee on Thursday when we reported the trade-agreements bill that we would not hold public hearings on the extension of the corporate tax and the excise tax.

Mr. CURTIS of Missouri. That is exactly right, but where is the Mills amendment in there? Explain why nothing was said about the Mills amendment on Thursday, when we reached that agreement, and also explain why with your agreements with others around here you proceeded to allow an amendment like that even to be considered.

Mr. REED of New York. Mr. Chairman, will the gentleman yield?

Mr. SCOTT. I yield.

Mr. REED of New York. I just want to say that it was just by accident that I learned of this change and this secret meeting in which they were considering the Mills amendment. We had nothing to do with it and knew nothing about it. That is not orderly legislation. That never occurred under our administration.

Mr. SCOTT. I thank the gentleman. I think in my own committee experience it has never occurred with me.

I think I can understand what happened. I have been reading in the newspapers and magazines a number of statements which say that the Democratic Party leadership has been floundering, that they have been unable to find any issue with which to undermine the President, to attract public attention, to say nothing of the possibility of some electoral greed being inspired. Continually being needled by the press and by the magazines, it is natural that they would come up with something. It is my conclusion, which I think is supported by evidence, that this is the gimmick they thought of in the hope that they could buy the votes of the American people at 20 bucks a head.

I think that does two things. First, you are not going to buy them at $20 a head, and second, I do not think you are going to fool them, because the only people you are going to get by this kind of tactics are the people you have already, because anybody who would buy this kind of a thing has already been buying the kind of stuff you have been laying out for many, many years.

I hear people say, "Tax reduction." I do not recall any previous tax reductions which were sponsored by Democrats. You wait until the Republican President comes along and stabilizes the currency and amasses some kind of competence for Uncle Sam, and then you say, "We would like to have the privilege of giving it away but we don't dare give it away now. We would rather wait until you have amassed a little more competence and gotten closer to an election year. Then we will give it away."

This announcement which was made on February 19 of strategy by the distinguished leader was not made by a committee charged with the responsibility for protecting the welfare of all of the people of the United States, but by a secret meeting of the Democratic Party leaders, as we have heard, and all Democrat members of the Committee on Ways and Means. The exclusion from this meeting of all except the chosen few Democrat Party leaders seems to indicate this is a matter of Democratic Party welfare in which the interests of the people must come second. Taxes have been so high for so long that no one can blame the taxpayers for hoping for some additional relief, but in view of the history of how taxes got so high and the plans of the Democrats to increase Government expenditures, this proposal to increase the Federal debt to provide a $20 handout seems shabby indeed. It looks as if we are being asked to mortgage the future of our children and their children as taxpayers to buy some votes for the Democratic Party. It would appear that a few irresponsible leaders are determined to wreck the program of the Eisenhower administration even if it means wrecking the economy of the Nation at the same time. I do not think, in spite of the burdens on the taxpayer, there is anything wrong with his memory. The press, for example, on the 4th of January 1955, in the New York Herald Tribune contained a headline story entitled "RAYBUURN Against Tax Cut—Backs Eisenhower Stand." In that story, Mr. RAYBURN was quoted as saying:

> I do not think the Government can do without the money.

In the same article, Mr. RAYBURN is quoted as opposing an increase in the $600 income-tax exemption, "unless something is put in its place."

What has happened to these various high resolves? Has our distinguished Speaker found some new source of revenue or has he yielded to the dictates of the Democratic national committee leadership, which seeks some popular issue at any cost. The taxpayers will remember, too, that in less than 8 years, President Truman, a Democrat, collected more taxes than all other Presidents in all of American history. In fact, more than 3 times the amount collected in 144 years by all of the Presidents prior to President Roosevelt and more than double the amount collected under President Roosevelt. You can remember also and realize this concern of the Democratic Party for lower income taxes is not reflected in any past behavior on their part. Under the Republican administration from 1925 to 1931, income-tax exemptions were $1,500 for a single taxpayer and $3,500 for a married man, and from 1932 to 1939 the Democrats cut those exemptions to $1,000 for a single man and $2,500 for a married man. In 1940, they whittled the taxpayers' exemption away still further leaving the exemptions at $800 for a single man and $1,500 for a married man or $2,000 exemption less than he had enjoyed under the Republican administration.

I might interject here that if the taxpayer had even half of the exemptions which were taken away from him by previous Democratic administrations, the amount which you are talking about saving here to him today would be nothing more than peanuts and more people would be taken off the tax rolls by far than you propose to take off by this bill. So you are the people who put these people on the tax rolls. Remember that. You are the people who kept him on the tax rolls. Now you come in and propose this government by gimmick. In 1941 the Democratic spending continued. The single taxpayer was further reduced to $750 and other exemptions took place as I said, and as I will have an opportunity to state at the end of these remarks.

It took the Republican 80th Congress to stop the decline and to raise personal exemptions to $600 and $1,200. This is the only party which has given the people any increase in exemptions. It is the only party that has given the people any tax reduction and the only party which has introduced stability in the currency of this United States. There is every indication that this sudden, grandstand gesture came as a surprise to the rank and file members of the Democratic Party, because in addition to the Speaker's statement in January, there are recorded on February 12, 1955, statements by key Democrat members of the Committee on Ways and Means to the effect that the Formosa crisis had killed off prospects for an early effort to cut income taxes.

The gentleman from Arkansas [Mr. MILLS], a senior Democrat on the committee, and the author of this motion, said he favored a "wait and see" policy.

> As late as last month I might have been willing to go along with an early move to cut taxes, effective next July 1, 1955, or January 1, 1956, but I would want to be cautious now—

He said.

What has caused the gentleman from Arkansas [Mr. MILLS] to throw caution to the winds and to now adopt a policy which he thought he ought to be cautious about in January? Could it be the insistence of the Democratic National Commitee, people on the Democratic side, to the effect, "Give us an issue. Give us something to talk about. Give us a chance to buy the voters. We cannot reason with them. We do not have anything to say to them which will persuade them to come over to our side, so let us go back to the old city-hall-gang tactics, if you cannot win them by persuasion, buy them. Shell out the cash." The cheapest way to do that is to shell out Uncle Sam's cash. You do not have to make any reports under the election laws or the Corrupt Practices Act.

Only a week before this proposal was announced, the gentleman from Tennessee, who is chairman of the committee, and whom we all love, said he had not given any thought to a tax cut, and yet he has come up with this proposal. I wish that perhaps he had given us something more reasonable with which to contend.

On the 19th of February, 1 week later, the Speaker announced that Democratic leaders had conferred and decided to push for this $20 tax handout, because "It would give economy a boost." This, in spite of the fact that the country is enjoying its greatest peacetime economy in history.

There are several phases of this Democratic proposal which stamp it as the political phony which it is. This is as phony as a $19 bill. I took off 10 percent. That was the Republican 10 percent which the gentleman from New York will recognize, which we gave the taxpayers last year. This is as phony as a $19 bill. First, it proposes to reduce the tax revenues of the Nation by $2.3 billion without providing any new sources of revenue. In the meantime the Democrats are pushing for numerous increases in Government expenditures.

Second, there seems to be little reason to rush the tax cut through at this time, 10 months before it would take effect, when no one knows what conditions may confront us in the next few months.

If the need for increased defense expenditures is as great as the Democrats claim, they can hardly be sincere in asking for this cut of over $2 billion.

Third, the proposed $20 handout would come at a time when wage earners have already made substantial gains.

Fourth, the sponsors of the proposal seem to agree that the measure could not stand on its own merits, and they have therefore resorted to trickery to assure its passage. They seem to agree that the measure could not stand on its own merits, and they added it to the corporate tax rate extension in order to be sure to get it through by device rather than upon its merits.

Now, Mr. Chairman, if this is a good measure, as someone has just said, why not make it effective now? If it is not a good measure, why make it effective at all? If it is going to be a good measure 10 years from now, who owns the crystal ball that will tell us——

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. REED of New York. Mr. Chairman, I yield the gentleman 5 additional minutes.

Mr. SCOTT. If this is going to be a good measure who owns the particular crystal ball that will tell us the state of the appropriations of this Government 10 years from now?

Mr. ROGERS of Colorado. Mr. Chairman, will the gentleman yield?

Mr. SCOTT. In just a moment.

I am going to ask the gentleman over there to give us some assurances which we would welcome.

The requests I am asking are these: Are you gentlemen prepared to vote against every increase in appropriations?

Are you prepared to vote to keep the cost of Government down?

Are you prepared to vote against all these boondoggling measures which will provide pork-barrel handouts in your own districts?

What are you going to do about TVA?

What are you going to do about all of the other gravy trains that you seek to ride on?

If you will tighten your belt and keep the cost of Government down and then come back to the people and say you would like to have a tax cut you will have earned it.

Mr. ROGERS of Colorado. Mr. Chairman, will the gentleman yield?

Mr. SCOTT. I yield to the gentleman from Colorado.

Mr. ROGERS of Colorado. Was not the gentleman repeating the argument used about the tax cut a year ago, that if a tax revision was made it would be inflation and create a desire in industries to continue in that development? Was not that one of the reasons given for the tax bill a year ago?

Mr. SCOTT. No; that was certainly not one of the reasons I recognized.

Mr. ROGERS of Colorado. That was the reason for the tax cut a year ago.

Mr. SCOTT. Let me give you the facts. There was a different basis. At that time there was a declining economy. The cut was made when the gross national product was declining; this bill is up at a time when the gross national product is increasing.

That tax cut was made after we knew what the appropriations were going to be for the most part; this is made in advance.

Mr. ROGERS of Colorado. Does not the gentleman agree that a $20 tax cut to each taxpayer or his dependents, given to the great masses of people, they in turn would spend the money as those people who enjoyed tax reduction a year ago, who were expected to invest it in industry?

Mr. SCOTT. I will answer the gentleman's question by asking him a question. Is the gentleman saying to me that this $20 handout would improve the economy of the country?

Mr. ROGERS of Colorado. Yes.

Mr. SCOTT. Yes; all right.

Mr. ROGERS of Colorado. The gentleman also agrees it will improve the economy of the country and put more money into the hands of people who are ready and willing to spend it.

Mr. SCOTT. Will the gentleman then answer me this: If $20 given to the American taxpayer is going to improve the economy of the country, how was the figure of $20 arrived at? If $20 is good why would not $40 be better, or $100, of $1,000? I would like for the gentleman to tell me where he got the $20 figure from.

Mr. ROGERS of Colorado. For myself it was the result of a little reason and logic. If you have a bill in to raise the exemption up to $1,000 it would have the same effect. I think the average of this $20 would just about offset an increase in the personal exemption to about $750 on each taxpayer. That is my theory of it.

Mr. SCOTT. Will the gentleman just tell me whether he reached out and picked it out of thin air or from the Democratic National Committee?

Mr. ROGERS of Colorado. The gentleman has had the figures recited as to the amount.

Mr. SCOTT. Will the gentleman tell me where they came from?

Mr. ROGERS of Colorado. As far as I am concerned it came from a little reason and logic as to a reduction to the individuals who were entitled to it who did not get it 2 years ago when taxes were reduced.

Mr. SCOTT. But the gentleman's reason and logic never entered into the $20 figure.

Mr. ROGERS of Colorado. Absolutely, because we knew it would benefit the great mass of the people.

Mr. SCOTT. Then the gentleman accepts responsibility for having suggested the figure of $20 and recommended it?

Mr. ROGERS of Colorado. I do not think it is necessary for anybody to accept responsibility for a little logic on the application of a great tax reduction or at least a fair tax reduction to all the people when they have not been granted it under this administration. As you know when we passed the tax bill——

Mr. SCOTT. I cannot yield to the gentleman for a speech. I will be glad to yield, however, for a question.

Mr. ROGERS of Colorado. But the gentleman asked me a question which I would like to answer.

Mr. SCOTT. I yield briefly for that purpose.

Mr. ROGERS of Colorado. My response is simply this, that when we had the revision up a year ago there was an attempt to make those tax burdens equal and that any relief granted be applied equally; and it was not done to the great masses of the people.

Mr. SCOTT. Did the gentleman vote for that tax reduction bill?

Mr. ROGERS of Colorado. I did.

Mr. SCOTT. I want to thank the gentleman.

Now I must yield to the gentleman from Texas.

Mr. BURLESON. I was interested in what the gentleman said about the pork-barrel expenditures and so forth. I fully agree with the gentleman.

Mr. SCOTT. I can fully imagine what is coming after that.

Mr. BURLESON. Pork-barrel expenditures are never justified; but in considering tax measures we must not lose sight of the fact that we have a tremendous highway program before us, something that is almost beyond the imagination to grasp; we have a health program or scheme here, and a lot of other things underway. They must be paid for.

Mr. SCOTT. Are you going to take that money from the veterans or from the mass of the taxpayers through inflationary prices? From whom are they going to take that money?

Mr. BURLESON. The point is we are not going to take it away from anybody.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. COOPER. Mr. Chairman, I yield 10 minutes to the gentleman from Arkansas [Mr. MILLS].

Mr. MILLS. Mr. Chairman, the Committee on Ways and Means, in its action on H. R. 4259 has demonstrated the type of fiscal planning required to insure the stable growth of our economy. By adding an individual income-tax credit of $20 per exemption to the bill, which extends the present corporate and excise tax rates for 1 year, the committee has shown the wisdom and foresight which are essential to constructive fiscal policy.

Although the President's economic report assures us that the present recovery

from last year's recession will result in the attainment of full employment by the end of the year, many of the economic experts appearing before the Joint Committee on the Economic Report during its recent hearings expressed concern that the present recovery rate might not be maintained without fiscal and monetary action by the Federal Government. The $20 per exemption tax credit, which will save taxpayers about $800 million during the fiscal year 1956, is scheduled to take effect at the beginning of 1956, at a time when the economy may well be in need of a shot in the arm to bolster a lagging rise.

Moreover, this type of tax cut, unlike the selective or discriminatory reductions of last year—over 75 percent of which went to upper income individuals and to corporations in the first year and much greater later on—is designed to provide a broadly distributed increase in purchasing power. This increase in purchasing power is necessary if the economy is to avoid developing symptoms of excess capacity which would bring a halt to recovery and to continued growth in our economic potential.

The tax savings effected by this $20 tax credit do not pose a threat of renewed inflation. No one seriously suggests that at the end of this year we shall be operating so close to our economic capacity that we could not accommodate a $2 billion increase in purchasing power without the danger of significant price rises.

Nor need we be unduly concerned about the effect of this $20 tax credit on the Government's budget. The President himself stated in his economic report that the expansion of the economy, in itself, should make possible another step in tax reduction next year, when the $20 credit is proposed to take effect. Moreover, the prospects of a budgetary deficit did not deter the administration last year on tax reductions which totaled $7.4 billion. Apparently the deficit prospect did not evoke the specter of inflation when the tax reductions were for the benefit of corporations and upper-bracket individuals. It is only when a tax reduction which will benefit all individuals across the board is proposed that the Treasury warns us that prices will go through the ceiling, even though the tax reduction is only a third as large as that which the administration unduly boasts of having provided last year.

Mr. Chairman, the gentleman from Pennsylvania [Mr. SCOTT] has expressed the idea that seems to motivate the thinking of so many people in and out of the Congress. First, he suggested that in considering fiscal matters we should add up what we must spend, then after adding up what we need to spend we should determine the level at which we tax the American people. The gentleman asked, "From whom do you take a tax reduction? Do you take it from veterans? Do you take it from education? Do you take it from other sources?"

I am sure the gentleman will remember that, in the first place, we take money from all of the people to constitute the total revenues of the Government. The $20 tax credit is just this simple: It means that after the first of the year 1956 we will just take less from all the people for all the expenditures of the Government. The Congress after seeing how much should be spent in the fiscal year 1956 may act accordingly on those expenditures.

Mr. SCOTT. Mr. Chairman, will the gentleman yield?

Mr. MILLS. I yield to the gentleman from Pennsylvania.

Mr. SCOTT. I gather that what the gentleman is really saying is that instead of advocating economy he would take it from the deficit.

Mr. MILLS. No. The gentleman from Pennsylvania understands quite well what I am talking about. I think the gentleman may be guilty of some New Deal thinking about finances. I am surprised at the gentleman, in view of the fact that he has occupied such exalted positions within the ranks of the Republican Party. The gentleman indicates that the people downtown in the executive branch have to tell us how much money we have to make available for their expenditures and then we have to provide the revenues on the basis of what they say they need. That is exactly what he criticized us for in previous administrations.

I am somewhat surprised to find my Republican brethren falling into the same situation about which they crticized us Democrats for 20 years. The people downtown told us, you said, what had to be appropriated for all this boondoggling as you called it, and all this other business, then we had to provide the revenue. Now the gentleman from Pennsylvania, the former chairman of the Republican National Committee, bases his opposition to giving relief to taxpayers generally throughout the United States on the argument that somebody downtown has asked for the expenditure of certain sums of money and that we cannot reduce taxes and give them the amount of money they want.

Mr. SCOTT. Will the gentleman yield for a correction?

Mr. MILLS. I yield to the gentleman.

Mr. SCOTT. I said that I opposed tax relief under certain circumstances.

Mr. MILLS. The gentleman is against this measure before us today, is he not?

Mr. SCOTT. I am against what is a phony bill by trickery to buy votes. I am for tax relief based on sound fiscal policy.

Mr. MILLS. The gentleman opposes it, he says, because it is phony, but he would be for it if it provided a straight across-the-board 10-percent reduction?

Mr. SCOTT. I would not be in favor of any tax reduction at this time unless we knew from the Appropriations Committee and from the subcommittees what our fiscal situation is going to be.

Mr. MILLS. Why not tell the Appropriations Committee and the other committees handling appropriations how much revenue we may expect to have in 1956?

Now, on that point, I like the philosophy of my distinguished friend, the former chairman of the Committee on Ways and Means, the gentleman from New York [Mr. REED]. I like his philosophy a little better than this philosophy you are springing on us here today that you have to determine revenues after you find out what you are going to appropriate. The gentleman from New York has called attention time and time again to the fact that in the twenties the Republican Party succeeded in reducing taxes year after year and that the revenues to the Government under those reduced rates equaled the revenues of the previous year under higher rates, and they kept increasing, and you brought about prosperity that you bragged about for a generation. Now, if it worked then, why does it not work now? If it worked in 1954, why does it not work now? Oh, listen. I say to the gentleman from Pennsylvania [Mr. SCOTT], former chairman of the Republican National Committee, do not try to kid us. Do not try to kid us, in the language of the Secretary of the Treasury appearing before our committee, and this is his language. He said, "Don't kid us." Do not talk about your sanctity and your great love for a balanced budget. Do not talk to us about something phony.

Mr. SCOTT. Mr. Chairman, will the gentleman yield?

Mr. MILLS. I will yield when I complete unloading on you.

Now, do not talk to us about those things. Your party is no more aware, no more conscious, no more concerned, than you would have us believe some other party about the desirability of a balanced budget. The gentleman knows that last year his party did not stop a tax reduction because of an unbalanced budget. The gentleman knows that the tax bill last year contributed $1.4 billion to this current fiscal deficit of $4.5 billion, and no one would tell us how much the loss would be in future years. It is billions and billions. Now you attempt to talk to us about something being irresponsible. The gentleman knows that in the fiscal year 1956 the gentleman's own party has contributed through the tax reduction in H. R. 8300 to well over half of the projected $2.4 billion deficit in fiscal year 1956. Yes, the President says we have scaled new heights of irresponsibility. Let him say what he wants to, but neither he nor you nor anyone else has said that this $20 tax credit does not take care of those people in the low-income-tax brackets, the very people we are attempting to give relief to and the ones you hardly nodded to. The bill of the gentleman's party last year, which probably came from the Republican National Committee—he says this came from ours—had in it the thinking, I am sure, of Republican equity in tax reduction, because it provides, we now have been told, 75 percent of its relief for corporations and individual taxpayers with incomes in excess of $5,000, I think it is, and only 25 percent of all the relief involved, went to taxpayers with incomes of less than that figure. All the gentleman has to do is to confer with the staff to get the figures. You would not even give us information on relief by income groups. Anyone can check your report and see that. The gentleman can get the information, if he wants it. Just a small fraction of the relief in H. R. 8300 of last year goes to people with $5,000 or less of income. Our $20 tax

credit gives 66 percent of the total relief to those with adjusted gross incomes of $5,000 or less.

I now yield to the gentleman from Pennsylvania.

Mr. SCOTT. I would like to correct the gentleman by pointing out——

Mr. MILLS. The gentleman likes to be corrected.

Mr. SCOTT. I would like to point out, first of all, the gentleman has not mentioned that it was the Republican Party or the administration that made a cut in spending of $11 billion last year.

Mr. MILLS. Seven billion, four hundred million, the gentleman means.

Mr. SCOTT. No. Eleven billion dollars.

Mr. MILLS. Has it gotten up to that figure now?

Mr. SCOTT. Let the gentleman try to be as accurate as I try to be.

Mr. MILLS. We were talking about tax relief, were we not? At least I was.

Mr. SCOTT. Cut in spending. I knew what I was talking about down in the well. Now, the gentleman made a reference about kidding the American public.

Mr. MILLS. No. I was referring to the gentleman trying to kid me.

Mr. SCOTT. Well, all right. Take it anyway the gentleman wants. Let me ask him this question. Has he ever heard of any more expensive way of kidding the American public than to try to grab $2 billion out of Uncle Sam's Treasury right now to give back to the voters in order to buy their votes?

Mr. MILLS. Yes, sir, on one other occasion less than a year ago I saw an example that far outweighs this present instance in kidding the American people. You tried to tell the American people in 1954 that you were giving them tax relief. The people woke up to the fact that the gentleman's party had not given them tax relief, had not given tax relief to anybody in the lower-income tax brackets, or at most only to a small degree and that most of the tax relief had gone to the people with higher incomes. Now I do not criticize all of that. I criticize the imbalance that existed; the fact that the relief was not balanced and evenly distributed to all taxpayers. I criticize the fact that the Republican Party, as a party, saw fit at a time when the budget was unbalanced, when they could not give relief to the rank and file of the American people, they gave relief to the coupon clippers.

The gentleman knows that every time since World War II the Republican Party has been in charge of the Congress, it has voted a tax-reduction bill and the people have thought so little of the tax reduction provided by that party that they have run them out of office each time.

The whole trouble with the present situation from the Republican standpoint, I will say to the gentleman from Pennsylvania [Mr. SCOTT], is this: Somebody may have been outmaneuvered. That is the reason the gentleman screamed so loudly. Somebody may have been outmaneuvered and the gentleman criticises this tax relief not on the basis of the equity involved nor on the basis that it is not fair for all taxpayers to have a tax reduction, but because somebody in the gentleman's party did not think of it soon enough.

Mr. SCOTT. Mr. Chairman, I thank the gentleman for the many courtesies and compliments he has showered on me. I must have hurt him and his side.

Mr. MILLS. I have talked to the gentleman because he is a former chairman of the Republican National Committee and because the gentleman's speech sounded to me as though he might have had some collaboration in high places in the preparation of it.

Mr. CURTIS of Missouri. Mr. Chairman, will the gentleman yield?

Mr. MILLS. I yield to the gentleman.

Mr. CURTIS of Missouri. Now I want to get back to these figures.

Mr. MILLS. I might say to the gentleman that a table on page 1253 of the Senate hearings on H. R. 8300 shows that only 31 percent of the relief involved in the 10-percent individual income-tax reduction that became effective January 1, 1954, went to those with incomes under $5,000. This is very different than what I heard earlier today. But the figures I gave on H. R. 8300 are ones I have seen in various breakdowns on that tax relief.

Mr. CURTIS of Missouri. The gentleman is talking about the 10-percent tax cut that was had?

Mr. MILLS. That is correct. Earlier, I was talking about H. R. 8300. I think that with respect to H. R. 8300, the Internal Revenue Code of 1954, that the low-income groups received an even smaller percentage of the total benefits than under the 10-percent individual tax cut. I also point out to the gentleman that in future years the tax benefits realized by low-income groups from H. R. 8300 will be increasingly smaller percentages. I believe I was right on my figures. They can be checked.

Mr. CURTIS of Missouri. I believe the gentleman was not. That is why it is so important to get the figures right.

Mr. MILLS. Even if it applied to that 10-percent reduction, does the gentleman think, with the big heart that he has, that it is all right in the sense of fiscal fair play and of balancing budgets, to give relief in that greater percentage to those getting above $5,000 and leave the low-income families with a paltry handout? Does he not think that something ought to be done by the Congress to equalize the relief that has already been given?

Mr. CURTIS of Missouri. Does the gentleman want me to answer that?

Mr. MILLS. No, I did not ask the gentleman the question.

Mr. CURTIS of Missouri. What did the gentleman do?

Mr. MILLS. I am sure the gentleman would plead guilty to the charge. Does not the gentleman realize that the acting minority leader over there has already called attention to the fact that we ought to go back to H. R. 8300, have a look at it and see if we cannot get some revenue out of it? Does not the gentleman know that our committee will do that?

Do not be misled about this situation. There is not a thing in the world involved here of a controversial nature except on the gentleman's side, the people downtown resent the fact that a Democratic Congress could come up with some idea about reducing taxes for individuals and maybe in the process prevent them from having another bill such as they had in the 83d Congress for the benefit of the high-income taxpayers. Does not the gentleman think that that might be the basis for the concern that exists here today?

I say to my good friend from Texas [Mr. DIES] that the passage of this bill and the addition of $815 million to the prospective deficit for 1956, and the effect of it, can be completely offset by this Congress before it acts upon all of these appropriation bills. It can be completely offset by this committee and this Congress as we proceed with further studies of H. R. 8300; and the gentleman knows it.

No one should vote against this proposal on the basis of its further unbalancing the budget. Give us a chance to do something about that subsequently, but give the people the tax relief that they need so badly.

Mr. REED of New York. Mr. Chairman, I yield such time as he may desire to the gentleman from New Jersey [Mr. WOLVERTON].

Mr. WOLVERTON. Mr. Chairman, it is a strange combination of ideas that we have presented to us in the Revenue Act of 1955—H. R. 4259—the bill now under consideration.

In the first place, we have a bill prepared by the administration for the purpose of continuing certain corporation and excise taxes. The reason advanced is readily understandable, namely, the Government needs the revenue from such to help meet the running expenses of Government. Even with the revenue that comes from this source, plus income taxes, and from all other sources that produce Government revenue, we do not have sufficient to balance the budget. We continue to run a deficit each year, although we can be thankful the deficit is decreasing and each year we are coming nearer to making both ends meet. All of this is agreed to by the Democratic majority on the Ways and Means Committee that reported this portion of the bill with its approval. If it did not so approve, then, it would not have reported the bill favorably to the House.

Now, we come to the second part of the bill. It proposes eventually to reduce income-tax revenue by approximately the same amount of revenue as the first part of the bill raises. This is done by allowing each taxpayer, large and small, rich and poor, a reduction of $20 in income taxes for himself and each dependent he has. Thus, notwithstanding the acknowledgment in the first portion of the bill that a necessity exists to maintain our level of revenue collections, yet, in the second part a reduction is provided for. What kind of reasoning justifies such a paradox? This is a case where one hand takes away what the other hand gives. It is as fine a case of blowing hot and cold at the same time that anyone could conceive. But, it leaves no doubt that it is purely a case of political chicanery. The fact that the effect is to be withheld until next year only leads to a realization of the insincerity that is

back of the whole scheme. A more honest way would have been to wait until next year and then determine whether our financial standing as a nation would permit it to be done. This latter was the plan that has been advocated by the Republican administration. Evidently the Democratic leaders have sought to take political advantage of it by saying we will enact the reduction now, but even they leave it ineffective until next year. This plan of action may fool the unthinking, but the wise and thoughtful person will say that the sensible thing to do is to wait and see the condition of the National Treasury next year. Then, it will be known whether it is wise to do so, and how much of a reduction can be safely made.

The willingness of the Democratic leadership in the House to step out in the manner they have is a fine compliment to the present Eisenhower administration. In taking the action they have leaves no doubt that these Democratic leaders realize the Eisenhower administration is intent on cutting the expenses of Government to an extent that will probably permit such a reduction to be made a year hence. If they believe otherwise, then there would be absolutely no justification for providing for a reduction a year from now.

To reduce taxes is the aim of the present administration. However, it realizes to do this, it will be necessary to reduce Government expenses beyond what has already been done. Already such expenses have been reduced by many billions of dollars. Each year the administration is making additional reductions and bringing the day nearer when there will be a balanced budget. When that is reached there can be a substantial reduction in taxes. As an assurance to the people that the administration intends to do so the Republican Congress made a tax reduction last year of $7.4 billion. This was commensurate with the savings in Government expenses up to that time.

Last week there were some of us, and I was one of them, who voted against increasing the salaries of Members of Congress by $10,000 for the reason that, notwithstanding there might be merit for a reasonable increase in such salaries, yet it was not proper or justifiable for the Congress to do so in any amount until the budget was in balance, or at least approximately so. While, of course, the savings incident to continuing the present salary level would not in itself balance the budget, yet this and other available sources of savings, when taken together, could have such a result. It has been said, and truthfully said, we could balance the budget by merely cutting down on the moneys we are giving to nations abroad. This latter is undoubtedly a subject that merits consideration.

There is no one in this whole Congress who is more anxious to see a reduction in the heavy burden of taxes. I am anxious and willing to give my support whenever it can be done in a manner that will not destroy the soundness of our national financial structure. To vote for such reduction merely because it is politically popular without regard to the detrimental after effect is neither wise nor patriotic. The excessive spending of previous administrations has brought us to a realization of the truthfulness of the old adage that there comes a time when the piper must be paid. This is our present situation and as loyal patriotic citizens it is our duty to carry on until we can by wise and prudent management of our fiscal affairs bring ourselves to a condition that will warrant the reduction of taxes. I have confidence that we are well along the road to accomplish this. Let us persevere.

Because of the views I have expressed, and, the belief that they are fundamental to a sound fiscal policy, it is my intention to support the amendment to strike out that portion of the bill that relates to a $20 reduction for each taxpayer and dependent, leaving the present corporate and excise taxes in force.

Mr. REED of New York. Mr. Chairman, I yield 5 minutes to the gentleman from California [Mr. JOHNSON].

Mr. JOHNSON of California. Mr. Chairman, I think the most objective man who knows something about this problem is Mr. Humphrey, the Secretary of the Treasury. His flat statement was that this bill, if passed as it is now before the House, would again start inflation; which convinced me that the proposal to pass around $20 tax credits is bad and might start or feed inflation.

The budget is out of balance already. Spending more than we take in is what produces bad fiscal policies and merely adds fuel to inflationary tendencies, by adding $815 million in fiscal 1956 and $2.3 billion a year thereafter.

In 1950 I accidentally came to know something about inflation. It happened that I was in France. I found that when I went to change my money I could get 345 francs for $1, and if you wanted to go down the street you could get 385 francs for $1, in the black market. In the short space of almost 30 years that ratio had dropped from 7 francs in 1918, when we soldiers of the First World War were paid in the coin of the realm so we could spend our money in the French economy, to almost 350 francs per dollar.

Inflation is certainly a deadly thing that has ruined more than one country. It is one of the reasons France is in such bad condition today. It ruined the Roman Empire, it ruined Germany, it ruined other countries.

When I came back from France in 1950 I began to look into the matter of inflation from a personal angle. I had one of my life-insurance policies analyzed by the Library of Congress. This policy was taken out in the year 1921. It was for $2,500, and payable $90.28 on the 14th day of June for 20 years. I paid that policy out completely, having paid $1,805.60. I left in all the dividends. My policy was worth at that time $3,800 by virtue of the accruals of dividends I left in.

However, I found out from the Library of Congress that that policy which I thought would buy $3,800 worth of goods would, when we got to 1950—and the message is dated May 29, 1951—bought only $2,058 worth of goods when measured by the dollars I put in and their purchasing power at the time of payment. It would have bought almost twice as much if the inflation had not set in. Just think that over. That happened in that short space of time. Then I tried to have it applied to the whole life insurance group. To my amazement, I found that in the United States as a whole the thing has been still more deadly than it was in my particular case.

I will read part of this report to you, but I will insert the entire article in the RECORD. It is a statement entitled "Life Insurance and Inflation in the United States in 1950." Here is what they said:

LIFE INSURANCE AND INFLATION IN THE UNITED STATES, 1950

The effect of inflation on holders of life-insurance policies is typical of its effect on all recipients of fixed incomes. All such persons whose incomes do not increase as the cost of living rises suffer with every additional point in the cost-of-living index. A policyholder who bought a $1,000 policy in 1940 might well have expected it, 10 years hence, to give him $1,000 worth of goods and services, in 1940 prices. However, he would find that in 1950, on the average, his $1,000 policy, contracted for in 1940, would buy only $588 worth of goods and services.[1]

In 1940 a total of $11,429,000,000 worth of life-insurance policies was purchased. Ten years later, in terms of 1940 purchasing power, this sum had shrunk by more than 40 percent, to $6,715,000,000.

At the end of 1950 there was in force in the United States life insurance totaling $228 billion or about $1,500 per persons. Thus every time there is a single percentage drop in the value of the dollar, due to the inflationary pressure on consumer prices, the insurance held by the people of the United States drops in value nearly $2,300,000,000, or about $15 per person.

Benefit payments to American families reached a record peak of $3,725,000,000 in 1950. In terms of 1940 dollars these benefits, however, had a purchasing power of only $2,188,000,000. This is less than the actual benefits paid out in 1940, which totaled $2,664,000,000. This may be considered particularly striking when it is noted that the amount of life insurance in force in 1950, $228 billion is nearly twice the amount in force in 1940, when it totaled $115,500,000,000.

Since life insurance is held so much more widely today than previously, the impact of inflation in life insurance is much more encompassing. The $1,500 average per capita ownership of life insurance in 1950 compares with $900 in 1940, $400 in 1920, and $150 in 1910. As Holgar J. Johnson, president of the Institute of Life Insurance, states:

"Anything which brings about a material reduction in the purchasing power of dollars, directly affects the family security planning of the Nation's 83 million policyholders and tends to reduce the full effectiveness of the $228 billion of life-insurance protection they have set up. Inflation thus becomes a matter of nationwide family consideration. It is urgent that everyone exert every possible effort to stop inflationary tendencies in their track.

"The life-insurance business is currently directing much of its energies toward urging Government, business, and individuals to join in the fight which will effectively check inflation."

---

[1] All cost-of-living and value of the dollar computations are based on the U. S. Bureau of Labor Statistics cost-of-living index.

Source: All life-insurance statistics are from Institute of Life Insurance publications: Life Insurance Fact Book, 1950, and Life Insurance News Data, December 28, 1950.

When you translate that $2 billion drop, and it dropped 41 percent during that inflationary wave, it amounts to $94,300,000,000 that the people in the United States, who held that purchasing power, have lost because of the depreciated value of the dollar.

Mr. MOSS. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of California. I yield.

Mr. MOSS. I would like to ask the gentleman if he could also put into the RECORD the increased value in real property holdings that have accrued to individual owners of property as a result of this same inflation which may have affected the value of something tied up so definitely to money as insurance.

Mr. JOHNSON of California. I can illustrate that by telling you of a home that I sold. I will not tell you in dollars but it doubled in value. Real-estate value doubled because of the cheaper dollars.

Mr. MOSS. Which would more than offset the loss which the gentleman incurred in his insurance cost, is that not correct?

Mr. JOHNSON of California. No; it would not because I had more money in insurance than I had in my house. It would not offset it. Furthermore the people who were renting were hit very badly.

Mr. MOSS. Would the gentleman say that he bought a policy entirely with dollars of value equal to the value of the dollar at the moment he took out the policy?

Mr. JOHNSON of California. Yes, sir.

Mr. MOSS. Was the dollar constant for the entire 20-year period?

Mr. JOHNSON of California. Yes; it was constant up until the thirties and then it sagged a little. It sagged a little in the forties and it sagged very much in 1950 and 1951, to 41 percent of the original amount. I am sorry I must decline to yield further to the gentleman.

Mr. MOSS. The gentleman should realize the dollar has shrunk to about half of its value as far as earning power is concerned during the thirties.

Mr. JOHNSON of California. The main point I want to make is that the people lost billions in purchasing power because of that great inflation and that could be repeated if we are not careful.

Mr. COOPER. Mr. Chairman, I yield 5 minutes to the gentleman from Missouri [Mr. CHRISTOPHER].

Mr. CHRISTOPHER. Mr. Chairman, the debate here this afternoon, and I have sat through it and watched it very closely, has not been so much a discussion of this tax bill as it has been a clash between the basic philosophies of the Democratic Party and the Republican Party. You know the basic philosophy of those two parties is what makes me a Democrat. To begin with, the two parties have a very different attitude regarding money. To a Democrat, money is a medium of exchange—and only that. A Democrat believes that money should flow freely at reasonable rates of interest to carry on the business of the country and that there should be sufficient credit. The Republican philosophy regards money as a commodity that can be bought, sold, hoarded, cornered, and manipulated for the exclusive benefit of the 3 percent of our population who have it in abundance and to the detriment of the 97 percent of us who are obliged to earn it with our hands or our brains. The bill under discussion today is designed to give a little tax relief to those who have to work for a living. This has been demonstrated here this afternoon very thoroughly. No doubt the gentlemen on the left-hand side of the aisle would consider it very fortunate for the country—and I know I would consider it very fortunate for the country—if we could double our national income in the next 2 years. I think that would be wonderful. There are two ways of looking at the national debt. The national debt will never be paid or even financed by scrimping and pinching and making fewer jobs and reducing wages and keeping a Benson in the Department of Agriculture to reduce our farm prices to from 60 to 75 percent of parity. The national debt will never be paid or serviced that way. The national debt will be paid, if it ever is paid, and I trust that it will be, as the result of legislation passed by men who have foresight and vision; by men who look up and on, and refuse to look back and down.

Why do I think our national income could be doubled? Because the Democratic Party multiplied our national income by nine between 1932 and 1952. This was accomplished during a period that has been characterized by a very notable Republican as 20 years of treason. I submit that was quite an accomplishment under the circumstances. I, myself, am proud of it. That is not all the things we did during that time. We insured our bank deposits: we established the REA; we put a floor under farm prices; we passed the Securities and Exchange Act; we instituted social security and old-age insurance.

Now there has been some talk about the Democratic Party bringing out this tax reduction in order to buy votes. Democrats cannot buy votes. We do not have enough money. The Republicans are the people that have the money, millions and billions of it. It has been said that there was $100,000 of Republican money spent in my district this year in an attempt to defeat me. I have no way of knowing it, but they bragged about having spent that much.

Talk about playing politics, here is a little newspaper clipping that says, "Mr. Stringfellow is going to make a public speech in Utah." I submit that if a Democrat, I do not care who he was, would have gone into a campaign and spoken, as Stringfellow did—incidentally, I am bringing this up because he made a speech in my home town one night, and the next night confessed to his perfidy and untruthfulness over a television station. If a Democrat should do a thing like that he would never have the gall to ever make a public speech in the United States again if he lived to be 102. But evidently Mr. Stringfellow can go right along speaking to the public.

Now, there is no way to handle this subject in the length of time I have, but whether we get tax reduction depends on who gets it. The 83d Congress gave General Motors a reduction of $192 million in taxes last year; General Electric, $73 million; Westinghouse, $72 million; United States Steel, $53 million; Republic Steel, $20 million; Bethlehem Steel, $16 million; and Kennecott Copper, $13 million; Chrysler, $13 million; Sears, Roebuck & Co., $11 million; International Business Machines, $11 million; and Douglas Aircraft, $11 million; and on down through the category. That was not only for this year but for years and years and years into the future unless it is changed. But we are so poor that we cannot give the common man a $20 deduction for each of his dependents. So, whether a tax reduction is right or wrong depends not on the amount of the tax reduction but on who gets it. No Republican administration has come into power in my recollection that has not resulted into five things before it had been in power 4 years:

First. Lower prices for the food and fiber produced on American farms.

Second. Fewer jobs and lower wages for laboring people.

Third. Higher interest rates.

Fourth. Tighter credit.

Fifth. A tax cut for the superrich and our giant corporations.

The present Republican administration qualifies on at least four of these accounts already and still has almost 2 years to go.

The CHAIRMAN. The time of the gentleman from Missouri [Mr. CHRISTOPHER] has expired.

Mr. REED of New York. Mr. Chairman, I yield 10 minutes to the gentleman from California [Mr. HIESTAND].

Mr. HIESTAND. Mr. Chairman, $20 tax relief for every taxpayer and every dependent in the United States, the same as handing a $20 bill to each of 115 million people, has suddenly been proposed by the Democratic leadership. It is a cold net loss of $2,300,000,000 revenue; and since our cash budget, due to tremendous defense expenditures, cannot quite be balanced this year, that money must be raised somewhere. To pay your bills your Government must resort to what is known as deficit financing, namely, borrowing from the banking system, which is, in effect, the same as printing 115 million new $20 bills. The American public now understands that the more dollars you print the less the dollar is worth in purchasing power.

But that is not all. This $2,300,000,000 added bank deposits—for that is what it is—broadens the banks' lending base, allowing them heavily to increase their loans, thus expanding bank credit. This bank-credit expansion permits added general credit expansion in other lines—merchants, manufacturers, builders, individuals, and so forth—eventually and inevitably creating an added fifteen-or-more-billion dollars' worth of inflation. Inflation, I am sorry to say, is almost invariably permanent, and means increased cost of living.

Years ago, to the average wage earner, "inflation" was only a word. He did not understand how it worked or how it affected him. He found out that, although he was earning more and more money, he was no better off, and his relatives and friends on fixed salaries or pensions were getting tragically worse

and worse off. His wife realized that a 10-cent loaf of bread was costing her 20 cents and more, that the $5 bag of groceries on a Saturday was costing her $10 and more.

But it hit him every other way. His children were not getting proper schooling, due to scarcity of teachers and their low pay scales, which could not keep up with the increased cost of living. He had to help his parents or relatives when the purchasing power of their previous fixed pensions was cut in half between 1939 and 1952. His transportation, rents, and everything cost more.

So, although he did not at that time know what hit him, he was hit every place but the soles of his feet, and he did not like it. He learned the hard way. He now understands that the more money you print the more you devaluate the currency and the less it is worth to him.

Make no mistake about it—it is the little man, the wage earner and the people of small incomes that are going to get hurt. Rich people can afford to pay a little more for their living, but the poor man cannot. This so-called $20-tax refund, would actually hurt the little man far worse than the rich man, and he is the very person they claim would be helped. What a swindle.

And there is that other large group of people whose income is so small they do not pay any taxes, or at least not enough even to get full refund. These are the people that are hurt worst of all. They would pay more for groceries and everything. And there is also the great army of pensioners whose exemptions we raised last year, and they get no refund, yet get soaked more. These two great groups will get badly hurt by the increased cost of living, and they do not even rate these new $20 bills it is proposed we print. Forty-five million people are nonrecipients of $20, but victims of the high cost of living.

But even this is not all. Such an inevitable increase in the cost of living will call for another round of wage and price increases to match it, which, in turn, will start the vicious spiral of inflation all over again. Inflation is the most vicious, most insidious form of invisible taxation.

In other words, for every $20, $40, or $80 we hand back to the taxpayer this 1 year, we would soak him $100 or more per year increased cost of living, year after year, permanently. Is not that the most cruel kind of a hoax? Give a man $20 this one time in tax relief and soak him $100 per year maybe for the rest of his life to pay for it. If we can balance the cash budget another year, we can then give him tax relief without soaking him $100 per year for it.

A leading labor economist reports that the wage earner fared better in 1954 than any other postwar year. Why? Because the Eisenhower administration and this Congress, working together, effectively checked and controlled inflation. The cost of living has remained stable. So his greater take-home pay made the worker better off, and he now realizes it.

This proposition has been called a shrewd political move. But is it so shrewd? First of all, a $20 bill is not so big to a great many workers. It may mean only one or two bags of groceries. And if the worker knows he is paying $100 per year for it, he may realize he is being swindled. Of course, if instead of printing new $20 bills, the majority leadership had advocated printing new $1,000 bills, those who were uninformed might have been delighted, at least until they found that our country and its economy had been completely wrecked, as Lenin predicted would happen as we debauched our currency.

The average wage earner is not dumb. If he sees through this swindle, and I believe he will, would not his wrath against the perpetrators of it be tremendous? Will he fall for this making him pay $100 or more per year for a one-time $20 refund, or will he start talking about the politicians trying to buy votes, tarring us all with the same brush?

Of course, there is still another angle to this swindle. When the Government borrows from the banking system, it does so by selling it bonds. Increased bonds means increased Federal debt, on top of our present $278 billion which obviously we cannot possible pay in our own lifetime. In other words, we are asking our children and our children's children to pay our grocery bills if we make this tax refund. Is that giving them a square deal? It is bad enough to create inflation through ignorance of its ghastly consequences, but to do so knowingly seems the height of irresponsibility.

Remember, you cannot fool all the people all the time.

It is the little man that gets hurt, and you will have an army of millions of angry voters to be accountable to.

Mr. REED of New York. Mr. Chairman, I yield such time as he may desire to the gentleman from New York [Mr. RIEHLMAN].

Mr. RIEHLMAN. Mr. Chairman, we all want taxes cut. We all agree taxes are too high. President Eisenhower has repeatedly stated that he will recommend further tax cuts when such losses of revenue can be borne without substantial increases in our national debt. I myself have voted for tax cuts, in both the 80th and 83d Congresses when we were assured that corresponding cuts in expenditures made such decreases in revenue possible with safety.

But we must not cut taxes recklessly without thought as to their impact upon our national economy—as this $20-tax cut maneuver would. Therefore, much as I would like to make possible any tax cuts that could be made without endangering our Nation's fiscal stability, I feel that I cannot in good conscience support any such tax cut at this time. I intend to support President Eisenhower's position and vote against this amendment when it is presented on the floor of the House.

Passage of this tax-cut amendment would cause the Government to lose $2.3 billion in revenue beginning next January 1. This apparent purely political proposal can have no basis in logic or reason because it is impossible to visualize with any certainty the fiscal picture as it will be at that time.

At the present time, not a single appropriation bill has been brought before the Congress for this year's action—we cannot possibly predict with any certainty what the final total appropriations this year will be. It is never possible to predict exactly what tax revenues will be collected this early in a year because tax revenues depend largely upon national income during the year. Unless the Democrats possess some secret crystal ball that allows them to make these predictions with a certainty that no other fiscal experts would claim, there is no possible way for them to know what the effect of this tax cut would be starting 10 months from now.

In fact, if the proponents were at all certain about the fiscal future, why would not the tax cut have been proposed to take effect immediately? If they do not want to take the responsibility for immediate tax cuts, what leads them to believe that tax cuts in the unknown future will be to the benefit of the country? When the Congress again convenes next January, it will be the same Democrat controlled Congress. Why cannot we wait until then? If the fiscal picture warrants tax reduction next January, the Congress can enact it effective immediately, and I will be among the strongest supporters of such a tax reduction measure. The answer is that the Democrats are simply engaging in obviously irresponsible politics.

If the Democrat's crystal ball is clouded, for every $20 the taxpayer does not pay next year, the Government will have to borrow $20, and that $20 will someday have to be paid back with interest. In the meantime, increased Government borrowing increases inflationary pressures, with the cost of living going up and the value of the dollar going down.

Let us not be fooled by any such tax cuts that we will have to pay back with interest—just to get $20 that can be largely absorbed by inflated prices and devalued dollars.

Mr. COOPER. Mr. Chairman, I yield 5 minutes to the gentleman from California [Mr. ROOSEVELT].

Mr. ROOSEVELT. Mr. Chairman, last evening I had the pleasure and enjoyment of watching on television the press conference of the President of the United States. I believe that it is a most effective political weapon. I do not in any way begrudge it. I remember well the days of the so-called fireside chats also.

I was particularly interested in the answer to one of the questions which the President gave in that press conference. He stated that tax cuts which are made in anticipation that it will balance the budget are thoroughly justified and he intimated that the Republican tax cuts were of that nature.

We on the Democratic side, I believe, should be given some credit for believing also that the tax cut which we envision for the great mass of the small-income people of this country will do much to do exactly the same thing, by creating additional purchasing power without which business itself will not be able to function. It is upon that broad base that I think many of us are going to support

this measure which has been brought before us.

Now, I would like to call particular attention to the gentleman from Pennsylvania [Mr. SIMPSON], who was afraid that business would become so discouraged by this tax cut that it would fold up and we would have growing unemployment. I would like to call his attention particularly to some figures of the present time. For instance, with all the encouragement in the world that they have just received, business expenditures for new plants and equipment, which are wholly in the control of business, for the first quarter of 1955 have reached the lowest level since the third quarter of 1952. They are $560 million below the fourth quarter of 1954, and they are $1.43 billion below the same first quarter of 1954. What is this great confidence that we feel or we are told that the big business people feel they should have? Along the same line, on our figures for employment and unemployment, we find that employment in January of 1955 is 53,000 below the same month of January of 1953. In other words, with all this encouragement, we are still going downhill where, if we have a growing country, as we know we have, we have to go forward. What is the answer? The answer is to give something else, a stimulation to the purchasing power to the great mass of the people of this country, and that is what this Democratic proposal seeks to do, and I believe it will do it.

One last word. We have heard an awful lot today about responsibility and irresponsibility. I particularly, out in my district, ran on a platform of doing something in the way of giving tax cuts for the little people of the district, so the people were under no misapprehension whatsoever that when I came to Congress, if they elected me, I would be working for a chance to vote for exactly what I am going to get a chance to vote for here. And, I think we had better right now recognize that that is true. We are shaping up one of the great issues that will be fought in 1956, and I think I can state it fairly simply: To whom is the Republican Party responsible? And, to whom is the Democratic Party responsible? The Republican Party is now and always has been primarily responsible to those people that the gentleman from Pennsylvania was so interested in, the big business interests, the big corporations of this country. The Democratic Party has always been responsible to the great masses of the people of this country, and I, for one, am prepared to go out and help fight the campaign of 1956 on that issue of responsibility.

Mr. COOPER. Mr. Chairman, I yield 5 minutes to the gentleman from Texas [Mr. ROGERS].

Mr. ROGERS of Texas. Mr. Chairman, I did not really intend to get into this debate, because I did not think there was going to be a fight on it. But, when there is a fight going on, I do like to get into it. The reason I did not think there would be a fight is because I thought that this bill was doing what the President of the United States asked this Congress to do on this floor in his state of the Union message. If you will recall, he told us at that time that they anticipated cutting taxes in 1956. Now, that is exactly what this bill does. And, what has been done by this Congress is very simple. We have taken the suggestion of the President, and we are putting it into law so that he will not have an opportunity to be talked out of what he wants to do for the American people. When he said that he wanted to cut taxes in 1956 he was doing 1 of 2 things; he was either playing politics or he was sincere. I prefer to think that he was sincere. I prefer to think that any President of the United States is sincere in what he does.

Now what happens? Immediately after this bill was prepared and brought to the floor—really before that—the newspapers were filled with all kinds of castigating remarks—including some of those by the President—saying that it was fiscal irresponsibility. Well, who suggested it in the first place? He is the man who suggested it. And do you know why it was necessary for Congress to act? If it had not been for some past experiences, this bill probably would not even be on the floor. But you know what happened when the opportunity presented itself to carry out some campaign promises concerning 100 percent of parity that was promised to the American farmer in Minnesota, and several other places. The American people remembered that. They also remembered this, that there was some small print in there that said "At the market place." Of course, the farmers have not found that market place yet. The market place that they have had to go to has very low prices.

But the point that I am making is simply this, that what they wanted to do was to pinpoint this because they did not want to turn up here in 1956 and be told when they thought this was the year they were getting a tax reduction that what the President meant all the time was to give another tax reduction to the coupon clippers who got it last year.

The little people in this country want some relief. They want it on the books so that somebody can understand it. And when you talk to me about fiscal irresponsibility I want to say this: that if it is fiscal irresponsibility to give some tax relief to the overburdened little people of this country, this country could use a lot of it. The truth is it is not fiscal irresponsibility, but on the contrary absolute fiscal and intellectual responsibility.

Mr. ARENDS. Mr. Chairman, will the gentleman yield?

Mr. ROGERS of Texas. I yield.

Mr. NICHOLSON. Mr. Chairman, will the gentleman yield?

Mr. ROGERS of Texas. I yield.

Mr. NICHOLSON. Does not the coupon clipper get $20 under this bill?

Mr. ROGERS of Texas. He gets $20 under this bill, he certainly does. And we do not begrudge it to him one minute. I think it is fine that he gets it. What we want to do is to be fair with everybody but we do not want the little people to believe that we are going to do something for them and then later on have them learn that we are doing it only for a few and that we are saying, "Well, you just did not understand what we meant when we said taxes would be reduced. We were talking about the big boys not you little fellows.

If there has been any irresponsibility concerning this measure, it has not been fiscal, it has been vocal if not mental. When anybody says—and I do not care what office he holds or where he is from—when anybody says to me that I am fiscally irresponsible because I want to help a man to buy some shoes for his children's feet and some bread for their stomachs, I do not think he is being honest with himself or anyone else.

I shall never subscribe to the policy that substantial tax relief for a privileged few is "statesmanship" while meager tax relief for the many is fiscal irresponsibility.

Mr. COOPER. Mr. Chairman, I yield 8 minutes to the gentleman from New York [Mr. ZELENKO].

Mr. ZELENKO. Mr. Chairman, I rise in support of this measure. I believe, as the majority leader said, there are inequities in the Revenue Act of 1954 which must be corrected by this Congress. I do not intend to talk politically. I intend to talk factually. I shall base my remarks upon the actual wording of the Revenue Act of 1954.

I respectfully refer to section 462 of that act and the tremendous windfall it will give to big business for the tax year 1954. This effect, to put it mildly, was totally unexpected by the small taxpayer of the United States but perhaps not by his big business brother.

The average taxpayer, the little citizen, works on what is called a cash-receipt basis. He takes money in and he pays it out. The average businessman, above the level of the small-business man, works on what is called the accrual basis. What that means in my understanding is that it is not only the money he takes in, it is not only the money he pays out, upon which the records are kept, it is also what he expects to pay out and what he expects to take in.

Under the act as it was written last year every big-business man in this country is this year getting a double deduction, and I say that is a tax reduction. It is a tax forgiveness. It adds up to about $5 billions. Here is the way it works, right from the act, and I will give it to you in small figures.

Mr. BYRNES of Wisconsin. Mr. Chairman, will the gentleman yield?

Mr. ZELENKO. I yield.

Mr. BYRNES of Wisconsin. If this is an inequity, and if it contains all of the faults the gentleman suggests, it would seem to me that the proper approach would be for the committee to report out a provision repealing it, and not leave it on the books.

Mr. ZELENKO. Yes; I believe the committee should do that. However, I arose to bring it to the attention of the committee and the House because there has been so much said by the Republican Party about the 1954 Revenue Act not being a reduction act, that it was merely a revision act. I maintain it is a reduction act. The act is inequitable. Briefly, here is the way it works in simple figures.

A business house having an income of $10,000 and expenses of $2,000 before the enactment of this statute would have a taxable income of $8,000. Under the act of 1954, this business can now estimate what its costs will be in the year 1955 in the way of expenses, at least what they were in 1954, another $2,000, making a taxable income of not $8,000 but $6,000, keeping the extra $2,000 in what is called "reserve," which just means the Government does not get it. The Government will never recoup that money because in 1956, if this statute remains on the books, the business house will again estimate its future expenses for 1957, and on and on forever, so that in this particular year of 1954 I say there are $5 billions which the Government will never see because of some hocus pocus, high powered accounting which was written into the 1954 act. The average little man does not even understand the meaning of the word "accrual." So I say that in order to help rectify the inequity of the 1954 act this measure, H. R. 4259, should be passed to give a "cash-receipt" average citizen tax relief that he understands and needs.

Mr. MILLS. Mr. Chairman, will the gentleman yield?

Mr. ZELENKO. I yield to the gentleman from Arkansas.

Mr. MILLS. The gentleman from New York is to be commended, in my opinion, for bringing this to the attention of the Committee of the Whole. During consideration of the bill before us on Monday I asked the Secretary of the Treasury if this had come to his attention and gave him a case I had read of in the local newspaper. He said it had not come to his attention. I suggested that it be investigated immediately by the Treasury and recommendation made if recommendation should be needed.

Mr. BYRNES of Wisconsin. Mr. Chairman, will the gentleman yield?

Mr. ZELENKO. I yield.

Mr. BYRNES of Wisconsin. I think the gentleman from Arkansas would admit that certainly there was never any intention on the part of any Member on the Republican or Democratic side of the Committee on Ways and Means last year in the House of Representatives to permit a windfall to anybody from this section. It was only intended to put into practice good, sound accounting procedure.

Mr. MILLS. The gentleman from Wisconsin is correct. In fact, this provision was handed to the committee, as I understand, by the Treasury Department, as a device to improve bookkeeping. However, it is one of those things that perhaps had not been thoroughly considered. Certainly it merits further consideration by our committee.

Mr. BYRNES of Wisconsin. I would agree with the gentleman, but I think it is not fair to say that that bill was an inequitable bill and was devised as an inequitable bill and was considered as such because it contains this provision which, if the gentleman is correct, has had these effects.

Mr. ZELENKO. May I say that the effect of section 462 of the 1954 act now has every accountant in America worthy of his salt giving his clients the double deduction windfall. I add also that my constituency, each and every one, is in favor of the $20 deduction except one constituent, the President of the United States. However, I say here and now, and respectfully, he is a minority of one in my district.

I urge the passage of H. R. 4259.

Mr. COOPER. Mr. Chairman, I yield 5 minutes to the gentleman from Louisiana [Mr. LONG].

Mr. LONG. Mr. Chairman, well, we are back here where we were last year. Last year we came here and they tried to make us believe they were helping the little fellow. I started in, if you remember, trying to get a $1,000 exemption—to raise it from $600 to $1,000. That failed. Then we tried $900 and that failed. We finally got down to asking for a $700 exemption. These Members on my left to a man fought that bill, and I told you at that time there were going to be a lot of new faces here at this session of the Congress because you did not give the little fellow any tax relief—if you remember that. Now I am telling you there are going to be a lot more new faces in 1957.

I want to briefly give you a few figures on H. R. 8300. We have been hearing talk here all day that it did not help the big man any more than it helped the little man. I have just made a few simple figures which almost anybody can understand. In my district we have a lot of people who work with their hands and who earn $3,000 and less. Take a man with a family who earns $3,500 farming. He works with his hands 12 months in the year. His wife works, and all of his children work. They make $3,500 in 12 months—if they do. His tax under this bill approximately is $60. But take the man who uses 12 minutes of his time instead of 12 months. A man who clips coupons in the amount of $3,500—his tax is in the neighborhood of $20. Now have you helped the little man or have you helped the big man? Those are the facts. Let us go into this thing just a little bit. I was talking to my nephew back there a while ago. He gave me a little thought about this being a sort of Easter egg hunt for the big boy. You take this big bill. It has 875 pages. I am referring now to the bill, H. R. 8300. On every page you find help for the big taxpayer. On every page he turns, he finds a golden nugget which takes care of him. But, my friends, for the little fellow in the low brackets, you might just as well send him a Sears Roebuck catalog, which would do him more good than this bill, H. R. 8300, did for him. They say that this $20 tax reduction will not do anybody any good, and that it is a phony. Well, you just do not give $20 to the man. We are giving $20 to the wife and we give $20 for each child. You know, it might be an incentive for a fellow to have a few children in his home if you give him this $20 tax reduction—a family of 5 would get $100 reduction. That $20—do not worry about the phony part of it—you take it to the grocery store and they will give you groceries that you can take home which will fill the empty stomachs of your children. Do not worry about that. No, no, you know what this is. They say this is politics. You bet this is politics. H. R. 8300 was politics. That was Republican politics and it did not help the little man in this Nation. But now this is politics, too—this is Democratic politics that believes in filling the stomachs of the hungry people of America. While I admit that $20 is very small, we did not do like the Republicans did; this $20 goes to every man, woman, and dependent in this great Nation of ours. This will bolster the economy of this country and will put purchasing power in the hands of the people. This is an extra $20 that all of us will have to spend. We do not hesitate to give relief to other nations when they are in need. Then why in all good reason should we not give relief at home? Let me repeat, the only thing wrong with this tax cut, it is not enough. We are just doing today what our Republican friends promised 2 years ago. Let us pass this bill and make them keep their promise.

Mr. REED of New York. Mr. Chairman, I yield 6 minutes to the gentleman from Iowa [Mr. JENSEN].

Mr. JENSEN. Mr. Chairman, I was amused at my good friend from Louisiana [Mr. LONG] pleading for the folks who made $3,500 a year. I want to remind the gentleman that before his party came into power in 1932 and before we got into these past wars, the family that had an income of $3,500 a year was completely exempted from any income tax.

I do not blame the Democrat leadership for trying to give back a few of the crumbs of the many thousands and thousands of dollars they have taken from the pockets of the poor people of America during the postwar years when they were in power. You are just trying to soothe a lot of folks who know just what you have done since 1932; back as far as 1917, when this Nation was thrown into World War I, and then in 1941 we were thrown into World War II, and then in 1951 when the President sent our boys to Korea without even glancing at the representatives of the people, the Congress of the United States, and because of those wars and wasted billions you raised Federal taxes 19 times. So as I said before, I do not blame you for trying to soothe the folks a little bit by giving them just a few crumbs of all the thousands you have taken away from them. You have raised Federal taxes from 4 percent of the people's income in the last 18 years you were in power, to 24 percent when the Republican 80th Congress came into power. That is 20 percent on every thousand-dollar income or $200 on every thousand-dollar income. True, most of it is hidden taxes. The family making $3,500 annually paid in the neighborhood of $870 in Federal income tax before the Republicans reduced their taxes.

Mr. LONG. Mr. Chairman, will the gentleman yield?

Mr. JENSEN. Yes, I yield if you want to straighten yourself out.

Mr. LONG. The gentleman a few moments ago referred to taxes that the Democrats put on. I would just like to go back a little and do a little reminiscing. I am pretty old myself. Do you remember the days of Herbert Hoover when men walked the highways and byways begging for bread? Do you remember that shortly after that time Franklin D. Roosevelt came into power and you had some prosperity?

Mr. JENSEN. If you want to go back I can remember when your party gave 12 million people employment in military uniforms. Are you proud of that?

Now, who benefited by the tax reduction that the Republicans put into effect in 1947 and 1948, and in 1951 and 1952? We Republicans reduced taxes to the tune of over $12 billion, and our expert economic analysts tell us that the ultimate consumer pays all of the taxes in the final analysis and that 64 percent of the American people make less than $5,000 a year. So because of the fact that the ultimate consumer pays all of the taxes, the people whose income is $5,000 or less received 64 percent of the savings of reduced taxes passed by the Republicans, because they represent 64 percent of our total population.

The American people are just now feeling and enjoying the effects of the Republican tax reduction program. No wonder the Democrats want to get into the act. You cannot blame them for trying.

Mr. COOPER. Mr. Chairman, I yield 5 minutes to the gentleman from Tennessee [Mr. BASS].

Mr. BASS of Tennessee. Mr. Chairman, it gives me a great deal of pleasure to have the opportunity of coming on the floor today and speaking in behalf of a measure which I recommended strongly during my last campaign, a tax reduction bill. The leader of the opposing party, the President of the United States, extended the springboard for the attack on this bill a few days ago when he used the word "irresponsible." I notice that his followers here today have used it many, many times.

I tell you their true objection to this bill, Mr. Chairman, is not the fact that it is irresponsible, but the fact that it is "ir-Republican." It is "ir-Republican" because it was conceived by men who are leaders in the Democratic Party, men who have served long and faithfully and eminently in the party of all the people of the United States, the Democratic Party.

It is also "ir-Republican" because it serves to give some relief to the low-income people of America whom the other party has used only for the purpose of exploiting their meager existence throughout the years instead of making them real independent citizens.

The Republican leaders come here today and say that the Congress of the United States is using poor judgment in considering a tax cut that has not been recommended by the President of the United States. In effect they say this is not the responsibility of the Congress of the United States. I would like to refer my friends to section 8 of that great book, which was conceived and written by the men of wisdom and foresight, our forefathers of many generations ago, the Constitution of the United States. Yes, in section 8 you will find that it is the power and the responsibility of this body to propose and levy taxes and to raise the revenue by which we run our Government.

They say that this tax is unwise and irresponsible because it comes a year before it is to become effective. As far as I am concerned the average family head in America likes to know before he starts planning his budget exactly what his financial situation is going to be for the next 12 months. Sure, I would like to know every year on January 1 just exactly how much money I am going to have to have in my family budget throughout the year, and I feel that every citizen of America should also have that privilege.

Mr. HOSMER. Mr. Chairman, will the gentleman yield?

Mr. BASS of Tennessee. Yes; I shall be pleased to yield.

Mr. HOSMER. Do you know whether or not this proposal would have an inflationary effect on the economy?

Mr. BASS of Tennessee. I will get to that; I will be glad to answer the gentleman's question.

Talking about inflation, the economy of this Nation is based on the ability of its citizens to earn and spend money; if we do not have money in circulation at all levels the economy of this Nation is certainly at very low ebb.

Mr. HOSMER. I understand that, but if this bill should result in a rise in price of merely 1 cent on each of six necessary items that any family in this country is going to have to buy, then that $20 relief is going to cause the expenditure of $21.90, leaving a man $1.90 worse off than when he started.

Mr. BASS of Tennessee. But the gentleman forgets that we are going to put $2,100,000,000 more money into circulation. This money will be placed in the hands of low-income people who will spend it. I have always been of the opinion that an income tax should be paid out of the surplus income. I believe there is enough surplus income in America to pay the tax burden. When you tax a man with one child who is making only $1,800 a year you tax him on money which is needed for the bare necessities of life. When you tax the man who is making $10,000 a year, the $20 you are taxing represents only a small percentage of his income when you base it on the surplus amount of income made by the wage earner, in comparison.

Mr. Chairman, it is a pleasure for me to have this opportunity to endorse and support the $20 refund or tax exemption which is given to the taxpayers. I recommended to my people in Tennessee before I came to Congress that I would support legislation raising the personal exemption of the individual taxpayer. This is even better than that. It gives relief to the small wage earner but does not take as much from the Treasury. I support this bill more vigorously than I would the other plan because in proportion of the tax paid it gives greater relief to the low-income people of America.

Mr. REED of New York. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I am sure that the chairman of the Ways and Means Committee will agree with me in the statement I am about to make. We are both proud of the fact that we serve on the Committee on Ways and Means. I am proud of that fact and I am also proud of the fact that I had the opportunity of serving for a short time as chairman of what I consider after all to be the greatest committee in the House of Representatives. I believe that both the present chairman and myself would like to do everything within our power to uphold the prestige of that committee and to follow orderly procedure. We cannot afford to sacrifice that committee.

If you will look over the chairmen who have served that committee in the past, not including myself, you will find that they have been men of outstanding capacity and that they have gone on to much higher positions later. The committee should be proud of that fact.

We want the people of this country to respect the committee and to feel that they are safe in the hands of the committee so far as taxation is concerned. Somebody said here that the power to tax is the power to destroy. Of course, that is true. The fact is that each person on the floor is responsible for the prestige of a committee like this.

We are facing a serious proposition and I cannot believe that our distinguished chairman of the Ways and Means Committee at the present time fully approved of this method to try to take us by surprise. In all the years I have been here, nothing like this has ever happened before. I am not going to characterize it at all. I just want to leave it in the thoughts of the Members.

Mr. Chairman, we should handle legislation as it should be handled. It should not be handled in this way. It is not fair, it is not just, and all it will do is to reduce the prestige of this great committee before the country. The thing we better do is to think about that seriously at this time.

There has been some criticism here of the 83d Congress. Do not try to tell the people of the country that they received no benefits from that Congress. Every segment of the population has received benefits. You cannot lift a great tax burden of $7,400,000,000 off the people without stimulating interest in those things that helped every man and woman. If you will go through that bill you will see the benefits that have been given, clear down to the babysitter. I am receiving letters on this every day, even in reference to what we have done for the colleges and institutions of the country.

You say that this does not have any effect on the matter of inflation. Do you know that the heads of some of these insurance companies have been to me and that they are on the point of notifying their policyholders what it means to their policyholders, and I refer to loan associations and institutions of that kind. They are all going to be affected adversely by this. You are not going to give the people any benefits by this proposal here. So, I hope you will think it over tonight and take this matter as seriously as it should be done. We have had a great display here. I have enjoyed it very much. I have not taken very much part in it, but I have enjoyed it, except for one thing. I just do not like to see our great committee dragged into the low level which it is possible to do if we demagog on a thing of this kind.

Mr. HALLECK. Mr. Chairman, will the gentleman yield?

Mr. REED of New York. I yield to the gentleman from Indiana.

Mr. HALLECK. I want to commend the gentleman for his fine attitude and say just this: He was the author of the tax-revision bill in the last Congress. He worked at it very diligently. So far as I could discover, except for a very few items about which there was dispute, I understood that both the Republican and Democratic members of the Committee on Ways and Means approved of the bill. There were differences about some provisions, but on the whole there was approval of those provisions. And, it must on the whole have been a pretty good bill because 339 voted for it on passage and only 80 against it. I do not know on which side the gentleman from Louisiana voted, but in any event, if he was one of the 80, he was in a very heavy minority, because a majority of 339 went ahead and voted for the bill.

Mr. REED of New York. I thank the gentleman. I do not think any member of the Committee on Ways and Means on the Democratic side of this House will say that I have not given credit to the whole committee for the work that was done on that important bill, the first revision of consequence since 1875. I received long-distance telephone calls from California and from almost every State of the Union, from outstanding attorneys, saying that they were for the bill because they could not advise their clients on any kind of a transaction because the laws were so confused by reason of regulations, conflicting court decisions, and other reasons. So, this bill was built up in the interest of this Nation.

And, what is more, I have checked to see how many criticisms were coming in on that bill, and outside of a few clerical provisions, and voices heard without anything more to support them than a newspaper article, there have been very few criticisms—less than 100—coming to the Joint Committee on Taxation, which has taken an active part in the bill.

Mr. COOPER. Mr. Chairman, I yield 5 minutes to the gentleman from Illinois [Mr. GRAY].

Mr. GRAY. Mr. Chairman, being a new Member of this great body and especially since being the youngest, I have tried to be a good listener. I must rise, however, and voice my opinion on this measure to reduce individual taxes.

I have heard a great deal of talk thus far about balancing the budget, about reducing our national debt, and establishing our economy on a sound and firm foundation.

Mr. Chairman, I think it is way past due for the present administration to talk about balancing the human budget instead of the monetary budget. Since the present administration seems reluctant to do so and acts so aggravated when the topic is brought up, I believe it is up to this Congress to take the initiative in getting something actually accomplished which will help the plain, ordinary, non-coupon-clipping citizen. In all this talk about balancing budgets, let us look at the human budget. In my district of southern Illinois there are over 30,000 people out of work, walking the streets looking for a job; despite all the high-flown phrases that the party in power puts out concerning rapid decreases in unemployment, where I come from there is more unemployed today than there was last week, there was more last week than last month, and a great deal more unemployment last year than the year before it. Now, I am sure that $20 may not sound like a lot of money to some people, but it means a whole lot to those people in southern Illinois and everywhere in our Nation who can only pick up a few dollars from whatever job they can find from time to time.

In all this talk about reducing debts, let us again look at the human factor. I do not think, Mr. Chairman, that this administration realizes, knows, or understands that we have distressed areas in these United States, or else it simply is not interested. If it were interested, it would realize that $20 means a lot to a head of a family who has to go and borrow money to buy food to supplement the food relief he is now on so his children can be fed. In southern Illinois we have over 24,000 families on Government surplus food relief and $20 for each tax exemption would go a long way toward buying a few pairs of shoes for children or pay the book rental at school and many other things necessary in raising a family.

In all this talk about firm foundations for our national economy, let us not forget the average American family, the very foundation of our national life. To most of them, $20 means a lot; it means an awful lot to most families in southern Illinois.

It is high time that something was done for the people in those areas of our country who are right now living in a fearful depression. It is high time that the wage earners, the workingmen and farmers had action demonstrated to them instead of all those promises, platitudes, and talk, talk, talk from the White House and the administration about forward-looking programs, leveling-off of the economy that has been going on for these last 2 years. Something must be done, Mr. Chairman, and it certainly looks like it will have to be up to this Congress to have any action accomplished.

I realize that what this bill will accomplish is not a great deal compared to the magnitude of the problem; but it will be the first step in the right direction of actually doing something for our people in distressed areas here in the United States. Mr. Chairman, a 1,000-mile trip is started with the first step. Let us make the first step toward giving our people that break they deserve by passing this $20 tax-reduction bill.

Mr. REED of New York. Mr. Chairman, I yield such time as he may consume to the gentleman from California [Mr. MCDONOUGH].

Mr. MCDONOUGH. Mr. Chairman, I ask unanimous consent to extend by remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. MCDONOUGH. Mr. Chairman, I have a strong and impelling desire to support and vote for a reduction in taxes which will legitimately relieve the taxpayer of the heavy burden he is now carrying when I am sure that the tax reduction I vote for will not reduce the purchasing power of his dollar, will not increase the present deficit in the budget, and will not increase his obligation to paying off the public debt.

I voted for a tax reduction in the 80th Congress, which proved to be the wise and proper thing to do at that time, because the revenues we took in the form of taxes from the people not only balanced the budget, but left an $8 billion surplus and paid off $6 billion of the public debt.

I voted for a tax reduction in the 83d Congress which brought relief to every taxpayer in the Nation amounting to $3,200,000,000, and when we were able to reduce the deficit in the budget from $9.4 billion to $2.4 billion, or a total reduction in the deficit of $7 billion.

The proposal before us, H. R. 4259, instead of reducing the present deficit will increase the present deficit by $1 billion. It has been said that the present bill will provide a $20 tax credit to each taxpayer and his dependents. The truth of the matter is that it will add an obligation of $15 for each taxpayer and his dependents to the national debt. In other words, instead of stabilizing the taxpayers' dollar, the passage of this bill will actually depreciate the purchasing power of the taxpayer's dollar and furthermore increase the present budget deficit by $1 billion, which the taxpayer must pay interest upon.

In my opinion the proposal contained in H. R. 4259 is purely a political move by this Democratic-controlled Congress to give the impression to the average income-tax payer throughout the Nation that he will benefit by the passage of this bill while, in fact, it will add to the monetary burden of the average taxpayer to pay off the increase this will place on the national debt and the increase it will place on the budget deficit.

My public record on supporting, voting, and advocating a reduction in taxes is well known over the years. As a member of the Los Angeles County Board of Supervisors before coming to Congress, I fought for and obtained a reduction in taxes on more than one occasion. I have consistently voted against appropriations which I believed to be surplus and unnecessary in order to reduce the tax burden on the taxpayer.

I have, as I previously stated, voted in the 80th Congress and in the 83d Congress to reduce the burden on the taxpayer by reducing his income taxes, but I do not propose to deceive him into believing that this bill will reduce his taxes when it will actually increase his burden, depreciate the purchasing power of his dollar, and add an additional burden on himself and his children for years to come by increasing the public debt.

The people of the Nation should realize that this bill will not take effect until January 1, 1956, and that its full effect will not be realized until January 1, 1957.

I believe we should wait until we know what our actual budget expenditures will be for the next fiscal year, and I am confident that during the next session of Congress when we know what our budget obligations are, a legitimate, honest, and beneficial tax reduction will be proposed and passed by the 84th Congress which I will be glad to support.

We must do everything possible to stabilize the purchasing power of the dollar, reduce deficit spending, and, if possible, pay off all we can on the national debt rather than to do the reverse in all of these essential things which this bill would bring about.

I am confident the public fully realize that this bill, H. R. 4259, is purely a political move and is a very unsound and unsafe fiscal policy to pursue.

Mr. COOPER. Mr. Chairman, I yield 5 minutes to the gentleman from California [Mr. SISK].

Mr. SISK. Mr. Chairman, we have heard a lot of discussion this afternoon about whether or not this proposed reduction in income taxes will benefit the smaller taxpayer, who is the hardest hit by his intolerable tax burden, and who is the least able to pay. Let us look at it percentagewise. A family of 4—husband and wife and 2 children—receiving a net income of $4,000 after deductions but before exemptions, pays now under the Republican tax act, a total of $320 in direct Federal taxes out of this meager income. Under the proposal now before us this same family will pay only $240, which is a reduction of 25 percent. Now take a family of the same size with a net income of $10,000. This family's taxes will be reduced from $1,592 to $1,512, which is only 6 percent. Certainly it is clear that those who need it most will benefit most under this bill—rather than the Republican principle of 1954, designed to benefit most those who need it least.

I am strongly unmoved by the crocodile tears and cries of irresponsibility raised about this measure, designed particularly to help the 5 million families who are hurt worst in the squeeze between rising costs and rising taxes. I recall the cries of glee and triumph, the trumpeting through the press that followed tax reductions for the privileged few, which were then considered the height of responsibility even though they too were thrown into the face of an unbalanced budget.

I came on this floor this afternoon prepared to offer an amendment which would have increased the revenue of the United States Treasury by repealing some of the special tax privileges granted last year by the 83d Congress. As you know, I may not under the rule now offer that amendment to that bill, but may I suggest to the Members that if they are concerned about the effect on revenue of this proposal to help out the little fellow, the way is open to them to realize more than an equivalent of any taxes lost by this measure through repealing of the special tax advantages contained in the Internal Revenue Act of 1954 and I will be happy to help any Member locate and repeal those advantages.

I have a further word to say regarding the economic result of this tax reduction proposal. Let us apply it in my own medium-sized community of Fresno, Calif., where we have a metropolitan population of about 160,000 persons. A $20 tax reduction for each will mean that $3,200,000 additional will be available for spending in that community each year. It means that more goods and services will be purchased, that merchants will do more business and that employment will be increased. It will be a shot in the arm in an economy which is largely dependent upon agricultural prosperity, which I am sorry to say has been woefully lacking under the administration's and Secretary Benson's "wipe out the farmers" program.

We have our chance today to at least partly bring our tax program back into balance and in some measure equalize the tax advantages handed our wealthy friends by the administration last year. I not only urge this proposal, but serve notice I intend to explore further the possibility of bringing more responsibility back into our tax setup on behalf of those least able to pay the bill.

Mr. KELLEY of Pennsylvania. Mr. Chairman, my keen interest today—and last year—was and is in effecting tax relief for the low-income group. Last year relief was accorded to the well-to-do and a mere trickle was given to the low-income group—one might even say to the poor, because many of these low-income people were actually poor. The injustice perpetrated was acutely felt, and the paramount interest today given to these people does not compensate for the benefits to which they were entitled last year, and did not receive.

It is justice to take care of them now. All the arguments about balancing the budget, high patriotism of the people who made $5,000 or less—all this is beside the point. Of course these matters should be considered but not to the expense of the millions affected.

Mr. Chairman, I am compelled to support this measure to the utmost. It is a matter of conscience with me as it is to many of my colleagues on this side of the aisle. I repeat it is social justice and these people are entitled to this consideration.

If this is irresponsibility, then make the most of it.

Mr. VORYS. Mr. Chairman, I am concerned today, not so much by this ill-conceived political $20 tax cut proposal which I feel is bound to fail, as by the continued extension of the excise and corporation taxes which is bound to pass. Under present condtions, I am of course voting against the tax cut, and in favor of the extension of the other taxes. But I had hoped that, by this time, we could eliminate these nuisance taxes and this abnormal corporate income tax. These taxes are ultimately paid by everybody, because excise taxes, sales taxes, are paid by consumers and corporations must pass on their taxes to buyers of their products, or go bankrupt. As Franklin D. Roosevelt truthfully said "taxes are paid by the sweat of everyone who toils." Let us stop talking about the little man and the big man today. Both of them are included in the $20 political gesture that will fail; both of them are hit by the taxes that will pass.

Why do we still need these taxes? Why are we still on an unbalanced budget, after cutting our spending $63 billion in 2 years? The answer is that our defense, our protection, takes two-thirds of our spending. The remaining one-third that we spend on our own peaceful pursuits cannot be cut enough to balance the budget and justify a tax reduction. Previous Democratic administrations must bear their full share of responsibility for mistakes that contributed to this situation but, regardless of the past, it is the present, continuing, grim and deadly threat of communism that is responsible for most of our spending, for our high taxes that cannot now be cut.

As we debate here today there is going on in Bangkok, Thailand, a conference of the SEATO powers, the eight nations that joined at Manila is forming the Southeast Asia Treaty Organization. Our statesmen are leading in the effort to put life and vigor into that eight-power treaty, under conditions that are being made as difficult as possible by our enemies. Some of our friends are not being too helpful. Success out there will contribute eventually to lasting peace, a reduction of our defense burden and ultimate safe tax reduction. What happens at Bangkok will affect our budget. What happens here today may affect the outcome at Bangkok. Not just what we do alone, but what the free world does together, will meet the Soviet threat in a way to justify safe tax reduction here.

In view of the momentous nature of the Bangkok meeting, in view of the vicious and insidious enemy propaganda aimed at that meeting, and in view of some statements made here in recent days that may be misunderstood out

there, I made a statement today over the Voice of America. I think it may be helpful to quote it to the House in connection with this debate. Here it is:

In the opening session of the Bangkok conference, Mr. Dulles declared once more our American policy of independence laid down in our Declaration of Independence, in the United Nations Charter and in the Pacific Charter. He reminded the nations of Asia that we believed, as Lincoln said, that this principle was not only for Americans, but for all people, for all future time. He said that to us this means that equal opportunity for all peoples shall not be hampered by geography, race, or creed.

On Thursday Mr. Dulles stressed the interdependence of nations that would remain free, and told of the mighty power of the United States assembled and committed in Asia to back up the power of the Asian countries uniting in their common defense against their common foe.

The American people are firmly behind their great Secretary of State in his masterful statements on independence and interdependence, freedom and unity. There is no confusion here as to what the Congress and the people want and expect their Government to do when free men in Asia join in defense against Communist aggression. We know, as Mr. Dulles says, that "freedom cannot thrive in an environment that is hostile to freedom."

Our goal, as he said, is "peace and freedom" for Asia, for ourselves. We know we cannot buy peace for ourselves by bargaining away territory we do not own, trading off the freedom of other men. We are ready and determined to take the steps necessary for the common defense of united free men.

Mr. GENTRY. Mr. Chairman, the proposal today contains two provisions. One of these provisions concerns the retention of Federal excise and corporate taxes, which will be reduced by operation of law unless action is taken by Congress to extend them. I strongly favor this provision of the bill. The condition of our Treasury makes necessary the retention of these corporate and excise taxes at the present rates.

The second provision of the bill would give each taxpayer a credit on his income tax of $20 for himself and $20 for each dependent. It would remove 5 million taxpayers from the tax rolls and it would reduce our yearly tax collections $2.1 billion. Both our yearly deficit and our Government debt would be increased by that amount because we already have a deficit. This provision would not go into effect at any time during 1955 but would affect taxes for 1956 and beyond.

Identically the same people who urge the second provision of this bill were just as strongly 1 year ago urging that each taxpayer be given an increased income exemption at that time of $100 for himself and each dependent. That bill would also have removed 5 million taxpayers from the tax rolls and would have cost the Treasury approximately $2 billion in revenue yearly. Everyone knows that it would have been the finest politics imaginable to have supported the bill of 1 year ago and that those of us who did not were made to suffer for it at election time, as we knew we would be. The bill was defeated, however, but by a majority of only four votes.

Has it now been proven that we were right when we opposed that measure and that the proponents were wrong? I believe it has been. The record now shows that every dollar of that tax reduction would have had to be replaced by borrowed money which would have increased the Government's debt. But, actually the proponents of the present $20 provision confirm the unsoundness of their exemption increase proposal of 1 year ago. How do they do that? They do it by admitting that the present proposal should not be made effective as of January 1, 1955, by admitting that it should not be made effective even on July 1, 1955—the beginning of the next fiscal year—and by not even claiming that it should be made effective before January 1, 1956. That is almost a year hence and it is actually 18 months later than the July 1, 1954, effective date of their proposal of a year ago.

There is one thing that this proposal does not disclose but which is just as true as is the statement that the effort to pass a $100 increased exemption 1 year ago was unsound. That is, that if those who supported the increased exemption last year, and those who are supporting the $20 credit today continue to vote on money measures, as most of them have constantly voted in this House since I have been a Member of Congress, we shall not be able to reduce taxes this year, next year, nor any other year.

It does seem that there is irony in the fact that those of us here who support economy in an effort to try to make possible the increase of income exemptions and a reduction of taxes must oppose, out of a sense of fiscal responsibility, the unwise tax-cut efforts by the very ones who, by their consistent voting for more and greater expenditures, would make any tax reduction an absolute impossibility.

Mr. Chairman, I strongly favor lower taxes because I believe the people are entitled to lower taxes. I have consistently voted to decrease expenditures in order that we might safely and responsibly reduce taxes. I know of no other way we can justify voting lower taxes except by first reducing expenditures.

I am in favor of an increased exemption for income-tax purposes because I think the people are entitled to that. And, in consistently voting for lower expenditures, I have had in mind that it would make possible an increase in the exemption now allowed income-tax payers.

Mr. Chairman, to reduce taxes and thereby make necessary additional budget deficits and additional public debt which would be passed on to the children and grandchildren of this generation, is unthinkable. My sense of public duty impels my decision to oppose such an effort.

Mr. REUSS. Mr. Chairman, at his press conference yesterday, the President called the action of the Democratic leadership in asking for a $20 across-the-board tax cut fiscal irresponsibility.

Is it fiscal irresponsibility to do something this year which will help primarily low-income taxpayers, after last year's $7.4 billion tax cut, of which taxpayers receiving income less than $5,000 a year got only 9 percent of the benefits with the other 91 percent going to corporations and high-income taxpayers?

Is it fiscal irresponsibility to help the man with the large family struggling to keep up his mortgage payments and buy baby shoes, by giving him a tax break based upon the number of his dependents?

Is it fiscal irresponsibility to give purchasing power to those who need it most, who will use it to buy goods that will cause our factories to put up the "help wanted" signs once again and start putting some of our 4 million unemployed back to work?

Is it fiscal irresponsibility to advocate a tax cut for the fiscal year 1956 which will produce a deficit of only 3.2 million, when the President cheerfully backed a $7.4 billion tax cut for the big fellow last year which produced an actual 1955 fiscal year deficit of $4.5 billion?

The President has said he is interested in a balanced budget. So am I. If he wants to balance the budget for 1956, or come very close to it, let him send up here a bill to raise the revenues by closing some of the more outrageous loopholes in our present tax structure—depletion allowance, family partnerships, gaps in the gift tax and many another. Let him defy the interests which profit by these loopholes and which up to now have held such a firm mortgage on the White House.

I will pledge to the President that I will stand faithfully by him in any sincere attempt he will make to rally the Republicans in Congress toward balancing the budget by taxing those able to pay.

I will go along just as faithfully as I did last week when I listened to the distinguished gentleman from Massachusetts the minority leader [Mr. MARTIN], tell us that the President was asking his friends on the Hill to back him by opposing the recommittal of H. R. 1, the Trade Agreements Extension Act.

Mr. COOPER. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. PRIEST, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H. R. 4259) to provide a 1-year extension of the existing corporate normal-tax rate and of certain existing excise-tax rates, and to provide a $20 credit against the individual income tax for each personal exemption, had come to no resolution thereon.

THE FEDERAL VOTING ASSISTANCE ACT OF 1955

Mr. BURLESON. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H. R. 4048) to permit and assist Federal personnel, including members of the Armed Forces, and their families, to exercise their voting franchise, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. HALLECK. Reserving the right to object, Mr. Speaker, and I shall not object, as far as I know the measure now before us has been reported by the Committee on House Administration without any dissension. I see the gentleman from Iowa is here. I do not know of any reason why the measure cannot be passed by unanimous consent.

Mr. LECOMPTE. Reserving the right to object, Mr. Speaker, I think I can say frankly to the House that H. R. 4048 is a bill that was reintroduced as a clean bill after a previous bill had been considered and was found objectionable in some particulars. I believe all of the objections were removed. I believe there is no part of H. R. 4048 that is mandatory or compels any action. It does invite all of the States to make arrangements to participate in the voting by men in the armed services, men in the merchant marine, civilian employees in foreign countries, and religious groups abroad, by utilizing free air mail service.

That is all there is in the bill H. R. 4048. It is not mandatory in any respect. It is important that it be passed at this time for the reason that action is necessary by the legislatures of some States. Most of the legislatures of the States are now in session, but perhaps will not be in session soon. As far as I am concerned, I should think that this bill could pass by unanimous consent.

Mr. O'NEILL. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. O'NEILL. Mr. Speaker, H. R. 4048 has been reported out of the Committee on House Administration with amendments.

Basically, Mr. Speaker, H. R. 4048 would repeal certain provisions of the United States Code relating to the method of voting by land and naval forces and affiliated personnel who are absent from their place of residence.

In place of the existing statutes, H. R. 4048 would provide a formal congressional recommendation to the States to provide a framework through which the armed services and other dislocated personnel might exercise their voting franchise notwithstanding absence due to Federal employment or other occupations specified in the bill.

H. R. 4048 would repeal an act passed by Congress September 16, 1942, that in time of war no member of the Armed Forces shall be denied the right to vote by virtue of failing to comply with registration and other requirements usually applicable to State voter qualifications. H. R. 4048 proposes to leave to the States their historic and constitutional privilege of determining certain voting qualifications.

H. R. 4048 urges the States to cooperate with the plans set up in title II as far as disseminating election information and ballots. The bill also recommends extension of the franchise to civilian employees of the United States serving outside the territorial limits of the States. This title would also recommend the extension of the franchise to the wives of members of the Armed Forces, wives of members of the merchant marine, and wives of civilians outside of the United States officially attached to and serving with the Armed Forces.

Title II of H. R. 4048 would authorize the President to designate the head of any executive department to act as the representative of the executive branch to coordinate and facilitate the actions to be performed by the Federal branch in this matter.

The report anticipates that the President would appoint the Secretary of Defense, in all probability, to coordinate the Federal activities in this field, since the Department of Defense has more personnel away from voting residence than any other department.

Mr. Speaker, it was brought out during the hearing before the Committee on Rules that action should be taken on this bill just as soon as possible during these first few months of 1955 and unless action is taken before the State legislatures adjourn, the machinery cannot be adopted by the States, if they so desire to adopt the recommended voting machinery, in time for the next general election. In view of this I sincerely hope that the House will vote to adopt House Resolution 149, and that we will then proceed to the consideration of the bill H. R. 4048.

The SPEAKER. Is there objection to the request of the gentleman from Texas [Mr. BURLESON]?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That this act may be cited as "The Federal Voting Assistance Act of 1955."

TITLE I

Recommendations of the Congress to the several States

SEC. 101. The Congress hereby expresses itself as favoring, and recommends that the several States take, immediate legislative or administrative action to enable every person in any of the following categories who is absent from the place of his voting residence to vote by absentee ballot in any primary, special, or general election held in his election district or precinct, if he is otherwise eligible to vote in that election:

(1) Members of the Armed Forces while in the active service, and their spouses and dependents.

(2) Members of the merchant marine of the United States, and their spouses and dependents.

(3) Civilian employees of the United States in all categories serving outside the territorial limits of the several States of the United States and the District of Columbia and their spouses and dependents when residing with or accompanying them, whether or not the employee is subject to the civil-service laws and the Classification Act of 1949, and whether or not paid from funds appropriated by the Congress.

(4) Members of religious groups or welfare agencies assisting members of the Armed Forces, who are officially attached to and serving with the Armed Forces, and their spouses and dependents.

SEC. 102. To afford ample opportunity for persons covered by section 101 of this act to vote for Federal, State, and local officials and to use the absentee balloting procedures to the greatest extent possible, it is recommended that each of the several States—

(1) accept as applications for absentee ballots under such States' absentee balloting laws, as applications for registration under such States' election laws, and as sources of information to implement State absentee balloting laws, the form of post card (when duly executed by a person covered by section 101 of this act) provided pursuant to this act;

(2) waive registration of persons covered by section 101 of this act, who, by reason of their service, have been deprived of an opportunity to register;

(3) accept the post card application provided pursuant to this act as a simultaneous application for registration and for ballot;

(4) if a special application is required for registration by mail, provide that the necessary forms will be sent with the absentee ballot and may be returned with it;

(5) make provision for persons eligible to register and qualified to vote, who have been honorably discharged from the Armed Forces, or have terminated their service or employment, too late to register at the time when, and at the place where, registration is required to vote at the election next ensuing after such discharge or termination;

(6) authorize and instruct the State or local election officials, upon receipt of the post card application provided pursuant to this act, to mail immediately to the applicant a ballot, instructions for voting and returning the ballot, and a self-addressed envelope;

(7) provide that there be printed across the face of each envelope in which a ballot is sent two parallel horizontal red bars, each one-quarter inch wide, extending from one side of the envelope to the other side, with an intervening space of one-quarter inch, the top bar to be 1¼ inches from the top of the envelope, and with the words "Official Election Balloting Material—via Air Mail," or similar language, between the bars; that there be printed in the upper right corner of each such envelope, in a box, the words "Free of U. S. Postage, Including Air Mail"; that all printing on the face of each such envelope be in red; and that there be printed in red in the upper left corner of each State ballot envelope an appropriate inscription or blanks for return address of sender;

(8) provide that the gummed flap of the State envelope supplied for the return of the ballot be separated by a wax paper or other appropriate protective insert from the remaining balloting material and that there be included in State voting instructions a procedure to be followed by absentee voters, such as notation of the facts on the back of the envelope duly signed by the voter and witnessing officer, in instances of adhesion of the balloting material;

(9) reduce in size and weight of paper, as much as possible, envelopes, ballots, and instructions for voting procedure;

(10) for the purposes of this act, authorized oaths required by State law to be administered and attested by any commissioned officer in the active service of the Armed Forces, or any member of the merchant marine of the United States designated for this purpose by the Secretary of Commerce, or any civilian official empowered by State or Federal law to administer oaths;

(11) include in State voting instructions express information concerning the type or types of writing instruments which may be used to mark the absentee ballot, preferably pen or indelible pencil; and

(12) provide that absentee ballots will be available for mailing to the applicant not later than 45 days before the last date on which such ballot will be counted.

SEC. 103. It is recommended that each of the several States make available to the officer designated by the President under section 201 of this act appropriate statistical data to assist him in compiling comprehensive information of operations under this act.

TITLE II

Federal responsibilities

SEC. 201. The President is hereby authorized to designate, with provision for redelegation, the head (hereinafter referred to as the Presidential designee) of any executive department or agency to coordinate and facilitate such actions as may be required to discharge Federal responsibilities under this act. The Presidential designee is authorized to request from other executive departments and agencies such assistance as he deems necessary to effectuate the purposes of this act, and shall submit a report to the President and to the Congress in odd-numbered years. Such report shall cover the administration of Federal responsibilities authorized under this title, the progress of the States in carrying out the recommendations contained in title I, statistical data relating to absentee voting, and such other information as the Presidential designee may consider appropriate.

SEC. 202. The Presidential designee shall request, annually or more often when appropriate, each State to furnish him with current absentee voting information for such State. Such information shall include election dates, officers to be elected, constitutional amendments, and other proposals to be voted on, absentee registration and voting procedures, and other relevant data. As soon as possible after receipt of such information, he shall furnish it to the departments and agencies of the executive branch affected by this act. Such departments and agencies are authorized to reprint and distribute such information to the extent necessary.

SEC. 203. All Government officials shall, to the extent practicable and compatible with their primary responsibilities, cooperate with the Presidential designee in carrying out the purposes of this act. All such officials shall as far as practicable, take all reasonable measures to expedite, transmit, deliver, and return post cards, ballots, envelopes, and instructions for voting procedures mailed to or by persons to whom this act is applicable. In addition, and as requested by the Presidential designee, it shall be the duty of—

(1) the Attorney General to cooperate and advise with the Council of State Governments in the formulation of drafts of State legislation designed to implement the recommendations for State action contained in this act;

(2) the Administrator of General Services to cause to be printed and distributed post cards for use in accordance with the provisions of this act. Such post cards shall, wherever practicable and compatible with other operations, be made available by the department or agency concerned to persons to whom this act is applicable for use at any general election at which electors for President and Vice President or Senators and Representatives are to be voted for. For use in such elections post cards shall be made available outside the territorial limits of the United States not later than August 15 prior to the election and within the territorial limits of the United States not later than September 15 prior to the election. To the extent practicable and compatible with other operations, post cards shall also be made available at appropriate times to such persons for use in other general, primary, and special elections; and
